VOL. 21
JULY TO DEC 1852
LONDON
WILLIAM LITTLE 198 STRAND

CHRONOLOGY OF REMARKABLE EVENTS.

FROM JUNE 25 TO DECEMBER 25, 1852.

JUNE.

25.—Burial of a French Refugee (Francis Goujon) at St. John's Wood Cemetery; on which occasion *éloges* were delivered by MM. Louis Blanc, Ledru Rollin, and others.

28.—Prince Albert reviewed the Hon. Artillery Company.—First session of the Legislative Body under the *régime* of Louis Napoleon closed.—A grand entertainment given on board H.M.S. *Prince Regent* to the inhabitants of Cork and neighbourhood: commencing with a theatrical representation by the officers of the ship, and closing with a ball.

29.—Sanguinary affray in Stockport, between Roman Catholics and Protestants; in which several lives were lost, and two Roman Catholic chapels and much private property destroyed.

30.—The Princess Gonramma, daughter of the ex-Rajah of Coorg, baptised at the private chapel, Buckingham Palace, the Queen standing as sponsor.—A deputation from the Metropolitan Common-law Clerks presented an address and testimonial to Sir John Patteson, on the retirement of his Lordship from the Bench.—Consecration of Christ Church, at Ealing, by the Bishop of London: this edifice was raised at the sole expense of Miss Lewis.—One man killed, and eight others seriously injured, by the upsetting of twelve tons of red-hot liquid iron, on the premises of Marc and Co., at Blackwall.

31.—The twenty-fourth party of emigrants, about fifty in number (sent out under the auspices of the Female Emigration Society), took their departure from Gravesend, by the *City of Poonah*, for Sydney.

JULY.

1.—Royal Proclamation issued, dissolving Parliament, and directing a new Parliament to assemble on the 20th August following.—Information received of excessive mortality on board the *Lady Montague*, 374 persons, mostly Chinese emigrants, having died during the passage from China to Callao.

5.—The Edinburgh Chess-club met for the first time in their new Club-room, 73, Princes-street.

6.—Several persons fainted in the streets of the metropolis, and two persons died, from the excessive heat; the thermometer ranging from 80 deg. to 82 deg. in the shade.

7.—The *John Bowes*, first screw collier, launched at Jarrow.—A trial of anchors of all nations made at the Royal Dockyard, Sheerness; at which Trotman's improved Porter's anchor was proved to have 25 per cent. more holding property than any of the others.

8.—A conflagration at Montreal commenced, continuing through the night and the next day, destroying 1100 houses, and property to the amount of £210 000. The sufferers left homeless by this calamity numbered 10,000.

12.—Collision at Burnley of a railway train, conveying 1200 persons—scholars and teachers of the Wesleyan Sunday-schools of Burnley—by which four were killed and thirty seriously injured.

13.—Right Hon. H. Labouchere married to the Lady Mary Howard.

14.—The tubular bridge across the Wye tested previously to being opened for traffic: two engines, with their trains, weighing more than 200 tons, passed over.

16.—The spire of the parish church at Leighton Buzzard struck by lightning, which displaced twenty-five feet of the masonry.

18.—Louis Napoleon received at Strasburg with great enthusiasm, and attended the imposing ceremony of the "benedicion" of the locomotive engines at the railway terminus.

19.—Wall of a concert-room at Bolton gave way, falling upon some small tenements crowded with poor families, and burying men, women, and children in the ruins: three persons were found suffocated, and some others died subsequently of the injuries which they received.—The members of the Garibaldi Improvement Society (accompanied by their friends (in all about 960 persons), started on an economical trip from Glasgow to Dumfries and back (184 miles), at 2s 6d.—Louis Napoleon reviewed the troops at Strasburg, witnessed a sham forced passage across the Rhine; subsequently crossed that river, and was present at a review of the troops of the Grand Duke of Baden.

21.—Mr. Scrope (author of "Deer Stalking" and "Salmon Fishing") died, in his 81st year.

23.—The bronze statue erected to the late Sir R. Peel, in the market-place, Tamworth, inaugurated.—The Cambrian Archæological Association commenced their sixth annual meeting at Ludlow, where are many matters of archæological curiosity.

25.—A one mile race for a sweepstakes of £75, between Weathall, Seward, and Jackson (the most noted runners of the day) at Copenhagen-grounds; resulting in Westhall "coming in" an easy winner.

27.—The new church of St. Mary, at Abberley (founded by the Moillet family), consecrated by the Lord Bishop of Her.ford.—The Archbishop of Canterbury consecrated, at Croydon, a new church, built at his Grace's sole charge.—The remains of Marshal Exelmans (who was killed by a fall from his horse the preceding week) buried with great military pomp in the church of the Invalides, Paris; the President being present at the funereal rites.

28.—General Gourgaud (favourite aide-de-camp of Napoleon, and who subsequently followed him in his exile to St. Helena) interred with military honours in the cemetery of Père la Chaise.

29.—The ancient parish church of St. Nicholas, Ickleham (under a course of restoration for the last five years), opened with the happiest auspices.

31.—The *Anne Webber* emigrant ship sailed for Australia from Sunderland; the first that ever left that port for the Pacific.—A poor widow, Elizabeth Thomas, residing at Preston, near Birkenhead, murdered, while asleep, by her son, in a fit of insanity.

AUGUST.

2.—The Sheerness Dockyard Brigade went through a series of manœuvres in a most efficient manner.—Thirty-six men (the remainder intending to go by the *Northumberland*, lying off Gravesend, to proceed to Australia; thirty of whom were sent out at the expense of the Female Emigration Society): the Recorder of London and the Rev. Baptist Noel gave farewell addresses.—Doggett's Coat and Badge comes off for on the Thames, Charles Constable being the winner.

2.—The *Matoe* was struck by lightning, off the Island of Malta, and instantly went down: the crew, 14 in number, and two passengers, being lost.

4.—As a waggon, laden with hemp, was proceeding through Lincoln's-inn-field:, a broad sheet of flame suddenly burst from the hemp; the aid of a fire-engine being required to extinguish the flames.

5.—The ceremony of "planting the first pillar" of the new Crystal Palace, at Sydenham, took place, in the presence of a large concourse of influential persons.—A successful effort made to raise the *Duchess of Kent* steamer from where she lay in mid-channel, between Northfleet and Grays, in the Thames.

6.—In a steam-boat collision on Lake Erie, between the *Ogdensburg* and *Atlantic*: 200 lives lost.

7.—The King of the Belgians obtained damages for the improper cultivation of a farm, part of the Claremont estate.—A *fête* given by the City Steam-boat Company to their crews and servants: the thirteen vessels belonging to the company were put through sundry evolutions, presenting a gay appearance.—The *Harpy* steamer (about whose fate serious fears had been entertained) arrived at Portsmouth: the cabin-doors, mess-tables, and stools, had to be converted into fuel; and the supply of water for the passengers and crew was only kept up by saving the condensed steam.—Two gentlemen of Southampton embarked on board the mail-steamer *Formosa*, for Australia, on a *pleasure trip*, intending to return to England by the first opportunity.

9.—Benjamin Thompson, a convict at Woolwich Dockyard, heroically saved three men who had incautiously descended into a boiler charged with foul air: a reprieve has subsequently been granted to him for his gallant conduct.

10.—A terrific storm of thunder and lightning occurred at Manchester, by which four persons were killed, and many others seriously injured.—The Royal Botanic Society of London held its anniversary meeting, in the Council-room, Regent's-park.—The barrier of an emigrant ship (the *City of Lincoln*) adjudged to pay the passage-money, and £3 compensation, to a person who had taken a passage, for contention of the vessel beyond the time appointed for sailing.—The Merseyshire Railway, connecting Elgin with the Moray Firth, opened with great ceremony.

11.—A *fête* given to the Metropolitan Church of England Scripture-Readers' Association, at Moor-park, by the Earl of Grosvenor.—A "maiden sitting" at Guildhall: the chargechiefs from the several police-stations comprised within the district, not presenting a single case.

13.—Vice-Chancellor the Hon. Sir J. Parker died suddenly.

15.—Dr. Herbert Mayo (a distinguished member of the medical profession, and the author of some esteemed works on medical science) died at Bad Weilbach, near Mayence.—Entrance of the first steamer (the *Sir Robert Peel*) into Port Natal.

16.—The British Archæological Association commenced, at Newark, its ninth annual congress.—Information received of the total wreck of the *Blanche* Indiaman. The captain and crew, in the short-boat, rowed for one day and one night, and, after many extraordinary adventures, they ultimately arrived at their destination.

17.—The extraordinary number of 244 vessels, with an aggregate tonnage of 36,000 tons, entered inwards at the Custom-house.—The Nassau balloon ascended from the Vauxhall-Gardens, for scientific purposes—one of a series of ascents, under the superintendence of the Kew Committee of the Council of the British Association.

18.—At Barnstaple, the *Lady Errington* (the first emigrant ship fitted up at that port) towed down the river.—A lengthened investigation into the election riots at Six-mile Bridge, resulted in the coroner's jury returning in a verdict of "Wilful Murder" against Mr. Delmege, Justice of the Peace, and eight soldiers.—A farewell emigration meeting was held at Southampton, on board the *Ballaragh*, at which Mrs. Chisholm gave an encouraging address to the emigrants.—The Duke of Hamilton, premier peer of Scotland, died, aged eighty-four.—Another unsuccessful attempt made by five travellers to ascend Mont Blanc.

19.—An electrical dial fixed in the centre of the five thoroughfares, opposite Hungerford-market, Strand: it is illuminated by night.—A spirited regatta took place at Lisbon for a silver cup, the *Corcs* being declared the winner.

20.—The inauguration of a bronze colossal statue, to the memory of Sir R. Peel, took place at Leeds.—A grand procession of Mount Etna, the volcano continuing for weeks in a state of destructive activity.

21.—At the Cove Fortress, the Squadron Cup gained by the *Musquito*.—The *Great Britain* left for Australia with 630 passengers on board; crew, 130.

22.—Another planet discovered by Mr. Hind, of Mr. Bishop's observatory, Regent's-park.

23.—A collision took place on the Lancashire and Yorkshire Railway, by which fifteen persons were considerably injured.

24.—The Archæological Institute of Great Britain and Ireland assembled at Newcastle-upon-Tyne.—Mr. Levy, of City-road, London, presented to police-constable Bushbridge a silver watch, as a mark of gratitude, for having, when his house was on fire, rushed through the flames, and rescued Mrs. Levy and her three children.—Two persons convicted, at Portsmouth, of removing smuggled tobacco from vessels of the Royal squadron.—A *fête* held by the Duke Institution at Bowood, the seat of the Marquis of Lansdowne.

25.—A *fête* given at Mount Boone Park, near Dartmouth, to about 6000 persons.

26.—The City Soup-kitchen, situated in Victoria-street, opened by the Lord Mayor.

28.—Mr. Shenfield, Essex, an old woman who had received parochial relief for many years, died, worth £1000.

29.—Commencement of the first railway in Brazil (the Petropolis) by the Emperor in person.

30.—Mdme. Poitevin ascended from Cremorne-gardens on the back of a bull, which was suspended by cords from the car of a balloon.

SEPTEMBER.

1.—The British Association commenced its twenty-second meeting, at Belfast.

2.—The Manchester Free Library opened.

3.—An interesting trial of anchors made in the dockyard of Sheerness.

8.—Harvest day at the Philanthropic Society's farm, Redhill, instituted for the reformation of juvenile offenders.—Mr. Green made his *fire-humbrella* balloon ascent.

9.—The attaining of his majority by the Earl of Dalkeith, celebrated with festive pomp at Sanquhar.

11.—Died at Tunbridge-Wells, Mr. Porter, author of "The Progress of the Nation," &c.

13.—A monster balloon ascended from Cremorne-gardens, with thirty persons in the car and on the loop; and with Mdame Poitevin and parachute attached.

14.—THE DUKE OF WELLINGTON DIED, at Walmer Castle.—The *Windsor Castle* (new name), steamer, built at Bodenger's, 140 guns, launched at Pembroke Dockyard: the largest ship in the world.—Rejoicings at Teignmouth in consequence of its being made an independent port.

15.—Died, at St. Martin's-in-the-Fields, James Coleman, aged 102, in full possession of his faculties.—At the Surrey Sessions a solicitor found guilty of obtaining money under false pretences, and sentenced to six months' hard labour.

16.—In the Gulf of Mexico, the *Gazela* fell in with the wreck of the *Mount Vernon*, taking off six persons who had been exposed to a terrible amount of suffering, having been for six days without provisions or water: the remainder of the crew and passengers had perished.

17.—On this and following day the archery societies of Devon met at Bitton Manor, Teignmouth.—The annual exhibition of the Montreal Horticultural Society: profusely supplied with flowers and fruits.—Died, at an advanced age, the Count Pompeo Litta, a celebrated Italian author.—The opening of the portion of the South Wales Railway between Swansea and Carmarthen celebrated with great *éclat*—80 pauper emigrants (viz., 30 men, 18 women, and 12 children), started for Port Adelaide; the parish of St. Martin's having provided for their passage out.

18.—The ship *Shirripore* wrecked on the Long Bank, off the coast of Sumatra: of her passengers and crew (520 persons), only five lives were lost.

20.—Died, in his sixty-fifth year, Mr. W. Finden, the celebrated engraver.—A new species of *Coracias garrula* (chattering roll.r) shot near Watford, Herts.

21.—Castanos, Duke de Bailen, died, in his 86th year.

23.—Annual show of the Manchester and Liverpool Agricultural Society, held in the Haymarket, Liverpool.

24.—Tripe and Montague sentenced at the Central Criminal Court, to seven years' transportation, for defrauding intending emigrants, under the plea of being emigration agents.

26.—A severe conflict between a policeman and a burglar, near Highgate, in which the burglar was ultimately mastered.

27.—Two houses in Seven-dials fell in, crushing a great number of the inmates, and burying them in the ruins: there was no loss of life, but several were much injured.

28.—At Crieff, in Scotland, the shock of an earthquake felt.

29.—The Victoria College, Jersey, opened with much ceremony.—The City of London Small Debts Extension Act came into force.—Ingleborough the scene of a festive meeting to celebrate the birth of a son and heir to the Earl of Kinfore.

30.—Opening of the completed portion of the Oxford and Birmingham Railway, between Banbury and Birmingham: it was principally in reference to this line that the "Battle of the Gauges" was fought, swelling the original estimated cost of £900,000 for this line to £3,000,000.

OCTOBER.

1.—At the London Tavern were distributed the prizes to the London Advertisers in the Crystal Palace, last year.—At Madrid, the remains of the Duke de Baylen interred in the Church of the Atocha, with regal honours.

3.—Several fires occurred; in one of which (at a firework factory) three persons were dragged out of the burning premises, dreadfully scorched, who subsequently died.—The Church of St. Mary-le-Bow, Cheapside, re-opened for Divine worship, having been closed for repairs and renovations—the latter of which have been effected with considerable taste.

5.—A brilliant meteor seen on the night of.

6.—Vice-Admiral Fraed died, at Acton Castle, Cornwall, in his 82nd year.—A public meeting held in St. Andrew's Hall, Norwich, to examine into the case of Elizabeth Squirrel, a young woman who professed to live without food.

7.—Died, Rear-Admiral Sir E. T. Troubridge.

11.—A great running match between Jackson and Lovett, for the championship and £100, resulted in Lovett bearing off the prize, running the ten miles under 52 minutes.

11.—A great match and testimonial presented by the Court of Aldermen, London, to Aldermen Sidney, for his zealous and successful assertion of the City's rights.—The annual sale of live stock from Prince Albert's farms, held at Norfolk Farm, Windsor Great Park.—Entered at the Custom-house, 193 vessels—92 being from foreign ports.—The Earl of Derby elected Chancellor of the University of Oxford, in the room of the late Duke of Wellington.—The inauguration of the Salisbury Exhibition of the Works of Local Industry, and Antiquities.—A testimonial presented for £400 between the *America* and the *Sovrige*, came off at Ryde, the former winning: an accompanying cutter-yacht (the *Wildfire*), however, arrived at the mark-boat two minutes before the *America*.—The Salisbury Exhibition of Local Industry formally inaugurated by the Mayor and Town-council.

12.—The extraordinary high tide in the river Thames overflowed the banks, doing considerable damage.—The traffic on the main line of the Great Northern Railway suddenly interrupted by an excessive slip of earth at the Ballingate cutting—several hundreds of tons of earth falling upon both lines of rails.

13.—The championship of the Thames contested by Coombes and Coles; the latter proving the victor, carrying off, also, the £400 stakes.—Her Majesty and Prince Albert visit the Britannia Tubular bridge.

16.—Triumphal entrance of the French President into Paris, after his tour to the South.

18.—On the saluting battery, Gibraltar, a long thirty-two-pounder gun burst, with a charge of 10 lb. of powder, whilst at gunnery practice with red-hot shot: several persons were seriously, and one fatally, wounded.

19.—Prince Albert, by a unanimous vote of the elder and younger brethren of the Trinity-house, elected Master, in place of the late Duke of Wellington.—A duel fought at Engelsfeld-green, near Windsor, between two Frenchmen, terminating in the death of one of them, named Cournet.

20.—The anniversary of the Yorkshire Chess Association celebrated at the Public Rooms, Jarrait-street, Hull, under unusually brilliant auspices.—John Girling, one of the keepers of the reptiles in the Zoological Gardens, Regent's-park, foolishly provoking a wild cobra, was bitten in the hand, and died in an hour.

22.—The French President paid a State visit to the Théâtre Français, on which occasion Mdlle. Rachel recited an ode, "L'Empire c'est la Paix."

23.—The *North British Advertiser* contained advertisements of upwards of seventy newly-published works, advertised for situations.—The *Kreuz Zeitung* contained a notice that, as all its writers and printers would be engaged this day (the anniversary of the battle of Leipsic), the paper must not be disappointed if there should be no newspaper produced next morning.

24.—Died, Mr. Daniel Webster, Secretary of State for the United States.

25.—Died, Mr. Vincent Dowling, for many years honourably connected with the metropolitan press.—Admiral Mudge died, at Plympton, Devon, in his 83rd year.

26.—One of the columns of Jupiter Olympus, at Athens, thrown down by a hurricane.

30.—At the Arènes Nationales, in Paris, a rope on which two rope-dancers were performing, at a height of thirty yards, broke: one of the men was killed on the spot, and the other died within an hour.

31.—The premises of the "fire-annihilator" company consumed by fire! A poor woman lost her life in the flames.

NOVEMBER.

1.—Two men suffocated in a drain, in Compton-street; and two others nearly killed in attempting to rescue them.—Removal of the last load of materials from the site of the Great Exhibition Building, Hyde park, for the Sydenham New Crystal Palace.—The first direct communication between Cornhill and Paris, by means of the electric telegraph, took place.—Mr. Chilton, barrister, died at Boulogne: this gentleman's name came before the public in a celebrated action brought by him against the London and Croydon Railway Company; in which, upon a question of threepence, he recovered a verdict of £5000.

2.—Celebration by a dinner (at which one hundred and twenty gentlemen sat down) at Birmingham, of the passing of the Encumbered Estates Act.

3.—Prince Albert installed Master of the Trinity Corporation.—Died, aged 83, Sir W. E. Welby, Bart.

4.—The Council order prohibiting the sending of chicory as coffee came into operation.—The French Senate met, to take into consideration the re-establishment of the Empire, when ten members demanded that the people should be consulted.—Dowager Lady Castlemaine died, at Athlone, aged eighty-four.

5.—Colonel Brunn, M.P., died at Oak Park, in his sixty-second year.—Died, Maximilian-Joseph-Eugène-Augustus-Napoleon, Duke of Leuchtenberg and Prince of Eichstadt, grandson of the Empress Josephine.—Both Houses of Convocation opened.—This being Guy Fawkes's day, the Lord Chancellor, accompanied by several Peers, attended divine service at Westminster Abbey; and the cellars under the Houses of Parliament were duly searched.

6.—A fire broke out in the sheds of the York and North Midland Company's goods' yard, by which property to the amount of £22,000.—Property to the amount of several thousand pounds destroyed by a fire at Paton and Charles's, Wapping.

7.—In the Assembly and Senate, Louis Napoleon and his niece lost their lives by being thrown between the train and the platform.—The French Senate signed the Senatus Consultum, calling upon the French people to nominate Emperor: a single senator (M. Vasillard) voting against the Empire.

8.—Sale of the great gold nugget, weighing 330 oz. 15 dwt., at the price of £1000.

9.—Earthquake shocks felt at different places in England and Ireland.—Died, at Naples, the Earl of Shrewsbury: his Lordship was a zealous adherent and a munificent supporter of the Roman Catholic religion, having contributed £50,000 to the building of Roman Catholic chapels alone.—Mr. Alderman Challis sworn in as Lord Mayor, before the Barons of the Exchequer.—To the great disappointment of sight-seers, no procession took place on "Lord Mayor's Day," in consequence of the death of the Duke of Wellington.

10.—Dr. Mantell, the renowned geologist, died, aged sixty-four.—The remains of the Duke of Wellington removed from Walmer to Chelsea.

11.—The arrors borealis so affected the electric telegraph as to prevent the transmission of messages.—The Queen went in state to the House of Lords, and opened the session with a Speech from the Throne.—The Queen and the Prince Consort, accompanied by the Princess and Princesses of the blood Royal, witnessed the Lying in State at Chelsea Hospital.

12.—Tributes of regret and admiration to the Duke of Wellington paid in both Houses in Parliament: in the Lords, by the Marquis of Lansdowne, Lord Brougham, and the Earl of Derby; in the Commons, by Lord J. Russell, Mr. Gladstone, and Lord Palmerston.—Disastrous floods occurred in various districts: near Hereford a bridge was swept away; and the mail-coach swallowed up in the stream, an inside passenger being drowned.—About 15,000 persons, chiefly of the aristocracy and richer classes, provided with tickets, went to see the Lying-in-State at Chelsea: at one period of the day the carriages extended over two miles.

13.—Intelligence received of a fresh revolution in Buenos Ayres.—An enormous multitude thronged towards Chelsea Hospital, to witness the lying-in-State (this being the first public day), and were wedged into such a compact mass that two women were suffocated, and other persons subsequently died from the pressure.

14.—Died, near Epsom, William Martin, aged 102; leaving a widow aged 80.

15.—In the House of Commons a bill brought in and passed in all its stages, declaring that, as regards bills of exchange and promissory notes, the day appointed for the funeral of the Duke of Wellington shall be treated as the Lord's-day, in the cities of London and Westminster.

16.—Mr. William King committed to the House of Correction for one month on the charge of roasting a cat alive.—The *Propontis* brought intelligence from the Cape to the 9th October, by which it would appear that the frontiers are nearly cleared of the Kaffirs.

17. Died, aged seventy-three, Lieut.-General Shuldham, of the East India Company's service.

18.—STATE FUNERAL OF THE DUKE OF WELLINGTON: At early dawn the marshalling of troops commenced at the Horse Guards (whither the coffin, containing his Grace's remains, had been removed from Chelsea Hospital the preceding night). The coffin was elevated upon a magnificent car, drawn by twelve horses; and, preceded and followed by a vast military force, to the accompaniment of funereal music, slowly proceeded along the streets of the metropolis, thronged with countless myriads, to St. Paul's Cathedral; where, before the bier of the realm and the august representatives of foreign powers, the Church's last rites were performed, and the illustrious dead was consigned to the vault beneath the Britannia Tubular bridge.

18.—Triumphal entrance of the French President into Paris, after his tour to the South.

18.—On the saluting battery, Gibraltar, a long thirty-two-pounder gun burst, with a charge of 10 lb. of powder, whilst at gunnery practice with red-hot shot: several persons were seriously, and one fatally, wounded.

19.—Prince Albert, by a unanimous vote of the elder and younger brethren of the Trinity-house, elected Master, in place of the late Duke of Wellington.—A duel fought at Engelsfeld-green, near Windsor, between two Frenchmen, terminating in the death of one of them, named Cournet.

20.—The anniversary of the Yorkshire Chess Association celebrated at the Public Rooms, Jarrait-street, Hull, under unusually brilliant auspices.—John Girling, one of the keepers of the reptiles in the Zoological Gardens, Regent's-park, foolishly provoking a wild cobra, was bitten in the hand, and died in an hour.

22.—The French President paid a State visit to the Théâtre Français, on which occasion Mdlle. Rachel recited an ode, "L'Empire c'est la Paix."

23.—The *North British Advertiser* contained advertisements of upwards of seventy newly-published works, advertised for situations.—The *Kreuz Zeitung* contained a notice that, as all its writers and printers would be engaged this day (the anniversary of the battle of Leipsic), the paper must not be disappointed if there should be no newspaper produced next morning.

24.—Died, Mr. Daniel Webster, Secretary of State for the United States.

25.—Died, Mr. Vincent Dowling, for many years honourably connected with the metropolitan press.—Admiral Mudge died, at Plympton, Devon, in his 83rd year.

26.—One of the columns of Jupiter Olympus, at Athens, thrown down by a hurricane.

30.—At the Arènes Nationales, in Paris, a rope on which two rope-dancers were performing, at a height of thirty yards, broke: one of the men was killed on the spot, and the other died within an hour.

31.—The premises of the "fire-annihilator" company consumed by fire! A poor woman lost her life in the flames.

NOVEMBER.

1.—Two men suffocated in a drain, in Compton-street; and two others nearly killed in attempting to rescue them.—Removal of the last load of materials from the site of the Great Exhibition Building, Hyde park, for the Sydenham New Crystal Palace.—The first direct communication between Cornhill and Paris, by means of the electric telegraph, took place.—Mr. Chilton, barrister, died at Boulogne: this gentleman's name came before the public in a celebrated action brought by him against the London and Croydon Railway Company; in which, upon a question of threepence, he recovered a verdict of £5000.

17. Died, aged seventy-three, Lieut.-General Shuldham, of the East India Company's service.

18.—STATE FUNERAL OF THE DUKE OF WELLINGTON: At early dawn the marshalling of troops commenced at the Horse Guards (whither the coffin, containing his Grace's remains, had been removed from Chelsea Hospital the preceding night). The coffin was elevated upon a magnificent car, drawn by twelve horses; and, preceded and followed by a vast military force, to the accompaniment of funereal music, slowly proceeded along the streets of the metropolis, thronged with countless myriads, to St. Paul's Cathedral; where, before the bier of the realm and the august representatives of foreign powers, the Church's last rites were performed, and the illustrious dead was consigned to the vault beneath the Britannia Tubular bridge.

18.—Triumphal entrance of the French President into Paris, after his tour to the South.

18.—On the saluting battery, Gibraltar, a long thirty-two-pounder gun burst, with a charge of 10 lb. of powder, whilst at gunnery practice with red-hot shot: several persons were seriously, and one fatally, wounded.

19.—Prince Albert, by a unanimous vote of the elder and younger brethren of the Trinity-house, elected Master, in place of the late Duke of Wellington.—A duel fought at Engelsfeld-green, near Windsor, between two Frenchmen, terminating in the death of one of them, named Cournet.

20.—The anniversary of the Yorkshire Chess Association celebrated at the Public Rooms, Jarrait-street, Hull, under unusually brilliant auspices.—John Girling, one of the keepers of the reptiles in the Zoological Gardens, Regent's-park, foolishly provoking a wild cobra, was bitten in the hand, and died in an hour.

22.—The French President paid a State visit to the Théâtre Français, on which occasion Mdlle. Rachel recited an ode, "L'Empire c'est la Paix."

23.—The *North British Advertiser* contained advertisements of upwards of seventy newly-published works, advertised for situations.—The *Kreuz Zeitung* contained a notice that, as all its writers and printers would be engaged this day (the anniversary of the battle of Leipsic), the paper must not be disappointed if there should be no newspaper produced next morning.

24.—Died, Mr. Daniel Webster, Secretary of State for the United States.

25.—Died, Mr. Vincent Dowling, for many years honourably connected with the metropolitan press.—Admiral Mudge died, at Plympton, Devon, in his 83rd year.

26.—One of the columns of Jupiter Olympus, at Athens, thrown down by a hurricane.

30.—At the Arènes Nationales, in Paris, a rope on which two rope-dancers were performing, at a height of thirty yards, broke: one of the men was killed on the spot, and the other died within an hour.

31.—The premises of the "fire-annihilator" company consumed by fire! A poor woman lost her life in the flames.

NOVEMBER.

1.—Two men suffocated in a drain, in Compton-street; and two others nearly killed in attempting to rescue them.—Removal of the last load of materials from the site of the Great Exhibition Building, Hyde park, for the Sydenham New Crystal Palace.—The first direct communication between Cornhill and Paris, by means of the electric telegraph, took place.—Mr. Chilton, barrister, died at Boulogne: this gentleman's name came before the public in a celebrated action brought by him against the London and Croydon Railway Company; in which, upon a question of threepence, he recovered a verdict of £5000.

2.—Celebration by a dinner (at which one hundred and twenty gentlemen sat down) at Birmingham, of the passing of the Encumbered Estates Act.

3.—Prince Albert installed Master of the Trinity Corporation.—Died, aged 83, Sir W. E. Welby, Bart.

4.—The Council order prohibiting the sending of chicory as coffee came into operation.—The French Senate met, to take into consideration the re-establishment of the Empire, when ten members demanded that the people should be consulted.—Dowager Lady Castlemaine died, at Athlone, aged eighty-four.

5.—Colonel Brunn, M.P., died at Oak Park, in his sixty-second year.—Died, Maximilian-Joseph-Eugène-Augustus-Napoleon, Duke of Leuchtenberg and Prince of Eichstadt, grandson of the Empress Josephine.—Both Houses of Convocation opened.—This being Guy Fawkes's day, the Lord Chancellor, accompanied by several Peers, attended divine service at Westminster Abbey; and the cellars under the Houses of Parliament were duly searched.

6.—A fire broke out in the sheds of the York and North Midland Company's goods' yard, by which property to the amount of £22,000.—Property to the amount of several thousand pounds destroyed by a fire at Paton and Charles's, Wapping.

7.—In the Assembly and Senate, Louis Napoleon and his niece lost their lives by being thrown between the train and the platform.—The French Senate signed the Senatus Consultum, calling upon the French people to nominate Emperor: a single senator (M. Vasillard) voting against the Empire.

8.—Sale of the great gold nugget, weighing 330 oz. 15 dwt., at the price of £1000.

9.—Earthquake shocks felt at different places in England and Ireland.—Died, at Naples, the Earl of Shrewsbury: his Lordship was a zealous adherent and a munificent supporter of the Roman Catholic religion, having contributed £50,000 to the building of Roman Catholic chapels alone.—Mr. Alderman Challis sworn in as Lord Mayor, before the

THE ILLUSTRATED LONDON NEWS

No. 567.—VOL. XXI.] FOR THE WEEK ENDING SATURDAY, JULY 3, 1852. [SIXPENCE.

THE OLD AND THE NEW PARLIAMENTS.

For five sessions have the interests and hopes of the people been bound up with the old Parliament. For five sessions have its proceedings occupied, daily and weekly, all the journals and all the readers of the empire. They may have scolded it or praised it, loved it or despised it, but they have continually written and talked about it, and have taken in it that sort of interest a parent takes in a child which he fears is more prone to evil than good, and causes him more trouble than joy. But, as we do not lose even the scapegrace who has been long associated with our cares and thoughts, or the enemy we have been contending with for years, without feeling a painful void, so we cannot part with the old Parliament, bad as we may think it, and forget at once that it had ever existed. We know not that we shall ever see or hear again the solemn Colonel Sibthorp, the *naïve* Mr. Bell, the eccentric Mr. H. Drummond, the burly and entertaining coroner for Middlesex, the smart Mr. Osborne, the profound but casuistical Mr. Gladstone, and a host of other gentlemen who have daily, for months, contributed to our instruction or amusement. We are pretty sure, indeed, of seeing these, or some others equally worthy, again assembled in the course of a few months, and again concentrating on themselves the eager attention of the whole people. Like the King, the Parliament never dies; it only, like a hybernating animal, has its functions suspended for a season.

Year after year the public look with renewed interest to its renewed life. Whatever may be the lassitude, weariness, or disappointment it may have caused before it closes its session, we forget it all in a few months; and when it is about to meet, and in the first few days of its existence, seem to think that the nation would go to wreck and ruin but for its labours. Long, however, before they are closed, the public generally get heartily tired of its presence, complain of its wearying debates absorbing all other things, wish it at an end, and are ready to dispense with its services for half a year, to renew, again their hopes and interest in its re-assembling. What happens with every session happens, too, with every Parliament; and, while we condemn almost every one before its natural life be extinct, we hope for almost miraculous improvements from its successor. The present session and the Parliament now terminated, which have wearied the public for some time, share the common fate. The Parliament has come to an end amidst general disappointment and equally general hopes that its successor will surpass it in skill, and actually do all that can be desired.

The former sessions have already been judged. The Parliament of 1847 will be chiefly remembered hereafter as the author of the act of 1849 for repealing the Navigation Laws. The Corn Laws were of modern origin, and so obviously intended to benefit a particular class, that from the time of their enactment they were continually assailed, and always spoken of as anomalous. On this subject the national policy has undergone repeated changes; but from the time of Cromwell at least, if not before, the Navigation Laws had formed a settled part of the national policy, steadily adhered to through all vicissitudes by all practical statesmen, and ratified by the highest theoretical authority. Nevertheless, they had become inimical to the welfare they were intended to promote, as the effects of repealing them have amply demonstrated; and the Parliament, the existence of which is now terminated, will be distinguished in history as having abrogated a policy and an institution that were almost as old as the Monarchy itself. If the abolition of the Corn Laws conferred the greater benefit on the people, the abolition of the Navigation Laws is historically the more memorable change, and, though the necessary consequence of previous steps, marks more decidedly a great epoch in the progress of society. The effects of the former are only indirectly cosmopolitan; but the latter was directly intended to share advantages with all the world, supposed to be exclusively and peculiarly British and essential to our greatness. Even the reform of the Parliament in 1832, and the previous alteration of the laws relative to the Catholics, were less remarkable changes than the abrogation, in 1849, of laws that had been supposed for three

REVIEW OF THE HON. ARTILLERY COMPANY, BY HIS ROYAL HIGHNESS PRINCE ALBERT CAPTAIN-GENERAL AND COLONEL.—(SEE NEXT PAGE.)

hundred years to secure the maritime ascendancy and safety of our country.

The session just terminated, and the sessions of 1851 and 1850, did nothing comparable with that of 1849. In February the Parliament began its labours amidst the finest weather and some appre-hensions of France, which died away before the bill could be passed which was to add to our security, and great hopes that "the time was come for calmly considering" and "amending the acts of the late reign relating to the representation" of the people in Parliament. Personal disputes at the Cabinet had ceased, just before, one of its most powerful members to be ejected, who, after Parliament met, used his power in turn to destroy the Cabinet; it was broken up in less than three weeks after Parliament met, and all the hopes of the people at once dissipated by the appointment of Lord Derby to be Prime Minister. From that time till now Parliament has been kept together rather to serve the purposes of the Ministry than to transact important business in the interests of the public. Beyond voting the usual supplies, it has done little except pass an unjust militia law and make some amendments in the administration of equity. The change in the Cabinet deranged at once the functions of the Legislature. Ever since, the public have been only anxious to get rid of it, that they might pronounce their opinion on Lord Derby's Government, and elect a House of Commons to pull it from its seat or give it the strength of the public confidence. Since the power of deciding the national policy is restored to the constituencies.

It is scarcely necessary to say that the new Parliament will be what they make it. It is they who breathe into it the breath of its life. It will answer or deceive their hopes according as they constitute it. What they will make of it, and what they can hope from it, we can yet hardly tell. In the five years which have elapsed since 1847, there have been a great increase of people and a great change in opinion. In some places the constituencies have been nearly stationary, in others they have increased so much as to make their conduct in 1847 no criterion of what they will do in 1852. Within that period, however, all the fears entertained as to the effects of Free Trade have been dissipated, and all the predictions that it would cause disorder and decay have been falsified. Experience has set its seal to theory, and made, by the tranquility and prosperity of the bulk of the people, the policy of 1846 irreversible. Lord Derby at the commencement of the session was avowedly the advocate of Protection; but he and most of his friends have since declared that it is impossible to restore it. Almost universally it is admitted to be dead, with no hope of resurrection. One great question, therefore, is set at rest—one bone of contention removed, one principle confirmed, and freedom for industry re-established as the pole star of all future policy.

What have we, then, to hope for from the new Parliament? The reform promised at the beginning of the late session, but more extensive than that embodied in Lord John Russell's bill, is generally demanded, and the Parliament will be formed to give effect to the demand. Reduction of expenditure, and financial reform, carrying with them large changes in and further reduction of taxation, are the principles on which many constituencies will elect their representatives. So much, too, has already been done, that much more will be easy of performance. The liberation of home industry will be the necessary consequence of giving freedom to foreign trade, and the abolition of so many customs duties will ensure at no very distant day a complete revision of the Excise laws. The Derby Ministry has talked of relieving agricultural distress by a change of taxation. What it contemplates is a mere financial trick, which will not satisfy any of the conditions of Financial reform, nor give effect to the principles of Free Trade. It is only by economy and retrenchment that relief can be afforded.

Amongst the people religious questions excite great interest, and not a few elections will be influenced if not decided by them. Such disputes darken our future prospects. Never has the Legislature interfered with religion to the public advantage, and the old Parliament increased very much all the natural difficulties in which the public passions involve the subject, by taking it up in the last two sessions. Only forbearance and charity can soften, and only time can heal, the disputes and dissensions which prevail, and which will be likely to influence, more than is for the public good, the elections and the debates and the acts of the new Parliament. The accession of Lord Derby to office, and his bidding for support by appeals to religious prejudices, have much increased their asperity, and lead us to anticipate in the new Parliament not a few disputes on the most intangible and difficult of all the subjects with which our mixed Legislature has to deal.

If it be true, as Lord Maidstone says in his address to the electors of Westminster, that "after Lord Derby comes the deluge," it is also true that with him we shall have a chaos. Lord Maidstone's prediction, borrowed from Metternich, is intended to frighten the public into maintaining Lord Derby in power; but they will prefer the chance of the deluge to the certainty of a chaos, and first of all things the new Parliament will probably expel from power Lord Derby's Ministry.

REVIEW OF THE HON. ARTILLERY COMPANY.

ON Monday, Field-Marshal his Royal Highness Prince Albert, as Captain-General and Colonel, reviewed the Hon. Artillery Company, in the extensive grounds attached to the Armoury House, Finsbury-square. The hour appointed for the review was two o'clock; but, owing to other engagements, the Prince Consort did not arrive until half-past four. The men, numbering 200 rank and file, each supplied with 21 rounds of ammunition, assembled at the first-mentioned hour, under the command of Lieut.-Colonel Fitzroy, M.P. They were attired in summer uniform. On the right of the line were placed four pieces of cannon. The windows of the Armoury House were filled with ladies and gentlemen. The grounds beneath were also well covered; amongst the attendants being several of the non-commissioned officers and privates of the Household Troops. Colonel Fitzroy having inspected the line, a few volleys were discharged, and the men drew up in readiness to receive the Royal Commandant. The Prince, attended by Colonel Grey and Colonel Biddulph, arrived in one of the Royal carriages, and was received at the Armoury House by Colonel Fitzroy, Major Barnard, and the other officers of the corps. The chargers in attendance were instantly mounted, and the Prince, with the officers, entered the ground. A Royal salute of 21 guns was then fired, and the line presented arms. The Prince next rode round, and made a minute inspection, after which the men marched past, the band playing the Coburg March. They then fired in files, columns, and lastly in line, performing a variety of evolutions in the most precise and soldier-like manner. The artillery was next brought forward, after which the line was once again formed, and arms were presented. The Prince then highly complimented Colonel Fitzroy and the other officers of the regiment, and immediately left for Buckingham Palace.

Mr. Grissel, who has been engaged for so many years on the New Houses of Parliament, and is identified with them as the builder, has lost the appointment. Tenders were obtained from Messrs. W. Cubitt and Co., Kelk, Jay, and others, which ranged, we believe, from more than £180,000 to £153,000. Mr. Grissel declined the tender.

The chapel in which the celebrated Dr. Achilli for some time officiated is situated in Dufour place, leading out of Broad-street, Golden-square. It has been [illegible] for a season past.

The following [illegible] in the *Presse* (French newspaper),—"There has been a [illegible] Port Stanley [illegible] by one of the [illegible] and the soldier who first [illegible] was [illegible] a balloon having risen slowly from the ground, escape of [illegible] to be our very humble [illegible] a gentleman's desk and a box's [illegible] in the after a very handsome album was wrapped up [illegible] In the album there was a pencil drawing of the panorama of the mountains of the country, signed 'Elias Ockx.' There was nothing to indicate the origin of this mysterious balloon. From the direction of the wind, it is supposed that it came from France, but beyond that all is a mystery."

FOREIGN AND COLONIAL NEWS.

FRANCE.

The present week sees the close of the session of the Legislature in Paris, as well as in London.

On Monday last, the first session of the Legislative Body, under the new *régime* of the Prince President, was closed with a Message from Louis Napoleon, which, however, was not delivered in person, but was communicated in the least ceremonious manner possible to the Assembly.

It was conveyed in a sealed envelope by M. Edgar Ney, one of the President's aides-de-camps, dressed in the uniform of a Colonel of hussars, who entered the hall of the Assembly, accompanied by two ushers, and having placed the parcel in the hands of the President of the Assembly, immediately left the house, not even waiting to hear it read. M. Billault then read the Message from the chair. It was as follows:—

Elysée National, June 28, 1852.

Gentlemen,—At the moment when the session of 1852 is about to close, I am anxious to thank you for your co-operation and for the loyal support which you have given to our new institutions. You have known how to resist what is most dangerous amongst men assembled together, namely, the enticement of party spirit; and having set aside all susceptibility, you occupied yourselves with the great interests of the country, comprehending that the time for passionate and sterile speeches was past, and that of business had arrived.

The application of a new system always meets with difficulties, and you have found that to be the case. If occupation appeared to be wanting at your first sittings, you clearly perceived that the desire to abridge the duration of my dictatorial power, and my anxiety to call you about me, were the causes of that circumstance, by depriving the Government of the time necessary for the preparation of the laws which were to be submitted to you.

The natural consequence of that exceptional state of things was an accumulation of business at the end of the session. Nevertheless, the first trial of the Constitution, a together of French origin, must have convinced you that we possess the conditions of a strong and free Government. The Executive power is no longer that motionless object against which the various Oppositions directed with impunity their weapons. It can now resist such attacks, and can henceforward pursue a regular system without having recourse to arbitrary acts or underhand proceedings. On the other hand, the control of the Assembly is a serious one, for discussion is free, and the vote of the taxes decisive.

As to the imperfections which experience will have brought to light, our common love for the public good will unceasingly aim at lessening the inconveniences resulting from them until such time as the Senate shall have pronounced.

During the interval between the present session and the next, I will devote all my attention to seek out the wants of the country, and to get ready measures which will allow the charges of the State to be diminished, without in any way compromising the public services. At your return I will inform you of the result of our labours, and of the general state of affairs, by the Message, which the Constitution obliges me to address to you every year.

In returning to your homes, you will be the faithful echoes of the feeling which exists here confidence in conciliation and peace. Tell your constituents that at Paris, the heart of France, that revolutionary centre which by turns disseminates through the world light or conflagration, you have seen an immense population applying their energies to the task of removing the traces of revolutions and devoting themselves with joy to labour, and with security to the future. They who, in their delirium, were impatient of every restraint, were beheld by you painting with acclamation the return of our eagles—the symbols of authority and of glory.

As that imposing spectacle, at which religion consecrated by its benedictions a great national *fête*, you have remarked their respectful demeanour—you have beheld that army so proud, which saved the country, raise itself still higher in men's esteem, in kneeling piously before the image of God, presented from the height of the altar.

That implies that there is in France a Government animated by faith, and by a love of good—which rests for support on the people, the source of all power—on the army, the source of all strength—and on religion, the source of all justice.

Accept the assurance of my sentiments of esteem. LOUIS NAPOLEON.

The speech excited no very marked indications of feeling, favourable or otherwise, a few cries of "*Vive Napoleon!*" being alone heard at its close.

On Tuesday about 150 of the members of the Legislative Corps dined together at the Casino Paganini. The dinner was a subscription one, and had not any political character. M. Billault, the President of the Chamber, was in the chair, and introduced the only toast of the evening in these brief words:—"Gentlemen, your committee has decided that, on this occasion, there should be no speeches; but it has, at the same time, delegated me to say that the banquet which you have to will best respond to your sentiments, and serve, on the part of all of us, as the expression of our devotedness and our gratitude—' To the Prince Louis Napoleon!'"

The inauguration of the Paris and Strasburg Railway will take place on the 17th July. The Prince President has promised to be present upon that occasion.

M Seline Davenay, a journalist, sentenced to transportation to Cayenne by the recent commission of the Vosges, has received a free pardon from the Prince President, at the instance of Mr. C. Geach, M.P. for Coventry.

On Thursday Louis Napoleon left Paris for St. Cloud, where he intends to take up his residence for some time.

The *Patrie* affirms that the Porte had at length admitted the French man-of-war *Charlemagne*, 90-gun ship, into the Bosphorus.

Accounts from Bona and Constantine supply details of some smart skirmishes between the insurgents and the French troops, which had proved most disastrous to the former, the field being covered with their slain, while the loss of the latter was only trifling. Later advices, however, are said to have been received in Paris on Wednesday from Algeria, giving the most deplorable accounts of the insurrection, which was not only fast spreading, but had been accompanied by the massacre of some of the French settlers. This intelligence, it is thought, will operate unfavourably for Abd-el-Kader, whose liberation has been confidently expected of late, but which will now probably be still further postponed.

INDIA.

The advices in anticipation of the Overland Mail which leave India in the month of May always succeed each other with great rapidity, in consequence of their despatch being made earlier than usual, in order to avoid the monsoon; and thus the interval for news being shorter and the reason itself from the sudden access of the rains somewhat beat, being a period of listless dulness and inactivity, the mails furnish little or no intelligence of interest. This is the case on the present occasion. The dates are Bombay, May 22d; Calcutta, May 11th; but we have no communication from the interior of the Burmese dominions. It was, however, generally understood that nothing more would be attempted in Burmah till after the rains; that, contrary to the original expectation, the whole force would remain in the country—for the most part in all likelihood on board the shipping; and that the war would be resumed with double vigour the moment the season permitted.

Disturbances still continue along the north-west frontier, where warlike arrangements on an extensive scale are in progress, notwithstanding the near approach of the season when out-of-door occupations of all kinds cease.

AUSTRALIA.

There are accounts this week from Victoria (Port Phillip), to March 31. The announcements of large weekly arrivals of gold at Melbourne from the various gold-fields continue a prominent feature in our advices, notwithstanding that the drought of summer had greatly limited operations at the "diggings." There were frequent deaths from dysentery, and the instances of robbery and outrage appear to have been very frequent. The strongest reproaches were directed against the Government for their want of energy in not having established an efficient police force at any cost, the large majority of the people being well-disposed and ready to aid all rational efforts for maintaining order. A meeting had been held at the mines for the purpose of raising subscriptions for the erection of a church, at which the Bishop of Melbourne presided, and the amount collected promised to be more than sufficient. Prices of provisions both at Melbourne and Geelong were rapidly rising, and some uneasiness was felt as to the ability of the storekeepers to provide a sufficient supply of provisions during the winter, should the number would be much greater. A meeting of storekeepers was about to be held for the purpose of fixing the prices of goods for the winter, and the quantity of provisions that should be sold at once to any one customer.

About 10,000 persons were at the Mount Alexander diggings. The number of persons arriving at Melbourne was about 1000 a-week.

A Victoria Gold Mining Association had been established for assaying gold and casting it into bars. The Government escort of the 24th March had brought 13,408 ounces of gold from Mount Alexander, and 74 ounces from Ballarat; 202 ounces from the latter place had been left at Geelong. A piece of pure gold weighing 28lb., recently brought into Melbourne, had been shipped for England by the *Posthumous*. A statement, which was at first disbelieved, that the average production at Mount Alexander was upwards of 12,000 ounces per week (or at the rate of about £2,500,000 a-year is confirmed. The quantity of gold brought by the *Admiral*, the vessel which has conveyed the present advices from Melbourne, is 30,840 ounces, valued at nearly £120,000. The price had declined to 58s., but had recovered on the 31st March to 60s. per ounce.

Servants of all kinds were very much wanted, and numerous advertisements appear in the Melbourne papers for cooks, general servants, housemaids, nursemaids, grooms, laborers, gardeners, weighers, waiters, carpenters, sawyers, storekeepers' assistants, butchers, and shepherds. The *Melbourne Argus* contains no less than fifty-seven advertisements of this kind, with offers of "liberal wages." There were about fifty sail in the port of Melbourne deserted by their crews.

From Sydney (New South Wales) the latest accounts are to March 23. The waters, which had for some time past obstructed operations at the gold fields of that district, were subsiding, and at Ophir the yield was better than at any former period. A weir opened on a spot which had been carefully drained at the expense of two individuals was found to give an average of more than an ounce per foot. In seven days from the day it was opened 153 ounces had been taken out, the metal being found in pebbles and lumps weighing from 12 ounces downwards. From the future the accounts were equally encouraging, but both there and at Ophir considerable quantities were kept back, owing to the low price offered by purchasers. It was thought that several shipments of gold would be made to Eastern markets, with the view of getting a quick and satisfactory return, more especially as some forwarded to Manilla had realised £3 19s 6d per ounce.

METROPOLITAN NEWS.

INFANT SCHOOLS OF CHRIST CHURCH, MARYLEBONE.—Miss Lewis, a benevolent lady, of the congregation of the Rev. Robert Wagner, Christ Church, St. Marylebone, recently placed at the disposal of the rector and of the gentlemen acting with him the sum of £4900, to be applied, in conjunction with the benefactions collected, to the purchase of suitable ground and the erection of a building for the purpose of providing for the Christ Church district (one of the poorest and most populous in London) that school accommodation of which it has long been in great need. On Saturday last the interesting ceremony of laying the foundation-stone of the building was performed by the Bishop of London, in the presence of a crowd of ladies and gentlemen, members of the congregation and friends of the undertaking. The site of the intended schools is a large plot of land easily adjoining to Christ Church, and forming the corner of Lisson-street and Stafford-street, Lisson-grove.

THE NEW ASYLUM FOR FATHERLESS CHILDREN.—A bazaar in aid of the funds of this excellent charity was held in the latter part of last week in the large suite of rooms of the London Tavern. The attendance of the public was large on both days; and upwards of £500 worth of goods were sold, the whole of the proceeds of the sale going to the funds; so that, altogether, the enterprise will realise about £700 to the charity. The total sum required for the new building at Stamford-hill is £6,000; and not quite half that amount is in hand.

BRITISH BENEFICENT INSTITUTION.—The second annual general meeting of this institution was held at the offices in Lincoln's Inn-fields on Monday; Ezekiel Erskine was called to the chair. The Rev. W. Johns, M.A., read the report, which stated that there are now receiving the benefits thirteen poor gentlewomen, and that there are applications for fifty-three more to be added to the funds. The society is making satisfactory progress. The balance-sheet showed the total amount received to have been £1915 9s. 4d. After all the current expenses had been defrayed there was left in the banker's hands £350 16s. 2d., irrespective of £385 invested in the Three-and-a-Half per Cents, and annual subscriptions due to the amount of £600. The officers for the ensuing year having been appointed, the meeting separated.

CITY OF LONDON LYING-IN HOSPITAL, HATTON-GARDEN.—On Tuesday afternoon, a meeting of the committee and subscribers to the above institution, was held in the board-room, Hatton-garden; Mr D Ffrench Duffin the chair. It was stated that the number of patients now upon the books was 826, all of whom were progressing favourably. The anniversary festival of this institution was held on Wednesday evening, at the London Tavern, Bishop gate-street; the Earl of Carlisle in the chair. The noble chairman, in proposing the toast of the evening, said that within the past year there had been no less than 520 applicants for the benefits which were proffered; and these claims had been recognised without the presentation of a governor's letter, the only passport required being the proof of actual distress within the object for which the said union was founded. In the course of the evening the chairman consented to become the president of the institution. The subscriptions announced amounted to the aggregate to about £700.

SCOTTISH HOSPITAL.—On Wednesday a quarterly Court of this institution was held in the board-room of the hospital; Dr. J. Webster, F.R.S., in the chair. The statement of accounts, by Mr. Adair, the secretary, showed that the amount of contributions and subscriptions received up to last St. Andrew's-day amounted to £1308 7s. 2d. The number of pensioners elected during the last three months was 95; and after paying all current expenses, the balance remaining in the bank to the credit of the institution is £338 7s. 6d.

MILLINERS' AND DRESSMAKERS' PROVIDENT AND BENEVOLENT INSTITUTION.—The fourth annual meeting of this institution was held at Wilde's Rooms, on Tuesday evening, and was very numerously attended more than 19-20ths of the persons present being ladies. The chair was taken by Mr. Stephen Lewis, of the firm of Lewis and Allenby). From the report read, it appears that during the past year 25 members have been admitted, making the present number of members 103. During the year ended the 31st of May, 1852, the receipts have been £1008 7s. This sum has been thus disposed of: To defray the current expenses of the institution, including printing, hire of rooms for offices and meetings, collector's salary, &c., £119 10s. 2d.; purchase of £684 16s. 8d. £3 per cent. Consols, £548 1s. 2d. 3 per cent. Consols on the 31st of May, 1852, £209 8s. 10d. The present liabilities of the institution, including the expenses of this meeting, half-year's rent of offices, &c., are under £20. The assets of the institution are, stock in 3½ per cent. Consols, £3731 9s. 1d. (£3530); balance at banker's, £206 8s. 10d; annual and life subscriptions due, £93 17s.; balance due from the Point d'Angleterre, £400; making a total of £4030 5s. 10d. The annual revenue is £336 19s. 9d. General satisfaction was expressed at the progress of the institution.

NEW COLLEGE.—On Tuesday the second annual meeting of this institution was held in the library of the college, Finchley-road, St. John's Wood. The chair was occupied by the Rev. Thomas Binney, of Weigh House Chapel, who delivered an appropriate address to the students. The Rev. W. Farrar, LL.B., the secretary, then read the report, which stated that the council deeply regretted that in the course of the session they have been compelled to remove from the college three students, who have unhappily been led to reject the supreme authority of the Sacred Scriptures. The session had commenced with forty-seven students, five had been admitted; there were four lay students; several had retired—some from ill health, and others to accept pastorates in various parts of the provinces. During the year £313 had been derived from congregational collections, exclusive of the sum raised among the students stood thus:—Income from all sources, £3840 5s. 6d.; expenses, £4748 9s. 6d.; leaving a balance due to the treasurer of £906 4s. The report was then adopted in a resolution moved by the Rev. Mr. Hinton, who approved of the course taken with regard to the students, as did also the Rev. S. S. England, Chepham of Mill-hill School, who seconded the resolution, which was then passed.

TREATMENT OF PAUPER LUNATICS.—On Tuesday, at the meeting of the St. Pancras board of directors, which was presided over by Mr. Churchwarden Bluett, Mr. Hiles said that he, in company with other directors, on going into the workhouse, found the treatment the lunatics received such as was a disgrace to the parish. One man was bound hand and foot to a bed, not only with a strait-waistcoat, but it was actually padlocked to the bedstead. He conversed with the man, who appeared rational, and complained that the keeper had ill-used him, and struck him over the eye with a stick. The appearance of the man's face was sufficient corroboration of this statement. Another patient was so prostrate that he could not move, and he (Mr. Hiles) had ordered him into the open air; the former patient he had rescued from his locks and bars, and the result was that he was much improved. He would not have thus interfered, had he found any order from the medical officers for the treatment which the patients were receiving. Mr. Robinson, the house surgeon, stated that the man was not put under any restraint until he exhibited frequent signs of suicidal insanity, and had fractured his head, and destroyed one of the padded rooms. He had by no means acted in contravention of any instructions of the board with his professional duties. It was ultimately agreed, upon the motion of Mr. T. H. Smith, seconded by Mr. Stockton, that the arrangements of the medical officers be not interfered with by any member of the board.

UNIVERSITY COLLEGE.—The annual distribution of medals, prizes, and certificates of honour to the students in the faculty of arts and law in University College, took place on Wednesday, at the College, Upper Gower-street. The Earl of Carlisle presided; and there were present the Earl of Ferrers, Lord Colborne, the Lord Mayor, Sir James Graham, M.P., Mr. Hume, M.P., Professor Cough, the Dean of Faculty, read the report, which assemblage of ladies, the chair of Sanscrit, vacant since 1837, had been filled by the appointment of that eminent scholar, Dr. Goldstucker. The students in the Faculty had numbered 246. In the last session there had been 96 new admissions; this year, 99. Out of a total of 17 who had taken with honours the London University's degree of B.A., twelve were members of that college. The prizes were then announced and distributed to the successful candidates by the Earl of Carlisle, who accompanied each presentation with some grain story remarks.

LICENSED VICTUALLERS' SCHOOL, KENNINGTON-LANE, LAMBETH.—The forty sixth anniversary dinner of the friends and patrons of this society was held on Wednesday at the Highbury Tavern, Islington; Henry James Roare, Esq., in the chair. About 2000 gentlemen sat down to the dinner in the grounds of the tavern, under the shade of an enormous tent provided by Mr. Benjamin Edgington. The ladies were ranged on elevated seats occupying two-thirds of the margin of the tent. The subscriptions announced in the course of the evening amounted to between £1700 and £1800.

EMIGRATION TO AUSTRALIA.—On Wednesday night a public meeting was held, at the Domestic Mission-house, Spice-street, Spitalfields, for the purpose of creating Mrs. Chisholm's plan for the relief of emigrants. Nearly 1000 persons were present. Mrs. Chisholm read a report and a letter, which she had only received that day from Port Phillip, from her husband, Captain Chisholm, who stated he had received large sums of money from various parties who had only been a short time in the colony, to pay for the passage of parents and friends, and the age of many parents sent for was 70 years; but if they objected to join, money was deposited with the captain to pay them a pension in England, through the hands of the society. She begged men to consider well before they separated here from their wives and families; that separation was now going on to a fearful extent: 10 000 females were now required in Australia, and if emigration was properly managed, parties need not leave the country without their wives. Captain Chisholm was a member of the Church of England, and was religiously observed at the "digging," and that in a fortnight they had erected a large church, which was very fully attended. Very few robberies had taken place, and those only on drunken men. She urged parties to provide themselves with tents; and those now meeting up of forty or fifty, to endeavour to get a medical man amongst them. Mrs. Chisholm concluded amidst much applause.

CITY OF LONDON ELECTION.—On Wednesday, a requisition, signed by upwards of 3000 electors of the city of London, calling upon Mr. Robert Waithman Crawford, to fill Beckford's late seat, was presented to that gentleman, at a respectable meeting, held at the London Tavern for that purpose. The requisition was presented by a deputation, headed by Mr. Charles Gilpin. Mr. Crawford having expressed the deep sense he entertained of the high honour conferred upon him, avowed himself an ardent supporter of Free-trade principles, and a thorough Reformer. He complained of the recent conduct of Lord John Russell, who, he thought, had not kept faith with the public, he still felt that his (Mr Crawford's) candidature would put the great cause of commercial reform in jeopardy. Under such circumstances, he thought the best course would be not to put himself forward, but to bring down a requisition to the nomination day. This announcement was received with a general expression of disapprobation. After Mr. Crawford's address, however, using their efforts with a view of inducing him to alter his resolution.

EMIGRATION OF PAUPER CHILDREN TO BERMUDA.—On Tuesday, at the meeting of the board of directors of the parish of St. Pancras, Mr. Gurrerhwarden Bliett in the chair, the clerk to the board reported that James Combley, aged fifteen, one of the batch of children who was sent by the parish to Bermuda in October, 1850, had been sent to England by his master to see his friends. He had been rewarded with a sovereign for his good conduct. The boy had returned to Bermuda in the steamer which left Southampton with the mail on the 17th inst. The kind treatment he received from his master, Mr. Henry J. Tucker. He stated that he was taught by the daughters of his master reading, writing, arithmetic, and grammar. In answer to questions from several members of the board, the boy gave a favourable account of many of the children who had been sent out with him. Dr. Gregory then handed up the following notice of motion:—"That this Court do take into its consideration the propriety of taking the necessary steps to provide for the voluntary emigration of the pauper population of this and other parishes, that they may not be restricted from enjoying the benefits of emigration." The board then separated.

LICENSED VICTUALLERS' ASYLUM.—On Tuesday night the members [illegible] Anniversary Dinner. [illegible] who have kindly offered their services, gave the first of a series of four *soirées musicales*, in the magnificent room attached to the asylum, for the purpose of [illegible] in addition to the profits arising from this series to the defraying the necessary expenses of the chapel choir.

LECTURES ON GOLD.—At the suggestion of the council of the [illegible] Museum of Practical Geology, in Jermyn-street, at the Museum of Practical [illegible] Mr. Warington W. Smyth, M.A., F.G.S., will [illegible] a new [illegible] to the instruction of emigrants about to proceed to Australia. The course will comprise six lectures, on the following subjects, by the following gentlemen:—The Geology of Australia, will commence the course on the Gold Regions by [illegible] Smyth, M.A., F.G.S. of the Geological Survey, author of "Sketches on the Mineral Structure of Australia." On our Knowledge of Australian Rocks as derived from their Organic Remains—by Edward Forbes, F.R.S. The Chemical Properties of Gold, and the means of distinguishing it from other substances resembling it—by Lyon Playfair, C.B., F.R.S., Gold Washing and Washing Machinery—by [illegible], Metallurgical Treatment and Assaying of Gold Ores—by John Percy, M.D., F.R.S. The History and Statistics of Gold—by Robert Hunt, Keeper of Mining Records. The first lecture by Mr. Playfair, will be given on Wednesday night to an audience of about 300 persons, chiefly young men, and evidently intending emigrants. The lecture was most informing, and full of graphic descriptions applying to the climate and soil of Australia.

THE RIGHT OF MEETING.—On Monday afternoon a crowded public open air meeting was held in Bonner's-fields, to take into consideration the late and unprovoked attempt to interrupt and suppress the open air discussions of the working classes in that locality, by the interference of armed [illegible] Commissioner. The following resolution was carried with enthusiasm:—"That this meeting, composed of all classes of Religions and political opinions, hereby testify to the peaceful and orderly assembly of her Majesty's subjects, in Bonner's-fields, on Sundays, for several years past, such meetings having met to discuss questions affecting their social and moral improvement, to advance the cause of temperance, and to hear addresses influencing their earthly amelioration and their eternal welfare. That these quiet and calm assemblies have, without any cause given or warning, been, and are suddenly angry assail by the presence of a body of mounted and armed police, who will neither permit persons reasonably to converse together, nor arrest them when they are engaged, but arbitrarily keep in motion and separate groups of discussions of the working classes in that locality, by the interference of armed [illegible] Commissioner. The following resolution was carried with enthusiasm:—"That this meeting, composed of all classes of Religions and political opinions, hereby testify to the peaceful and orderly assembly of her Majesty's subjects, in Bonner's-fields, on Sundays, for several years past, such meetings having met to discuss questions affecting their social and moral improvement, to advance the cause of temperance, and to hear addresses influencing their earthly amelioration and their eternal welfare. That these quiet and calm assemblies have, without any cause given or warning, been, and are suddenly angry assail by the presence of a body of mounted and armed police, who will neither permit persons reasonably to converse together, nor arrest them when they are engaged, but arbitrarily keep in motion and separate groups of discussions of the working classes in that locality, by the interference of armed police, on the pretence of an obstruction of the public space afforded by the common law of England, and is determined to make a stand against an act that is at once aggressive, illiberal, and unconstitutional." Mr. Caley then moved, and Mr. Thornton seconded, the following resolution to the effect that a deputation be appointed to wait upon the Home Secretary with a copy of the preceding resolution, which was unanimously agreed to.

HYDE-PARK.—An important improvement is in course of being effected by the Woods and Forests Department in the drive and promenade on the south bank of the Serpentine, and extending from Hyde-park-corner to Kensington gardens. This portion of the park has for some time past been adopted as the principal promenade and drive, instead of, as formerly, between the point where the marble arch now stands and Hyde-park-corner; and the narrow width of the road, and the pathway, have long been felt to be a very great inconvenience, although formerly amply large enough for the comparatively small number of persons who frequented it. The improvement now being remedied by the widening of the road to a considerable extent, and the formation of a new gravel walk on the north side of the road along the whole line. The works are progressing rapidly, and the portion which has been completed evinces the improvement which will be effected in this attractive portion of the park for the public convenience. The old wooden rail will be replaced by a handsome iron railing, more in character with a portion of the park now so much frequented.

KING'S COLLEGE.—The annual distribution of prizes took place at King's College on Tuesday—his Grace the Archbishop of Canterbury presided, supported by the Bishop of Lichfield, Lord Radstock, the Rev. Dr. Jelf, principal of [illegible] a number of ladies and gentlemen. [illegible] Archbishop of Canterbury delivered the usual number of prizes, the successful pupils being introduced with [illegible] by the professors of the various classes.

ROYAL INSTITUTE OF BRITISH ARCHITECTS.—The last of the ordinary meetings of the Royal Institute of British Architects for the season of 1851-52 was held at the rooms of the institute, 16, Grosvenor-street, on Tuesday; the Earl de Grey, president, in the chair. In the course of the evening the president announced that the royal gold medal of the institute, which had been given by her Majesty, was awarded to Chevalier Leo von Klenze, of Munich, through Baron Cetto, the Bavarian minister, who briefly expressed his acknowledgments. The chairman read a paper describing the excavations he was making at Fountains Abbey, Yorkshire. The Rev. Mr. Burgess read a paper on the topography of the Roman Forum and the Vicus Capitolinus, and acknowledged the assistance rendered by the people during the Revolution in clearing away the houses and trees, and affording an open view of the Roman Forum. The proceedings terminated by the usual vote of thanks to the noble chairman, as well as to the Rev. [illegible].

FATAL ACCIDENT.—On Wednesday an inquest was held at the London Hospital, on view of the body of John Lord, aged 21, a labourer in the employment of Messrs. Smith, the eminent distillers, Bucke's-row, Whitechapel, whose death was occasioned by his having fallen into a vat of wort. Verdict accordingly.

BIRTHS AND DEATHS.—The births registered in the metropolis during the week ending Saturday, June 26, were—Males, 818; females, 736: total, 1554. The deaths during the same period were—Males, 490; females, 501: total, 991; being somewhat less than the average number of the [illegible] previous week with the 6 of last, there appears an increase in the [illegible] of ep demics from 195 to 215, caused by scarlatina, typhus, and [illegible] which have apparently become more prevalent. The fatal cases referred to scarlatina last week were 58, those to typhus 47. Intermittent fever carried off one person, remittent fever two, rheumatic fever two, erysipelas four, influenza one, cholera and cholera 18, and diarrhœa 34. Five women took their [illegible] beds from others to whom [illegible] had communicated the [illegible] fever. Two deaths from English cholera occurred on the 30th of June.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, which, the mean height of the barometer in the week was 29.655 in. The mean temperature of the week was 58.6 deg., which is below the average of the same [illegible] years. The wind blew from the south and south-west.

INDIAN COLLECTION.—The sale of the second portion of this [illegible] was commenced on Monday, and the day's sale reached only £310; a large proportion of the things, especially the rich textile fabrics, being at exceedingly low prices. On Tuesday the sale, which mainly consisted of Native dresses and ornaments from Lucknow, naives sold very cashmere shawls, ivory carvings, precious stones, &c., realised £970. On Wednesday the [illegible] of the sale was the carpets and rugs, the total amount of the day's sale was £750.

TERRIFIC AFFRAY IN STOCKPORT.

A most sanguinary affray occurred well [illegible] of serious and fatal destruction of property, has occurred this week at Stockport, arising out of the religious animosities of the lower classes of the Irish Catholics resident in the borough, and the fac ory operatives, which have been stimulated into overt acts of violence by the recent Government proclamation against Roman Catholic processions.

The *Manchester Guardian*, in explaining the causes which have led to so violent a *fracas*, says:—

For some time past there has been in Stockport a half civil war between the two classes indicated, partly on trade quarrels, partly on national grounds, but chiefly the result of religious differences between ignorant Irish Catholics on the one hand, and as ignorant English Protestants on the other. Collisions have frequently occurred, which have come before the magistrates, charges and counter-charges have been made; the English have been attacked by the Irish, the Irish have been assailed by the English: and it has been obvious for some time past that there only needed the spark to fire the train and explode these inflammable materials into some active and bloody fray.

The mischievous "spark" was unfortunately let fall on Sunday last, and sprang out of a cause which, if there was any true religious feeling on either side, should rather have promoted harmony than strife.

Stockport has long been celebrated for its Sunday-schools; and for a number of years both the Protestants and Roman Catholics have been in the habit, at Whitsuntide or shortly after, of parading their children through the streets on one Sunday—the Protestants generally on Whit Sunday, and the Roman Catholics as soon after as convenient. This has been permitted to the Roman Catholics [illegible] [illegible] [illegible]

WATERING-PLACES OF ENGLAND.

EASTBOURNE, SUSSEX.—(SEE PRECEDING PAGE.)

WHITBY.

THERE are among the watering-places of England few that have more greatly benefited than Whitby from railway communication, or that have become better adapted for the reception of visitors The town stands at the north-east angle of the county of York, where the romantic river Esk pours its stream into the German Ocean. Enclosed between precipitous cliffs, the old town is scarcely to be seen, until nearly approached, though its locality is well pointed out by the ruins of its once stately Abbey, which, unlike most other monastic institutions, occupies the highest land in the immediate vicinity This Abbey, founded in 656, was destroyed by the Danes, and rebuilt after the Conquest Even in ruins it is a beautiful object, adorning the east cliff; whilst on the west cliff, New Whitby, a magnificent pile of buildings, including a splendid hotel, recently built, containing warm baths, and every convenience for the accommodation of visitors, is admirably situated at an elevation of 100 feet above the level of the sea, commanding varied prospects, and at the same time accessible from the sands and the piers.

Whitby has long been admired for the peculiarity of its position, and the grandeur of its coast scenery. To the eastward the cliffs rise abruptly, nearly 200 feet above the sea, and towards the south present a succession of bold headlands. To the north the views along the coast are not less imposing. The headlands at Sandsend, Kettleness, Staithes, Huntcliffe, and Rawcliffe, abrupt in outline, and varying in elevation from 200 to 600 feet, present a succession of coast scenery scarcely to be exceeded in England, whilst the valleys opening up the country from the sea are replete with picturesque beauty.

The old church of St Mary stands close to the Abbey, from which extensive prospects present themselves on every side. The ocean washing the beach, enlivened with passing vessels; the woods and castle of Mulgrave (the domain of the Marquis of Normanby); the piers, unequalled in this country for boldness of design; the town, harbour, shipping, and swing-bridge across the river, all immediately beneath the eye; the fertile valley of the Esk, the hills intersecting one another, villas and hamlets, the plantations, and the high moors beyond covered with heath, altogether form a picture rarely surpassed.

The west pier, extending 1030 feet into the sea, with an elegant columnar lighthouse at its extremity, forms a favourite promenade; and the recently constructed road, cut through the solid rock, and extending from the battery to the west cliff, is found to be highly advantageous to visitors.

To those who delight in geological pursuits, this locality offers many inducements. It abounds with very valuable specimens, and presents, from the peculiar character of its lofty and precipitous cliffs, an unusually fine field for the practical illustration of the science.

The journey from York to Whitby by railroad is accomplished in three hours, and that portion of it from Pickering to Whitby passes through the most picturesque scenery. Pickering-park and Eskdale

WHITBY, YORKSHIRE.—WITH THE RECENT IMPROVEMENTS.

abound in rich woodlands; while the vales of Newton and Goathland present a wild country, with bold ranges of rock on either side. These glens add much to the interest of the ride along the railway.

There is probably no spot in England possessed of more varied rides and walks than the Whitby district. In every direction excursions may be formed; Robin Hood's Bay, Mulgrave Castle and woods, and the villages of Sleights, Egton, Egton Bridge, Grosmont, &c., are most accessible. Steamers are constantly plying to Scarborough, Redcar, Hartlepool, Stockton, Newcastle, &c., whilst sailing craft can be obtained at any hour to take trips in the offing.

There are the usual accommodations provided for sea-bathing. The beach extends for three miles, and, although somewhat variable, affords abundant surface of smooth sand for recreation, whether of riding or walking. The cliffs on either side of the Esk have also delightful walks extending for a considerable distance.

The extensive addition of new and ornamental lodging-houses on the west cliff, already alluded to, was only completed last year; and still further improvements are contemplated by the owner, Mr. G. Hudson, M.P., under the direction of Mr. John Dobson, of Newcastle-upon-Tyne, architect.

NEW NATIONAL SCHOOLS, ST. PETER'S, WALWORTH.

ONE of the most gratifying signs of the times is the great increase of educational establishments, more especially those adapted for the humbler classes. A neat building of this kind has just been completed in Shaftesbury-street, in the populous district of Walworth, from the designs of Mr. H. Jarvis, architect, Trinity-square, who has generously given his professional service as a personal contribution to the charity. The funds have been supplied by the Southwark Fund for Building Churches and Schools; her Majesty's Privy Council on Education; the National Society; the Cholmondeley Fund; and by lists of handsome donations from the gentry and tradespeople of the neighbourhood, who have responded in the most liberal manner to the appeals of the Rev. Francis F. Statham, the incumbent of the district, soliciting their aid.

St. Peter's, Walworth, is one of the most densely populated localities in the whole metropolis: it counts already 30,000 souls, and has been increasing, as evidenced by the late census returns, at the extraordinary rate of 6000 in ten years. The number of scholars already under instruction in the several church schools of the district is little short of 700; but the facilities for accommodation furnished by the New Schools will, it is expected, shortly much enlarge this number. The School-houses, which are of brick, with Bath stone facings, comprise two well-ventilated and efficiently warmed rooms, measuring 56 feet by 28 feet, the upper or girls' room (having an open stained deal roof) being 24 feet, and the lower or boys' room being 16 feet in height. It includes, also, a small class-room and offices, and has attached a commodious six-roomed

ST. PETER'S NEW NATIONAL SCHOOLS, WALWORTH.

house for the master and mistress. It is calculated to accommodate a total of 600 children, and has desk room and fixed seats for 500 of this number. We are glad to hear, likewise, that it is rendered available, with the consent of the Bishop of the Diocese, for the purposes of divine worship on the Sabbath; and, from the gratifying attendance of the poor on these occasions, it is reasonably to be expected that much good will ensue from this additional means of church accommodation in so populous a neighbourhood.

RELIEVO LEATHER BRACKET.

A novel and ingenious accomplishment has been recently occupying the attention of ladies in the fashionable circles. It is a new description of fancy work, by no means difficult of attainment, being a close imitation of wood-carving, so as to deceive the most practised eye. Our Artists have engraved a Bracket, the foundation of which is of wood; but the decorative portion, consisting of the vine-leaves and grapes, is made of leather, cut out and coloured by a peculiar process. This accomplishment can be applied to frames, to work-boxes, to baskets, to fire-screens, and, in fact, as a substitute for carving on wood in every form, being infinitely lighter, the relievo leather work being produced at less than half the cost of carved materials. Ladies who have acquired experience in this ornamental leather work pronounce the occupation to be very fascinating. The *artiste* who executed the tasteful Bracket engraved above gives lessons in the accomplishment; and her address may be obtained at Mr. Moore's, publisher, West-street, St. Martin's-lane.

RELIEVO LEATHER BRACKET.

CHRIST CHURCH, EALING, FOUNDED BY MISS LEWIS.

NEW CHURCH, GREAT EALING, MIDDLESEX.

THIS handsome edifice was consecrated on Wednesday, with the accustomed ceremony. Much interest was created on the laying of the foundation-stone, from the circumstances of Christian liberality under which the good work was commenced. The necessity for additional church accommodation had long been inconveniently felt, especially by the poor, and a subscription was commenced for building a new church. About £1600 had been raised, when a lady, endued with pious zeal, came forward and munificently undertook to erect the Church at her own sole expense.

Miss Lewis, the foundress, laid the first stone in the presence of the Vicar of Ealing, some of the neighbouring clergy, and a large number of the inhabitants, as well as of her personal friends. The vicar, the

KLOOF OVER THE GRAVE OF A FRENCH REFUGEE, ST. JOHN'S WOOD CEMETERY.—(SEE NEXT PAGE.)

Rev. Mr Smith, performed the usual service, and, at the conclusion of it, presented Miss Lewis with the silver trowel, and expressed the subscribers' grateful sense of the piety and liberality which had suggested the noble undertaking.

The consecrat on service of the Church on Wednesday was performed by the Bishop of London, who, at the appointed time, attended by his chancel or and a large body of clergymen, entered the Church, the organ playing the Hallelujah chorus. The preliminary ceremonies having been gone through, the Bishop, followed by his train, passed up the nave and returned to the altar reciting the appropriate sentences from the consecration service. The rector then read the morning prayer and the litany, and the Bishop preached from the 1st Epistle of St. Peter, chap. iv., verses 10—11.

"If any man speak, let him speak as the oracle of God; if any man minister, let him do it as of the ability which God giveth, that God in all things may be glorified through Jesus Christ, to whom be praise and dominion for ever and ever, amen." He recommended a perfect simplicity. There was no chanting, and the only parts sung were the 84th psalm and the 100th psalm, in which the congregation joined. After the service the bells pealed out merrily, and the company, after inspecting the Church more minutely, went to Miss Lewis's residence, where an elegant *déjeûner* was provided; and the Bishop, in proposing the health of the munificent founder, expressed himself in terms of high praise of the Church, adding that among nearly 200 which he had consecrated, he thought none had surpassed it.

The style of the new Church is be Transition between the Earlier and Later Decorated or Middle-Pointed, the leading forms of the tracery being "geometrical," and the minor details "flowing."

The Church is of the simplest and most uniform plan of a parochial church, consisting of a nave and aisles, chancel and aisles, or side chapels, western tower, and south porch. It provides accommodation for nearly 800 persons.

The nave has five arches on its north, leading into a spacious aisle or chantry. The chancel has on either side a double arch opening into the side chapels. This is a novel feature, at least in a modern church; and seems particularly suitable to a space which is too wide for a single arch, but scarcely sufficiently so for two distinct arches. The space intervening between the two arches and the single arch under which they are placed is filled in with open tracery, and they are supported by a very light clustered pillar, the whole forming one of the most distinctive features in the interior. The chancel is paved with beautiful encaustic tiles, the gift of E. W. Hillard, Esq. The altar coverings and carpets, the gifts of ladies resident at Ealing, are very rich and elegant. The seats, which are all of oak, are of ornamental construction and character.

The design of the tower and spire differs much from what is usual among modern churches, and in some degree resembles the beautiful ancient steeple at Boston. The buttresses stop at the level of the base of the belfry storey, and terminate in pedestals carrying the symbols of the Evangelists. The square form continues thence to the spring of the arches of the belfry windows, whence it falls off into an octagon, the angles of the square being surmounted by turrets slightly detached from the octagon. This arrangement gives considerable lightness and relief to the effect. The height of the spire is one hundred and seven feet. In a niche on the west side of the octagon is a well executed figure of our Lord, of life size.

The architect to the building is Mr. George Gilbert Scott; the builder, Mr. Myers; and the cost, independent of accessories, such as the ring of bells, &c., about £7000—an extraordinary low amount for a church of so much architectural character. The altar coverings and work of the same class are by Mr Beard; the decorations of the side walls, a class of ornament of which it would be well to add much more, are by Mr. Castell. The very elegant gas fittings by Mr. Potter. The altar plate (a superb service of silver gilt, quite in character) is by Messrs. Garrard.

FUNERAL OF A FRENCH REFUGEE.

YESTERDAY week St. John's-wood Cemetery was the scene of a funeral custom rarely observed in this country, and on that account worthy of illustrative record. On the above day about 300 French refugees followed one of their countrymen in as large a train as the French "Democratie" flag being carried in the procession. The deceased, Francis Goujon, was a poor, industrious mechanic, and was remarkable for his humanity and devotedness. In November last, he rescued several persons from a terrible conflagration at Dijon, and in this courageous act received many dreadful burns. Whilst suffering in bed from these injuries, the *coup d'état* of Louis Napoleon broke out; and Goujon, having belonged to certain political societies of that period, was compelled to quit France when he did on foot, under great privation. He reached Brussels, but was compelled by the Belgian authorities to leave, and then fled to England; he was, however, in a wretched condition when he arrived in London; and he breathed his last in St. Mary-abone Hospital a fortnight since.

On the funeral reaching the grave on Friday week, speeches or *éloges* in the classic manner were delivered by MM. Louis Blanc, Felix Pyat, Lucien Bella, and others; after which a collection was made for Goujon's widow and five children, the receipts amounting to £6. This sum, although small in amount, is considerable in proportion to the means of the French refugees now in the metropolis, who are, for the most part, poor and destitute.

The accompanying Sketch was taken at the funeral by a French artist, and portrays several of the notabilities of the French exiles now in London. Commencing from the left, are Felix Pyat, Louis Blanc, Ledru-Rollin; next are Nadand, Pierre Leroux, &c.

CALENDAR FOR THE WEEK.

SUNDAY, July 4.—Fourth Sunday after Trinity.
MONDAY, 5.—Sovereigns first issued as currency, 1817.
TUESDAY, 6.—Adam Smith died, 1790.
WEDNESDAY, 7.—Thomas à Becket killed, 1170.
THURSDAY, 8.—Fire Insurance due. Edmund Burke died, 1797.
FRIDAY, 9.—Cambridge Term ends.
SATURDAY, 10.—London-bridge burnt, 1212; 3000 lives lost.

TIMES OF HIGH WATER AT LONDON-BRIDGE,

COURT AND HAUT TON.

THE COURT AT BUCKINGHAM PALACE.

The chief features in Court life during the week have been the presentation of the Duke of Augustenbourg to the Queen on Wednesday, and the baptismal ceremony of the Princess Gauromma, the youthful daughter of the ex-Rajah of Coorg. The Duke of Augustenbourg was attended by his Excellency the Prussian Minister, and introduced to the Queen by the Earl of Malmesbury, principal Secretary of State for Foreign Affairs. At the same Court, Sir John Pakington, the Queen's Secretary of State for the Colonies, presented to her Majesty Te Rauparaha, Chief of the Ngatitoa and Ngatiraukawa tribes, New Zealand.

At the Privy Council which followed the Court, the Queen's speech on the closing of Parliament was arranged and agreed upon.

The baptismal ceremony of the Princess Gauromma, daughter of his Highness Prince Vere Rajunder, took place on Wednesday afternoon, in the private chapel of Buckingham Palace. The ceremony was performed by the Archbishop of Canterbury, assisted by the Rev. Lord Wriothesley Russell, Deputy Clerk of the Closet in Waiting; and the Hon. and Rev. Gerald Wellesley, Domestic Chaplain to her Majesty. Her Majesty the Queen was pleased to stand sponsor. The other sponsors were the Viscountess Hardinge, Mr Drummond, and Sir James Weir Hogg, Bart., Chairman of the East India Company. The Princess was named by her Majesty "Victoria." His Royal Highness Prince Albert, their Royal Highnesses the Prince of Wales, the Princess Royal, Prince Alfred, and the Princess Alice, and his Highness Prince Vere Rajunder, were present at the ceremony. The Viscount Hardinge, the Right Hon. John C. Herries, President of the Board of Control for the Affairs of India, and Major Drummond, 3d Bengal Light Cavalry, were also honoured with invitations to attend the ceremony. The interesting Princess has, by an agreement between the ex-Rajah of Coorg on the one hand, and the Board of Control and the Board of Directors of the East India Company on the other, been placed under her Majesty's protection, to be educated in the principles of the Church of England, in this country, and we understand her Majesty has appointed Mrs. Drummond to take charge of her.

The Queen and Prince Albert received by electric telegraph, on Tuesday evening, the melancholy news of the death of Count Mensdorff-Pouilly, who died at Vienna on the evening of the 28th ult., after a protracted illness. Her Majesty and his Royal Highness were in consequence prevented being present at the St. James's Theatre on Tuesday evening, and have rescaled the invitations to the palace for the week.

On Thursday the Queen went in State to the House of Parliament, to close the session of Parliament.

The State procession left Buckingham Palace at ten minutes to two o'clock, in the following order:—

The first carriage, drawn by six bays, conveying Sir Frederick Smith, Mr. Henry Greville, and Mr. Blackwood, Gentlemen Ushers; and Captain Pubbs, Exon of the Yeomen of the Guard in Waiting.

The second carriage, drawn by six bays, conveying Sir Frederick Stovin, Groom in Waiting to the Queen; Lieut.-Colonel Francis Seymour, Groom in Waiting to Prince Albert; and the Hon. Alfred Crofton and Mr. George G. Cameron, Pages of Honour in Waiting.

The third carriage, drawn by six bays, conveying Colonel the Honourable Charles Grey (Equerry in Waiting to the Queen), Colonel Bouverie (Equerry in Waiting to Prince Albert), and Lieutenant-Colonel Francis Hugh Seymour (Groom of the Robes).

The fourth carriage, drawn by six bays, conveying the Silver Stick in Waiting, Lord Colville, Clerk Marshal; Lord Rokeby, Field Officer in Waiting; the Right Hon. Cecil Forester, Lord-in-Waiting to the Household; and the Earl of Sandwich, Captain of the Hon. Corps of Gentlemen at Arms.

The fifth carriage, drawn by six bays, conveying Lord de Ros, Captain of the Yeomen of the Guard; Lord Byron, Lord in Waiting to the Queen; Viscount Maidenville, Lord in Waiting to Prince Albert, and Lord Claud Hamilton, Treasurer of the Household.

The sixth carriage, drawn by six black horses, conveying the Viscountess Canning, Lady in Waiting to the Queen; the Duke of Montrose, Lord Steward; Viscountess Combermere, Gold Stick in Waiting; and the Marquis of Abercorn, Groom of the Stole to Prince Albert.

The State coach, drawn by eight cream-coloured horses, conveying her Majesty the Queen, his Royal Highness Prince Albert, the Duchess of Athol, Mistress of the Robes; and the Earl of Jersey, Master of the Horse.

A detachment of the Royal Horse Guards escorted her Majesty from the Palace to the House of Lords.

Her Majesty held a Privy Council at half-past three o'clock, at Buckingham Palace, at which proclamations were issued dissolving the present Parliament and summoning a new Parliament, the writs being made returnable on the 20th of August

---

The Princess Grassalkovich, *née* Princess Esterhazy, accompanied by the Countess Murray and suite, arrived, on Wednesday, at Mivart's Hotel, from Paris.

The Duke and Duchess of Sutherland have arrived at Erskine House, Renfrew, on a visit to Lord and Lady Blantyre. Their Graces will proceed on Saturday (this day) to Inverary Castle, on a visit to the Duke and Duchess of Argyll, from whence, in a few days, they will go to Dunrobin.

The Marchioness of Waterford, accompanied by Lady Stuart de Rothesay, the Hon. Mr. West and family, Mr Vesey Ellis, Mr. Delafield, Mr. Beresford M'Mahon, &c., were amongst the numerous passengers who left London on Sunday last by the Antwerp steamer *Baron Osy*, Captain Jackson.

The Marquis and Marchioness of Normanby have left the St. George's Hotel for Mulgrave Castle.

The Earl Grosvenor and Lady Constance Grosvenor have left town for Eaton, where he Lordship will remain until after the Chester election.

The Earl and Countess Howe and family have left town for Gopsall.

The Marquis and Marchioness of Allesbury, we understand, will give a grand *fête* to her Royal Highness the Duchess of Gloucester, on the 7th inst

We understand the marriage of the Right Hon. Henry Labouchere, M.P., and Lady Mary Howard, sister of the Earl of Carlisle and the Duchess of Sutherland, which was to have been solemnised on Monday next, has been deferred until the 20th inst.

Miss Burdett Coutts entertained a distinguished party at dinner on Wednesday evening, at her mansion in Stratton-street. Miss Coutts had afterwards a small *recep* ion, at which Miss Louisa Pyne, Miss Eliza Biron, Miss Dolby, Mr Francis, Mr. Swift, Mr. Land, and Mr. Frank Bodda, attended, and delighted the guests with the perfect manner in which they sang several glees and madrigals.

Capt. Stopford Claremont has been appointed by her Majesty's Government to act and upon his Highness Said Pasha during his stay in England.

The Queen has been graciously pleased to confer the honour of knighthood on John Esmeid, Esq., late Captain in the Rifle Brigade, and Senior Exon of her Majesty's Body Guard.

ASCENT OF MONT BLANC.—His Royal Highness Prince Albert, with the Prince of Wales and Prince Alfred, honoured Mr. Albert Smith's celebrated entertainment at the Egyptian Hall with a private visit on Monday morning.

ROYAL POLYTECHNIC INSTITUTION. — His Highness Said Pacha paid a visit to the institution on Tuesday, accompanied by Captain Stopford Claremont and his suite. His Highness paid great attention to the process of lowering the sunken vessels, the observe light, and the working of the steam engines, with which his Highness was perfectly conversant, and which were all in full action, and also the manufacture of needles by Morrah's patent improvements.

CITY OF LONDON HOSPITAL FOR DISEASES OF THE CHEST.—A quarterly meeting of the board of management of this institution was held at the office, 14, Carpenter-street, City, on Wednesday: J. Gardner, Esq., in the chair; when a report was read which stated that the number of patients at present in attendance was 554; and that the number of new cases admitted during the last three months amounted to 976; being an increase of 263 on the corresponding quarter of the previous year. The new hospital in Victoria Park, is is stated, will be completed in the ensuing spring

SOUTH SEA COMPANY.—On Thursday the half-yearly meeting of this company was held at the South Sea House—C. Franks, Esq., in the chair—and a dividend of 1½ per cent. for the half-year declared.

ORIENTAL BANK.—On Thursday a special meeting of this company was held in the offices, Walbrook, R. C. Gordon, Esq., in the chair—when a resolution of the 29th of May for increasing the capital of the company by £200,000 by the issue of new shares at £20 premium, was confirmed.

The Cabinet of Brazil has been reorganised as follows:—President and Secretary of the Treasury, Joaquin J. Rodrigues Torres; Foreign Affairs, Paulino Jose Soares de Souza; War, T. F. Souza e Mello; Home Francisco Gonsalez Martins; Justice, J. Souza Ramos; Navy, Z. G. Vasconcellos. The above are re-appointments.

The President of the French Republic has awarded a gold medal of honour second class, to Captain Fabre, commanding the Spanish ship *La Teresa*, for saving the crew of the French vessel *La Louise*, wrecked off the Western Islands, and conveying them to the Havannah, where he generously refused to accept the indemnity offered him by the French consul

A reduction of 1s. 6d. per cwt. in the import duties on foreign refined sugar will come into operation on the 5th inst, reducing the duty to 10s. 6d.

A letter from Dunkirk of the 26th ult. states that the *Phœnix* steamer met the cruisers before breught into that port six English fishing-boats, which had been taken within the French limits when on the point of putting about dredging for oysters. The *Pelican* steamer followed them.

CHURCH, UNIVERSITIES, &c.

UNIVERSITY OF LONDON—THE NEW CHARTER.

A report has been presented by the committee of the Senate appointed to consider this matter. The committee consisted of the Chancellor (Lord Burlington), the Vice Chancellor (Mr. Shaw Lefevre), Lord Monteagle, Sir James Graham, Mr. Grote, Dr. Arnott, Mr. George Cornewall Lewis, and Mr. Senior. The report says:—

"There are three fundamental principles which distinguish this university. In the first place, its charter holds forth an encouragement for pursuing a regular and liberal course of education to all classes and denominations of her Majesty's subjects, 'without any distinction whatever,' in the second place, it depends mainly on the public funds for its support; and, thirdly, it [illegible] diversity which does not touch by lectures, but tests by examinations."

After referring to the several duties of the university, which the committee admit have up to the present time been satisfactorily performed, they say—

"We feel considerable difficulty in proposing any change in a constitution which appears to work well; and the peculiarity of that constitution increases this difficulty, by depriving us of the aid of experience."

The report then proceeds to consider the alterations in the constitution of the University which have been submitted by the Committee of Graduates to the Senate, and have been referred by the Senate to this committee, and concludes with the following recommendations; viz

"We recommend that the Senate propose to Mr Secretary Walpole the creation of a convocation, consisting of all the members of arts, of all who have been, are, or shall be University scholars, and of the senior half of the doctors in medicine, and the 50 senior graduates in law.

"This would afford immediately a body of 160 persons annually, and quickly increasing, which would include the most distinguished of the graduates, and from which no one capable of taking the degree of Master of Arts would be excluded

"We recommend that the convocation meet *de jure* twice a year, with power at each such meeting to adjourn once only; that it receive communications from the Senate, and address to them any suggestions and observations which it may think advisable.

"We recommend that the Senate be empowered to summon, whenever it thinks fit, an extraordinary meeting of convocation, for the purpose of the question being pointed out by the committee of graduates—the surrender or acceptance of a charter. And that in such extraordinary meetings the convocation discuss only the propositions submitted to it by the Senate. And we recommend that the surrender or acceptance of a charter be the only act as to which the concurrence of convocation, either in its ordinary or in its extraordinary meetings, be necessary."

The Rev. J. E. Gladstone has announced his intention to become a Dissenter. He succeeds to Sir Culling Eardley's new meeting house, near Torquay.

PREFERMENTS AND APPOINTMENTS.—The following appointments and preferments have recently been made: *Rectories*: The Rev. C. H. Atkinson to Rudware Mavesyn, near Rugely: the Rev. T. Clark to Willingale Spain, Essex; the Rev. C. A. Hope to Barwick-in-Elmet, Ripon; the Rev Richard Lewis to Lampeter Velfrey, in the county of Pembroke. *Vicarages*: The Rev. M. Wilkinson to West Lavington; the Rev. A. Pott to Caddesden, Oxfordshire.

TESTIMONIALS.—The following clergymen have lately received testimonials of esteem and regard:—The Rev E. L. Marratt, of the Holy Trinity district, Stockton-on-Tees, from a few of his parishioners; the Rev. J. A. Carr, curate of Duxford, St. John's, from the poor of that parish, on his leaving; the Rev. R. L. Watson, from the pupils of the Dedham Grammar School; the Rev. J. Jackson, master of Wisbech Grammar School, from gentlemen who were once his pupils

THE LATE HON. J. C. TALBOT, Q.C.—The Duke of Buccleuch, the Earl of Harrowby, the Earl of Carlisle, Mr. Whately, Q.C., and other friends and gentlemen, have been formed into a committee, for the purpose of taking steps to perpetuate, by some lasting memorial, the remembrance of this lamented gentleman's public and private virtues. It is intended to found one or more scholarships or exhibitions, bearing Mr. Talbot's name, for boys educated at the Charterhouse, in the Universities of Oxford and Cambridge, and these will constitute the proposed memorial.

NEW COLLEGE FOR THE CHURCH OF ENGLAND.—Arrangements have been made for the establishment of a new College for the education of clergymen for Westmoreland, Cumberland, and the adjacent districts. The college is to be dedicated to Saint Mary, and will be erected on a site already obtained near the terminus of the Kendal and Windermere Railway. The Bishop of Carlisle has become the patron of the college, the Duke of Leinster has accepted the office of visitor, and the Rev. J. Aspinall Addison, M.A., of St. John's College, Cambridge, and incumbent of Burtonwaite, near Kendal, has been appointed warden

CONSECRATION OF A NEW CHURCH.—A new church has just been erected for the district of Westcott, in the parish of Dorking, and was consecrated a few days since by the Bishop of Winchester. The Rev. the Hon. G. W. J. Evelyn, M.P. For the erection of the church the district is indebted to the late Lady Mary Leslie, Mr. C. Barclay, and Mr. Arthur Kett Barclay. Lady Mary Leslie left by her will the sum of £1000 towards endowing the church, and a further sum of £100 towards the building. The Messrs. Barclay (the eminent brewers) added a further sum of £1000 towards the endowment, and contributed very liberally towards the erection of the church. The new church is in the early decorated style of the 13th and 14th centuries; and being situate on a hill, is a conspicuous object to the surrounding district. The patronage is vested in Mr. Charles Barclay

The Rev. Peter Percival, late of Ceylon, has resigned his connexion with the Wesleyan body, after a quarter of a century spent in the mission field, and has received holy orders from the Bishop of London.

FOUNDLING HOSPITAL MUSICAL SERVICES.—We are happy to learn that the governors of the Foundling Hospital have made a very great improvement in the choir of the above chapel, by engaging the valuable services of Miss Louisa Pyne and Miss M. Williams, in addition to those of Mr Lawler, Mr. Donald King, and Mr. Coward. The orchestra has also been strengthened.

Returns have been published, in a Parliamentary paper, of each parish and union in England and Wales in which the poor are managed under the provisions of the act 22 George 3, c. 83, stating the population of each, and similar returns for those under local acts There are 13 unions with a population of 163 972, and three single parishes with a population of 37,455, under the above act, usually known by the name of Gilbert's Act. 23 unions with a population of 718,860, and 14 single parishes with a population of 1,561,234, are subject to the provisions of local acts

The following is an extract from a letter written by Sergeant Lomas, of the 98th Regiment, dated Hobart Town, December 8, 1851:—"A rather curious circumstance happened at the Bulwarat diggings Not long ago one of my pensioner had a son born there, and being the first child that had been born in the good fields, his father—a sly old swaddy—went round, pat in hand, to make a collection for the lucky little one, and in a very short time obtained as much in 'nugge's' as ounted to £3000. So much for the old sodger!"

The *Calcutta Englishman* has the following from a correspondent at Hyderabad:—"The Nizam has contributed a diamond of 280 carats, weighing seven rotalas, towards the payment of his debt to the Company. The diamond was consigned to the minister, and has been transmitted by him to the resident. It is supposed, as part payment of the debt, and I believe it has been accepted Taken in round numbers, the diamond weighs 400 carats. The Koh-i-Noor, I believe, weighs but 300 carats."

The most Rev. Doctor Paul Cullen was on Tuesday installed in the dignity of Roman Catholic Archbishop of Dublin; no fewer than sixteen Roman Catholic prelates assisted at the ceremony. A pastoral address was presented to Doctor Cullen at the gates of the church, from the metropolitan chapter and parochial clergy.

EXPLOSIONS IN COAL MINES.—By a Parliamentary paper containing a report from the select committee of the House of Commons on Coal Mines, just printed, it appears that the deaths from explosions have actually increased to the fearful number of about 1000 per annum the Davy lamp requires increased ventilation in mines, and the committee consider that the steam jet is the best means to use, and at the same time least expensive method for the ventilation of mines. It was stated in evidence, that 70 per cent. of the deaths from explosions were occasioned not by the explosion of fire-damp, but by the after effects of the explosions. Additional inspectors are recommended to be appointed, as some mines are never visited. The establishment of a central board is recommended. It is suggested that to the board should be given a power to order inquiries under ordinary circumstances of neglect; and, in cases of death, a power to facilitate an enforcement of justice to the families of the victims through the ordinary chances of law."

A good and useful social scheme has been set on foot, in the employment of some of the boys of the Ragged School Shoeblack Brigade as street messengers. At the Stock Exchange, the Bank of England, the Mansion-house, the City, Leicester-square, and the Strand, opposite Hungerford-market, these young messengers have begun to ply their vocation with the red livery and badge of the society, which is answerable to the amount of £5 for the safe carriage of booked parcels. The increased number of the street shoeblacks seems to show that this is a successful line of business for the young "boots," some of whom have lately been allowed to take their station in the club-houses and clear buildings of public resort.

A very skilful angler, of Newcastle, accompanied by a gentleman, on a fishing excursion to the Whitadder, Berwickshire, caught, within two days lately, upwards of 70 pounds weight of trout, the former killing 38 pounds, and the latter 32 pounds. They only fished a short time in one day, and part of the forenoon of the second, when they were stopped by a severe storm of wind and rain.

It is calculated that Paris annually consumes strawberries to the amount of five million francs Epinay, near St. Denis, sends every day, during the season, 500 francs worth of asparagus to England. Meudon, last year, sent a similar amount of plums every day; and Honfleur and its neighbourhood one million francs worth of melons in the course of the season.

The London and North-Western Railway Company has just introduced a system of second-class fares express into their fast trains, with the exception of the express train that starts at 5 P.M.

POSTSCRIPT.

THE RIOT AT STOCKPORT.

There was a slight, and but very slight, resumption of the disturbances on Wednesday night. Some windows were broken, but the presence of a troop of the 2d or Queen's Bays from Manchester, and a portion of two companies of the 4th Regiment, brought from the barracks and stationed in the National School, with the addition of a large body of special constables, sworn in by the magistrates, proved sufficient to keep the peace. There were, however, certain [illegible] that the disorders of the night before might probably be renewed, and the [illegible] precautions to repress that spirit. The magistrates met during the day and arranged the penalties attached to any such breaches of the peace as those committed, and on the first appearance of any such disorder, the public-houses were ordered to be closed at eight o'clock.

CITY OF LONDON ELECTION.—The writ for the election of four members for the City of London was received by the Sheriffs at a late hour on Thursday evening. The Sheriffs, at eleven o'clock on Friday morning, proclaimed the day of election at Guildhall and the Mansion-house; viz. Tuesday, the 6th of July.—The election for the county of Middlesex is not likely to take place before the 16th.

ACCIDENT TO LORD CAMPBELL.—On Thursday evening, at about a quarter past eight o'clock, as Lord Campbell was riding across Southwarkbridge, attended by his groom, his horse, startled by the noise made by the gas on the Surrey side, through which foot passengers pass, became restive and threw him. His Lordship was cut in the head by the fall, but is not, it is said, otherwise seriously injured. He was conveyed at once in a cab to his residence. Notwithstanding the accident, his Lordship attended his official duties at the Civil Pleas Court at 10 o'clock on Friday morning.

FATAL ACCIDENT.—On Wednesday evening a frightful accident occurred on the premises of Messrs. Marc and Co., the engineers, at Backwall, in the parish of Bromley, by the fall of one of the red-hot iguid iron, which was intended for an immense casting. One poor mechanic or labourer, of the name of Gerlick, was discovered under the hot metal shockingly burnt and quite dead, and about eight others were more or less injured.

FEMALE EMIGRATION FUND.—On Thursday the twenty-fourth party of emigrants, about fifty in number, sent out under the auspices of the committee of this fund, took their departure from Gravesend by the ship *City of Poonah*, for Sydney. This is a fine vessel, of 1000 tons burden. Previous to their departure they were visited by the Right Hon. Mr and Mrs. Sidney Herbert, Lady Caroline Stirling and Mrs. Stirling, &c. As soon as the emigrants had been landed in their allotted berths, they were briefly addressed by Mr. Herbert, who presented them with a testimonial of character and a number of advices for the regulation of their conduct during the voyage Mrs Herbert added a few kind words to each of the girls, which were responded to in most instances by a flood of tears.

LATEST FOREIGN NEWS.

FRANCE.

The advices of yesterday (Friday) from Paris state that the police have discovered a conspiracy, with which some of the insurrectionist leaders in London are connected. Thirteen were arrested on Thursday night in the act of manufacturing gunpowder and warlike implements, as well as some papers of the highest importance. Twelve more of the party were arrested at a later hour. They belong to a society called the *Vengeurs*. In addition, it is said, there has been seized, in a house at the Batignolles, at which the conspirators assembled, an infernal machine, formed on the model of Fieschi's murderous engine. It is described as consisting of fourteen barrels, fixed from three to four feet from the muzzle of cast iron, capable of containing each about twenty musket bullets. The ends of these barrels are said to be so skilfully stopped as, according to the armourer who examined them, to render their firing in a wrong direction utterly impossible The details of the affair have not yet been made known with any degree of certainty.

The Paris *Moniteur* appeared on Thursday, for the first time, at the reduced price, and under the immediate control of the Government authorities; notwithstanding which it contained a leading article without a signature, in direct violation of the law.

M. Valentine Pariaot, Professor of Foreign Literature in the College of Grenoble, has received a reprimand for writing some indifferent poetry, which is considered to be more circumspect.

The official published lists of the average prices of corn show considerable reductions in some places where scarcity had prevailed, while in places hitherto well provided, prices have varied but little.

The last accounts from Algeria are of a more favourable character than those hitherto published during the week, as they represented the insurrection to have been completely quelled.

UNITED STATES.

Accounts from New York, dated the 19th ult., were received in town yesterday (Friday)

The Baltimore Whig Convention have adopted a resolution recognising compromise measures and fugitive slave law as a finality, by 277 yeas to 66 nays. The latest accounts of the ballot for the Presidency by the Convention give the numbers as follow:—General Scott, 134; Fillmore, 128; and Webster, 30.

The walls of the *Republic* printing office at Buffalo fell on the 18th ult. with a tremendous crash, burying several compositors in the ruins. They all most miraculously escaped with a few bruises.

An arrival at New York from Honduras had conveyed the intelligence that the Island of Roatan, with five other islands dependent on Honduras Bay, had refused to acknowledge British sovereignty, and claimed the protection of the independent State of Honduras, which had been granted to them. Everything was represented as being in a state of rebellion.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

GEORGE RALPH LORD ABERCROMBY.

THE nobleman, who died on the 25th ult., had been for many years deprived of his eyesight, but was, nevertheless, remarkable for the intelligence with which he managed his estates, as well as the interest he took in the affairs of his country. His Lordship was born 30th May, 1800, and in early life served in the Coldstream Guards, attaining eventually the rank of Colonel in the army. From 1834 to 1841, during his father's lifetime, he sat in the House of Commons as member for Clackmannan and Kinross, and from 1838 to 1841, for the county of Stirling. He was

also Lord-Lieutenant and Sheriff Principal of Clackmannanshire. He married, 31 April, 1823, Louisa Fennel, daughter of the Hon. John Hay Forbes Lord Medwin, and leaves Baron George Ralph, now Lord Abercromby, born 23d Sept., 1838, John, Ralph, and Montagne. The deceased peer was son of George, second Lord, by Montagu his wife, third daughter of Henry, first Viscount Melville, and grandson of the famous commander, Sir Ralph Abercromby, who fell in the arms of victory at the battle of Alexandria, and whose widow, Mary-Anne, daughter of John Menzies, Esq., of Fernton, county Perth, was elevated to the peerage on an official account of the triumph and fate of her lamented husband reaching England.

COUNT VON MENSDORFF

EMANUEL COUNT VON MENSDORFF POUILLY, G.C.B., a Bohemian noble and a distinguished officer in the Austrian service. He married, the 22nd of May, 1804, the Duchess Sophia Frederica, eldest daughter of [illegible] Duke of Saxe-Coburg-Saalfeld, reigning Duke of Saxe-Coburg; by her, who was born the 19th August, 1788, and died the 9th January, 1835, the Count has had issue four sons, all officers in the Austrian service. By her union the Count became brother-in-law to the Duchess of Kent and to Leopold, who were the sister and brother of his consort: he was, consequently, also, uncle by marriage to Queen Victoria and Prince Albert. Count Von Mensdorff was deservedly esteemed and respected, died at Vienna on the 28th ult., after a protracted illness: he was at the time in his 76th year

---

LADY DENMAN.

THEODOSIA ANNE, LADY DENMAN, was the eldest daughter of the late Rev. Richard Wilson Cracroft, and Theodosia Dorothy, third daughter of Nathaniel Anderson, Esq., of Lea, in Lincolnshire. Her Ladyship was born on the 18th of October, 1804, to that eminent lawyer and statesman, Thomas, present Baron Denman, who recently filled the high office of Lord Chief Justice of England with such impartiality and ability. Lady Denman, to the deep regret of all who knew her, died on the 28th ult. at Paradise, Lewes, in the 48th year of her age. Her Ladyship had fifteen children, seven of whom, five sons and two daughters, survive her.

GOLD IN AUSTRALIA.

THE first results of the Australian Gold Discoveries are now displayed in a tangible, unmistakeable shape—individual loss, individual suffering, by the diversion of capital and labour. There may be many carried away by avid enthusiasm, who will rue the day they abandoned the certain easy employments of civilised life for the hard navigator-like trade of a gold-seeker; but the national and colonial advantage of this new mineral discovery is unquestionable, in spite of all that croakers may say and sing.

Already upwards of two millions sterling have been realised by the rude exertions of part of a population which has never yet exported more than three million of raw produce; and with the evidence now before us, we may confidently assert, that although there will be a temporary diminution in the exportation of Australian wool under new arrangements, the flocks of Australia will no more be destroyed than the corn-fields of England abandoned in consequence of the repeal of the Corn Laws.

The Australian population have stood the test of gold wonderfully, and come out of the trial with honour. Their conduct, as a body, has been singularly orderly and submissive to the constituted authorities. The decent industrious colonists have to bear the odium and keep down the lawless tendencies, not only of the felonry whom we have been exporting for years past to Van Diemen's Land, but also of those who, under Lord Grey's new system of prison discipline and economical reform, receive a ticket of liberty (or conditional liberty) immediately after landing, and lose no time in earning thirty shillings, the price of a passage, a good suit of clothes, and then proceeding to the opposite golden shores. Such is the reward of crime in England—a free passage and a fair chance of becoming gold medallists!

Two healthy signs are displayed by the Australian diggers—the multiplication of marriages and the large consumption of the best articles of female attire.

At Port Phillip it is impossible to retain a tidy servant girl. The first luxury to which the successful gold-seeker treats himself on his return for a holiday is a wife, and the wife is then treated to the best gowns and shawls that the shops afford. A friend writes, that "the carpenters and smiths of Melbourne and Geelong will not let their wives be seen in a gown of less cost than ten pounds, with a shawl and bonnet to match."

There has been a good deal of silly and snobbish sneering at this kind of outlay, which, if deficient in taste, is more honest, and shows more right feeling, than the extravagance so profusely displayed in 1844-5 at Richmond and Greenwich, at the Opera and less questionable resorts, by the directors, stags, and Capel-courtiers, who were not digging gold, but only manufacturing scrip.

Whatever may be the taste of the workers from the Turon or Braidwood, Ballarat and Mount Alexander, it is certain that what they purchase they honestly pay for, and no one will suffer for their gains. The advantage to the home market is obvious. The man who was earning before £10 or £40 a year, of which, perhaps, he spent one-half in British manufactures, can now afford to spend—and does spend—from £100 to £500 a year. The tales of wild extravagance are grossly exaggerated, and no more to be depended upon than Protectionist stories of factory cruelty, or Manchester stories of aristocratic morals. On the best authority, we can assert that the real colonists (not exprirees or ticket-of-leave men) are spending and investing their money in a very creditable manner. Among other proofs may be cited the circumstance of two thousand pounds received in gold-dust in less than seven weeks after his arrival at Port Phillip by Captain Chisholm, from working men, to pay the passage of their relatives; and not less than forty parents have thus been franked by the first earnings of their children at gold-digging. These remittances are increasing every day, and will soon amount to tens of thousands a year, and give a new and very wholesome impetus to emigration, by rendering it self-supporting and reproductive. This movement is more important, because among the gold-miners it is the working classes who are by far the most successful; they are more accustomed to manual labour, and work in better partnership than those who bend their backs for the first time to look for gold.

Now that so strong a stream of self-paid emigration is flowing, the sooner the Government free emigration is given up the better for the mother country and for the colonies. Every emigrant to whom a free passage is given increases the passage-money of the frugal working man who is striving to pay his own passage; and the boon to the pauper acts in the same way on emigrating classes, that out-door relief to the able-bodied reduces the wages of the employed. Many a man *does* send sore as he *could*, to pay his own passage, because he hopes to win a prize in the Government lottery. But that is not the most powerful argument against Government emigration. In the present state of the colonies, the peace, the morality, the extension of religion must chiefly depend on the people themselves. There are few policemen, and there are not likely to be many more as long as the prizes of the gold fields are so numerous. Those who understand the state of colonial feeling and the quality of the English soldier, expect very little beyond the towns from the regiments that are being sent out. As for the influence of the clergy, there are too few, even in the various townships, to perform full duty; and the Rev. David Mackenzie, of the Scotch Kirk, the able author of "Ten Years in Australia," reports that although the Colonial Government has offered very handsome terms to clergymen of any denomination who would proceed to the diggings, there are not enough in the colony to respond to the appeal.

Under these circumstances, the preservation of the public peace and the maintenance and extension of Christian principles must depend on the quality of the emigrants who proceed from this country. No trial is more severe for an ignorant, uneducated, underpaid man, than the sudden possession of large wages. This was proved in the Staffordshire iron districts, where an illiterate population, earning £3, £3, and £4 a week, was always plunged in debauchery and on the verge of destitution.

The class of emigrants who are selected as fit objects for free passages to Australia are usually the most ignorant, the worst paid, and the most "umble" of our agricultural peasantry. Of the English and Irish passed by Park-street Commissioners, very few can read, scarcely any can write; yet these are being sent out at the rate of twenty to thirty thousand a year, the greater number to settle and bring up families in districts where they can scarcely obtain the assistance of a paid teacher. Whether the Lowland Scotch emigrants are equally ill instructed, we cannot say; the Highlanders, who speak no Saxon, cannot add much to the intellect, whatever they do to the strength of the colony. Already they have shown themselves less simple and tractable than was expected. The last cargo of Highlanders landed at Port Phillip spoke no English. They were closely questioned in the Bay as to their knowledge of the diggings. They professed to know nothing. They inquired, "Whether she was a man or a beast?" Nothing could be more satisfactory, and already the squatters' agents saw the fine families tending sheep at the old original wages; but no sooner was the small Gaelic army, some three hundred, fairly landed, than they gave three cheers for the "diggings," and marched off under the guidance of a friendly "Mac."

Education, established and extended from the time the *Sea Flower* landed her Puritan freight on the bleak shores of New England, until the time when the progress of commerce brought a deluge of emigrant ignorance, has saved America under a different form of Government, and neutralised the effect of the late annual invasion of the uneducated. But in Australia no such provision exists, or is possible. And if we go on annually inoculating the gold fields with illiterate strong arms, the feeble efforts made by Australia to redeem the errors of past educational neglect, will never be able to overtake and arrest the disease.

MOUNT ALEXANDER GOLD DIGGERS AT EVENING MESS.

THE ILLUSTRATIONS.

By aid of obliging Correspondents at Melbourne and Sydney, we are enabled to present our readers with the accompanying Views, &c.

The first Illustration shows a party of diggers at evening mess, in which tea and damper (cake baked in the ashes) are not forgotten.

The second View affords a truthful idea of the men and scenes to be found at Forest Creek. In the right-hand corner are a couple of the native mounted Police, a corps only attempted to be established within the last twelve months; and who, although useful in hunting down their own refractory people, are most difficult to retain for any length of time in her Majesty's service, owing to their natural love for freedom and dislike to any restraint. These men are now employed with a larger proportion of white Police, keeping order on the ground, and

THE FOREST CREEK DIGGINGS, MOUNT ALEXANDER, PORT PHILLIP

THE GOLDEN POINT, BALLARAT.

MR. STUTCHBURY, THE GOVERNMENT GEOLOGICAL SURVEYOR.

escorting the gold to Melbourne. Beside the Police is a newly-arrived digger, his blanket on his back and his jack knife hanging from his waist, sailor fashion. Higher up, two men are bringing down the gold ore from the top of the hill on a hand-barrow. On the brow of the hill are bark huts, or *gunyahs*, and tents, with fires burning before them. The large tent is the Government Commissioner's, with a sentinel on duty, not only for dignity, but to protect the gold deposited within, to await the escort. The man with the pickaxe is just commencing to sink a pit; while two men, one rough and bearded, are ascending from their deep pits with baskets of the spoil on their heads, which they are conveying to water. Along the banks of the stream the washing process is going on. The first step is, "to pour the earth into the cradle," of which two are to be seen at work, one on each side the stream. "The cradler holds the rocker-handle in his left hand, and a stout staff in his right. A man with a scoop pours in water, and the cradler rocks with one hand, and stirs up and breaks the lumps with the other. The fine earth and dust fall through an iron sieve-frame below, while the large lumps of quartz, stones, &c., remain above." These he carefully examines, as the one on the far side of the stream is doing, for the chance of any "nuggets," the great prizes of gold-digging. The fine stuff that falls below is swept into a tin dish and carefully washed in the stream, by holding it at proper inclination and stirring the "stuff." The earthy particles float away, and the gold remains.

Third is a View of the Golden Point, Ballarat, with the diggers at work; the encampment; and the arrival of a heavily-laden dray.

The pair of Portraits, from Sketches by Mr. Marshall Claxton, are important representations of the Government in the gold district. Mr. Stutchbury, the geological surveyor, received his appointment from Earl Grey early in 1851. Mr. Stutchbury had not been three hours at the diggings in Summer-hill Creek before he had seen sufficient to prove to him the existence of grain gold. In the "Further Papers," recently published, Governor Sir C. A. Fitz Roy, in a despatch to Earl Grey, dated August 30, 1851, says:—"I feel bound, in justice to Mr. Stutchbury, to express my opinion that he has afforded some highly interesting and useful observations respecting the western gold-field." Then follows an extract from Mr. Stutchbury's report. Another of Mr. Stutchbury's communications, dated from Ophir, is written in pencil, ink not having yet been received there.

Mr. J. Hardy, Crown Commissioner of Lands, by whom are issued the licenses to dig for gold in the New South Wales districts, in the "Further Papers" returns 12,186 licenses from May to Oct. 31, 1851.

The last Illustration is from a Sketch by a Correspondent at Adelaide, and shows a large number of shipping detained in Hobson's Bay, near Williamstown, Port Phillip, in the neighbourhood of Melbourne. Many of these vessels are fine ships of 1000 tons and upwards, the crews of which (as they express it in this part of the world) "have all *sloped to the diggins*." On the right is Mount Macedon, which lies half-way on the road or track between Melbourne and the gold districts.

MR. HARDY, THE GOVERNMENT COMMISSIONER FOR THE GOLD DISTRICT

SHIPPING DETAINED IN HOBSON'S BAY WILLIAMSTOWN, PORT PHILLIP,

IMPERIAL PARLIAMENT

HOUSE OF LORDS.—MONDAY.

CATTLE-MARKET IN COPENHAGEN-FIELDS.

A petition was presented by the Earl of SHAFTESBURY, from owners and occupiers of houses in the neighbourhood of Copenhagen-fields, complaining of the erection of that place as the site for the market to be removed from Smithfield. The noble Earl said that, if the question of the market in Copenhagen-fields was permitted, they would soon have all the annoyance which now existed in Smithfield. It was a densely-populated neighbourhood, surrounded on every side by buildings, the inhabitants of which must be subject to great inconvenience and, in December, it was as bad a situation as could have been chosen for the new market.

The Marquis of CAMDEN supported the prayer of the petition.

The petition was ordered to lie on the table.

STANDING ORDERS

Lord REDESDALE moved to insert after section 2 of standing order 179, "That no such notice shall be given to her Majesty's Attorney-General of every Bill containing provisions whereby the application of the property or the patronage or constitution of any charity, or the right of any charity to any property, shall be affected, and no such Bill shall be read a second time unless the House shall have received a report from the Attorney-General on the matters relating to such charity."—Agreed to.

THE MILITIA

The Militia Ballot Suspension Bill and the Militia Pay Bill passed through committee, after a remark from

Lord BROUGHAM to the effect that he only assented to the measures because no other adequate means of defence were shown to be necessary, and no less objectionable plan was proposed. He could conceive no worse plan of levying a force than by ballot, unless impressing, as it were, a tax by ballot.

The Earl of CARDIGAN, in reference to the report of the Adjutant-General on the conduct of the troops in the late catastrophe of the *Birkenhead*, which had just been laid on the table, spoke in terms of admiration of the high state of discipline displayed by them in such trying circumstances. Adverting to the militia, he urged the importance of placing it under command of efficient and active officers.

The Consolidated Fund Appropriation and the Nisi Prius Officers, the Metropolitan Burials, the General Board of Health, and the Pimlico Improvement Bills, also passed through committee.

The Commons Amendments to the Patent Law Amendment (No. 2), the Improvement of Jurisdiction in Equity, the Common Law Jurisdiction Amendment, the Secretary of Bankrupts Abolition, and the Aberdeen Boys and Girls Hospital Bill were also agreed to.

The Suitors in Chancery Relief Bill was read a third time and passed, after a few observations from Lord Lyndhurst.

MASTERS IN CHANCERY.

The Lord CHANCELLOR, in moving concurrence with the Commons' Amendments to the Masters in Chancery Abolition Bill, defended himself from charges made by Lord John Russell, that, in this, which was not a party question, such alterations had been made from the report of the Commissioners and from Mr. J. Graham had so fit necessary to interpose, as a member of that commission, to insist on his recommendations being more fully carried out. He declared he had been in no respect influenced by party interests, for they were not at law, and had carried them out in the bill as far as he thought they would be useful.

Lord CAMPBELL regretted the introduction of the clause which prevented reference to the Courts of Common Law, on questions of law, without the delay and expense of an action.

Lord BROUGHAM considered that no action would be directed unless matters of fact were involved, and in such cases the appeal to a jury was the proper course. He paid a compliment to the Lord Chancellor for the care and attention he had bestowed on these law reform bills, which he believed would be of great benefit to the country.

The report and amendments were all confirmed.

METROPOLITAN BURIALS.

The Earl of HARDWICKE moved the commitment of the Metropolitan Burials Bill, and explained its main features and the points in which it differed from the previous Burial Acts, consisting principally in making the Home-office the depository of power instead of the Board of Health, the authority to raise money on the security of the poor-rate to be repaid in 20 years, and the preservation of the local jurisdiction of the parishes.

Lord CRANWORTH alluded to an impression that had gone abroad, that under the bill the common law right of all the members of a family, churchmen and dissenters, to be buried in the same family grave would be interfered with, and that dissenters must be buried in the unconsecrated portion of the proposed cemeteries whatever might be the wish of their friends.

The Earl of HARDWICKE having explained that no such restriction was intended, the clauses of the bill passed.

THIRD READINGS.

The following bills were read a third time and passed; viz. The New Zealand Government; the Commons Inclosure Expenses; the Turnpike Acts Continuance; the Poor-law Board Continuance; the Inland Revenue Office; the Savings Banks (Ireland); the Thames Embankment; the County Courts; the Excise Summary Proceedings; the Public Works Loan Advances; the Valuation (Ireland); the Metropolitan Sewers; the Friendly Societies; the Crime and Outrage (Ireland); the Encumbered Estates (Ireland); the Distressed Unions (Ireland); and the Holloway House of Correction Bills.

Adjourned at a quarter to nine o'clock.

HOUSE OF LORDS.—TUESDAY.

COUNTY COURTS.

Lord BROUGHAM presented a petition from a corporate body, praying for the extension of the County Courts Act; also one from an individual, praying that an equitable jurisdiction be extended to those courts in cases of small amount. The noble and learned Lord then proceeded to take a review of the amount of business disposed of by the county courts since they were established, and passed a high eulogium upon their merits. Result, that however great the advantages were which they had conferred upon the jurisprudence of the country, they still stopped short towards the attainment of that perfection to which these legal tribunals might, by an extended jurisdiction, be made to reach, and suggested various improvements which he thought should be carried out.

The Earl of DERBY admitted the importance of the suggestions of the noble and learned Lord, and said they would certainly be taken into consideration during the recess.

The Militia Ballot Suspension, the Militia Pay, the Nisi Prius Officers, the Metropolitan Water Supply, the Metropolitan Burials, the Board of Health, and the Pimlico Improvement Bills were read a third time and passed; and several other bills having been forwarded a stage,

Adjourned at a quarter-past seven o'clock.

HOUSE OF COMMONS.—TUESDAY.

The House met at noon.

The Birkenhead Docks Bill was read a third time and passed.

PROTECTION TO BRITISH SUBJECTS IN FOREIGN COUNTRIES.

Lord D. STUART asked the Under-Secretary of State for Foreign Affairs whether the Government had taken, or intended to take, any measures to obtain detailed information as to the proceedings on the trial of Mr. Murray at Rome; and whether there would be any objection to lay on the table of the House the correspondence which had taken place with reference to this case?

The CHANCELLOR of the EXCHEQUER, in reply, stated that the matter was in the hands of Sir H. Bulwer, who would use his best endeavours to obtain information as to the evidence on which Mr. Murray had been condemned, but there were reasons why such information should not be laid before the House; and, in reference to the outrages on Mr. Mather, of which Lord D. Stuart had also spoken, he added that Sir H. Bulwer had obtained from the Tuscan Government a full recognition of its responsibility to protect British subjects resident within its territory.

Sir H. VERNEY moved, on the part of Mr. Anstey, the following resolution:—"That this House, recognising the undoubted title of the Queen's subjects resident in foreign countries to the constant protection of her Majesty, in respect of their liberty, property, and other personal rights, and considering that in the case of the Rev. Messrs. Wingate, Smith, and Edward, arbitrarily expelled from the Austrian dominions on the month of January last, with their wives and children, under circumstances involving much sacrifice of property, and other hardships to the sufferers, those rights were violated, and that no redress has been hitherto obtained for the violation, is of opinion that the case is one calling for prompt and earnest measures on the part of her Majesty's Government."

Mr KINNAIRD seconded the motion.

The CHANCELLOR of the EXCHEQUER said that no statement made to the House would warrant such a resolution as the one submitted for their consideration, and as then read some dispatches from Earl Granville and the Earl of Malmesbury, showing that the Government had widely protested on above. His party, in laying the case before Austria, left the question of compensation to the good feeling of that Government, because it was not for this country to dictate to Austria what should be the religious principles which she should give within its own dominions; and Austria had stated as its reason for the expulsion of the Rev. Messrs. Wingate, Smith, and Edward, that they were received there should be any interference with the religious opinions of Austrian Jews. It was also clear from the documents before him that Mr. Ward was never ordered to leave Lemberg at all, but had quitted it voluntarily within the space of an hour after the order to depart was given. Therefore, the House would not feel itself justified in adopting the motion proposed to them by the hon. Baronet. The Government had pre sed the case upon the Austrian Government, and, as the noble Lord opposite (Lord John Russell) stated as the result of it there was no ground for a demand for compensation. His answer was not able to be conclusive, and Messrs. Wingate, Smith, and Edward were not prepared to say that they might appeal to the Austrian Government for compensation made to them, and had replied to the communication made to them upon the subject.

Lord PALMERSTON said it was evident the negotiations were not brought to a conclusion between the Austrian Government, and the reso ution, therefore, could not be agreed to. He would recommend his hon. friend to withdraw his motion, for it would be very inconvenient to lay on the table a dispatch which stated only a part of the case. He hon. friend, however, had conferred a public benefit by bringing it forward, for it was quite as well that foreign Governments should know that where British subjects were concerned, if their rights were not sufficiently protected by the British Government, they would be so by the Parliament. He thought the whole tone of the negotiations upon this matter was most unfortunate; but for this no blame was to be attributed to the present Government, for they found themselves launched into the matter when it was too late to alter the course adopted by their predecessors in office. He was of opinion that Messrs. Wingate, Smith, and Edward were harshly and tyrannically treated. They had received no notice whatever that they were violating any Austrian law, nor had the Austrian Government stated what law it was they had violated. Surely the British Government might have asked to have this law pointed out; but Lord Granville, whose dispatches must be considered as those of his Government, because that same Government had dismissed his predecessor for not having been sufficiently subordinate to the First Minister to the Crown, wrote in a different strain. Indeed his despatch was the most submissive and abject in its tone that he, Lord Palmerston, had ever had the misfortune to read. Without giving offence to Austria, he thought the Government might have placed the case of these gentlemen before it in a manner more suited to the dignity of this country, and more likely to forward the ends of justice. He admitted that the present Government had been more vigorous in its operations, but it was out of the question to characterise the Austrian Government with a spirit of intolerance; for although, for political reasons, it adhered to the Church of Rome, yet it was so tolerant, that, when the majority of a parish was Protestant or Catholic, the Government paid only the clergyman of the majority.

Mr. PEVERON-D'URCHARD in all that had fallen from Lord Palmerston, and hoped the hon. Baronet would withdraw his motion

Mr. HOME thought the speech of Mr. Anstey, on a former occasion on this subject, was now fully answered by the Government, and the concurrence would now be viewed by the country in a very modified light.

Lord D. STUART said it was now by no means clear that Lord Palmerston in office they were hearing the same complaints of the ill-treatment of British subjects, and he sincerely hoped that ere long they might have him in the Foreign-office once more.

Sir H. VERNEY then withdrew his motion.

CHICORY.

Mr. H. BERKELEY, on the motion for adjourning the House, protested against the rescinding of the Treasury minute permitting the sale of chicory with coffee.

The CHANCELLOR of the EXCHEQUER promised that due consideration should be paid to the representations of all parties interested, especially the chicory growers of this country.

Mr HUME thought the subject should be left to the decision of the next Parliament.—Adjourned at four o'clock.

HOUSE OF LORDS.—WEDNESDAY.

Their Lordships met at half-past twelve o'clock.

MR. MATHER

The Earl of MALMESBURY laid on the table the official papers on the Mather case, a d congratulated the House and the country that the exertions of Sir H Bulwer had been successful in bringing about a satisfactory settlement of the matter with the Tuscan Government, and that the friendly relations existing between the two nations remained undisturbed.

ANTIQUITIES OF IRELAND

Lord MONTEAGLE called attention to the importance of procuring information connected with the ancient laws and institutes of Ireland, and expressed a hope that some further returns on the subject would be made.

The Earl of DERBY promised attention to the subject, and facilities for the collection of such information during the recess.

RELIGIOUS ENDOWMENTS IN THE COLONIES.

Lord MONTEAGLE moved for an account showing the grants, endowments, and appropriations for the purpose of religious instruction in the colonies. His object in moving for this return was to show that in the 36 colonies belonging to this country in Asia, Africa, America, and Australia, there were but four in which there were not endowments out of the colonial funds, or Treasury funds, to Roman Catholics for promoting public worship; so that if the application to funds being granted for the benefit of Roman Catholics on the ground of the peculiarity of the Roman Catholic religion were adopted over the whole extent of their colonial possessions, it would be the means of introducing polemics, disturbances, in every one of those colonies.

The return was ordered.

THE BUSINESS OF THE SESSION.

Lord LYNDHURST, in briefly summing up the legislative labours of the session, congratulated Lord Derby on the success, result of his resistance to the enormous demands made upon him to dissolve, the moment they succeeded to office. The Law Reform Bills, the New Zealand Bill, and other important measures would have been passed, and probably lost, but for the firmness Ministers had displayed. The same resolution had enabled Parliament to get through the private business of the session, thus saving the parties interested the enormous expense of renewing the bills next year, and to secure the judicial business in such a satisfactory state, that, at the prorogation, scarcely an appeal would be left undecided. He believed he was correct in saying that more business bills had passed under Lord Derby's accession to office than in any previous session of the present Parliament.

Lord BEAUMONT remarked on the haste with which the majority of the measures of importance had been carried through; and contended, that if credit was due it was not to the Government, but to the majority of both Houses, who had facilitated the progress of business in order to hasten the dissolution.

Lord LYNDHURST claimed credit to Ministers for their firmness in resisting the clamorous appeals to dissolve.

Lord BROUGHAM observed that the merit of the law reform was due to the commission appointed by the Government and to some extent to the late Government itself. The present Lord Chancellor and Lord Derby were, how ever, deserving of great praise for taking them up and carrying them through.

The Earl of DERBY, in reply, fully concurred in the compliment which had paid him, acknowledged that what he had been able to accomplish was due in a great degree to the absence of party spirit—the forbearance and co-operation of the majority of Parliament. The only credit Ministers could claim was for having the firmness to withstand the demands for a dissolution made upon them as soon as they took their official seats, and for pressing only such measures as were admitted by both sides to be for the public benefit.

Earl GREY admitted that many important measures had been passed during the session; but that was to be attributed to the fact that they were the measures of the majority, and not properly speaking those of the Ministry, who, while out of office, had opposed some of them.

ROYAL ASSENT.

The House of Commons was then summoned to the bar of their Lordships' House, and the Royal assent was given by commission to the General Board of Health, Deaconless Repeal, and a large number of other public Bills, and to 62 private and local Bills.

The Lords Commissioners were the Lord Chancellor, the Marquis of Salisbury, and Lord Monteagle.

The Consolidated Fund Appropriation Bill was read a third time and passed.

Adjourned at a quarter before four o'clock.

HOUSE OF COMMONS.—WEDNESDAY.

The House met at half past one o'clock.

CHANCERY REFORM.

The Lords' amendment to the improvement of the Jurisdiction in Equity Bill, continuing the practice of referring cases to the conveyancing counsel of the Court of Chancery, was rejected; and, after a long conversation between the two Houses, was abandoned

Sir W. P. WOOD defended the Master of the Rolls against certain charges made by Lord Lyndhurst, that he had used his position and influence in conducting the Suitors in Chancery Relief Bill through the Commons, to secure the patronage of the Rolls Court, while diminishing that of the Lord Chancellor. The bill in question had been introduced by him (Sir W. P. Wood), and he was responsible for proposing the new arrangements as to the offices of the several courts

The SOLICITOR-GENERAL bore testimony in favour of the Master of the Rolls, and stated his belief that the charge against him had been made under a misapprehension.

PROCESSIONS IN THE CHURCH OF ENGLAND.

Mr. H. BERKELEY inquired whether the imitation Romanist processions occasionally held by a section of the clergy of the Church of England, could be prevented under the act referred to in the proclamation for putting down processions of Romish priests.

The SOLICITOR GENERAL explained that the act would not affect other than the processions it specially referred to.

A short conversation took place between Lord Dudley Stuart, Mr H. Berkeley, Sir W. Jolliffe, Mr Anstey, and Lord Palmerston, as to the appointment, on a charge of mendacity, at Gosport, of a Poe named De Rin

Sir W. JOLLIFFE, in reply to Lord Stanley, stated, in reply to Sir Da L Evans, that negotiations were still pending in reference to the Mosquito territory.—Adjourned at four o'clock.

HOUSE OF LORDS.—THURSDAY.

PROROGATION OF PARLIAMENT.

The fifth and last session of the present Parliament was prorogued on Thursday by her Majesty in person, in presence of the usual number of Peers and Peeresses who attend to witness this gorgeous and interesting ceremony.

The procession was formed in the usual bright sunny weather which the Royal "progresses" generally command, and out of doors her Majesty's Lord Chamberlain, the Marquis of Exeter, was in attendance to "the House" and back, were proportionately great.

The Royal procession left Buckingham Palace about 30 minutes to 2 o'clock, and the departure of the Sovereign was announced by a salute from the Park guns, and as her Majesty entered the House of Lords another Royal salute was fired. Her Majesty was received by the great officers of State, and after waiting a few minutes in the Royal ante-room she entered the House, accompanied by the Prince Consort and the great officers of State, and took her seat on the throne. The attendance of Peers was numerous, and there was, as usual, a great number of Peeresses present.

Previous to the arrival of her Majesty, the Suitors in Chancery Relief Bill (the Lending Office Abolition Bill) was read for the purpose, was read a second and third time, and passed.

The Commons having been summoned, appeared at the bar, and the SPEAKER delivered his usual speech, acquainting her Majesty with the course of business during the session, and praying her consent to the Consolidated Fund Appropriation Bill, which he brought up.

The Royal Assent was then given to the following bills:—Consolidated Fund Appropriation, Metropolis Water Supply, Bishop of Christchurch (New Zealand), Improvement of Jurisdiction in Equity, Patent Law Amendment, Suitors in Chancery Relief.

Her Majesty then delivered the following

ROYAL SPEECH FROM THE THRONE

"MY LORDS AND GENTLEMEN,

"I am induced by considerations of public policy to release you at an earlier period than usual from your Legislative duties.

"The zeal and diligence, however, with which you have applied yourselves to your Parliamentary labours, have enabled me, in this comparatively short Session, to give my assent to many measures of high importance, and, I trust, of great and permanent advantage.

"I receive from all Foreign Powers assurances that they are animated by the most friendly dispositions towards this country; and I entertain a confident hope that the amicable relations happily subsisting between the principal European States may be so firmly established as, under Divine Providence, to promote to the world a long continuance of the blessings of peace. To this great end my attention will be unremittingly directed.

"I rejoice that the final settlement of the affairs of Holstein and Schleswig, by the general concurrence of the Powers chiefly interested, has removed one cause of recent difference and of future anxiety.

"The amicable termination of the discussions which have taken place between the Sublime Porte and the Pasha of Egypt, affords a guarantee for the tranquility of the East, and an encouragement to the extension of commercial enterprise.

"The repeated, on the part of the King of Ava, of redress, justly demanded for insults and injuries offered to my subjects at Rangoon, has necessarily led to an interruption of friendly relations with that Sovereign. The promptitude and vigour with which the Governor-General of India has taken the measures thus rendered unavoidable, have merited my entire approbation; and I am confident that you will participate in the satisfaction with which I have observed the conduct of all the naval and military forces, European and Indian, by whose valour and discipline the important captures of Rangoon and Martaban have been accomplished, and in the hope which I entertain that these signal successes may lead to an early and honourable peace.

"Treaties have been concluded by my naval commanders with the King of Dahomey and all the African Chiefs whose rule extends along the Bight of Benin, for the total abolition of the Slave Trade, which it is present wholly suppressed upon that coast.

"I have had great satisfaction in giving my assent to the measure which you have wisely adopted for the better organisation of the Militia; a constitutional force, which, being limited to purposes of internal defence, can afford no just ground of jealousy to neighbouring Powers; and which, in the event of any sudden and unforeseen disturbance of my foreign relations, would at all times contribute essentially to the protection and security of my dominions.

"GENTLEMEN OF THE HOUSE OF COMMONS,

"I thank you for the liberal provision which you have made for the exigences of the public service. The expenditure which you have authorised shall be applied with a due regard to economy and efficiency.

"The recent discoveries of extensive gold-fields have produced, in the Australian Colonies, a temporary disturbance of society, requiring prompt attention. I have taken such steps as appeared to me most urgently necessary for the protection of property, and shall continue anxiously to watch the important results which must follow from these discoveries. I have willingly concurred with you in an Act which, by rendering available to the service of those Colonies the portion arising within them of the hereditary revenue placed at the disposal of Parliament upon my accession to the Throne, may enable them to meet their necessary increased expenditure.

"MY LORDS AND GENTLEMEN,

"I have gladly assented to the important bills which you have passed for effecting reforms, long and anxiously desired, in the practice and proceedings of the Superior Courts of Law and Equity, and generally for improving the administration of justice. Every measure which simplifies the forms, and diminishes the delay and expense of legal proceedings, without introducing uncertainty of decision, improving the authority of the Courts, or lowering the high standard of the Judicial Bench, is a valuable boon conferred upon the community at large.

"I hope that the measure which you have adopted for promoting extramural interment of the dead, and for improving the supply of water, may be found effectual for the remedy of evils the existence of which has been a reproach to this great metropolis, and may conduce to the health and comfort of its inhabitants.

"The extension of popular rights and legislative powers to my subjects resident in the colonies is always to me an object of deep interest; and I trust that the representative institutions which, in concert with you, I have sanctioned for New Zealand, may promote the welfare and contentment of the population of that important and interesting colony, and confirm their loyalty and attachment to my Crown.

"It is my intention, without delay, to dissolve this present Parliament, and it is my earnest prayer, that, in the exercise of the high functions which according to our free Constitution will devolve upon the several constituencies, they may be directed by an all-wise Providence to the selection of representatives whose wisdom and patriotism may aid me in my unceasing endeavours to sustain the honour and dignity of the Crown, to uphold the Protestant institutions of the country, and the Civil and Religious Liberty which is their natural result; to extend and improve the National Education; to develop and encourage Industry, Art, and Science; and to elevate the moral and social condition, and thereby promote the welfare and happiness of my people."

At the conclusion of the Speech, the Lord Chancellor, by command of her Majesty, proclaimed the Parliament prorogued until Friday, the 30th of August.

The Royal party then withdrew and returned to the Palace.

HOUSE OF COMMONS.—THURSDAY.

The Speaker took the chair in his State robes at half-past one o'clock.

THE RIOT AT STOCKPORT.

Mr. ANSTEY, seeing the right hon. the Secretary of State for the Home Department in his place, wished to put to him a question with reference to the unhappy affray that had taken place at Stockport. He wished to ask, in the first place, whether he had any further information on the subject of the affray than that which was already before the country? In the second place, he wished to ask whether it was true, or whether the right hon. gentleman had any reason for believing, that religious processions of the Roman Catholics was the original cause of the disturbance? And, thirdly, whether it was the intention of Government, from this time forth, to take effectual measures to prevent religious processions of that kind taking place in this country, where the current of feeling was eminently calculated to produce disastrous consequences? (Hear.)

Mr. WALPOLE had to state, in answer to the first question, that he was in possession of no further information than that which was contained in the ordinary channel of communication to the House and the public. With regard to the second question, he begged to state that he had received a letter from the Mayor of Stockport, in which it was stated that it was supposed the riot arose out of religious differences between the English and the Irish; but the Mayor and his brother magistrates had been so much occupied in taking measures to secure the public peace, that they had found no time yet to inquire into the immediate cause of the affray; and without a statement, before him the House could not expect him to pronounce any opinion upon the matter. With regard to the third question, he had only to state that both in England and Ireland the Government had given every possible caution to discourage processions which were of such a character as could in any way give rise to religious differences, and he could assure the House that the Government were anxious that all processions which could lead to religious disputes should be discouraged, and he hoped the country would support them in preventing their occurrence. (Hear.)

VENTILATION OF THE HOUSE.

Lord SEYMOUR wished to ask the noble Lord the First Commissioner of Works what measures were intended to be taken during the recess to improve the ventilation of the House?

Lord JOHN MANNERS said it was intended to adopt the recommendation of the Committee which had sat upon this subject; and it was hoped the Board of Works, with the assistance of those gentlemen who had paid attention to the ventilation and lighting of the House, would render the chamber far more agreeable next session than it had been this. (Hear.)

SUMMONS TO THE LORDS.

The Yeoman Usher of the Black Rod appeared at the table, and stated that "Her Majesty commands the immediate attendance of this honourable House at the bar of the House of Peers."

The Speaker, in obedience to the summons, left the House, attended by the Serjeant-at-Arms, the Cabinet Ministers, and the other hon members present; in the order in which their names had been drawn from the ballot-box

After an absence of a quarter of an hour the speaker returned to the table, and read a copy of the Royal Speech from the Throne.

The Ministers and members then took leave of the Speaker, and the House broke up at a quarter to three o'clock.

DISSOLUTION OF PARLIAMENT.

(From a Supplement to the *London Gazette* of June 29.)

By the QUEEN—A PROCLAMATION

For Dissolving the present Parliament, and declaring the calling of another.

VICTORIA R.—Whereas we have thought fit, by and with the advice of our Privy Council, to dissolve this present Parliament, which was this day prorogued and stands prorogued to Friday, the twentieth day of August next: We do for that end publish this our Royal Proclamation, and do hereby dissolve the said Parliament accordingly; and the Lords spiritual and temporal, and the knights, citizens, and burgesses, and the commissioners for shires and burghs, of the House of Commons, are discharged from their meeting and attendance on the said Friday, the twentieth day of August next; and we being desirous, as soon as may be, to meet our people, and to have their advice in Parliament, do hereby make known to all our loving subjects our Royal will and pleasure to call a new Parliament; and do hereby further declare, that, with the advice of our Privy Council, we have given order that our Chancellor of that part of our United Kingdom called Great Britain, and our Chancellor of Ireland, do, respectively, upon notice thereof, forthwith issue our writs in due form, and according to law, for calling a new Parliament; and we do hereby also, by this our Royal proclamation under our great Seal of our United Kingdom, require writs forthwith to be issued accordingly by our said Chancellors respectively, for causing the Lords spiritual and temporal and Commons, who are to serve in the said Parliament, to be duly returned to, and give their attendance in our said Parliament; which writs are to be returnable on Friday, the twentieth day of August next.

Given at our Court at Buckingham Palace, this first day of July, in the year of our Lord, one thousand eight hundred and fifty-two, and in the sixteenth year of our reign.

GOD save the QUEEN.

A second proclamation is addressed to the Peers of Scotland, "strictly charging and commanding them to assemble and meet at Holyrood House, in Edinburgh, on Thursday, the fifteenth day of July instant, between the hours of twelve and two in the afternoon, to nominate and choose the sixteen Peers, to sit in the House of Peers in the said ensuing Parliament, by open election and plurality of voices of the Peers that shall be then present, and of the proxies of such as shall be absent.

THE PARLIAMENTARY SESSION OF 1852.—The fifth session of the Parliament whose career terminated on Thursday, though comparatively a brief one, has endured longer than at one period could have been anticipated. It was opened by the Queen in person on the 3d of February, and has therefore lasted four calendar months and 26 days, being one month and six days shorter than its predecessor of 1851. The House of Commons has sat during that period on 80 days, their sittings occupying on all 580 hours, or an average of 7¼ hours each. The number of hours sat past midnight was 85½. The Lords during the same period have sat on only 69 days, and their sittings occupied 137 hours, being an average of 2¾ hours each. The first session of the defunct Parliament assembled on the 18th of November, 1847. The last Parliament, which was dissolved on the 23d of July, 1847, was in existence five years 1 month and four days, which was the longest period since the 7th George IV. In a recent Parliamentary document by the House of Lords it is stated, "that the average duration of a Parliament may be estimated at four years." According to the new act, Parliament may be appointed to meet 35 days after the proclamation for the assembling of the same.

MINISTERIAL FISH DINNER.—On Wednesday her Majesty's Ministers had their annual white bait dinner at the Crown and Sceptre, Greenwich. The party went from Hungerford to the tavern by *Waterman* No. 2, a twenty-five minutes'

THE EXHIBITION AT CORK.—On Saturday last the price of admission was two shillings. The season ticket holders, of course, went in greater numbers than on ordinary days, the person returned giving 2,000 season tickets as having got admission. Of these, 259 2s. 6d. were new purchases. The number of persons who paid 2s. each was 243. The entire number admitted on the 3d July was 1643. Monday was the first steamer day, and a large number of the working classes procured admission, the number being 1285.

CHESS ENTERTAINMENT AT GLASGOW.—On the evening of Monday, the 21st inst., the members of the Glasgow Chess Club entertained Mr. Staunton (Garrick's Ryal Hotel, George-square, in honour of Mr. Staunton's visit to the above city. Among the gentlemen present were Henry Glassford Bell, Esq., president of the Chess Club; John Ewing, Esq.; R. D. Sanders, Esq.; Donald Smith, Esq.; Dr. Weir, vice-president; Rev. John Donaldson, of Dumfries-shire; Alex Grant, Esq.; James Sharp, Esq.; A. G. M'Combe, Esq., secretary of the club; William Mackie, Esq., treasurer; Mr. Sheriff Bell, Mr. Sheriff Bell, Esq., late of Paris; H. Heugh, Esq.; D. J. Penny, Esq.; L. Hamel, Esq.; M. Robino, Esq. The chess of the evening consisted of a single game by Mr. Staunton against the president and committee of the Glasgow Club in consultation; but, owing to Sheriff Bell being unavoidably detained for some time after the hour of meeting, his place at the consultation table was filled by the Rev. Mr. Donaldson. Mr Staunton gave the move to the party of Pawns and the first two moves, and the game commenced about eight o'clock. The play on both sides was in first-rate style. The play was kept up till eleven o'clock, when the company proceeded to the supper-room. Mr. Sheriff Bell sat at the head of the table, supported on his right hand by Mr. Staunton, Mr. Woodburn, Mr. Steele, &c.; and on his left hand by the Rev. Mr. Donaldson, Mr. Smith, Mr. R. D. James, &c. Dr. Weir acted as croupier. After supper, and the usual loyal toasts had been drunk, Mr. Sheriff Bell, in an eloquent speech, proposed the health of Mr. Staunton, when was drunk with all the honours and one cheer more. Mr. Staunton returned thanks. The chairman then proposed the health of the Rev. Mr. Donaldson and the clergy of Scotland, which was drunk with loud cheers. The Rev. Mr. Donaldson having thanked the company, Mr. Steele proposed the health of Mr. Sheriff Bell, president of the Glasgow Chess Club, which was drunk with all the honours. The chairman having returned thanks, gave "Prosperity to all Chess Clubs," and, in the course of his speech, paid a high compliment to Mr. Sheriff Bell, saying that the St. George's Chess Club of London to its present high standing. Mr. Staunton made a suitable reply, and proposed, in highly complimentary terms, the "health of the Secretary of the Glasgow Chess Club." The secretary replied, and shortly afterwards the gentlemen bade good night to Mr. Staunton, after spending a very pleasant evening.—*Abridged from the "Glasgow Constitutional."*

STEAMBOAT COLLISION ON THE RIVER.—On Thursday, as the *Ravensbourne*, Ant'erp steamer, was going down the river, she met with the *Queen of Kent*, a Margate steamer, belonging to the Commercial Company, en route to London, with nearly 70 passengers on board; when from some misunderstanding of the course of each other, the *Ravensbourne* ran into the *Duchess of Kent*, and stove in her side. Every exertion was made to get the passengers and crew on to the *Ravensbourne*, it being evident that the *Queen of Kent* would sink. This was happily effected, only one gentleman being left on board when the vessel went down; and, as he was sitting on deck, he was of course precipitated into the water, from which he was rescued by one of the crew of the *Meteor*. Gravesend steamer, which, at the time of the accident, was following in the wake of the *Ravensbourne*.

OPENING OF THE BIRMINGHAM, WOLVERHAMPTON, AND STOUR VALLEY RAILWAY.—On Thursday this important line (the opening of which has been so long delayed by the dispute between the London and North-Western and the Shrewsbury and Birmingham Companies) was formally opened by the running of trains over the line, though without any part.cular ceremonial. The trains were generally well filled, and between 2000 and 3000 people visited Birmingham during the day, passengers being conveyed from Wolverhampton, a distance of thirteen miles, for 9d.; the time occupied being forty minutes.

EXTRAORDINARY TRANSIT OF THE OVERLAND MAIL.—The most rapid transit of the Overland Indian Mail was the following:—On the 3d of April last, just as the passengers for England were going on board the homeward-bound steamer at Bombay, the outward-bound steamer for Bombay was actually entering the harbour with the English mail of the 5th of March, which had only occupied 28 days 16 hours, taking the longitude into account, in its transit. This is the first occasion that has ever occurred in which the out-going and in-coming steamers were actually at anchor together, and when, with just twelve hours' further abridgment of the transit, return of post would have been saved.

NAUVOO.—This city of the Mormons once held 20,000 inhabitants; they are now about 2000. One-half of the houses the Mormons left have been removed or pulled down, and the other half are tenantless. Each lot contains acre. The mansion of Joe Smith is kept by his wife as a tavern. The front wall, and the one next to it, which formed the vestibule, are all that is left standing of the achievements of fanaticism called "The Temple," which, as the inscription on a large stone worked in the inner wall informs the visitor, is "The House of the Lord, built by the Church of Jesus Christ of the Latter-Day Saints. Commenced April 6, 1841." A company of French socialists have purchased a portion of the property, the site and the ruins of the temple included. They number about 400.

There was a falling off last week to the extent of about 60,000 lb. in the deliveries of tea, when were 561,043 lb.

On Wednesday a stoker connected with the Dunfermline branch of the Edinburgh and Perth Railway, while in the act of coupling an engine to some trucks, got between the buffers as the engine was backing, and was crushed so severely that he did not live above a few minutes.

22. P to K B 4th	R to Q B sq	46. K to h 3d	K to Kt 3d
23. P to B 4th	R to Q B 4th	47. K to B 6th	
24. R to B 3d (c)	Kt to Q B sq	And Black surrenders	

(a) The opening is managed on both sides with great tact, and will repay an attentive examination.

(b) This isolated Pawn becomes a weakness in Black's game, from its affording a salient point of attack to the enemy.

(c) Few players are sufficiently alive to the importance of bringing their Rook into action when the Queens are exchanged off.

(d) Well played. The advance of this Pawn gives a marked superiority to White's position.

(e) It will be apparent to all but the very young player, that White would have lost the game if he had taken the Rook.

(f) Mr. Lowenthal conducts the two Pawn endings in a manner second only to his consummate play.

The following clever Game forms part of a Match recently won of Colonel Michael, the President of the Brussels Chess Club, by Mr. Deacon.

(*Allgauer Gambit*)

WHITE (Mr. D.)	BLACK (Col. M.)	WHITE (Mr. D.)	BLACK (Col. M.)
1 P to K 4th	P to K 4th	15 Kt to Q B 3d	Castles
2. P to K B 4th	P takes P	16 Kt to Q B 3d	B to K B 4th
3. Kt to K B 3d	P to K Kt 4th	17. Q to her 2d	Kt to K Kt 3d
4. P to K R 4th	P to K Kt 5th	18. Q to K R 6th	Q to K B 3d (b)
5. Kt to K 5th	P to K R 4th	19. R to K B 2d (c)	Q Kt to Q 2d (d)
6. B to Q B 4th	Kt to K R 3d	20. Kt takes Kt	B takes Kt
7. P to Q 4th	P to Q 4 h	21 P to Q 6th	P takes P (e)
8. Kt to Q 3d	P to K B 6th	22 Kt to K 4th	Q to K Kt 2d
9. P to K Kt 3d	P to Q 4th (a)	23. Q to K Kt 5th	K R to Q sq
10. P takes Q P	Kt to K B 4th	24. Kt takes Q P	B to Q 3d
11. K to his B 2d	Kt takes Q P	25. R takes B	Q to Q 5th (ch) (f)
12. K to K sq (ch)	B to K 2d	26. K to B sq	P takes R (g)
13. P to K Kt 5th	Kt to K B 4th	27. R takes P (ch)	K to B sq
14. B takes B	Kt takes B	28 Kt to K B 5th.—And Black gives in.	

(a) This move, known to adepts as Mr Knight's defence, is usually considered an effectual mode of frustrating the attack obtained by White in the present opening. Some players, however, have of late begun to suppose so to be the case, and certainly in the game before us fails to repel the assault of the opening player success ully

(b) By this play the Black have obtained a Pawn unassailable enough.

(c) This move was the result of careful deliberation, and appears stronger than advancing the Pawn, as Q B 4th at once.

(d) If he had played the Queen to her 3d, with the object of winning the Kt, White must have got a winning advantage in the instance.

WHITE.	BLACK.	WHITE	BLACK
19.	Q to Q 3d	21 Kt takes Q Kt	B takes Kt
20. Q to K Kt 5th	Q takes Q (ch)		

(Taking with the Queen would next Black a place.)

2 Kt to K 4th	Q to Q Kt 3d	24. P to Q 5th	
3 Q to K R 5th	Q to K 3d	And wins.	

(e) Bishop to K 3d would perhaps have been less disadvantageous.

WHITE.	BLACK.
(*f*) If 25.	P takes R
then 26 B takes P (ch)	K moves
27. Kt to K B 4th—and wins.	

(*g*) Surprise—

WHITE.	BLACK.	WHITE.	BLACK.
26.	B takes Kt	29 B takes K B P (ch)	
27. R takes Kt (ch)	R takes R	And White has a piece superiority.	
28. Q takes R (ch)	Q to K Kt 3d

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Accounts from Australia this week mention a sad calamity. A vessel from London, the *Isabella Watson*, of 514 tons, had been wrecked on entering the harbour of Melbourne on the evening of the 21st March. Nine persons who attempted to escape in the life-boat were drowned, from the mast of the ship having fallen upon them, but the remainder of the passengers and crew, 69 in number, were landed in safety, chiefly through the courage of some pilots on the shore. The negligence of the authorities in permitting an insufficiency of lights on that part of the coast had been strongly censured.

Recent advices from Riga, on the Baltic shore of Russia, mention that the Russian Government has given its consent to the construction of a railway from Riga to Dunaburg, a town thirty German miles up the river Duna. This railway is to be in conjunction with the line to be completed from Petersburg to Warsaw. The Riga merchants expect the work to be of considerable benefit both to their export and import trade, as it will traverse several districts whence large supplies of flax and other produce are obtained, and with which an active business might be carried on, especially during the two extra months when their navigation is open while that of St. Petersburg is closed. The first stone of the new Exchange at Riga was laid on the 14th ult.

Accounts from New Zealand of March 2 state that at most of the settlements there were strong complaints of the scale of Government expenditure. The coonists were also getting up public meetings to petition Parliament against the debt of the New Zealand Company being charged upon the land fund or the general revenue.

According to Intelligence from Van Diemen's Land, dated March 17, we learn that the gold deposits discovered in that island were still unremunerative, but the pieces obtained were increasing slightly in size, and there was still a hope that good localities would soon be fallen in with. A report prevailed of a fresh district having been found at the Bay of Fires.

The arrivals of foreign pine-apples have commenced for the season. The vessel *Swallow*, arrived from Nassau, New Providence, has brought about 9000 pine-apples as part of her cargo. Some large arrivals are daily expected from Nassau, Eleuthera, &c.

A dreadful thunderstorm occurred on Sunday in the neighbourhood of Belfast, accompanied with heavy rain and a fall of large hailstones, which damaged several houses and other property.

The engineers and workmen engaged in the construction of the viaduct over the Boyne, on the Drogheda and Belfast Railway, have found the greatest difficulty in sinking the piles for the foundation, owing to the immense rubble stones of the rock and loose gravel stopping the rods, so that no certain foundation has proved much deeper than was expected, and will considerably delay the completion of the work.

The workmen on the Killarney Junction Railway are progressing most favourably and speedily, so that there is no doubt but the line will be opened in a very short time.

A return to the House of Commons, just printed, states that 44,617 gallons of sweet wines, &c. were warehoused in the kingdom from Sept and during the year ending the 5th of January, 1852, and 1477 from Ireland

The *Leicestershire Chronicle* mentions that 2600 paupers less were relieved last week in that borough than in the corresponding week of last year.

A tubular iron bridge, in the style of those existing in England, is to be constructed over the Oarthe, at Tuff, in Belgium.

On Tuesday the inmates of the King's Head public-house, Fetter-lane, Holborn, were greatly alarmed at the sudden death of a man named Packer, a law-writer, who, while engaged in conversation with those present, suddenly dropped his head on the table, and before a medical gentleman could arrive life was extinct.

M. Thiers arrived at Geneva on the 20th ult., and left the next day for Vevey. He intends passing the rest of the year at Carens, and finishing there his "History of the Consulate and Empire." His family is to join him there. During the stay of M. Thiers at Turin, the Academy of Sciences held a special meeting in his honour, the Ministers invited him to a banquet, and complimentary speeches were addressed to him at the Museum of Artillery.

In digging out the ground for some buildings in George-street, Tower-hill, there have been discovered the foundations of the old Roman wall, consisting of massive masonry.

The *Marco Polo* has been chartered for the Australian emigration service by Government. She has been fitted for sea in the Birkenhead Dock, Liverpool, and is expected to sail immediately with a thousand souls on board, including the crew. In the course of next month six other vessels will be despatched by Government.

On Monday no fewer than 246 sail of merchant ships entered inwards at the Custom-house. Of these, 93 arrived from foreign and colonial ports, 42 were coasters, including the regular trading steam-vessels, and 111 were coasters.

An official correspondence respecting the guano islands of Lobos de Terra and Lobos de Fuera, extending from the year 1833 to the present time, has been presented. It appears from a despatch from Mr. Bethell Pakenham, the British Consul-General at Lima, to the Earl of Malmesbury, that the islands in question were occupied by Peru long before the discovery that guano was a valuable manure, and that they have been held by the Peruvian authorities to be within the territorial jurisdiction of the viceroyalty of Peru.

John B. Heath, Esq., ex-Governor of the Bank of England, who was a member of the committee for Lloyd's Register Book, has resigned, finding that he could not give the time and attention to the duty which its importance demands. In the vacancy thus occasioned, Charles Richard Barford, Esq., the senior of the firm of Barford, Rivas, and Co., has been appointed a member of the committee.

Mr. J. R. Hind has announced that a few nights ago he "discovered a new planet on the borders of the constellations Aquila and Serpens, about 5 degrees to the west of the star Eta Aquilæ. Its size is between that of the eighth and ninth magnitudes, and has a very steady appearance. Attachments it appeared to have a disc, but the night was not sufficiently favourable for high powers. At 15h. 18m. 18s. mean time its right ascension was 18h. 12m. 58.8s., and its north polar distance 98 deg. 16m. 0.9s. The diurnal motion in R. A. is about 1m. 2s. towards the west, and in N. P. D. two or three minutes towards the south."

A deputation of Buenos Ayrean bondholders and others interested in the prosperity and commerce of La Plata had an interview with the Earl of Malmesbury, on Monday, at the Foreign-office, respecting the British debt, and the appropriation of the grants, &c. of Patagonia, towards its liquidation, so as to benefit the agriculture and trade of England. The deputation was accompanied by Mr. Thomas Baring M.P., and Mr. David Robertson (chairman).

The first appearance of M. Jullien, with his unrivalled band, and a *répertoire* well stored with novelties, attracted an unusually large audience to the Surrey Gardens on Monday evening.

A ship and cargo have been burning off the Marchwood Magazines, in Southampton Water, for two or three days in the early part of the week. The name of the ship is the *Pollux*, from Buenos Ayres, and she is laden with guano (fine powder, for which consists of animal feces and bones). It is believed that the cargo must have spontaneously ignited through the great heat which it generated.

The Queen has appointed William Gore Ousely, Esq., her Britannic Majesty's Minister Plenipotentiary to the Argentine Confederation, to be a Companion of the Bath, civil service.

The new and reduced rates of duty on foreign sugar imported come into operation on the 5 h inst. (11 and 12 Vic., c. 97.)

The annual Harveian Oration was delivered on Saturday last, by Dr. Formby, in presence of the President and a large number of the Fellows of the College of Physicians.

The French forces have been so much increased, and the English forces so much reduced, on the Pacific station, that our neighbours and rivals master in the Pacific about 30 guns more than the British navy.

Prince Frederick, of Schleswig Holstein, has become a resident of Devon, having taken the delightful mansion of Coombe, near Honiton. The Prince came down to see Kitley, which he at one time thought of taking. It is not improbable that he may still be induced to do so.

The imports of foreign grain, cheese, &c. into Liverpool, for the fortnight ending June 23d, 1852, were as follows:—Wheat, 7172 bags; ditto, 184 889 bushels; flour, 63,571 barrels; ditto, 6 46 sacks, sacks ditto, 2002 bags; Indian corn, 24 461 bags; ditto, 76,277 bushels; beans, 1600 bushels; peas, 8707 bushels; ditto, 30 barrels; barley, 6150 bushels; cheese, 30 casks.

Sir R. Ii. Inglis has given notice that he will next session call the attention of the House to the anomalies and inconveniences of the constant sitting of the House and its committees on the same days and at the same hours.

Her Majesty has appointed Lieutenant-General Charles M'Leod, C.B., Colonel of the 34th Madras Infantry, to be a Knight Commander of the Bath, military service.

On Saturday last the Lord Mayor, Sheriffs, &c. went in state to Strafford, when his Lordship opened a Court of Pleas Conservancy at the Town hall from thence his Lordship went to Blackwall, where his Lordship also held a court. Several presentations of illegal encroachments on the river boundary by steam-boat piers, &c. were made and adjudicated. From Blackwall his Lordship crossed to Greenwich in the state barges. Here his Lordship also held a court

The *Penzance Gazette* of the 23d ult. says:—"It gives us much concern to report the undoubted fact that the potato disease has again made its appearance in the neighbourhood, and we fear to a very large extent. As respects the parish of Gulva, we hear that the disease is so universally prevalent that almost all the farmers are having their crops drawn with all possible despatch, with a view of disposing of the produce before it becomes entirely unfit for the market."

The grounds of the Royal Botanic Society were thrown open on Saturday last with the intention of having the annual display of roses, but the backward and ungenial weather marred the anticipated show, and the floral *fête* was converted into a fashionable promenade, the visitors receiving checks—as they entered by them to admission when the roses will be in a more forward and fit state for exhibition.

Monday being the fourteenth anniversary of her Majesty's Coronation, banners floated in the breeze on the top of Somerset House, the Admiralty, Trinity House, and other Government establishments, and from the masts of several of the vessels lying in the river, as well as in the several dockyards throughout the kingdom. The Park and Tower guns were fired, and from many of the principal church spires the bells rang out a merry peal.

GRAND FANCY BAZAAR IN GREENWICH HOSPITAL, IN AID OF THE QUEEN ADELAIDE NAVAL FUND.

QUEEN ADELAIDE NAVAL FUND.

THE memories of the sailor-King William IV. and his amiable Consort are associated with the above excellent charity, established for the relief of the orphan daughters of officers of the Royal Navy and Marines. To aid the fund, a grand fancy Bazaar was held at the Royal Hospital, Greenwich, under the especial patronage of her Majesty the Queen, the Duchess of Gloucester, the Duchess of Kent, the Duchess of Cambridge, and many of the most distinguished members of the nobility. The approaches to the hospital were appropriately decorated with flags; whilst the spacious quadrangle of the building was occupied by a large concourse of people, amongst whom were many ladies of rank. One entire wing of the hospital was devoted to the purposes of the Bazaar, and the effect was at once brilliant and picturesque. The stalls were presided over by the Marchioness of Hastings, the Viscountess Valentia, the Lady Caroline Legge, Lady Mary Legge, Lady Anne Legge, the Hon. Lady Capel, Lady Adam, Lady Beaufort, Lady Hart, and other ladies of title distinguished for their devotion to charitable objects. Their Ladyships discharged the duties imposed upon themselves with great zeal. The various articles offered for sale were displayed to the best possible advantage, and their merits most agreeably recommended. The scene was enlivened by the joint exertions of the band of the Royal Marines and the juvenile band of the Royal Hospital Schools, whose performances produced a most cheering and inspiring effect as the company promenaded the grounds within the precincts of the building. The Bazaar was repeated on Wednesday, and the results must, if we mistake not, be highly satisfactory to the promoters of the charity.

DAGGER, BY CELLINI.

THIS Dagger, chased in silver, by Benvenuto Cellini, and marked *with his monogram*, is an exquisite work of ancient times of this celebrated master. On the pommel of the hilt are three crocodiles, heads downwards; the hilt itself is embellished with grapes and leaves intertwined; and at its lower end are two nymphs clinging to it.

On the sheath of the Dagger is the goddess of justice, with the sword in one hand and the scales in the other. she is standing on a dragon, under which we see the head of a satyr; and the extreme point of the sheath is formed by a flying falcon. The entire sheath is richly ornamented with beautiful arabesques. From the hilt to the beak of the falcon the length is nearly one foot.

This curious work was found in August, 1629, together with a sword and a rosary, in a tomb at Jerusalem, by the side of a human skeleton, reposing in a stone coffin, dug out of a brick vault, filled up with the earth of ages.

Connoisseurs may inspect this treasure of art at the residence of the owner, 18, Golden-square.

DAGGER, BY CELLINI.

GOLD MEDAL PRESENTED TO MR. R. LAMBERT JONES.

FOREMOST among the originators of the numerous public improvements in the City within the last quarter of a century stands the highly-respected Mr. Richard Lambert Jones; for the presenting of whom with a testimonial of their esteem for his exertions, several of the more influential members of the corporation met at the Mansion-house, on the 17th ult.; the Right Hon. the Lord Mayor in the chair. His Lordship detailed the resolution passed in 1846, in testimony of Mr. Jones's eminent services as a member of the Court of Common Council, as chairman of the Committee for Rebuilding London-bridge and making suitable approaches thereto; as chairman of the Committee for Rebuilding the Royal Exchange; and as chairman of the Committee for effecting public improvements in the City. The subscription for this purpose was raised within a few months. A marble bust of Mr. Jones has been placed in the Council Chamber at Guildhall; a Gold Medal has been provided; and the surplus of the subscription has, at Mr. Jones's request, been invested and appropriated for a "Lambert Jones Scholarship" in the City of London School; the Gold Medal being presented by

GOLD MEDAL PRESENTED TO MR. RICHARD LAMBERT JONES.

the Lord Mayor on the 17th ult. Mr. Jones returned thanks for the distinguished honour; and Dr. Mortimer, Head Master of the City of London School, having thanked Mr. Jones for his kindness in furnishing means for an additional scholarship in the school, a vote of thanks to the Lord Mayor was carried, and the proceedings terminated.

SOCIETY FOR THE PROTECTION OF LIFE FROM FIRE.

THE anniversary meeting of the friends and supporters of this institution, which has for its object the maintenance of an organised body of men, provided with fire-escapes, at the different stations of the metropolis, and rewarding all persons instrumental in saving life from fire, was held on Saturday afternoon, in the Council Chamber of the Guildhall; the Lord Mayor in the chair. His Lordship, in opening the proceedings, expressed the great interest he felt in the advancement of the society, and the pleasure it gave him to be called on to present the annual rewards to the brave men who under God's providance have been instrumental in saving human beings from the painful and appalling prospect of death by fire. One fact which he would mention would justify all that could either be said or done in the support of this Society: only that morning, three lives had been added to the list of those saved through their instrumentality. The secretary then read the report, which stated that six new fire-escape stations had been added since the last report, and two more would be established very shortly, making the total number at present in the metropolis 38. The number of fires attended last year (to the 31st of March), all occurring at night, had been 253, and the number of lives saved thereat 20; and during the last two months 42 fires had been attended, and fifteen lives saved.

The Lord Mayor then presented the following rewards:—Six silver medallions (which are only awarded where life has been saved at personal risk), nine bronze medallions, and ten testimonials on vellum, to the different candidates for honours, accompanying each with a few appropriate remarks. Fire-escape conductor G. Elsden, No. 19, who was one of them, was pointed out as having saved the lives mentioned by his Lordship in opening the meeting.

The proceedings terminated with some routine business, and a vote of thanks to the Lord Mayor.

The various kinds of fire-escapes were exhibited outside the Guildhall after the meeting, and attracted considerable attention.

OBVERSE OF THE MEDAL OF THE SOCIETY FOR THE PROTECTION OF LIFE FROM FIRE.

TESTIMONIAL TO THE REV. W. S. DUMERGUE, M.A.

AN interesting demonstration took place at the Castle Tavern, Richmond, on Tuesday, the 22d ult.—W. Chapman, Esq., senior churchwarden, in the chair—for the purpose of presenting to the Rev. M. Dumergue, M.A., the curate of the above parish, a testimonial of respect; consisting of splendid Silver Inkstand, with a Purse, altogether of the value of £350. The Inkstand bears the following inscription:—

Presented to the Rev. Walter Scott Dumergue, M.A., as a tribute of esteem and regard, from the inhabitants generally, upon his leaving the curacy of the parish, on its separation from Kingston, and becoming a distinct vicarage.

This unique gift was manufactured by Mr. C. F. Hancock, of 39, Bruton-street, and is of very chaste design.

SILVER INKSTAND PRESENTED TO THE REV. W. S. DUMERGUE.

RURAL FETE AT HAM, AND PRESENTATION OF A TESTIMONIAL TO THE REV. MR. BROWN.

TESTIMONIAL TO THE REV. JOSEPH BROWN, RECTOR OF CHRISTCHURCH.

On Monday week the annual rural festival was given by the Rev. Joseph Brown, A.M., to his parishioners, to the children of the Parochial and Sunday schools, and the aged poor of St. Saviour's Union Workhouse. The occasion was rendered the more interesting by the presentation of a small testimonial to the rev. gentleman, as a mark of the esteem in which he is held throughout the parish, and particularly for the exercise of his liberality and charity at all times towards the working classes.

Shortly before nine o'clock in the morning a procession was formed, numbering about 2500, consisting of the children and their friends, and others, with banners, &c., who advanced to the Waterloo terminus of the South-Western Railway. Three special trains conveyed the whole party to Richmond; and from thence they made their way by various modes of conveyance to the park of the Hon. J. Tollemache, M.P., a beautiful spot on the banks of the Thames, about a mile from Richmond, the use of which had been liberally granted by the owner for the occasion.

It must have been truly gratifying to every well-regulated Christian mind to witness the pleasure that many of the poor of the union, several of them with their aged partners, appeared to derive from the opportunity thus afforded them of once more gazing on the green fields, now rich and fresh in the beauty of early summer. Nor were the children less joyous, for they disported themselves on the grass, and engaged in rustic games.

After an hour or two thus passed, the poor and children were all regaled with meat, bread, ale, &c., which were distributed with a liberal hand at the expense of the worthy rector. The men were furnished with pipes and tobacco *ad libitum*, and the women in the afternoon were supplied with tea and cakes.

At five o'clock, the number of persons being now increased to about 3000, the committee escorted the rev. gentleman to a platform that had been erected in the park, under the shade of some lofty elms, and was tastefully decorated with flags; when Mr. Mitson, the chairman of the committee, addressed the rev. gentleman, and said that Christchurch might indeed be proud of their worthy rector; and, as an acknowledgment of the estimation in which he was held by the working classes, they had proposed to present him with a copy of the Word of God, as a small but sincere token of the regard they entertained for him.

The children of the schools then sang a hymn, composed by Mr. Mitson for the occasion; after which Mr. Bryceson, the secretary to the committee, read an appropriate address, requesting Mr. Brown's acceptance of the present.

Two young ladies (Misses Stanley and Mitson) then lifted a handsome Bible, ornamentally bound and enriched by silver clasps, from the cushion on which it was placed, and presented it to the worthy rector; on the cover is a large silver shield, bearing the following inscription:—

Presented to the Rev. Joseph Brown, M.A., Rector of Christchurch, Surrey, by the teachers, children, and working classes of the parish, in grateful acknowledgment of his Christian liberality; as also for the untiring and indefatigable zeal displayed by him in promoting their temporal interests as well as their spiritual welfare.—June 21, 1852.

Mr. Stanley, on the part of the committee, addressed the Rev. Mr. Brown, and, in a long and energetic speech, dwelt on the great blessings that had flowed from the residence of the rev. gentleman amongst them, and who had won the affections of all classes of the people.

The Rev. Mr. Brown arose, and most heartily thanked them for the prized book which they had presented to him.

The National Anthem was then sung, after which a portion of the company proceeded to the residence of the Rev. Mr. Brown, at Ham

VAUXHALL GARDENS.—THE NEW BALLET.—(SEE NEXT PAGE.)

Common, where a handsome cold collation was provided, to which about 300 lad es and gentlemen sat down.

Several toasts were given and responded to, and a hymn was sung by thirty-two female children (mainly supported by the Rector's bounty), who were left orphans in Christchurch parish by the visitation of the cholera in 1849.

Thus terminated the proceedings of a day which had given unmingled delight to all present.

VAUXHALL GARDENS.

THE scene selected by our Artist for Illustration represents the "Grand Calabrian Festal Haunt," which terminates the charming ballet now performing in the new theatre which has been erected for choreographic display. "Zelita; or, the Maid of Calabria," has just sufficient story around which to weave several ingeniously-composed *pas*, much graceful grouping, picturesque costumes, and pretty scenery. The subject consists of an officer of a French detachment, who, being commanded to capture a gang of Calabrian smugglers, is himself entrapped and confirmed to be shot. The reprieved, however, of *Zelita*, saves him from punishment, and the result is a mutual p ssion between the two principal dancers. Their bridal is celebrated amidst showers, bouquets, strains of pu le, and showers of *flammes de Bengal*. The effect is exceedingly brilliant. Mdlle. Pieron is a graceful dancer, of the best school of choreography; and Mdlle. Julien, whom our readers will remember was so marked a favourite at Her Majesty's Theatre, shares in the applause slightly elevated. The ballet is remarkable for its interest and the completeness of its detail.

NATIONAL SPORTS.

Newmarket on Tuesday and two following days, and Lancaster on Wednesday and Thursday, are the only meetings of any note next week. At Lancaster, it will prove the former by giving £200 to make a summer handicap has proved all but a fia ure. Worcester, with a better list than usual, takes the same day as Newmarket, to the injury of both. The Woodford and Loughton meeting come off on Tue-day and Wednesday, Jersey on Wednesday, and Oldham and Stockport on Friday. Th aquatic arrangements embrace regattas at Chelsea and St. Mary-le-Bow, to end on Monday, at Lowestoft on Thursday, at Hammersmith on Tuesday, at Ryde on Thursday and Friday, (the Leander Coat, Badge, and Freedom) at Putney on Friday.

CRICKET FIXTURES Monday: Kent v. England, at Lords', and Kennington v. Peckham-rye Albion, at the Oval. Tuesday: West Wickham v. Carshalton, at West Wickham. Wednesday: First half of the Alpenhut v. the Second Harrison Banton. Thursday: The Universities of Oxford and Cambridge, at Lord's. County of Surrey v. County of Kent, at the Oval; and Blackheath Dartmouth v. West Wickham, at Blackheath; and on Saturday, the Zingari v. Harrovian, at Harrow.

TATTERSALL'S

MONDAY. A very full room, and plenty of work in the way of settling, but only enough business, with a few exceptions—the Sibton, Kingston, the Retreat, Chiesa, and Chief Justice—to admit of a quotation. The following were the latest pr.

QUEEN'S PLATE.—Robert, 1. Hampton, 3.

ROYAL LONDON YACHT CLUB.—On Saturday a very interesting race took place for the large class of vessels of the squadron, from the Nore and back, which was witnessed by a large concourse of visitors. The following started at 55 minutes past 11 o'clock:—

Yachts	Tons.				Owners
Ka	230	..	..	..	T. G. Brown, Esq
Lu n	10	..	..	..	S. Lane, Esq
Ma	20	..	..	..	Morris King [illegible]
Ma	25	..	..	..	R Bell [illegible], Esq
W	19	..	..	..	T Fwell [illegible], Esq
Va	15	..	..	..	C Wheelar, [illegible] Esq

The *Storm* was the winner, and the *Zuleika* came next. The prizes, £40 for the first boat and £10 to the second, were presented by Mr. W. Gordon, the commodore.

HENLEY ROYAL REGATTA CLUB.—The sports concluded on Saturday. In the rowing-match between Mr. Kyngsgall (of Cambridge), Mr Awdry (of Oxf rd), and Mr. M'Naghten (of Cambridge), the latter gentleman was declared the winner. The Grand Challenge Cup race, between the Oxford University Boat Club and the Oxford Argonaut Club, was won by the former. The Steward's Challenge Club was also won by the Oxford University Boat Club, against the Argonaut's Club. Several other matches took place, which occasioned considerable interest.

CINNAMON DUTIES (CEYLON).—A Parliamentary paper has been issued, which contains an extract from the despatch of the Colonial Secretary to the Governor of Ceylon, in reply to a memorial for abolishing the export duty on cinnamon. Her Majesty's Government admit the expediency of repealing the duty, and would have been glad if in consenting to the measure, they could only re.y upon some distinct means of providing for the deficiency which may be thus occasioned; but they are reluctant to accede to the proposal for additional duties on all goods imported, now subject to an *ad valorem* duty. They trust reductions may to made in the colonial expenditure sufficient to render new taxes unnecessary.

CRIMINAL AND DESPITTE JURISDICTIONS.—The select committee appointed to inquire into the t reatment of these unhappy classes have closed their inquiries for the present session, but propose to resume them in the next Parliament. It is stated that the committee have inquired minutely into the law and practice of foreign countries, especially those of Continental Europe and the United States of America, with reference to the establishment of reformatory institutions for juvenile offenders, as well as into the systems adopted in our own [illegible] for this purpose at Parkhurst, Redhill, Stretton-upon-Dunsmore, &c., and [illegible] system of regular schools

A wild-keeper named Loustan, residing in the forest of the Pyrenees known by the name of the Mountain of Sielle, has just killed the 20th bear [illegible] crossed on a old bear and its cub, he killed them both by two shots from a double-barrel gun. The sub-prefect of Oleron some time back presented him with a medal of honour for the benefit which he conferred on the country by destroying so many dangerous animals.

The annual dinner of the Law Amendment Society took place on Saturday last, at the Crown and Sceptre, Greenwich, at which Lord Brougham presided.

A fatal accident occurred lately at the Elton Colliery, between Burnley and Bacton in Lancashire, in consequence of the plug connected with the wheel becoming suddenly loose, while four men and a boy were in the act of descending the shaft in a cage. The result was that the whole party was precipitated to the bottom of the shaft, a distance of 60 yards, and two of the men, Robert Unsworth and Fletcher Jackson, were killed. The rest of the men were severely injured that their lives are despaired of.

Count D'Orsay for some time past has suffered severely in his health, and his medical men are not without serious uneasiness on his account. He has [illegible] sea-bathing, and he to leave Paris for Dieppe in a few days.

The municipal authorities of St. George's, Hanover-square, are about to erect a new workhouse on some ground belonging to the parish at Little Chelsea.

A Dublin journal says—"All the country districts in our environs [illegible] at the most magnificent appearance. The crops in general, notwithstanding the rainy weather, promises to be most productive. The potatoes and wheat are very fine, and do not present the slightest trace of malady."

The will of Mrs. Marianne Becker, of Bath, has just been proved, in which a sum of about £28,000 is bequeathed to various charitable and religious purposes. Among these we notice—The Church Missionary Society, £4000; the Church Pastoral Aid Society, £4000; the Bible Society, £1000; the Moravian Missions, £1000."

THE THEATRES.

HER MAJESTY'S.

Donizetti's "Don Pasquale" was performed, for the fourth time on Saturday night, with Madame de Lagrange, Calzolari, Ferranti, and Lablache, followed by the new ballet of "Zélie; ou, l'Amour et la Magie," with its brilliant *mise en scène*, and the charming dancing of Rosati.

On Tuesday "Lucia" was presented for the fourth time, with Madame de Lagrange, Ferlotti, and Bettini, who has followed Gardoni in the part of *Edgardo*. The new tenor, in the forcible passages of the music, made considerable impression.

On Thursday night Rossini's "Il Barbiere" was given for the seventh time, Madame de Lagrange making her first appearance as *Rosina*, in place of Mdlle. Cruvelli, and Signor De Bassini sustaining the character of *Figaro*. This fine baritone, who has just completed an engagement at Vienna, where his acting and singing of tragic parts created quite a *furore*, was heard in this country a few years since, when he was quite new to the stage. Signor De Bassini is one of the greatest lyric tragedians in Italy, and it was quite a mistake to assign to him a comic character for his *début*. In every movement he displayed the dignity incompatible with the feeling of the personage, and the finest passages of the music taxed his executive powers more than he could accomplish with precision. Still, there could be no question as to the capabilities of the artist, and the quality of the voice—a baritone, with the upper notes of which we perfectly telling. His reception was cordial, and his appearance in his own special line will be looked for with the highest interest. He is a remarkably handsome man, and his stage presence is marked with ease and grace. Mdlle. de Lagrange revealed in her roulades, and Rosini could never have recognised his score had he heard her. In the Rode's variations, accompanying herself on the pianoforte she executed the arpeggio with a delicacy—a marvellous feat of vocal mechanism, which commanded a rapturous encore. Lablache, as usual, however, was the mainstay of the cast.

ROYAL ITALIAN OPERA.

In the past and contemporaneous annals of music there is no *artiste* whose career has been more curious and surprising than that of Grisi. After maintaining for more than twenty years the supremacy of the *prima donna* of the Modern Italian school, and after having vanquished in her own special characters every rival without exception, whatever was the *prestige* attached to the new comer, Grisi in the autumn of her days commenced the study of an entirely new repertory, and entered the lists against the most distinguished singers of France and Germany. It is a remarkable fact that for years she refused to perform in the productions of the French school, but when she did make up her mind to enter the lists, she has not been defeated in a single instance. Grisi has sung *Alice* in "Robert le Diable," *Valentine* in "Les Huguenots," and finally has presented the public with a new version of *Fidès* in "La Prophète," and in these three wondrous works of Meyerbeer has passed triumphantly through the ordeal, despite of the sinister prophecies on each occasion that the attempt would be a failure. When the amount of study and preparation, to enable an *artiste* to essay three such arduous delineations, is considered, Grisi's achievements are the more astonishing. Her *Fidès* is a fine performance, has been carefully studied, is well finished, and will be repeated upon from Saturday's first appearance in the "Prophète," at its revival, being its fourth representation in this country. Attaching no final lubity to a great name, and having a contempt for the vulgar worship of celebrities, we do not for a moment believe that the *Fidès* of Grisi will ever rival that of Viardot. The music of the mother of *Jean of Leyden* was composed for an exceptional voice: whilst it ascends to the high C in one of the *arpeggi*, it exacts the deep tones of the contralto for the due ex ct tion; and so identified is this great compass of Viardot with the compos r's intentions, that any attempt at transposition would mar them com; pletely: and Grisi was, therefore, compelled to adhere pretty closely to the original score—a compulsion which deprived the romance *A deux genoux* "Dein Rose," and the grand duo of the third act with *Berthe*, M. Meyerbeer's last version of it, of their effect, the lower notes of Grisi not having the n ecessary *timbre*. For the same reason the impassioned air "Oh figlio mio," so dressed by *Fidès* to her son after the abduction of his intended, and the thrilling romance on the *supplice*, in which the deep tones of action scene, were not nearly so touching and imposing as from Viardot. The acting of Grisi was truly great in the recognition of *Jean of Leyden*, but her general reading of *Fidès* proved that no genius was the Mentor to indicate to her exertions; it was the realism or materiali-m of art, and not high ideal art; it was the form of *Fidès*, but not the spirit, being deficient in profound religious tinge, lofty feeling, and sustained intensity, so evident in the ideal creation of Viardot. Grisi's *Fidès* is too thoroughly subdued; the vivifying quality and the fire to animate the whole conception were wanting; but had she been first in the field no doubt the same applause, and the same bouquets, in the scene, were not nearly so touching and imposing as from Viardot. The acting of Grisi was truly great in the recognition of *Jean of Leyden*, but her general reading of *Fidès* proved that no genius was the Mentor to indicate to her exertions; it was the realism or materiali-m of art, and not high ideal art; it was the form of *Fidès*, but not the spirit, being deficient in profound religious tinge, lofty feeling, and sustained intensity, so evident in the ideal creation of Viardot. Grisi's *Fidès* is too thoroughly subdued; the vivifying quality and the fire to animate the whole conception were wanting; but had she been first in the field no doubt the same applause, and the same bouquets, in the scene, would have had a legitimate claim on our wonder and veneration. As a standard of lofti ness and a portrayal of high conception, the mistake has been originated, the comparison is unavoidable between Grisi and Viardot, and like the amateurs and artists in the *Foyer* and the *Parterre*, critics must give their opinions. The *Fidès* of Grisi we conceive to be the result of temperament, the *Fidès* of Viardot we regard as the artistic revelation of intellect, and of a great pervading sentiment of the beautiful, and nature, in the one case or the other is vivified by the electric spirit, and is alternately imaginative, grand, and sublime. The individual organisation of the two *artistes* is essentially different, in the one, the instinctive impulse, in the other, creative power, arising from an acute perception of the workings of the human mind, is supreme.

We need scarcely add, that the reception of Grisi from one of the largest audiences ever assembled was most enthusiastic; her great success was in the Coronation scene, and well did she earn the ovation at its close, with Mario, who acted powerfully, and who was the excellence of every other, deserves that the printed apology on his behalf was quite unnecessary. Of the superb execution under Costa's vigilance and zeal, generally, much might be conscientiously written. The fine music of the Coronation March, the Festival and Formès, was immense y applauded, so splendidly was it rendered. The call to arms of the peasantry, by the three insurgent Anabaptists, in the first act, was magnificently brilliant, and the three Anabaptists, Patineurs, and the Pas de la Redowa and Galop, danced with such grace and animation by Mdlle. Robert, were vigorously executed, the last-scene being extended by the Danish dance known as the hambucca, the additional space giving more animation to the groups. The gorgeous pageant, the two bands in the glorious march, the solemn peal of the organ, and the "Domine salvum," in the Coronation scene, must have undoubtedly astonished the audience, amongst whom no one appeared to be more gratified than Spohr with this noble interpretation of Meyerbeer's sublime production, which was repeated on Tuesday, and again for the extra night on Thursday, every place in the house having been let on the previous days of performance.

ST. JAMES'S.

On Tuesday the German *troupe* completed their engagement with the repetition of "Faust," which was performed to an overflowing house. The interest attached to the experiment has roleted more to the pays than the players; the latter have nevertheless obtained a good celebrity. We part from them with regret, and hope for their speedy return with grateful solicitude.

HAYMARKET.

A new piece, called "A novel Expedient," was produced on Wednesday, in one act and three characters. It is an adaptation from the French; and the plot is remarkably simple. A lady, to get rid of her husband's friend, who has quartered himself on the establishment, persuades him, against his inclination, to quit. In the propriety of this arrangement the dramati. *Damon* agrees; but finding a letter from an aunt in which the *ruse* is recommended, he changes his tactics, and pretends love to the wife. Scenes follow, and the piece ends with explanation necessary. *Damon* accordingly secures his old place at the board and the hearth-stone. Mrs. Stirling, as the wi.e, acted with her usual elegance and drawing-room tact.

PRINCESS'.

The "Trial of Love" still continues its prosperous course at this theatre. Its success is fairly due to the very beautiful manner in which it is placed on the stage, as well as to the stage skill with which the situations are produced. The comedy, too, being blended with the tragic dialogue, gives to every scene that light and shade, and colouring, so essential for dramatic effect. Mr. Lewis's acting is certainly the most happy of modern poets in the art of structure and relief: hence his well-merited success.

OLYMPIC.

This theatre re-opened on Monday under the management of the lessee, with two new pieces—the first entitled "The Bag of Gold," in two acts, by Mr. Ratty, and the second, "Butcher v. Baker," by Mr. Tailford. The former is of the class of domestic pieces, and has at least one effective situation. A bag of gold dropped by a rubber is picked up by a worthy medical practitioner struggling with poverty. By a prudent employment of the money he rises to wealth and distinction. In the course of time, traces the property to the finder; obtains an interview, and charges him with the embezzlement, claiming four-fifths of the prize as hush-money. This scene was enacted by Mr. W. Farren, jun. It is exceedingly effective: the villanous audacity of the former, and the mental trouble of the latter, were brought out into distinct and contrasted relief. Of course, the scene is ultimately explained away. The point is a happy one, and of this situation is praiseworthy; the dialogue of the piece, however, is unequal. The second new drama is intended to illustrate "the march of intellect," in the fact of the butcher's daughter aspiring to the love of the daughter of their customer, and bribing the maid-servant, who lays a plot for their discomfiture. Both are members of debating clubs, one of "the fourteenpenny" literary institution, and the other of the "Mutual Improvement Society." The language has throughout an intentional burlesque air, and the affair must be treated as an extravaganza. The humour was supported by the joint efforts of Mr. Compton, Mr. Shalders, and Mrs. Alfred Phillips. Both new pieces were favourably received.

Mr. Selby, the well-known comedian, has hit upon a new plan of entertainment. Having many y published a *brochure* on matters worthy of remembrance in the history of England, he has conceived the idea of representing the events and persons alluded to, in costume, as illustrations of a popular lecture. This experiment is commenced on Wednesday at the Music Hall, with considerable success, accompanying the lecture with poetical recitations. These latter require pruning; but the entertainment is instructive, and therefore merits encouragement.

MUSIC.

PHILHARMONIC SOCIETY.

The eighth and concluding concert of the fortieth season was given last Monday night, in the presence of a numerous audience. It was not only one of the finest performances of the series, but an exhibition of finished execution, which challenged comparison with the grandest of the Parisian Conservatoire concerts in Habeneck's palmy days, or of the Leipsic Gewandhaus nights in the time of Mendelssohn. Every player seemed to be on the alert, and to feel as if the reputation of the society depended on his individual exertions, and Costa, who has had Berlioz in his hand, and who has had Spohr and Hiller, two of the best of German conductors in his immediate view, did not fail to avail himself of the minutest of his forces, and hence the matchless interpretation of the A Minor, No. 3, the "Scotch Symphony" of Mendelssohn, the slow movement in which was unanimously re-demanded; and of the "Jessonda" overture of Spohr (encored by acclamation); and of the "Leonore" of Beethoven. At the close of the "Jessonda," a duetto from which, "Bella Linda," was sung by Madame Cara Novello and Gardoni, an unexpected demonstration took place in honour of the venerable composer, who was sitting at the east end of the room. He rose to acknowledge the spontaneous burst of cheering from the company and orchestra, and was again compelled to acknowledge the compliment to his genius, after his fine overture had been executed the second time. Another interesting enhancement in the memorable programme was the exquisite reading of Beethoven's only violin concerto in D by Vieuxtemps. Never were his grandeur of style, truthfulness of intonation, and marvellous passage fingering more strikingly developed; his cadenzas, albeit departing, perhaps, too much from the text of the composer, were astounding instances of intricate mechanism. To have secured the hearty approval of Spohr, one of the greatest violinists of the age, must have been most grateful token to the Belgian executant. The directors, whose policy this season has been of revivals of works expressly composed for the society, rat r than one of novelties, acted wise y and courteously in affording their subscribers the opportunity of hearing Ferdinand Hiller's Symphony in G, "Impressions of the Country," directed by himself.

It is divided into an allegro con moto, "in the country," an intermezzo, in the place of a scherzo "at the fair," an adagio, "in the wood;" and a vivacissima finale, "Upon the mountains." The fault in this key to the composer's design is, that it immediately suggests the notion of a second hand Beethoven pastorale, although the erudition and ingenuity of the very able musician has enabled him to steer completely clear of plagiarism. The symphony contains much graceful writing, and is indicative of his thorough appreciation of orchestral sonorities; but it is just on the wrong side of being a great work. It is exceedingly clever, but does not show the creative genius [illegible] which a symphony, like an epic poem, requires a fashion. Mdme. Clara Novo lo's splendid singing of Mozart's "Non mi dir," barring one or two slips in the scales, and Handel's air from the "Al egro ed il Pensiero," and Gardoni's chaste rendering of Mendelssohn's romance from "Joseph," "A pensa sorte de l'enfance," known in English as "In infancy's bud," completed the interesting scheme, the termination of which was marked with a well-deserved ovation to Costa, the Atlas of the society

CONCERTS OF THE WEEK.

Under this heading must be mentioned Joachim's fine concert, on the 25th ult., at the Hanover-square Rooms, conducted by Hiller, whose vigorous concert overture in D minor, and Macfarren's "Don Quixote" overture, and Mendelssohn's "Athalia" march were executed. Joachim's exertions were immense. He began with Beethoven's concerto in D, and afterwards played the fantasia on Hungarian airs, his MS. *concertante* in G minor, a composition of surpassing beauty, but which was coarsely and indifferently accompanied by the band, and Paganini's 24th caprice, to which he had appended an introduction and orchestral trills. Joachim's performances were most deservedly applauded throughout the concert, and were quite worthy of his great fame. Mdlle. Clauss and Herr Pauer, in Hiller's duo for two pianofortes, made by the Capulets and Montagues of pianoforte manufacturers, came in for their share of enthusiasm. The vocalists were Miss Dolby, whose singing of Scradula's air was one of the sensations of the night, Herr Von der Osten, the best tenor that has been heard from Germany this year; and Herr Reichart.——On Monday Herrmann and Klose, two pianists and composers, gave a morning concert at the Hanover Rooms, assisted by Madame Bockhorst-Falconi and Garconi, Herr Hausmann (violoncello), and Mr. John Thomas (harp). In the programme a symphony in B minor, a triumphal march, and an overture, "The Graces," by Goltz.—k, and a concert overture in D minor, with pianoforte pieces by Klose, were specified per Mrs. A. Newton, viz.: the co-operators in Mendelssohn's E. flat, and B. flat. Macfarren, Brougham, Messrs. Swift, Weiss, W. and G. Cobbett, Ward, Richardson, Miller, Anschau, and Saloman, gave a *matinée* on Tuesday.——In the programme a symphony in B minor, a quadrilla on the favourite airs of the Anglo-Irish, took place on Tuesday, at Wilde's Rooms, which was filled to overflow by a fashionable company. The programme comprised Mendelssohn's quartet in B flat, Op. 87, a posthumous work, with the magnificent movement of the last symphonic adagio by Beethoven, Pollitzer, Cooper, Watts, and Piatti; pianoforte duos and solos, performed by the charming pianiste Sloane Glanes, and by Herr Haller; solos by Vieuxtemps and Bottesini; airs by Sherrington and Donaldson; and by Gardoni; and Beethoven's trio in B flat, Op. 97, finely executed by Haller, Vieuxtemps, and Piatti. With such an attractive scheme, the enthusiasm of the audience could not fail to be of a nature to gratify the admirable exertions of the executants.——The second concert of Herr Molique was given on Wednesday night, at the Queen Anne-street Beethoven Rooms. His own composition and elegant violin playing rendered these meetings of more than ordinary interest and importance for art. A MS. quartet in A minor made a great impression, a very clever intermezzo being redemanded. Piatti led off the adagio of Beethoven's quartet in C sharp minor, one of the most delicious examples of beauty for the violoncello. Carrodus, with his master, Molique, came in for a good round of applause in Spohr's duet in D minor, Op. 39. Lit. Pauer's execution of Beethoven's thirty two variations in C minor, and the second portion of the amateurs. Herr Von der Osten, the tenor, sang a couple of Scotch airs, in one of which he was encored.——The stash and last meeting of the Quintet Association, on Wednesday afternoon, at Wilde's Rooms, attracted a large assemblage of amateurs, to hear the final performance of the Queen of pianists, Madame Pleyel; Hummel's septuor, Macfarren's MS. quartet in C minor, Beethoven's quartet, Op. 47, and Haydn's quartet No. 5, were included in the programme. The sensation produced by the Kreutzer sonata in A minor was immense: never was the delicate touch of Pleyel and the rich tone of Ganiot more thoroughly relished. In the septuor in E flat minor Mdme. Pleyel was aided by Mr. Pratten (flute), Mr. Nicholson (oboe), Mr. Jarrett (corn), Mr. Hill (viola), Piatti (violoncello), and Howell (contrabasso). By general desire, Mdme. Pleyel, as a *bonne bouche* at parting, played Kalkbrenner's fantasia on the "Pirata" themes.——Herr Guffens, the clever violinist, and Madame Goffrie, the able pianiste, gave a morning concert on Thursday, at Wilde's Rooms, aided by Mr. Hausmann, a pupil of Madame Goffrie; Herr Hausmann, Mr. F. Mori, Herr Godwicke, Madame Bockhorst Falconi, Sedlie, Lizzie Maguire, Miss Ellen Rowland, Mr. Swift, Herr Von der Osten, and Joachim.

MUSICAL EVENTS.

The English Glee and Madrigal Union (Mrs. Enderschn, Miss Williams, Messrs. Lockey, Hobbs, Phillips, Young, and H. Barnby) gave their third concert, on Monday, at Wilde's Rooms, and sang madrigals by Stafford Smith and Howland, and glees by Dr. Calcott, Webbe, J. B. Smith, Spofforth, Bayley, and Stevens.——The English Glee and Madriga. Union (Miss L. Pyne, Miss Do.by, Messrs. Swift, Francis, Land, and F. Bodda) sang, on Wednesday, at the Great Concert Room, in Queen Anne-street. Some of the glees were encored.——Regondi, on Thursday, a second series of morning performances.——Mdlle. Josa, Hugot, the singer of French romances, had a *matinée* on Wednesday, at her Queen Anne-street residence. Romani and Gardoni were the tenors.——Mr. Sievers (harmonium), Herr Hiller (pianoforte), M. Wuille (clarionet); and the vocalists, Mdme. Tascani-Tasca, Mdme. E. Lablache, Mdme. Lucci (pupil of Rubini), Mr. Lablache, Jun., and Sedlatzek; Mr. Maurice Levy being the accompanyist.——Mr. F. Bodda had a concert last night, at the Queen Anne-street Rooms.——The Choral Fund performance also took place at Exeter Hall, a concert which was given in aid of the Hanbury-Mission. Madame Alpiona gave a *matinée* at the Queen Anne-street Rooms, on Thursday, assisted by Mdlle. Hugot, Miss Messent, Mr. F. Bodda, and Signor Gardoni; and Mr. Russell Manning, a pupil of Madame Anna Thillon, on Thursday, in the Cecilian Society, under the direction of Mr. Shoubridge.——M. Julien commences this week at the Surrey Zoological Gardens his month's series of summer concerts, with the assistance of Sedlatzek, Koenig, Baumann, Lazarus, Prospere, Cioli, Jarrett, Collinet, Sonnenberg, Lavigne, Wu le, Engelke, Secchi, &c., &c., with Miss Cicely Nott as vocalist.——Letters from Paris state that Gounod's music to Lamartine's drama, "Le Tasse," has been produced at the Théâtre Français. There are twelve choruses in the score, besides *entr'actes* and pantomime music. A second work for the Grand Opera in Paris.——Yesterday (Friday) the first grand musical festival was to have been commenced at Brunswick, with Mendelssohn's "Elijah," executed by 140 trained vocalists and 100 instrumentalists, Herr Muller's direction.——The Italian opera season in Vienna, which began March 15th, ended June 30th, after a most brilliant season, in which Sophie Cruvelli, Signor Lablache, Signor Ronconi, Mario, Mademoiselle Marray and Fraschini were also included in the company.

COLOSSEUM.—This favourite exhibition continues to enjoy a large share of patronage, especially on Mondays. Since the reduction of the admission to one shilling on that day, the influx of visitors reminds one of the times of the Great Exhibition, even without the grand *cortége* of the Crystal Palace in the Cyclorama, which are really beautiful.

Drury-lane Theatre will be opened on Monday, July 12, for the benefit of Mr. Allcroft, when Miss Clara Novello will appear as *Amina*, in "La Sonnambula," with Mr. Sims Reeves as *Elvino*: to be followed by popular pieces, in which Mdme. Vestris, Mr. Charles Mathews, Mr and Mrs. Frank Matthews, and several of the Lyceum corps will assist.

NAVAL AND MILITARY INTELLIGENCE.

FLOGGING IN THE NAVY.—The *Portsmouth Times* says:—"We are informed that one day last week a first-class boy on board one of her Majesty's steamers at this port was placed on a mate's back, and forcibly held there, at the orders of the first lieutenant, while another man violently flogged him with a cane. The pain made the sufferer a couple hard to free himself, which he effected; on which the second lieutenant ordered two more seamen to hold him at his former position on the other's back, which was done; the 'nurse,' however, being unable to hold the boy in that position, the said lieutenant called the quartermasters to seize him up to the Jacob's ladder; the boy was accordingly so secured, and triced up by his wrists and ancles, his feet not touching the deck. The said lieutenant then directed the caning to proceed. After a time the caning was suspended by the order of the lieutenant for a few minutes, and then recommenced; the castigation was, after a time, stopped a second time, and a third time recommenced; after this the boy was cut down, and confined under the after-part of the main-deck. The conduct, fundamentalized, is a violation of the Admiralty instructions. It is said the captain of the ship was not acquainted with the proceedings, which, we believe, took place in the presence of another lieutenant, the surgeon, and nine-tenths of the vessel attended to." The steam-ship and the officer referred to are stated by the *Globe* to be the *Retribution* and her first lieutenant, G. D. Willes.

ARMY, NAVY, ORDNANCE, AND MISCELLANEOUS SERVICES.—The number of men on the army establishment in Great Britain voted for 1848 49 was 112,847; for 1849-50, 103,254; for 1850 51, 99,128; for 1851-52, 98,714; for 1852 53, 101,937. The number of men and boys voted for the navy during each of these years was respectively 43,000, 40,000, 39,000, 39,000. 39,000. The number for the ordnance was 14 294, 14 123 14569 14 573, 15,582. The sums voted for miscellaneous services in 1849 were £2,763,373 in 1850 51 the grants of £262,545 for the distress in Ireland and Scotland, and £1,100 000 for the Kaffir war; in 1849 50, £3,988,904; 1850-51, £4,065 642 and £300 000 for the Kaffir war; in 1851-52 £3,948 102; in 1852-53, £4 177,784, and £400,000 for the Kaffir war. The total sums voted for the above years for all the services were £12 880,659, £21,672,745. £20 012,735, £19,746 941, £20,445,851.

ARMY PRIZE MONEY.—It appears by a Parliamentary return that the total amount of unclaimed army prize money, from the 18th January, 1820, to the 31st December, 1851, amounted to £1,405,555 19s. 7d. Of this amount £720 951 was paid to claimants; £57,801 was paid for expenses incurred in executing acts; £597,720 was paid for the Royal Hospital to diminution of the annual vote; and the balance, £33 000, was paid to the Commissioners of Woods and Forests for appropriation towards the Royal Military Asylum.

EXCESSIVE MORTALITY ON BOARD SHIP.

A most deplorable calamity has become known this week, and has for some days past engaged the attention of the marine department of the Board of Trade, which has instituted an inquiry into the matter; viz. the death of 274 persons, principally Chinese emigrants to California, on board the British ship the *Lady Montague*, recently returned to the port of London, after a voyage of nearly four years' duration. The *Lady Montague* is a vessel 760 tons burden, and left Southampton in May, 1848, laden with coals for Aden, in charge of Mr. Wells, master. In the course of six weeks Mr. Wells died, when the chief mate, Mr. Samuel Robinson Smith, took the command. After discharging her cargo at Aden, he proceeded to Bombay, thence to Canton, Amoy, and Shanghae, and continued trading backwards and forwards between those ports, and eventually chartered the ship at Cunsingmoon to take Chinese emigrants to California *viâ* Callao. She sailed on the 11th February, 1850, having on board, including passengers and crew, no less than 500 souls. Whether she was properly victualled or not, is a matter yet to be satisfactorily learned. Certain it is that sickness and fever seized the helpless creatures within a few days after her departure. The water and provisions that had been provided for the emigrants became putrid (as reported in the log). The mortality that ensued was quite awful, and the sufferings of the poor creatures were of the most frightful description. Many committed suicide by jumping over board, and by the time the ship put into Hobart Town no fewer than 150 had perished. At Hobart Town the Governor sent all the assistance that was possible to alleviate the sufferings on board. By the 20th of April the medical officer who had gone to the relief of the emigrants succeeded in restoring those who survived to a state of health, and the ship resumed her voyage to Callao. The pestilence, however, again broke out, and before the *Lady Montague* had reached her destination nearly 100 others had died. The only letter Mr. Vaux, the owner of the ship, has received from the captain regarding the fearful epidemic which seized the ship is the annexed, which is very vague as to the character of the sickness:—

To John Vaux, Esq., Southampton. Callao, July 13.

SIR,—I beg to advise of having arrived here on the 20th ult. I have had a most awful passage of it, dysentery and fever having broken out among the Chinese emigrants, of whom I had 300 when I left Cunsingmoon, including 26 of the ship's crew. Among the latter were poor Mr Brazier, the supercargo, and G Paul. I had promoted Mr. Brazier to second officer on leaving Canton, and Mr. Robinson, who had been third officer, to chief officer, and died the night the ship got to Hobart Town. I was obliged to make for the nearest port to save the ship, the remainder of the crew, and passengers. I have suffered a good deal myself, and lay at death's door a whole fortnight; but by the mercy of Providence spared my life a little longer. The only person in the ship that has not been sick is the apprentice Rinsroft. You may be sure I have had a dreadful time of it, and for weeks and weeks I have had no more than one hour's rest, and six men besides myself to navigate the ship. No officers neither, and in a 5h south latitude, with a cold stormy weather to contend with. Happily, through the blessing of God, I have arrived with the ship, and with her the whole of the survivors. I was put in quarantine until the 9th at St. Lorenzo island, allowed to go on shore on the island, and everything that we required was sent to us from Callao.

This is the substance of all the information that the Board of Trade have been enabled to elicit respecting this frightful series of calamities—only three out of a crew of thirty-six which went out with the ship have come home.

The following letter from the owner of the ship has been received at the Board of Trade:

Harwich, June 24.

SIR,—I beg to acknowledge the receipt of your letter, of the 9th inst., respecting the melancholy deaths which have occurred to my ship, the *Lady Montague*, on her voyage to and from Cunsingmoon to Callao.

I regret to state I am unable to furnish any information beyond that already obtained by you from the log-book, or to give the number of passengers was originally embarked. My order to the captain who originally sailed in the *Lady Montague*, was to bring her directly to England. He unfortunately died, and the command was entrusted to the chief mate, James Robinson Smith, who, in disobedience to my orders and entirely contrary to my wishes, chartered her for a time at a fixed rate per month, to be employed in carrying emigrants to Callao. The number taken on board was by no means limited to me, but it was stated that the quartermaster and a surgeon sailed in the ship. I so strongly disapproved of his conduct that I despatched a second captain to China, with a power of attorney to supplant him, which, on the arrival of the *Lady Montague* to China, was done, and Smith returned as passenger in another ship. He is now in London, but I have not seen him. There has been no dispute between us, though I suspect there will be.

Should I be able to throw any light upon this lamentable occurrence, I shall be most willing to do so. I am, sir, &c.,

To Mr. T. H. Farrer. JOHN VAUX.

The extract from the log referred to in Mr. Vaux's letter is annexed:—

Summary of extract from the log of the ship *Lady Montague*, from Cumsingmoon, to China, to Callao:—

Feb. 17.—Received the emigrants on board.

Feb. 18 to 20.—Number of Chinese died, seven. Remarks.—Two Chinese jumped overboard and were picked up.

March 1 to 21. Died, 91 Chinese and two Lascars Remarks.—One Chinese jumped overboard and was drowned. Several died as described as being found dead in the morning, having died during the night

April 1 to 18.—Died, 51 Chinese, two Lascars, and the second mate of the ship. Remarks. During the passage several casks of water were found to be sour and perfectly unfit for use; also the fish sent on board for the use of the emigrants

April 18.—Died, the steward. The ship arrived at Hobart Town.

April 19 to 20.—Died, five Chinese and two Lascars.

April 30.—Ship sailed from Hobart Town to Lima

May 3 to 31.—Died, ten Chinese seven Lascars, and two of the crew, the surgeon of the ship, and one apprentice.

June 1 to 31, seven Chinese, four Lascars, and the second mate of the ship.

July 1 to 20.—Ship arrived and anchored at Callao.

Remarks.—Chinese 171, Lascars, 17; crew, 7.

It would appear that 193 persons died between the 18th of March and the 28th of June. It is, however mentioned in the log that the surgeon on board came on board to ascertain the number of deaths and to cause the same to be formed, and the result is stated th.

Deaths, 245; remaining, 201. T. H. FARRER.

On last Saturday afternoon there was heavy rain, accompanied by vivid flashes of lightning, speedily followed by peals of thunder, in the neighbourhood of Glasgow. About three o'clock nearly opposite to the town of Irvine, a vast body of vapour arose out of the sea with a spiral movement towards the clouds, which soon resolved itself into what is called a water-spout. The junction was accompanied by a flash of lightning. The column, conical in its form, was visible for several minutes, when it broke and fell into the sea.

ROMAN CATHOLIC PROCESSIONS.—THE PROCLAMATION.

The following correspondence between the Rev. Dr. Newman and the authorities at the Home-office has been published

Oratory, Birmingham, June 18, 1852.

SIR,—As a Royal proclamation appeared in the *London Gazette*, in which all whom it may concern are earnestly warned against a violation of the act of 10 Geo IV., by which Roman Catholic ecclesiastics and members of any of the religious orders, communities, or societies of the Church of Rome, bound by monastic or religious vows, are prohibited from coming into the realm, and penalties of the Roman Catholic religion, or wear the habit of their order, save within the usual places of worship of the Roman Catholic religion, or in private houses, I feel the liberty of requesting information on a question arising out of it, in which I am much interested.

It is now four years since, under legal advice that they were not breaking any law, and without any opposition, the Roman Catholic bishops of England, Ireland, and Rome, with the concurrence of the Roman Catholic clergy, regular and secular, and laity, have ordinarily appeared in the streets of Birmingham and in the neighbourhood in cassocks and cloaks

I beg to be allowed to inquire whether the recent proclamation is directed against this practice as well as against the processions (of which it makes mention); so that, if they continue it, they are in danger of being prosecuted against as disturbers of the public peace? I am, Sir, your obedient servant.

JOHN H. NEWMAN.

To the Right Hon. S. Walpole, one of her Majesty's Principal Secretaries of State.

Whitehall, June 24, 1852.

SIR,—I am directed by Mr. Secretary Walpole to acknowledge the receipt of your letter of the 8th inst., referring to the proclamation of the 4th inst., and inquiring whether it was directed against a particular practice which has lately been adopted by certain Roman Catholics, ecclesiastical and lay, "as well as against the processions of which it distinctly makes mention."

In answer thereto I am to inform you, that her Majesty's proclamation is directed against all violations of the 26th section of the statute of 10th George 4, c. 7, and that if you find any difficulty in the construction of that enactment, your proper course will be to consult your legal adviser. The Secretary of State would not be justified in pronouncing an opinion on the question submitted to him for, if any doubt arise on this point, the decision of it must rest with the courts of law, and not with the Government.

I am, Sir, your obedient servant, W. J. H. JOLLIFFE.

Rev. J. H. Newman, Edgbaston, Birmingham.

It appears by a Parliamentary return just printed that the declared value of all British wool on manufactures exported from the United Kingdom in 1850 amounted to £8 848 690, and in 1851 to £8 377,183, being a decrease as compared with 1850, of £211,513. The total quantity of sheep and lambs' wool, 8 573 103 lb., and yarn, 14,670 880 lb.; of alpaca and llama wool we imported in 1850, 338 859 lb., and in 1851 3,264 lb. We also imported in 1850 25,681 lb. of goat's wool, and in 1851 26,044.

The following are the quantities of coffee, sugar, tea, wine, and tobacco imported during the first four months of the present year, as compared with the similar period of last year:—Coffee, 8,147,089 lb.; in 1851, 7,846,393 lb.; sugar, unrefined, 1,691,639 cwt.; do 1851, 1,589 813 cwt.; tea, 32,144,589 lb.; do. 1851, 33 967 847 lb.; tobacco, unmanufactured, 2,963,323 lb.; do., manufactured, and snuff, 501,383 lb.; unmanufactured tobacco, 1851, 3,044,612 lb.; manufactured and snuff, 766,806 lb.; wine, 1,637,367 gallons; do. 1851, 2,810 551 gallons.

The electric telegraph communication from London to Plymouth will be completed in about two months. It is reported that wires will be laid to the Admiral's office, at Mount Wise, in order that immediate and direct communication may be had with the Admiralty in London, from this important department.

The interest manifested in the cause of the widows, orphans, and other sufferers by the loss of the ill-fated *Amazon* steamer and consumes, £32 having been received this week from Messrs. Stevens, two five-dollar notes from Trinidad, and £6 10s. 6d. from Tiverton (with the names of the subscribers). To these sums have been added to the fund, which now amounts to £14,000

Two young ladies, Misses Meyer and Windermann, have just been impressed in Bremen for political writing.

MONTHLY TRANSACTIONS FOR THE WEEK.

(From our City Correspondent.)

From its having been asserted, on what may be considered "good authority," that a new loan of £8,000,000 sterling will shortly be raised on account of the French government, the jobbers in the Stock Exchange have exhibited more than their usual caution this week; hence the market for national securities has been less active than for some time past, and prices have slightly receded. The first actions, however, have been comparatively trifling, the Three per Cents for the next Account being done on Monday at 100¾, and on Thursday, 100⅞. On the latter day the Three per Cents Reduced were 101¼, and the New Three-and-a-Quarter per Cents, 104⅜. Bank Stock has advanced to 225, whilst Long Annuities have sold at 6⅞ 15-16. Both India Bond's and Exchequer Bills have fallen 2s., the former to 98s. and the latter 69s. to 70s. premium. This decline is owing to the numerous sales effected on Thursday.

In respect to matters affecting, or likely to affect, the Foreign House, we may observe that several changes have reached us from Vienna to the effect that a new loan of 250,000,000 florins will be speedily opened at Vienna, and that Spain has succeeded in obtaining an advance of 200,000,000 reals through the Bank of Paris, to pay the Five per Cent. Indemnity Certificates issued in 1838, in satisfaction of certain claims of British subjects. The news from Vienna, in a commercial point of view, is favourable, the premiums on the Austrian Five per Cents having risen to 101½, and that on silver declined. The features in our advices have tended to cause large speculative purchases; nevertheless we have very little change to notice in the value of Continental or other foreign stocks. The Danish Twenty-Rix-Dollar Certificates (91), Buenos Ayres Six per Cents, 79 to 78, Mexican Five per Cents, 33¼ to 34; Mexican Three per Cents, 27⅛; Peruvian Six per Cents, 105¾; Peruvian Deferred, 69¾ to 69; Portuguese Four per Cents, 89½; ditto, for the Account, 89; Spanish Four per Cents, New Deferred, 21¼ ex. div.; Spanish Committees' Certificates not funded, 3; Dutch Two-and-a-Half per Cents, 63 ex. div.; and Dutch Four per Cents, 96. Bargains have taken place in Austrian Five per Cent. Scrip, at 2½ to 4½ pm.; Brazilian Bonds, 101; Grand Deferred, 93 to 10; Russian Four-and-a-Half per Cents, 109; Spanish Passive Bonds, 5¾; and Spanish Old Three per Cents, 49¾ to 50

We have again to notice the arrival of large additional supplies of the precious metals, £208,500 in gold having come in from Australia, and £190 000 in specie from New York. The accounts from the gold districts are very flattering, and one of our correspondents at Sydney states that several parcels of gold had been dispatched to Manilla, where they had realised £3 19s. 6d. per ounce. The total supply in the Bank of England is now £23,41.000.

The returns from the Board of Trade of the import and export trade of the country exhibit very favourable results. The total shipments during the first four months of the present year were £21,844,653, against £21,904,338 in 1851, and £20,927 909 in 1850

The settlement in the Railway Share Market has passed off extremely well, with comparatively light rates of continuation. Those on London and North-Western have been 4s to 5s; Midland, 4s to 12s; Lancashire and Yorkshire, 4 to 8, Great Western, 3s to 10; London and South-Western, 1s to 5; South-Eastern, 3s to 11; Caledonian, 3s to 7s; and Great Northern, 5s to 7 per cent. for an account. The carrying over or finding shares has been easily effected at from 2 to 5 per cent.

The exchange on Paris having fallen, gold is now about the same value there as in London; but it is rather better than at Hamburgh or New York—at the latter port by 0·93 per cent. This quotation leaves a small margin of profit to the shippers.

The total amount of railway "calls" for the present month is £1,805,530; but a large portion of them are for foreign companies; viz. £1,247 640. During the first seven months of this year, the foreign "calls" have amounted to £4 401,982, against £2,853 903 in 1851, and £2,859 903 in 1850.

An extensive business has been again doing in British Shares, at further enhanced rates. Australasia have marketed 53¾, British North American, 6¼; Colonial, 10¾; Grand Junction, 2½; London and North-Western, 18¾; London and Westminster, 3¼; Oriental Bank Corporation, 37¾; Provincial of Ireland, 47½; Union of Australia, 49¾; and Ditto, New, 5.

There has been less inquiry for Steam boat Shares, the value of which has not been supported. Australian Royal Mail, 2½ General Screw, 50¾, General Steam, 2½ to 29, Peni sular and Orienta, 87 ex. div.; and Royal Mail Steam, 7½.

Money for commercial purposes has been in increased request, yet bankers have discounted freely, at the late decline in the rates. The quantity of good bills, or at this time afloat is unusually large.

The extensive inquiry for Railway Shares, near the whole of which we produces higher rates. The following are the official closing prices on Thursday:

ORDINARY SHARES AND STOCKS.—Aberdeen, 28½; Ambergate, Nottingham, and Boston Junction, 8½; Bristol, and Exeter, 100; Caledonian, 44; Chester and Holyhead, 25½; Eastern Counties, 10⅝; Edinburgh, Perth, and Dundee, 24; Great Northern, 20; Great Western Dock and Birmingham Junction, 60; Glasgow, Paisley, Kilmarnock, and Ayr, 66; Edinburgh, Perth, and Dundee, 24; Great Northern, 20; Great Western Dock and Birmingham Junction, 60; Glasgow, Paisley, Kilmarnock, and Ayr, 66; Edinburgh and Glasgow

THE GOLDSMITHS' COMPANY'S PRIZE CANDELABRUM.

AMONG the many gratifying results of the Great Exhibition of last year will, doubtless, be recollected the noble offer of the Goldsmiths' Company of £1000 for the best productions of silver plate exhibited at the Crystal Palace. The awards were made by a jury appointed by the Company; and the several articles for which prizes had been adjudged were exhibited by special desire of the Prime Warden and Court of Assistants, at a grand dinner given by the Goldsmiths' Company, in their superb hall, on Friday, Jan. 30.

Of these prizes, 18 in number, the largest in amount, £200, was awarded to Messrs. Garrard, goldsmiths to the Crown, "for the best group of figures or animals, as a table ornament or candelabrum," which splendid work we now engrave.

The design is a very spirited and ably-modelled group, by Mr. Cotterell, representing, from Sir Walter Scott's "Talisman," the Sultan Saladin and Sir Kenneth meeting at the fountain to refresh themselves and their weary steeds. The light Arabian horse of the Sultan, and the heavy charger of the Knight Crusader, are well portrayed; and the execution of the group displays great knowledge of the costume and character of the period. The style of the ornament of the Candelabrum is that of the early Arabs, or Alhambraic. The ever-varying lines of which this style admits, its great variety of beautiful ornament, and the novelty of its adaptation to works in gold and silver, render it likely in some measure to supersede the scroll ornament of Louis Quatorze, which, of late, has been introduced into every form and every article, until the eye has become wearied with the repetition. This magnificent piece of plate must, therefore, be regarded as a work of highly artistic interest.

To Messrs. Garrard were also awarded several other of the prizes, including a candelabrum of smaller size than the above, £100, in the style of the period of Queen Anne. Other prizes were adjudged to Messrs. Lambert and Rawlings, Mr. Keith, and Messrs. Widdowson and Veale. The liberal spirit of the Goldsmiths' Company in thus fostering the elegant manufacture of which they have been for centuries the official guardians, cannot be too highly commended; and the adjudication is alike honourable to their judgment, and the high position of British art.

PRIZE CANDELABRUM MANUFACTURED BY MESSRS. GARRARD.

TRAINING INSTITUTION FOR SCHOOLMASTERS FOR THE DIOCESE OF OXFORD.

IT is well known that the lamentably defective state of education among the labouring classes of our agricultural and other districts is now so fully impressed on the minds of the clergy and others interested in the great cause of education, as to give rise to a general and effectual scheme of diocesan education; in other words, the various dioceses into which the country is divided are at this moment using strenuous exertions to found institutions that may serve to secure eventually in each the blessing of a sound education, based on the teaching of the Established Church; and the mode of effecting this desirable end is by first *training* a certain number of male and female teachers in buildings to be erected for the purpose, and then sending them into the various villages, to diffuse amongst the youth of the several dioceses the benefits they have themselves received in these training institutions. Amongst the most important of these will be the above establishment.

The site of the building is Culham glebe, which was obtained by purchase, and is a most eligible position midway between the town of Abingdon and the Great Western Railway station on the Oxford branch. The main or south front of the structure faces the road between these two points; and, from its extent and the pleasing character of the style of architecture adopted, forms a novel and striking feature in this fine open tract of country.

The style of architecture is the decorated Gothic of the 14th century, uniting a generally prevailing simplicity with a certain attractive elegance in details, yet fittingly suggestive on the whole of the ecclesiastical associations which are identified with the structure. The entire mass of the building is quadrangular in form, and the design shows a remarkable degree of compactness and convenience in all the arrangements for the accommodation of the inmates. The range forming the south point is bounded on the east end by the chapel, which stands forward from the general line of the building, and is connected with it by a corridor and cloisters. The chapel is of ornate and appropriate character, the arrangement of the interior being stall-wise, the seats facing east and west. The principal front of the College, on either side the central entrance, consists of a great dining-hall and school-room, 58 feet by 20 feet respectively. The eastern wing of the building consists of three large class-rooms and master's sitting-rooms; the western wing being appropriated to the principal offices. The first floor consists of dormitories for the pupils, which extend throughout three sides of the entire building; these large dormitories are partitioned off separately for each pupil, with a window to each. It will thus be seen that health and comfort have been carefully studied in the disposition of these essential portions of the structure. The staircases are of stone, and the floors constructed on Messrs. Fox and Barrett's patent fire-proof principle. The walls are constructed of Marcham stone, backed up with brickwork and dressing of Bath stone. The windows of the principal front are varied in design, being mostly trefoil-headed, and accord with the general character of the edifice. A shield over the main entrance is charged with the arms of the see of Oxford, as being appropriately expressive of the destined purposes of the building.

The space within the building forms a quadrangle, a little more than 100 feet each way, and will be laid out with walks, &c.; and an ambulatory extends round three sides. It is designed to occupy the fourth side of this quadrangle with a yeoman's school, and practising schools beyond. These will prove most valuable to the neighbourhood, as an adjunct to such an institution. This part of the plan is not, however, at present contemplated, although it is much to be desired that the funds at the disposal of the committee will enable them to include this valuable addition. A terrace 30 feet in width extends along the entire south front of the building, and is reached by a carriage drive from the Abingdon road. Thus every purpose of recreation required in connexion with such an extensive institution has been duly consulted; and with the aid of a little ornamental planting, the agreeable effect of the whole will be enhanced to the eye of taste. The building is adapted for the accommodation of 100 students and four or five assistant masters, besides the principal, for whom a separate residence is provided at the S. W. angle of the main front. The site comprises a space of eight acres, including the portion reserved for the yeoman's and practising schools. The south front, already described, is 226 feet in length, besides the chapel, which stands boldly forward and stops the terrace before the south front. It measures 57 feet in length, by 26 feet 6 inches in width.

We understand the building will be completed by the end of the autumn, at a cost of £16,000, of which the greater portion has been raised by diocesan subscriptions; the Committee of Council on Education, and the National Society, assisting by large grants. The sum of £2000 is still required to complete the works in progress, independently of the additional schools before spoken of.

The work is being executed by Mr. George Myers, of Lambeth, under the superintendence of Joseph Clarke, Esq., architect, of Stratford-place, London.

TRAINING INSTITUTION AT CULHAM, FOR SCHOOLMASTERS FOR THE DIOCESE OF OXFORD.

EAST INDIA COLLEGE, HAILEYBURY.—The distribution of prizes and medals to the students of the East India College at Haileybury took place on Monday, under the presidency of Sir J. W. Hogg, the chairman of the East India Company, supported by a very numerous and distinguished company, among whom were several members of the committees of both Houses of Parliament, which are now sitting to inquire into the question of the renewal of the Company's charter. Among the visitors present were his Royal Highness the Duke of Cambridge, the Duke of Newcastle, the Marquis of Normanby, Earl Powis, the Bishop of Oxford, Lord Frederick Fitzclarence, the Right Hon. W. Gladstone, M.P., Sir R. Inglis, M.P., Lord Mahon, M.P., Lord H. Foulett, &c. The company having assembled in the library, the usual number of medals, prizes, and other honourable distinctions of students leaving college, June, 1852, were distributed. The chairman having delivered an appropriate address to the students, the visitors were entertained at a handsome *déjeûner* in the dining-hall of the college, at which the healths of the Duke of Cambridge, the Principal and the Professors, and the visitors were given, and duly acknowledged; after which the company returned to town.

THE ILLUSTRATED LONDON NEWS

No. 568.—VOL. XXI.] FOR THE WEEK ENDING SATURDAY, JULY 10, 1852. [SIXPENCE { WITH SUPPLEMENT, GRATIS.

UNITED STATES.—THE FUTURE PRESIDENT.

WHILE our own country is deeply immersed in electoral conflicts, not yet far enough advanced to justify the formation of an opinion as to the final result, we have received intelligence that the two great parties of the United States have chosen their candidates for the next Presidential contest. Our readers are aware that all the inhabitants of the States are divided into two great political parties—the Whigs and Democrats—who, whatever principle they may have originally professed, now chiefly differ from one another, like ourselves, on the question of Free Trade. But it has not reached the same point there as here. The principle of Protection—here almost universally disavowed, though it yet linger in our habits and in some of our laws—is there still the foundation of their tariff. Lord Derby, at the beginning of the late session, till taught better by experience, pronounced it worthy of being a model for our imitation. In the States, however, the principle is applied to encourage manufacturing industry, by heavy import duties on hardware, woollens and cottons, sugar, and other articles chiefly produced, except sugar, by the increasing town population of the northern and eastern States. The duty on sugar arrays a portion of the population of Louisiana on the same side, and gives one southern State an interest in Protection. The great question of Slavery is not at present taken up as a party question; it involves a conflict between the slave and the free states; and by common consent, and by a compromise embodied in the Fugitive Slave Act, has been for the present buried beneath the desire to preserve the union and the harmony of the Federation. Neither is any question at issue, as might be supposed by the term Democrats applied to one party, corresponding to our disputes as to the extension of the suffrage. The great distinction at present is, that the Whig party advocates and defends protecting duties; and the democratic party requires to have them all abolished, proposing to supply the wants of the Federal Government by a system of direct taxation levied on each State by its own authority. It is rather curious to find all the world looking to similar objects, for rumour ascribes to Louis Napoleon an intention to give Free Trade to France, while on that subject the population of our country, of Germany, and the United States are divided.

Caucus, log-rolling, and conventions in the States, are objects of ridicule to Europeans; but they are really the means by which the Americans carry out their contests, great and small, to a quiet end. They bring into operation mutual concession, compromise, and a common action. The noteworthy result is, that, from the establishment of American independence in 1783, only three years after London was desolated by the Gordon riots, all the elections in the states, for presidents, governors, and representatives, have been completed with less riot and disturbance than prevailed at any one of our general elections prior to passing the Reform Act. It is a common complaint amongst ourselves just now, when no great principle is at issue, as in the City of London, Southwark, Lambeth, Finsbury, Manchester, &c., that the personal pretensions of individuals force on, quite unnecessarily, all the heat, disturbance, and waste of a contested election. There is a want of some medium of communication by which the friends of each candidate might learn their relative strength, and quietly settle amongst themselves by whom they will stand. In their Conventions the Americans have a reasonable means of coming to an agreement, and have recently selected the two individuals as candidates for the Presidency, for whom all the Whigs and Democrats respectively will vote.

The President's office will be terminated in March, 1853; but the election of his successor will take place at the close of this year. The candidates in the field on the Democratic side were General Cass, Mr. Buchanana, Mr. Rufus King, &c. The candidates on the Whig side were Mr. Fillmore (the present President), General Winfield Scott, Mr. Webster, Mr. Crittenden, Mr. Douglass &c. If either party were to split its votes amongst so many candidates it would be certainly defeated, or the election might be carried to the general discontent by a small minority of the whole. To avoid that, the leaders of each party meet in convention without any law so directing, and decide by ballot or otherwise, if there should be any dispute amongst them, who shall be their candidate. After they have decided there is, we believe, no instance of the party having failed to give an unflinching support to the man of their choice. On June 1st the Democrats met at Baltimore, and to the general surprise fixed on General Pierce, whose name as a candidate had not before been heard of. In his favour all the other Democratic candidates instantly resigned their pretensions, and he will receive the

COLLISION BETWEEN THE "DUCHESS OF KENT" AND THE "RAVENSBOURNE" STEAMERS, OFF NORTHFLEET POINT.—(SEE NEXT PAGE.)

undivided votes of the Democratic party. On the 21st ult. the Whig party met in convention also at Baltimore; and after no less than fifty-three ballots, selected General Scott as their champion, and instantly, says a letter from Philadelphia, as the telegraph communicated the news all over the country, the whole Whig party saluted Scott as its champion. Fillmore, Webster, Case, Douglass, and every other name of note is instantly buried in oblivion, and either Scott or Pierce will be the next President of the United States.

General Pierce is in the forty-sixth year of his age. He has been Speaker of the House of Representatives of New Hampshire, a member of its Senate, a representative to Congress, and a member of the United States' Senate. He was President of the Convention which revised the New Hampshire Constitution, and his title of "General" was won by his service in the Mexican war. He is a lawyer of ability, and a gentleman of accomplished manners. The instant he was named he received almost the unanimous support of the Convention, 283 out of 228 votes, and seems likely to be successful against his competitor. General Scott is only a soldier who has gained laurels in Mexico. On the first ballot he received only 131 votes, while Mr. Fillmore received 133, and Mr. Webster 29; and the majority of the whole being required, it was not till the fifty-third ballot that General Scott had the requisite number: he had then 158, Mr. Fillmore 112, and Mr. Webster 21. The Whig party is, therefore, much divided, and will probably be defeated. In 1849 the Whig party was successful, in the person of General Zachary Taylor, who died in July, 1850, and left no successor in his party of equal popularity. General Pierce, though he belongs to a northern state, is opposed to the tariff. New Hampshire is not a manufacturing state, and its interests are adverse to Protection. General Taylor was favourable to Protection, though in a moderate form, from being connected with Louisiana. Mr. Fillmore and Mr. Webster, evenmore decidedly than General Scott, favour Protection; and the different mode of coming to a decision of the two Conventions foreshadow the complete defeat of that principle.

It will be time enough to speculate on the consequences when the question of the Presidency is decided; but they are likely to be very favourable to the extension of trade, and not more advantageous to England than America. The peace and quietness with which the elections are all completed in the States, though so much is written and said about them, demand a further observation. Some persons attribute all the success of the States, the good order which prevails, the general prosperity, &c., to the great abundance of land at the command of the people. But for years past the policy of governments in relation to our own colonies has been very much influenced by Mr. Wakefield's theory, that abundance of land is a source of barbarousness, and it has actually made land dear or scarce in the colonies, in order to confine and condense the population. It is quite certain, too, that many of the States of Europe are not so densely peopled as Massachusetts and Rhode Island. It is doubtful, therefore, whether the prosperity of the United States, and the good order of their people, mingled with strangers from all parts of the world, are the consequences merely of land being abundant.

Though material causes, of which an abundance or scarcity of land is one, have a great influence over the character and conduct of men, yet moral causes—as we learn from the examples of the Swiss, the Dutch, and the English, who achieved greatness in spite, or perhapsin consequence, of comparatively contracted limits—are at least equally powerful in determining the weal or woe of mankind. Many parts of Russia, Poland, Hungary, and Turkey have yet room for many millions of human beings, and it is not, therefore, the command of an abundance of land, but the government and qualities of the Americans, which ensure their prosperity. While the people of most of the countries in Europe go to loggerheads when there is any kind of difference of opinion amongst them, and could not for ages, and cannot now, elect a Bishop or a Burgomaster, a Landesmann, or a King, a parish beadle or a member of Parliament, without contests and conflicts, wasting money and time, generating disturbances, and breaking heads or shedding blood, the Americans, by some simple and reasonable method—caucus, log-rolling, convention—manage quietly to bring all their disputes to the decision of a numerical test. For upwards of seventy years, during most of which the old civilised states of Europe have been convulsed with contests, insurrections, revolutions, and wars—being united by peace, soldiers, and institutions to prevent mischief when not engaged in bloody battle—the Americans have lived in almost perfect peace, and have continually elected throughout their States an immense mass of officials, from a hall porter to the President, without more disturbance than is occasioned in Europe by changing the quarters of a regiment. The explanation of the phenomenon seems to lie in the common but general fact, that knowledge gives skill. The youngest of nations, the United States, profits by the experience of their predecessors; and as they benefit by all the admirable machinery of old Europe, for cultivating the soil and manufacturing cloth, besides inventing more new and admirable machinery of their own than is possessed by any other nation except the English, so they benefit by using the best machinery of Government previously known and in use in Europe, while they have improved it by still better machinery of their own. They are simply more skilled in the art of government, as they are more skilled in the management of steam-boats and telegraphs than most of the people of Europe.

LOSS OF THE "DUCHESS OF KENT" STEAMER.

A collision of a most frightful character occurred on Thursday afternoon, last week, in the river Thames, off Northfleet Point, by which the *Duchess of Kent*, Margate and Ramsgate steamer, was run down by the *Ravensbourne*, bound to Antwerp with nearly 500 passengers and full cargo. It appears that the *Ravensbourne* was steaming down the river with full tide in her favour immediately in the wake of and just on the starboard side of the *Meteor* Gravesend steam-boat. She arrived nearly opposite Northfleet Point about two o'clock. On nearing the Point, the *Duchess of Kent*, Margate steamer, was seen coming up the river against tide and hugging the southern shore—the tide running very strongly. The *Ravensbourne* was about three parts over the river on the Kent shore, and as she neared the *Duchess of Kent*, the latter crossed, apparently with the object of passing between the *Ravensbourne* and the *Meteor*; when, in an instant, consequent on the heavy way on the *Ravensbourne*, before the *Duchess of Kent* could cross her, she ran into her about twenty feet from the figure-head, or just before the windlass, on the starboard bow. The crash was frightful; the *Duchess of Kent* immediately began to fill, and to commence sinking, bows to enmost. The scene among the passengers, a large number of whom were ladies with children, was truly frightful. The captain of the *Ravensbourne*, finding that the *Duchess of Kent* was rapidly sinking, backed, when the passengers rushed, in their fright, to the still sinking part of the ship. At this moment the *Meteor* arrived alongside, and the passengers and crew on deck were literally dragged on board the *Ravensbourne*, with one exception. This was a gentleman named Hale, a brewer, of Broadstairs, Isle of Thanet, who, being infirm, was unable to be reached. In the meantime the vessel sank, bows first, almost perpendicularly, the keel being lifted as she sank, twenty or thirty feet out of the water. The captain of the *Duchess of Kent*, it is only due to him to state, was, with the exception of Mr. Hale, the last to leave his ill-fated vessel. Mr. Hale, though unable to assist himself from infirmity while on board the vessel, most extraordinary to relate, the moment he reached the water, struck out and kept himself afloat until rescued by one of the boats lowered from the *Meteor*.

From the moment of the collision to the time the *Duchess of Kent* entirely sank beneath the surface of the water, was little more than eight or nine minutes; and, but for the prompt assistance rendered by the crew of the Star Packet, *Meteor*, a great loss of life must have occurred.

A letter from Wiesbaden, of a recent date, states thtt the King of the Belgians was living there in so retired a manner, that had not his arrival been announced, no one would imagine he was in the town.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The discovery of a political conspiracy, and the consequent arrest of some thirty persons of the humbler classes in the suburbs of Paris (which we noticed in our late edition of last week), has occupied the French police within the last few days; but the matter turns out to be of little importance. The individuals arrested included several women, and many of them were taken in the act of fabricating a rude description of fire-arms out of gas-pipes; and amongst the seizures made at the place of meeting a lonely house in the Rue de la Reine Blanche, nearly opposite the Gobelins manufactory—were receipts for making gunpowder, and letters from the French Revolutionary Committee of London. The *Moniteur*, however, denies that there is any consequence to be attached to the affair. The persons arrested included one of Cussidière's Montagnards, and five of the insurgents of June who were transported and subsequently pardoned.

The session of the French Senate was closed on Monday; Marshal (the ex-King) Jerome Bonaparte presided on the occasion. Several bills which had been referred to the Senate for consideration having been disposed of, the President of the Senate rose and pronounced a closing address, which was received with numerous marks of sympathy and approbation. Count X. de Casabianca, the Minister of State, was then introduced, and read the proclamation declaring the Senate to be closed. The senators at once separated.

Rumours were afloat on Tuesday in Paris that a change of Ministry was about to take place, when M. Morny, it was thought, would enter the Cabinet.

The hot weather has brought with it the hydrophobia. Several persons in the streets of Paris have been bitten by dogs labouring under that disease; and one lady, who had been so attacked, ran about the streets on Monday last, attempting to bite every person that came in her way, and shortly afterwards died. On Tuesday a child was taken to one of the hospitals, having been almost half devoured by one of these rabid animals.

The *Moniteur* announces in a communicated note that the President, having been informed of the intention to give banquets in his honour during his approaching tour in the departments, has resolved not to accept any, however touched he is by these kind attentions

Monseigneur Pallegoix, member of the Congregation of Foreign Missions, has arrived in France from Siam. He is charged by the King of Siam with a friendly mission to the President of the Republic, and is about to bring out a dictionary in Latin Siamese. His present title is Bishop of Mallos, but he has for some time been acting as Bishop of Siam, and as the greatest of that see died recently, it is supposed that he will be named his successor. When M. Pallegoix first went to Siam there were only 1500 Roman Catholics, and there are now upwards of 7000. The number of priests composing his mission is fifteen, seven of them being natives.

The reports from the provinces give the most favourable accounts of the state of the crops.

Two Arabs, imprisoned in the fort of St. Louis, at Cette, had a violent quarrel a few days since, which resulted in one of them plunging his knife into the stomach of his opponent, from which the wounded man shortly afterwards died.

The trial of the man for the torture and murder of the three gendarmes at Bedarieux (Hérault) in the insurrectionary tumults which followed the coup d'état of December last has terminated. Six are sentenced (by default) to death. Of the twenty-nine present, eleven are sentenced to death, five to hard labour for life, three for a term of years, four to transportation to a fortified place, four to simple transportation, and two acquitted.

SWITZERLAND.

Accounts dated the 2d inst. from the Canton of Neufchâtel state that the Royalist party, who desire the return of the Canton to Prussia, intend to make a grand demonstration of their adherents at an annual meeting of the burgesses, which is to be held on the 5th July at Valengin, with the view of influencing the Federal Assembly, which is about to commence its session at Berne. The Republicans, on their part, have resolved to make a counter-demonstration at the same place on the same day. At the election for the Grand Council in March last the Royalist party only obtained 14 returns, whilst the Republicans had 74; but for the elections for the Council of State, which took place a few days ago, they obtained 12 nominations out of 28: and, bes des, they are greatly encouraged by the recent signing of the protocol at London by the great Powers. The Swiss journals state that not only the most enlightened and wealthy portions of the population of the Canton, but the great mass of the Conservative party in Switzerland, are on the side of the Republicans on this special question.

UNITED STATES, CANADA, &c.

We have accounts this week from New York to the 26th ult.

From Congress there is no news of interest.

The Whig Convention at Baltimore, after fifty-two unsuccessful ballots, had nominated General Winfield Scott, of New Jersey, as the Whig candidate for the Presidency, and Mr. Graham, of North Carolina, for the Vice-presidency. A great disparity of feeling was manifested by the announcement of General Scott's nomination. At Boston the rejoicings were far from being general or hearty.

A mutiny had occurred on board the ship *John Rutenas*, on her passage from Liverpool to New York. The chief mate was shot, after which order was restored.

The independence of San Juan de Nicaragua had been acknowledged by the British and American authorities, and the event was celebrated with great hilarity on the 4th ult.

The United States Commissioner, Bridgham, was about to give his decision relative to the application of the British Government for the extradition of Thomas Kain, charged with felony in county Westmeath, Ireland, by shooting at Joseph Balfe, farmer.

By an arrival from Belize, to the 1st of June, the news had been received in New York, that owing to the disturbed state of public affairs, all the Honduras papers had been discontinued.

From Canada we had much dissatisfaction expressed in the newspapers at the failure of the mission of the provincial delegates to England in connexion with the Quebec and Halifax Railroad scheme.

The number of fugitive slaves that had obtained protection in Canada during the last three years had been estimated by some of the journals as high as 30,000.

From South America we have advices to the end of May, which state, in reference to General Flores' attack on the Republic of Equador, that Flores still remained at Guayaquil. He had nine vessels, and sufficient funds, and was only waiting the arrival of an additional steamer to commence the attack.

The French population at Guayaquil had most of them taken refuge under the protection of the French Consul. The American, French, and English frigates were still at Guayaquil.

It is stated from Honduras, that the inhabitants of Ruatan had claimed the protection of Honduras against the British authorities. Great disorder prevailed.

CAPE OF GOOD HOPE.

The accounts by the usual monthly mail steam communication from the Cape are to the 29th of May. They show that, though the Commander-in-Chief of the army acting against the Kaffirs has been changed, the prospects of the war have not been altered. It maintains its tedious interminable character; and it is evident that many a hard fight must be gone through, and many a valuable life imperilled, before General Cathcart can succeed in bringing the contest to a satisfactory close.

From the seat of war on the frontier the latest intelligence is dated May 25, and from it we learn that no military movement on an extended scale had been made since the previous advices, that several skirmishes had taken place between military detachments, and also between Burgher parties and the enemy, which go to show that the latter is by no means subdued. In these encounters several lives had been lost on both sides. General Cathcart, whose head-quarters were established at Fort Beaufort, seems to have acted with great caution, and his measures appear to have been more of a defensive character than otherwise.

The *Graham's Town Journal* of the 22d May notices the narrow escape of her Majesty's steamer *Styx*, Commander Hall, from running on Bird Island Reef, in Algoa Bay; but owing fortunately to the prompt decision of that gallant officer, who gave orders to alter the helm, to stop the engine, and to stand by the anchor, that probable calamity was avoided.

M. THIERS AND THE SWISS AUTHORITIES.

The Council of State of the Canton of Vaud decided recently, it is said, at the request of the French Government, on appying to M. Thiers, who was within the last few days at Vevey, in that canton, the Federal decree relative to confining French refugees to some appointed place in the interior of the country. There was only one vote against this decision, and the Prefect, M. Bachelard, was charged to transmit the order. M. Thiers had hired a house at Vevey for the whole summer; and his family, which had gone there to meet him, had expected to remain in tranquility for the season. When the order was communicated to him he refused to accept the *internement* or location assigned him, and left Switzerland in preference to proceeding to Piedmont. It is said he will pass the autumn in Italy.

Much indignation, both in France and Switzerland, has been caused by the proceeding, particularly as it is remembered that Louis Napoleon himself was once the subject of a request somewhat similar from the Government of Louis Philippe to that of Switzerland, and that the latter refused to yield to Louis Philippe on the point. Various rumours were afloat in Paris on the subject. The following, taken from the correspondence of a resident contemporary, has an air of probability:—It appears that the resolution of the French Government, with respect to the illustrious historian, was rather sudden. While M. Thiers was in Italy, the instructions given to the agents of the French Government in that country were to the effect that, so far from giving him the least annoyance, or throwing obstacles in his way, they were to treat him, if they should fall in with him, with the greatest respect. But it appears that the visit of M. Thiers to Switzerland, coinciding as it did with that of the Duchess of Orleans to the same country, gave umbrage to the jealous mind of Louis Napoleon. He could not be persuaded that the simultaneous visits to those two personages to the Helvetic Republic were accidental; and though he did not precisely discover what evil could come of the affair, even if it were a rendezvous, he determined to give a new reading to an old adage, and consider *omne ignotum pro conspirat-one*. It appears that a letter written by M. Thiers, from Turin, to a friend in Paris, had been for some days past in circulation, and has, perhaps had some influence on his fate. In the letter M. Thiers pays a high compliment to the young King of Sardinia, and to the free institutions now established in that country, and expresses a hope that the day may come when France may have similar institutions, with as wise a Cabinet as that presided over by M. d'Azeglio to carry them on.

CHURCH, UNIVERSITIES, &c.

DECORATION OF ST. PAUL'S.

The last meeting of the Royal Society of British Architects took place on Monday night, at their rooms, Lower Grosvenor-street, Grosvenor-square, to further discuss the question of the most appropriate decoration for St. Paul's Cathedral; Mr Mocatta in the chair.

Mr. Penrose having been called upon to re-open the discussion, commenced his observations by saying that he believed it was the intention of Sir Christopher Wren to have very highly decorated this cathedral, but for the troublesome times in which he lived. During the last thirty years large sums of money had been expended in decorating the cathedrals throughout the country, while nothing had been done for the decoration of St Paul's. In almost every other part of Europe the greatest attention was paid to this subject. St. James Thornhill had painted the dome of the cathedral in the year 1720 for £3 the square yard, and in 1774 Sir Joshua Reynolds and the Academicians, struck with the naked appearance of St. Paul's, had offered to continue the decorations gratuitously, but their offer was declined. Mr. Penrose then proceeded to point out upon a plan of a section of the choir the nature of the decorations he considered desirable. Having restored the cupola, the painting in which were in *chiaro-scuro*, with very little colour, though there was a large amount of gilding, he thought that upon the surfaces of polychromic colours would be out of place, and that, in fact, no such colours should appear, excepting in the windows, which ought to be very highly painted. If many colours were used on the walls, pure glass shan't be adopted; but the grandest effect would be produced by the use only of natural colours on the walls, and the introduction of painted windows. In the choir there were three cupolas, before the altar, care to be taken in the treatment of which ought to be decorated as much as possible in the manner of Sir John Thornhill with the grand cupola. The raised spandrils present a very good opportunity for decoration, by figures or small groups, but these, too, he thought, ought to be executed in *chiaro-scuro*. The ribs of the cupolas might also be ornamented like the band of the arch, with painted coffers. With regard to the panels, he thought that they might very properly be ornamented with porphyry, or marble, or painted like the pilasters in the choir, to represent lapis-lazuli, with great effect.

Mr. Gambrell quite agreed with Mr. Penrose as to what ought to be the general decorations of St. Paul's. He believed that they, as a nation, had been so connected with the glory of Sir Christopher Wren, they had considered it unnecessary to decorate his works; but he trusted that the time had come when they would see the necessity of making their cathedral a worthy temple of God.

Mr. Jennings objected to stained glass, and thought they ought to be careful in their decorations, not to do anything which would have the effect of apparently diminishing the size of the building. He thought the organ screen ought to be removed, and the organ brought nearer the dome.

Architectural drawings of the cathedral before it was restored, it would be impossible accurately to judge of what the other decorations of the cathedral ought to be. As regarded the introduction of painted glass into the windows, he thought that they would discover the pigments used by the ancients, and the painting on glass was in more competent hands than at present, it ought not to be introduced into buildings of this description. He was glad that the proposition of Sir Joshua Reynolds and his friends had not been accepted, and their idea, he believed, being to have further carried out an illustration of the acts of St. Paul, of which he (Archdeacon Hale) thought there were already sufficient in the cathedral. He would have the entrance of the cathedral a representation of the beginning of the world; the transepts were to be decorated with representations of a more advanced period, and the nave with incidents from the life of Christ. He (Mr. Hale) was glad to see that Cardinal Wiseman, but there was a passage in one of his earlier writings in which he smeared at the heathenish statues in St. Paul's, which ought to be written in letters of gold, and ever kept in view. He proposed that the decorations should be extended over a period of eighteen or twenty years, so that they might see the effect of what they were doing. He had asked for £30,000, which would produce £600 per annum. The first £600 he thought would build the south facing, the second might be given in prizes for cartoons, and he had no doubt that for the next £600 they could find plenty of artists who would undertake the first painting; and they could thus go on gradually, observing the effect of what had been completed.

After consumerable conversation, in which different opinions were expressed, the chairman announced that their meetings for the session had terminated.

APPOINTMENTS AND PREFERMENTS.—The following appointments and preferments have recently been made:—*Rectories*: the Rev. G. Gibbs, A.M., Shalfleet-cum-Newtown, county Antrim, Ireland—the Rev. W. Brereton to Rhiconnon, Wexford, value £465. *Vicarages*: The Rev. G. L. Foxton to Kempsey, Worcestershire

TESTIMONIALS.—The following clergymen have lately received testimonials of esteem and regard:—The Rev. W. Find, M.A., F.S.A, Heath Hall, from his friends, on his retirement from the curacy of that place; the Rev. W. Hayes, Tarvin, V., by Dr. Brindley, his family, and school. July 1; the Rev. S. M. Dunbar, Durham, by the children of his Sunday-school, on the 25th of June; the Rev. E. L. Marrett, of Holy Trinity district, Stockton-on-Tees, Durham, by some of his parishioners; the Rev. J. L. Norris, Ockham, by the inhabitants of that parish, on his promotion, on the 11th of June; to the American Bishops, by the members of the University of Oxford, on the 23d of June; the Rev. Mr. Oakden, from the Sunday-school teachers and congregation.

NARROW ESCAPE OF BISHOPS SELWYN AND PATTESON.—The miraculous escape from murder of the Bishops of New Zealand (Dr. Selwyn) and of Newcastle (Dr. Pyrrel) was mentioned at the recent meeting of the Society for the Propagation of the Gospel in Foreign Parts. It appears that the two prelates were on a visit to one of the Polynesian islands, when they were set upon by the natives, and, becoming separated, were in the greatest possible danger. They and their crews were surrounded by the natives, who were full of ferocity, and were only partially subdued by moral resolution rather than by physical strength. The Bishop of Newcastle had stated that he had never experienced during the course of his life two hours of such extreme mental agony.

CONVOCATION.—On the 30th ult., an Act of Parliament received the Royal assent (c. 82) to enable colonial and other bishops to perform certain episcopal functions under commission from bishops of England and Ireland. A clause in the bill is not to have jurisdiction in the United kingdom

UNIVERSITY OF LONDON.—It appears that the report of a committee which lately appeared in the newspapers, was not communicated by authority, and that it has not yet been taken into consideration by the senate.

The Archbishop of Canterbury has received the Queen's writ for summoning the forthcoming Convocation of the Clergy, and his Grace has in accordance issued his mandate to the Bishop of London, who will forthwith transmit the Royal writ to the Archdeacons of London, and the whole of the beneficed clergy of the diocese to choose their proctors to represent them in the ensuing Convocation.

Sloane, the special pleader, who, with his wife, was convicted in February last, at the Central Criminal Court, of murdering Jane Wintord, his servant, died on Tuesday morning after a lengthened illness. His condition of the unhappy man had been observed for some time past, and through the kindness of the Rev. Mr. Davis, the ordinary of Newgate, the sentence in some humane persons was drawn to the case. A medical examination took place, and certificates having been given by the proper medical officers showing that any further imprisonment would be fatal to his existence, a free pardon was obtained about a week since through the Home Secretary, and Mr. Sloane was removed to private lodgings in Goswell-street-road, where he expired from the effects of illness arising from mental anxiety and confinement. The latter few months of his existence have been made as comfortable as the peculiar circumstances would allow.

METROPOLITAN NEWS.

INSTITUTE OF ACTUARIES.—The annual meeting of the Institute of Actuaries of Great Britain and Ireland was held on Saturday last, at the rooms, Chatham-place, Bridge-street, Blackfriars: Mr. Charles Jellicoe, one of the vice-presidents, in the chair. This association was founded for the purpose of elevating the attainments and status and promoting the general efficiency of all who are engaged in companies connected with the pursuit of life assurance, and for the extension and improvement of the data and methods of the science, which has its origin in the application of the doctrine of probabilities to the affairs of life, and from which life assurance and reversionary interest, and other analogous institutions derive their principles of operation. The report stated that the total number of members on the books of the institution, is now 244. The council have been enabled to add to the list of corresponding members a new class from the first twenty-two of the most distinguished actuaries or managers of foreign countries, by means of whom the institute has been put in communication with twenty-seven of the leading offices in the principal cities of Germany, Holland, Belgium, Switzerland, and the United States of America. The library has been much increased during the season. Fifty-two companies—at much cost of time and labour—have regularly supplied their experience, as to the amount of sum that should be charged for residence in foreign climates, and for other extra risks, comprising in all, 6151 cases; and the council are now engaged in the laborious task of classifying and arranging the data thus obtained, with a view to deduce from them the required information. The receipts during the last year (including the balance from the preceding year) amounted to £683 3s. 7d.; and the expenditure to £497 7s. 8d., leaving a balance in favour of the society of £225 16s. 3d.

LONDON DOCK COMPANY.—The dividend declared at the half-yearly meeting of the London Dock Company held a few days ago, was at the rate of 8 per cent. per annum, free from income-tax, and the report, together with the accounts, was unanimously adopted.

KING'S COLLEGE HOSPITAL.—The committee of the re-building and enlargement of the above hospital are making great exertions to complete the subscription list. Amongst the recent donors are Messrs. Truman, Hanbury, Buxton, and Co., the eminent brewers, for £100, and other members of the Hanbury and Buxton families have contributed liberally; and on Wednesday evening the committee received the handsome sum of £500 from a benevolent individual towards fulfilling the condition of Dr. Warneford's gift of £500. Three more sums of £500 each are required by the last day of the present year, before the premises can be entirely lost to the committee, insomuch as four sums of £500 have been promised to the committee, solely on the condition that the whole amount be obtained by that period.

MIDDLESEX HOSPITAL.—The governors and friends of this charity held an annual meeting at the "Trafalgar," Greenwich, on Tuesday. Many friends and supporters of the charity were present, and donations were announced to the amount of £700, including a donation of £100 from her Majesty, the patron of the charity, Mr. Puchel's annuity of £100, and a donation of £50 from Messrs. Pepys, Esq., vice-president. It was stated on the occasion that during the past year 2328 in-patients, and 11,003 out-patients were relieved.

REMOVAL OF SMITHFIELD MARKET.—On last Saturday morning a deputation, consisting of the Marquis of Camden, Lord Dudley Stuart, Sir B. Hall, Mr. W. H. Wills, &c., connected with the Camden estate, waited upon the Secretary of State for the Home Department at his official residence, for the purpose of laying before the right hon. gentlemen their views with regard to the selection of Copenhagen-fields as a cattle market to be substituted for Smithfield. Several members of the deputation having argued against the contemplated site as seriously affecting the property in the neighbourhood of Copenhagen-fields, Mr. Walpole said that the deputation from the corporation of the City had laid before him a number of plans; and it certainly seemed to him, in accordance with the general opinion of that deputation, that the site in Copenhagen-fields was the most eligible, in consequence of its contiguity to the London and North Western and Great Northern Railways, and the facilities presented by their connexion with others in bringing cattle from all parts of the kingdom. He feared he could not assist the memorialists in their present position, but if they could prevail upon the corporation of the City further to consider the subject, he was willing also to consider the propriety of his approval. He, however, assured them he would not assent to any by-laws without first sending a notice to the Marquis of Camden. The deputation, having thanked the right hon. gentleman, withdrew.

THE MIDDLESEX MAGISTRATES.—The magistrates for the county of Middlesex gave a grand dinner on Saturday last, at the Brunswick Hotel, Blackwall, to their co-magistrate, Mr. Henry Pownall, who has for many years presided over their meetings as chairman of the Court of Quarter Sessions. The chair was taken by Mr. Edward M. Kemshead, chairman of accounts and for general purposes. He was supported by Lord Robert Grosvenor, Sir Peter Laurie, Sir James Duke, Mr. J. W. Freshfield, and about 60 other magistrates.

THE PORT OF LONDON COAL TRADE.—A committee has been appointed by the Marylebone vestry to investigate the operation of this tax, levied on the metropolis by the City corporation, states that the total produce of the coal tax of is. 1d. per ton for the three years ending the 31st December, 1851, was £1,427,142 3s. 2d., being an average of £143,149 11s. 3d. per annum. The total duty of 8d. has produced for the three years ending 5th of January, 1850, the sum of £337,888 17s., or an average of £112,629 12s. 8d. per annum. The duty of 1s. 1d. per ton has produced for the year ending 31st December, 1851, the sum of £1,089,253 4s., and allowing the sum of £519 17s. 1d. for drawbacks on coals exported, the nett sum of £1s. 10s. 7½d. The tolls on corn, flour, cattle, and other articles, with the dues and coal-carrying goods, yielded to the corporation the sums following:—For the year ending 31st December, 1849, £5616; ditto, 1850, £6710; ditto, 1851, £5810.

LECTURES ON GOLD.—The third of the lectures now in course of delivery at the Museum of Practical Geology was on Monday night given by Dr. Lyon Playfair, C.B., the subject of the lecture being the chemical properties of gold, and the mode of distinguishing it from other substances resembling it. A large audience was well attended, and the greatest interest was manifested throughout its delivery.

EARLY CLOSING ASSOCIATION.—A very impressive discourse, being the first of the third series of sermons in advocacy of the principles of this society, was delivered on Sunday morning last, by the Rev. A. Borradaile, M.A., at St. Mary's Church, Vincent-square, Westminster. The text chosen was Leviticus xxv. 7. "Neither be partakers of other men's sins." The reverend gentleman's remarks went to show, in the first place, that protracted labour is a source of serious evil to the souls and bodies of men; and secondly, that all persons, whether employers or the purchasing classes, who, instead of doing their utmost to abolish the system in question in any way, contributed to its perpetuation, thereby made themselves largely responsible for the sin to which that system gave rise.

DEATHS FROM THE INTENSE HEAT.—On Tuesday, between the hours of seven and three, the thermometer ranged from 80° to 92° in the shade, and in the sun it was sometimes upwards of 120°. In New Oxford-street several females fainted, and were carried into shops for assistance. At the corner of Tottenham-court-road a respectably dressed man, said to belong to a firm in the City, was observed to stagger and fall heavily; medical assistance was immediately procured, but life was extinct. This was evidently a *coup de soleil*, and a similar occurrence happened to a female in the Old-street-road. A youth in the employ of Mr. Suggett, carpenter, lamp manufacturer, Goldsmith's-square, fainted from the excess of heat, and it was some time before he recovered consciousness. The horrible dens of misery and filth in the vicinity of Gray's Inn, threw forth the most noxious exhalations; and Mr. Whitfield, the district medical officer, states that, need as he is to all sorts of scenes, the present state of those wretched abodes quite overpowered him. No less than 12 fever cases had broken out within the last two days; and it is impossible to conjecture where it will stop, if such weather continues.

NEWSVENDERS' BENEVOLENT AND PROVIDENT INSTITUTION.—On Tuesday evening the friends of this excellent charity met at the Albion Tavern, Aldgate. Mr. L. Wild occupied the chair, supported by a large number of the friends of the institution. The evening was spent after dinner in a convivial manner.

BIRTHS AND DEATHS.—The births registered in the metropolis for the week ending Saturday, July 3, were—Males, 789; females, 724; total, 1513. The deaths during the same period were—Males, 816; females, 471: total, 987; a number nearly the same as on the previous week. By the official report it appears that the mortality from disease of the respiratory organs has decreased from 110 in the preceding week, to 91 in the last. Fatal cases arising from zymotic complaints have also decreased from 210 to 187. Last week the deaths by small-pox were 31, 16 of which were among persons of mature age. Scarlatina destroyed the lives of 33 children; typhus, remittent fever, &c., of 44 persons.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean height of the barometer in the week was 29.809 in. The mean temperature of the week was 59°3, which is rather below the average of corresponding weeks in ten years. The mean daily temperature was below the average on every day till Saturday, when it rose to 64·7 deg., which is 3·4 deg. above it. The highest temperature of the air on that day was 77·6 deg., and the highest in the sun was 100·5 deg. The wind blew from the south-west generally during the week.

On Sunday afternoon a boy, named John Roberts, 11 years of age, was bathing with a companion in a pit at the side of the canal, near the Stanley dock, Liverpool, and 20 feet in depth. He cried for help, whereupon David Lloyd, brother of John Lloyd, painter, of Mill street, Park-road, ran to the spot, and leaped into the water with his trousers on in order to save the boy's life. The boy got hold of him by the neck, and then grasped him round the waist. He was thus rendered powerless, and both of them sank together and were drowned.

The sums in the combined receipts of six Public Baths and Washhouses in the metropolis, which as yet yield reports, during the past quarter is £3009 3s. 11d. The receipts during the preceding quarter (Lady-day) were only £2005 16s. 1d. This is an encouraging fact, showing the desire there is for cleanliness amongst the great mass of the people, as well as the capability of these institutions when in active operation.

On Sunday last some benevolent individual placed at the offertory of the Church of the Holy Trinity, at Rochampton, Surrey, a £200 Bank of England note, accompanied by an intimation, that the same was to be devoted to the purposes of the "National Society for Promoting the Educat on of the Poor in the principles of the Established Church.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

SIR JAMES NICHOLL M'ADAM, KNIGHT.

THE death of this gentleman, the General Surveyor of the Metropolis Turnpike Roads, and a Deputy-Lieutenant for Middlesex, occurred on the 20th ult. He was second son of the late John Loudon M'Adam, Esq., so celebrated for his reformation of the public roads of the kingdom, and was given a knighthood in 1834, on his father declining to accept any honours. Perhaps it is not generally known that the late Mr. M'Adam was in his 60th year when he commenced his public career as a "reformer of roads."

The family from which the deceased knight descended is a branch of the clan Gregor, and was for ages seated at Waterhead, in the stewartry of Kirkcudbright; the present chief and representative of the name being Sir James's nephew, John M'Adam, Esq., of Ballochmorrie, Surveyor General of Turnpike-Roads in England.

THE REV. JAMES RUDGE, DD.

DR RUDGE, for twenty-four years the esteemed and pious rector of the parish of Hawkchurch, Dorsetshire, died suddenly on the 1st inst., in his 69th year. This learned divine was son of the late James Rudge, at Heath-end house, Cromhall, and nephew of Thomas Rudge, Archdeacon of Gloucester. His family was a branch of the Rudges of Evesham, in Worcestershire, but had been settled for some time in Gloucestershire. Dr. Rudge was a Fellow of the Royal Society.

MR. SERJEANT CHADWICKE JONES

CHARLES CHADWICKE JONES was called to the English bar by the Honourable society of the Middle Temple on the 25th of June, 1830. He practised with considerable success on the Home Circuit and at the Central Criminal Court. He was made a Serjeant-at-Law in 1844. The learned gentleman, who was very generally and deservedly esteemed, died in his 53d year, on the 7th inst., after a severe illness of three years' duration.

CAPTAIN WORTH.

CAPTAIN HENRY JOHN WORTH died at Ringfield Green, near Windsor, on the 27th ult., aged 34. He was born in Plymouth, and was son of Captain James Andrew Worth, and grandson of Admiral Worth. He entered the Royal Navy in 1813, and rising through the various grades, was promoted to the rank of Commander, January 10, 1837; and on February 1, 1838, he was appointed in that capacity to the *Hastings*, 72, Captains F. E. Loch and J. Lawrence. Under Captain Loch he escorted the Earl of Durham to Quebec, and the Queen Dowager to and from Malta; and under Captain Lawrence he took an active and gallant part in the operations of 1840 on the coast of Syria. As a reward for his conduct he was promoted to the rank of Captain, November 8th, 1840. He married, first, October 3, 1838, Charlotte Augusta, daughter of the late Rear-Admiral T. Searle, G.B., which lady died December 21, 1841; he married, secondly, Elizabeth Ann, eldest daughter of the late George Booth, Esq., and leaves by her an infant son.

JOHN HOWARD PAYNE.

JOHN HOWARD PAYNE, a distinguished actor and dramatic author, was born in the city of New York the 9th June, 1792. His fame is connected with a song, sung as an address which the son delivered on a public occasion from the stage is said to have fixed in the boy a love for the drama. After being connected with periodical literature from his very youth, he, in emulation of Master Betty, made his *début* as a "youthful Roscius" in his sixteenth year, in 1809, at the Park Theatre, New York, as *Young Norval*. Obtaining marked favour in America, he, in 1813, went to England, and appeared successfully at Drury-lane, in his twenty-first year, as *Young Norval*. The painter West interested himself in him, and pronounced his action on the stage graceful, and his voice fine. He played in the provinces and in Ireland progressively.

During his London career he produced a host of dramas, chiefly, if not altogether, adaptations or translations from the French. Among them were—"The Lancers," "Orvali of Athens," "Peter Smink, or the Miller," "Therese," "'Twas I," "Adeline," "Ali Pasha," "Clari," with its "Home, Sweet, Home," and "Charles II."

"Brutus," the well known star play on the subject of the fall of Tarquin (occasionally acted by Edmund Kean), is an adaptation by Payne from the works of previous writers, among others, Nat Lee. He announced his method to be "a adoption of the conception and language of his predecessors, wherever they seemed likely to strengthen the plan which he had prescribed for himself."

When Mr. Payne returned to America some fifteen or twenty years since, he issued the prospectus of a magnificent magazine, to include the literature of the Old and New Worlds, under the chairmanship of a quadramatic title of "Jam-jehemena," some conceit of an Oriental gem. He expended considerable energy on this affair, but it never came to publication. He was a contributor to the early volumes of the "Democratic Review." His literary tastes and devices were numerous and varied. In the midst of them he was appointed United States Consul at Tunis, a position from which he was recalled, and to which he was subsequently restored some two years since; and this official station he held at the time of his death, which has recently occurred.

Count Xavier de Maistre, the author of the well-known work, "Une Voyage autour de ma Chambre," has just died at St. Petersburg at the great age of 90. He was a refugee, from having saved the Russian servants, and attained the rank of General; he was a clever writer, a good chymist, and a landscape painter. His other works "Le Lepreux de la Val de d'Aoste," "Le Prisonnière du Caucase," and "La Jeune Sibérienne," are less known than the "Voyage," which was written in his youth

THE WILL OF THE EARL OF CORNWALLIS.—A special probate of the will, with fourteen codicils, of the late Right Hon. James Mann Earl Cornwallis, late Baron Eye and Baron Cornwallis of Ireland, Viscount Brome, and Lord Brookes, and Lord Botham, three of the executors. The personal estate was valued at £500,000. The testamentary dispositions occupy 230 folios. There are many private legacies among others £2000 to Mr. Bankes, M.P. for the county. Feet-street, and the following charitable bequests:—£300 to the Hand-in-Hand benefit society, at Lisson, £500 to St. George's Hospital, Hyde-park; and £500 to the Spitalfields and Bethnal-green Dress-coat Schools; the sum of £2000 for the repairs of Egerton Church. The residue of the personality is bequeathed to his surviving daughter, to whom is devised the real estate in entail, the arms of "Mann" always been quartered with those of the testator's present ancestors. The deceased Earl was the only surviving son of the fourth Earl, Bishop of Lichfield and Coventry (brother of the celebrated Marquis Cornwallis), by Catherine, daughter of Galfridus Mann, Esq., and sister of Sir Horace Mann, Bart. The Earl had issue, Jemima, who died in 1836, having married C. W. Martin, Esq., M.P., of Leeds Castle, Kent; Charles Viscount Brome, who died at the age of twenty-two, and two other sons who died in infancy; and his only surviving child, Lady Julia Mann, now in her eighth year. His Lordship assumed the name of Mann by Royal sign manual in 1814. The will is dated 15th Nov., 1847. The first Marquis and Baron received the peerage for faithful services in America II.; the second Earl was the Marquis Cornwallis, eminent as a soldier and statesman, twice Commander-in-Chief, and Governor-General of India, and in the interval Lieutenant-General in Ireland. He died in 1805, and the title of Marquisate expired at the death of Charles, his only son and successor, without male issue, in 1823.

THE WILL of the Hon. John Chetwynd Talbot, Q.C., was proved under £100,000 personal property within the province of Canterbury, and bears date 10th April, 1851. After disposing of legacies, amounting to about £3000 or £4000, amongst his relatives, he bequeaths the remainder, together with the real estate, to his wife for her life, and then to his two children.

CHARITABLE BEQUESTS.—Mr. Thomas Dunbar, of Series-place, and Brick-court, Temple, left by his will the following sums to be distributed to the undermentioned institutions on the decease of his widow:—To the Marine Society, £100; School for the Blind, £100; Deaf and Dumb School, £100; Orphan Working School, £100; London Hospital, £100; Westminster Hospital, £100; Middlesex Hospital, £100; Charing cross Hospital, £100; Lock Hospital, £100; Free Hospital, Gray's-inn-road, £200; Floating Hospital, Thames, £100; Masonic Boys' School, £50; Masonic Girls' School, £50; Mendicity Society, £50; Lying-in Hospital, Old-street-road, £50; Asylum for Female Orphans, York road, £50; City of London Truss Society, £50; City Dispensary, £50; Metropolitan Hospital, £50; Public Dispensary, £50; Humane Society, £50; City of London National Schools, £50; St. Andrew's Parish School, £50; St. Clement Danes School, £50.

A young man, in the service of Mr. Murray, Balvraid, near Golspie, named John Macdonald, was, on Monday last, killed by lightning, while attending to his duties as a farm servant. The lightning almost entirely stripped him of his clothes, which were found a few yards from the body, only a small portion of his left sleeve and of his trousers remaining on his person. Exactly two and a half inches under the heel of one of his feet, no mark is apparent on the body. In the same field and at the same time a dog and a cow were killed by the lightning.

On Saturday last the police, acting upon private information which they had received, entered the workshop of Mr. Jarvis, turner, Whitmanstreet, Williamson-square, in Liverpool, and seized about 400 formidable weapons having the appearance of pike handles, four feet long, intended to be used at the election. These weapons, which, it is said, were ordered by an alderman of this town, are all made after the model suggested by an Italian refugee some years ago to the Chartists.

The weather on Sunday was intensely hot. The thermometer in the shade towards the middle of the day stood as high as blood heat. About half-past twelve o'clock the rays of the sun became concentrated upon a small timber building belonging to Mr. W. Jones, of 77, Albany-road, Camberwell, and the heat was so great that the premises immediately afterwards ignited, when the flames shot forth in a great body. The engines of the London Brigade and West of England office were despatched to the spot, but the building, which was ignished until the building was nearly burned down. Mr. Jones was insured in the Alliance fire-office.

The deliveries of tea in the metropolis last week were much the same in quantity as previously, being about 550,000 lb.

Monday being the anniversary of the day of the declaration of independence of the United States, a sumptuous dinner was given at the Brunswick Hotel, Blackwall, by Mr. George Peabody. The party (about 125 in number), consisted chiefly of American gentlemen now resident in London. The flags of both this country and the United States were displayed in an appropriate manner.

EPITOME OF NEWS.—FOREIGN AND DOMESTIC.

It is stated in generally well-informed quarters that her Majesty's Government intend to send 3000 of the Irish constabulary to Australia, to aid the civil power in that colony in performing the arduous duties now requisite for the protection of life and property, owing to the discovery of the gold fields.

Mr. Ellis, the well-known caterer for public amusement at Cremorne-gardens, the Eagle-gardens, and other popular places of entertainment, has just sailed from Plymouth in the *Coldstream*, for Port Phillip. Mr. Ellis takes with him scenery, properties, and the necessary adjuncts for a portable theatre, to be erected at the diggings, a complete band of musicians, and a Thespian company. Mr. Ellis was the originator of casinos in the metropolis, and proposes to introduce them into Geelong and Melbourne, and thus combine pleasure with gold seeking.

Mr. Tyndell, of London, a member of an English company, who have undertaken to work the lead mines of Derenen, near Spiddal, in Galway, has arrived in London in the last few days, for the purpose of commencing operations without delay. The mines in question are particularly rich, and the beauty according to both the company and the locality must consequently be very great.

A few days ago a balloon fell near the Greenwich turnpike, upon the Greenwich road. A working painter brought hold of one of the ropes to keep it down, and he was dragged up by the rope, so that those in the car had to pull him up or he must have fallen some 60 or 70 feet to the ground.

In the vicinity of the Western Valleys, a vestry meeting was lately held, to take into consideration what colour they should whitewash the parish church (!), and after various suggestions, it was ultimately agreed that the sacred edifice should be whitewashed white.

There were 83 public and 146 local and other acts passed in the late session of Parliament, which sat nearly five months.

Two pigeons were taken from Derby, 20 miles in the direction of Nottingham, and then released. One of them flew home in 23 minutes and 6 seconds, and the other in 40 minutes 23 seconds.

It appears by a blue-book just printed, by order of the House of Commons, that the total quantity of gold transmitted by the Government escort from the various workings, in Australia, from the 30th Sept. to the 31st Dec., 1851, amounted to 124,135 ounces, or equivalent to £374,505. It is calculated that not more than two-fifths of the gold realised at the workings is forwarded by escort for Government account, the remainder finding its way home, at the rate of £1 10s. per month, up to the 31st Dec., 1851, was 25,481 19s. The sum paid for escort fees to the Crown, at £1 per cent., was £3,634 17s.

The trial of Guerazzi, the ex-dictator of Livorno, will begin on the 16th of August. M. Leonardo Romanelli, his former Minister of Justice and Public Worship, and now his fellow-prisoner, has published a pamphlet in his defence.

The negotiations of the Piedmontese ambassador at Rome, to regulate the *interim* affairs of the diocese of Turin during the exile of Monsignor Franzoni have completely failed.

M. Augustin Sire has been prohibited from continuing the publication of a romance in the *feuilleton* of the *Patriote Savoisien*, and warned that should he persist, the Sardinian Government might feel it necessary to withdraw the permission to reside in Savoy which he enjoys at present. M. de Sire was written to the minister that he is too grateful for the hospitality accorded him, and too desirous for its continuance, to do anything which might put an end to it.

On Saturday last the foundation-stone of a new Roman Catholic chapel, in connection with the convent of the Sacred Heart of Jesus, at Roehampton, was laid by the Rev. Dr. Morris, Bishop of Troy. This convent was formerly the residence of Lord Ellenborough, but for the last two years has been occupied as a convent by a community of nuns, who employ themselves in the education of the female children of the Roman Catholic nobility and gentry.

A short time ago a letter was received at the Yarmouth post-office, with the words on the envelope—"For my grandmother, up the pair of stairs, Yarmouth, Norfolk." Thanks to the active letter-carrier, the document found its way to the ancient dame for whom it was intended.

The *Monmouthshire Merlin* announces that the "oldest inhabitant" of the borough of Monmouth is at last dead, after attaining the patriarchal age of 104.

The total number of persons receiving out-door relief in England in the week ending the 24th of April last was 3,498; and the total number of workhouses in the same week was 186,453, showing a decrease, as compared with the corresponding period of last year, of 70 261 paupers, or 27 per cent. of the whole.

A Parliamentary Blue-book has been recently printed, containing the report and evidence given before the select committee of the House of Commons on postage labels. The committee recommended that the machine of Mr. Archer should be purchased for the benefit of the public.

Vice-Admiral Bowles, C.B., M.P., the president of the Royal Naval School, has presented £1000 in aid of the fund for erecting a chapel attached to the institution at New Cross. The estimate for the building is £3000, of which amount upwards of £1400 has now been subscribed.

The magistracy of the county of Middlesex have been surprised by the resignation by formal resignation by Colonel Wood, the office of Local Physician to the Hanwell Lunatic Asylum, an appointment which he had held since June, 1839.

In consequence of the repeated accidents arising from the unnecessary speed at which the light carts used by butchers and other tradesmen are driven through the streets, the commissioners have just issued orders for the police to summon all future offenders before the magistrates, or at once to take them into custody. In all cases the penalty of 40s will be strictly enforced.

On Sunday morning the Rev. Dr. Achilli preached in a temporary Italian church, in Saville-row, to a very large audience. He gave out his text in Italian, and then delivered a discourse, which was in substance, that was the 16th verse of the 19th chapter of St. Matthew's gospel, "Good master, what good thing shall I do that I may inherit eternal life?" The re erend doctor made no allusion whatever to the recent trial.

A piece of land has lately been disposed of in the bes part of the town of Deal, at the enormous rate of £8167 per acre.

The *Milan Gazette* of the 27th ult. states that Baron de Bruck, Director of the Lloyd Austriaco at Trieste, the Consular Cosenige, and Count Molinari have gone to Pavia in order to take preliminary measures for the opening of steam navigation on the Po.

An instance of expeditious communication with the Continent occurred a few mornings ago at the Stock Exchange, where a reply was received at twenty minutes before twelve, to an inquiry regarding prices which had been despatched to a gentleman at ten minutes to eleven o'clock

The course of lectures at the Department of Practical Art by Mr Owen Jones was brought to a successful conclusion last week. They were the first course of lectures since the institution was formed, and were delivered in the late kitchen at Marlborough House, which had been converted into a small though suitable lecture-room. These lectures on true and false principles of design were illustrated by numerous examples, wrong and right, in decoration—of carpets, and also out of shirts, quilts, and ceilings and paperhangings covered with crysta. palaces, and of such works as the Indian fabrics, Vauhie's shield, &c.

Two young men have lately been committed to gaol in Scotland, on the charge of having raised the body of a child which had only been interred the day before, in a churchyard in Annan, Dumfries-shire.

The Council of the Board of Health at Genoa have received intelligence that several cases of Asiatic cholera have manifested themselves among the German and Irish emigrants at New Orleans and Mobile, and that, in consequence, a quarantine has been established in the Sardinian ports upon all vessels from those places.

The Government have adopted the unusual proceeding of addressing circulars to the Sheriffs of Ireland, calling upon them to forward information of the days fixed upon for the commencement of the annual assizes, in order that they may be made for the strengthening of the military force. Orders have been issued to the military authories to have troops in readiness in the various boroughs at which judicial pleas in the counties

The inhabitants of Gisborough, in Yorkshire, have been sadly annoyed and inconvenienced by the pranks of some mischievous persons, who, in one night, bored holes in almost every water-butt in the town, and left the inhabitants in great hardships.

The absolute sale of the Turkish division of the Great Exhibition is announced to follow that of the East India compartment; and if the latter has shown us all the gorgeousness that can be effected in "barbaric pearl and gold," the former certainly will combine, with its more than eastern magnificence, a daintiness and delicacy of work which must render it a distribution more than usually interesting. It will be as if all the luxuries and elegances of the harem were laid open to the admiring gaze of the profane.

The executive committee of the Scottish Temperance League has issued an address to the clergymen of Scotland, on the subject of the mode at election of members of Parliament, and soliciting their co-operation to create a public feeling against trusting electors. The circular states that the committee has engaged a "special commissioner" to visit the principal polling towns, and has also issued seven five travelling agents to exert themselves for the attainment of the same end.

The Earl of Mansfield, the late Lord High Commissioner, has given the sum of £70 to the colonies of the Church of Scotland, to be appropriated as follows:—£100 to the endowment of chapels; £40 to education; £40 to the home mission; £30 to colonial churches; £10 to the Indian mission, and £10 to the circulation of the Bible.

The *Dover Chronicle* says, "On Sunday, Widow Staples ceased to exist, after experiencing the ups and downs of life for a century, being in the 99th year of her age, having lived in the town of four kings, and during fourteen years of that of Queen Victoria. She remembered the sensation caused by the death of the celebrated General Wolfe, on his taking Quebec, 1759, also the death of George II. Her children are all advanced in life, the eldest being between 70 and 80 years of age.

The Royal Dublin Society, who hold their triennial exhibition of manufactures next year, have just placed at their disposal by Mr Dargan, the Irish railway contractor, the sum of £200,000, in order to impart to the undertaking a character of unusual importance, and to render it available not only for his native country, but for the products and ingenuity of the United Kingdom and of portions of the Continent.

FAREWELL BANQUET OF THE DEPUTIES OF THE LEGISLATIVE BODY, IN THE CASINO PAGANINI, AT PARIS.

BANQUET OF THE LEGISLATIVE BODY, AT PARIS.

THIS parting festivity of the Legislative Body was noticed in our Journal of last week. It took place on Tuesday week, when about 150 adherents of the Government dined together in one of the superbly decorated saloons of the Casino Paganini, at Paris. M. Billault, the President of the Chamber, was in the chair. There were no speeches delivered, and only one toast, which was the health of the Prince Louis Napoleon.

The session of the Legislative Body has nominally extended to three months; but it was only during the last days of the third month that the sittings presented some resemblance to the French Chamber in better days. Its commencement, owing to the novelty of its opening ceremonial, excited some curiosity, which began and ended with the day; and only at its very close. Its break-up was very abrupt: the Chamber met for the last time on the 28th ult., and in the course of the same evening scores of members were on their way to the departments, and next day the majority (except those who remained to join in the Banquet) had quitted Paris.

NETHERLANDS LAND INCLOSURE COMPANY.

IN the river Scheldt, between the towns of Bergen-op-Zoom and Antwerp, there exist on both sides the river large tracts of land, to the extent of several miles, which at high water are covered by the sea, and at low water present a varying surface of several feet in depth of the richest alluvial soil, ever on the increase by the daily action of the tides. Of this valuable land the Government of Holland has lately conceded to the above company, for the term of 99 years from last August, 35,000 acres for recovery and inclosure; the line of operation marked out being almost identical with that planned by the Emperor Napoleon for the same design. The alluvial deposits in this province of Zealand are of so peculiarly rich and valuable a quality that it is affirmed by competent judges such lands will bear crops for 20 years in succession without the application of manure. In consideration of the grant, the Government have undertaken to execute a canal connecting the east and west Scheldt.

The ceremony of turning the first turf of the lands took place on Thursday week at Hansewerk, Zealand, Holland; and was attended by almost the entire population of the neighbourhood for some miles round, whose rich and elegant costume added greatly to the picturesqueness and animation of the scene. The men wear velvet jackets, waistcoats, and full trousers, with a girdle, and silver buckle. The head-dress is a black cap, or loose hat, of Andalusian cut. The women are intelligent, and many of them pretty: their dress is showy, and they wear many trinkets.

COMMENCEMENT OF THE WORKS OF THE NETHERLANDS LAND ENCLOSURE, AT HANSWERK.

The notabilities present at the ceremony were all the principal personages of the locality, and several of the directors of the company: the English members of the board, with a party of friends, having been taken over on the previous day by a steamer engaged for the occasion. On shore there were triumphal arches of boughs and rhands, tents, and infinite preparations for the inward and outward delectation of all present.

The first turf was turned by a Captain Kelly, who made an inauguration speech, which was duly turned into Dutch.

The more eminent of the company, with several representatives of the *paysan* class then adjourned to the larger tent, and refreshed.

After this the toasts, "The King of the Netherlands," "The Queen of England," "The King of the Belgians," were done full justice to. "The health of the Minister of the Interior," unavoidably absent, followed, and was acknowledged by M. Binnas.

M. Brains, a member of the States-General, then expressed the gratitude of his countrymen for the gigantic enterprise, by which the company was about to add 35,000 acres to the territory of the kingdom.

The toast "Prosperity to the Company" was drunk with acclamation.

M. Van de Putte then proposed "The health of the Engineer-in-Chief, Sir John Rennie," whose energetic mind and whose honourable character had so eminently advanced the interests of the undertaking.

Sir John Rennie, in returning thanks for the compliment, observed, in favour of the present undertaking, that during the last two centuries 2,000,000 acres had been reclaimed from the waters, partly from the sea, and partly by pumping and drainage. Still, however, much remained to be done, and he had no doubt that by the proper application of the scientific principles of modern engineering more would be effected during the next 25 years than had been effected during the last century.

Several other toasts followed, and the company separated well pleased with all the proceedings, and with the great hopes involved in them.

SPIRE OF ROSS CHURCH, INJURED BY LIGHTNING.

GREAT STORM AT ROSS, HEREFORDSHIRE.

(To the Editor.)

July 6, 1852.

I ENCLOSE you a Sketch of our steeple, showing its appearance after the terrible thunderstorm of the past night. The spire of Ross, always recalling to mind Pope and his "Man of Ross," is a very lofty one; the weathercock being about 210 feet above the churchyard. It is now so shattered that it shakes with every wind, and the danger, as well as the expense, of repairing it will be very great.

The mischief appears to have commenced where the iron shaft of the weathercock terminates, *i.e.* about 15 feet from the summit of the steeple. The electric fluid passed through the body of the Church, doing little damage. At the moment that the Church was struck, the town appeared to be bathed in fire, and the smell of sulphur was overpowering through every street for a long time afterwards.

I am, sir, &c.,

EDWIN J. ISBELL, Surgeon.

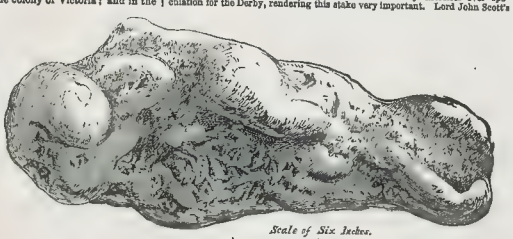
FIRE ON BOARD THE "INDUS" STEAM-SHIP.

THIS magnificent steam-ship, lying in the dry dock of Messrs. Wigram and Sons, the ship-builders, of Blackwall, was with great exertion saved from destruction by fire on Sunday morning. The fire was discovered by the boatswain of one of the vessels in the river, at about two o'clock in the morning. The captain and the several men employed in the yard were immediately aroused; the dock gates were opened, and the tide let in. Messengers having been despatched to the various fire stations for assistance, several engines of the London Brigade attended, as well as one of the parish, the dockyard float, and the floating engine of the brigade from Rotherhithe. Some hours elapsed before the fire could be entirely extinguished. The *Indus* belongs to the Oriental Steam Navigation Company. The after-part of the ship from engine-rooms is burnt out, the main and mizen mast totally destroyed, and the middle and spar decks severely damaged by fire. The ship was 240 feet long, and about 96 feet aft from the funnel is burnt. The cause of the fire has not been ascertained.

"THE INDUS" STEAM-SHIP PARTLY DESTROYED BY FIRE, IN MESSRS. WIGRAM'S DRY DOCK, BLACKWALL.

THE "KING OF THE NUGGETS," THE LARGEST SPECIMEN OF PURE GOLD FOUND IN AUSTRALIA.

IN our Journal of last week we gave representations of the "Diggings" at Forest Creek, Mount Alexander, in the colony of Victoria; and in the Engraving above we delineate a lump of pure gold, weighing 27 lb. 6 oz. 15 dwts., which was found in those diggings. This marvellous lump of precious metal was, according to letters, received from Port Phillip, regarded with extraordinary interest even in that gold-ridden community, and is the largest nugget yet found in Australia. It was shipped by Mr. Joseph Herring, of Port Phillip, to Messrs. Herring, of Old Broad-street, London; and was brought with a very large consignment of gold, in the barque *Posthumus*, Davidson, master. Amongst the gold brought by the *Posthumus* were several nuggets, weighing upwards of a pound each, and one of 1 lb. 8 oz. 8 dwts.; these smaller lumps, however, contain quartz, whilst the "king of the nuggets" seems a massive lump of pure gold of a very fine colour. Our Engraving is considerably smaller than the nugget: we therefore give a scale of six inches to enable our readers to judge of the real proportions of the piece of gold, which is eleven inches in length, by five in breadth, at the widest part.



"THE KING OF NUGGETS."—LUMP OF GOLD FROM AUSTRALIA. WEIGHT, 27 *lb.* 6 *oz.*

NEWMARKET JULY MEETING.

THIS meeting, rendered peculiarly attractive by the interest attached to the two-year-old races, commenced on Tuesday, of which the July Stakes were the principal event; the influence which the result invariably exercises over speculation for the Derby, rendering this stake very important. Lord John Scott's "The Reiver" monopol and the betting, and has fully justified the strong confidence placed in him by his supporters, by winning cleverly. The following are the details:—

LORD JOHN SCOTT'S "THE REIVER," WINNER OF "THE JULY STAKES," AT NEWMARKET, 1852.

TUESDAY.

MATCH, 100 h ft.—Flirt (Butler), 1. Vivandiere (Flatman), 2.
MATCH.—Dove (Norman), 1. Oasis (Butler), 2.
HANDICAP of 20 sovs.—Flirt (Chapple), 1. Ravenswing (G. Sharp), 2.

The JULY STAKES of 50 sovs each, 30 ft.; for two-year-olds; colts, 8st 7lb, and fillies 8st 4lb; the second to save his stake. New T.Y.C. 2m subs.

Lord J. Scott's The Reiver	..	..	.. (Whitehouse) 1
Lord Exeter's Dove	..	..	.. (Norman) 2
Mr. J. Fowney's Amazon	..	..	.. (A. Day) 3
Mr. E. R. Clark's Blue John	..	..	.. (Bartholomew) 4

Betting—7 to 2 on the Reiver, who led from the start to the finish, and won in a common canter by ten lengths. Run in 1 min. 16 sec.

WEDNESDAY.

SWEEPSTAKES of 10 sovs.—Torment (Flatman), 1. Mr. W. Smith's Azora filly (Bartholomew), 2.
SUMMER HANDICAP.—Bushranger (Esling), 1. Cilnchet (A. Day), 2.
TOWN PLATE.—Hocate colt (Whitehouse), 1. Ravenswing (Fearl), 2.

THURSDAY.

MATCHES.—Oasis beat Torment. Mountain Flower beat Stopsley. Mr. Sykes beat Young Beverlac.
HANDICAP SWEEPSTAKES.—Solyman, 1. Peacock, 2.
OPTIONAL SELLING PLATE.—The Moor, 1. Shadow, 2.
THE CHESTERFIELD STAKES.—Dagobert, 1. Warwhoop, 2.

NATIONAL SPORTS.

The racing next week, owing to the elections, will have less than their wonted attraction, and, in all probability, will, pecuniarily, be unsuccessful to the putters-up. It commences on Monday, at Macclesfield, with a two days' list; Liverpool will occupy three days, commencing on Wednesday, and on which day there will also be a little affair at Delay: Ipswich, always a bad meeting, and most assuredly undeserving of a Royal plate, will come off on Thursday and Friday.

The following are the regattas for the week:—Monday, Prince of Wales's Yacht Club for the Commodore Prize, and the Cork Harbour and Monkstown; Tuesday and Wednesday, Yarmouth; Saturday, Birkenhead Model Club.

CRICKET APPOINTMENTS.—Monday: at Lord's, the County of Surrey *v.* All England. Tuesday: at Croydon, the Clarence *v.* the West Wickham Clubs. Thursday: at Vincent-square, the M. C. C. *v.* Westminster. At Lord's, the Guards' Club and Horse Brigade *v.* Sevenoaks Vine. At the Oval, Surrey *v.* Sussex. At Sherborne, Vale of Taunton *v.* Sherborne.

TATTERSALL'S.

MONDAY.—Speculation on the Westminster election was so brisk that it was with some difficulty we made up the subjoined list of prices:—

JULY STAKES.—2 to 1 on The Reiver,

WORCESTERSHIRE STAKES.

5 to 2 agst Butterfly	4 to 1 agst Lundrisk	4 to 1 agst Ephesus
	LIVERPOOL CUP.	
4 to 1 agst Peasb	7 to 1 agst Colombine	10 to 1 agst Clincher (t)
	GOODWOOD STAKES.	
11 to 1 agst Houlck a	13 to 1 agst Bardset	20 to 1 agst Champion
14 to 1 —— Chief Justice	15 to 1 —— Don Pedro	30 to 1 —— Hugo.
	20 to 1 —— Backhiller	
	GOODWOOD CUP.	

5 to 2 agst Sultan | 4 to 1 agst Kingston | 7 to 1 agst Little Harry | 20 to 1 agst Herrina (t)
THURSDAY.—No betting.

WORCESTER RACES.—TUESDAY.

SEVERN STAKES.—Truth, 1. Paper Kite, 2.
TWO-YEAR-OLD STAKES.—Chilton, 1. Tertia, 2.
WORCESTERSHIRE STAKES.—Melford, 1. Prime Minister, 2.
TRADESMEN'S HANDICAP.—Mayday, 1. Sleeping Partner, 2.
SELLING STAKES.—Bullinch, 1. Lucy, 2.

WEDNESDAY.

INNKEEPERS' STAKES. Ibis, 1. Theorem, 2.
RAILWAY HANDICAP.—May Day, 1. Sleeping Partner, 2.
FLYING HANDICAP.—Butterfly, 1. Forester, 2.

LANCASTER RACES.—WEDNESDAY.

HANDICAP PLATE. Lady Jersey, 1. Emerystone, 2.
LANCASTER CUP.—Lindrick, 1. John of Berwick, 2.

THURSDAY.

REVIVAL HANDICAP.—Wilmot, 1. John of Berwick, 2.
BOROUGH STAKES.—Evadne, 1. Kathleen, 2.
VASE OF LUNE HANDICAP.—Crabbs, 1. Canrire, 2.
QUEEN'S PLATE.—Mountain Deer, 1. Coumore, 2.

LOWESTOFT GRAND MARINE REGATTA.

On Tuesday the grand annual marine regatta of the Eastern Yacht Club took place at Lowestoft, under the patronage of Lord Alfred Paget, Sir Edward S. Doch, Bart., Sir E. K. Lacon, Bart., Sir Thomas Maryon Wilson, Bart., Sir Fitzroy Kelly, Samuel Morton Peto, Esq., David Waddington, Esq., and James Goodson, Esq.

The great event of the day was a prize of 50 sovs. for yachts exceeding 30 tons, for which the following were entered:—

Yachts	Tons.	Owners.	Colours.
Pauline	35	G Brandon Esq	Blue.
Mosa, lo	50	Lord Londesborough	B ue Maltese cross.
Volante	82	John L Craigie, Esq	Green, white.

An excellent start was effected at 2 h 7 min. 15 secs., with a stiff breeze. The *Pauline* being the first to get under way, and soon quantity for some time she maintained the lead, but reaching the Corton Sand she got in the leeward, and the *Mosquito* took the first place followed next by the *Volante*, which, from some cause, appeared to experience great difficulty in setting her topsail. The *Mosquito* still leading, and the *Pauline* falling a long way astern. The relative positions for the rest of the round were not materially changed, which was completed in the following order.—

	h.	m.	s.
Mosquito	0	0	0
Volante	0	2	7½
Pauline	0	2	24

The second round presented no material change, the *Volante* striving to overhaul her opponent, but without effect, for, as will be seen by the subjoined statement, the *Mosquito* gained upon her in the round, which terminated as follows:—

	h.	m.	s.
Mosquito	0	4	12
Volante	0	4	49
Pauline	0	5	20

The third round was admirably sailed by the *Volante*, who gained upon the *Mosquito*, but not sufficient to change the fortunes of the day. The final round closed as under:—

	h.	m.	s.
Mosquito	0	3	0
Volante	0	3	20
Pauline	0	3	45

The *Mosquito* was thereupon declared the winner, notwithstanding the allowance for difference of tonnage of one minute to the *Volante*, and seven and a half minutes to the *Pauline*.

Several minor prizes were warmly contested.

During the day the vessels in the harbour had bands of music on board, who enlivened the scene by their performances. The sports appeared to give the greatest satisfaction; and the decision of the umpires on the various "creature contests" was so large, that they must have reaped an abundant harvest. In fact, if the present regatta is to be taken as an earnest of what will be done in the future, there can be little doubt that in a few years Lowestoft will bid fair to rival many of the older-established watering-places on the English coast.

In the evening the regatta dinner took place at the Royal Hotel, on the Esplanade, which was well attended; and with these proceedings the regatta was brought to a close.

CHELSEA REGATTA.—The annual regatta amongst the watermen at Chelsea came off on Monday, and was most numerously attended. In the first heat (sculls) Wright and Cole, (pink,) beat Charles Cole and John Cole (white), by two lengths. The distance was from the Old Swan up to Cremorne, down to the College, and back to the Cricketers. The second heat was won by Edward Adams and Joseph Cole, jun. (stripes), beating James Woodford and W. Waight (red), and Thomas Woodford and George Thomas (pink). In the third heat Charles and Joseph Cole were the winners. The regatta was for a purse

LAMBETH REGATTA.—Ten competitors entered the lists at this regatta, for a purse of sovereigns, and the affair was, as usual, highly attractive. The race extended from Burnett's distillery to Westminster bridge and back. The Henry Sinclair and Edward Curry (green) were the winners of two out of three heats

ST. MARY-LE-STRAND REGATTA.—There was also a contest amongst the watermen here which afforded much good sport. The first heat was won by Richard Tisdell and J. Waite (yellow); the second by Alfred Mitchell and J. Duplor (red); and the third by Southorpe and Bush.

At the Aylesbury sessions, last week, two youths were charged with stealing money from a till. Mr. Prendergast, jun., appeared for one of them, and the case depended himself. After all the witnesses for the prosecution had been examined, Mr. Prendergast made a very eloquent defence of the client, and then the other prisoner was told by Lord Carrington, the chairman, he might say anything he liked in his defence. The prisoner then replied "he had never set any anything after the able speech his learned friend had made."

On the 17th ult., the French brig *Pauline*, of Granville, whilst on her voyage from Porto Rico, bound to Havre, sugar laden, struck against a shoal whilst, was scraping on the surface of the water in the Western Ocean, and sank. Ten of the crew, the master, and a passenger (M. Bondinier) were saved after being three days in their boat, by the Jersey brig *Crusader*, Nocquevile master, from Santiago de Cuba to Cowes, with coffee. The brig arrived at Cowes a few days ago.

CALENDAR FOR THE WEEK.

SUNDAY, July 11.—Fifth Sunday after Trinity.
MONDAY, 12.—Confederation of the Rhine, 1806.
TUESDAY, 13.—Duke of Orleans killed, 1842.
WEDNESDAY, 14.—Battle of Naseby, 1645.
THURSDAY, 15.—St. Swithin. French Revolution commenced, 1789.
FRIDAY, 16.—Sir Joshua Reynolds born, 1723.
SATURDAY, 17.—Dr. Watts born, 1674.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 10, 1852.

THE week has been devoted to the elections. The nominations began on Tuesday, and several unopposed elections were immediately completed. Mr. Brotherton, an old and tried Reformer, once, as we remember to have heard him say, a factory boy, and always a zealous opponent of factory abuses, who has represented Salford ever since it was a borough, was the first person returned, at an early hour on Tuesday; others followed in quick succession. In Marylebone alone, of the metropolitan boroughs, there was no contest, and the two late members, Sir B. Hall and Lord Dudley Stuart, were before Tuesday evening re-invested with their old trusts. The City of London, were there was an unwilling contest forced on the Liberals by some of their own party, re-elected its former members; but as the fifth candidate was a Liberal, he divided the votes of that party with the other candidates, and placed Mr. Masterman, formerly at the foot, now at the head of the poll. The Tower Hamlets has rejected Mr. George Thompson, and elected a Mr. Butler, a Free-trader, with Sir William Clay, for their representatives. Lambeth, in like manner, has rejected Mr. Tennyson D'Eyncourt, after many years service, and has associated a Mr. Wilkinson with Mr. Williams. Greenwich, too, which is almost a metropolitan borough has discarded Admiral Stewart and chosen Mr. Peter Rolt, a great contractor, long connected with the borough. Amongst the most conspicuous and worst defeats of the Liberal party, we must place that of Liverpool, where Mr. Cardwell (a Peelite), and Mr. Ewart (a Whig), were left far below Mr. Turner and Mr. Mackenzie, Lord Derby's supporters: the election was decided by religious feelings; and Lord John Russell's Durham letter, by stirring up much Protestant zeal, may be said to have defeated his two friends. Another victory of the Derbyites has been obtained at Bradford over Colonel Thompson, a veteran Free-trader. They have succeeded, too, at Devenport, against the Master of the Rolls—the only judge allowed to sit in Parliament—an anomaly the electors of Plymouth have refused to carry out.

Of the victories over the Derbyites, one of the most important is the defeat of Mr. G. F. Young at Scarborough. They have also sustained defeats at Halifax, York, South Shields, and the borough of Berwick. As yet, however, though the bulk of the borough elections are over, it is too early to say which party has gained or lost. We are pleased to record that hitherto the elections have all passed off with good humour, and are likely to come to an end with no other effect than that of showing what is at present the opinions of the constituencies. We always remember on such occasions that Mr. Cobbett, one of the most influential political writers of his day, was for a long period without a vote; and we conclude, though the opinion of the constituencies be of great importance, the opinion of the rest of the community is not without considerable weight. The course of the national policy, then, even for the next few years, will not be entirely determined by the votes of the constituencies. Public opinion, including the opinion of the non-represented, will be the real guiding power; and watching that closely, we are better able to form an opinion of it than of the opinions of the Parliament. It will never ratify, whatever the constituencies and the Parliament may vote, a return to Protection.

THE quarterly revenue tables for Great Britain, published as usual on the 6th, came appropriately to spread additional knowledge amongst the electors of the effects of our commercial policy. Last year there was a reduction in the timber and coffee duties, and a further reduction in the sugar duties, the whole of which are included in the returns of this year; yet is the revenue of the Customs increased by £296,702 for the year, and by £183,946 for the quarter. The last is the more pleasing, because it shows better than the other how rapidly the revenue is increasing after reductions of taxation. The increase arises from an increased consumption of coffee, sugar, tea, timber, tobacco, &c., all articles principally consumed by the bulk of the people.

In the Excise and Stamps for the year, in consequence of changes made last year in those branches of revenue, there is a decrease, but in the quarter, on both there is an increase. Under the head of Taxes, in consequence of the abolition of the window duties last year, and the substitution in part of them for a less onerous House-tax, which has not yet been collected, there is a considerable falling off in the year, £1,172,979; in the quarter, £541,524. In the Property-tax, which, in consequence of the fall of prices, is more than was expected, there is an increase, £10,485 on the year; and £80,110 on the quarter. The Post-office shows an increase of £150,000 in the year, and a decrease of £10,000 in the quarter. The other items are unimportant, as not being indications of the public welfare. The total income for the year ending July 5th, 1851, was £50,204 011; and for 1852, £49,736,488, being a decrease on the year of £467,523, or not half the amount of the difference between the surrendered window-duties and the imposed House-tax. We congratulate our readers on the unmistakeable signs of continued prosperity which these returns supply. Their evidence is corroborated by the fact, that in the first four months of the present year, the last date of the Board of Trade tables, there had been consumed, in comparison with the consumption of 1851, the following quantities:—

	Consumption in four months. 1851.	1852
Cocoa	1,082,872 lbs.	1,264,695 lbs.
Coffee	10,591,727 lbs.	11,412,461 lbs.
Sugar (unrefined)	1,930,750 cwts.	2,174,354 cwts.
Tea	17,479,648 lbs.	18,587,800 lbs.
Tobacco (unmanufactured) ..	9,074,186 lbs.	9,072,534 lbs.
Timber (of different kinds)	249,958 loads.	359,102 loads.

SUBURBAN ARTIZAN SCHOOLS.—A *soiree*, to celebrate the second anniversary of these schools in Camden-town, under the presidency of his Royal Highness Prince Albert, in 1850, took place, by the kind permission of the Council, in University College, on Tuesday evening, the library and most interesting Flaxman gallery being thrown open to the members and their friends. Several specimens of the drawings and other works of the pupils were exhibited, and reflected great credit, not on y upon the pupils, but their teachers.

THE NEW LINE OF AFRICAN MAIL STEAM-SHIPS.—The first of the squadron for carrying the African mail, under Mr. Macgregor Laird's contract with the Government, was launched, on Saturday last, from the building-yard of Mr. John Laird, Birkenhead. Her dimensions are—length between perpendiculars, 185 feet; beam, 22 feet; depth of hold, 12 feet six inches. She is 400 tons burthen, and is to be fitted with the screw-propeller, driven by two engines of 20 horse-power each, from the manufactory of Messrs Fawcett, Preston, and Co., similar to those on board the *Weaver*, which have proved effective. She is named the *forerunner*; the other three vessels comprising the squadron, being *Faith, Hope,* and *Charity*.

DEATHS FROM SUN STROKE.—Two deaths occurred in the neighbourhood of Newport, Monmouthshire, on Wednesday, from the extreme heat of the sun: one was of a man mowing grass, and the other of a young female in the field. Another death, from the same cause, that of a labourer, while engaged mowing hay, occurred at Sneed, in Wiltshire.

WIGAN.—ELECTION RIOTS.—On Thursday evening a riot took place in this town between the Orangemen and Catholics. The magistrates having met and sworn in a number of special constables, headed them and took into custody a large body of rioters. The Moot Hall, the cells underneath, and the cells at the police-office were speedily crowded with prisoners, and a special engine having been despatched to Preston for the military, two troops of infantry arrived, and assisted in restoring order. Many were taken into custody having hammers, adzes, &c.

A SERIOUS ELECTIONEERING CRIME.—Two men, apparently labourers, named John Boardman and John Porter, have been taken into custody at Preston on a charge of being implicated in the death of James Robinson, brower, which occurred immediately after he had voted for the successful candidate, Mr Parker. It appears that at an early hour on Thursday the deceased was carried off into the country by the prisoners; but he subsequently succeeded in recording his vote at the election, although at the time in a state of semi-insensibility. His death, it was proved, was occasioned by some narcotic drug which had been administered to him.

LATEST FOREIGN NEWS.

FRANCE.

IN the advices of yesterday (Friday) from Paris, there is not the slightest news of interest, and in the absence of domestic intelligence, the journals turn their attention to the elections now going on in England, and each accordingly ventures to speculate upon the nature of the support or otherwise that the Earl is likely to receive in the forthcoming Parliament.

The Château of Bizy, belonging to the Orleans family, has been seized, in accordance with the confiscation decree.

A bill for regulating the constitutional organisation of Algeria has been placed before the Council of State for consideration. By this measure Frenchmen are to enjoy in Algeria the same civil rights as in France. The political privileges are to be governed by decrees from the Prince President.

The 22d anniversary of the descent of the French into Algeria was celebrated at Oran, on Sunday, the 27th ult. On the same day General Pélissier, Commander of the province, passed a grand review of all the troops, and afterwards distributed to the different regiments the eagles remitted to their deputations at the grand *fête* of the 10th of May, at Paris.

THE REVENUE.

The returns of the Revenue for the quarter and the year, ending the 5th inst., have been published, from which it appears that on the quarter, as compared with the quarter ending July 5, 1851, there has been an *increase* of income amounting to £144,681, while upon the year, as compared with the year ending July 5, 1851, there has been a *decrease* amounting to £467,523.

The details of increase and decrease for the quarter will be seen in the following items; viz.

INCREASE FOR THE QUARTER ENDING JULY 5, 1852, AS COMPARED WITH THE QUARTER ENDING JULY 5, 1851.

Customs	£183,946
Excise	23,706
Stamps	101,324
Property Tax	80,110
Crown Lands	30,000
Miscellaneous	110,948
Total Ordinary Revenue	£830,044
Imprest and other Moneys	72,818
Repayment of Advances	93 243
	£996,205

DECREASE.

Taxes	541 524	
Post Office	10,000	
		551,524
Nett Increase on the Quarter		£144,681

In the return for the year the chief item of *decrease* appears under the head of taxes, and amounts to no less than £1,172,979; but to set against this there is an increase under the heads of customs, property tax, the post-office, the crown lands, and "miscellaneous." The first of these items of increase furnishes additional proof of the soundness of the policy of removing shackles from commerce. In the last return there was an increase of £97,366 in the return from Customs; in the present case we find that increase rising to £296,702. In the Excise there is a decrease on the year of £13,205, but on the quarter, as shown above, there is an increase of £23,706. In stamps the improvement during the last three months is very manifest. When the Stamp Laws were reformed, and the duties reduced, the first result was of course a falling off in the revenue derived from that source. In the year ending the 5th of April last the falling off from stamps was no less than £203,998; and on the quarter ending the same day the decrease was £32,023. The last three months have given time for the wise change in the law to have its beneficial operation, and we accordingly find that the decrease on the year ending July 5 is only £37,389; whilst there has arisen on the quarter, as exhibited in the table above, an increase from stamps of no less than £101,324. It will be seen, therefore, that those items which illustrate the working of Free Trade tell all in favour of that system, and show that by the wise reduction of many imposts revenue may be improved, whilst industry is left more free to operate for individual and national benefit.

COURT AND HAUT TON.

THE COURT AT OSBORNE.

Since Saturday last her Majesty, the Prince Consort, and the members of the Court have been enjoying the quietude of Osborne.

On Sunday morning her Majesty, his Royal Highness Prince Albert, the Prince of Wales, the Princess Royal, and Princess Alice, attended Divine service in the house. The Hon. and Rev. G. Wellesley officiated. The Ladies and Gentlemen in Waiting and the domestic household were also present.

The Royal party did not leave the grounds on Sunday or Monday.

On Tuesday afternoon her Majesty and his Royal Highness Prince Albert, accompanied by the Prince Royal and Princess Alice, drove out. The Hon. Flora Macdonald and Lieut.-Col. Seymour were in attendance.

The Marchioness of Ely arrived at Osborne on Tuesday, and succeeded Viscountess Canning as Lady in Waiting.

On Thursday her Majesty and the Prince Consort, accompanied by the Prince of Wales and Prince Alfred, embarked on board the Royal yacht *Fairy* at six o'clock, for a cruise. The Marchioness of Ely, the Hon. Flora Macdonald, Colonel the Hon. C. Grey, and Lieut.-Colonel Seymour were in attendance. The Royal party returned to Osborne a little before eight o'clock.

There are rumours of a Royal visit to Cork during the exhibition of industry at present open in that city. We believe, however, that her Majesty has no intention of visiting Ireland this year. The departure of the court for Scotland will, it is expected, take place about the end of this month. Her Majesty will, it is said, make trip by railway, sleeping *en route*, as last year, one night at Doncaster, and one night at the Royal palace of Holyrood.

Her Royal Highness the Duchess of Kent left her residence, Clarence House, St. James's, at one o'clock on Wednesday afternoon, for Richmond, to pay a visit to the Countess de Neuilly and the French Royal Family. Her Royal Highness afterwards proceeded to Frogmore, near Windsor. The Duchess of Kent was attended by Lady Fanny Howard, the Baroness de Speth, and Sir George Couper.

His Excellency the French Ambassador and the Countess Walewska had a musical reception on Saturday evening, at the residence of the Embassy, in Grosvenor-square.

His Excellency the American Minister and Mrs. Abbot Laurence entertained a distinguished circle at dinner on Saturday last, at the residence of the Legation, in Piccadilly.

On Saturday last the Duke and Duchess of Somerset had a grand banquet at their mansion in Park-lane. His Highness Said Pasha, accompanied by his Excellency the Turkish Minister, paid a visit to the Duke of Somerset on Saturday la-t, at his Grace's mansion, in Park-lane. His Highness had a long conference with the noble Duke, and, we understand, expressed his great regret that his early departure from England would prevent the possibility of repeating his visit. On Tuesday evening their Graces had a grand banquet and musical *soirée*.

The Duke of Devonshire has arrived at Kemp Town, Brighton, from Chatsworth.

The Marquis and Marchioness of Ailesbury gave a grand banquet on Wednesday evening last, at their mansion in Grosvenor-square, to her Royal Highness the Duchess of Gloucester, and a distinguished circle of the nobility. The Marchioness subsequently had an evening party.

The Earl and Countess of Jersey had a grand banquet and evening party on Monday last, at their mansion in Grosvenor-square.

The Earl and Countess of Derby left their residence in St. James's-square, on Tuesday last, for St. Leonard's, Windsor.

Viscount and Viscountess Palmerston have left town for Broadlands.

On Thursday was married, at St. George's Church, Walter Drummond, Esq., to Miss Mary Hervey, daughter of the late Lionel Hervey, Esq., formerly the British Minister at Mexico and Madrid. After the ceremony the nuptial party repaired to a breakfast at Thornwood Lodge, the villa of Mr. Vincent, the bride's cousin, at Campden-hill. Her Royal Highness the Duchess of Gloucester honoured the party with her presence.

THE WEATHER.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

SIR,—Perhaps some few particulars in connexion with the great change in the weather which has taken place during the last week, from a period of unusual cold to one of unusual hot weather, may interest your readers, and I therefore beg to send the following account:—

For some time previous to July 3, the weather was cold, the temperature being day by day below the average value for those days, at times to large amounts, this circumstance, together with an almost daily fall of rain—the fall in June amounting to 4¼ inches in depth—caused the weather to be very unseasonable.

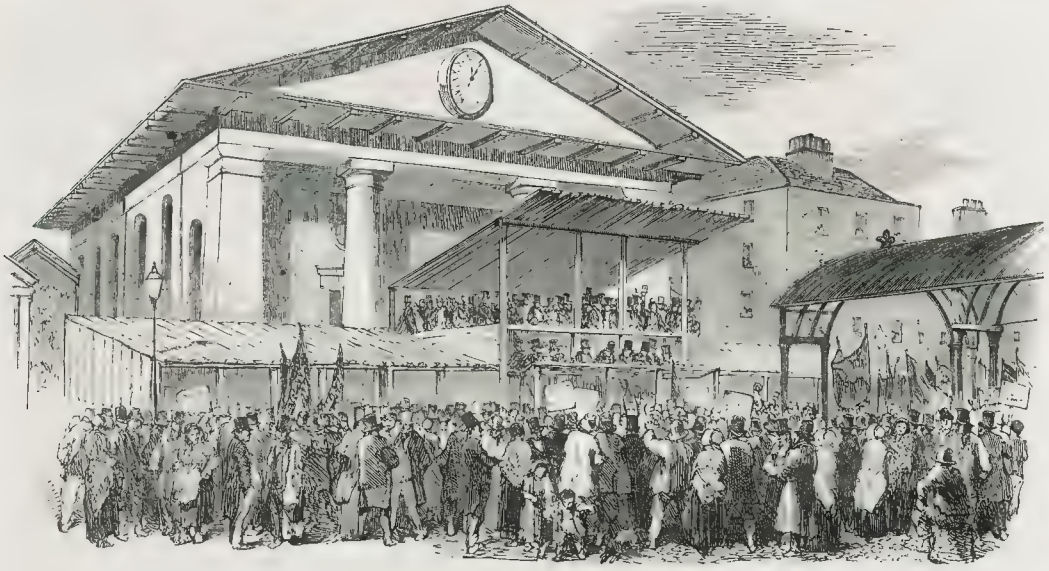
On July 3 there was a considerable increase of temperature, its mean value for the day was 65°, being about 3° above the average for the season. On July 4 there was a still further increase, the temperature of the air ranging from 57° to 84°, and the average for the whole day was 68°. The reading of a thermometer with its bulb placed in the full rays of the sun was 102°.

On Monday, the 5th, the reading of the thermometer reached the very high value of 93°, a point higher than any since July 8, 1846. The lowest reading during the day was 58°, and the average temperature for the day was 76°, a higher mean value than on any day since July 8, 1826, exceeding that on July 5, 1846, by more than 1 degree. A mean daily reading of 76° has only been reached 7 times in 38 years; viz. in 1818, on June 13 and July 24; in 1825, on July 18 and 19; in 1830, on July 30; in 1834, on July 17; and in 1826, on July 5; the reading of the thermometer in the sun on this day was as high as 116° for many hours. On July 6 the temperature of the air ranged from 61° to 89°, and its mean was for the day was 73½°. The reading of the thermometer in the sun was 116°; and on July 8 the temperature of the air ranged from 51·6° to 85°, and in the sun to 110°. During the period from July 1 to July 8 the temperature of the air has ranged from 49° to 93½°; and the average for the day has varied from 59° to 76°.

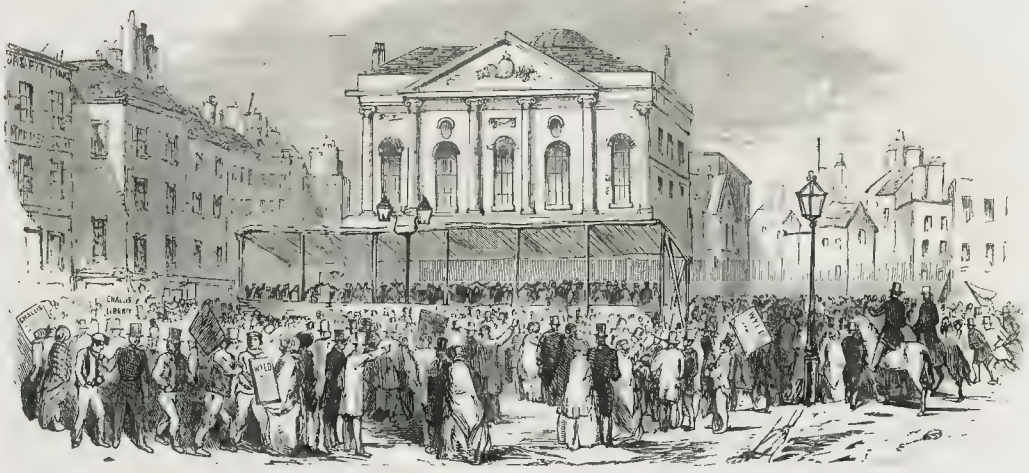
I am, &c., &c.,

13, Dartmouth-terrace, Lewisham. JAMES GLAISHER.

THE GENERAL ELECTION



WESTMINSTER ELECTION.—THE HUSTINGS IN COVENT GARDEN.—(SEE PAGE 26)



FINSBURY ELECTION.—THE HUSTINGS AT CLERKENWELL-GREEN.

THE GENERAL ELECTION.

SOUTHWARK ELECTION.—THE HUSTINGS AT THE TOWN-HALL.—(SEE NEXT PAGE.)

LAMBETH ELECTION.—THE HUSTINGS ON KENNINGTON-COMMON.

GREENWICH ELECTION.—THE HUSTINGS.

THE ELECTIONS.

The election of members to serve in the New Parliament which is to decide finally the question whether Free Trade is to be accepted as the national commercial policy of the Empire or not, is proceeding with unwonted vigour and despatch after the dissolution; and although it would be premature to augur the character of the full result of this appeal to the constituencies of the United Kingdom from the elections which have already taken place, we may safely assert, point to the fact that these latter show a majority so far against the Government of the Earl of Derby.

The metropolitan elections have all been disposed of this week.

CITY OF LONDON.

On Tuesday the nomination of the candidates for the representation of the City of London took place in the Guildhall.

The hustings were erected at the eastern end of the hall, as usual, strong barriers being raised at intervals in the space in front of them for the purpose of arresting the pressure of the crowd. One of the galleries was exclusively occupied by ladies, and another almost entirely by foreigners, amongst whom were the Duke de Nemours, the Duke de Montpensier, and the Duke d'Aumale, who, as the nomination proceeded, watched with interest and manifest amusement the boisterous behaviour of an English election assemblage. Father Gavazzi was also present, and had a place in the same gallery. In another gallery were seated Lady John Russell and other ladies, friends and relatives of the candidates.

The candidates were Lord John Russell, Mr. Masterman, Baron Rothschild, Sir James Duke, Bart., and Mr. Wigram Crawford.

The sheriffs, accompanied by the several candidates and their friends, arrived on the hustings at ten o'clock; and the writ for the election, and the Bribery Act, having been read by Mr. Harker, the City crier,

Mr. Sheriff Cotterell opened the proceedings by reminding the meeting of the great and important duty which they were thus assembled to perform.

Lord John Russell was proposed by Mr. T. Hankey, and seconded by Mr. J. Dillon. Baron Rothschild was proposed by Mr. H. J. Prinsep, and seconded by Mr. Alderman Wire. Mr. Masterman was proposed by Mr. R. Ellis, and seconded by Mr. J. B. Heath. Sir James Duke was proposed by Mr. Martineau, and seconded by Mr. Alderman Lawrence. Mr. Crawford was proposed by Mr. W. J. Hall, and seconded by Mr. Bateman.

The various candidates then addressed the assemblage in succession.

Lord John Russell on coming forward was met by with cheers, mingled with some manifestations of opposition. The noble Lord based his claim to the renewal of the confidence of the electors upon his past political history, which was known to them all, and which showed him to be a friend to civil and religious liberty in proof of which he referred to his having proposed the repeal of the Test and Corporation Acts, which injuriously affected the Protestant dissenters, and other measures of a similar character. Referring to the events which have occurred in Parliament, the noble Lord observed that he had done his best to remove that disability, but let him tell them that that was a question which did not depend on him, or any one advocate of that cause; it depended on the people of England to settle that question. (Loud cheers.) And he felt assured that, if the people of England sent a large majority to the House of Commons to remove all religious disabilities, there would be no obstacle to the consummation of their wishes. The noble Lord then proceeded to observe—"With respect to Free Trade I need say but very little. There is not one of the present candidates to represent you who is not favourable to Free Trade. But, more than this. Throughout the country the Protectionists are ready to give up that battle, and like the garrison of a besieged place they are only about to muster their forces for the purpose of laying down their arms. (Cheers.) I know that it is proposed to make some sort of capitulation before those arms are piled, but we must look narrowly at the terms of that capitulation. I say for myself that I shall vote for no relief for a particular class; but for the removal of burdens, if I think it should be given to the body of the community at large. (Cheers.) My belief is that that great class of our fellow-countrymen a most deserving and respectable class who are engaged in the pursuits of agriculture, can find their best advantage in that which is for the benefit of the community; and this is not a mere theory or a mere sentiment, because we all know that the agriculturists are employed in raising food, and the more people there are who can eat food, and the more money they have to buy food, the better it will be for those who produce food. (Loud and protracted cheering.) I believe, therefore, that no one will come forward in the new Parliament to say that the people are suffering from the cheapness of bread, and that they have got a plan to add something to the price of the loaf. ("Hear, hear," and cheers.) I should very much even wish that they will propose to make sugar dearer; but if they do propose it I do not think that those who like to have sugar with their tea would be apt to support and countenance them in that measure. (Cheers.) Then I come to the other question to which I have referred, viz., the question of reform of Parliament. (Cries of "Reform the Corporation of London as well.") I now repeat the opinion which I have already declared in the House of Commons, that there ought to be an enlargement of the suffrage. (Cheers.) I believe, likewise, that proposing the Reform Bill as we did in a great emergency, there are defects which require to be remedied in that act—(Loud cheers) and for my part I shall be ready to consider any proposition for that purpose with the view to give the people a more complete representation. (Cheers.) The son of the present Prime Minister has stated that the proposal I made to Parliament when in office was intended to thwart the principle of the Reform Act which I had introduced. Gentlemen, I utterly deny that statement. It was intended to carry that act more completely into effect, and to give additional vigour to the principles of that act. (Loud cheers.) And now with respect to all the charges that have been made against me of having committed various errors in my political life, I might, perhaps, if I were to detain you, say something in answer to those critics; but I much rather prefer to say, that no doubt, in the course of a long political life, and with an infirm and failing understanding, I have committed many errors, and I throw myself on your indulgence. (Vehement cheering.) If elected to the new Parliament, my object will be to remove remaining religious disabilities, and to take away from the oath which members of Parliament are obliged to take shall be one and simple—the same for persons of all religious faiths, and that religious faith shall no longer be any disqualification.—(Renewed cheers)—that as there should be no longer an oath kept up for the purpose of excluding a Jew, so neither should an oath remain which in many of its parts insults and injures the Roman Catholic. I am for men of all religious having equal rights to a seat in Parliament. And now with respect to Free Trade. I have only to say that I think the commercial policy which has now for ten years been taking place—which has given to you a reduction of £12 000 000 of taxation, with little loss to the revenue—I think that that system which has enabled the people to have greater comforts than they enjoyed during the system of Protection, must be carried out to its full accomplishment and final settlement. I say, likewise, that when that question has been completely set at rest, I shall be for considering the question of a further extension of the suffrage. ("No Popery.") I hear a cry of "No Popery." My sentiments on that subject are clear; I never would countenance or allow any interference with the supremacy and independence of the Crown of these realms; but, at the same time, I never would punish any man for his religious belief, my votes and my conduct in Parliament have known to all the world, and I wish to abide your decision. (Hear, hear.)

Mr Bannoch asked the noble Lord whether he would support the use of the ballot at elections for members of Parliament?

Lord J. Russell: I have often given an opinion upon that subject in Parliament I am in favour of publicity in all proceedings. I think our courts of law should be open, our discussions in Parliament should be open; and I think if you are to resort to secrecy in giving votes for members of Parliament, there would be an equally good argument for excluding publicity from those institutions which I have named. I am aware that there are many cases of undue liberals by the free exercise of their franchise. I do not believe that those evils would be cured by secret voting, but there would be a secret inquisition into every man's vote, and that as he may be now punished for open votes, then would be means found to punish him also for his secret vote. ("Oh, oh!" and "Hear, hear.")

Mr. Bannoch wished further to ask the noble Lord if he would extend the rancise and shorten the duration of Parliaments?

Lord J. Russell: With regard to these two questions I must ask your indulgence for a moment. With respect to any measure that I may bring forward as minister, I have to consider first what is best for the country, and next, what other men will support, and what I have a chance of carrying. If I am fit to represent you in Parliament I am fit to be entrusted with a discretion there; and I would advise you rather to choose some man whom you can trust, and upon whose judgment and honesty you can rely, than to choose an automaton with the hope that you may be able to direct the wires. (Hear.)

Mr. Wigram Crawford, in the course of the observations which he addressed to the assemblage, announced that he was not willingly a candidate.

The show of hands was then taken, when Mr. Sheriff Swift declared the show to be in favour of Mr. Masterman, Lord John Russell, Baron Rothschild, and Mr. Crawford.

A poll was accordingly demanded for Sir James Duke, and Wednesday was appointed for the polling.

The official declaration of the poll was made on Thursday. The numbers were—For

Mr. Masterman	6195
Lord John Russell	5537
Sir James Duke, Bart	5270
Baron Lionel de Rothschild	4748
Mr. Crawford	3765

The four first candidates were then declared duly elected.

They all then severally addressed the electors, returning thanks to the honour conferred on them.

WESTMINSTER.

In this city there was a contest for the representation. The candidates were one of the late members, Sir De Lacy Evans (Liberal), Lord Maidstone (Ministerialist), Mr. Cowingham (Liberal), and Sir J. Shelley (Liberal).

The nomination took place on Wednesday, at twelve o'clock, on the hustings before St. Paul's, Covent-garden, in the presence of a very large and very variegated, but good-humoured assemblage, of which the large majority consisted apparently of non-electors. The ceremony excited much curiosity, if one were to judge from the number of ladies who braved the fierce heat of sunshine in conspicuous positions on the roof of the market, and from the several distinguished foreigners who were present in places equally exposed to the heat. Popular rumour assigned to many of those ladies a very active part in canvassing for Lord Maidstone, just as Lady Holland and the fair Whigs of old used their persuasive powers in favour of Mr. Fox. Among the foreigners present were the American Minister and Colonel Laurence, M. Mussurus, the Turkish Ambassador, Chevalier Bunsen, the Duke of Augustenberg, &c., who must have acquired very strange notions of the working of our boasted representative institutions if their sole knowledge of them was derived from these proceedings. Scarcely an eleven o'clock the crowd before the hustings was considerable; but as the hour of nomination approached it increased. All the space between Henrietta-street and King-street was occupied by a dense mass fifty or sixty deep, which swayed to and fro, all swearing in the sun, and shouting with the most surprising vigour from that time till the close of the proceedings. The front of the hustings was covered with placards, asking the electors to vote for "Lord Maidstone" (with whose name was coupled, curiously enough, and certainly very seriously under the circumstances, "Cheap tea, sugar, and tobacco!"); and to vote for "Cuningham, the independent candidate;" or for "Evans and Shelley, the friends of Reform."

Just before twelve o'clock Sir D. L. Evans made his bow from the hustings, and was saluted by an outburst of groaning, hissing, and yelling, which was renewed with unabated vigour whenever the General ventured to speak, or to place himself in any way prominent before the crowd. Sir John Shelley followed, and was well received in comparison, though he had not any great reason to be proud of his popularity These two candidates and their friends took up their position on the section of the hustings to the left of the High Bailiff's box. Lord Maidstone arrived speedily afterwards, with a great procession of vans covered with his name in blue letters, a very energetic band of music, and some still more energetic friends. His Lordship stationed himself in the compartment on the right hand of the High Bailiff's quarters, and was recognised by the crowd with an abundance of groaning and facetious allusions to "poetry" and "the small loaf." Lord Randolph, however, succeeded in raising something like a demonstration in his Lordship's favour by two strong appeals for "three cheers for Lord Maidstone." Lastly came Mr. Coningham, in an open carriage, preceded and followed by flags and banners, with a "tail" of supporters in Hansom cabs, and a crashing band in the distance. His appearance was the signal for tremendous cheering and violent enthusiasm, which spent itself in rushing up behind and in crowding on the chief seat and waggon, and impeding the progress of the horses, which were somewhat injudiciously driven in front of the hustings, through the panting multitude.

Mr Sneyd, the High Bailiff, appeared in his place at twelve o'clock, and opened the proceedings by reading the writ and the act against bribery and corruption

The various candidates, their movers and seconders, having then addressed, or rather endeavoured to address, the assemblage, amidst the Babel of discordant noises which emanated from the crowd in front, the show of hands was taken, which the High Bailiff, amid much cheering, declared to be in favour of Mr. Coningham and Sir J. Shelley

A poll was demanded for Sir D. L. Evans and Lord Maidstone.

The official declaration of the poll was made on Friday. At one o'clock the High Bailiff announced the numbers to be as follows:—

Sir John Shelley	4190
Sir De Lacy Evans	4176
Lord Maidstone	3373
Mr. Coningham	1716

He therefore declared that Sir John Shelley and Sir De Lacy Evans were duly elected.

The candidates then severally returned thanks for the support they had each received, and the proceedings terminated.

MARYLEBONE.

In this metropolitan borough there was no opposition, and, consequently, the election was a merely formal proceeding. The late members, Lord Dudley Stuart and Sir Benjamin Hall, Bart., were re-elected on Tuesday last.

FINSBURY.

The nomination of candidates for the representation of this borough took place on Wednesday. There was a large crowd, very noisy, but very good-humoured withal, assembled in front of the hustings on Clerkenwell-green. Mr. Boykett, the returning officer, having gone through the usual preliminaries, the following candidates were proposed and seconded, viz.:—The late member, Mr. T. S. Duncombe; Mr. J. Wyld, and Mr. Alderman Challis—all Liberals.

Mr. Duncombe was enthusiastically received when he addressed the electors. He was there that day for the purpose of redeeming the pledge which he gave on the first occasion when they returned him to Parliament; namely, that so long as the borough of Finsbury should be prepared to stand by him he should never desert the electors of Finsbury. (Cheers.) He was there, he said, to redeem that pledge; but before he went into any of the questions of the day he begged to might be allowed to say that he was not actuated and unassisted by any other candidate. (Cheers.) He had formed no coalities whatsoever. (Hear hear.) It was to the electors, and to the electors alone, that he looked for support. (Hear, hear.) He had been told that he had not been quite so complimentary on one or two occasions as he ought to have been towards his colleagues candidates. (Cries of "Question," "Order," "Turn him out," and "It is the question.") He was told that he had not been sufficiently courteous to one and unkind to the other. He could only say that, if he had, such never was his intention. (Bravo.) When two candidates appeared, as it were, to mount on the shoulders of the people, they must forgive him if he said that a representative must look with a little suspicion and jealousy upon them, particularly when they entered the field before any vacancy occurred. (Cheers.) But this was all, he could declare—

> How happy could I be with either
> Were t'other dear charmer away,
> But while you thus tease me together,
> To neither a word will I say.

(Laughter and cheers.) He had been a dissevered Parliament, so far as Finsbury was concerned, to send him to ask his constituents what they thought of Lord Derby as Prime Minister; and if they returned him again to Parliament it would be his duty in the place to tell the Earl of Derby and Commons what the sentiments of Finsbury thought of the present Prime Minister—(Cheers)—what they thought not only of the man, but also of his measures. (Hear, hear.) They knew he had told the country that he wished to have the opinion of the country upon the question of taxing the food of the people—(Hear, hear) —and if there were a majority in his favour, or in favour of taxing the food of the people, he would set seriously to work and try to effect that diabolical purpose. (Hear, hear.) Whether Lord Derby had, or had not, a 100 of majority, he (Mr. Duncombe) cared not. He, on their part, should dare Lord Derby to propose, and defy him to pass any measure for the taxation of the food of the people. (Loud cheers.) He (Mr Duncombe) thought the electors would say the day for his making professions was gone by. (Loud cries of "Hear, hear.") He stood there to be judged by his votes, and by the opinions he had expressed in the act in Parliament. They knew full well what he had done in nurturing the cause of reform, whether connected with the Church or with the State. (Applause) He was prepared to continue those exertions in favour of such reforms. He was what was commonly called anti-Maynoothism. (Hear.) He always opposed the grant when it was annual, and opposed at every stage the proposal to make it permanent. He was prepared to oppose that endowment against the will of some members of Parliament, as well as all other religious endowments—(Cheers)—proposed to be effected by the State. He was also against what was called the militia, and therefore an anti-militiaman. At the conclusion of the last session of Parliament that measure would be put into execution, and the honest and the industrious mechanic would find himself drawn away from his home. If it should be proposed to repeal that measure, he would vote for it. (Cheers.) It was a bad measure. (Loud hear.) It was an ill-advised, unnecessary measure; it was calculated to create confusion at home and jealousy abroad. (Applause.) He had given the electors a little bill of fare as to what he proposed to do, and he trusted they would like to know what he was for. He was for justice to all at home, and against interference in the affairs of their neighbours abroad. (Hear, hear.) He said justice and equal rights to all at home; but further than that he would not go. If any one wished information on other points, he was ready to give it. He was ready to answer for any vote, opinion, or anything he had done since he had had the honour of their acquaintance. (Cheers.) He was ready to say that he wished this struggle had not been a contest of Liberal against Liberal. It would have been more creditable to their cause, and more satisfactory, he thought, to the constituency of Finsbury; but, as it was, he had, and he felt bound to say, confidence in carrying the old blue and buff now waving on the breeze. (Applause) Those colours had never been defeated yet—(A voice, "Nor sullied") and they would not be defeated now. (Loud cheers.) He was confident that the constituency would vote for their support in vindication of those principles he had ever advocated, and in which, if a man knew himself, he should, be it soon or be it late, close his political career. Great cheering.

Mr. Wyld having also addressed the assemblage,

Mr. Alderman Challis observed that, in presenting himself to the electors as a candidate to represent the borough of Finsbury in Parliament, he was conscious of answering an objection that in doing so he was dividing the Liberal interest. When first requested to become a candidate, he declined, on the ground that there was no vacancy. His friends assured him that the onerous nature of Mr. Wakley's official engagements and the failure of his health would most likely prevent his becoming a candidate at this election; they stated that on these grounds, at all events, if he did, he would not be returned. The requisition, signed by between 4000 and 5000 persons, induced to reconsider any doubt on the subject. The course which the election had taken seems to leave the vacant seat to be contested between him and Mr. Wyld. During the canvass some placards had been issued which had given pain to the gentlemen engaged in the contest. He begged to assure them the placards were printed without his knowledge, and against his repeated desire that nothing might be done by any friend of his that should make a political contest the occasion of producing acrimony and bad feeling.

A show of hands was taken, and the returning officer declared that it was in favour of Mr. Duncombe and Mr. Alderman Challis. The show of hands in favour of Mr. Duncombe appeared universal.

The official declaration of the poll was made on Friday. The returning officer announced the following as the state of the poll at the termination of the election on Tuesday:—

Challis	7504
Duncombe	6876
Wyld	2010

The candidates severally returned thanks for the support they had received, and the proceedings terminated.

SOUTHWARK.

The nomination of two burgesses to represent this borough in Parliament took place on Wednesday in front of the Town-hall.

Mr. Pritchard, the High-Bailiff, presided.

The candidates were Sir W. Molesworth (the late member), Mr. Apsley Pellatt, and Mr. G. Scovell (all Liberals).

Sir W. Molesworth, on presenting himself, was greeted with unanimous plaudits. He said, he came before them to ask them to choose him to be one of their representatives. A similar request would be made by two very honourable and very estimable gentlemen. He was very sorry they could not return both of them; but as they were in the constitution of the country they could only gratify the wishes of two of them, they could only decide between their conflicting claims by rejecting one. Now, he was happy to think that he had claims to submit which must be regarded as superior to those of his opponents. (Cheers.) Not only had a member duties to perform to his constituency, but he contended that constituents were also under obligations to their representatives if they did their duty. In order to persuade them that he deserved the reward of confidence at their hands, he would very briefly remind them what were the promises which, in 1842 and 1847, he had made, and it would be for them to determine whether he had carried out what he had professed. (Cheers.) He had spoken and voted in favour of all measures which had had for their object the freedom of trade and the removal of all restrictions upon commerce. (Cheers.) He had voted for the abolition of the Navigation Laws, and for the reduction and equalisation of the duties on sugar. He was in favour also of direct taxation, and he thought that there should be a gradual reduction of all those taxes which pressed heavily on the industry of the country. He had therefore supported the Income-tax, and generally the financial policy of the late Government, which, in many respects, was identical with that of the late Sir R. Peel. (Cheers.) He had always advocated economy in every branch of the public service, and having been a member of the committee which had sat for a long time on that subject, he had endeavoured to give a practical effect to his opinions. National education he regarded as a matter of primary importance. (Cheers.) It formed one of the most sacred and solemn duties of society, and by properly discharging it, the state best consulted both the moral and material interests of its subjects. He had, therefore, supported grants for education, and for its extension to all religious sects equally. He had also supported the repeal of all taxes upon knowledge. (Cheers.) He adopted the broad principle that all men, to a certain extent, created they might be only, were entitled to equal rights and privileges under the law, and in carrying out this principle he had both spoken and voted for the admission of Jews into Parliament. He was an advocate for the extension of the suffrage in the town to the extent proposed by Mr. Hume, and in counties to that proposed by Mr. Locke King. He was in favour of the ballot to protect the voter, and of the abolition of the property qualification, in order that his choice might be unfettered and unrestricted. (Applause.) To the foreign policy of the country he had devoted a considerable share of attention; and he had constantly and perseveringly advocated a complete reform in the system of colonial Government, in order to strengthen and render permanent the connection between the colonies and the mother country, and to reduce the expenditure on their account, when at this time amounted to about £4,000,000 per annum. (Loud cheers.) Pursuit him to his favoured haunts, and to the remotest parts, in support of that constitution which had survived every political storm, and which justly continued to be the wonder and admiration of the surrounding nations. (Loud cheers.)

Like other candidates having likewise addressed the electors, a show of hands was taken, which was declared to be in favour of Sir W. Molesworth and Mr. Apsley Pellatt. A poll was therefore demanded on behalf of Mr Scovell.

The official declaration of the poll was made on Friday. Mr. Pritchard, the High Bailiff, announced the number of votes recorded for each candidate to be—

Molesworth	5241
Pellatt	3887
Scovell	2909

He then declared the election to have fallen on Sir William Molesworth, Bart., and Mr. Apsley Pellatt. The three candidates having then severally returned thanks for the support they had received, the proceedings terminated.

LAMBETH.

In this borough there was a contest. The late members, the right hon. Thomas Pemberton and Mr. W. Williams, were opposed by Mr. William Arthur Wilkinson.

The nomination took place on Kennington Common on Tuesday, and the show of hands was declared to be in favour of Mr. W. Williams and Mr. W. A. Wilkinson. A poll was demanded on behalf of Mr. D'Eyncourt, and the voting was fixed for the following day (Wednesday).

Mr. Wilkinson, in his speech to the electors, disclaimed any intention to find fault with the conduct of their late representatives; on the contrary, he admitted having heretofore supported them. He merely came forward in obedience to the wishes of a large and respectable body of the constituency, who were greatly dissatisfied with the public conduct of one of their late members. He was the supporter of the principles of Free Trade and civil and religious liberty to the fullest extent.

On Wednesday the polling was carried on with great briskness from its first opening to its close at four o'clock, P.M., when Mr. Wilkinson, the new candidate, declared that Mr. Williams were returned at the head of the poll, Mr. D'Eyncourt, one of the former members, being rejected.

The official declaration of the poll was made on Thursday as follows —

Williams	4782
Wilkinson	4744
D'Eyncourt	3879

TOWER HAMLETS.

There was also a contest for the representation of this borough. The late members, Sir William Clay and Mr. George Thompson, were opposed by Mr. Ayrton, Mr. C. S. Butler, and Mr. Newton. The last-mentioned candidate is the person whose name was so prominently connected a few months back with the strike of the amalgamated engineers.

The nomination took place upon hustings erected at Stepney-green on Tuesday, when Mr. Ayrton, in his speech to the electors, declared himself to be a true Radical Reformer.

Mr. Butler, amid great interruption, stated that he was a Reformer, and was opposed to the Maynooth Grant. He was in favour of the ballot. He was prepared to reform the Church, and to pay the poor curates fairly and honestly for their work.

Mr. Newton declared himself to be the true friend of the working classes, and if returned he would not only support the interests of the electors, but also the interests of the 60,000 non-electors in the borough. He would advocate such measures as would give employment to the people, and would destroy "those huge monopolies of different kinds which now oppressed them."

The show of hands was declared to be in favour of Mr. Newton and Mr. George Thompson. The interruption a poll was demanded on behalf of the other three candidates, and the voting was fixed for the following day.

Accordingly, on Wednesday the polling commenced at eight o'clock A.M., and closed at four P.M. On Thursday the official declaration of the poll was made as follows:—

Sir W. Clay	5724
Mr. Butler	5748
Mr. Thompson	5709
Mr. Ayrton	2752
Mr. Newton	1070

Sir W. Clay, Bart., and Mr. C. Salisbury Butler were then declared the duly returned members of the borough. (Loud cheers.) Mr. George Thompson has thus lost his seat in Parliament.

GREENWICH.

There was a contest in this borough. The late members, Admiral Stewart, and Mr. Alderman Salomons were opposed by Mr. Montagu Chambers, the eminent Queen's Counsel; Mr. Peter Rolt, the Ministerial candidate; and Mr. Knight (Chartist). The nomination took place on Tuesday.

Mr. Alderman Salomons, in his speech to the electors, stated that if they returned him again as their representative, he promised that he would go into the House of Commons and vote for the Speaker, and would do his utmost to sit and vote altogether as their member.

Admiral Stewart referred to his past conduct as their representative as a guarantee for the maintenance of the principles which as a Reformer and Free-trader he had always advocated.

Mr. M. Chambers reiterated the same opinions he had expressed, when he stood before them a short time ago as a candidate for the borough.

Mr. P. Rolt could scarcely procure a hearing. He was understood to declare his determination to support the Protestant institutions of the country.

Mr. Knight having addressed the electors on the five points of the Charter, declined to go to the poll.

The show of hands having been declared to be in favour of Mr. Rolt and Mr. Chambers, a poll was demanded on behalf of the opposing candidates, who was appointed to take place on the following day (Wednesday), when the election resulted in the defeat of the two ex-members, and the return of Mr. Peter Rolt and Mr. Montagu Chambers (Liberals). It was thus proving that the show of hands taken at the nomination on Tuesday was a correct index of the state of parties in the borough.

On Thursday the official declaration of the poll was made, viz:—

Mr. Rolt	3815
Mr. Chambers	3390
Admiral Stewart	2620
Alderman Salesbon	2402

Majority of Mr. Chambers over Admiral Stewart, 334.

The returning officer then declared Mr. Chambers and Mr. Rolt duly elected to represent the borough in Parliament.

LIVERPOOL.—The nomination took place on Tuesday, amid considerable excitement and large party processions. The hustings were in front of the Town Hall. The candidates were Mr. Cardwell (the late member), Mr. Forbes M'Kenzie (one of the Secretaries of the Treasury), Mr. Charles Turner (a Ministerialist), and Mr. Ewart (the late member for Dumfries). The show of hands having been declared to be in favour of Messrs. Cardwell and Ewart, a poll was demanded on behalf of Mr. M'Kenzie and Mr. Turner, and the voting was appointed to take place on the following day, when the election resulted in the return of the two Protectionists; viz.—Messrs. Turner and M'Kenzie.

PRESTON.—There was a contest for this borough. The nomination took place on Tuesday. The candidates were Mr. John Wilson, the late member; Mr. Strutt, the advocate of Free Trade and Reform; Mr. Sturgeon, who was put forward as the friend of the working men; and Sir George Larpent (Whig). The polling on Wednesday resulted in the return of Mr. Walbor and Mr. Strutt.

THE ELECTIONS IN IRELAND.

The borough elections in Ireland were to commence on Friday. They return altogether sixty-eight members out of one hundred and five representatives for Ireland. Thirty-four of the boroughs return one each; and the remaining seven—namely, Belfast, Cork, Dublin City, Dublin University, Galway, Limerick, and Waterford, two members each. Twenty-one of the boroughs are like v to be contested, several of them very severely; but in the following thirteen the old members are not opposed:—Bandon, Carrickfergus, Coleraine, Downpatrick, Dub in University, Dungannon, Enniskillen, Kilkenny, Kinsale, Lisburn, Londonderry, Portarlington, and Wexford. In some of the other boroughs, owing to the dissensions prevailing amongst Liberals, there is a chance of a gain to the Ministerialists—for instance, in Dundalk, where Captain Jocelyn is the Tory candidate. But, upon the other hand, the Liberals are very likely to gain one member in Cork city, by the defeat of Colonel Chatterton; and another in Newry by the substitution of Mr. Kirk for Mr. Hallewell. The conclusion generally come to as to the result of the elections is, that the representation of the boroughs, as regards the relative state of parties, will undergo no material change.

With respect to the counties, it is difficult to foresee what the result is likely to be with reference to the Government of Lord Derby; but the impression prevails that the county elections in Ireland will not give the Ministry any advantage over what they possessed from the Irish representation in the late Parliament.

Up to the present time the following are the nominations fixed:—

Armagh borough—Friday, July 9	Kinsale—Saturday, July 10
Bandon—Friday, July 9	Limerick city—Thursday, July 8
Belfast—Friday, July 9	Limerick county—Monday, July 12
Cavo county—Monday, July 19	Londonderry county—Friday, July 16
Cork county Monday, July 19	Londonderry city—Friday, July 9
Cork city—Friday, July 9	Malow—Monday, July 12
Down county—Tuesday, July 20	Monaghan county Tuesday, July 13
Dublin city -Thursday, July 8	New Ross Monday, July 12
Dublin county—Monday, July 19	Wexford borough—Friday, July 9
Ennis—Saturday, July 10	Youghal—Monday, July 12
Enniskillen—Saturday, July 10	

DUBLIN UNIVERSITY.—The election for this close borough has been fixed by the Provost for the 13th inst.

LIMERICK CITY.—This is one of the localities in which the reaction of the Stockport riots has been yet most conspicuous. The body of trades were well known to be decidedly in favour of Mr. Russell, the Liberal Protestant candidate, and to be equally determined in their opposition to Serjeant O'Brien the "brigade" nominee, but the events of last week have had the effect of entirely changing their opinions, and their banners will now be hoisted on the other side. At a meeting held in Limerick on Tuesday, the following resolution was among those adopted:—Resolved—That in the present momentous crisis, when our religion is assailed in the English House of Commons, denounced as a nuisance and a scandal in Government proclamations, and stoned and trampled in the streets of Protestant England, it is the bounden duty of the Catholics of Ireland to band together for their church and their altars, and to return to Parliament men who will understand and love the Catholic faith, and be prepared, at all hazards, to struggle for its defence."

RESULT OF THE FIRST DAY'S POLL.—The following summary of the results of the first day's contested election shows little encouragement to the Protectionists. They have gained Bradford, Devonport, Greenwich, Horsham, Liverpool (two seats). Lymington, Preston, Windsor, Warwick (two seats)—in all eleven members. They have lost Aylesbury, Berwick, Beverley, Bewdley, Cardiff, Gloucester, Guildford, Hull, Hertford, Kidderminster, Maidstone, Nottingham, Reading, Scarborough—in all fourteen members. The Liberal gain is, therefore, three on the first day.

THE METROPOLITAN BOROUGHS.—It appears by a return just issued, that, according to the late census, there are in the Tower Hamlets 72,710 inhabited houses, and the population is 539,111; in Marylebone, 40,513 inhabited houses, and the population 370,967; in Finsbury there 37,427 inhabited houses, and the population 293,772; in London, 29 154 inhabited houses, and the population 291,345; in Westminster, 24,755 inhabited houses, and the population 241,611; and in Southwark, 23,751 inhabited houses, and the population 172,855. The City of London there are 14,360 inhabited houses, and the population 127,869.

RAILWAY BILLS.—On the last day of the late session the House of Lords passed a resolution altering the standing order No. 185, known as "Lord Wharncliffe's," which required that incorporated companies promoting bills in Parliament should at a certain stage prove before the standing order Committee of the Lords that such bills had been approved by three-fifths of the proprietors present at a general meeting specially convened for that purpose. The alterations in the standing order referred to are to the effect that, on giving the usual ten days' notice by circular to the proprietors of such meeting, the three-fifths proxies are to be enclosed for the use of such proprietors, and that, on boding the meeting, proof be given that such bill was submitted and approved of by proprietors present in person, or by proxy, holding at least three-fifths of the paid-up capital of the company represented at such meeting by qualified proprietors. No alteration was made with the view of doing away with the practice of dividing stock among numerous persons, so as to obtain the largest number of votes out of a given amount of stock, and thus, by a comparatively small amount of stock, to enable adverse parties to outvote the proprietors at a meeting.

POISONOUS CAYENNE PEPPER.—In none of the investigations of the *Lancet* commissioners have the disclosures made been more startling than those now brought before the public respecting cayenne pepper. Of 28 samples examined, it was found that 24 were adulterated, 22 contained mineral colouring matter, and four only were found to be genuine. In 130 of the samples red lead was found in large and poisonous quantities. In seven of the samples were found Venetian red, red ochre, brick-dust, or some other analogous ferruginous earth. In six of the samples were found a large quantity of salt, combined with red lead and a red ferruginous earth; the purpose of the salt is supposed to be to bring out the colour and acrid taste of a genuine portion of cayenne, which in other ingredients were vermilion or sulphuret of mercury, a highly deleterious substance, cinnabar, turmeric, ground rice, and husks of white pepper. It is remarked, as a peculiarity, that red lead and vermilion, or sulphuret of mercury, that not only are they highly poisonous, but when taken into the human system are not eliminated, as is the case with some other poisons, but remain in the body, thus gradually accumulating, until they seriously affect the health of those who use them.

FREIGHTS TO AUSTRALIA.—Messrs. Gamman and Offer, in their monthly circular, say that in the last month the demand for tonnage for the Australian passenger trade has steadily increased, but immediate wants have been to a considerable extent supplied by large arrivals of shipping during the month. There are now seventy sail of vessels loading in London for the Australian colony, against forty-seven at the corresponding period of last year, and a similar increase in the supply of tonnage has been obtained at Liverpool, Bristol, Glasgow, and other outports, including at the former some steam-ships of large capacity; but the inquiry for passage continues so great that ship-owners are maintaining very high rates. The export of goods does not keep pace with the tide of passengers, and freights are accordingly hardly so firm, owing to the large amount of extra tonnage in the market. The average rate of charter for suitable passenger ships loading on the berth for the colony is £5 per register ton, o.m., for the run out, a freight exceeding in many instances the entire value of the vessel—as an example, a colonial-built ship of 700 tons register, originally classed for four years, now five years old, was recently chartered by a broker here for the lump sum of £3000 for the run out to Port Philip; but this vessel been offered for sale by auction three months ago, she could hardly have fetched two-thirds of that sum. Out of the seventy vessels loading in London, but one is foreign owned. Passage money by sailing-vessels ranges from £20 to £55, for similar accommodation as that which have obtained only £15 to £40 a few weeks ago. The employment of so large an amount of tonnage in the emigration business, has occasioned an improvement generally in the rates of freight.

The new charter of the College of Surgeons came into practical operation for the first time on Thursday, the 8th of July, when the Fellows met for the election of new members for the council. It is not a little singular, that, although the regulations under which the election was made are altogether different from those which have obtained in previous elections, yet the senior Fellows were the only candidates. The Fellows at large have evidently not had time to realise the important changes introduced by the new charter.

The accounts from the midland districts state that the hay harvest has pretty generally commenced. The crops are good. Turnip sowing is being carried on with great rapidity. The wheats are generally in ear, and looking admirably in every respect though occasional rumours reach us of the appearance of mildew in the l ter sown crops, a result doubtless attributa le to the continued humidity of the atmosphere. We regret to hear that the beans are almost universal y blighted, and exhibiting similar symptoms to the former dis ase in potatoes, which crop, on the other hand, looks unmistakeably well. The fruit prospects for the year are not good.

The Masters of the Law Courts in Dublin have refused to issue writs against members of the late Parliament until after the expiration of forty days from the proclamation dissolving it.

Advices from Valparaiso, Chili, South America, to May 15, state that freights to England were £2 per ton for guano.

CHESS.

TO CORRESPONDENTS.

J P, Lisbon.—They are both under consideration.

A St. *Vito*.—A full account of the meeting in question was given in the *Chess-player's Chronicle* of June

W S T, Leamington.—A private communication has been forwarded.

CHESSER.—In every match by correspondence a fixed time for each party making his move should be agreed on. When this is not done, and a player systematically occupies a fortnight or the s weeks over a single move, his opponent should push on the game as far as it proceeded, and then decline to play with such an antagonist any more.

F W W—The statement is wholly without foundation. For full particulars of what took place we must refer you to the "Chess Tournament," recently published by Bohn, of Covent garden.

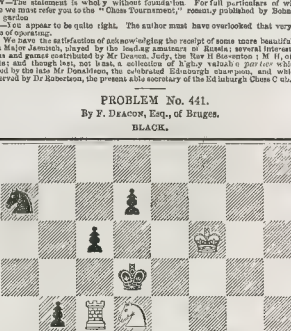
O B P.—Your appear to be quite right. The author must have overlooked that very evident mode of operating.

* * We have the satisfaction of acknowledging the receipt of some more beautiful games from Major Jaenisch, played by the leading amateurs of Russia; several interesting problems and games contributed by Mr Deacon, Judy, the New H ns-ome, M H, of Nalore, India; and though last, not least, a collection of highly valuable *games* which were played by the late Mr Donaldson, the celebrated Edinburgh chess-player, and which war preserved by Dr Robertson, the present able secretary of the Edinburgh Chess Club.

PROBLEM No. 441.

By F. DEACON, Esq., of Bruges.

BLACK.



WHITE.

White to play, and mate in five moves.

EDINBURGH CHESS CLUB.

On Monday last the Edinburgh Chess Club met for the first time in their new Club Room, 73, Princes-street. There was a far larger muster of members than have been congregated for the last twenty years; the strength of the Club having recently received large accessions from the absorption of a society of gentlemen who used to practise the game of chess in the Philosophical Institution in Queen-street, and from a considerable influx of new members. By a most fortunate coincidence, Mr. Staunton chanced to visit Scotland at the very time when efforts were being made by some members of the Edinburgh Club to revive that interest in the game, which for some years had been permitted to flag, and when requested to assist at its first meeting, he most kindly consented.

The proceedings of the evening opened appropriately with a game, in which Mr. Staunton encountered three of the strongest players of the Club (the Rev. T. Gordon, Dr. Robertson, and Mr. Meikle) in consultation, giving them the odds of a Pawn and two moves. Mr. Staunton's skill in giving this description of odds has never been surpassed, and the accuracy and judgment with which he made the necessary defensive moves preliminary to a most subtle and vigorous attack, excited the admiration of all competent judges who witnessed his play on Monday evening. The game was finished in a most spirited manner, and half-past seven till ten o'clock, when its termination was postponed till the next day. Mr. Staunton's antagonist had made a sturdy fight, and although the admirable tactics of the master had succeeded in wresting the attack from them, they still retained the numerical advantage of the Pawn originally given, and had conducted a difficult defence in a manner which did them no discredit.

At ten o'clock the Club marched in procession to the splendid hotel for supper. James Rose, Esq., President of the Club, occupied the chair, and was supported on the right by Mr. Staunton and the Rev. Mr. Gordon. Dr. Robertson, secretary to the Club, officiated as croupier. About thirty gentlemen were present.

After the health of the Queen and other loyal toasts, the president stated that though in this large assemblage he felt himself in the unenviable position of being the oldest member present, yet there was a kind of satisfaction in the position: it was a proud distinction to be able to say that he was the only original member of the Edinburgh Chess Club in the room, and to find himself presiding at a meeting held for the express purpose of reviving the energies of that society of which he had so long been a member. He rejoiced to see so many round the table. True, he had seen meetings of the Club in the olden time attended by nearly double the number, but efforts were now being made in the right direction, and ere long he hoped to see the Club as prosperous as ever. Though few of the members present had had the pleasure and advantage of previously meeting Mr. Staunton, his reputation made him well known to all; all had computed with him over the board, and owed him a debt of gratitude for the intellectual amusement which the study of his games and Chess works had afforded. He begged to welcome Mr. Staunton as a member of the Edinburgh Chess Club, for of course that honour would be conferred on him, and concluded by proposing his health as the best Chess-player in the world. (Cheers.)

Mr. Staunton then rose and said that it had given him very great pleasure to attend this meeting of the Edinburgh Chess Club. He had long desired to know its members, and, indeed, there was no club in the kingdom which he would have preferred to visit on such an occasion as the present. The study of the games of the match between the London and Edinburgh Clubs, and some correspondence which he had had with the late Mr. Donaldson, had early led him to form a very high estimate of the chess capability of that distinguished player. He congratulated the club on the strong muster of members now present. He must, however, warn them that it was a much easier matter to originate a chess club than to keep it going when formed. He could corroborate what the chairman had said regarding the perfect compatibility of a love of the game with the due discharge of the ordinary duties of life. Indeed, he would beg to warn them against an error he had seen exemplified hundreds of times in the case of young players, who, entering with too much ardour into the study of the game, neglected more important duties, and finally either relinquished the practice of chess in disgust, or giving up their whole time to it, became ruined men. He trusted, however, that the advice and example of their president and other old members would, on the one hand, prevent the club from languishing, and, on the other, discontinuance that would deprive to chess which he would so strongly deprecate. He then concluded by again thanking the members of the Edinburgh Chess Club for the kind manner in which they had welcomed him.

The Secretary then proposed that Mr. Staunton should be forthwith elected an honorary member of the club. The proposal was received with acclamation, and unanimously agreed to.

Mr. Staunton begged to assure the meeting that he very highly appreciated the distinction which their unanimous vote had just conferred. He now belonged to some thirty or forty clubs, yet he might say that this, though the last honour of the kind conferred on him, was not the least valued.

The Chairman then rose and begged every member present to drink prosperity to the London Club, out of the cup, the trophy of the match, which had graced the table during supper.

Dr. Donaldson then proposed "the health of the chairman," whom he thanked in the name of the chess-players of Edinburgh, for the trouble he had taken in keeping the club together during its dormant state, and for his exertions in now reanimating it.

Mr. Rose, in return ng thanks, said that it gave him pleasure to see the Edinburgh Chess Club again springing into vigorous life.

Mr. Staunton then proposed "The secretary's health."

Dr. Robertson, in returning thanks, said that it had afforded him much pleasure to be instrumental in reanimating the club.

Various other toasts were then given, among which we may mention, "Mr. Johnston and the members of the (late) Philosophical Institution Club;" "The St. George's Chess Club of London;" "The Glasgow, Liverpool, and other provincial Chess Clubs," &c.

The meeting broke up at a late hour, after spending a very pleasant evening. On the following day, a large assemblage of amateurs took place in the Club-room, to witness the continuation of the contest between Mr. Staunton and the allies. The attack which the former had succeeded in obtaining on the previous evening was carried on with unflagging energy and spirit for about two hours, when the Champion was declared the victor.

Lieut. Christian, of the 31st, now at Clare Castle, completed the arduous task, on Saturday, of walking forty miles in ten hours. The gallant pedestrian had thirty-six minutes to spare. There were but two minutes between the time of walking any of the hours' task during the performance.

THE RIOT AT STOCKPORT.

"THE BISHOP BLAIZE" PUBLIC HOUSE.

ROCK-ROW, FROM CARR-GREEN.

In our Journal of last week we gave a connected narrative of the circumstances and leading incidents of the sanguinary riot at Stockport on Monday and Tuesday week. We now present to our readers a series of Sketches of the principal localities, as illustrations of our last week's narrative; and, on the present occasion, instead of recapitulating the incidents, we give only such supplementary details as may add to the interest of the several Engravings. First is

THE BISHOP BLAIZE PUBLIC-HOUSE.

In the Hillgate, one of the principal thoroughfares in Stockport. The *Manchester Courier* narrative states:—"Sunday evening passed over tranquilly (an unusual thing among the Irish), not one individual was apprehended by the police (a rare occurrence); and here, possibly, the matter might have ended, had not some injudicious people on Monday boasted of the impunity with which the proclamation had been disregarded, and talked loudly of what more was to be done at some future time; when a party of English and Irish met at the Bishop Blaize, in the Hillgate, and words having ensued, they got to blows, more than the original combatants became engaged, and ultimately it assumed the character of a party fight. The Irishmen ran into John-street and Edward-street, where numbers of their countrymen reside, and obtained additional strength, the English exerting themselves to raise supporting forces, and the fight became a most determined one, fearful blows being dealt on both sides. It was fortunately short, for the Irish were beaten and driven home, and so the matter remained for Monday night. The fighting spirit of the Irish would not, however, allow them to suffer a defeat without an attempt to retrieve it, and they said as much during next day. In the evening, consequently, they began to assemble at a few minutes past six o'clock, in Chestergate, a street near to the river Mersey, and in Rock-row, Carr-green, at the back of Chestergate, one of the Irish quarters, not very far from the celebrated viaduct, which crosses Carr-green."

This brings us to the second locality illustrated,

THE COTTAGES, ROCK-ROW, CARR-GREEN,

the scene of the first of the three chief outrages on property. Carr-green is a narrow, steep street, which extends from near the railway viaduct, under Wellington Bridge, and ascending to St. Peter's-square; Chestergate being to the left, on a lower level, and there being between them a communication by means of a flight of steps. Rock-row is the name given to the higher part of Carr-green, and the great majority of the inhabitants are Irish catholics, who work as general labourers, stone-breakers, or at present in harvesting operations. Commencing at the top of Rock-row (on the left side descending the hill), the windows of the first house were smashed by volleys of stones; subsequently the door was broken in, and every article of furniture was taken into the road and demolished. In the next house Michael Moran, the man who died at the station-house, and who had been previously knocked down and severely wounded on the head, was taking shelter on a bed in an upper room, when the mob rushed in and smashed the furniture, &c., and the interior of the house is a wreck. The adjoining house was entered through the lower window, the frame of which was entirely smashed; the door resisted all the attempts to break it

INTERIOR OF THE ROMAN CATHOLIC CHAPEL AT EDGELEY.

THE ROMAN CATHOLIC CHAPEL OF SAINTS PHILIP AND JAMES, EDGELEY

THE RIOT AT STOCKPORT.

ST. PETER'S SCHOOLS, AND ALDERMAN GRAHAM'S HOUSE.

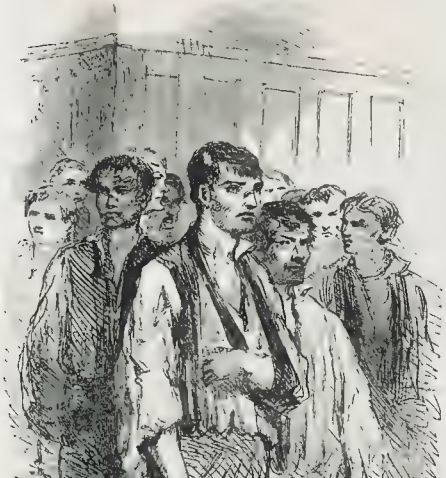
open; but it is almost covered with deep indentations, caused by a hammer-head, or some other iron instrument.

All the furniture was taken out of the next house and destroyed. Michael Tully, a widower, with two sons and two daughters, were in an adjoining house with some of their neighbours. After the windows and doors had been smashed, Tully was seized and dragged into the street; he escaped severe injury, as did also his children, but his furniture was utterly destroyed. Opposite is a small hovel, of two rooms, in which were a woman and her four children, with two or three neighbours. After the windows had been smashed, some of the mob scrambled upon the roof, which they very nearly stripped off—the furniture they took out and broke—and some man made an unsuccessful attempt to set fire to the wood-work in the lower storey. The inmates escaped uninjured.

In Jacob's Ladder-yard, at the back of the houses facing Carr-green, bricks were taken out of the walls to enable the rioters to get into the houses, but others, more eager for destruction, climbed the roof, which they smashed in, as also the ceiling underneath. In one house, a man and his wife, with their infant child, were in bed, and were covered by the rubbish and slates which fell; but as soon as the mob succeeded in getting into the room, the man jumped out of the window, with his child in his arms, and then getting through the lower window, he contrived to get to the basement storey fronting Carr-green. All the furniture throughout the building was destroyed. After the mob had retired, the wife was got out of the wreck of the upper rooms, nearly dead with fright and suffocation.

ST. PETER'S SCHOOLS, &c.

Mr. Cheetham, who was an eye-witness of the riot for more than an hour, thus describes the scene at St. Peter's schools:—"As is the case in all street disturbances, the first breach of the peace was committed by boys, who threw stones at some ten or twelve young men who were passing along the bottom of Lord-street, into which Rock-row runs at the upper end, as it does to Carr-green at the lower. They were chased by the young men, and ran to the end of the turn into the row, on attaining which they gave a signal that brought up quickly a number of men, who are said to have been in ambush about the middle of the row, and in their turn the young men fled. Not satisfied with having made their antagonists run, the Irish proceeded to attack the house of Alderman Graham, a well-known Protestant, which stands in Lord-street, directly opposite the end of the row; they next attacked the Protestant church of St. Peter, and its schools, which stood opposite to Alderman Graham's. All this time there was a continued yelling and screaming, and about seven o'clock the blood of the Irish being tolerably warmed, they had armed themselves with the weapons they could lay hold upon readiest—pokers, soldering irons, sticks, pieces of chairs, sickles, scythes, and other barbarous instruments, and were ready for conflict with any power that might present themselves. The scythes and sickles seem to corroborate the account given by some of the men subsequently apprehended, that they had only just come to England, that being so, they were over here for the harvest, and these were their implements of labour.



PRISONERS BROUGHT INTO COURT.

THE ROMAN CATHOLIC CHAPEL OF SAINTS PHILIP AND JAMES, EDGELEY.

This Chapel is situate in Chapel-street, a wide road in Edgeley, a suburb of Stockport, beyond the railway, and near the Stockport end of the viaduct. The Chapel is a building calculated to accommodate about 1200 or 1300 people, and stands on an eminence above the railway, from which it can be seen. It is of brick, with a stone front, of a classic order in architecture, above which rises a round brick tower containing a bell. It was built at the commencement of the present century, and was opened on the 1st of May, 1803. Close to it, on the north side, is the priest's house, communicating with it internally by means of vestries which open close upon the altar; on the south are the schools, and from the chapel on the one hand, and the schools on the other, there extends a brick wall which encloses a burial-ground and a few square yards of land. The front of the chapel and schools is even with the street, but the house stands back several yards. The present incumbent is the Rev. Randolph Frith, who has been a resident of Stockport for eight years. From a person connected with the chapel and residents in the neighbourhood, has been gathered the following account of the attack upon it and the adjoining house. About a quarter before nine o'clock the crowd came up, chiefly boys and young men, armed with pick-axes, hatchets, hammers, crowbars, &c., and they began by throwing stones at the two parlour windows of the priest's house. They then broke the chapel windows with hatchets, pickaxes, and sledge-hammers, and forced the front door, then rushing up to the iron altar rails, broke them with axes and sledge-hammers, and destroyed the altar and tabernacle; females, it is said, being as eager and active in the work of destruction as males. Fortunately, on the very commencement of the attack, Mr. Frith had removed the silver plate used in the services of the chapel to a place of safety. The rioters destroyed every cross and crucifix, picture, image, statue, candlestick, &c. with which the chapel was adorned. They tore away the altar-screen, and broke into small fragments two plaster figures flanking the altar. The rioters armed, some with butchers cleavers, and others the legs and backs of chairs which had been broken up in the priest's house, smashed up the benches or seats on the floor of the chapel, and in the gallery. The large organ, valued at £430, was speedily demolished; as were all the chapel windows, and even the frames. Some of the mob then produced lucifer matches, and various attempts were made to set fire to both the chapel and the house. In the chapel the strong draughts of air though the window apertures extinguished the flames as soon as kindled; and at length all sorts of furniture, wood, books, papers, &c. were carried out into the road, in Chapel-street, in front of the chapel and house, and there destroyed. Into the priest's house two bodies of rioters entered—one by the front door after beating its panels in with axes, &c. and the other through the doors communicating from the chapel and the vestries. Here they destroyed or burnt all the books, clothes, furniture, &c., or otherwise destroyed them; and were thus occupied an hour and a quarter, until the alarm from the outside that the soldiers were coming.

A door from the end gallery leads up to the bell-turret or belfry, which is over the organ; and when the attack on the priest's house became fierce, the Rev. R. Frith, and four young men, entered the chapel from the vestries, and concealed themselves in the bell-turret, the door of which was locked after them by one of the attendants. Here they remained during the wrecking of both the house and chapel; till attempts being made to set both on fire, the priest and his friends got upon the chapel roof, traversing it on the side next the house, descending upon the house roof, and through a window into the house, and then through the yard and over a wall into the next garden.

ST. MICHAEL'S ROMAN CATHOLIC CHAPEL, PARK-STREET.

It is not possible to ascertain whether the mob that attacked this place consisted of those who had wrecked the cottages in Rock-row, of the mob from the chapel at Edgley, or both these combined, or of a separate and distinct body. This chapel is a building at the corner of Park-street and Merchant's-court, Queen-street, which was formerly the Stockport theatre; but rather more than a year ago it was purchased and converted into a Roman Catholic chapel, the altar occupying the place of the stage: the chapel accommodated about 500 persons.

EXTERIOR OF ST. MICHAEL'S ROMAN CATHOLIC CHAPEL.

The mob first appeared behind the chapel a little before eleven o'clock, coming apparently from the direction of Petty's Carr and Chestergate. Some

INTERIOR OF ST. MICHAEL'S ROMAN CATHOLIC CHAPEL.

of them immediately commenced smashing the large gothic window behind the altar; another party went round and attacked the front door, in Merchant's-court, Queen-street; a third party simultaneously attacked the door in Parker-street, which they smashed in a very short time, and thus entered. Ascending to the altar, they broke three candlesticks, all the candlesticks, figures of the Saviour, of St. Patrick, St. Joseph, and the Virgin, together with every portion of the vestry fittings. All the seats were pulled up and broken, the fragments were thrown into the street, along with the wreck from the altar. The organ was utterly destroyed, the seats pulled up, and all the front of the building and the four bare sides of the altar. The vestry was also sacked, and many of the vestments, &c., destroyed or stolen. A very valuable chalice, with other plate belonging to the place, said to be worth £700, was fortunately in the house of the priest and was saved.

Some of the prisoners afterwards brought before the magistrates were apprehended in the chapel. Ineffectual attempts were made to force open a large iron safe, supposed to contain articles of silver used in the service of the chapel: it was removed to the police office for safe keeping.

THE PRISONERS.

The following is a list of the prisoners:—Thomas Briany, Walter Welch, Michael Shottery, James Haggerty, Timothy Finnigan, James Welch, Owen Doyle, John Blyth, Roger M'Dermot, Michael Cunyan, Thomas Finney, James Harrely, Patrick O'Harr, Patrick Curley, Michael M'Dermot, Thomas Kidar, James Finn, Patrick Lochery, Thomas Morris, Henry Rodgers, Thomas Kidar, James Finn, Thomas Murphy, Matthew Mulagan, James Paton, John Brannan, Thomas Owen, John M'Nally, Patrick Kelly, Michael Flynn, George Pell, Samuel Morris, Peter Rowbottom, William Bittner, Joseph Royle, Michael Burke, James Fenn, George Rowbottom, William Bittner, Joseph Beard, William Newton, George Parry, John Watson, Mark Gleave, and Samuel Preston.

This Illustration shows a group of the prisoners brought into the Court-house: they are muscular, well-built men, with uncombed hair, unwashed, and unshaven; and most of them bearing wounds received in the affray.

AN INVESTIGATION INTO THIS LAMENTABLE AFFAIR is being conducted at present by the local magistrates, in the Court-House, Stockport.

The inquest on the body of the young Irishman who was killed, and whose name was Michael Moran, was commenced on Thursday week, at the Stockport Infirmary, before Mr. Charles Heginbotham, the coroner, in addition to which he is his reason that he proposed at first merely to take evidence as to the identity of the deceased man's body and the cause of his death; and then to adjourn the inquiry for a sufficient time to allow excitement to subside, in order that they might more calmly, and perhaps with better means of information than they now possessed, proceed with the investigation of the case.

James Hannigan, of Barnforth-street, Stockport, was the first witness sworn.—He said: I am a grinder in the card room of a cotton mill. The body of the deceased is that of Michael Moran, my wife's brother. I live with us, and had done so for the last three weeks. He was a single man, a labourer, and 23 years of age, on a visit to us, but not in search of work. He and myself left home about half-past seven o'clock on Tuesday morning last, and went back to Mr. William Riley, in Rock-row (the house first attacked and gutted), who was deceased's uncle. He wished to see if he could find employment for deceased with a farmer. About eight o'clock we were returning home up Lord-street, when a great mob came down Sandy Brow and Lord-street. They were throwing stones in all directions. I ran away, but missed Moran, and on looking back saw him stretched upon the ground opposite Barlow's beerhouse. I went back, and with the assistance of another man, picked him up. Blood was flowing from a wound on the right side of his head and out of his left ear. I do not know the man who helped me to pick him up. I assisted him to walk, two lads helping, being unable to get him admitted to any house in Rock-row. I placed him in a chair at his uncle's house, and went for Dr. Sleddon, who accompanied me to Riley's to see Moran and attend to the wound. I went down to the door to Riley's house at his request for a plaster. When I returned, a mob came to Riley's door, and there was a riot, and I had no time to remove the hair and apply the plaster. The rioters, immediately I had taken him up stairs to bed, broke the window, and with the assistance of another man, picked him up. Blood was flowing from a wound on the right side of his head and out of his left ear. I do not know the man who helped me to pick him up. I assisted him to bed, two lads helping, being unable to get him admitted to any house in Rock-row. I placed him in a chair at his uncle's house, and went for Dr. Sleddon, who accompanied me to Riley's to see Moran and attend to the wound. I went down to the door at Riley's house at his request for a plaster. When I returned, a mob came to Riley's door, and there was a riot, and I had no time to remove the hair and apply the plaster. The rioters, immediately I had taken him up stairs

THE THEATRES.

HER MAJESTY'S

On Saturday night, selections from Rossini's "Semiramide" and Gnecco's "La Prova d'un Opera Seria," with the charming ballet "Zélie," were the entertainments.

On Tuesday, De Bassini, the new barytone, completely confirmed his high name in Italy and Germany, as a lyric tragedian, by a magnificent delineation of the part of *Enrico, Duke of Cacovesus*, in Donizetti's opera, "Maria di Rohan." His reading of the character is entirely his own, and he developed points as novel as they were striking in the last act. In the earlier scenes, the frank and chivalrous nature of the confiding husband and sincere friend was most naturally indicated. His handsome person and gallant bearing were physical advantages, no doubt; but his intellectual appreciation of the text and sense of the poet and composer was unmistakable. It is in the last scene of that character in general of the terrible situation of a betrayed husband, and the mortal agonies of *De Bassini* were displayed in most powerful yet unexaggerated and lavish rent manner with which he began to read the letter of Chalais (from which the Clarina Minister had secret) and the assumed astonishment with which he recognised in the accompanying portrait the features of his own wife, were in the utmost, in the patient, exhibit breaking his gaze, and in the awful manoeuvre, the alternations from profound grief to intense anger were met skilfully depicted. In the passage of the last scene, commencing with the most bitter irony, the gradual return of its deprived sentiment to his wife was most affecting, but the fury who broke forth when *Maria* refers to the portrait from her wounded arm, a word received in raising the duel with *Chalais*, was as appalling as the head bursts in vocal. Nothing could surpass his fierce gaze at the secret door after the clock has struck, and in the concluding trio, in which he places the pistols in the hands of *Chalais*, the paroxysms of jealousy, rage, and revenge, were overwhelming. Bassini is a great artist; his voice, although not equal to his best days, is still unsurpassed in beauty in the upper notes. Ida Bertrand's *Armanda* was artistically sung, but she lacks expression. Calzaretti's music is carefully and conscientiously done, but the *Maria* Malatesta is a large woman by nature, and her approach to a fainting fit is not a delicate one. Her *Count* is not predecessor. Madame Floresca was originally and adapted for the character, and as the latter could a number of established, the possibility of taking away from her is incomprehensible.

On Thursday night Bellini's "Puritani" was revived, Madame de Lagrange appearing as *Elvira*, Gardoni as *Arturo*, De Bassini as *Riccardo*, and Lablache as *Giorgio*. The arrival of the trio created a [illegible] Signor Lablache, and when on [illegible] was accompanied by the [illegible] Queen's box, the [illegible] were [illegible] Lablache's *Leporello*, will, indeed, be a rare treat.

ROYAL ITALIAN OPERA.

Donizetti's "Elisir d'Amore," with Mdme. Bosio, Signori Galvani, Bartolini, and Polonini, as the second act of Meyerbeer's "Roberto il Diavolo" (the covers and [illegible] scenes), with Mdme Jaimme, Mdlle. Robert, Signor Tamberlik, Signor Stigelli, and Herr Formes, formed Saturday night's programme. On Tuesday Rossini's "Otello," with Mdme. Grisi, Galvani, Polonini, Tagliafico, Ronconi, and Tamberlik, and the first act of "Il Barbiere," with Mdme. Castellan, Signori Mario Tagliafico, Soldi, Marini, and Ronconi, were the entertainments. On Thursday Meyerbeer's "Prophète," with Grisi, Castellan, Mario, Stigelli, Polonini, Tagliafico, Ronconi, Meji, Soldi, and Herr Formes, was presented for the fourth time. Spohr's "Faust" is announced for next Tuesday; and Monday's concert, after two adjournments, has been postponed *sine die*.

PRINCESS'.

On Wednesday a new Shaksperian revival was produced at this house, with new costumes and scenery, and all that attention to elegance for which the management has well earned the credit. The comedy of "Much ado about nothing," as now presented, is a performance likely to be talked about—and deservedly and smoothly executed throughout as to afford unequivocal pleasure to a crowded audience. The scenery is accordingly beautiful; and the groupings are in good taste, most effective, costly, and showy to numerous *employés*. The part of *Beatrice* was very finely acted by Mrs. C. Kean, with a brilliancy of humour and a vivacity of temper, with which [illegible] was delivered. The artistic completeness of the [illegible] of the [illegible] traits which are apt to escape the observation of an, but the critic, and which yet operate powerfully, though unconsciously, on the general audience, and the ripe experience, which brought out every [illegible] into proper relief—these attributes make Mrs. Kean's impersonation of *Beatrice* an illustrious study. Mr. Leigh Murray, the young candidate for professional honours may learn a life-long lesson. Mr. Leigh Murray's [illegible] is marked by care and originality; well-studied, and true to nature, yet with several novel and salient points that increase the interest of the character. One bit of by-play pleased us much—in the scene where the prince provokes him to "kill *Claudio*"—an expressive pause before the declaration of love, a surprised start at the lady's hand, and then a notion of pressing it to his lips; minute but artistic things which were well conceived and delightfully executed. The part of *Benedick* was interpreted by Mr. Harley with all that affection of wit and humour which has ever pertained to his peculiar and racy style. We regret that the heat of the weather prevented him from having the benefit of a benefit as his great and long-tried merits would otherwise have doubtless commanded.

OLYMPIC.

"The Bag of Gold," produced last week and attributed to Mr. Ratty, is, we are informed, the production of Dr. Hillyard, of Chilham, in Kent.

VAUXHALL GARDENS.—The following distinguished personages have visited the Gardens during the week:—His Royal Highness Said Pasha and suite, the Duchess of Montrose and suite, Duke of Athol, the Duke of Leeds, Lord Adolphus Fitzclarence, Lord Ashburton, Lord George Lennox, Lord Newport, Lord Chelsea, Lord de Ros, the Hanoverian [illegible] ambassador, lady, at [illegible] party, the Sardinian Ambassador and suite, Baron Rothschild, Baron Rothschild, Sir Francis Baring, Sir Henry Moux, Sir Henry Webb, &c. &c.

ST. MARTIN'S LE GRAND SAVINGS-BANK.

The increase in the sums invested during the year was £21,711, and in the number of accounts, 1008.

CONSOLIDATED LONDON.—(See page 11, No. 504.)—We are requested by Mr. Charles Fox etc. to state that a great Conservatory at Syon was entirely designed by him, and executed under his directions, as the Duke of Northumberland's architect; Mr. Forrest being at the same his first [illegible] assistant, and consulted upon such points as properly belonged to the department.

CHESS.—MATCH BY MAIL.—An interesting [illegible] of match by correspondence between gentlemen of Manchester and Liverpool has been [illegible] in which the victory of the latter is considered [illegible] of Nottingham, in mode-rate on a large scale, worked in 1851. Some idea of its magnitude may be formed when we state that it occupies a space of nine square yards. It is divided into two portions; the northernmost one being 8 feet 4 inches by 8 feet, and is appropriated to the Liverpool players. The other portion is 6 feet 6 inches, which remains the remainder of the county. It is [illegible] which is [illegible] to [illegible] and is drawn on a scale [illegible] to the [illegible] the workman employed by Mr. Parry, of Anthony Piper, of Lansdown-se-Mortimer, and also of Riverton Park. Mrs Eyre died in 1632, the very year when the map in question bears date. Her husband died in 1658.

The King of the Belgians' return to his capital is fixed for Sunday next, the 11th instant. The Duke de Brabant and the Count de Flanders, attended by Colonel de Moerkerke, who attends his Majesty on his visits to that country, have been visiting the public entertainments in Brussels during the week.

On Wednesday morning Westminster Hall was closed against the public, on the opening of the Courts of Law. Several ladies and gentlemen endeavoured to gain admittance, and were disappointed at the public why it was closed, but no satisfactory answer could be obtained.

Mr. Campbell, of Monzie, one of the candidates for Edinburgh, in the course of his canvass called on an elector, who shall be nameless. On Mr. Campbell asking for his support at the approaching day of election, he replied, "I will vote for the d—— before you. Still he (Mr Campbell) did not lose his temper, but took off his hat and said, "But, sir, in the event of your friend not coming to the front, I hope you will vote for me."

On Monday, Michael and Peter Sweeny, brothers, suffered the extreme penalty of the law in front of the main gate of Cupar, for the murder of Margaret Maxwell, in the balmy of Hilton of Forthar, in the parish of Kettle, on the evening of Sunday, 15th February last.

The value of watches imported in the month ended the 5th ult., was £19,248, which is an increase on the like period of last year, when the value was £11,151.

By a Parliamentary paper printed on Wednesday it is shown that on the several establishments of the East India Company in England there are 814 persons, and the salaries and allowances amount to £134,817 a year.

A great number of bears and wolves have lately infested the forest of Bethmal, in the Arriège. The Pre cet has ordered that a general *battue* for the destruction of these animals take place in the department of the Marne at Loire there are also a great number of wolves. In the communes of Andrézé, a few days ago, they devoured two sheep in open day.

A thunder-storm broke over the small town of Espalle, in the Pyrenees, a few days since, when the master blacksmith and his assistant were at work. He observed a flame like cross of lightning [illegible] between them, and passed through the inside. Two men who were seated in a neighbouring house were killed, one of them by the lightning severing his head, and the other was thrown down the staircase and killed by the fall. A third man was thrown down, and for some time it was feared that he was dead, but, after a time, he was restored.

The vessel Stratford, lately released by the Turkish Government, has arrived at Liverpool with her steamer *Avenger*.

The Dowager Viscountess L.L.D. has been conferred by the Provost and Board of Fellows of Trinity College, Dublin, upon his Excellency the Earl of Eglinton.

NAVAL AND MILITARY INTELLIGENCE.

THE PAYING OF THE ROYAL NAVY.—On Monday an act (15 and 16 Vict., c. 46) passed in the late session on naval pay was printed. The object of the act is to repeal, from 1st Oct. next, a section in the 11th Geo. 4, regulating the payment of wages and pay to officers and seamen of the Royal navy. Such payments are now to be made when granted by Parliament, without having six months in arrear, under direction of the Admiralty. By this act monthly payments may be made.

MARRIED SOLDIERS.—A meeting took place a few days ago, at Willis's Rooms, to promote the erection of improved dwellings amongst the married soldiers. His Royal Highness Prince Albert has given the project his warmest and most influential support, and a few officers of the Guards, aided by his and the noble Lord's assistance, in Liberal donations, amounting to [illegible] have been able to commence operations which may hereafter be extended. The scheme is to be entirely self-supporting, and, it is hoped, may be so remunerative as to induce capitalists hereafter to put back in a similar praiseworthy object. Funds to the amount of about £1,000 have been already subscribed for, and the names of his Royal Highness the Prince Consort, Prince Edward of Saxe Weimar, Lords Palmerston, Brougham, Lansdowne, Clarendon, and others, afford some proof of public opinion upon a question that admits the moral and social condition of a class whose welfare the public cannot fail to take concern in. The meeting was well attended, and a liberal feeling of interest, and approval of the object, together with a vote of thanks to Colonel Augustus Fitzgerald (Grenadier Guards), as chairman, were passed.

ARMY WORKS.—It is announced that a *depôt* for the accommodation of invalid soldiers is to be formed at Weedon; and that the staff now at Chatham will be removed to that place. If this plan is carried into effect, much delay and inconvenience will be spared the sick soldier.

INSPECTION OF THE WOOLWICH DIVISION OF ROYAL MARINES.—Lieutenant-General Sir Thomas Brotherton, K.C.B., F.C.H., attended by Major Wesley, Assistant Adjutant-General of the corps, inspected the Woolwich division on Monday last. The General came mounted [illegible] Commandant Mercer on the state of the division in all its branches, particularly the naval gunnery exercise. The detachment at Deptford was subsequently seen by the above officers.

GRAND REVIEW AT WOOLWICH.—On Friday week the whole of the troops in the garrison off duty were reviewed at Woolwich, in the presence of Lord Hardinge, Master-General of the Ordnance, the Duke of Cambridge, Sir Henry D. Ross, Lord Frederick Fitzclarence, &c.

Rear-Admiral the Duke of Northumberland, K.G., First Lord of the Admiralty, accompanied by the Lords [illegible] Captain the Hon. F. Pelham, R.N., have [illegible] officers of the [illegible] on Monday evening, and went afterwards onboard in the Admiralty steam-yacht *Black Eagle*, Master-Commander Petley, for the Channel Islands.

His Highness Yussuf Pasha, accompanied by M. Zohliat, Ottoman Consul-General; Captain Claremont, of the Canadian Rifles, and suite, left Portland Hotel, Southsea, on Sunday afternoon, in open carriages, and embarked at the Victoria Pier, Portsmouth, in the steam-yacht in the Port Admiral's barge, which conveyed him to the Egyptian steam-yacht *Constantinople*, then lying in the harbour, on his boarding which the *Victory* hoisted the Turkish flag at her fore, and saluted it with twenty-one guns. On Monday his Highness, under the pleasure of Captain Henderson, C.B., of the *Bienfaisant*, took a cruise in the Solent as far as the Southampton-water, with the view of giving Captain Heuder on a good opportunity of ascertaining her manœuvrings in the engine department, the yacht having professedly come to Southampton to obtain a refit in that part-ener.

MONETARY TRANSACTIONS FOR THE WEEK.

(From our City Correspondent.)

From its having been officially announced that the surplus revenue of the country now in the hands of the Commissioners for the Reduction of the National Debt—amounting to £548,112 9s. 6d.—will be applied during the present quarter in buying up Exchequer-bills instead of Consols, as hitherto, the English Stock Exchange has been in a very inactive state, and prices have tended downwards, with numerous fluctuations. Many parties are in doubt the policy of the measure just referred to; but it must be apparent to all that it will benefit the Consol-holder in a severe loss in purchasing Consols. It is quite true that the Chancellor of the Exchequer has the intention of reducing the interest upon the Three per Cents, which, or course, may be paid off at par; but, on the other hand, we may fairly conclude that the large influx and stock of the precious metals, and the vast amount of capital, will keep Consols at a very high price during the whole of the present year; that is to say, if there should be no large drain upon our metallic resources to pay for corn.

The dividends are now in course of payment at the Bank. They will release nearly £7,000,000 sterling, which, of course, will tend to make money more plentiful than ever. On Monday Consols for Account were done at 99¾ to ⅞, on Tuesday the Three per Cents. were marked 100⅜ ex div.; the Three per Cents Reduced, 101¼; and the New Three-and-a-Quarter per Cents, 104. Bank Stock has continued very firm, at 213½ to 214. Long Annuities have been done at 6 11-16 to 6 13-16 ex div. Exchequer Bills, on Thursday, were 68s. to 70s. pm. £2100 of Bank Stock for sale.

Since we last wrote, about 60,000 sovereigns have been shipped to Australia in return for the gold lately received here; but we have had an import of 789,000 dollars from New York, and 300,000 dollars from South America. The supply of gold and silver in the Bank exceeds the note circulation by £6,706,000, from the last returns, it appears that the stock has increased since the period in 1851, by upwards of £1,000,000! The exchanges are still favourable, gold being 0/23 per cent. dearer in London than in Paris, 0/16 dearer than at Hamburgh, and 0/32 dearer than at New York.

Notwithstanding that the actual business doing in the Foreign House has been comparatively small, prices have ruled steady. On Thursday Brazilian Five per Cents were 101; Ditto, Rothschild's, 101¼; Equador Bonds, 4½; Granada, Deferred, 24; Peruvian Five per Cents, 94½; Venezuela, Deferred, 17¾; and Dutch Four per Cents, 96¾. Bargains have been reported in Chilian Six per Cents, 103½ ex div.; Ditto, Committee's Certificates, 3 3/4 3/4 per Cent.; and Venezuela Three-and-a-Half per Cents, 81¼ ex div.; French Four-and-a-Half per Cent Rentes, 102f 25c.; Ditto, Three per Cents, 71f. (exchange in both cases, 25f. to the £). Spanish Actives, 1824 and 1825, ex overdue Coupons, 6; Mexican New Threes per Cents, 20¾ ⅜; Russian Five per Cents, 118; Ditto, Four-and-a-Half per Cents, 102¾ ex div.; Spanish Old Threes per Cents, 43; Ditto, New Deferred Threes per Cents, 32¾ ex div. ditto, Committee's Certificates, 3 3/4 ¾ per Cent.; and Venezuela Three-and-a-Half per Cents, 81¼.

The Railway Stock Bank Shares have been by no means uneasy, and, in some instances, prices have again advanced. Australasia have been done at 54¼; British North American, 61; Commercial of London, 26¾; London Joint Stock, 18¼; London and Westminster, 3¾; Oriental, 37¾; and Union of London, 17.

Railway Shares have been less active, as follows:—Commercial, 50¼ Eastern Counties, 5¼; Ditto, New, Lord B., 1¼; Ditto, Scrip, 5/8; Great Southern, 74¾; Ditto, Six per Cent. Stock, 144; Great Western, 69¾; Lancashire and Yorkshire, 79¾; South Eastern and Dover, 29¾; South Western, 85; North Staffordshire, 9¾; Ditto, Preferential, 7¾; South Yorkshire and River Dun, 21¼; Ditto, Fifty per Cent. Stock, 49; West Cornwall, 6¾; York, Newcastle, and Berwick, 19¾; Ditto, New, 3¾; Ditto, Scrip, 1¼; Boulogne and Amiens, 7¾; Dutch Rhenish, 4¼; Ditto, Certificates, 4¼; Great Luxembourg, 4¼; Namur and Liege, 7¼; Northern of France, 24¾; Paris and Lyons, 17¾; Paris and Orleans, 59; Paris and Rouen, 33½; Paris and Strasbourg, 24¾; Rouen and Havre, 10½; Sambre and Meuse, 7¼; Tours and Nantes, 17¼; West Flanders, 5¼; and Western of France, 9¾.

Mining shares have been pretty steadily supported. The following Agua Iris, Alpha Cobre, 1¼; Australasian, 4¼; Australian Investment, 4¾; Australian Mining, 1¼; Bolanos, 1¼; Brazilian, 1¼; British American Cattle, 1¼; British North American, 1¼; Caledonian Copper Mine, 1¼; Canada Mining, 4¼; Liberty, 4¼; New Granada, 1¼; Nouveau Monde, 1¼; Nova Scotia, 1¼; Ophir, 1¼; Rhymney, 1¼; Scottish Australian, 1¼; Tharsis, 1¼; Tintic, 1¼; Union Australian, 1¼; Van Diemen's Land, 1¼; Wheal Buller, 1¼; Wheal Crebor, 1¼; Wheal Seton, 1¼; and Wheal Trelawney, 1¼.

FOREIGN AND COLONIAL MARKET.—The Stock Market has been steady to-day, and prices are well supported. The Three per Cents are also marked higher. The Three per Cents Reduced, 101 to ⅝, and the New Three-and-a-Quarter per Cents, 104. Bank Stock, 213. Indian Five per Cents, 101; Dutch Two-and-a-Half per Cents, 58¾; Dutch Four per Cents, 96¾; Danish Five per Cents, 106¾; and Buenos Ayres, 78¾. Railway Shares are tolerably firm.

THE MARKETS.

CORN EXCHANGE, Friday.—The present week is the arrival of English wheat and to-day [illegible] quarters. By last week [illegible] quarters and [illegible] quarters. Foreign [illegible] quarters. Barley [illegible] quarters. Oats [illegible] quarters. Beans [illegible] quarters. Peas [illegible] quarters. Flour [illegible] sacks. Owing to the [illegible] and Monday's [illegible] the supply of wheat [illegible] was moderate [illegible] the week [illegible] the [illegible]

NEW BOOKS, &c.

To be had at all the Libraries.

London, ROBERT COCKS and Co, New Burlington-street; and of all musicsellers, booksellers, and newsvendors.

MUSIC.—To Schools and Families in and near London.—A PROFESSOR, who has studied under the first Masters, has Schools and an hour, to spare, for TEACHING the PIANOFORTE. The first references as to ability given. Terms moderate. Address R. A., Fleet-office, Judd-street, Russell-square.

HERR KŒNIG'S CORNETS à PISTONS, Price £5 5s each.—JULLIEN and CO have just received a very large quantity of the very best CORNETS à PISTONS, by Herren Adolphe and Courtois, of Paris, the whole of which have been examined and approved by Herr Kœnig; also a large assortment of every description of military and musical instruments, at the lowest prices. Lists of prices sent on application to Jullien and Co, 214, Regent-street.

NEW PERFECTED FLUTE. By R. S. PRATTEN, First Flute of the Royal Italian Opera, Philharmonic, &c. These instruments are superbly made, and of perfect intonation, with the most accurate fingering. No one ever played upon with the most delicate piano, both of which are easily produced, and are fingered exactly like the old eight-keyed flute. Prices, £12 12s, £17 17s, £23 2s. Manufactured by S HUDSON (late foreman to Mr Siccama), 3, Rathbone-place, Oxford-street.

WANTED.—Superior SELF-ACTING and SELF-REGISTERING MUSICAL INSTRUMENTS of every description. Persons wishing to dispose of a good Instrument or Instruments of any description, must forward particulars, with declarers of the same, to CRAMER, 38, Clipston-street, Portland-place.

TOLKIEN'S 25-GUINEA ROYAL MINUTO PIANOFORTES, nearly 7 octaves, C G fall, metallic plate, with all late improvements, in mahogany, rose, maple, walnut, or satinwood. The great peculiarity and worth of the new Pianos is that they will stand any climate without injuring the delicacy of their original beautiful tone.—TOLKIEN, manufacturer, 27, 28, and 29, King William-street, London-bridge. Drawings post free.

PIANOFORTES at Manufacturing Prices.—Messrs HOLDERNESSE and CO, 444, New Oxford-street, London, beg to inform their friends and the public that they have reduced the price of their Piccolo Pianofortes, in rosewood, mahogany, or walnut cases, to 25 guineas. Also their Pianofortes in Semiramis are 6½ octaves (C to A) in compass, combine all the latest improvements, are of elegant construction, and unsurpassed for quality of tone, and finished with the same care and attention that has hitherto distinguished their manufactures. Warranted for three years, and sent carriage free to any part of the country of secondhand by Broadwood, Collard, Erard, and other makers, from £10, and double and single-action Harps by Erard. Book of Harp Music, descriptive of musical instrument tuned, repaired, and taken in exchange.

JENNENS' AND BETTRIDGE'S PAPIER MACHE WORKS and SHOW ROOMS, Halkin-street West, Belgrave-square, London, and Coventry. Manufacturers of every article manufactured in Papier Mâché. Jennens and Bettridge had the honour of receiving the only Medal awarded to this manufacture by the Jurors of the Great Exhibition.

RIBBONS for TRIMMING DRESSES, &c.—An immense variety of New Trimming Ribbons have been received at REGENT HOUSE (ALLISON and Co), where they exhibit every shade in combination of colour in dress may be matched in these fashionable articles. The assortment of Ribbons at all Nouveautés Saloon, Neck-ties, Cuffs, &c, is admitted to be without exception, the largest in London.—Regent House (ALLISON and Co.), 246, Regent-street.

ELEGANT SUMMER DRESSES.—A very large assortment may be seen at REGENT HOUSE (ALLISON and Co), Regent-street, of the newest and most fashionable articles have recently been received. Handsome Flounced Muslin Dresses, made and trimmed in the most novel and elegant style. A large quantity of Chintz Organdie Muslins, much below the regular prices. Mading Shirts from 10s 6d to 21s. Dress Caps from 6s 6d upwards. A great variety of light printed Muslins, at 8½d a yard and upwards, and one lot for any Lady for ordinary wear. Fancy Barege Muslins in large assortment, under the regular prices: and an immense variety of other fashionable articles.—Regent House (ALLISON and Co), 246, Regent-street.

THE EARLY PROROGATION of PARLIAMENT.—REWELL and CO respectfully inform the nobility and gentry of town and country, that they have determined to sell off all their immense Summer Stock of FANCY GOODS, comprising a rich and costly assortment of Silks, Grenadines, Barèges, Muslins, Barèges, Foulards, and all the distinguished novelties for ladies; Made-up Dresses, and adapted for Home and Continental wear. Shawls, Mantles, Lace, and Ribbons The early termination of the Summer Season, occasioned by the dissolution of Parliament, has induced Rewell and Co to make a great sacrifice in the prices at which their Goods are re-marked, and will be submitted this and following weeks. Rewell and Co would specially invite the nobility to their Reception House before they leave town.—44, 45, and 46, Old Compton-street, 46, 47, and 48, Dean-street, Soho.

GREAT NOVELTY in PARASOLS.—W and J. SANGSTER beg to call the attention of ladies to their CHINA CRAPE PARASOLS, embroidered to their order in Canton, which for elegance and durability of silk are unequalled by any other fancy article. These Parasols are peculiarly adapted for horticultural and other purposes, and the ladies's toilette is so much studied. W and J. Sangster, 140, Regent-street; 94, Fleet-street; 75, Cornhill; and 10, Royal Exchange.

Established in 1778.

F. G. FINKISON, Actuary.

C. DOUGLAS SINGER, Secretary.

CLARENDON, NEW YORK.—This Hotel was opened on the 1st of May, 1852, and although not completed in October last, having been two years building. The proprietor has attended personally to the construction and arrangements, and he trusts that it will not be considered vain if he does not hesitate to say that its equal for comfort and luxury cannot be found.

The Hotel, being designed for families, is divided into suites of apartments, consisting of parlours, bed-rooms, with bath-rooms, dressing-rooms, and private entrances, and the whole of the rooms are provided with bath-rooms and water-closets. The furniture, which is entirely new for the Hotel, surpasses anything ever put into a public-house, and is of the most elaborate and costly carved rosewood, and the best and first class manufacture in the States. The object of the proprietor has been to establish a hotel for the better accommodation of families, and to meet the wishes of the nobility and gentry who visit the same time a retired and private establishment.

The whole establishment contains over 300 rooms, and has every modern improvement in use. Gas has been introduced for lighting, and private residences of this city.

C C PUTNAM, Proprietor.

March 30th, 1852.

ALLSOPP'S PALE ALE.—In consequence of the reported adulteration of Bitter Beer. Messrs. SAMUEL ALLSOPP and SONS have received numerous testimonial Testimonials to the purity, quality, and salutary effect of their Ales. They consider it due to the Medical Profession, who have so long recommended Allsopp's Pale Ale, and to the numerous other friends who have so generously given publicity to these Testimonials, as a means of disabusing the public mind of any unfounded prejudice which may exist.

By the following extracts, one of a number from the most eminent members of the Medical Profession, they have the honour to state their satisfaction of finding their just appreciation of the remedial advantages of Allsopp's Pale Ale and the confidence in the concurring testimony of the most able Physicians and surgeons, as well as the most illustrious Chemists of the time.

ALLSOPP'S PALE ALE.—"The specimens of your Pale Ale sent to me afforded me another opportunity of confirming its valuable qualities. I have found it of great service in many cases of debility, where confidence enables me to recommend it, in accordance with the opinion of the most eminent Physicians, as a grateful and highly nutritious cordial tonic, and as a general beverage both for the invalid and the robust."—Thomas Hawkins, M.D., Exeter, and Gerrard-street, Soho.

MESSRS. ALLSOPP and SONS cannot refrain from reminding the public that it is entirely owing to the exertions of their late friend, Marion-ex-Prest possesses its present important trade in Pale Ale. Messrs Allsopp and Sons are therefore compelled to state to the Indian markets nearly years ago, since which period its great popularity has remained unshaken. These circumstances have induced Messrs Allsopp and Sons to come forward in defence of the character of manufactures in which they are engaged, and they refer with confidence to the numerous certificates which have been addressed to them and to the trade generally.

Allsopp and Sons' Pale Ale is now on SALE and may be obtained in casks of 4½ sizes from the Brewery, Burton-on-Trent; and from the undermentioned Branch Establishments

London ..	..	at 61, King William-street, City.

ESTABLISHED 1841,

MEDICAL, INVALID, and GENERAL LIFE OFFICE, 25, PALL-MALL.

During the last Seven Years £1,000,000 has been issued more than Three Thousand Three Hundred and Fifty Policies.

Covering Assurances to the extent of Thirteen Hundred Thousand Pounds Sterling.

Yielding Annual

THE ILLUSTRATED LONDON NEWS.

No. 569.—VOL. XXI.] FOR THE WEEK ENDING SATURDAY, JULY 17, 1852. [SIXPENCE.

THE ELECTIONS.

THE great parliamentary contest, though not actually, is virtually decided. Sufficient is known of it to leave no doubt of the result. The battle of the boroughs has been fought, and won; and that of the counties, still in progress, has already so far developed itself as to enable all parties to count with almost minute accuracy their gains or their losses. In a few days the last straggling county will have recorded its opinion; and Lord Derby and his colleagues may sit down and calculate to a man the number of those who will take the first befitting opportunity to vote them out of office.

People are generally disposed to exaggerate the importance of present as compared with past events; and although, in estimating the character and the consequences of the elections of 1852, public writers may share this feeling, the real value of the decision of the constituencies of Great Britain upon the questions that agitate society, will be as fully acknowledged in the future as it is to-day. A true issue has been tried, although an unreal one was attempted; and the sentiments of the nation have been clearly expressed upon the only two paramount questions left for its decision—the one, freedom of trade; and the other, freedom of conscience. In returning a Parliament with a decisive majority against the present Administration—a majority smaller, perhaps, by a few votes than that which generously allowed them to carry on the business of the nation during the last session, but still more than sufficiently ample to render their tenure of office as impossible as it would be unconstitutional, if it chose to vote a want of confidence in them—the nation has affirmed its continued adherence to those wise principles of liberal conservatism, which have placed and maintained it in the foremost rank of the world. Those principles, slightly modified by party, and its necessities, are those which animated the late Sir Robert Peel and his most able colleagues; which guided the Russell Administration, notwithstanding all its weaknesses and shortcomings, and all its faults, both of omission and commission; and which must be the policy of any and every Ministry of our time that expects to win the confidence of Parliament, or to retain power even for the ephemeral period of a single session.

We shall not now stop to consider the personal losses or gains of the assembly that will shortly meet to pass judgment upon the Derby Administration, but will reserve for a future opportunity a more elaborate analysis and classification of the new Parliament. But even in treating the subject generally, or *en bloc*, the exclusion of so many members of the able and earnest party that were associated with Sir Robert Peel, and which, in default of a better designation, borrowed one from his name, is too remarkable to be allowed to pass unnoticed. Henceforth, we presume that the country will hear no more of the Peelites as a party. We may anticipate that those among them who have succeeded in obtaining admission to the new Parliament, or who may hereafter secure seats as accidental vacancies occur, will range themselves under the banners of the old-established parties. There are, and always have been, but two sides in the House, and out of it; and, whatever the names by which these parties have called themselves, or by which they have been known to the world, there have been no other parties, except the party that would advance, and the party that would stand still. The great mass of the population, with and without votes, instinctively comprehends this. It feels the difference between Whig and Tory, and has little reverence, or even toleration, for neutrals and waverers that, in default, sometimes of energy, and sometimes of honesty of purpose, flutter from one to the other, or that conceal their own indecision or inability in the fond belief that the *juste milieu* between opposing parties is of necessity the place of the wise and the moderate. Black or white up or down, forwards or backwards, are terms which the people understand; but they do not understand or esteem men who claim at the same time to be both and neither. The Peel party, or its remnant, will no doubt be wise enough to take a lesson from the recent defeat of so many of their best men, and operate once for all a fusion with the Liberal party, to which they in reality belong, and from which, with so few differences between them, they ought never to have been separated.

But the most remarkable feature of the struggle—and far more important to Great Britain and to the world than any of the merely personal results involved—is the solemn re-affirmation of the two great principles of commercial and religious liberty.

KUNJAPAH, SIVA CHARI. THE PRINCESS GOURAMMA. THE RAJAH. FIROZI, A PAINTER. HIRAH LALL, MUNSHI.

THE EX-RAJAH OF COORG, AND HIS DAUGHTER THE PRINCESS GOURAMMA, AND SUITE.—FROM PHOTOGRAPHS TAKEN BY MESSRS. CLAUDET AND KILBURN, BY COMMAND OF HER MAJESTY.—(SEE NEXT PAGE.)

These were the two points at issue in the elections; although, to suit the purposes of the party in power, and to enable a few men like Lord Derby and Mr. Disraeli to appear to retain a shadow of consistency when the substance has been lost, the first was put in the foreground, and the second was as much as possible concealed. The domestic policy of this nation for the last twenty or twenty-five years has been, with few interruptions, a steady course towards complete freedom of trade and commerce, and towards complete equality, before the law, of all forms of religious opinion. The common sense of the public has seen through all the attempted mystifications of the last three or four months, and has emphatically proclaimed that the same policy must guide the future which has guided the past. It will be as impossible for the Ministry to tax bread, and fetter and impede the due development of trade and commerce on the one hand, as it will be to re-impose religious restrictions on the other. A few corrupt and exceptional places, like Liverpool, may quarrel with the big loaf and free navigation; and a few mobs, like that of Stockport, may unhappily be goaded by Roman Catholic insolence, or by Protestant intolerantite, into acts of disgraceful violence and persecution; but the sober opinion of the country will do justice alike against the mobs and the ministers that would revive either Protection or Persecution. Thus, although no *bonâ fide* appeal was made to the country, the country has made a *bonâ fide* answer; and unless Lord Derby and Mr. Disraeli be the most accomplished trusting, chameleon-like, and slippery of statesmen, they will shortly find themselves on those Opposition benches which their eloquence has so long and so greatly adorned. Yet it is not impossible, even with Liverpool and a few counties to support them in their Protectionist views to which they cling for the sake of consistency, if with no deeper and more heartfelt fondness, that they will accept the decision of the constituencies, quietly take both notices—and Persecution, and cling to thee. But in this case the statesman who, twenty years ago, denounced thumble ring ring, will himself have played the game; and the keen political wasp, with whom all the sand-horse-power of stinging, assailed a great man for changing his opinions, and for betraying the party by whose means he rose, will himself have been guilty of that worse betrayal which is dictated more by a love of place than by a sense of duty. But the result is not in the hands of the Ministry. They have gained a few votes, but they have not gained a majority; and the first real trial of strength, whether it be for the Speakership, or simply on a vote of want of confidence, will place them at the mercy of their political opponents.

THE PRINCESS GOURAMMA.

THE interesting ceremony of the admission into the Christian Church of the Princess Gouramma, daughter of his Highness Prince Vere Rajunder, ex-Rajah of Coorg, was briefly described in the ILLUSTRATED LONDON NEWS of the 3d instant. This, being one of the few instances on record of the abandonment of the Hindoo faith, for the truths of the Christian religion, is an event more than commonly satisfactory to a country whose relations with the great continent of India are so vast and intimate as our own; and we cannot doubt that our readers will be pleased to possess the *memorabilia* of the interesting Princess and her father, which we are this day enabled to give from a series of portraits recently taken by her Majesty's command.

The ex-Rajah of Coorg is one of those native Princes whose kingdoms have fallen, by their own internal discontents and lawlessness, into the power of this country. The ex-Rajah, subsequently to the conquest of his dominions, has been residing at the city of Benares, a sort of state prisoner under the control of the East India Company, but possessing an establishment of nabobs and princely state with an income of about £8000 a year. The Princess Gouramma is the offspring of one of his Highness's favourite ranees, a native of the Coorg country. The Princess was born at Benares, on a Sunday in February, 1841, and most unfortunately died two days afterwards; a circumstance which seems to have led to an increased affection for the child on the part of the ex-Rajah, who, having forfeited his native caste, determined that his favourite daughter should be reared in the principles of the Christian religion. Such was his Highness's visit to England. The ex-Rajah has a family of eleven children, the eldest being a son nineteen years of age. In speaking of them, his Highness shows a marked pre ference for the Princess Gouramma, whom he describes familiarly as "the favourite among the crows," "the farest of the flock," &c. The interest which her Majesty has shown for the Princess, and her Royal condescension in consenting to stand sponsor for the child, cannot fail to have proved highly gratifying to the ex-Rajah. We have already stated that the Queen, Prince Albert, the other sponsors were the Viscountess Hardinge, Mrs Drummond (wife of Major Drummond, 3d Bengal Light Cavalry, who has been appointed by the directors of the East India Company to attend upon his Highness during his absence from India), and Lieutenant James Weir Hogg. The ceremony was performed by the Archbishop of Canterbury, in the private chapel of Buckingham Palace, the Princess receiving from her Majesty the name of "Victoria." When the beautiful child, her father, gave up his child into her Majesty's charge, he addressed to her the following instruction and prayer: "My dearest daughter—Endeavour to gain every day more and more the grace, and to merit the love and kindness of her most gracious Majesty the Queen; that thereby all Europe, India, and the rest of the world, may hear and be pleased with your good conduct and fame. May heaven bless you, and keep you always under its divine protection and special care! This is my advice to you, my dearest daughter, and my most earnest prayer to the Almighty in your behalf."

The Princess is an interesting and intelligent child. Her complexion is but little darker than that of many Europeans, and her features are regular and pleasing. Her age is only eleven years, but she is far in advance of that period in intelligence. In addition to the Hindee and Hindostanee tongues, she is acquiring English.

The Princess is named after one of the Pagan divinities. A younger sister, the Princess Gungahmah was married, or rather betrothed, to the Nepaulese Prince, Jung Bahadoor, about a year ago, and is now being educated at Nepaul.

By an agreement between the ex-Rajah on the one hand, and the board of directors of the East India Company and the Board of Control on the other, the Princess Gouramma has been placed under her Majesty's protection to be educated in the principles of the Church of England in this country; and her Majesty, having fully considered the matter, has appointed Mrs Drummond to take charge of the child.

The ex-Rajah will return to Benares in the course of the ensuing autumn.

The total receipts on account of the metropolitan turnpike roads in the year ended the 25th of March, 1852, was £754 5 11s. 6d., and the expenditure [illegible] leaving a balance in hand of £10 4s. 3d. 10d.

By an Act of Parliament just printed (15 and 16 Victoria, c. 70), the Secretary of State for the Home or Foreign Department is empowered to direct "good and valid prison" as if the same had been erected one of the county rates.

Five persons who had been hitten about a month back by a little dog in the Rue de Boulogne, at Calais, were attacked last week with hydrophobia, and died in the most dreadful agony.

It having considered expedient that a record should be kept of the [illegible] by the collectors and controllers and other officers of Customs [illegible] on the collection of light dues, harbour dues, town dues, &c., the several [illegible] have been called upon to render a return showing the names of the [illegible] and the amount derived under each head for the year [illegible] ending the 5th January last. A [illegible] is also required at the foot of each return the remuneration [illegible] owed by the Board of Trade for services rendered under the Merchant Shipping Act.

It is shown, by [illegible] that [illegible] the Prince Consort [illegible] was [illegible] [illegible] [illegible]

THE ELECTIONS.

The election of members to serve in the new Parliament proceeds with steady despatch throughout the United Kingdom, and in our next Number we shall be able, most probably, to present a complete list of the new House of Commons. In the meantime we give a synopsis of the results of the elections up to Thursday night, distinguishing the Ministerial from the opposition members.

Some startling changes in the representation, it will be seen, have taken place, especially in Ireland, where Mr. Reynolds has been rejected for Dublin; Mr. C. G. Duffy, the editor of the *Nation*, and well known leader of the "Young Ireland" party, has been returned for New Ross; and Mr. Bowyer, an English Roman Catholic barrister, has replaced Mr. T. M'Cullagh, as M.P. for Dundalk. We regret to say that in Limerick, Cork, and Belfast, there has been much rioting; one man being killed and several wounded in the latter place.

In Scotland, Mr. Macaulay has been returned at the head of the poll for Edinburgh, for which city he was invited to allow his name to appear as a candidate, without any solicitation on the part of the right hon. gentleman.

LAUNCH OF THE SCREW COLLIER, THE "JOHN BOWES."

On Wednesday week was launched from the building-yard of Messrs. Palmer, Brothers, and Co., of Jarrow, a splendid iron screw-steamer, the *John Bowes*, being the first vessel of that description for the coal trade which has been built within that port. The event excited great enthusiasm, and was regarded as the commencement of a new era in the history of ship-building; and as the precursor of a fresh order of things, imperatively called for by the altered circumstances of the times. For 600 years have the denizens of coaly Tyne been content to transport the "black diamond" to various part of the world in the old-fashioned colliers, and the lapse of time has scarcely witnessed any improvement in their construction. The immense opposition, however, given to sea transit by the establishment of railways, called for the introduction of a new system, and the enterprising firm of Palmer, Brothers, and Co., have supplied the deficiency in a way calculated to command success.

In celebration of the event, the liberal builders invited a large number of the principal coalowners, merchants, and manufacturers of the district to visit their works.

At precisely a quarter past two, it being then high-water, the last links which bound the vessel were torn away, and the *John Bowes* majestically glided into the Tyne. Mrs. Charles Palmer gave the name, amidst the hearty cheers of the assembled thousands. The vessel rode with peculiar steadiness and grace.

The launch being over, Messrs. Palmer invited the company to an elegant dinner laid out in their manufactory, and upwards of 200 shortly afterwards sat down. Mr. Charles M. Palmer occupied the chair, supported by the Mayor and Sheriff of Newcastle; the vice-chairs being occupied by Mr. George Palmer and Mr. Nicholas Wood, of Hetton House. Several appropriate toasts were drunk, at the close of which dancing was led off by Mr. Palmer and Mrs. Mayoress.

The proceedings terminated about nine o'clock, and the party returned safely by special train

The *John Bowes* is 167 feet long, and her hold is 10½ feet in depth, her measurement by register being 465 tons, though she will be enabled to carry upwards of 600 tons of coal. Instead of the usual narrow opening into the hold, the coals will be let down into the vessel through an aperture extending 60 feet along the deck, an arrangement which will entirely prevent the serious loss of breakage caused by what is called "trimming" the cargo. Her ballast will be water, which is placed underneath the proper floor of the hold, so that the heavy ballast expenses are avoided. The engines, which will occupy but a trifling space, will be of 35 horse-power each, and the standing rigging, as well as the vessel, will be of iron. The screw, which is to be the propelling power of the vessel, underwent a close inspection. Altogether, we believe, about 160 tons of iron and 200,000 rivets have been consumed in the construction of this collier.

WORKS OF THE PORTLAND BREAKWATER.

PORTLAND BREAKWATER.

ON Saturday last the Prince Consort, the Prince of Wales, and the Prince Alfred, attended by the Hon. Colonel Gordon, Mr. Gibbs, and Captain Crispin, R.N., paid an unexpected visit to the Portland Breakwater, arriving shortly after noon, in the *Victoria and Albert* yacht. In the absence of Mr. Rendel, the engineer-in-chief, the Royal party were received by Mr. Coode, the resident engineer, and were conducted by him to the end of the Breakwater stage, where they examined with much interest the different engineering operations involved in the carrying on the works. The Prince expressed himself highly gratified with the progress made since the first stone was deposited by his Royal Highness in 1849. The Royal party left for Osborne about two o'clock, amidst the hearty cheers of the assembled workmen.

We take this opportunity of illustrating the very interesting and novel operation now in progress at the Breakwater works, which is nothing less than the building of a bridge across, or rather into, the sea. The Breakwater will consist of two separate portions —the one extending from the shore into the sea about 1900 feet, in an east-north-east direction; and the other about 6,000 feet in length, and isolated, the nearest point of which will ultimately be 400 feet from the inner portion. During the progress of the works, and until the pier heads forming the ends of these arms are built, —to allow space for constructing them, the rough unfinished portion of the two arms will not approach nearer to each other than from 800 to 1000 feet. The stone with which the Breakwater is formed is an admixture of rough large blocks, from six tons and under, mixed with a sufficient small rubble to fill the interstices: it is tipped into the sea from railway waggons, trains of which are hauled along the Breakwater by locomotive engines. This mode of depositing the material renders its execution very cheap; and it is principally with a view of adopting this manner of construction on the outer Breakwater that the above bridge became necessary. It is of strong timber. The general depth of water at low water is nearly 37 feet, and the roadway being 25 feet above this level, it follows that the piles supporting it must be about 80 feet in length or height, and, as single timbers would be manifestly not obtainable they are made like the masts of vessels, each weighing (when prepared with the necessary iron work connected with it) about seven tons. The mode of fixing these in the ground is ingenious. They are shod with cast-iron shoes of Mitchell's patent, having a thread or worm upon them of a large pitch, which are screwed into the clay or shale by means of a capstan head, and bars fixed on the head of the piles. Each pile is supported in an upright position by very strong guys or stay rods, and upon these pales, which are in rows, 30 feet apart, the necessary superstructure for carrying three lines of railway and a horse track is fixed, making a bridge of about 80 feet wide. The total length of 1000 feet only took about four months to construct.

The harbour of refuge at Portland is the largest now being constructed, under the recommendation of the Harbour Commissioners, appointed some few years back, and the works have been carried forward with great spirit. The Breakwater staging is now approaching half-a-mile in length from the shore, and the part filled up with stone already affords very considerable shelter in the anchorage, the advantages of which are beginning to be felt by the masters of vessels, foreign as well as British. The works are being constructed for the Admiralty, under the superintendence of Mr. James M. Rendel, F.R.S., engineer-in-chief, and Mr. John Coode, resident engineer. Mr. J. T. Leather is the contractor for the same.

THE LATE HENRY CLAY.—FROM A DAGUERREOTYPE BY BRADY.

DEATH OF MR. CLAY.

THE American Commonwealth has just cause to be proud of her statesmen. The bright example of disinterested patriotism bequeathed by Washington still influences her leading politicians, and in many we may yet trace that high public principle and personal dignity that in so marked a degree distinguished the first great asserters of American nationality. The most eminent, perhaps, of these illustrious citizens has just passed from the stage of life.

Henry Clay, whose name history will inscribe high on the roll of American worthies, died at Washington, on the 29th ult. He was born three years after the Declaration of Independence, on the 12th April, 1777, in Hanover county, Virginia, the son of a poor but respected clergyman. His life embraces nearly the entire era of his country's history, from the first efforts of Washington to the present prosperity and power of the United States. After passing the years of his youth in the office of the Court of Chancery, at Richmond, he was induced, by the advice of Chancellor Whyte, Governor Brooke, and other leading jurists, to adopt the legal profession, and, at the early age of twenty, to commence practice at the bar of Lexington, in the State of Kentucky. Very rapidly he acquired a large business, and soon gained the reputation of being the most powerful advocate of the West. In 1803 the Assembly of Kentucky raised him to the important post of Senator of the United States, which he continued to occupy during the greater portion of his life. In one of the intervals, however, of his senatorial career, he was returned to the House of Representatives, and, on his entrance, being placed in the Speaker's chair, became the chief pilot of his country through the troubles and dissensions that then threatened her.

In 1813 Mr. Clay advocated, with energy and eloquence, the necessity of war with England, and, at its conclusion, was sent to negotiate the Treaty of Ghent, and the subsequent commercial convention in London. Peace restored, he resumed the Speaker's chair, and continued his successful forensic practice. In 1824 his influence mainly contributed to carry the presidential election of Quincy Adams, and in the following year he accepted office under that statesman, as Secretary of State. In this capacity he negotiated the treaties with Russia, Denmark, Prussia, Austria, and the South American States. In 1829 and 1830, in the great Federalist contest, Mr. Clay acted a prominent part, and devised the famous Compromise, which earned for him the title of "Saviour of the Union." His last great act was the settlement of the terms on which California and the newly-conquered territory were admitted into the Confederation without prejudice to the North, and without extending the curse of slavery to new lands. At an earlier period Mr. Clay had advocated South American independence, and the recognition of the revolted colonies of Spain; and more recently had supported the aggressive war in Mexico. The chief error of his political course was his maintenance of the high tariffs and protective duties of the United States.

Never was citizen more popular, more honoured, than Henry Clay, and yet his great ambition—that of attaining the highest position in the Executive—was invariably disappointed. Mr. Clay shone equally at the bar, in the senate, and in the cabinet; and the memory of his patriotism, his eloquence, and his genius will be ever cherished in the land of Washington and Franklin. Suffice it to add, with reference to his private worth, that no man ever held or deserved a more honourable position; but, in his latter years, domestic affliction pressed grievously on the fond and devoted parent, and left his hearth desolate. All his six daughters died in early womanhood, and of his sons, the last on whom his old age could hope to lean, fell in the Mexican war.

LAUNCH OF THE SCREW COLLIER "THE JOHN BOWES," AT JARROW.—(SEE PRECEDING PAGE.)

SCALE OF FEET AND INCHES.

TRIAL OF ANCHORS OF ALL NATIONS, AT TITE ROYAL DOCKYARD, SHEERNESS.

SEVERAL very important experiments have recently been made at the Royal Dockyard, Sheerness, in order to test the relative merits of the various "Anchors of All Nations" now in use. The investigations have been of so interesting a character that our Artist has, upon the preceding page, represented a scene of the trial, accompanied by figures of the several Anchors; and subjoined is a condensed report of the experimental proceedings and results.

The following gentlemen (representatives of the shipowners of Great Britain), viz. Messrs. Duncan Dunbar, Anthony Ridley, W. S. Lindsay W. Drew, and Mr. W. Phillips, arrived on Wednesday evening week at Smithson's Royal Hotel, Bank's Town. Mr. G. Marshall, one of the above committee, was prevented attending from unforeseen circumstances. At 8 A.M. on Thursday the committee present proceeded to the dockyard, where they were received by the Admiralty committee, consisting of Captain the Hon. Montagu Stopford, of H.M.S. *Waterloo*, of 120 guns, Captain Superintendent Charles Hope, of H.M. Dockyard, and in command of H.M.S. *Monarch*, of 84 guns, Captain George Rodney Mundy, of H.M.S. *London*, of 90 guns; Mr. J. Aylen, Master Attendant of H.M. Dockyard, Sheerness; and Mr. James Jenkin, Master of H.M.S *Waterloo*: these being the officers selected on the part of the Board Admiralty to form a jury to decide the merits of the various anchors of all nations now in use. Captain the Hon. Montagu Stopford was chosen as chairman; and Mr. F. J. Fegan, R.N., secretary of the committee.

The following analysis gives the result of the first series of experiments showing the respective weights of the anchors, the distances in feet and inches each anchor dragged at "long scope of cable" and at "short stay;" as also the total distances from first position in the ground, whereby their relative holding qualities are made apparent:—

Trials.	Owners' Names.	Weight	Distance at Long Scope	Distance at Short Stay.	Total.

The necessary preliminaries having been arranged, the trial on land commenced on a portion of the parade ground selected for that purpose, and prepared as follows: The ground was dug out 250 feet in length, 30 feet in breadth, and 3 feet deep. The soil, composed of clay and loam, was then equally cleared of stones and rubbish of every description, and the space filled in with soil of equal properties throughout. During the time of this work going on, two fire-engine hoses attached to the pipes from the 50 horse-power engine were abundantly played into the trench until the ground was filled in, the surface raising from the pitching spot for the anchors on an inclined plane, so that the anchor, arm, and shank, when down to their holding power, were perfectly buried in the water, rendering the experiments by the two hoses before mentioned, with a pressure fall on from the 50 horse-power engine playing into the trench in which they lay in from 14 to 18 inches water deep, and from 8 to 3 feet in breadth. For several days previous to the trial the water was daily turned on, so as to consolidate the soil as much as possible, and render that it should resemble the bed of the river, or in a roadstead or anchorage ground. The owners of the anchors expressed themselves highly satisfied with the preparations made by the committee for the trial of the anchors on land.

The annexed statement shows the nature of, and the sort of materials composing, the purchases used for testing the anchors, indicated in the preceding Illustration by letters corresponding with the following:—

A Hempen cab es to anchors of 14 inches and 20 fths. each., 2 in number.

B Blocks of 26 inches in diameter, with sheaves of 6½ inches, 2 in number, one for each cable, to serve the purpose as swellers, which the cable reeves through, and trices up and down the sheers to represent a long or short stay, as occasions may require.

C Spars for sheers to lash purchase for triouq up or down the cable for the purpose above stated.

D Large purchase on cable.

E Ropes for fals.

F Centre purchase leading from capstan.

G Double blocks of 18 inches diameter.

H Leading blocks at head of sheers for purchase falls to reeve through.

I Four-fold purchase blocks, to which the end of cables leading from anchor is se cured.

J Treble blocks shackled to a piece of chain cable at the extreme point (marked K) from, and in a direct line with the anchor. These cigars are nets of chain of 14 inch diam er, 12 fathoms.

K End of chain shack d to an anchor sunk deep in the ground.

M The captain, taken from a first-rate man-of-war.

N Stepping pieces for sheers.

O Leading to secure sheers at the head.

P Tackling, to secure sheers.

The second series of experiments will commence on Friday, the 23rd instant, on the beach off the Garrison Point, when the anchors will be placed in two fathoms of water and brave up the beach.

Judging from the results attained by the above experiments, it would appear that Trotman's improved Porter's anchor possesses fully 25 per cent. more holding properties on dry land than any other with which it has been tried. Mr. Trotman feels confident that similar results will attend the subsequent trials on the beach and afloat. The makers of Trotman's anchors are Wood Brothers, of Liverpool, and Saltney Iron Works.

PASSENGERS' BAGGAGE.—The Board of Customs have issued the following new regulations relative to the admission of small quantities of cigars brought to this country in baggage of parties from abroad for private use, it appearing that cigars are now frequently imported in baggage, unaccompanied by the owner, viz.:—"That when cigars are accompanied by the proprietor, 3 lb. be allowed to the passengers arriving from the Continent, or other short voyages, and 7 lb. to passengers from the East or West Indies, or other distant voyages, without fine or seizure. The quantities to be allowed in each case, provided they shall appear to be unconsumed stores, but should the quantities exceed those stated, application must be made to the Board for their directions as to the amount of fine to be imposed. If the cigars are not accompanied by the proprietor any portion of the voyage, a fine be levied on the whole quantity on application to the Board in the usual manner; and when a passenger proceeds overland from India, accompanied by the proprietor, the effects as far as Malta, &c., and then forwards the same to this country in another vessel, the Board will decide as to the remission of the fine or otherwise, according to the circumstances of each case." These regulations to be made general, and acted upon at all the ports of the United Kingdom for the future.

The occasion of his Royal Highness Prince Albert being under in the estates of Balmoral was celebrated in the iron-room attached to the Castle, [illegible] Dinner, Mr. Ronie[illegible] Inglis, the Prince's [illegible] and about 150 of the tenantry, with those from Abergeldy and [illegible] friends, were present. A ball followed in the same place, [illegible] prolonged.

An account of the receipts and disbursements of the home treasury [illegible] pany, from the 1st of May, 1851, to the 30th of April, 1852, [illegible] have been £6 099,852 8s. 8d., and the disbursements, [illegible] ving a balance in favour of the company, on the 30th of [illegible] [illegible] [illegible]

that ultimately, and at no very distant day, the Bourbons, once despised and hated, would be hailed by almost all parties as the deliverers of the nation. So strongly was this felt, that even the Orleanists, and the heads of the house of Orleans itself caught the contagion of loyalty to the Legitimist principle. The reconciliation or "fusion" of the long estranged and rival houses of the elder and younger branch was looked upon as the most desirable of all political combinations; and such progress appeared to have been made, that the fusion was considered a *fait accompli*. The eminent person for whose advantage all this change in public opinion had been operating has, however, failed to turn it to account. The Count de Chambord has displayed a singular infelicity in the mode of conducting the fortunes of his cause; and, aided by the congenial and congenital impracticability of the family of Orleans, has managed, in the space of a few weeks, to convince nearly everybody, except the devoted few amongst whom loyalty to his person is both a passion and a religion, that his restoration to the throne, even if possible, would scarcely be desirable. It now appears that the long talked of "fusion" is not to take place, that the estrangement between the elder and the younger Bourbons is wider than ever, and that neither house has learned from adversity the great lessons which adversity should teach. General Changarnier, who was to have been the General Monk of the French Restoration, and who charged himself with the delicate negotiation of effecting a complete reconciliation, and joint action on the part of the two houses, has so managed the business as to give offence to and to be disavowed by both; while the Count de Chambord himself, in a letter to the Duke de Levis, which has run the round of the French press, no doubt to the great delight of Louis Napoleon, has given a desperate blow to the hopes of his party, by a cruel and ungrateful reprimand to the Count de Larochejaquelin, one of the few earnest Legitimists who possess the invaluable gift of common sense, and whose counsels, if taken, might have saved the cause of the Bourbons from utter shipwreck and ruin. But it has been the singular fatality of Louis Napoleon in his marvellous career to have always been beset served by his enemies, and no recent circumstance has so greatly strengthened his position, as the policy, or, more properly speaking, the impolicy which has been pursued at Frohsdorf since the time when the Count de Chambord first began to manage his own affairs. Whatever the value or the prospects of the Legitimist cause might have been, it is evident that it could not afford to quarrel with, or lose the active support and services of, three men like M. de Montalembert, M. de Larochejaquelin, and General Changarnier.

COURT AND HAUT TON.

THE COURT AT OSBORNE.

The Queen and the Prince Consort, with the youthful branches of the Royal family, continue in the enjoyment of excellent health at the marine residence of the Court, in the Isle of Wight. Her Majesty and his Royal Highness take frequent excursions in the Royal yachts, generally returning to Osborne before nightfall. Her Royal Highness the Duchess of Kent arrived on a visit to the Queen and the Prince and Monday.

The movements of the Court during the week are thus chronicled by the Court newsman

On Saturday his Royal Highness Prince Albert, accompanied by the Prince of Wales and Prince Alfred, inspected the breakwater at the Isle of Portland, now in course of construction. Her Majesty, with the Princess Royal, met his Royal Highness at Osborne Pier, and embarked, in company with the Prince, on board the *Fairy*, for a cruise, returning to Osborne at half-past seven o'clock.

On Sunday morning her Majesty, his Royal Highness Prince Albert, the Prince of Wales, and the Princess Royal, attended Divine Service at Osborne. The service was performed by the Very Rev. the Dean of Winchester. The Ladies and Gentlemen in Waiting were also present, and the domestic household

Her Royal Highness the Duchess of Kent arrived at Osborne on Monday afternoon at a quarter before three o'clock. The Queen and Prince, the Duchess of Kent, Princess Helena, and Princess Louisa, attended by the Ladies and Gentlemen in Waiting, embarked in the Royal yacht, *Fairy*, at Trinity Wharf, East Cowes, at half-past five o'clock, and proceeded towards Ryde. The Royal party returned to Osborne a little after seven.

On Tuesday afternoon her Majesty, his Royal Highness Prince Albert, their Royal Highnesses the Duchess of Kent, the Princess Royal and Princess Helena, attended by the Ladies and Gentlemen in Waiting, embarked at Osborne Pier in the Royal yacht *Fairy*, for a cruise, returning before eight o'clock.

On Wednesday the Princess of Salerno and the Duke and Duchess d'Aumale arrived on a visit to the Queen and Prince Albert

The Hon. Caroline Cavendish has succeeded the Hon. Flora Macdonald as Maid-of-Honour in Waiting to her Majesty Colonel Wylde has succeeded Lieut.-Colonel F. Seymour as Groom-in-Waiting to Prince Albert.

Her Royal Highness the Duchess of Gloucester honoured Mrs. Hicks with her company on Wednesday evening. Mrs. Hicks is the only surviving grand-daughter of Lady Charlotte Finch, who was governess to the fifteen children of George III. Her Royal Highness is now the sole survivor of these children

The Duke of Richmond has left town for Goodwood. The Duchess, accompanied by the Ladies Lennox and Alexander Gordon Lennox, leave Portland-place for the same seat early in the ensuing week.

The Duke of Montrose has left town for Scotland. The Duchess proposes to remain in town until the middle of the next month

The Duke and Duchess of Norfolk and Lady Adeliza Fitzallan Howard have left town for Arundel Castle.

The Marquis and Marchioness of Londonderry have returned to this country from a sojour at the baths at Homberg. The noble Marquis and her Ladyship have arrived at Holderness House, *en route* to Wynyard Park, where Lord Londonderry proceeds immediately, to entertain the Lord Chief Justice of England, and Mr. Justice Wightman, the judges of the assize, and the magistracy of Durham.

The Marquis of Anglesea has left town for West Cowes Castle. The noble Marquis's yacht the *Pearl* is lying off Cowes.

Mrs. Abbott Lawrence, wife of the American Minister, and Miss Lawrence, have left their residence in Piccadilly, for Paris, for a few days.

The Countess of Malmesbury has left town on a Continental tour.

Viscountess Jocelyn gave birth to a son on Monday last, and, with the infant, is progressing very favourably.

Viscount and Viscountess Combermere have left town for Buxton.

Lord Charles Wellesley has left town for Ireland, on a fishing excursion. Lady Charles and family have departed from Apsley House, for Conholt Park for the season.

Essad Bey has arrived at the residence of the Ottoman Legation in Bryanston-square, and has entered on his duties as Secretary of the Turkish Legation.

MARRIAGES IN HIGH LIFE.—On Tuesday the marriage of the Right Hon. Henry Labouchere, M.P., with the Lady Mary Howard, daughter of the late, and sister of the present, Earl of Carlisle, was solemnised at St. Paul's Church, Knightsbridge, in the presence of a select circle of the friends of both families. The service was performed in a very impressive manner by the Hon. and Rev. the Dean of Lichfield, uncle of the bride. Her Ladyship was given away by the Earl of Carlisle. After the religious ceremony had concluded, the part assembled at Lord Carlisle's mansion in Grosvenor-place, where a superb *dejeuner* was served to a distinguished party in celebration of the happy event. At half-past two o'clock the newly-wedded pair started in a carriage and four, with outriders, for Stoke-park, the right hon. gentleman's seat, near Windsor.—On Tuesday was also celebrated, at St. James's Church, the marriage of the Hon. and Rev. A. Savile, young est son of the Earl and Countess of Mexborough, and the Hon. Lucy Georgiana Neville, youngest daughter of Lord and Lady Braybrooke. In the afternoon the happy bride and bridegroom left town for Canonbury House, the seat of Sir Edmund Antrobus, Bart., near Salisbury, to pass the honeymoon.—A matrimonial alliance is arranged, and will shortly take place between the Lady Hermione St. Maur, eldest daughter of Lord and Lady Seymour, and grand-daughter of the Duke of Somerset, and Mr. Graham, eldest son of the Right Hon. Sir James Graham. The marriage of Mr. Grenfell, M.P., and Miss Lascelles, daughter of Lady Caroline Lascelles, and the Right Hon. W. S. Lascelles, will take place on Tuesday next.

STROKE OF FORTUNE.—A young Englishman, named Johnson, who has been employed as a journeyman painter in Edinburgh, has suddenly and unexpectedly fallen into a fortune of £16,400, bequeathed to himself and his sister by a childless uncle with whom little or no correspondence had been previously kept up.

ELECTION OF REPRESENTATIVE PEERS.—The following representative peers were elected at Edinburgh on Thursday:—The Marquis of Tweeddale, the Earl of Morton, the Earl of Home, the Earl of Strathmore, the Earl of Airlie, the Earl of Lauderdale, the Earl of Selkirk, the Earl of Orkney, Lord Saltoun, Lord Elphinstone, Lord Colville, and Lord Polwarth.

RUMOURED LOSS OF HER MAJESTY'S STEAMER "HARPY."—By the *Tay* Royal mail-steamer from Brazil, we learn that apprehensions are entertained respecting the safety of H.M. steamer *Harpy*. The captain of the Portuguese ship *Flor da Lavoa*, which arrived at Belem (Portugal), on the 10th inst., states that he fell in with the *Harpy* on the 20th of June, in latitude 32 deg. north, longitude 33 deg. west, in great distress. The *Harpy* was out 51 days from Pernambuco. Her machinery was out of order; she had no water nor fuel on board, and had to distil the water required. They were making use of a little apparatus for the description of woodwork when the *Flor de Porto* parted company with the *Harpy*. The captain had commenced breaking up the lower deck for fuel. The wind was north by north-west, fresh, which led the commander to suppose that the *Harpy* would not be able to reach Fayal; and up to the 2d inst she had not arrived there.

MUTINY AND MASSACRE.—A letter from Canton, dated the 22d May, conveys the news of a shocking catastrophe on board the American ship *Robert Browne*, bound to California with Coolies, the whole of whom rose, and murdered the captain, officers, and part of the crew. The act was said to be prompted by the entire casting off the bolts of 200 of the Coolies.

THE GREAT NORTHERN.—The "towns line" of this railway was opened on Thursday; it commences at Peterborough, and, proceeding through Grantham and Newark, joins the previously known to the public at East Retford; and runs across the shortest route from London to York and Leeds, and the districts further north

FIRE AND LOSS OF LIFE.—On Thursday evening a dreadful fire broke out on the extensive premises of Messrs. Conbro and Potter, ship-chandlers and general importers, No. 2, Haydon-square, Minories, which unfortunately resulted in the loss of the lives of two firemen belonging to the Whitecross-street station, who were buried under the ruins of one of the lofty walls, which suddenly fell upon them, and the destruction of the premises themselves, together with two or three of the adjoining buildings.

LATEST FOREIGN NEWS.

FRANCE.

In the advices of yesterday (Friday) from Paris the only feature of interest is the publication of the official returns of the revenue for the first half of 1852, which amounts to 389,497,000f. This is an increase of 25,837,000f. over the corresponding period of 1851.

Bou-Maza has up to the present avoided apprehension, and it is believed he has gone to Belgium.

The functionary Tribunal of Foix (Ariege) has sentenced six persons to various fines for circulating false news. This is the first time that this-law on the press has been brought into operation.

INDIA.

By the Overland Mail we have received intelligence from Calcutta of June 3, and from Rangoon (the seat of the Burmese war), of May 26. The capture of the Burmese is of considerable interest. From it we learn that Bassein was captured from the enemy by General Godwin and Commodore Lambert on the 19th of May, after an obstinate defence by the Burmese. The enemy suffered severely, while the total loss of our forces was three men killed, seven officers and twenty-four men wounded. On the opposite side of the river a stockade was also carried by a party under the command of Captain Campbell, of the *Sesostris*. After the storming of Bassein, General Godwin returned to Rangoon. Some days previously the late Governor of Rangoon was pursued by Lieut.-Colonel Apthorp, with a force of 500 men, and his ex-Excellency only effected his escape by flying with such haste as to leave behind him a large quantity of ammunition and other stores. Another ex-Governor, viz., of Dalla, on his way to Ava, fared somewhat worse, for the *Phlegethon* steamer, going up the Irrawaddy, fell in with the Governor's family, when his wife, his grandmother, and £1100 came into our hands. The native inhabitants were fast returning to Rangoon, and solicited British protection. It was reported that the King of Ava was dead, and that the province of Pegu had risen in rebellion against the Burmese Government; but these reports were not generally credited; although it was thought that both were likely to have occurred. The *Delhi Gazette*, however, asserts, that the King's decease was beyond a doubt, and that the capital was in a complete state of anarchy. Our troops at Rangoon were enjoying tolerably good health, and everything possible had been done to shelter them from the rains.

In India Proper we learn from the north-west frontier that a sharp campaign was being carried on by Sir Colin Campbell in the Swat River. In one of the skirmishes Lieutenant Hardinge had a narrow escape, he having been wounded twice and his horse several times. On the 18th of May a sanguinary affair took place, when 80 men were killed on our side, and about 150 of the enemy, the latter having double that number wounded. By the last accounts Lieutenant Hardinge was progressing favourably.

A fearful storm passed over Calcutta on the 14th May, which did considerable damage on land and sea. Eleven lives were lost in the town alone. The *Neredes* at the Sandhead suffered the loss of nearly all her crew.

AFRICAN ROYAL MAIL STEAMERS.—The contract for mail service to Madera, Tenerife, and the ports of Western Africa, comes into operation on the 1st of September, when the first vessel, the *Forerunner*, will take the place from Plymouth. This vessel is just launched from Mr. Laird's yard at Birkenhead, and is pronounced by competent persons to be a very fine vessel, and will be worked on the screw principle.

DEATHS FROM COUP DE SOLEIL.—Mr. Webb, a cheesemonger, residing at 104, Tottenham-court-road, while speaking to a lady in the latter part of last week, fell dead to the ground from a *coup de soleil*. Inquests have been recently held by Mr. G. S. Brent upon the bodies of several persons who had died suddenly from the same cause. One was on the body of Michael Clarke, aged forty, a labourer in the employ of Mr. Goodchild, proprietor of the "Forty Acres Farm," near Harrow, who had been struck down while engaged in haymaking, on Tuesday week last. Another was that of Elizabeth Osborne, a nursery maid, aged fourteen, in the family of Mrs. Kingdon, Notting hill. The melancholy event occurred soon after she had wheeled the children to Kensington-green, a distance of two miles. Her body became quite black after death. Mr. Walkey held two inquests in similar cases. The provincial papers record several deaths of the same character. Dr. Copland suggests the throwing of water from a height upon the head of the sufferers—a treatment successfully adopted in India.

CRIMINAL OFFENDERS.—The annual tables, showing the number of criminal offenders in the year 1851, have been printed. 27,960 persons were committed for trial for the last in England and Wales, of which 21,576 were convicted, and 6384 acquitted. 70 were capitally convicted, of whom 10 only were executed, 52 having their sentence commuted into transportation for life, and the rest into minor punishments, with the exception of one free pardon. 124 were transported for life, and 3709 for various periods. Of his offences 22,326 were male, and 5669 females. The total number of criminals in 1850 was 26,813; in 1849, 27,816: and in five years ending 1851, 141,771. In the five years ending 1846, 136,106. In Scotland 4001 persons were committed for trial, 3292 being male, and 1169 females; of these one only was capitally convicted, 15 transported for life, and 487 for shorter periods. 3070 cases resulted in convictions; 907 in acquittals.

In the first five months of 1850 we imported 5,386,761 lb. of unmanufactured tobacco; in 1851, 6,073,084 lb.; but in 1852 the importations seem to have fallen off to 4,718,252 lb. [illegible] of the corresponding period of 1851. [illegible] tobacco and have increased [illegible].

It is stated that after 9 months are elapsed from sending the pigeons, many hocks, magazines, &c. [illegible] new rules adopted for inland carriage [illegible] so are also to the [illegible] Admiralty.

"THE TRIBUTE MONEY." BY TITIAN.

THE addition of a *chef d'œuvre* by Titian to the British national collection is an event in our art history upon which we have to congratulate ourselves and our readers. It is seldom that £2500 of public money has been laid out more to the public advantage than in the purchase of the picture of "The Tribute Money," by the great master of the Venetian school, at the sale of the Soult Gallery, which lately took place in Paris. We say it is "seldom" that such outlays are made, and we wish it were not so. There is a point where economy becomes improvidence, when the intellectual character of a great nation is in question.

The works of the great masters of the old schools, unique in character and excellence, limited in number, eagerly sought after and prized by individual collectors—millionaires, nobles, crowned heads alike, are independently necessary for the use of the multitude if we would promote the study of art and the education of the public taste. Experience shows that, like good wine, these human productions increase in price with age. Can anything be more reasonable, therefore, than to conclude that a liberal sum annually expended in purchasing such gems as they from time to time present themselves for sale, would be wisely invested, even in a commercial sense; to say nothing of the advantage conferred upon the existing generation, of being able to contemplate and study the objects themselves, instead of bequeathing this privilege to their descendants. The question of a National Gallery, worthy of the nation and of art, so long shuffled off, will shortly come on for definite settlement; and the question of stocking the Gallery, wherever it may be located, will then also have to be taken in hand as a matter of business

But to return to our Titian, which has lately been hung up not in a very good light (how was it possible it should be?) in the National Picture Warehouse in Trafalgar-square. The group consists of three figures, half-length—namely, the Jew, who exhibits a piece of money to Christ; that of Christ, who points toward heaven, after delivering the memorable injunction, "Render unto Cæsar the things that are Cæsar's, and unto God the things which are God's;" and behind the Jew a doctor, who looks on with an expression of malicious curiosity, wondering how Jesus will escape the trap which has been laid for him, an express on just softening into admiration at the result. The figure and face of the Jew are marked with great energy and truthfulness of purpose. The Christ is dignified in attitude, though the head, particularly the upper part, does not evince that divine character which we should desire to find in it. There is a want of breadth in the forehead, and a prominence about the nose, which speak a model of inferior intellectuality. It is well known that Titian aimed very little at the ideal, but truthfully represented the objects which he adopted as subjects a fact which Michael Angelo himself lamented after seeing one of his works, no other than the famous "Danaë," which Titian painted at Rome. The remark is worth repeating here, as a piece of sound criticism. "I am certain," said the great Florentine, "that, if this man were as much assisted by art as he is by nature, no mortal could go further. He has a noble spirit; but, at present, having no knowledge of design, he, in his imitation of the life, corrects nothing, nor attempts to make it better, though possessed of a manner so easy and beautiful, so full of truth and animation. But certain it is, that not having studied the best works of the ancients, the Venetians know not how to mend or give a grace and perfect on to their works beyond their model, which is never perfect in all its parts. The moderns in general, cannot, from their own resources, be correct, but are obliged to make a literal copy of the object before their eyes not knowing what it ought to be." In reading this passage, allowance, it is true, must be made for the jealousy inherent at all times to artists, from which even Michael Angelo was not free; and which his biographer, Vasari, in his avowed predilection for Florentine art, would not be likely to soften or qualify.

Nevertheless, it is as a specimen of colouring, and of the peculiar handling of colours remarkable in Titian, that this picture possesses its value. The colours made use of are few, and are disposed with bold simplicity. The Christ is clothed in a crimson dress, with a blue drapery thrown across the shoulders; the Jew's dress is of a rich yellow or umber; the sky is of a deep blue, rather sombre in tone; the stone wall on the right, and the black dress of the doctor are neutral tints, gloomy in the picture on either side. The picture before us, therefore, remarkably illustrates the principles of colour upon which Titian is supposed to have operated, as described by Mengs:—

The colours of the iris or prism have a perfect harmony all together; but if either be removed, the blue, or the yellow be taken away, the harmony is totally destroyed. It is the very same in respect to a picture: should it be wanting in the due proportion of each of those colours, it will be deficient in harmony. The secret is, that the true concordance consists only in the equilibrium of the three principal colours, the red, blue, and yellow. Rubens introduced in his paintings much of these three colours; but he did not know the just balance, like Titian, who felt within himself the rules of the most exact harmony, which pervades all his works; and therefore he must be ranked as the most perfect colourist that has ever been.

This picture, which has been engraved by Martin Rota, must not be confounded with another by Titian, on the same subject, painted by him at Ferrara in 1514. The picture last mentioned is that in the Dresden gallery, and several copies exist of it. The Dresden picture consists of two figures only, and the style is quite different from the one before us, being highly finished in the hair, beard, and textural details, and so painted, as it is recorded, in competition with Albert Durer, whose achievements in that way are well known.

The picture which we now possess was purchased as already stated, at the sale of Marshal Soult's collection. It had been obtained by that personage, it is supposed, with other works of art, in Spain; but when, or under what circumstances, is not exactly known. Rumours which have made their way within the walls of Parliament have been current that this identical picture was in England some years ago, when it might have been purchased for £1000 (instead of £2500, which was the price we paid). This allegation, however, has been denied, in rather qualified terms, perhaps, by the Chancellor of the Exchequer; and we, therefore, merely allude to it as a matter of gossip, and as an illustration, in the [illegible] be true, of the danger of delay in the perquisition of valuable pictures.

The Exhibition at the Palais Royal on the works of the artists to whom recompenses have been awarded opened on Saturday last. In the middle of the square is placed the statue of Sappho, by Preault, with the inscription *Sic transit Gloria Amoris* affixed to it. The distribution of the medals and [illegible] said for the 19th, at twelve o'clock precisely, in the grand saloon of the Louvre. No one but the members of the Institute, artists who have [illegible] decorated, the members of the jury, of [illegible] the artists as have [illegible] honourable mention awarded to their works, will be admitted to the [illegible] of distribution.

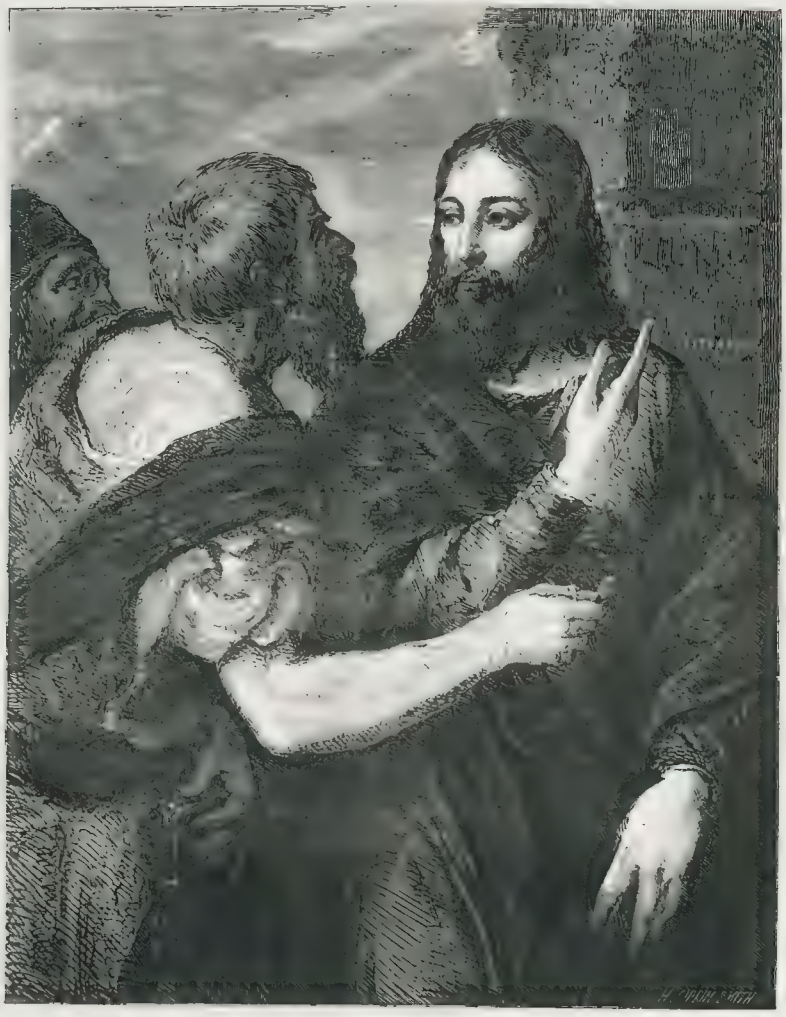
The finishing touch is now being given to the restoration of the fine [illegible] interior of the old gallery of the Louvre and in a few days [illegible] will be removed. The lower part of the building is a [illegible] to be completed, and in order to defend it from [illegible] attempts of injury there will be a deep trench, dug along it, enclosed by an iron railing, [illegible] it was in the time of [illegible] H. and Charles IX.

RARE SPECIMEN OF EARLY FLORENTINE ENGRAVING.

THE singular and interesting [illegible] following page is a facsimile of one of the earliest specimens of Florentine engraving in the British Museum, and represents a device of the Medici family borne in triumph by Cupids. It is, most probably, the design of Sandro Botticello Vasari mentions, in the life of that artist, that the elder Lorenzo de Medici assumed "Una impresa di broncon, che buttavono fuoco."

The original is one of twenty-four of the earliest known specimens of Italian engraving, which were collected by the learned antiquary Jerome Strenig, during a long residence in Florence, and afterwards taken by him to Germany. After his death they were sold by public auction and purchased by M. Otto, a wealthy merchant of Leipsic. So much interest was attached to these rare examples by Huber, that he has given a careful description of each print in the third volume of his "Manuel des Curieux et des Amateurs," printed at Zurich in 1809. By the writer they are attributed to Maso Finiguerra. He has also described them fully in his "Neue Nachrichten," printed at Leipsic in 1804, and gives *fac similes* of two. Bartsch caused facsimiles to be taken by Hubert and from one he had seen, which had passed into the collection of the Archduke Charles, he was induced to attribute [illegible] engraving of Carl[illegible] Cards. [illegible] not seen them, but from [illegible] added to Heller that [illegible] Baccio Baldini, [illegible] very justly, both in respect to

FINE ARTS.



"THE TRIBUTE MONEY," BY TITIAN.—JUST ADDED TO THE NATIONAL GALLERY.—(SEE PRECEDING PAGE.)

design and execution, and are probably by different hands, some bearing a strong similarity to those introduced in the "Monte Sancto di Dio," printed at Florence in 1477, and others to the set of Planets in the British Museum, two only of which were known to Mr. Ottley, and described by him at pp. 368, 69, 70, 71, 72, 73, 74 of his "Inquiry into the Origin and Early History of Engraving."

At the sale of the second portion of M. Otto's collection (embracing the Italian school), which took place in Leipsic in March of this year, fourteen out of the eighteen of these interesting early specimens of Engraving produced on the occasion were secured for the collection in the British Museum. It appears that six out of the original number of twenty-four had been parted with by M. Otto during his life.

EXTREMELY RARE EARLY FLORENTINE ETCHING.—JUST ADDED TO THE PRINT-ROOM, BRITISH MUSEUM.

HE ROYAL AGRICULTURAL SOCIETY OF ENGLAND.—MEETING AT LEWES.

THE CATTLE SHOW, FROM THE RIVER.

THE ROYAL AGRICULTURAL SOCIETY'S MEETING AT LEWES.

THE annual country meetig of the Royal Agricultural Society has been held at Lewes in thepast week; and, as in previous years, we shall illustrate the leading fatures of the gathering. The meetings, in themselves important, receis additional interest from their change of location every year, the selction being recommended by the fitness of the district for the furtherane of the objects of the society. These, it may be as well to resapitulate, arein the words of a contemporary, employed to embody such information oatained in agricultural publications, and in other scientific works, as has been proved by practical experience useful to the cultivators of the soil; to correspond with agricultural, horticultural, and other scientific societies, both at home and abroad; to encourage experimental agriculture; to promote improvements in implements and in the construction of farm buildings and cottages; to develope the sciences of agricultural chemistry; to ascertain the best means of eradicating weeds and of destroying insects injurious to vegetable life; to help the discoveryand introduction of new varieties of useful plants; to raise the standard of education amongst the agricultural classes; to assist in improving the veterinary art, and to encourage the best modes of cultivation and the best breeds of stock; and, finally, to contribute as far as possibleto the comfort and welfare of the abourer.

A most remarkable proof of the interest felt in the department of agricultural chemistry, and the large expectations entertained from it, is the announcement made a few days ago that the Society would confer a prize of £1000 for the discovery of an artificial manure as fertilising as Peruvian guano, and capable of being sold at £5 per ton. Such a discovery is not deemed impossible: yet the effect of it would be an average increase of production which Mr. Hudson, of Casslecare, told the Earl of Derby recently would be more than equal to any protective duty the Government could place upon corn.

In these several departments the society has worked efficiently;

THE EARL OF DUCIE, PRESIDENT, 1852.

and it is our present object to show in what proportion the meeting just terminated has contributed to this beneficial result.

Sussex, we need hardly remind the reader, is noted for its breed of oxen and of sheep. The Sussex ox bears a strong resemblance to the Devon, between which and the Hereford it holds an intermediate place, with all the activity of the first, and the strength of the second; with the propensity to fatten, and the beautiful fine-grained flesh of both. The site of this year's show being so remote from the short-horned districts, it would have been unreasonable to expect an extraordinary display of short-horned animals; but, taking everything into account, there was no ground for disappointment. The Southdown sheep are among the best for all dry hill countries where the grass is short: and their kindly properties have caused them to penetrate into almost all parts of the country.

Lewes, the county town of Sussex, is in a locality in itself conspicuous in the annals of agriculture; and the picturesque scenery around the town formed an advantitious feature in the event which, doubtless, had the effect of attracting its share of company. Two new and interesting features of this year's display were the exhibition of poultry and of Romney Marsh sheep. The former especially supplies a great blank in the annual shows of the Society.

The show-yards were situated on the south-east of the town, and close to the railway. The structures for the reception of cattle and implements were, as usual, capacious, and judicious in detail. Refreshment booths were erected near the show-yard; and, to judge from their number and size, there was no lack of accommodation for any imaginable accession of visitors.

Thursday, July 8, was the last day of receiving the implements, stock, &c., to be exhibited in the implement-yard, and arranged by the stewards for the judges' inspection.

The following is the official list of the meeting:—President, the Earl of Ducie. Stewards of Departments—Cattle: Mr. Jonas, Mr. Milward, Mr. Barnett. Implements: Mr. Miles, M.P.; Sir Matthew White Ridley, Bart.; Mr. Hamond. Finance: Colonel Austen, Colonel Challoner. Sale of Tickets: Mr. Henry Wilson. Receipts and Admission to Showyard: Mr. Raymond Barker. Pavilion Dinner: Hon. Robert Henry Clive, M.P.; Sir John V. B. Johnstone, Bart., M.P.; Mr. Shaw, Sir

TRIAL OF IMPLEMENTS, AT THE WALLANDS.

John Villiers Shelley, Bart. General Arrangement of Show: Mr. Brandreth Gibbs.

The proceedings commenced on Tuesday evening, when Professor Simonds delivered a lecture on "The class of diseases to which domestic animals are liable, owner to the presence of parasitical creatures in and on their bodies." The lecture was illustrated by several elaborately coloured diagrams. We select the following passage as generally interesting in a sanitary view, as well as being a subject on which there exists much misconception. In describing the class "hydatids," the learned professor, pointing to a diagram, observed, "that was the echinococcus, which was not met with in the brain, but was found in the substance of the liver, lungs, &c. That was the parasite constituting the disease called the measles in sheep. There were few external evidences of its existence, but if the animal were killed, its flesh would be found studded with small white spots, each of which, if carefully examined, would be found to contain a peculiar kind of hydatid (hydatid cellulosa). Thousands and tens of thousands existed in the flesh of pigs, and the disease was very improperly called measles. He believed that Irish pigs were chiefly affected by that kind of hydatid. Whether such flesh was fit for food or not, he would leave to those acquainted with the circumstance that every one of these spots (and there were fifty in the space of two inches) contained the germ of a living creature, capable of propagating its species; and, if it could not live in the human stomach, it could, at all events, resist for some time the action of the pickle in which the flesh was preserved. Whether the parasite constituting the disease called the measles in sheep

THE CRY OF ST. SWITHIN.

BY MRS. T. K. HERVEY.

Swithin, Bishop of Winchester, desired that he might be buried in the open churchyard, and not in the chancel of the minster, as was usual with other bishops; and his request was complied with. But the monks, on his being canonized, considering it disgraceful that he should lie in a public cemetery, resolved to remove his body into the choir, which was to have been done with solemn procession on the 15th of July. It rained, however, so violently for forty days together at this season, that the design was abandoned. A similar superstition is attached by the French to the *fête* of St. Medard.

SHAME! would ye store up an old man's dust,
Even though a Saint he be?
My coffin nails are red with rust,
For the heavens they weep for me.
Each sailing cloud, like a grey-winged dove,
Droppeth down in very ruth,
For like them have I hovered o'er what it is to love
The green wolds from my youth.

Still let me hear the wild winds rave,
Let me feel how fresh the sod
Where the willows droop and the grass-blades wave
And the children's feet have trod.
Light lies the mould on my time-bowed head,
Where I slumber so calm, so lone;
And yet ye would change the earth's wide bed
For four steep walls of stone.

Forbid it, ye dews of evenfall!
Forbid it, ye clouds of heaven!
Behold! the sky letteth down her pall,
And wide are her flood-gates driven.
Rush on, rush on, ye precious showers—
Sweet tides, pour down again;
Dear earth, the day shall yet be ours,
In the ransom of the rain.

We were not made of the crumbling lay,
To be pent, like beasts, in a stall;
Or to poison the air where the living pray,
While the earth has room for all.
A time shall come when the dead man's claim
Shall make its voice be heard;
And the brow of the fool grow red with shame
In the light of the living Word!

"Ashes to ashes!" So should it be,
"Dust unto dust," returned;
The leaf to the worm, and the worn-out tree
To the pure green grave it has earned;
Lift up then, O west wind, thy warning cry,
Ye torrents, speak trumpet-loud—
Be your tempest, swift-rushing, a sign on high,
As the lightning from the cloud.
* * * * * *

The wild wind ulls, soft drift the showers,
Long-silent steps recalling;
I hear Heaven's tear-drops on the flowers,
Like prayers on childhood falling.
Poor clay! thy day of dread is o'er;
Turn to thy rest again;
And a bonson sound for evermore
In the rushing of the rain!

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—The following preferments and appointments have recently been made: —*Minor Canonry*: the Rev. H. L. Jenner to Canterbury Cathedral.—*Lectureships*: The Rev. J. B. Lodge to the rectory and office of Master or Keeper of the Hospital of St. Mary Magdalen, Colchester; the Rev. E. Jackson, to Easthope, Salop; the Rev. T. B. Morrel, to Hersley-on-Thames; the Rev. E. P. Seymour, to Ilfracombe, Devon; the Rev. N. Bond, to Steeple-cum-Tyneham, Dorset; the Rev. C. Cotterill, to Branscombe, with Dunsby and Anwick annexed; the Rev. J. A. Parkinson, to Hazeleigh, Essex; the Rev. W. Bellett, to Hawkhurst; *Vicarages*: The Rev. K. G. Bailey, to Harwell, Berks; the Rev. E. W. L. Davies, to Adlingfleet, Yorkshire; the Rev. J. Eddowes, to Garton-on-the-Wolds, Yorkshire; the Rev. R. Shutte, rector of St. Augustin and St. Faith, and one of the minor canons of St. Paul's, to Tilbigham, Essex; the Rev. J. Y. Seagrave, to Bramham, near Tadcaster; the Rev. A. Thomas, to Beguildy, Radnorshire; the Rev. J. L. Ross, to Aberbury-cum-Waterborne Manden.

TESTIMONIALS.—The following clergymen have lately received testimonials of esteem and regard:—The Rev Walter Field, from the parishioners of Hessle, on his relinquishing the curacy of that place; the Rev. W. Bleasby, curate of Hessle, Devon, on his leaving the parish; the Rev. J. H. Hudson, curate of St. Luke's, Chesham-hill, Manchester, from the congregation.

The Dowager Countess of Dunraven has contributed £500 towards the repairs and enlargement of Adare church, near the family mansion, county of Limerick.

NEW COLONIAL BISHOPRIC.—Arrangements have been made for the formation of a bishopric in the Mauritius, which is at present under the ecclesiastical jurisdiction of the Bishop of Colombo. The society for the Propagation of the Gospel in Foreign Parts has contributed £3000 towards the endowment of the new see. The name of the first bishop of the new bishopric has not yet transpired.

ST. LUKE'S, OLD-STREET.—A new iron railing has been recently erected, in lieu of the old dead wall, and on the site where it stood, surrounding the burial ground attached to the parish church of St. Luke, Old-street. The expense of its erection was about £735.

The usual monthly meeting of the London Union in Church matters occurred on Tuesday, when a resolution was adopted, altering the rule prescribing regular monthly meetings of the members, so as to except the months of August, September, and October. The next meeting of the society, therefore, will not take place before November. The report of the committee presented no feature of interest calling for special notice.

EXHIBITION OF 1851.—The following circular has been issued this week to the various local committees of the late Exhibition:—"Circular to the Secretaries of Local Committees relative to the Distribution of Medals, Certificates, and Jurors' Reports. Office of the Royal Commission, 1, Old Palace-yard, July 12, 1852. Sir,—You are aware that her Majesty's Commissioners intend presenting to each of the exhibitors in the late Exhibition a medal, a certificate, and a copy of the jurors' reports, in commemoration of the event. This has been delayed until now in consequence of the great labour in preparing the jurors' reports. They are, however, now completed, and her Majesty's Commissioners have every reason to suppose that they may be able to commence the distribution on the 1st of August. It has been hitherto the intention to issue to each exhibitor a circular, on production of which at this office, he, or any agent he might appoint, might receive the medal, certificate, and jurors' reports intended for him. It has, however, been suggested that, in some localities, there is a wish that such distribution should take place in a more public manner, conducted either by the local committees, or by the municipal authorities of the place. Should such a wish prove to be general, her Majesty's Commissioners would consider it the r duty to meet it in every way in their power, and render the distribution of these honorary distinctions as gratifying as possible to the feelings of the exhibitors. I am, therefore, instructed by her Majesty's Commissioners to request you to be so good as to convene a meeting of the local committee for your district, and to ascertain their views upon the subject. Your committee will, perhaps, deem it proper to consult with the municipal authorities, but her Majesty's Commissioners would prefer continuing to communicate with the committees who have already rendered them such signal assistance, leaving the local arrangements entirely to them. Should your committee be disposed to undertake this duty, her Majesty's Commissioners would forward to you, free of expense, the medals, &c., for distribution, and they would be glad to cause to be printed, by their own printers, any circulars or other documents which might be necessary, but they would not feel themselves justified in incurring any further expenditure. As the time is now rather short, her Majesty's Commissioners will be glad of an early reply, conveying the opinion of your committee upon this subject; viz, whether they are willing to undertake a local distribution of medals, or whether they prefer its being entirely managed by the officers of the commission, as has been hitherto intended? I have the honour to be, sir, your obedient servant HENRY C OWEN, Captain Royal Engineers."

ROYAL SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS.—At a meeting of the committee of this society held on Monday—Sir R. Webb, Bart., in the chair—it was moved by Sir J. S. Lillie, and unanimously resolved, "That the secretary be directed to communicate with the various parochial and other authorities of the metropolis as to the necessity of providing water-troughs in certain localities, for the purpose of supplying dogs and other animals with drink in sultry weather, and to express to such authorities the willingness of the society to operate with them in contributing towards the expense of providing such troughs, and that the secretary do report the result to the next meeting of the committee."

CHESS.

TO CORRESPONDENTS.

A N—Mr Staunton, and then Mr Buckle
ABOU—I was played in November and December of the year 1842
DELTA—Hastings Wells—Mr Bolton's problem is quite correct. The error, if any, must be in the printing of the solution which shall be looked to
EDGBT—You should join the St George's Chess Club, Cavendish-square
A VICTIM—The system of playing Chess for a shilling stake in the Cigar Divans is productive of so much evil—both on account of its lowering the character and respectability of the game, and from its fostering a class of idle, disreputable players—that no one with a proper regard for himself or the science should ever be led to pay for money in a pub to room
F P, Newc——Club—The *Chess-players Chronicle* is published regularly on the 1st of every month, and, as the leading organ of communication for players throughout the world, is indispensable in every Chess Club worthy of the name
M P—! Judy is a lady. 2. Mr Cochrane's new work, "Loose Indian Chess Leaves," will be printed and published in Calcutta
AMATEUR—Sketches of British Chess players are under consideration
SOLUTIONS OF PROBLEM No. 439 by Alpha, Jerry, Sigma, M P, Rev J T N, R B, White Surrey, Murdoch, D D, R R of Ashford Jack of Shrewsbury, Bodger, Judy, are correct
SOLUTIONS OF PROBLEM No 440, by Judy, P J of Edinburgh, M F, F G, Falls-Chess, M N D, R R of Ashford Jamaica, Bodger, Beppo, R D M, M E H, L L B, X X X, T T B, Kaid Shavers, are correct
SOLUTIONS OF ENIGMAS by Judy, R R, Sigma, True Blue, Stultus, M P, G S, S P Q R, O P, are correct; all others are wrong

SOLUTION OF PROBLEM No. 438.

BLACK.	WHITE.	BLACK.	WHITE.
1. Kt to K 6th (ch)	K to Q B sq	3. Kt takes B	R to Q R sq
2. Kt to Q B 7th	R to Q Kt sq (best)	4. Kt to this 7th	

If White now play the Rook to Kt sq, he will be mated. He therefore takes the Q R Pawn, whereupon Black takes R with Pawn, and wins easily. This simple solution was overlooked by COSIO

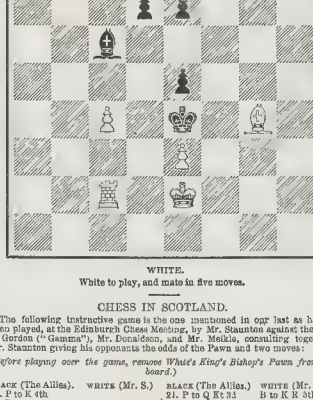
SOLUTION OF PROBLEM No. 439.

WHITE.	BLACK.	WHITE.	BLACK.
1. P to Q B 3d (ch)	K takes B	3. R to K B 5th	K takes Kt
2. Kt to Q B 5th (dis.)	K takes Kt	4. R takes Kt—Mate	

PROBLEM No. 442.

By F. DEACON, Esq., of Bruges.

BLACK.



WHITE.

White to play, and mate in five moves.

CHESS IN SCOTLAND.

The following instructive game is the one mentioned in our last as having been played, at the Edinburgh Chess Meeting, by Mr. Staunton against the Rev. T. Gordon ("Gamma"), Mr. Donaldson, and Mr. Meikle, consulting together; Mr. Staunton giving his opponents the odds of the Pawn and two moves:

(Before playing over the game, remove White's King's Bishop's Pawn from the board.)

BLACK (The Allies.)	WHITE (Mr. S.)	BLACK (The Allies.)	WHITE (Mr. S.)
1. P to K 4th		21. P to Q Kt 3d	B to K R 3th
2. P to Q 4th	Kt to Q B 3d	22. R to K 2d (h)	P to K Kt 4th
3. P to Q 5th	Kt to K 4th	23. P to K 5th	P to K R 4th (i)
4. P to K B 4th	Kt to K B 2d	24. P takes K R P	K R to K R 3d
5. Kt to K B 3d	P to Q 3d	25. Q R to K Kt sq	B to K B 7th (k)
6. B to Q 3d	P to Q B 3d	26. Q takes B	K takes K R P
7. P to Q B 4th	B to K Kt 5th	27. K to K 2d (l)	R takes R
8. Castles	P to K Kt 3d	28. R takes B	R to B 3d
9. Kt to Q B 3d	B to K Kt 2d (a)	29. R to K Kt 3d	Q R to K R sq
10. B to K 3d	Kt takes B	30. Kt to K Kt sq	P to K Kt 5th
11. Q to her B 2d (b)	B takes Kt	31. B to K B sq	Q R to K Kt sq (m)
12. R takes B	Kt to K Kt 5th	32. K to R 2d	K R to K Kt sq
13. B to K 2d	Castles on K's side	33. Q to K B 4th	P takes K R P
14. R takes Kt	Q to her Kt 3d	34. R takes Q R	R takes R
15. Q to her 2d	Kt to K 4th (d)	35. Kt takes P	R to K Kt 5th
16. P to K R 3d (e)	Castles on K's side	36. Q to K B 2d (e)	Q takes Q (n)
17. K to R 2d	B to K B 3d	37. Kt takes Q	R to K Kt sq
18. Q R to K B sq	R to K B 2d	38. B to K 2d	P takes Q P
19. P to K Kt 4th	Q R to K B sq (f)	39. K P takes P	R to B 3d
20. R to K Kt 3d	B to K Kt 4th (g)	And the Allies surrendered.	

(a) The second player has already a much freer and better game than he ought to have as their cramping odds

(b) P to K B 3d at this instant would have driven back the Bishop, or have compelled him to capture the Kt, and in either case have saved the Allies a world of trouble and embarrassment afterwards.

(c) Evidently to prevent White, after he had taken the Bishop, from planting his Bishop at Q 5th.

(d) By this nonsensical unlocked-for coup, White greatly improved the advantage in position which he had acquired.

(e) Their best resource, we believe. If they had ventured to take the Kt, the consequence would have been speedily fatal. For example—

BLACK.	WHITE	BLACK.	WHITE
16. P takes Kt	B to K B 3d	18. K moves	B takes R and wins
17. K to B 2d	Castles on K's side (ch)		

(f) The peculiarity of the situation affords him ample time for thus mastering the attack

(g) At this moment the position is very interesting. Any other move than the odd-looking one made would apparently have permitted the adversaries to gain time, and probably to extricate themselves from their thraldom

(h) They should rather, perhaps, have played this Rook to K Kt 2d; but in any case their position would have been unfavourable.

(i) To those who may be at the pains to analyse the movements from this crisis it will be quite evident that every step, both in the assault and the defence, was the result of mature deliberation. The advance of these Pawns, for instance, though at first sight it looks hazardous and premature, will be found the only mode of pressuring the attack with safety and vigour; for, hampered as they were, the combining players still retained the superiority in force of pieces, and required only a little breathing time to escape from their constricted and turn the tide of battle against their foe.

(k) We believe this to be the best move. If Black, in reply to it, had taken the offered Pawn, White would have moved his King to B 2d and then have brought the battery of his Castles to bear upon the K Kt's file with irresistible power.

(l) The correct play. If they had hazarded the obvious move of Kt to K B 4th, nothing could have saved them. *Example.*—

BLACK.	WHITE.
28. Kt to K B 4th	B takes K R
29. R takes B or (A)	P takes Kt, and wins easily

(m) Indispensably necessary before taking the K R's Pawn

(n) This, also, like the previous move, was an important preliminary to the capture of the Pawn.

(o) Their only resource.

BLACK.	WHITE
(A) 29. Q takes B	Kt to K Kt 5th (ch), and Black must lose their Queen.

CHESS IN RUSSIA.

GAME BETWEEN PRINCE OUROUSSOFF AND AN AMATEUR.

(Allgaier Gambit.)

WHITE (The Prince).	BLACK (Amateur).	WHITE (The Prince).	BLACK (Amateur).
1. P to K 4th	P to K 4th	11. Kt to Q B 3d	B to Q Kt 5th
2. P to K B 4th	P takes P	12. B to K B 4th	P takes P (a)
3. Kt to K B 3d	P to K Kt 4th	13. Q takes P	P to Q B 3d
4. P to K R 4th	P to K Kt 5th	14. Kt to K Kt sq (ch)	K to K 2d
5. Kt to K Kt 5th	P to K B 3d	15. B to K 5th	K to K R sq
6. Kt takes P	K takes Kt	16. Q to K Kt 3d	Q to K 2d
7. B to Q B 4th (ch.)	P to Q 4th	17. Q to K Kt (ch)	K to R 3
8. B takes P (ch)	P to K B 3d	18. Q takes P (ch)	Q to K Kt 2d
9. P to Q 4th	P to K B 6th	19. B takes Kt (ch)	K takes B
10. P takes P	Kt to K B 3d	20. R to K Kt 8th—Mate.	

(a) Why permit, by the taking of this Pawn, the entry of White's Queen into the game?

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The cholera is reported to be raging not only at Kalisch and Sierada but in the districts lying at the mouths of the Vistula, in Russia. In some of the villages on the frontier also the terrible malady has appeared.

It has lately become the practice on the Austrian railways to place a looking-glass on the top of the locomotive, inclined in such a way as to enable the engine-driver to see the whole train reflected, so that he can at once stop in case of accident. This plan has just been adopted on the railway from Brussels to Antwerp

It appears that the London Necropolis Company, established for the conveyance of the last remains of our common mortality is to ensure perfect isolation and seclusion on the one hand, and entire freedom from interference or communication with the traffic of the South-Western Railway on the other; thus evincing an unwonted sympathy with the feelings of even the humblest classes of mourners.

A notice has been lately issued by the Commissioners of Police, Whitehall-place, calling upon all owners of dogs which showed any rabid symptoms to keep them within their houses; and which stated that should any be found at large exhibiting appearances of suffering from hydrophobia, they would be destroyed by the police, who had authority to take that course.

His Excellency the Lord-Lieutenant has become vice-patron of the Royal Irish Yacht Club, and has subscribed £20 towards the approaching regatta in the Dublin Bay and Kingstown harbour.

The spiritual representative peers for Ireland in the next Parliament will be the Archbishops of Dublin, Bishops of Down, Derry, and Limerick.

There are at this moment no fewer than 20 British vessels employed on the coast of Africa for the suppression of the slave trade. Of these 9 are sailing vessels, and 11 steamers. Of the steamers, one (the *Teazer*) is a screw ship. The *Penelope*, of 650 horse-power, is the largest vessel on the coast.

The price of admission to the National Exhibition at Cork being now reduced to sixpence, it is visited daily by an average concourse of 3000 persons, and the receipts average about £60.

The *Gateshead Observer* says that the two railway companies, the York and Berwick and Leeds Northern, have been striving, like rival singers, who could go the lowest. A director of one of the lines of road, stepping into a booking-office on the other, where he believed himself unknown, accosted the clerk, saying to him, "What is your fare to Leeds?" Silly smiling, the clerk (who plumed his scoop.) blandly replied, "We follow you, sir—whatever you charge, our fare is sixpence less."

It is stated that the elections for Liverpool cost the Derbyites upwards of £30,000, and the Free-traders £4000.

By command of the Lords of her Majesty's Treasury, it is ordered that the lighthouses at the harbour of Portpatrick, Wigtonshire, be abolished on and after the 1st of January, 1853.

Out of three truck-loads of cattle on the Great Western Railway, two of the animals were struck dead by the lightning which visited that part of the country in the neighbourhood of Swindon a few days ago. What renders it remarkable is, that one animal only in each of two trucks was struck, and five or six other animals in each escaped uninjured.

In the neighbourhood of Abingdon (says the *Reading Mercury*) many farmers are ordering the feeding off their beans, the blight having made mistakes by shown itself. About Farringdon the blight among the beans is very general. A great many fields have been cut down and ploughed in, in order to prepare the land for turnips, swedes, and other roots.

The accounts from the different parts of the country state that haymaking is going on favourably, but the crop generally is not of the average weight.

At the last week's meeting of the Committee of the Catholic University, the sum of £8344 was announced to have been received since the previous monthly meeting, of which £3300 was from America, and £500, an anonymous subscription, through Archbishop Cullen. The amount altogether received from the United States since the despatch of the collecting missionaries to that country approaches £3800

The customs duties of the port of Dublin for the last week were £16,000, against £25,600 in the corresponding week of last year, making a difference of £9200. Tea, £4600; sugar, £1817: wine, £1500; spirits, £450, tobacco, £3910; miscellaneous, £993.

Three young females were drowned while bathing a few days ago, in the county of Kerry. They were sitting for a moment on a rock at the edge of the water in the Shannon, when a swell came and swept them off, and no aid being near they were all lost.

The total number of vessels employed in the foreign trade of the United Kingdom which entered inwards during the first five months of the present year was 9828, with a tonnage of 2,153,703, against 11,362, with a tonnage of 2,251,141, in the corresponding period of 1851. This shows a decrease of 1455 vessels, and of 98 000 tonnage, as compared with 1851. The foreign countries with reference to which there is a decrease of trade, are Russia, Sweden, Denmark, Prussia, German States, France (30 per cent.), Spain, Portugal (17 per cent.), Italy (100 per cent.), other European States (75 per cent.), and America. The only countries which show an increasing are Norway and Holland.

The declared value of all British and Irish produce exported to foreign countries within the five months ended the 5th of June, 1851, amounted to £27,396,926 against £27,965,731 in the corresponding period of 1851, and £29,927,948 in that of 1851. Although the declared value of all the cotton manufactures exported this year is less than that of 1851 by £533,000, the actual quantity of cotton manufactures exported in the present year exceeds that of last year by 5,090,609 yards.

The sum of £90,000 has been offered in private chamber to the Commissioners of Encumbered Estates, in Dublin, for the Earl of Shannon's Cork Harbour and Bandon property, including the arrears of rents, advowsons and tithes, but it was declined, as the day of public sale is so close at hand that no part of the estates will be disposed of by private contract.

It appears from the returns prepared by the Board of Trade, that during the five months ended the 5th of June last, we imported no less than 82,338 576 eggs, the whole of which were entered for home consumption. Of these, two-thirds were delivered to supply the London markets. The average monthly consumption of foreign eggs is 18,000,000 The importations of butter during the first five months of the present year were 117,737 cwt., against 129,946 cwt. in the corresponding period of last year.

The declared values of all the foreign watches imported into the United Kingdom in the five months ending the 5th of June, 1852, was £53,536, against £44,018 worth imported in the corresponding period of 1851. The quantity of gloves imported in the first five months of the present year was 1 364,189 pairs, against 1,645,499 in the corresponding period of last year. In embroidery and needlework there seems to have been a great falling off in the present year, when compared with 1850 and 1851. The total quantity imported in the first five months of 1852 was of the value of £40,870, against £64,100 in 1851, and £96,299 in 1850

The foreign exports of Indian meal at the western seaports at present, the price of that article of food has risen in the county of Mayo £1 per ton.

The Government have issued a circular to all clerks of petty sessions in Ireland, cautioning them against interfering in any manner whatever with the present elections.

The total quantity of pig and sheet lead imported into the United Kingdom in the official year 1851 was as follows:—Pig and sheet lead, 18,591 tons; lead ore, 2790 tons; and white lead, 47 tons. Of copper we imported 35,643 tons; of ore, 6442; of regulus, 1093; of pig, 2960; of wrought, 3950; of pigs and coarse, 29 tons. The declared value of the copper manufactures imported was £30,072 13s. 9d. The total quantity of tin imported in the year was 2987 tons, and of zinc, 24,986 tons.

From official returns just published, it appears that the Irish emigration for the years 1841 to 1851 was 1,694,181 persons. The decrease in the population of Ireland between 1841 and 1851 was 1,659,390.

The Commissioners of Works are empowered by an act of Parliament, which has just been printed, to construct an embankment and public road, to extend from Vauxhall-bridge to the Chelsea-gardens, which, when completed, will be a great improvement and benefit to the public.

One day last week, as the coachman of J. W. Empson, Esq., of Ripple Hall, near Tewkesbury, was walking round the fish-pond of that gentleman with a gun in his hand, he heard a noise in the rushes, and thinking it was caused by rats, he fired in the direction from whence the noise proceeded. On walking up to the spot to bag his game, he found that he had killed it very fine tench.

By a fire which some nights ago broke out upon the premises of Messrs. Badgate and Wilson, iron-founders, King-street, Liverpool, property to the extent of £20,000 was destroyed. It was, however, partly insured.

The directors of the West of England and South Wales District Bank have declared a dividend of eight per cent. per annum, free of income-tax, for the half-year ended 30th June last.

Charles Western, a sawyer, was killed a few days ago upon the premises of his employer, Mr. Oppenheim, a cabinet manufacturer, in Wisonstreet, Finsbury. The deceased was engaged in a saw-pit, engaged with another man in sawing a piece of timber, and was in the act of stooping with the downward motion of the saw, when a heavy pine log fell from above, and, striking him upon the back, fractured the spine, and killed him on the spot.

Information has been received that Mr. James St. Aloun Quin, principal cashier in the mercantile firm of Bright and Co., of Liverpool, had gone off with £1200, principal y in gold. A reward of £100 is offered for his capture.

In consequence of the great difficulty hitherto experienced in obtaining the assistance of men to work the floating fire-engines upon the river, the London Fire Engine Establishment have ordered a steam apparatus to be prepared, so that when a fire takes place a power equal to five or six land engines will be directed against the flames.

The *Wanderer* of Vienna states that the English Government has proposed that a European Congress shall be held at London to deliberate on measures to be taken in common relative to gold pieces, which are constantly losing their value.

From returns just issued it appears that in the month ended the 5th June there were only 564,187 gallons of wine imported. In the like period of the preceding year the quantity was 1,162,801 gallons.

GRAND ENTERTAINMENT ON BOARD H.M.S. "PRINCE REGENT," AT CORK.

GRAND ENTERTAINMENT ON BOARD H.M.S. "PRINCE REGENT," AT CORK.

THE inhabitants of Cork, Queenstown, and the surrounding districts, have recently been entertained in a manner at once tasteful and elegant, and peculiarly adapted for the season; the scene of festivity being the main and quarter-decks of H.M.S. *Prince Regent*, whose ward-room officers were the entertainers, on Monday evening, the 28th ult. The amusements commenced with a very creditable display of theatricals, got up by the officers of the ship, attended by a very fashionable assemblage, comprising all the rank and beauty of the "beautiful city." The officers of the squadron, forts, &c., occupied the quarter-deck; the main-deck was filled to overflowing with the ship's company, who, with great gusto, appeared to enjoy the performance. Immediately at the close of the farce of "Box and Cox," the jolly tars cleared the deck, and a brilliantly attended ball commenced, which was kept up with great spirit till about 3 o'clock in the morning. Refreshments were laid out in the ward-room and gun-room, and embraced every delicacy the season could afford; and nothing could surpass the politeness and courtesy of every officer to their delighted guests. Amongst the company were Sir W. Hackett, Mayor of Cork, and, his lady; Col. Bodder and family; Col. Westropp and daughters; Admiral Corry, in command of the squadron; Capt. Hutton, Col. Slade, Thos. Tobin, Mr. Shea, hon. secretary to the National Exhibition, and his lady; Capt. Graham, H.M.S. *Rodney*; Capt. M'Daughal, H.M.S. *La Hague*; Captains Quin, Symonds, King, &c.

FALL OF HOUSES IN ST. PAUL'S CHURCHYARD.

ON Monday an accident occurred in this locality, which, from the crowded state of the thoroughfares adjoining, there was every reason to apprehend was attended with loss of life.

It has, however, turned out most providentially that no personal injury has been sustained. The buildings which have fallen, belonged, up to a short time ago, to Messrs. Morgan, and Co., shawl-merchants and warehousemen, and stood on the south side of St. Paul's Cathedral; and in consequence of the new street now in course of formation being about to be brought into the churchyard, the adjoining house was pulled down, for the purpose of building the foundation of the west corner house at the opening thoroughfare. It is supposed that this circumstance had the effect of loosening the stronghold of the premises adjoining (Messrs. Morgan's), which, coupled with the fact that the building was very old, in some degree accounts for its destruction. It appears also that Messrs. Cooke, Sons, and Co., Manchester warehousemen, who have an establishment adjoining, had for some time past been making extensive alterations in their premises, having recently purchased the stock in trade and place of business belonging to Messrs. Morgan and Co. This concurrence of causes accounts for the accident. The only persons in the last-named building on Monday morning were two women and a man, and the latter, about eleven o'clock, having had his attention directed to the side-walls bulging, he at once gave an alarm to the two women, who immediately ran out into the street. They had barely succeeded in so doing when the principal walls and floors fell with a crash, and for the space of ten minutes the neighbourhood became obscured in dust. Several persons passing at the time narrowly escaped, and some of the bricks even fell upon the roof of an omnibus that was passing. After some time it was clearly ascertained that no person was killed or injured. Men were at once set to work to prop up the tottering walls of the adjoining houses, and remove the portions of the valuable stock in trade which might have become entangled in the *débris*, but the damage done in this respect does not amount to more than £50. The thoroughfare through that side of the church-yard was closed during the day, but it has since been restored to its usual freedom of circulation.

FALL OF HOUSES IN ST. PAUL'S CHURCHYARD ON MONDAY.

THE DEESIDE RAILWAY.—CUTTING OF THE FIRST TURF

THE ceremony of commencing the Deeside Railway (from Aberdeen to Banchory), by cutting the first turf, with the customary forms observed upon such occasions, took place on Monday week, at the point of the proposed line, close to the Deeside turnpike road, at a short distance above the Mains of Drum, and contiguous to the policies of the Mansion-house of Park, the seat of Alex. A. Kinloch, Esq. Here a raised platform was constructed under a large marquee, gaily decorated with flags and evergreens, for the accommodation of the directors and other officials, and on which also stood the ladies and gentlemen invited to be present. The whole was placed within a large enclosure, and surrounded by seats, arranged in a semicircular form, and capable of containing the vast number of spectators who were present on the occasion.

A tasteful mahogany barrow and steel spade, bearing the arms and motto ("*Non Degener*") of Mr. Kinloch, stood in readiness for the interesting operation to be performed by the fair lady of the manor. The weather was beautiful.

Somewhat before 10 o'clock, the hour appointed for the ceremony, a considerable number of vehicles arrived from Aberdeen and from other quarters, while for miles around the whole population turned out.

Shortly after one o'clock, Mr. and Mrs. Kinloch and the party from Park House arrived, and were received with tremendous cheering.

Captain Anderson, of the rural constabulary, with a few of his efficient force, kept the ground clear; and the Banchory band contributed their share to the general enjoyment.

The proceedings were commenced by an appropriate and impressive prayer from the Rev. Mr. Hutchison.

Mr. Duncan (chairman of the directors) then explained to the assembly the circumstances under which, by consent of Mr. Kinloch, they had taken possession of the ground.

Mr. Errington then conducted Mrs. Kinloch to the spot, and having put the spade in the ground, that lady, in a graceful manner, cut a pretty large turf, and placed it on the barrow, amidst loud cheers, which were continued when Master A. J. Kinloch, eldest son of Mr. and Mrs. Kinloch, immediately took hold of the barrow, and rolled it along the gangway. Two navvies then stepped forward, and commenced cutting the turf and loading barrows, which were trundled off with much good humour, by Mr. Kinloch, Mr. Duncan, Mr. Leslie, &c. Mr. Errington then addressed the chairman; and was succeeded by Admiral Gordon and the Lord Provost of Aberdeen, each congratulating the company upon the commencement of the great work. Mr. A. Pirie, jun., vice-chairman of the directors of the Aberdeen Railway, on their part, expressed their best wishes for the success of the undertaking.

Mr. Duncan again addressed those assembled, and stated that the directors were quite confident that every effort would be made by the engineers and contractors to finish the work in twelve months, and he trusted that, before August, 1853, every one of them would be riding on the Deeside Railway. (Loud cheers.) In conclusion, Mr. Duncan proposed drinking "God speed to the line;" joining with that sentiment "the health of the County Gentlemen and Agriculturists, and the Citizens of Aberdeen."

"Success to the Deeside Railway" (Mrs.

Kinloch being the first to pledge it) was then drunk to with enthusiasm, after which three hearty cheers were given for Mrs. Kinloch.

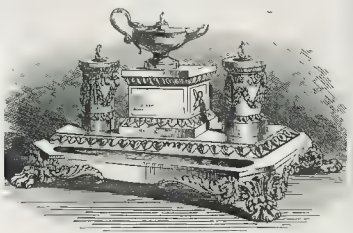
This terminated the public proceedings. Cake and wine, and other refreshments, were then liberally served to all upon the platform, and within the enclosure; and the assemblage gradually dispersed, apparently very much pleased with the ceremony. Mr. Willett is the resident engineer, and Messrs. Leslie and Davidson are the contractors.

About a hundred ladies and gentlemen who had assisted at the ceremony proceeded to the mansion-house of Park, on the invitation of Mr. and Mrs. Kinloch, and were entertained to a very elegant *déjeûner*.

TESTIMONIAL TO SIR JOHN PATTESON.

We now engrave the superb Silver Inkstand presented by the Metropolitan Common Law Clerks, on the 30th ult., to the Right Hon. Sir John Patteson, as a mark of their great respect, and of their gratitude for the uniform courtesy with which he had treated them while he officiated as Judge in the Court of Queen's Bench. The testimonial was presented by Mr. Breeze, chairman of the committee, who expressed himself on the occasion in very complimentary terms. Mr. Urquhart, the hon. secretary, then read and handed to Sir John an address.

Sir John appeared much gratified, and said that hardly anything since his retirement from the Bench had given him greater pleasure than this mark of the consideration in which he was held by a numerous and important body in the profession.



SILVER INKSTAND PRESENTED TO THE HON. SIR JOHN PATTESON, BY THE METROPOLITAN COMMON LAW CLERKS.

The testimonial is an elegant Inkstand, in burnished and frosted silver, weighing nearly 100 ounces, manufactured by Messrs. Widdowson and Veale, of the Strand. It bears a suitable inscription, and the arms and crest of his Lordship, and is a very tasteful work.

THE BEATSON TESTIMONIAL.

THIS handsome piece of plate, manufactured by Messrs. Hunt and Roskell, of Bond-street, has just been presented to Brigadier William Ferguson Beatson, K.S.F., late commanding the Nizam's Division of Cavalry, by the officers of that Brigade, as a testimony of their respect and regard of the services of this gallant soldier, of which the following is an outline:—Brigadier Beatson entered the service of the Hon. East India Company in the year 1831, and served in the campaign on the frontier of Arracan, during the former Burmese war. In the year 1834 he obtained a furlough, and returned to England; and in 1835, having the sanction of the Court of Directors, he served with the British Auxiliary in Spain, under Lieut.-General Sir De Lacy Evans. For his services in Spain he was created a Knight of the order of St. Ferdinand. Returning to India in 1837, he was soon afterwards commanded to raise a military force in the then disturbed districts of Bundelcund, composed of

THE BEATSON TESTIMONIAL.

cavalry, artillery, and infantry, and this force he brought into an excellent state of discipline and order. With it he besieged and captured the fortresses of Jigaee and Chirgong, held by bodies of refractory Arabs and Rohillas, and effectually subdued the spirit of revolt in those districts, by all parties submitting to the military forces. In 1844, when Sir Charles Napier commanded in Scinde, and being in want of reinforcements, several regiments in the Bengal army, when called upon, refused to proceed to that newly-conquered province on field service, the Bundelcund Legion, under Brigadier Beatson, although only a local corps, and raised for particular service within certain limits, to a man volunteered to proceed to Scinde, and serve there. The Government of India at this time feeling itself so much embarrassed by the refusal of the regular troops to proceed on service, and being fearful that the spirit of discontent and mutiny that had already evinced itself in some of the regiments might spread throughout the army, rather than put other regiments to the test of refusal, readily accepted the services of Brigadier Beatson and the corps under his command. On the completion of their period of service in Scinde, including Sir C. Napier's hill campaign, the Government felt that the Legion had performed such efficient service, that the whole corps was transferred to the regular army of Bengal, participating in all the advantages of superior pay and pensions thereunto attached. Brigadier Beatson had the satisfaction to be informed by the highest authority in India, that the "Government felt grateful for the services of his noble Legion" at that critical moment. He was soon afterwards appointed Brigadier commanding the Nizam's Cavalry Division. A revolt having broken out in certain provinces of the Nizam's dominions in the beginning of the year 1851, Brigadier Beatson took the field with a well-appointed force of the three branches of the service, namely, artillery, cavalry, and infantry; and in the month of April he besieged and reduced to submission the fortresses of Race Mhow and Dharoor, both mounted with some heavy guns, and defended by determined bodies of Arabs and Rohillas, the most desperate and warlike class of people in India. For these actions, in which he commanded, and on several other occasions, Brigadier Beatson has received the thanks and approbation of the Government of India for his distinguished and well-merited services.

The following is an extract from the General Orders by the Resident on the part of the Nizam's Government, dated Hyderabad Residency 10th March, 1851:—

Brigadier Beatson, having tendered his resignation of the command of the Nizam's cavalry from the date of his embarkation at Bombay for England,

SOIREE OF THE SUBURBAN ARTISAN SCHOOLS, IN THE FLAXMAN HALL, UNIVERSITY COLLEGE.—(SEE NEXT PAGE.)

DEESIDE RAILWAY.—CUTTING OF THE FIRST TURF.—(SEE PRECEDING PAGE.)

whether he is proceeding on private affairs, the Resident begs to express his entire approval of this officer's conduct during the time he has exercised the important command of the Nizam's cavalry division. Brigadier Beatson has not only maintained, but improved, the interior economy and arrangements of the cavalry division; and the value of his active military services in the field has been amply attested, and rendered subject of record in the several instances of Kamgaon, Arnee Rase Mow and Dhoor.

(Signed) GEO. JOHNSTON, Major, Military Secretary.

SUBURBAN ARTISAN SCHOOLS.

ON Tuesday week the president and committee of these schools received their friends and supporters at a *soirée* in the Library and Flaxman Hall of University College, London

The Flaxman Hall is an octagonal room in the centre of the University College, and is lighted by the dome, which forms a striking and beautiful feature of the building. In the Hall there are four doorways, one opening on the magnificent portico, another leading to the staircase communicating with the cloisters and quadrangle below, another with the library, and the fourth leading to various apartments in the southern wing of the building; whilst in the other four sides of the wall are architecturally arranged a portion of the series of models of the works of the great sculptor, Flaxman, given to the University by Miss Denman. In the centre of the Hall, standing on a pedestal, is the celebrated group of the "Archangel Michael Vanquishing Satan;" and in smaller panels in the walls are bas-relief compositions, the subjects—classical, mythological, and funereal. Many of these subjects are exquisitely beautiful, and are the more valuable as being the casts from which the marbles have been sculptured, and not casts from sculptures. They, therefore, show all the spirit of the master mind and hand of the artist. Amongst the subjects in relief are the designs for the monuments of Captain Miller, in St. Paul's, the Poet Collins, in Chichester Cathedral; a classic group called "Instruction," "the Good Samaritan," "the Raising of Jairus's daughter," &c. In a small room adjoining the Hall there are numerous original works of Flaxman in the course of arrangement; and we believe that there are many more of his handiworks in the possession of the University, which will in time be put up in suitable apartments. On the staircase is placed the exquisite model of Chapman, which excited so much notice at the Great Exhibition last year; also, a colossal group by Flaxman; besides several designs for monuments, amongst them that for the statue of Sir Joshua Reynolds. The appearance of the Hall when lighted was extremely beautiful, and its effect was heightened greatly by the immense space under the portico being thrown open as a promenade; and the contrast from the brightly lighted rooms to the darkness outside (for the portico was not illuminated) was positively refreshing, the temperature being extremely oppressive. The library, a very fine room, recently decorated and fitted up by J. L. Donaldson, Esq., contained an interesting collection of works of art, consisting of Daguerreotypes, lithographs, drawings, bronzes, gold and silver work, pottery, book-binding, wood-carving, &c., contributed by Messrs. Hunt and Roskill, Elkington and Co., Leighton, Rogers, Minton, Claudet, Fenton, Jackson and Graham, Thorneycroft, Marochetti, &c. And on the walls were pictures by the late J. M. W. Turner, R.A.; Sir David Wilkie, J. E. Millais, Cave Thomas, F. Maddox Brown, &c

The Rev. D. Laing, president of the society, was in the chair; and the report was read by Mr. J. Neville Warren, C.E., the honorary secretary. The success of the North London School of Modelling and Design, Camden-town, has been great during the past year, about six hundred working men having availed themselves of the instruction here provided. An appeal was made for funds to support this institution, and to institute similar schools in other parts of the metropolis, for instruction in the principles of taste, and the practice of ornamental art.

The various drawings from the models, &c., contributed by the pupils were highly creditable; many of the female students showing great skill in the manipulation of their works, and all of them reflected great credit on the teachers, under whose superintendence such good progress has been made.

The geometrical class, which is under the superintendence of Mr. J. K. Colling, has, we understand, been very successful. The drawings which were exhibited, although artificially arranged, were not on that account highly interesting. As specimens of the draughtsman's art many of them certainly would not bear being too strictly criticised; but it must be remembered that some have been done by the hard hands of masons and other workmen by day, who, after their labours, sit up late at night and work with the chisel and hammer, while others are the productions of boys not above thirteen or fourteen years of age. Still, there is exhibited throughout the whole of them a general understanding and appreciation of the subject delineated, and a degree of neatness of manipulative value to the workman than the production of delicately executed drawings. The subjects of the drawings were various architectural details, as Gothic windows, doors, tracery, forms of mouldings both Gothic and classic, and also a series of designs for a Gothic church.

We understand that it is the intention of Mr. Colling, during the next year, to give a series of lessons on architectural botany—a subject which cannot fail of being of the greatest possible benefit to all those connected in any way with decoration.

The kindness of the college authorities in granting the use of it on this occasion deserves acknowledgment.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED

SIR GEORGE HENRY SMYTH, BART., OF BREREGHURCH HALL, ESSEX.

THIS warm-hearted hospitable country gentleman died on the 11th inst. For many years he sat in Parliament for the town of Colchester, almost uninterruptedly from 1835 to 1850, in which latter year he retired in consequence of ill-health, and was succeeded by the present member, Lord John Manners. The baronetcy, which the deceased inherited at the decease of his father, the late Sir Robert, in 1802, was conferred 30th March, 1665, on Robert Smith, of Upton, Barrister-at Law. Sir George Henry Smyth was born 30th January, 1784, and married 29th July, 1815, Lucy, daughter of George Elmore, Esq., of Penton, Hants, by whom (who died 12th September, 1851), he had an only daughter, Charlotte, who married Thomas White, Esq., of Whetherafield Hall, Essex, and died 17th October, 1845, leaving issue.

GENERAL THE HONOURABLE ROBERT MEADE.

THIS gallant officer, second son of John, first Earl Clanwilliam, by Theodosia, his wife, only daughter and heiress of Robert Hawkins Magil, Esq., of Gilhall, Downshire, was born 29th Feb., 1773, and has, consequently, attained the 80th year at the period of his decease, which occurred on the 11th inst., at his residence, in Bryanston-square. General Meade entered the army in 1787, obtained his lieutenancy in 1793, and after distinguishing himself in various services, attained was made full General 10th Jan., 1837. Since 1823 he has held the Colonelcy of the 12th Foot. He married, 20th June, 1808, Anne Louisa, daughter of the late Sir John Dalling, Bart., and had a numerous family. His eldest son, Robert, died 23d January, 1851. Of his daughters, the eldest, Theodosia, is wife of Robert Alexander Shafto Adair, Esq.; the second, Louisa, of the Hon. George Liddell; the third, Anne, of Sir Dewd Thurlow Cunyngham, Bart.; and the fourth, Catherine, of Captain Mortimer Ricardo. The three youngest daughters are unmarried.

SIR FREDERICK BEILBY WATSON, K.C.B.

THE decease of Sir Frederick occurred on the 10th instant, at New-place, St. John's Wood. He was born in 1773, the son of William Watson, Esq., Librarian of the Treasury. For many years he filled the office of Master of the Household to their Majesties George IV. and William IV., and was appointed at the accession of the present Sovereign. The honour of Knighthood was conferred on Sir Frederick, when first nominated to the Household, by George IV. Sir Frederick Watson was distinguished for his kindness and benevolence.

THE RIGHT HON. SIR EDWARD THORNTON, G.C.B.

THIS eminent diplomatist died on the 3d inst. in the 86th year of his age, after a long illness. He was educated at Pembroke College, Cambridge, where he graduated as third wrangler in 1789, and became one of the Fellows. Having adopted diplomacy as his profession, he soon gained distinction in it. In 1812 he was sent as Envoy Extraordinary and Minister Plenipotentiary to the Court of Stockholm, and for his services there received the insignia of the Order of the Bath. He subsequently proceeded, in the same position, to the Courts of Rio and Lisbon, and while in Portugal had conferred on him, in 1825, the title of Conde de Casellnas, a dignity which he was authorised by his own Sovereign to accept. Sir Edward enjoyed a pension of £1786. He resided principally at Wembury House, Plymouth.

PROPERTY AND INCOME TAX.—A parliamentary paper just issued states that the assessment made under the above taxes was, in 1843, £1,081,582, and the nett amount received £1,009,801; in 1844, the assessment was £1,081,540, and the nett amount £1,036,377; in 1845, the assessment was £1,576,769, and the nett return £1,542,075; in 1846, the assessment was £1,717,123, and the nett amount £1,683,181; in 1847, the assessment was £1,768,420, and the nett produce £1,734,863; in 1848, the assessment was £1,754,363, and the nett amount £1,708,064; in 1849, the assessment was £1,984,601, and the nett amount was £1,947,406; in 1850, the assessment was £1,970,781, and the nett amount £1,929,611; in 1851, the assessment was £1,956,728, and the return £1,853,615.

THE THEATRES.

HER MAJESTY'S.

Bellini's "Puritani" was given for the second time last Saturday; the singing and acting of Mdme. de Lagrange, Gardoni, De Bassini, and Lablache were much applauded.

On Tuesday night, Donizetti's "Maria di Rohan" was given for the fourth time.

On Thursday Rossini's "Otello" was revived, with Mesdame de Lagrange as *Desdemona*, Bettini as the Moor, Calsolari, *Rodrigo*; De Bassini, *Iago*; Lablache, *Elmiro* (*Brabantio*); and Ferrucrirali, the *Doge*. This cast was strong in the *ensemble*. Madame de Lagrange is a correct and conscientious *artiste*, who is always thoroughly prepared for her work, and, if not dramatically great, proves that her deficiencies do not arise from want of judgment. Bettini was heard to infinitely greater advantage than in any previous character. The mis'edition of Lablache is one of those grand histrionic displays of genius which rescues from obscurity a most trifling part, and would alone be a source of attraction in *Otello* (*Salzolaro* and *De Rossini* have also little to do in their respective assumptions; but intellect, taste, and tact will tell in the most insignificant situations. The opera was well received, and the leading *artistes* had honourable ovations bestowed on them.

ROYAL ITALIAN OPERA.

Donizetti's "Lucrezia Borgia," and the last act of his "Martiri," were Saturday's entertainments. On Tuesday was the fifth representation of Meyerbeer's "Prophète." On Thursday, for the extra night, Spohr's "Faust," the second of the five promised novelties in the prospectus, was produced under the direction of the composer, who on this occasion occupied Costa's post in the orchestra as conductor. Although Spohr has derived his public mainly half a century as a dramatic composer, this is only the second time that one of his lyric works has been presented in its integrity. In April, 1831, under Sir G. Smart's direction, "Jaxr and Zemira" was produced at Covent Garden Theatre, with the Misses Inverarity, Cawse, Messrs. Wilson, Penson, Morley, and Evans; but the "Alchemist," which was executed at Drury Lane, was a selection from no less than five of Spohr's operas. In this case, Spohr has turned to account not only the old puppet plays, or *marionette* "Fausts," but has freely made use of our own Marlow's play of 1594, one of the earliest writers who was struck with the legend of Dr. Faust's fate, and whose dramatic poem, which Peele adapted for the German stage, and was lately performed at the St. James's Theatre. Faust of Wurtemburg must not be confounded with Faust the printer: the former died about 1536, the latter about 1466, of the plague. Calderon founded his "El Magico Prodigioso, the St. Cyprian of Antioch, on the Faust compact with the demon. Probably there is no existing fable which has given rise to a greater number of poems, tales, romances, translations, dramas, pantomimes, ballets, operas, &c., than "Faust." Retzsch's outlines have immortalised the incidents; and the pencils of Rembrandt, Von Sichen, and Cornelius of Munich, have scarcely less helped to give reality to the learned doctor's magical doings. In Spohr's opera the scene opens in Strasburg, follows the course of the Rhine down to Aix-la Chapelle, and introduces Goethe's incantation of the witches on the Blocksberg. Marlow's awful catastrophe is slightly altered in the operatic finale. The *Margaret* of Goethe is family copied in *Rosina*, who has for lovers *Francesco* and *Wohlhaldt*, besides the doomed *Faust*. The librettist has striven to impart interest to the character of *Faust*, by making him the rescuer of *Cunegonda*, who is beloved by *Ugo*, from the hands of *Gulfo*, one of those feudal Barons of the Rhine who, in ancient times, did not hesitate to drag nuvices from a convent after selling it on the market, in order to obtain their election. After aiding *Ugo* to save *Cunegonda*, the satanic influence of *Mefistofele* is exercised, in order to induce *Faust* to become also a *Gulfo*; and it is thus that the demoniac contract is fulfilled: poor *Rosina* throwing herself into the Rhine. *Cunegonda* being deprived of the faithful *Ugo* by *Faust*, after killing *Gulfo*, is left inconsolable, like *Don Giovanni*, into the hands of evil spirits.

That Spohr had to deal with a wretchedly conceited poem there can be no doubt, and the difficulties of the composer have been increased by the necessity of writing recitatives for the Italian adaptation. In the original score the story was divided into two acts; but in the present version there are three—a better arrangement, certainly, than the division by quarter of the Grand Opera. Nowhere, in the sestetto and chorus "Lang mogen die Theuren leben." Many of the vocal pieces are familiar to the concert-room frequenters in this country; amongst them may be cited the Scena for *Faust*, "Ich bin unmuthig," and in *Faust*, "Segni oh cara; the great scena of *Cunegonda*, "Si lo sento," the tenor air of *Ugo*, "Si spera," with its accompanying chorus; the incantation scene used in "Azor and Zemira," and *Rosina's* cavatina in two-four time, "Durft ich mich," which forcibly reminds the hearer of the "Rose gently blooming," by the same composer

Thursday's performance, fine as it was, and forcibly applauded by the audience, will not always be so popular as "Faust." The monotony of the composer's style are fatal defects. The mechanism is marvellous, but the uniformity of Spohr's appliances is wearisome to the last degree. The Mendelssohn school is not sufficiently dramatic, but the total loftiness to grapple with strong dramatic points is completely wanting in Spohr, he never excites by the display of overwhelming emotion; his course is calm unruffled, and scarcely characterised by alternation of passion, one phrase supplies the invariable key to the next. Spohr has sentiment, but little passion; tenderness, but no impulse, equality, but no grandeur. A chapter might be written on the splendid acting and singing of Bettini and on the demoniac action of Formès; something might be added to the praise of Tamberlik, who was encored in his air, small as were his materials; sought to do justice to the executive.

Spohr was much cheered on taking his place in the orchestra, and was called and a very emphatic encomium ought also to be passed on Madme Castellan, who has such an ungrateful part; but space warns us that another occasion must be for at the close of the first and last acts.

HAYMARKET THEATRE.—Mr. Frederick Webster's benefit (an extra night) is announced for Thursday next, when the performances will be sustained by the entire strength of the Haymarket company, and other distinguished artists, among whom is Mr. King, the popular tragedian, from the Theatre Royal, Dublin.

CREMORNE GARDENS.—On Monday and Tuesday the Licensed Victualler's Society held their annual *fête* in Cremorne Gardens, which were crowded, not only by company immediately interested by the business of the association, but by thousands who were attracted by the announced amusements. On Monday the inmates of the Licensed Victuallers' Asylum were present; and on each day the asylum children were admitted to the number of seventy entertained. The amusements were admirably sustained, the Cirque Oriental and the ballet being the paramount attractions.

VAUXHALL.—The past week has proved that favourable weather was alone required to fill the gardens, in which there is so much and such variety of amusements, combined with the picture-que beauty and brilliancy of the scene. A new mode of suspending illuminated flowers amidst the foliage has a novel and pleasing effect, and the grounds are brilliantly lit with innumerable lamps on the arcades. The concert programmes are selected with taste and judgment, while the ballet, with the Parisian dancers, and its gorgeous last scene, continues to be the great attraction. The equestrian feats of Franklin, the performer on the *corde volante*, is to appear during the ensuing week. The sensation he produced at the Cirque Olympique at Paris will not be forgotten—at his last appearance he was presented with a valuable diamond ring by the Prince President. Amongst the visitors during the week we observed the Duke of Cambridge, the Duke of Leinster, the Dowager Lady Glasgow, the Marchioness of Cottingham, Lord Chesterfield, the Earl and Lady Glengall, the Hon. James Macdonald, Lady Corbet and party, Baron Rothschild, &c.

THE HOPS.—The accounts of the hop crop in Kent are generally favourable The *Worcester Chronicle*, however, says: "We have no improvement to note in the growing crop of hops, which is still covered with fresh vermin where any vigour remains in the plant, and the prospect for the growers are becoming daily more gloomy."

The *Industrial Calaisien* says—"A German has laid a wager that he will swim across the Channel from Calais to Dover!" We have not heard on what day the wager is to come off, but we can state that the German was yesterday practising his strength in the sea in front of this place."

On Tuesday afternoon, the *Star*, a Ramsgate steamer, came into collision with a large brig, the *Rose Castle*, at the Nore. The brig was entering the river within half a mile of the Essex shore, and just above the spot at which the *Duchess of Kent* was run down by an Antwerp steamer, a short time ago. Although the main mast of the *Star* was broken into splinters by the bowsprit of the *Rose Castle*, no injury was sustained by any of the numerous passengers who crowded the deck of the former

EMIGRATION, VIA LIVERPOOL.—The Government returns show that the number of persons sent to the United States during the past month was 20,647, a falling off, as compared with the month of June, of upwards of 6000. They were principally Irish of the humbler classes. The emigration to Australia continues to flow on without abatement. The Government *depôt* at Birkenhead is continually full of emigrants, principally from the Highlands of Scotland. Two vessels sailed from the river last week, each containing between 300 and 400, and this week four others will follow. Besides these, vessels are sailing nearly every day in connexion with some of the Liverpool and Australian lines.

MUSIC.

CONCERTS OF THE WEEK.

The fashionable concerts of the season have come to a close this week. On Tuesday was the eighth and final *matinée* of the Musical Union, the scheme of which included Mozart's quintet in G minor, and Beethoven's quintet in C, and trio in E flat, Op. 70, executed by Vieuxtemps, Sivori, Charles Hallé, Mellon, Ourry, Webb, and Piatti; and Lieder by Mendelssohn, sung by Herr Von der Osten. Besides the talent just enumerated, Mr. Ella, the director, has introduced in the past season Joachim, Laub, the brothers Mollenhauer, Moralt, Pelitzer, Wylde, Lazarus, Bottesini, Paque, Hallé, Clarke, and Mdme. Pleyel.——Mdme. Ourry, who has maintained her position as one of the most accomplished *pianistes* of the day, amidst the influx of continental celebrities, gave her annual *matinée* on Wednesday, at her residence, 37, Great Marlborough-street, which was, as usual, fashionably attended. Besides her own clever performances in works of all schools, the abilities of Piatti, Sainton, and M. Ourry were called into play, and the vocal gleanings were sustained by Miss Louisa Pyne, Mdlle. Dobre, Signor Gardoni, and M. Levasseur, Messrs Benedict, Vera, and Bil etta, being the accompanists.——Herr Molique, the distinguished violinist and composer, had his third and final *soirée musicale* at the Queen Anne-street Rooms, on Wednesday.——On Thursday morning Mr. R. Blagrove presented his last concertina concert at the Mortimer-street Rooms, aided by the Misses Birch, Miss Dolby, Mr. F. Bodda, Signor Bottesini, Herr Hausmann, Mr. C. Salaman, Mr. Wood, and Messrs. G. and J. Case.——The tenth concert of the Réunion des Arts took place last Monday.——Mdlle. Parodi, formerly of her Majesty's Theatre, gave a *soirée musicale*, on the 9th inst., at the New Beethoven Rooms, assisted by Mdme. Pacconi-Tasca, Signor Gardoni, Herr Pasner (pianist), Mr. John Thomas (harpist), and Mr. Durand, with Mr. F. Mori as accompanyist. Mdlle. Favanti sang "Una voce," and the duo with *Figaro*, from Rossini's "Il Barbiere," and an Irish ballad by F. Machen. Her voice is of extraordinary compass, and some of the cadenzas that she executed were quite as wonderful as those now so much in vogue of Mdme. de Lagrange. It would be interesting to hear Mdlle. Favanti on the lyric stage, for which her style seems best adapted, to ascertain how far Italy has improved her style since her last appearance in this country.——Herr L. Rakemann, the pianist, had a morning concert last Saturday, at the Queen Anne-street Rooms, with the co-oper

NATIONAL SPORTS.

The racing fixtures for the ensuing week stand as follows: Tuesday, Stamford (two days); Wednesday, Knutsford (two days); Thursday, Nottingham and Abingdon (each two days); Friday, Guildford (one day). Good sport is promised at Stamford and Nottingham.

CRICKET FIXTURES.—Monday: at Lord's, the Gentlemen v. the Players (the latter the favourite); Wednesday, at Chertsey, the Oval v. the Chertsey Club; at Tunbridge Wells, two eleven of the Club; and at Canterbury, the Purton v. the Lansdowne Club; Thursday, at the Oval, the M. C. C. and ground v. the Surrey Club and ground (return match); at Brighton, Kent v. Surrey; and at Gore Court, return match between the Vine and Gore Court Clubs.

AQUATIC FIXTURES (Regattas).—Monday, at Barkside, and St. John and St. Margaret's, Westminster; Tuesday, Royal Irish (Dublin) and Ryde; Wednesday, Putney Watermen and Margate.

TATTERSALL'S

MONDAY.—So many of the gentlemen are now occupied in electioneering, that there is little for the present reckoned, and questions, therefore, are chiefly made up from offers.

LIVERPOOL CUP.			
4 to 1 agst Poodle	6 to 1 agst Goldfinder	12 to 1 agst Celsordale	
6 to 1 —— Louis	11 to 1 —— Cossack	16 to 1 —— Banshee	
	35 to 1 agst Sheriff		
GOODWOOD STAKES.			
12 to 1 agst Chief Justice	20 to 1 agst Champion	30 to 1 agst Weathergage	
16 to 1 —— The Brahmin	25 to 1 —— Backbiter

THURSDAY.—No betting

LIVERPOOL RACES.—WEDNESDAY

CROXTETH STAKES.—Connore (Wells), 1. Mountain Deer (Hiett), 2.

HANDICAP PLATE of £70.—Orbaldistan (W. Scarlett), 1. Sancha (Hiett), 2.

MERSEY STAKES.—Sister to Mountain Deer (Hiett), 1. Charming Woman, (Marlow), 2.

LANCASHIRE OAKS.—Butterfly (Marlow), 1. Piot (Flatman), 2.

There was no race for the Produce, and the Scramble Handicap did not fill.

THURSDAY.

THE QUEEN'S PLATE.—Butterfly, 1. Mountain Deer, 2.

THE CUP.—Colombard, 1. Goldfinder, 2.

THE FOAL STAKES.—Wingwood walked over.

PRODUCE MATCH.—Umbrica, 1. Miss Sarah filly, 2.

THE DERBY HANDICAP. Ethiron, 1. Faux-pas, 2.

FRIDAY.

THE STANLEY STAKES.—Newton Abbot, 1. Sister to Carucara, 2.

THE LIVERPOOL ST. LEGER STAKES.—Caracara, 1. Piot, 2.

THE GREAT LANCASHIRE PRODUCE STAKES.—Sister to Mountain Deer, 1, Auld Acquaintance, 2.

ILSLEY RACES.

THE BERKSHIRE STAKES were won by Mr. Etwall's Busbranger.

THE ILSLEY STAKES were won by Mr. Gulliver's Chilton.

THE "BERKSHIRE RIDERS' RACE was won by Mr. Rimon's Vesta.

THE RIDGEWAY STAKES by Mr. Laud's Magician.

THE BLEWBURY STAKES by Mr. Laud's Thrush.

GREAT YARMOUTH ROADS ANNUAL REGATTA.

This regatta occurred on Tuesday last. A splendid sunny day, with a brisk breeze from E.N.E., making the ground and pleasure boats ride to their anchors, induced crowds of spectators to congregate to witness this annual treat to all lovers of aquatic sports. Special trains from Norwich, Lowestoft, Lynn, and other towns, at cheap fares, were thronged with pleasure seekers; the beach for nearly one mile in front of the Jetty was covered with dense mass of human beings; the Jetty itself being covered by a select number of the small change of fashion. Captain Roberts, R.N., officiated as umpire. The sports commenced with

A PURSE OF 30 SOVEREIGNS for yawls not exceeding 30 to 8, belonging to a Royal Yacht Club—Lord Londesborough's *Marquito*, 1, beating Mr. Craigie's *Volante* and Mr. Bell's *Scout*. It was first arranged that these yachts should only have three hands round, but the proprietors of the *Marquito* and *Volante* refused to sail unless it was made five hands, since it was at first presented to.

ROWING MATCH for 3 sovs., distance ¼ mile. Three boats, each with twelve hearty-looking men started, which terminated as follows: *Teaser*, of Southwold (white), 1. *Tit Tiy*, of Lowestoft (black), 2.

A PURSE OF 30 sovs for boats not to exceed 12 sovs, second 5 sovs, third 3 sovs.—*Queen Victoria*, of Hoilsham, 1. *Reindeer*, of Yarmouth, 2. *Royal Victoria*, of Yarmouth, 3.

SCULLING MATCH, 3 sovs, by YACHTS.—T. Lucas, Esq., *Waveney*, 1. J. Kitton, Esq., of Iswich *Kitton*, 2.

The sports did not terminate until past six o'clock.

WEDNESDAY.

A PURSE OF 20 SOVEREIGNS for YACHTS not exceeding 20 tons.—Five started. W. Kitton, Esq., *Zuleika*, 1. R. Ellis, Esq., *Ariel*, 2.

A PURSE of 20 SOVEREIGNS for YAWLS: first to have 12 sovs; second, 5 sovs; third 3 sovs.—*Royal Victoria*, of Yarmouth, 1. *Eclipse*, of Lowestoft, 2. *Reindeer*, of Yarmouth, 3.

ROWING MATCH for 3 sovs.—*Cricketer*, of Southwold, beat the *Star*, of Yarmouth, by six lengths.

A PURSE of 20 SOVEREIGNS for FISHING SMACKS and FISHING LUGGERS: £10 for first, £7 for second, and £3 for third.—H. Swan's Lugger, of Yarmouth, 1. W Church's smack of Lowestoft, 2. W. Shell's, of Hull, *Jenny Lind* smack, 3

PRINCE OF WALES YACHT CLUB.—The match for the Commodore's Cup, a piece of plate, value 100 guineas, presented by the Commodore, for the first of the boats having been manned by amateurs, members of a London club, and by them sailed in their own time between the stations and races of this description. The distance contended was from Blackwall to Gravesend and back, and the following had entered:—

Yachts.	Tons.	Owners.
Julia	9	Mr. W Hutchinson
Mea	9	Mr. E. Kebble
Asbtross	9	Mr. A Bernardie
Valentine	9	Mr. B. Wells

The race, which was closely contested, was won by the *Julia* by twelve minutes. The *Idas* came in second. The *Mona Rose* accompanied the match with a numerous and highly respectable party on board, and Mr. Gunston's *Paragon*, the *Water Witch*, *Calliope*, and a number of other gentlemen's yachts.

The King and Queen of Sweden are expected to arrive at Berlin in the course of the ensuing week, on their way to the baths of Kissengen.

At the River Clyde Trust meeting, on Tuesday, Baillie Scott announced the gratifying fact, that the revenue of the Clyde for the year ending the 30th of June, exhibited the large increase of £7302 4s 5d., over the previous year.

FEROCITY OF A HORSE.—A case of extraordinary ferocity in a horse has given rise to law proceedings before the courts of Rouen. It appears that a [illegible] attempted to [illegible] a horse [illegible] which had [illegible] after, however, refused to receive it, on the ground that he had learnt that it was vicious and dangerous and ordered the man who brought it to him to take it back. In returning, the horse several times attempted to throw his rider, a man who was riding him, and at length succeeded in getting him off his back. The animal then trashed at him, bit him in the breast, and tried to trample on him. The horse at length caught the flesh of his right between his teeth, and tore it off in a most savage manner, leaving the bone exposed. He then went some distance and with his forepaws formed a hole of some depth; and then, retiring to his victim, he [illegible] the [illegible] and [illegible] the [illegible] He subsequently brought an action against Blanchard and Delestre to recover damages.

THUNDER-STORM IN CHELTENHAM.—On Wednesday evening the town of Cheltenham was visited by one of the most terrific storms that the inhabitants had ever witnessed. For a short space of time there was a perfect deluge of rain, and the crash of elements was such that the houses shook to their foundations, and at every peal it appeared as though the surrounding buildings were but in ruins. This continued until about seven o'clock, when, after one tremendous crash, the storm cleared off and gradually abated. A working man, of the name of Taylor, living in a cottage at Rowansfield, near the Colchester-road, had sustained a severe loss by the awful visitation. The lightning, entering his cottage, rendered it a complete wreck, and severely burnt his wife and children, rendering them insensible for some time. They all, however, escaped the death with which they were threatened.

On Tuesday, the premises occupied conjointly by Mr. Duck, a [illegible] manufacturer, and others, situated in Crown-court, Quaker street Spitalfields, were discovered to be on fire about [illegible] o'clock, when about one o'clock in the day. The sufferers were not insured.

Professor Graham has presented a chemical report to the Board of Trade on the cause of the burning of the ship *Amazon*, in which, after investigating the evidence on the subject, he comes to the conclusion that the origin of the fire must remain a matter of speculation and conjecture. He does not think that it originated in the spontaneous combustion of the coals, because they were Welsh, which are not remarkable for the property, and were shipped in a dry and dusty state. He conceives that the sudden and powerful burst of flame from the store room, which occurred at the very outset of the conflagration, is extremely suggestive of a volatile combustible, such as turpentine, which, according to two witnesses, was in the store-room, though this is denied by a third. Professor Graham found on trial that the vapour given off by oil of turpentine in such sandy dense at a temperature somewhat below 116° to make air explosive on the approach of a light.

LAW INTELLIGENCE.

HOLTZAPFFEL *v.* CHAPMAN.—In the Rolls Court on Wednesday, an injunction was granted on the application of the plaintiff, restraining the defendant, John Chapman, the bookseller, of 142, Strand, its servants, workmen, or agents respectively, from importing or causing to be imported into this country, exporting, selling or otherwise disposing of or parting with any copies or copy of a book called the "Practical Metal Worker's Assistant," which had been published in 1841, at Philadelphia, by a person named Oliver Byrne; and more than one half of which was copied, without permission, from a work published by Charles Holtzapffel deceased, plaintiff's late husband, in 1843, such work being entitled "Turning and Mechanical Manipulation," and which had been duly registered at the time in the books of the Stationer's Company.

EXTENSIVE FORGERIES OF BOOKS.—At the Middlesex Sessions on Monday, John White, aged 40, and Elizabeth White, 69, mother and son, were found guilty, the former for stealing and the latter for feloniously receiving six printed books, value to the Company of Messrs. Murray, four of another, Bentley, Bernard-street. It was subsequently discussed that the male prisoner had been tried previously for robberies of the same kind. Some idea of the extent to which he and his mother carried on this system of plunder may be formed, when it is stated that the police found at a coffee-shop, where it was left with some books by the male prisoner, a complete list, in the shape of a foolscap diary, of upwards of 200 volumes, in which it was denoted by figures what the wholesale and retail prices of each work were, and what had been realised by the disposal of them, by sale or pawning; and dates were given, with the names and numbers of the respective companies of Messrs. Murray, and others, the list comprised almost every standard work in the English language, besides many foreign ones. The prisoners were sentenced each to eighteen months hard labour.

At the Westminster Police Court on Tuesday, Charles Collins, a man of genteel appearance, upwards of sixty years of age, was remanded for a week upon the charge of having fraudulently obtained a portrait of the Earl of Desart, the property of Messrs. Hurst and Blackett, a local bina the pawnbroker's ticket on the portrait.

DEATH OF "JOHN DOE AND RICHARD ROE."—On the 24th of October last Mrs. Desart celebrated her birthday by having her portrait painted. By an act passed in the late session (15 and 16 Victoria, cap. 76), it is enacted that, instead of the present proceedings by ejectment, a writ shall be issued, directed to the person in possession of the property claimed, which property shall be described in the writ with reasonable certainty."

The National Council of Switzerland, in its sitting of the 8th inst., discussed the question of railways. By a first vote it had been declared by 69 votes to 22 that the lines should be constructed by companies, the Radical party having for it 59, and by the Sixth Section, which comprises the Catholic cantons, 10 articles. Art 1 was adopted on the following terms, by a large majority:—"The construction and working of the railways on the federal territory are and remain matters of affairs. They may be confided to private companies." The cantons sovereignty has thus (says the *Suisse*) gained the advantage over the unitarianism

---

MONETARY TRANSACTIONS FOR THE WEEK.

(From our City Correspondent.)

The dividend payments having made money more plentiful out of doors, and the discount broker having taken several large parcels of bills, the Bank of Consol Market has ruled very steady this week, and prices have tended upward. It is evident that the actual amount of stock in the hands of the jobbers is smaller than for some considerable time past, and present appearances certainly favour the pretty general impression that we shall have Consols much higher than they are at present, notwithstanding that no purchases will be effected this quarter for the reduction of the National Debt. On Monday the Three per Cents for Money were marked 100¾ ⅜; on the following day they touched 100¾ ⅝. Scarcely any change took place in prices either on Tuesday or Wednesday, the Three per Cents having marked 100⅝ ¾. We had rather a firm market on Thursday; the Three per Cent Consols were 100⅝ ¾; the Three per Cent. Reduced, 101⅛ ⅜; the New Three-and-a-Quarter per Cents, 104⅝; and Consols for Account, 100⅝. Bank Stock has continued very firm, the latest quotations being 226½. If the Unfunded Debt shall even a business has been done, and the June Bills were sold, on Thursday, at 1s 6d. per cent discount. India Bonds, under £1000, bring 3is. Long Annuities, 1860, have been 6 15-16; and 1855, 6⅞. The South Sea Stock has produced 112¾.

On the whole, the market for foreign bonds has been tolerably active, and prices have ruled steady. About 90,000 dollars have arrived on account of the Mexican dividends, and we have advices from the capital to the effect that the 400,000 dollars of indemnity money will be shipped to the country free of duty. This will save the bondholders about £40,000. The next payment is expected to bring 1,800,000 dollars in silver, and the remainder of the money will be forwarded in bills upon London. On Thursday, Brazilian Five per Cents were 103⅝; Mexican Three per Cents, 35½ to 35; Sardinian Five per Cents, 101¾; Spanish Deferred, 22½ to 22; and Dutch Two-and-a-Half per Cents, 64. Bargains have been reported in Austrian Five per Cent. Scrip, at 5⅛ to 4½ prem. Dutch Four per Cents, Certificates, 97; Granada, Deferred, 21; Passive, 5; Portuguese Four per Cs Converted, 39; Russian Four-and-a-Half per Cents, 103⅜. ex div; Spanish Passive, 6; Ditto, Old Three per Cents, 47½; Venezuelan Three-and-a-Half per Cents, 43½; and French Four-and-a-Half per Cent Rentes, 103f. 50c., with an annuity of 25f. 60c.

Since our last very large supplies of bullion have come to hand—868,603 dollars in silver, and 400,237 dollars in gold, having arrived by the West India packet, 634,000 dollars from New York, 45,000 from the Brazils, and £12,000 from Australia. The shipments of silver to the Continent have been extensive, and our gold exports have been confined to Sydney. The rates of the various parties to whom we are indebted to the bank of England. That in Paris is £24,000,000, or £1,000,000 less than our share in it originally contributed, who of the exchanges are still favourable to this country; hence we may fairly anticipate increased arrivals of gold. We are glad to perceive that an assay office has been established at Adelaide, and that the Governor has determined to allow the various banks to issue notes to the full amount of their stocks of gold, and at the rate of £3 1s. per ounce. In future the East India Company will receive cash for bills on Bengal and Madras in Rs. 1lds. and on Bombay in Rs. 1l4s.

Bank shares have been in moderate request this week. Union of Australia have been done at 89 to 91, being an advance of from £4 to £5 per share; Australasia, 54½ to 55, being a rise of £1; Union of London, 17, being 10s. up; Colonial, 15½; London and Westminster (£40 paid), 32. There has been a slightly increased demand for Dock Shares. Commercial Stock has realised 93¾; East and West India, 158 ex div; London, 129 ex div.; St. Katharine, 87½ to 87; and Southampton, 58½.

Railway Shares and Scrip.—Australian Shares have been 2; Eastern Steam, 2⅜ prem.; General Screw, 50½; General Steam, 28½; Peninsular and Oriental, 89; Ditto, New, 86½; and Royal Mail Steam, 81.

The amount of business done in the Railway Share Market has been concluded, but the rates of continuation are considered very high—those on London and North-Western being 42 to 12; Great Western, 6¾ to 12½; Lancashire and Yorkshire, 22½ to 22; Midland, 11 to 10½; South Eastern, 7¾ to 7½; Eastern, 7¼ to 7½; and Caledonians, 10 to 22 per cent per annum. The demand for most shares has been active, and a considerable rise has taken place in the quotations. The following are the closing prices:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 20½; Ambergate, Nottingham, and Boston, 7; Bristol and Exeter, 105½; Caledonian, 45½; Chester and Holyhead, 22½; East Anglian, 2½; Eastern Counties, 10; Edinburgh, Perth, and Dundee, 81½; East and West India Docks and Birmingham Railway, 80; Edinburgh and Glasgow, 72; Great Northern Stock, 91; Ditto, Half S Stock, 127½; Great Southern and Western (Ireland), 46; Lancaster and Carlisle, 107; Manchester, Sheffield, and Lincolnshire, 33½; Midland, 79½; Ditto, Birmingham and Derby, 42; Newmarket, 8½; Norfolk, 46; North British, 23½; Northern and Eastern, 19½; Oxford, Worcester, and Wolverhampton, 34; Scottish Central, 77; Scottish Midland, 87; Shrewsbury and Birmingham, Class A, 9½; Ditto, Class B, 6½; Chester and Shrewsbury, 20½; Ditto, Halves, 10½; Ditto, Oswestry, 14½; Shropshire Union, 9½; South Devon, 4½; South-Eastern, 78; South Wales, 41½; Vale of Neath, 15½; Waterford and Kilkenny, 6½; York, Newcastle, and Berwick, 78; Ditto, Extension, 14½; Ditto, Preferred, 9½; York and North Midland, 30.

LINES LEASED AT FIXED RENTALS.—Clydesdale Junction, 53½; East Lincolnshire, Guaranteed Six per Cents, 151; Gloucester and Dean Forest, 33 6s; Hull and Selby, Half Shares, 69½; Leeds and Bradford, 110; south Staffordshire, 8½; Wilts and Somerset, 16¾ ex div.

PREFERENCE SHARES.—Bristol and Exeter, Four per Cent Stock, 105; Caledonian, £5 10 shares, 10½; Chester and Holyhead, 15½; Eastern Counties, No. 2, 1½ prem.; Ditto, New Six per Cent. Stock, 14½; Eastern Union, Four per Cents, 10½; Northern, five per Cent, 14½; Great Western Four-and-a-Half per Cent, 110½; Manchester, Sheffield, and Lincolnshire, 11; Ditto, New £10 Shares, 14½; Ditto, Ex. 4½, Midland Consolidated, 44½; Ditto, Three per Cents, 89½; North Eastern, 5½; Ditto, Guaranteed Five-and-a-Half per Cent, 8½; North British, 7½; Oxford, Worcester, and Wolverhampton, 15½; Ditto, 6½; York, Newcastle, and Berwick, Four per Cent., 104½.

FOREIGN.—Great Indian Peninsula, 6⅝ ex. div.; Grand Junction of France, 4½; Luxembourg, 13; Ditto, Railway, 9½; Ditto, 1845, 4; Northern, and Great Belgian, 7½; Northern of France, 25; Ditto, £25, Three per Cent. Bonds, 19½; Orleans and Bordeaux, 18½; Paris and Lyons, 17½; Sambre and Meuse, 8½; Western of France, 8½.

Mines have been in fair request. On Thursday Australian Consolidated Shares were 1; Australian, 3; Ala-nalan Freehold, ⅝; Baden, —; Carson's Creek, 1½; Cobre Copper, 4¾; Colonial Gold, 1; Worcester, ⅛; English and Australia Copper smelting Company, 4¾; Golcon Mountain, 1½; London and California Gold Quartz Crushing Company, ⅝; Mexican and South American, 4½; Nouveau Monde, 1¾; Port Phillip, 1⅜; Santiago de Cuba, 1¾; Tin Croft, 11¾; United Mexican, 2¾; West Mariposa, ⅜; Yuba, 1.

FRIDAY AFTERNOON.—The Consol market has ruled steady to-day, and prices are well supported. The Three per Cents are 100⅝ ⅜; the Three per Cents Reduced, 101⅛; the New Three-and-a-Quarter per Cents, 104⅛; and Consols for Account, 100⅝. Bank Stock, 226½; India Bonds, 30s; and Exchequer Bills, 72s premium. Foreign Stocks firm, but not dearer. Railway Shares are still on the advance, with a large speculative business doing

---

THE MARKETS

CORN EXCHANGE FRIDAY).—During the present week the arr val of English wheat s to our market coast-wise has been limited, viz. 1140 [illegible] from Kent and Essex, 1000 from Suffolk, and 1000 quarters from Lincolnshire. The fresh supply of wheat, and we were very scantily supplied with [illegible] and the attendance of [illegible] all kinds of wheat of home produce was extremely heavy, at almost nominal quotations. Rods were dull in the extreme and to have effected sales lower rates must have been submitted to. The supply of barley was on the decrease; nevertheless a l kinds were the turn in favour of buyers. No English qualities on show. Malt was in limited supply and heavy demand at barely stationary prices. We were fairly supplied with oats. All kinds were dull, and demp parcels had a downward tendency. Beans, peas, and flour were much neglected. Floating cargoes of wheat and Indian corn were a slow sale.

ARRIVALS.—English: wheat, 1490; barley, 1 malt, 1360; oats, 1110; flour, 1150. Irish: barley, 190; oats, 1720. Foreign: wheat, 7961; barley, 14,990; oats, 14,090; flour, 1720 and 6060 barrels.

English. Wheat, Essex and Kent, red, 36s to 41s; ditto, white, 38s to 43s; Norfolk and Suffolk, red, 36s to 40s; ditto, white, 40s to 42s; rye, 27s to 29s; grinding barley, 22s to 27s; distilling ditto, 30s to 32s; grinding oats, 20s to 23s; Lincoln and Norfolk malt, 51s to 56s; brown ditto, 45s to 47s; Kingston and Ware, 55s to 57s; Chevalier, 56s to 60s; Yorkshire ah... Line... ton beans, 34s to 36s; green ditto, 30s to 34s; Yeogeal and Cork, black, 19s to 21s; ditto, white, 21s to 23s; Scotch and Irish potato ditto, 22s to 24s; grey peas, 30s to 34s; maples, 32s to 34s; white ditto, 40s to 46s per qr.

Foreign: French flour, 25s to 31s per sack; American, 18s to 27s per barrel.

The Seed Market.—Since our last report scarcely any transactions have taken place in this market, and prices have ruled almost nominal.

LINSEED, English, sowing, 50s to 53s. Baltic, crushing, 44s to 47s; Mediterranean and Odessa, 44s to 46s per qr. Cakes, London, £7 10s. Coriander, 10s to 12s per cwt. Brown mustard-seed, 7s to 9s; white ditto, 8s to 9s. Tares, 3s 6d to 4s 6d per bushel. Brown rapeseed, £21 to £22 per last of 10 qrs. Canaryseed, 52s per qr. Linseed cakes, English, £7 5s to £8 per 1000. Hempseed, 40s to 42s per qr. Rape cakes, £4 5s to £4 10s per ton. Canary, 39s to 41s per quarter. English clover seed, red, 40s to 48s; white ditto, 40s to 48s; foreign, red, 42s to 54s; white ditto, 40s to 56s per cwt.

Bread. The prices of wheaten bread in the metropolis are from 6½d to 7d; of household ditto, 5d to 5½d per 4lb loaf.

Imperial Weekly Average.—Wheat, 41s 5d; barley, 26s 8d; oats, 19s 9d; rye, 32s 6d; beans, 34s 8; peas, 33s 2d

The Six Weeks' Average.—Wheat, 41s 0d, barley, 27s 7d; oats, 20s 1d; rye, 31s 1d; beans, 32s 1d; peas, 32s 8d.

Duties. Wheat, 1s; barley, 1s; oats, 1s; rye, 1s; beans, 1s; peas, 1s.

Wool.—The store of samples being very extensive, and dealers generally well in stock, the demand for all kinds of teal is heavy, and prices are barely supported Common sound qualities in Essex offered at 8d per lb. Up to Saturday last duty was paid on 22,234,061 lb against 21,233,981 lb in 1851.

Coffee.—The demand is exceedingly heavy, and all plantation kinds are 1s to 1s 6d per cwt lower. Good middling to good has sold at 57s to 59s; fine ordinary, 45s to 53s. Good ordinary native has been withdrawn from public sale, at 44s per cwt

Sugar.—Since the 1st inst. the market has ruled heavy, and in some instances, the quotations have given way 6d per cwt. Fine yellow Barbadoes has sold at from 38s to 39s 6d; good ditto at 37s to 38s; good middling to good ditto at 37s to 37s 6d; grey and brown ditto, 36s 6d to 38s 6d; soft brown Grenada, 37s to 38s; low to middling ditto, 32s 6d to 35s 6d; good to fine Benares, 36s 6d to 37s; good to middling, 31s to 32s 6d; and fine grassy white Bengal, 42s 6d per cwt. Refined goods heavy, at from 46s 6d to 48s; fair ditto, 45s 6d; grocery ditto, 44s 6d per cwt. Refined were 3,305,347 cwts against 2,414,185 ditto, in 1851.

Rice.—Most kinds are 3d per cwt. lower, with a very inactive inquiry.

Provisions.—The public sales are progressing steadily. Fine qualities have sold at full quotations, but other descriptions have come in for lower.

Provisions.—Since our last report scarcely anything from but what of the most ordinary kind has been offered for sale, and the demand is very limited. Fine Irish 70s; Dutch, 68s; and fine English, 72s per cwt. Prime parcels of bacon have improved in value 1s per cwt. Waterford, landed, 52s to 56s; and Limerick, 54s to 58s per cwt. Lard is producing more money. Waterford, landed, 56s to 58s. Beef and pork are scarce, and held at very full quotations.

Butter.—Since our last report the market has ruled with a downward tendency. P.Y.C. on the spot, 87s 6d to 88s per cwt. Town tallow, 36s 6d to 37s per cwt, but cash quotations are 1s 6d per cwt. Stocks are moderate, at 44,000 casks.

Oils.—Linseed oil is steady, pale, at very full prices. Linseed Island, proof, is quoted at 34l 5s to 35l; and East India, 1s 6d to 1s 6d per gal on. Brandy firm, but not dearer. Gen-va, 1s 6d to 2s 6d per gal on.

Hops and Straw.—Of old we have only to state that since our last report, 5 to 7cwt. old clover, 80s to 90s; new, 5 to 7cwt. ditto, 90s to 98s per cwt.

Hops (Friday).—Very favourable accounts have arrived from Kent and Sussex respecting the growing crops of the present year, but the fly appears to be very general in the Worcester grounds. Although the show of samples is very limited the demand is heavy, at barely stationary prices for fine kinds. Sales amount to 200 pockets.

SUSSEX pockets, 45s 6s to 5s; Weald of Kent ditto, 5s to 47 5s; Mid and East Kents, 5s 10s to 6 14s; ditto yearlings, 3 10s to 3 3s. Old o 0s, 0 10s to 1 1s.

Coals (Friday).—Best Hetton, 17s; second ditto, 16s; Hasting Hartley, 15s; New Tanfield, 12s 6d; Wylam, 14s; Eden Main, 14s 6d; Hetton, 13s 6d; Walker, 13s 6d; Braddyll, 15s 6d; Percy Main, 16s; Lambton, 15s 6d per ton.

Smithfield (Friday).—For the time of year the supply of beasts on sale this week was extensive, and so far as we can learn the numbers in Lincolnshire, Norfolk, and other grazing districts are in a downward tendency. Mr. Very had on offer 28 remarkably fine Scotch Runts. Up to 2 o'clock, sunday calves. Its to 23s, and quarters, store pigs, 18s to 19s each. The demand for that description of stock was in a sluggish state, at early 2s 6d per 8 lbs. Sheep and lambs, 2s 6d per 8 lbs. Of foreign animals, we received 1200 from Holland, with a fair to middling supply from Belgium. Generally speaking, the trade was in a dull and sluggish state, at barely 2s per 8 lbs less than on Monday's market. The primest Scots, 3s 10d to 4s per 8 lbs; second quality ditto, 3s 6d to 3s 8d per 8 lbs. Short horns, 3s 4d to 3s 6d; Devons, 3s 4d to 3s 6d; Herefords, 3s 4d to 3s 6d; Sussex, 3s 4d to 3s 6d; Scots, 3s 4d to 3s 6d; Irish, 3s 4d to 3s 6d; Foreigners, 3s 4d to 3s 6d per 8 lbs. Calves, 3s 4d to 4s 4d per 8 lbs. Prime coarse-woolled sheep, 3s 8d to 4s 0d per 8 lbs; small ditto, 3s 8d to 4s 0d; large hogs, 3s 8d to 3s 8d; neat small porkers, 3s 8d to 3s 8d per 8 lbs. Suckling calves, 18s to 23s, and quarters, store pigs, 18s to 19s each. Total supplies, beasts, 1626; sheep, 17,050; calves, 270; pigs, 380. Foreigners, beasts, 38; sheep and lambs, 1200.

Newgate and Leadenhall (Friday).—Our markets are heavy, and prices are with difficulty supported.

Per 8lb by the carcass—Inferior beef, 3s 4d to 3s 6d; middling ditto, 3s 6d to 3s 8d; prime ditto, 3s 8d to 3s 10d; inferior mutton, 3s 4d to 3s 6d; middling ditto, 3s 6d to 3s 8d; large pork, 3s 8d to 3s 10d; inferior mutton, 3s 6d to 3s 8d; middling ditto, 3s 10d to 4s 0d; prime ditto, 3s 8d to 3s 10d; veal, 3s 6d to 3s 8d; small pork, 4s 0d to 4s 6d; lamb, 5s 0d to 6s 0d.

PIPERS, 79, Pall-mall-east

MESSRS. HARDING and COMPANY, SCHOOMBERG-HOUSE, PALL-MALL, have the honour to announce that, in consequence of the early Termination of the Season, a general Reduction of Prices has been made on all remaining Fancy Stock, a large portion of which is adapted for autumn wear, and comprises Silks, Draperies, Lace and Embroideries, Sail and Riveted Dresses, Barège Shawls, Mantles, Ribbons, Fancy Handkerchiefs, and Scarfs. 1st July, 1852.

NEW MUSIC, &c.

OH! CHARMING MAY. Written by T. H. HATCH. Composed by G. H. RODWELL. Sung by all the public singers. This song, of which 30,000 copies have already been sold, is the most popular of the day, and seems destined to an universal popularity. Price 2s, post free. Arrangements of the air for piano, flute and piano, guitar and concertina.
J. WILLIAMS, 123, Cheapside

FARMER'S NEW PIANOFORTE TUTOR. A full music size, 24 pages, stitched and cover, price, extra, 2s 6d, illustrated differently to instruction books generally, merely giving the rudiments in a simple form. This tutor has been suggested by many experienced, and will, be found a very practical book. Price 2s. J. WILLIAMS, 123, Cheapside. Postage free.

THE OLD CHIMNEY CORNER. By J. M. JOLLY. This beautiful composition might almost be called an "Cricket on the Hearth" to mingle its melody with its home-inspiring strains. The joys of the fireside and domestic circle are vividly portrayed in the impressive words and music of this exquisite song. Sent post free for 2s.—J. WILLIAMS, 123, Cheapside

THE LAUGHING GALOP, by HENRY FARMER. "This is one of those felicitous morceaux which at once proclaims a master hand, susceptible of the most delicate touch, we can recommend it as a most effective piece, and one which will speedily become the rage, and has been ensured at every performance. It is admirably arranged for the pianoforte, and will be found very convenient in the drawing and concert-room."—Vide Review, Post free, 2s 6d;
J. WILLIAMS, 123, Cheapside.

OH BRING ME PEARLS, and THE SPIRIT of MORNING. Two Songs, by MARIA CAVENDISH. "These songs are far beyond the average order of those ballads that not even with names known in the market abound. They have refreshed us much after some half-dozen things in the genuine 'world-of-music' style."—Illustrated News.
Price 2s each, post free.—J. WILLIAMS, 123, Cheapside.

RODGERS and CO, Improved Shirt-Makers, 89, St Martin's-lane Charing-cross, London. Established 80 years

JONES'S £4 4s. SILVER LEVER WATCHES, with the GOLD LETTERS, at the Manufactory 338, Strand, opposite Somerset House, are warranted not to vary more than half a minute per week. The great success of these Watches has induced numerous other parties to advertise a lever watch, for the sake of the name, but which are proved, at lower prices are foreign work. On receipt of a Post-office Order payable to JOHN JONES, for £4 4s, one will be sent free. Jones's Sketch of Watchwork, free for 1d

GOLD CHAINS by Troy Weight and Workmanship.—GEORGE ANDERSON and SONS, Goldsmiths to the Queen, Cheapside, and 61, Strand, have awarded a Prize Medal, for their Diamond and Enamel Vase, at the Great Exhibition, for so far surpassing that, in obedience to numerous calls made upon them, they have thrown open their Manufactory to the Public as MANUFACTURERS of PRICES. The system of wrapping trades against sovereigns being one of the greatest frauds ever practised on the public, Waiberson and Rogers of Ludgate-hill, have thrown open their profit being made on the workmanship alone, which is charged with reference to the intrinsic or simplicity of the pattern. A general assortment of Jewellery, &c. made on the premises. Manufactory, 16, Cheapside, corner of Wood-street, London.

CHUBB'S FIRE-PROOF SAFES and LOCKS. CHUBB and SON have now on SALE, at their Warehouses, an assortment of their FIRE PROOF SAFES, which gained the Prize Medal, with the approbation of the Council, in addition to this distinction being awarded to them solely by the jurors of Class XVII, after a careful examination of the Safes sent from all parts of England. These Safes, undoubtedly the most secure from fire, fraud, and violence, are sold at moderate prices. CHUBB and SON, 57, St Paul's Churchyard, London; 28, Lord-street; Liverpool.

THE ILLUSTRATED LONDON PHOTOGRAPHY. By JOSEPH GUY, Jun., of Magdalen Hall Oxford; Author of numerous popular Educational Works. Demy 8vo, cloth, with One Hundred Engravings of Cities, Costumes, and Wonders of the World, &c. The Engravings of Cities, Costumes, and Wonders of the World, &c. These Drawings are made with great care from trustful sources, and therefore return no necessary to a Elementary Geography. Nine Maps have been engraved by a patent process expressly for this Work, and are protected to the present period. Demy 8vo, cloth, price 7s.

For Prospectuses apply to Mr G DOWNES, Wickham Market, Suffolk.—A Vacancy for a Private Pupil

CHEYNE HOUSE.—French, German, Commercial, and Collegiate SCHOOL, Upper Cheyné-row, Chelsea.—Dr BENNET, M.A., having entirely remodelled this school in every system, is prepared to apply principles of neglected education a rapid progress Greek, Latin, and Mathematics for the Colleges and Universities Modern languages on conversational principles. Single beds for younger pupils, and separate rooms for students

HANWELL COLLEGE and PREPARATORY SCHOOL, for all Examinations and the UNIVERSITIES, SANDHURST, and ADDISCOMBE.

"The system at HANWELL College appears to be peculiarly fortunate. We have had in recent five successes within as many months and, (without one failure), and we have reason to hope that a long (without one failure), and we have reason to hope that a long succession will be recorded."—Vide Review, Post free, 2s 6d;
J. WILLIAMS, 123, Cheapside.

SCARBOROUGH.—"QUEEN of BRITISH WATERING-PLACES."—To those who contemplate visiting this far-famed shrine of health and longevity the Subscriber offers a Plan, with the Position and Description and View of the Town, for the use of Visitors) will be forwarded on receipt of two postage stamps addressed to Mr SHARP, Crown Hotel, or Mr THEAKSTON, "Gazette" Office Scarborough

CLARENDON, NEW YORK.—This Hotel is situate Corner of Broadway-street and Fourth-avenue, completed in October last, having been two years building The proprietor has attended personally to the entire arrangements and construction of the interior, and does no hesitate to say that its equal for comfort and luxury cannot be found

The Hotel, being designed for families, is divided into suites of apartments, consisting of parlours, bed-rooms, with bath-rooms, closets, and every convenience connected. Many sitting rooms are provided with bath-rooms and water-closets. The furniture, which is entirely new, is of the most elegant and costly kind, yet less a public-house, and is of the most substantial and costly carved rosewood, covered with the finest damask and rich velvet. The object of the proprietor has been to establish a hotel for the better accommodation of families of the first class who desire elegant apartments, and at the same time a retired and pleasant location.

The whole establishment contains over 300 rooms, and has every modern improvement which has been introduced into the most elegant private residences of this city.
March 23d, 1852. O C PITTMAN, Proprietor

CLERICAL, MEDICAL, and GENERAL LIFE ASSURANCE SOCIETY.—Persons of all ages, and in every station, may assure with this Society, and be entitled to participate in the Profits. Voyage, Indian, Holy Land, Egypt, Madeira, the Cape, Australia, New Zealand, and in most parts of North and South America, without extra charge.

FIFTH DIVISION OF PROFITS.

The Fifth Bonus was declared in December last, and the amount varied with the different ages, from 84½ to 85 per cent. on the Premiums paid, which, after the first five years, or from 2 to 5 per cent. per annum on the sums assured.

The same share of Profits is available in future among the Shareholders as may now be provided for without intrenching on the amount made by the regular business, the ASSURED will hereafter derive the whole benefit from a MUTUAL INSURANCE, with all the same time, complete freedom of liability, secured by an ample Proprietary Capital—thus combining in the same Office the advantages of both systems.

A copy of the last Report, setting forth full particulars, with a Prospectus, may now be obtained, on any of the Society's Agents, or by addressing a line to

GEO. H. PINCKARD, Resident Secretary.
99, Great Russell-street, Bloomsbury, London.

ESTABLISHED 1841.
MEDICAL, LIFE, and GENERAL LIFE ASSURANCE SOCIETY. Offices: London, 25, Pall-Mall; Dublin, 73, Nassau-street; Glasgow, 73, St Vincent-street.

Capital, £500,000.

At the TENTH ANNUAL GENERAL MEETING of this Society held on the 15th day of May, 1852, it was shown that the new business transacted in each year since the establishment of the Society was as follows:—

Year	New Policies issued	New sums Assured by Policies	New Annual Premiums on New Policies.
		£ s. d.	£ s. d.
1842	196	85,846 11 0	1892 2 6
1843	357	67,830 16 11	4093 18 6
1844	198	80,445 8 0	2883 17 0
1845	319	120,014 13 0	5353 17 0
1846	413	83,700 14 0	4368 8 0
1847	479	115,349 4 0	4327 4 0
1848	565	121,454 17 0	4982 2 0
1849	474	109,778 15 0	7496 8 0
1850	569	212,469 16 11	8162 13 7
1851	1,017	317,265 16 0	10,401 6 0
Total ...	4,787	1,336,156 9 0	57,949 18 8

From this it is found that the business done during the last year is larger than that of any preceding year, and that 613 Policies were effected, yielding Annual Premiums to the amount of £10,401 6s.

This Society is the only one possessing Tables for the Assurance of Diseased Lives. The premium charged in such cases is reduced to ordinary rates as ascertained by experience.

Healthy Lives assured at lower rates than at most other offices.

A Harmonical Bonus was added to the Policies at last Division of Profits, equal to about 50 per cent. on the premiums paid.

The Policies issued by this Society give greater facilities to parties going to or residing in Foreign Climates than those of any other Society, and the Rates of Premium are Moderate.

Prospectuses, Forms of Proposal, and every other information may be obtained at the Chief Offices, or on application to any of the Society's Agents in the Country

G. F. WILSON, Actuary.
C DOUGLAS SINGER, Secretary

FISHER'S DRESSING-CASES, for Travelling or the Toilet-table, cannot be surpassed for durability or beauty of workmanship. The prices are exceedingly moderate. Fisher, Son, and Sibray, 188, Strand, and 189, Strand, corner of Arundel-street.

THE ILLUSTRATED LONDON NEWS.

No. 570.—VOL. XXI.] FOR THE WEEK ENDING SATURDAY, JULY 24, 1852. [SIXPENCE.

THE PRESIDENT ON THE RHINE.

CHARITY covers a multitude of sins; but if the moralist were asked whether there were a robe of concealment still more ample, he might safely answer that it was Success. It is a Royal garment that dazzles the eyes of beholders. A light shines from it when it has been worn in a prominent cause, or after a great struggle, whether for good or for evil, that the multitude in most, if not in all, countries are quite unable to resist. In the halo which it spreads around it, the errors and defects formerly obvious in the character of the wearer become wholly or partially invisible. The villain who fails is the greatest of all villains; but he who succeeds seldom lacks either apologists or admirers. It has always been so and always will; for in a material world there is but too often no other criterion by which the hero can be estimated. "Treason never prospers;" and the reason is obvious as the well-known rhyme in which the saying has been handed down to us. "Mute, inglorious Miltons" are no Miltons at all; and "gems of purest ray" that lie unseen and unknown in the depths of the ocean are of no more worth than cockle-shells. The world has neither time nor patience to weigh people by the probabilities of what they might have been if they had had the chance. It can but look to results; and success is a fact, the value of which the dullest can understand and appreciate.

The President of the French Republic is at present in this position. It is no longer of any use to consider the means by which he rose to power. The world must at length accept him as he is. He stands before it as a fact, and not as a theory; the powerful, the popular, and almost the undisputed chief of the French nation. Measured by his standard, all his competitors for dominion seem mean and small. If he have not been wise he has been daring. If he have not been just he has been successful. He set himself a great work to do, and he has done it; and if his beginnings looked foolish and contemptible, the same thing cannot be said of his endings. His countrymen have, with few exceptions, long ceased to cavil at him. His power is not simply acknowledged, but cheerfully acquiesced in; and if the few submit and are silent, the many submit and applaud. They no longer criticise the acts by which he vaulted into his lofty seat. They have made up their minds that he was and is their necessity, for a period long or short, as events may indicate; and in the meantime they give him the acclamations which he needs, and which they are always ready to accord to their rulers, whomsoever they may be, provided they be strong enough to be successful.

The progress of Louis Napoleon to Strasburg and the Rhine, as portrayed in the pithy despatches of his prefects, is one continued record of applause, festivity, and triumph. As in ancient Rome, the people

> Climb up to walls and battlements,
> To towers and windows, yea to chimney tops,
> Their infants in their arms, and there they sit
> The live-long day in patient expectation
> To see great Cæsar pass;
> And when they see his chariot but appear
> Do they not raise one universal shout?
> And do they not put on their best attire?
> And do they not cull out a holiday?
> And do they not strew flowers on the way

of the daring adventurer who rides in triumph over the liberties of the Republic? That they would shout with as much joy and strew as many flowers in the way of Henry V., if that personage could achieve the same success as Louis Napoleon, is no reason why we should ignore or depreciate their present enthusiasm, or shut our eyes to its influence upon the events of our time. The President is the hero of the hour, and both he and the French nation seem equally contented with each other. Prefect vies with prefect who shall best receive him, and mob with mob as to which shall applaud him the most lustily.

And certainly the occasion as well as the man is remarkable, and might well inflame the imaginations of a less imaginative people than the French. The opening of a great line of railway connecting Paris with that remote corner of France which keeps watch on the banks of the Rhine, is an event of unusual interest, whether considered under its purely civil, scientific, and commercial aspect, or whether it is viewed by the light of those historical and romantic traditions which influence so largely the popular mind of France. And with his customary boldness, the President has turned the ceremony to the utmost account. Not only has he shown himself, in the full blaze of his recently-acquired glory, in those scenes where in his earlier days he appeared as the crack-brained adventurer, and thus enabled the most impassive of observers to form a striking contrast between his past and his present career, and to make the madness of his youth appear as if it were but the foresight and forethought of his age—not only has he inaugurated a great and useful work with all the pomp and circumstance of a state ceremonial—not only has he shown the malcontents that always will exist as long as France is a nation that the popularity of his name is more than ever a tower of strength to him, but he has adroitly flattered the dearest vanity of the French people in a manner as brilliant as it was unexpected. He has passed the covered Rhine upon a bridge of boats, constructed for the occasion by his own engineers, and reviewed a German army upon the German soil. The fact appears incredible, and will no doubt be more suggestive than agreeable to the various sovereigns of Germany, and possibly will interfere with the quiet meditations of a greater potentate than either of them—the Emperor of Russia. His Imperial Majesty is now on a visit to the King of Prussia, and sufficiently near the scene to appreciate its full significance. Europe may well be astonished that the Grand Duke of Baden should have invited such a perilous honour as Louis Napoleon has conferred upon him; yet we cannot but admire the tact of the French President in taking advantage of the invitation. He knows how to please both the army and the people, and to act upon the strong

THE FRENCH PRESIDENT'S VISIT TO STRASBURG.—DEPARTURE FROM THE RAILWAY TERMINUS, AT PARIS.—(SEE NEXT PAGE.)

as well as upon the weak points of the national character. But at the present time, although the President may in this and in other ways endeavour to flatter the military vanity of a people that would make many sacrifices for the sake of a little more of the Rhine frontier, there seems to be a wise determination on the part to aid in the development of the commercial activity and industrial wealth of the country. The railroad system is operating great and beneficial changes in France. Though still largely behind this country in the extent of its internal communication, and still to a great extent indebted to English capital and skill for the means of making and working its lines, France is every year becoming more and more accustomed to the benefits of railways and electric telegraphs. In a short time all her great arterial lines will be completed; and from the Straits of Dover to the Mediterranean, and from the Atlantic to the lakes of Geneva and Constance, her iron highways will be busy with traffic. France will then enter upon a new phase of her industrial history; and the war-spirit, still so unhappily prevalent among her citizens, will be startled by the powerful rivalry of that greater and more humanising spirit of civilisation of which this country is the world's example. France is so weary of theories of government, so desirous of political repose, and apparently so contented to barter its liberty of speech and of opinion for liberty to work and thrive, that it is likely, notwithstanding the arbitrary and cruel mode by which the President strengthened his fading dominion in December, 1851, that he will grow in the good opinion of the people. There is a rumour, believed to be well founded, that he has lately become a convert to the truth of the great doctrines of Free Trade. If so, he will have a still more brilliant opportunity of being useful to his own country and to Europe than has yet been afforded him.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The formal opening, during the past week, of the great trunk line of railway which connects Paris with the most extreme point of the eastern frontier at Strasburg, formed the occasion of the first of the Presidential tours of state for the season, and is remarkable, not only for the really extraordinary display of enthusiasm which his presence elicited from the congregated masses along his line of route and at its terminus, but also for his having extended his excursion beyond the frontiers of France, across the Rhine into the German territory the Grand Duchy of Baden. Here he took the opportunity of reviewing, at Kehl, the Baden troops, amidst the plaudits of the multitude belonging to both nations; and then advanced to the capital (Baden), on a friendly visit to the Grand Duke, being accompanied throughout by his cousin, the Dowager Grand Duchess Stephanie, who forms, as it were, a "connecting link" between the two rulers on either bank of the Rhine. The Duchess, probably, suggested to the Grand Duke the invitation to her kinsman, the Prince President, as a politic move to gratify the vanity of France by the spectacle of her ruler presiding at a review on the so-much-coveted German bank of the Rhine. Among the various rumours called into existence by Louis Napoleon's visit to Baden, is one to the effect that the principal cause of it is connected with matrimonial projects. The lady who is spoken of as likely to share the honours of the man whom many regard as the future Emperor of France, is a grand-daughter of the Grand Duchess Stephanie, whose daughter was married to Prince Gustave de Vasa, the son of the last and the dethroned legitimate King of Sweden. The father of the young lady (the Princess Caroline Stephanie de Vasa) is a general officer in the service of Austria. She is now said to be in Baden, and the President's visit, arranged by the Grand Duchess, is alleged to be for the purpose of an interview between the Prince and his fair relative. She is in her nineteenth year.

The general satisfaction both of the Government and the country created by the *éclat* of the occasion, was also greatly enhanced by the presence, during the festivities, of the officer in command of the Prussian forces in the Rhenish Provinces (General de Prittwitz), charged by his Sovereign to congratulate the Prince President on his arrival at the German frontier; and of an Envoy from Austria on a similar mission. The gentleman selected for this purpose was Field-Marshal Count de Paar, commandant of the fortress of Kustadt. There were also special Envoys present from the adjoining states of Bavaria, Wurtemberg, Hesse-Darmstadt, and Switzerland all sent to do honour to the President on his coming to their neighbourhood, and, upon the whole, as well from the intrinsic importance of the occasion viz. the opening of a great line of the most speedy intercommunication through the heart of France, as from the ready recognition of his new and more absolute *régime* which it has furnished the neighbouring powers the opportunity of offering before the eyes of his assembled countrymen on the theatre of his former discomfiture, this visit of Louis Napoleon to the ancient city of Strasburg constitutes, of all his "progresses" hitherto, the one to which considerations of the greatest consequence and interest attach, both in his own eyes and those of his adherents.

The departure of the President from Paris took place on Saturday morning last at nine o'clock. He arrived at the Strasburg Railway station a few minutes before that hour in an open carriage and four, escorted by a detachment of cuirassers. He wore the uniform of a lieutenant-general, and was accompanied in his carriage by Generals Roguet, Canrobert, and De Goyon, all in full uniform; Colonel Revilla, M. Mocquard, Dr. Conneau, and an orderly officer followed in another carriage. The terminus of the Strasburg Railway was gaily decorated with flags on the occasion, and shrubs and flowers were placed along the gallery leading to the reception-room, where were assembled General Magnan, about seven or eight general officers; among them the Minister at War, M. Baroche, Vice-President of the Council of State, several members of the same public body, the deputies and senators invited to accompany the President to Strasburg, the Minister of the Interior, the Prefects of Police and of the Seine, and many other high public functionaries, who attended, either to join the *cortège* or to take leave. All were in full uniform. The President partook of some refreshments before leaving. The train by which the Presidential party was composed of ten first-class carriages, entirely new, besides the state carriage. The locomotive and the tender were dressed with flags. The Prince was accompanied in his carriage by General St. Arnaud, Minister of War; M de Turgot, Minister of Foreign Affairs; M. Lelebvre Duruflé, Minister of Public Works; M Bineau, Minister of Finance; and the President's aides-de-camp; and the other carriages were filled by the officers of the household, the directors of the company, and persons invited.

The first day's journey terminated at Nancy, where, on the arrival of the train, at half-past seven in the evening, a salvo of 101 guns announced the President's entry into the railway station. He was there received by the mayor, deputy-mayor, and municipal council. Part of the troops of the garrison, drawn up in the court to serve as a guard of honour, presented arms, with drums beating and bands playing, the crowd cheering warmly, and all the bells in the place ringing a merry peal. The Prince then got into a carriage drawn by eight horses, general officers riding by the sides, and a brilliant staff following. A number of other carriages were also prepared for the Ministers and persons of distinction. The infantry lined the streets at each side, and considerable bodies of cavalry escorted the presidential carriage. The cortège proceeded to the Hotel of the Prefecture, passing through the Porte Stanislas which was converted into a triumphal arch for the occasion. The crowd in the streets was most dense, and the reception very favourable On the President's arrival at the Prefecture he took the usual refreshment, a grand display of fireworks took place, and the town was brilliantly illuminated. The Prince afterwards went to the ball offered by the town, where, however, he did not stay long, being fatigued by the exertions of the day, having stopped and received the authorities along the line of route at Meaux, La Ferté, Château-Thierry, Epernay, Chalons, Bar-le-Duc, and other places, at all of which his reception by the people, who thronged in vast crowds to behold him, was of the most enthusiastic description; and, in several instances, he was greeted by processions of young ladies, who with a graceful address, presented him with bouquets of flowers. At Chalons, for instance, where the train arrived at one o'clock, the President was received by all the authorities, and by a large body of troops drawn up close to the station. The people received the President with loud cries of welcome, which became still louder when the Prince, taking the arm of the Bishop (an old officer of the Imperial Guard), proceeded towards the spot where stood the horse which was in readiness for him to mount in order to review the troops.

After the review the President and his brilliant *cortège* entered an immense tent and partook of refreshments. During the short time which the President stopped here previously to continuing his journey, a number of ladies and young girls were presented to him, and he decorated with crosses three officers belonging to the troops which he had just reviewed.

At Toul, the Prince was as usual received by the authorities, and another group of young ladies came forward and offered him bouquets. At the moment when he was mounting the steps of the platform a young girl issued from a group of her companions, and addressed Louis Napoleon as follows:—

Prince, —France was at one time in the power of the foreigner, when a poor young girl of Lorraine had the good thought of trying to save the country. She came to Toul to be inspired by means of prayer, and, with the aid of God, succeeded in her enterprise. In our days France, we have been told, was menaced even in her most simple institutions; you determined to save it. The town of Toul would have been happy to receive you within her walls, and to see you visiting the place where Joan of Arc's valour confirmed in her holy determination. Imperious necessity does not allow of that; but, whilst the population salutes you on the way with their grateful acclamations, permit us, children as we are, to offer you a few flowers. They add to the offering the vows and prayers which God will listen to; you, Prince, will also execute well your design.

The decoration of the tent under which the President was received was composed of military trophies, each crowned with an eagle with out-spread wings. One of the inscriptions was—"Toul à Louis Napoléon—20 Décembre, 7,000 Oui." The President here reviewed the troops, who received him with loud cries of "*Vive Napoléon! Vive l'Empereur!*" At the moment the train was starting a regular avalanche of bouquets, thrown by ladies, fell into the carriages.

On Sunday morning, at eight o'clock, Louis Napoleon quitted Nancy for Strasburg, and, notwithstanding that the rain fell heavily during his progress, his reception by the crowded population at the various stations along the line was as favourable and enthusiastic as on the preceding day. The train arrived at Strasburg at half-past seven o'clock mid-day. A salute of 101 guns was fired as the President entered the terminus, and all the bells in the city immediately pealed forth a welcome. All the authorities of the place were assembled to receive the Prince in a magnificent pavilion erected for his accommodation. The preparations for the ceremony of inaugurating the railway were upon the most extensive scale. At the extremity of the rails within the terminus, a long platform was raised, on which an altar was erected, and along the side of the line tribunes were to be seen, capable of containing between 3000 and 4000 persons. The pavilion, just spoken of was constructed at one side of the railway, and contained a most elegant saloon for the use of the Prince and his suite. The President, on alighting from the state-carriage, was complimented by the mayor and municipal authorities on his arrival, and was presented by them with the keys of the town, which he was pleased to return into their hands. The religious ceremony that of blessing the locomotives—then commenced, and was of an exceedingly imposing character. The President took his place in a tribune on the right of the altar, with his suite and a number of the principal visitors from Paris, whilst the civil and military authorities occupied another tribune on the left side of it. In the other tribunes, at each side of the line, were seated a vast number of persons who had been admitted with tickets to witness the ceremony. The 62d Regiment was on duty inside the terminus, and their band played overtures and military pieces before the arrival of the train. Other troops of the garrison were appointed to do duty outside, in the neighbourhood of the railway. As soon as the Prince had taken his place, the Bishop, accompanied by a numerous body of the clergy, came forward and celebrated mass; after which he blessed the locomotives, pronouncing a short appropriate address on the occasion.

When the ceremony had concluded, the President withdrew for a short time to the pavilion, where he received a number of delegations from the adjoining towns and villages. The Prince then mounted on horseback, and, accompanied by his staff, proceeded to the hotel of the Prefecture, passing, in the midst of the greatest enthusiasm, by the Pont du Faubourg de Saverne, the Vieux-Marché-aux-Vins, the rue de la Comédie, and the rue Brulée. The streets were lined at each side with infantry; four regiments of the 4th Cuirassiers and 6th of the 4th Lancers were also disposed at various points along the passage of the *cortège*. Strong bodies of mounted gendarmerie preceded and followed the President.

The town was crowded to excess by the population from the neighbouring districts, and the whole place wore a holiday aspect of the gayest kind. From an early hour all the streets were crowded, and all the houses were gaily dressed out with flags, garlands, and draperies. The neighbourhood of the railway terminus presented quite a festive scene, and all the public squares and buildings were decorated in the most tasteful manner. Everywhere might be seen escutcheons bearing the initials of L. N., alternating with the arms of the city of Strasburg.

Immediately after the Prince's arrival at the Prefecture he received the authorities and the principal inhabitants of the town. The whole passed over with perfect order, and every one was delighted with the urbanity of the head of State. At half-past five o'clock the *cortège* of peasants filed off before the President. It consisted of 120 cars filled with young girls, and 1200 horsemen all dressed in the costume of the country. On passing before the President the girls threw bouquets at his feet, uttering at the same time the cry of "*Vive Napoleon!*" which was taken up by the horsemen, and re-echoed by the spectators. These cars were covered with ivy, branches of trees, and flowers, and in general bore inscriptions significative of the village which each had proceeded from. For instance on one might be seen the words "The town of Molsheim to Louis Napoleon, who has re-established order and tranquility!" and on another, "The town of Rosheim. We are proud of our glory!" The filing off of these rustic vehicles, filled as they were with the prettiest girls of each village, in their holiday attire, was a novel and pleasing spectacle.

In the evening the President received at his table the representatives of the Foreign Powers, the Envoys of Prussia, Austria, Bavaria, Wurtemberg, Hesse Darmstadt, and Swiss Bâle, all the generals present at Strasburg, and all the high functionaries in display of full dress. A fireworks took place from the bastion opposite the Prefecture, and, notwithstanding the rain, a dense crowd stationed themselves before the building and hailed the President with loud cries every time that he appeared on the balcony, which he did repeatedly, with the Grand Duchess Stephanie of Baden. A grand illumination of the cathedral in coloured lamps and Bengal lights afterwards took place, and presented quite a fairy scene. The streets continued to be crowded until a late hour at night, but nothing occurred to disturb the public tranquillity.

On Monday morning, shortly after seven o'clock, the Prince proceeded to review the troops of the Strasburg garrison on the Robertsau, or Ruprechtsau—an extensive space laid out in walks and gardens beyond the walls, and forming the principal promenade of Strasburg. After the review, a series of manœuvres was executed in the most brilliant manner, in presence of the Prince President, his suite, and the foreign envoys. A sham forced passage of the Rhine took place: a bridge of boats being thrown over the river by a corps of pontoniers. The space spanned by the temporary bridge was 46 metres, and the communication was established in an incredibly short space of time.

Louis Napoleon subsequently crossed the Rhine to Kehl, and there reviewed the troops of the Grand Duchy of Baden, and the remains of the troops and the people of both nations. He returned to the Prefecture at Strasburg shortly after twelve o'clock (noon). In the afternoon there was a grand *fête* at the Robertsau; jousts on the river and a balloon ascent: and at night a ball at the theatre in honour of the Prince President; and the cathedral and the public and private buildings of the city were illuminated

The following interesting details of the day's proceedings are taken from a local paper, the *Alsacien*:—

The question was to effect a simulated forced passage on the lesser Rhine, called the *bras Rabich*, by the application of the different systems of bridges employed by our pontoniers. The first manœuvre consisted in the conveyance of arms on a raft impelled by a party of swimmers. Then some boats carrying infantry attempted a landing. The infantry, the moment they had put their feet on the other bank, commenced skirmishing against the troops that defended it. The landing had for object to cover a third manœuvre—that of the *pont tournant*, a bridge of boats, one extremity of which is made fast to the French bank, and the other extremity insensibly gains the opposite bank from the moment it attained the object desired, a column of infantry rushed above the bridge to succour the skirmishers. The cannon thundered at the same time, and arrested by its fire the movements of the enemy. Whilst the combat was thus progressing, a new bridge, established on rafts, was constructed about 600 metres below the first. Our troops on landing were driven back; but a battery crossed the river on a raft carried on four boats, landed, and protected the infantry by taking the enemy in flank. The infantry resumed the offensive, and thus permitted the completion of the bridge on rafts. The moment it was terminated the rest of our infantry gained the other bank, and the passage of the stream was secured

The Prince enjoyed the spectacle of these operations from a magnificent tribune, richly ornamented, where he had been received with the most ardent acclamations on the part of the ladies who had assembled, notwithstanding that the hour was so early The passage of the river terminated the manœuvres on the Mabila arm of the stream. The Prince left with his brilliant *cortège*, and proceeded towards the great Rhine: he passed in front of the Custom-house, which was guarded by the troops of the Administration. The Prince had found an immense crowd at the moment of the review, the crowd was as great at the smaller Rhine, and it was still the same all along to the great Rhine. The banks of the river and the approaches to it, as far as the eye could reach, were covered with human beings. Immense platforms were erected on the French bank, and were occupied by thousands of spectators. The Baden bank was also crowded with a multitude not less vast, and all enthusiastic: the garrison of Kehl was under arms, and drawn up in order of battle along the stream. Unanimous acclamations welcomed the Chief of the State. Here again a magnificent structure, richly adorned and covered with flags and streamers, had been prepared to receive the Prince and his suite, who entered by an opening prepared in the barrier which protected the bridge. He placed himself in a boat where a *fauteuil* had been prepared for him. At that moment the cannon gave the signal for the commencement of the manœuvres. The boats of the pontoniers advanced successively, placed themselves at regular distances, and became connected one with the other by means of planks, which the artificers quickly made fast. Other artificers threw out large anchors, which served to maintain each boat in line, and fix it against the current Thirty-nine minutes sufficed for skilful pontoniers to complete their work, and to secure the passage from one bank to the other over a width of about 400 metres. The Prince then rose, left his gondola, and mounted on horseback. At the head of the *cortège* was then a carriage in which were the statues of Baden. On the other bank the Prince was received with cries so loud that they were echoed in France as one immense shout of joy. The garrison of Kehl was reviewed in the midst of shouts a thousand times repeated of "*Vive Napoléon!*" The Prince then proceeded to the opening of the bridge, and after having examined its marvellous construction he returned, still hailed with shouts of enthusiasm from both banks of the river. He again traversed the stream on the great bridge of the Rhine, followed by the carriage of the Grand Duchess Dowager Stephanie and the Marchioness of Douglas While returning to the French bank hurrahs upon hurrahs were shouted out with a degree of frenzy. The Prince bent his way to the town, followed by his brilliant staff. The multitude retired, still in amazement at the spectacle it witnessed, and which will long remain engraved on their memory. The Prince's entry into the town (Strasburg) was one continued triumph; he was literally bombarded with bouquets and chaplets of flowers, and the shouts of "*Vive Napoléon*" (or Napoléon, as one honest Alsacian call him), redoubled in intensity, and when suspended were replaced by shouts of "*Vive l'Empereur!*" The population, at each moment more and more enthusiastic, did not cease to admire the man the may had e-cited, as he moved along, mounted on a magnificent horse, which he managed with perfect ease. Wherever they had a chance of having a glimpse of the Prince, there they ran. When they saw him on one point, they tried every short cut to see him again, and once more salute their Prince or their President.

On Monday afternoon, during the course of a short drive, Louis Napoleon was received by an impromptu burst of popular favour, which he appears not to have anticipated, and which is thus described in telegraphic despatch of the Prefect of the Department (Bas Rhin) to the Minister of the Interior:

At half past four the Prince went out in plain clothes, and in an open carriage, and drove in the streets of Strasburg and in the public walk of Ruprechtsau, where the sports of the 15 took place. The moment he was recognised he was surrounded by a crowd respectful and ardent. Each one wished to see him and approach him, while raising shouts of "*Vive Napoléon!*" "*Vive l'Empereur!*" Affected by a demonstration so truly popular, the Prince alighted from his carriage and engaged amongst the crowds of people. It was then there arose actual delirium, and it was in the midst of a population so respectful in its affection that the Prince continued his promenade, and returned to the Hotel of the Prefecture at six o'clock

We are indebted to the same source for the following notice of the departure of Louis Napoleon from Strasburg to Baden on Tuesday:—

The Prince President left the Prefecture at ten o'clock, to proceed to Kehl, and from thence to Baden

The Prince was with the Grand Duchess Dowager of Baden in the *calèche* of the Prefect. He declined taking any escort, and forbade military honours to be paid him. Although the hour of departure had not been announced, a numerous crowd remained stationed at the Prefecture, and in the adjacent streets, waiting to present bouquets of flowers, and to salute the President.

The passage from Strasburg to Kehl was effected without accident, notwithstanding the eagerness of the multitude to get near the carriage. At eleven o'clock precisely the Prince quitted Kehl in a special train. The garrison of Kehl was under arms at the railroad station, and paid him the usual military honours.

A further dispatch adds:—

STRASBURG, July 21.

The Prefect of the Bas Rhin to the Minister of the Interior and the Minister of General Police.

The Prince has passed the night at Baden. His health is excellent. The people are only occupied with the Prince. As for the elections, they are quite forgotten.

Louis Napoleon's return to Paris had been originally fixed for Tuesday, but the gratification experienced by him from the universal acclamations of the people has induced him to prolong his visit a day or two further.

Some arrests, it is said, have taken place at Nancy and Chalons-sur-Marne, but upon what ground is not stated.

The *Moniteur* declares that as soon as the President of the Republic shall return from Strasburg, a slight modification of the Ministry will take place, and adds:—"M. Drouyn de Lhuys, the rumour says, will be named Minister of Foreign Affairs; M. de Turgot will be Minister of State: M. Magne will be named Minister of Public Works, in place of M. Lefebvre-Duruflé: M. Casabianca will be named President of the Section of Public Works in the Council of State, in place of M. Magne; and M. Lefebvre-Duruflé will be named Senator

The *Moniteur du Thrs* has received "warning to. publishing an article reflecting on the Government.

Bou-Maza has not attempted to escape, as had been supposed last week He has written to the *Constitutionnel* to say that he was absent from his place of detention by permission of the authorities, and that he was present to escape, as he shown by his return to his former place of residence.

The *Moniteur* announces the promotion of General of Brigade M'Mahon, Commander of the division of Constantina, to the grade of General of Division. This promotion is no doubt a reward for the activity displayed by General M'Mahon, during the late insurrection in that part of Algeria.

UNITED STATES, &c.

The supremacy of our transatlantic brethren in the production of fatal accidents on a grand scale, is painfully asserted in the intelligence from the Union this week. At Staten Island, near New York, on the 5th inst, 100 persons were precipitated into the water by the giving way of the small bridge between the shore and the ferry-boat, and 17 out of the number were drowned. At New Orleans, on the same day, a steamboat, while racing against another vessel on the Mississippi, blew up, when 50 passengers were killed on the spot, and several wounded. Amongst the former was Judge Preston, of the Supreme Court, and other persons of distinction. In the same category may be ranked the intelligence brought to New York by the steam-ship, *Empire City*, that the *Madelaine* steam-ship, bound from Aspinwall to Havannah and New Orleans, had lost upwards of forty of her passengers and crew by cholera and Chagres fever. At Brooklyn an extensive fire in an oil manufactory destroyed property to the amount of 50,000 dols. In Canada, likewise, a disaster similar to the last has taken place, a conflagration having broken out in Montreal on the 8th inst., which was not got under at the departure of the latest news on the evening of the 9th. Upwards of 300 houses have been destroyed, and many thousands left without a home.

The latest advices from New York are to the 10th inst.

Of political news there is nothing of special interest to mention.

From Congress we learn of the reception by the Senate on the 2d inst, of a communication from the Secretary of State, relative to diplomatic salaries, by which it appears that nearly all the foreign representatives of the United States deem their pay too small; and, on comparison with the salaries paid to the agents of other countries, it appears that many of them do not get what might be regarded as fair remuneration for their services.

In the House of Representatives a bill had been printed, authorising

the Postmaster-General to contract for the transportation of the mails between New York and Galway, *viâ* St. John's, Newfoundland

Mr Webster had reached Boston, and met with a most enthusiastic reception.

The Southern Whigs are most active in favour of Scott's election.

The exiled Socialists from France had given a banquet to M. Cabet, Ch ef of the Icarians.

Judge Betts had decided that Kaine, the criminal fugitive from Ireland, was legally detained under the extradition treaty, and disallowed the writ of *habeas corpus*, which had been sued out in his favour

The seventy-sixth anniversary of National Independence was celebrated on the 4th inst. with great festivities from one end of the Union to the other.

Dr. George A. Gardiner, the head of the alleged Gardiner claim, who was previously out on bail in the sum of 40,000 dols., under an indictment for perjury, had been again arrested at Washington by order of the Government, under a new indictment, which was found by the grand jury, charging the said Gardiner with forging the signatures of the Governor and of the Secretary of state of San Luis Potosi, the Prefect of Rio Verde, and his secretary, and the seal of the State. The Government demanded bail in the sum of 100.000 dols. Judge Crawford required 20,000 dols., failing to obtain which, Gardiner was committed to gaol.

Governor Calhoun, of New Mexico, expired on the 20th ult.

The remains of Henry Clay arrived in New York on the afternoon of Saturday, the 3d, from Philadelphia, when a procession took place, from the Battery to the City Hall. The coffin was deposited in the Governor's room, where it remained in state till the following Monday morning, when the body was conveyed to Albany, *en route* to Kentucky.

WEST INDIES.

Advices received this week from Jamaica to the 27th of June, communicate the same unvarying tale of distress, disease, and depression which forms the staple of all the intelligence for a considerable time past from this once flourishing island. The feeling of despair as to any amelioration of the circumstances of the place had become so deep-rooted and wide-spread in the popular conviction, that a strong tide of emigration had set in to the gold-fields of Australia; whole families were taking flight to the El Dorado of resuscitated hopes; but in general the main body of the emigrants consisted of young single men in the prime of life. The want of labour was being seriously felt in many parts of the island, and the press was obliged to be resorted to as a means of inducing labourers to engage themselves upon better terms, for the purpose of securing the pimento crop, which was now ripening. A good, honest, and hard-working labourers, that there is no getting a fence put up, or a piece of land planted with grass or corn, without trouble, and the certainty of failure in consequence of the dilatory manner in which it is performed. The pimento crops do not reach one half of what they ought to be, from the same cause.

Small-pox continued to rage with much virulence in many parts of the Island. In Kingston it was very prevalent, notwithstanding which the number of deaths had not been great. The disease was found to yield to superior medical treatment.

From the other islands there is no news of interest.

POSTAGE.—THE GERMAN STATES.—A treasury warrant has been issued, by which it is directed that all letters posted in England for the German postal union, and *vice versâ*, and all letters passing through the German postal union for England and the Colonies, shall be charged at the rate of 8½d. per letter postage. The letters thus charged must be conveyed between the United Kingdom and Belgium by packet-boat, and be enclosed in the Prussian closed mails. And the warrant does not extend to any letters sent out France or out Belgium, unless it be indorsed on the Prussian closed mails. The countries comprised in the postal union are Austria, Baden, Bavaria, Bremen, Brunswick, Hamburg, Hanover, Lubeck, Luxemburg, Mecklenburg, Schwerin, Mecklenburg-Strelitz, Oldenburch, Prussia, Saxony, Wirtemburg, and the countries included in the postal district of the principality of Tour and Taxis (Lippe excepted).

For letters above half an ounce in weight the following rules of postage are fixed, viz: On every such letter exceeding half an ounce and not exceeding one ounce in weight, two rates of postage. On every such letter exceeding one ounce, and not exceeding two ounces in weight, four rates of postage. On every such letter exceeding two ounces, and not exceeding three ounces in weight, six rates of postage. And on every such letter exceeding three ounces, and not exceeding four ounces in weight, eight rates of postage. And for every ounce or fraction of an ounce above the weight of four ounces, there shall be charged and taken two additional rates of postage, and every fraction of an ounce above the weight of four ounces shall be charged as one additional ounce; and such progressive and additional rates, chargeable under this clause, shall be estimated and charged at the sum which any such letter would be charged with under this warrant, if not exceeding half an ounce in weight.

The costs and expenses paid by the public out of the Civil Contingency Fund, for the passing of the Sou hern Market Removal Bill, amounted to £3613 7s 9d. The solicitors engaged were Messrs. Lewis Barnes, and Ellis, and their services extended over a period from the 13th March, 1851, to the conclusion of the session (4th August). The fees paid to the three counsel en.ged (Mr. Sergeant Wrangham and Messrs. Edwin James and Elias) amounted to £1273, and their services did not extend over more than three months. The various items in the bi l appear to have been charged upon what is termed "a moderate scale," as only £59 12s. 2d. was taxed off £3671 19s 11d

ARTIFICIAL PRODUCTION OF FISH.—One of the most extraordinary discoveries of the present day is that by which the production of fish, to an incalculable extent, in lakes and rivers, by artificial means, can be effected. The process has within the last three years been employed on a grand scale with extraordinary success, in different parts of France. Some years ago two fishermen, named Gehin and Remy, of La Bresse, in the department of the Vosges, found that from various causes the stock of trout, for which the rivers and lakes of that department are famous, greatly declined; and they then attentively studied the habits of the male and female trout, with the view, if possible, of discovering the means of checking the evil. After long and patient observation they found that not one in a hundred of the eggs deposited in the bed of rivers, came to maturity—the rest being devoured by other fish, washed away, or destroyed by mud They found also that of the fish which had become exclusive of hatched, the greater part were destroyed by the larger fish of their own or different species. It then struck them that if they were to collect the eggs, and after wards to secure the young fish from the voracity of the larger ones, they would in the course of a few years obtain an inexhaustible supply. These two men, accordingly, did so, and then, in imitation of the fish, placed the eggs on a layer of gravel, which they deposited in a box full of holes. This box they fixed in the bed of a flowing stream, and covered it with pebbles. The fish themselves, in the natural way, cover the eggs with pebbles and leave them. In due time the eggs exploded, and almost every one was found to be good. They then obtained several hundred fish. They took precautions for keeping the little creatures in water when they were out of danger, and supplied them with fitting food. Applying this operation the year after to a great number of fish they obtained several thousand trout; and in a year or two more the numbers had literally increased to millions. After they had stocked all the rivers and streams of the Vosges, and some in the Moselle and the Haut and Bas-Rhin, Dr. Haxo, secretary of the *Société d'Emulation de Vosges* drew the attention of the Academy of Sciences and of the Government to the discovery. The Academy decared that it was of immense national importance, though it had long been known to scientific men as a scientific curiosity, not, however, as of practical utility. The Government, on its part, saw that the application of it to the rivers and streams of France would not only afford employment to a vast number of persons, but would enable an immense addition to be made, at scarce any expense, to the people's food. It accordingly took the two men into its service and made them apply the system to different waters. They have done so with the most angular success; rivers and lakes in which there were no fish are now teeming with them. Nor have they confined their operations to trout alone, but have extended them to salmon, carp, pike, tench, and perch, and in each case with complete success. Indeed, their system is appuable to all sorts of fresh-water fish, and to those which, after spawning in rivers, descend to the sea. Among the rivers they have already stocked are those of the Ire, Haute, Loire, Allier, Loire, Meuse, Meurthe, and the Haute Saône. Several gentlemen of property have also tried the system with success on their estates in Burgundy, Brie, and Normandy. In addition to the breeding of fish in enormous quantities, it enables fish of different species to be naturalised in any waters or removed from river to river. So great is the importance which the Government attaches to the plan, that it has nominated a commission of eminent scientific men to superintend the operations of Gehin and Remy. The *Moniteur* announces that the Minister of Marine and Colonies has also ordered that experiments shall be made to apply to salt-water fish, at the mouth of rivers, and of the coasts, especially in fisheries. M. Valen ciunes an eminent ichthyologist, and member of the Institute, has been charged to examine the mouths of rivers and the coasts from Havre to La Teste, and to state in what places the experiments may be tried with most chances of advantage. M. Milne Edwards and M Coste, both members of the Ins itute have been directed to make similar investigations between Cherbourg and Granville, and in the environs of Toulon.—*From the French papers.*

A party for the Australian diggings, consisting of ten persons, have taken a passage in the ship *Northumberland*, which leaves Plymouth on the 5th of August, for Port Philip. They purpose proceeding the diggings, and have formed themselves into a society for that purp s , which is to printed rules, which have been duly stamped and legalised. Each member is appointed to some domestic or social office in the community—such as chaplain, butcher, surgeon, captain, &c. They take out with them a large quantity of suitable clothing, and other things necessary for the occupation they are about to engage in. Eight of these persons were clerks in the Tithe-office, and left in consequence of a dispute with the Commissioners of that department.

LAW INTELLIGENCE.

BLAKELOCK *v.* THE MIDLAND RAILWAY COMPANY.—This action was tried on Monday at Derby, before Mr. Baron Alderson and a common jury, when a verdict was given for the plaintiff with £500 damages, as compensation for a broken ankle joint and a concussion of the brain, occasioned by reason of the notorious Clay Cross accident which occurred on the Midland Railway on the 19th of May, 1851. It will be recollected that at this accident a Mr. Meynell, a navvy-sirate, and Mr. Blake, of Sheffield, were killed. The train called at two places and in the time table, and was late on its departure from Derby. The engine broke down at Clay Cross, and was run into by a goods train l.ate due.

APPEARANCE IN COUNTY COURTS.—By the Amendment County Courts Act, a provision in the first sch. as to persons qualified to practice before the County Courts, is repealed, and it is now provided, "That it shall be lawful for the party to the suit or other proceedings, or for an attorney of one of her Majesty's Superior Courts of Record, being an attorney acting generally in the action for such party, but not an attorney retained as an advocate by such first mentioned attorney, or for a barrister retained by or on behalf of the party on either side, but without any right to exclusive or pre-audience, or by leave of the judge, for any other person allowed by the judge to appear instead of the party, to address the Court; but subject to such regulations as the judge may from time to time prescribe for the orderly transaction of the business of the Court."

RETIRING PENSIONS TO COUNTY COURT JUDGES. — There is a clause in the County Courts Further Extension Act (15th and 16th Victoria, cap. 54), under which, on a petition to the Lord Chancellor, retiring pensions to County Court Judges, to two-thirds of their salaries, may be granted on account of personal infirmity disenabling a Judge from the due execution of his duty.

In the Insolvent Court a few days ago an application was made on behalf of an insolvent named Coker to be admitted to bail, he having filed his schedule, in which there appeared a statement respecting several "accommodation bills." Mr. Commissioner Phillips declared that he would not grant bail in any case where he found accommodation bills. He had done all in his power to check the giant evil, and he would now see what effect the rule he had laid down would have. Bail was an indulgence, and in the discretion of the Court, and notwithstanding the other Commissioners did not act upon it, he should do so until he was set right by the Legislature.

CHARITY SUITS.—It appears that already more than £500,000 has been recovered for the benefit of certain charities, and in one case alone upwards of £50,000. The number of charities with which the Attorney-General and Mr. Fearon (his solicitor on such matters) have to deal with is £24,000, involving property to the amount of a million and a half per annum.

FURIOUS DRIVING.—At the Bow-street police court, on Wednesday, Thomas Best is, driver of one of Wilson's Favorite omnibuses, and Joseph Bishop, driver of one of Bolton's Caledonians, were summoned for furious driving. From the evidence it appeared that the two rival omnibuses were racing at full gallop up Whitecail, on Tuesday afternoon, the 13th instant, the Favorite being on its proper side, and the other endeavouring to pass it. They were galloping at the rate of ten miles an hour, when Bolton's omnibus came into collision with the carriage of a gentleman named Sotheby, while the Favorite was at most at the same time ran into Lord Easton's cabriolet, which was proceeding at a moderate pace in front. The collision with Mr. Sotheby's carriage was of an alarming character, and might have been attended with fatal consequences to the inmates Mr. Henry, the magistrate sentenced each of the men to three weeks' imprisonment, and ordered the proprietors to pay the expenses incurred by the damage. The amount due to Lord Easton was contributed by his Lordship to the poor-box.

Within the week the following return was published of pensions granted between the 20th day of June, 1851, and 20th day of June, 1852, and charged upon the Civil List:—1851: August 30. Anna Jameson, in consideration of her literary merits. In trust to W. M. Thackeray, Esq., and John Murray, Esq., £100.—September 1. Maria Long, in consideration of the services of her late husband, Frederick Bedford Long, Inspector-General of Prisons in Ireland, and of his having died from illness contracted while in the execution of his duty, by which she is placed in circumstances of great distress. In trust to the Hon. Edward Cecil Curzon and John Martin, Esq. M.P. £100.—September 1. James Si k Buckingham, in consideration of his literary works and useful travels in various countries. £200.—September 2. Robert Torrens, F.R.S., in consideration of his valuable contributions to the science of political economy. £200.—October 10. John Wilson, Professor of Moral Philosophy in the University of Edinburgh, in consideration of his eminent literary merits. £300.—October 10. Elizabeth Reid (widow of Dr. James S. Reid, Professor of Ecclesiastical and Civil History in the University of Glasgow, £50; and Jane Arnott Reid, Elizabeth Reid, and Mary Reid (daughters of the above, and for the survivor or survivor of them), £50, in consideration of Dr. Reid's valuable contributions to literature, and of the distressed condition in which his widow and children are placed by his decease. In trust to the Rev. George Bellis and Samuel Brown Reid, M.D. £100.—1852: Feb. 5. Alexander MacArthur, in consideration of the merits of her late husband, Dr. Alexander MacArthur, superintendent of model schools, and inspector of the Dublin district under the Commissioners of National Education in Ireland, and of his having been attacked by mental derangement, attributed solely to his unbounded exertions in the discharge of his official duties, and also in consideration that the pension of £200 per annum which was granted to her during the lifetime of her husband, has lapsed by his decease. In trust to Dr. George Bellby and Captain A ex Macleakie. £50.—April 5. John Britton, in consideration of his literary merits and impoverished condition £75.—April 5. Mary Fitzgibbon, in consideration of the signal services rendered by her father, Colonel James Fitzgibbon, on various occasions in Canada, and of the destitute condition in which she will be left at her father's death. In trust to Mr. G. de B. Allwood, secretary, and Mr. T. Wood, accountant of the Bank of British North America. £75.—Total, £1,200.

Some of the Liberal papers affirm, immediately on the assembling of the new Parliament, Sir Geo. Cockburn will move for the appointment of a select committee to inquire into the undue influences employed by the Admiralty, during the recent elections, in the Government ports.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

SIR JOHN LAMBTON LORAINE, BART., OF KIRKE HARLE, NORTHUMBERLAND.

It is a curious fact that within three years we have had to record the deaths of no less than five inheritors of the Loraine Baronetcy: of Sir William Loraine, the 6th Baronet, in 1849; of Sir Charles, the 7th, in 1850; of Sir Henry and Sir William, the 8th and 9th, in 1851; and of Sir John Lambton Loraine, the 10th, in 1852. The last-named, whose death occurred on the 11th instant, at St. Heller's, Jersey, was the third and youngest son of Sir William Loraine, the 6th Baronet, by Hannah, his wife, daughter of Sir Lancelot Allgood, Knt., of Nunwich. He was born in 1784, and married, in 1835, Caroline-Isabella, eldest daughter of the Rev. Frederick Ekins, rector of Morpeth, and by her (who died in 1847) leaves, with other issue, a son and heir, the present Sir Lambton Loraine, 11th Baronet, born in 1838, now a Midshipman in the Royal Navy. The Lorainos, of Kirke Harle, are one of the most ancient of the Northumbrian families, being descended from Robert, one of the companions in arms of the Conqueror.

THE REV. EDWARD MURRAY.

THE Rev. Edward Murray, for many years rector of Northolt, Middlesex, died on the 1st inst., in his 84th year This highly respected clergyman, after relishing the higher preferments of the Church, devoted himself to the study of theology. His writings on that subject have had an extended circulation, particularly in Germany and America. He was also fond of scientific pursuits. His mind was actively inventive, and he must have been one of the first who applied the Archimedean screw to the purposes of navigation, as he had made from his direction a small vessel on that principle in the year 1803. The rev. gentleman was grandson of the third Duke of Athol, being the second son of the late Right Rev. Lord George Murray, Bishop of St. David's, and the younger brother of the present Bishop of Rochester. The Rev. Edward Murray married Ruperta, only child of the late Sir George Wright, Bart., and leaves issue two sons and two daughters.

Thomas Gisborne, Esq., formerly a member of the House of Commons, died at his residence, Yoxall Lodge, Staffordshire, on Tuesday morning. Mr. Gisborne's failing hea th had recently compelled him to resign the contest for Nottingham, and for ten days past slight hopes of his recovery had been entertained by his medical advisers.

CHARITABLE BEQUESTS.—The late Mrs. Halford (wife of the Rev T. Halford, M.A.) has bequeathed £1000 to each of the following institutions: The Blind Asylum, at Exeter, the Dumb Asylum, at St. Leonard's, near Exeter; the Exeter Dispensary; Exeter Eye Infirmary; Governesses' Benevolent Institution, London, and the residue of her property to the Devon and Exeter Hospital. The late Thomas Norris, Esq., of Howick House, Lancaster, has bequeathed £1500 to the Cloth Fund at Croxton, to be invested, and the interest laid out in cloth for the poor of that town; a so £500 to the Bury Infirmary. The late William Smith, Esq., of Bristol, has left £200 to the Angel Pilgrims Society; London; £200 to the poor members of Ebenezer Chapel, Brighton; and £200 to the Sick Poor Society, Newark-upon-Trent.

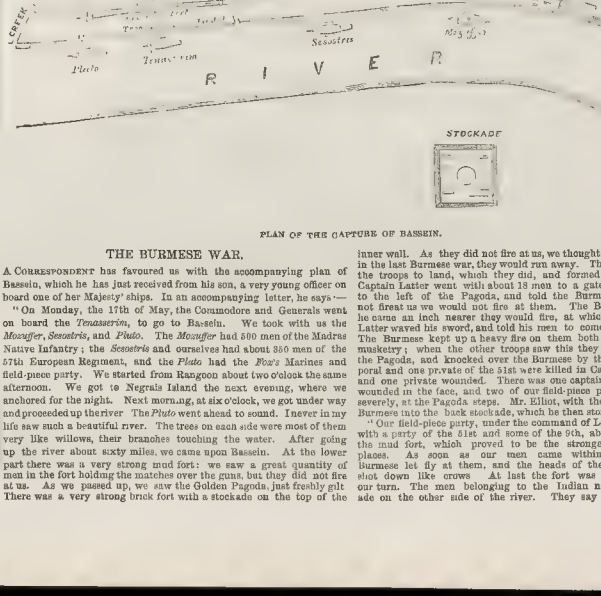
The will of the late Earl of Suffolk and Berkshire has been proved by the present Ear. (Lorstofore Viscount Andover), the son and sole executor, to whom is referred the res. estate, and is also left c nsiderary legacies over the personalty, a specific portion o funded property being divided amongst the sons and daughters. A stamp duty was paid on £40 000.

The late Robert Richard Pigou, of Whitchurch, Oxford, who died on the 29th of April last, has left personal estate to the value of £100,000, and has bequeathed to his wife a life interest over the greater part thereof, and after her decease the property will be divided between his nephews. Henry Meadows Pigou, Frederick William Pigou, and Clarence Pigou. There are many liberal bequests to his relatives. The Colston Basset estate he has devised to his brother Frederick W. Pigou, who is an acting executor, together with the widow and the Rev. Henry Clarence Pigou. He has left a legacy of £100 to the Royal Berkshire Hospital.

LORD PROVOST PASSPORTS.—We understand that the Belgian Chargé d'Affaires in London has recently intimated to the Home Office that passports issued by the Lord Provost of Edinburgh will not be recognised in Belgium, unless they are *viséd* at the Belgian Legation in London, or by a Belgian Consular agent in this country. This vexatious proceeding ought to be kept in view by persons who intend, in travaling on the Continent, to take Belgium in their route. An additional fee must be paid to the Belgian Consul and to for his visé, and it should further be explained that he will not give it unless there is appended to the Lord Provost's passport a description of the bearer, which has hitherto been unnecessary.—*Edinburgh Advertiser.*

At Standish House, the seat of the Rev. J. P. Mitchell, a fatal accident occurred last Saturday evening The youngest son of Mr. Mitchell had been rabbit shooting, and returning home about nine o'clock, was called by his two youngest sisters from the large entrance hall, and in running round to answer them the gun went off and lodged the contents in the forehead of the youngest, a girl little girl between nine and ten years of age She survived only a few minutes. The children had their arms round each other's neck when the accident happened, but strange to say not a shot touched the other

As the warehouseman at the White Hart, Newmarket, named Calkin, was engaged in uncorking some soda water, a few days ago, one of the bottles suddenly burst, and a quantity of glass struck him very severely in the face and eyes. He was taken home, and some of the glass extracted from his eyes, but after suffering the most excruciating pain, from inflammation and mortification, he died, delirious, leaving a wife and three small children unprovided for



PLAN OF THE CAPTURE OF BASSEIN.

THE BURMESE WAR.

A CORRESPONDENT has favoured us with the accompanying plan of Bassein, which he has just received from his son, a very young officer on board one of her Majesty' ships. In an accompanying letter, he says:—

"On Monday, the 17th of May, the Commodore and Generals went on board the *Tenasserim*, to go to Bassein. We took with us the *Mozuffer*, *Sesostris*, and *Pluto*. The *Mozuffer* had 500 men of the Madras Native Infantry; the *Sesostris* and ourselves had about 350 men of the 57th European Regiment, and the *Pluto* had the *Fox's* Marines and field-piece party. We started from Rangoon about two o'clock the same afternoon. We got to Negrais Island the next evening, where we anchored for the night. Next morning, at six o'clock, we got under way and proceeded up the river The *Pluto* went ahead to sound. In ever in my life saw such a beautiful river. The trees on each side were most of them very like willows, their branches touching the water. After going up the river about sixty miles, we came upon Bassein. At the lower part there was a very strong mud fort: we saw a great quantity of men in the fort holding the matches over the guns, but they did not fire at us. As we passed up, we saw the Golden Pagoda, just freshly gilt There was a very strong brick fort with a stockade on the top of the inner wall. As they did not fire at us, we thought that, as at this place in the last Burmese war, they would run away. The General ordered all the troops to land, which they did, and formed on the river's edge. Captain Latter went with about 18 men to a gateway about 300 yards to the left of the Pagoda, and told the Burmese that if they did not treat us we would not fire at them. The Burmese said, that if they treated us as enemies they would fire, at which challenge Captain Latter waved his sword, and told his men to come on, which they did. The Burmese kept up a heavy fire on them both by great guns and musketry; when the other troops saw this they rushed on and took the Pagoda, and turned over the Burmese by the dozens. One corporal and one private of the 51st were killed in Captain Latter's party, and one private wounded. There was one captain of the 51st slightly wounded in the face, and two of our field-piece party wounded, both severely, at the Pagoda steps. Mr. Elliot, with the marines, chased the Burmese into the back stockade, which he then stormed.

"Our field-piece party, under the command of Lieutenant Rice, went with a party of the 51st and some of the 9th, about 80 men, to take the mud fort, which proved to be the strongest of either of the places. As soon as our men came within musket shot, the Burmese let fly at them, and the heads of the column were being shot down like crows At last the fort was taken, and it was our turn. The men belonging to the Indian navy took the stockade on the other side of the river. They say there were between

THE BURMESE WAR.

RATTLER PROSERPINE. SALAMANDER. PEGU.

THE CAPTURE OF MARTABAN.

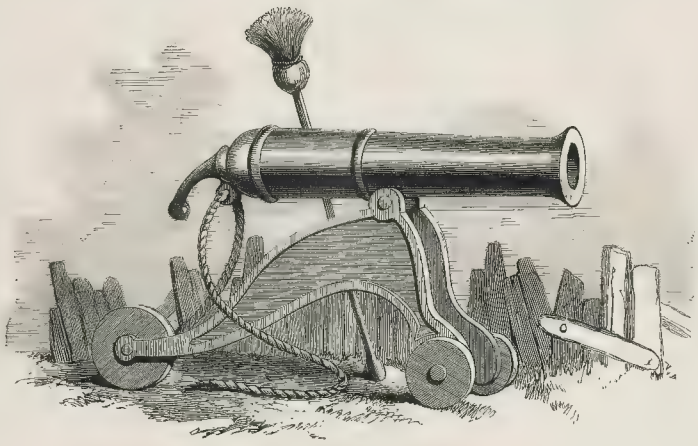
6000 and 7000 troops in the three forts, and there were between 500 and 600 Burmese killed. Out of our small army of 900 men there were 31 men wounded and 5 killed. Everything was quiet at six o'clock that same evening, so that we were just twelve hours in coming up sixty miles of river and taking three strong forts. We left a day or two afterwards, leaving a garrison of 500 men, and H.C *Sesostris*.

"Yours, &c.,

"H.M.S. ——, off Rangoon,
May 23."

We have also been favoured, by two Correspondents, with the accompanying Sketches of two of the leading events of the Burmese War. The first shows the taking of Martaban, which has already been detailed in the ILLUSTRATED LONDON NEWS for June 5, page 443. In this View, the position of the several steamers engaged in the attack are correctly shown; the troops landed at the wharf in front of the battery, where a building is seen. Our Correspondent, writing from Moulmein, May 12, says:—

"We have had no mail here since February last from Calcutta, as all the steamers are engaged in the expedition. Our losses since the action have been heavy, nearly 300 men, through sickness. We old hands, who know the Burmese well, and get our information from the people themselves, are of opinion that the Burmese will fight to the last; and, as they are much better disciplined and armed than last war, we shall have a tough job next cold season."



BURMESE GUN, CAPTURED AT RANGOON.

The second Illustration, by another Correspondent, at Rangoon, represents an iron Burmese piece, about 4½ lb., taken in the jungle behind the white house stockade.

The lower Sketch, by the same hand, shows the building used as the Field Hospital during the three days' storming of Rangoon, detailed in the ILLUSTRATED LONDON NEWS for June 5, page 443; and for June 26, page 508, where also are engraved the town, fortifications, and Great Pagoda. Our Correspondent's Sketch of the Hospital is taken from the river, whence the mass of buildings is very picturesque. It consists of a pagoda, fringed with bells hanging from metal trellis-work. Next, to the right is shown the summit of a temple, which contains several colossal Burmese idols. The building in front of the View was the residence of the priests of the temple, and is built of teak, raised upon piles of the same wood, about eight feet from the ground. This building was appropriated to the reception of the wounded Europeans; the small building in the background being assigned to the native soldiers. During the five days of the fight, about 180 men and officers were admitted, including those prostrated by *coup de soleil* and cholera, and 120 from wounds received in action. The medical officers attached to the hospital were Dr. Montgomerie, superintending surgeon to the Burmese force; Dr. Farrer, Dr. Christison, &c. The wounded, after being treated in this hospital until sufficiently recovered, were removed to the *Depôt* hospital.

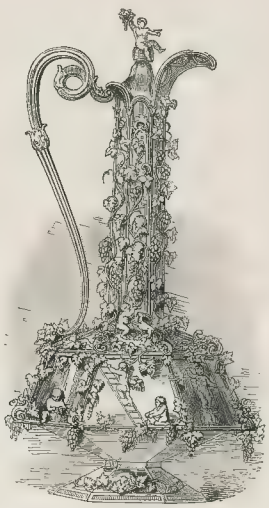
BUILDING USED AS THE FIELD HOSPITAL, DURING THE STORMING OF RANGOON.

NEWSPAPER

THE STAMFORD RACE CUP.

THIS handsome group was contended for at the Stamford Races on Tuesday. It consists of a tazza of graceful form, supported by an oak-tree, around which are grouped cleverly-modelled figures of a horse, mare, and foal. Upon a massive base are inscribed the names of the stewards, Mr. George Payne and Mr. J. Talbot Clifton. The nominal value of the prize is 100 guineas. It is from the establishment of Mr. C. F. Hancock, of Bruton-street, and is a very tasteful work.

THE STAMFORD RACE CUP.



THE JERSEY RACE CUP.

THIS elegant prize was contended for at the Jersey Races on the 7th inst. It is a Claret Jug, of burnished silver, engraved with horizontal lines, upon which are laid vine leaves, tendrils, and grapes, amidst which are cleverly modelled figures, in frosted silver; tastefully embodying "The Vintage," in its stages of gathering and crushing the grapes. Upon the cover of the Jug a Bacchanal figure sits astride a cask, holding in triumph a rich cluster of grapes. By an ingenious contrivance all the figures may be removed, and the jug used plain. This is a novel and characteristic design, beautifully wrought by Mr. Angell, of the Strand.

THE ÆOLIAN VASE.

THIS classic prize has been presented by her Majesty to the Royal Victoria Yacht Club, and was sailed for, by yachts of all nations, on Thursday; the celebrated clipper *America* having been specially sent home from Gibraltar for the occasion, by her noble owner, Lord De Blaquiere.

The following are the details of this very characteristic vase. Subject on panel:—

The seamen of Ulysses, thinking to discover riches within the bag (given to their master by Æolus), unfasten the mouth, the winds contained therein burst out, and the result is a terrific storm.—ODYSSEY, Book X.

The three other panels bear the Royal arms and following inscription:—

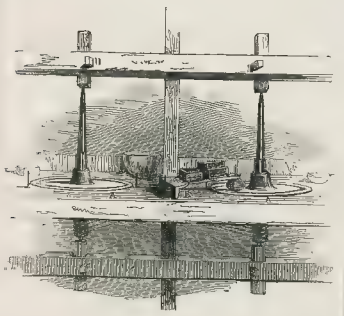
The gift of her most Gracious Majesty Queen Victoria to the Royal Victoria Yacht Club, July 22d, 1852.

Upon the shoulders of the vase are figures representing the winds.

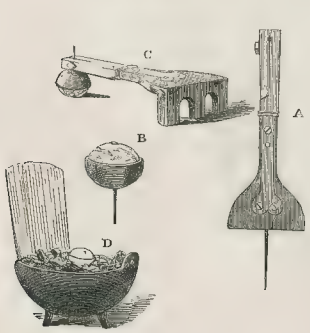
THE ÆOLIAN VASE, PRESENTED BY HER MAJESTY TO THE ROYAL VICTORIA YACHT CLUB.

The whole is very richly decorated in the Cinque-cento style, and placed upon an ebony case.

This superb prize, value 100 guineas, has been executed in silver, by Messrs. Hunt and Roskell, and is a first-class specimen of design and manufacture.



ELEVATION OF PART OF THE DIAMOND-CUTTING MACHINE.



PARTS OF THE DIAMOND-CUTTING MACHINE.

RE-CUTTING THE KOH-I-NOOR DIAMOND.—(SEE NEXT PAGE.)

THE RE-CUTTING OF THE KOH-I-NOOR.

THIS celebrated gem, of which the world of visitors saw so much in the Great Exhibition of last year, is now in progress of transformation, an operation which it has hoped and believed will develop its beauties to a greater extent than hitherto has been the case. Before proceeding to detail the process, of which we were witness on yesterday se'nnight, a brief outline of its history may be given. The Koh-i-noor was found in the mines of Golconda about the year 1550, and was presented by the Viceroy of the Deccan to the Great Mogul. The diamond subsequently became the property of Pandoor Rajah, Chief of all India, Cabul, and Cashmere, from whom it was taken by Timur, and subsequently from Mohammed Shah by Nadir Shah. On the assassination of Nadir Shah, it was seized, with his treasury, by his general, Ahmed Shah, who took it to his native country, Affghanistan, of which he became Sovereign. His descendant, Shah Soojà, when obliged to fly his country, took it with him, and threw himself upon the protection of Runjeet Singh; the latter, taking advantage of his misfortune, by a little fortune skilfully applied to the mind and body, induced its surrender into his own possession. On Runjeet's death it was inherited by Dhuleep Singh. The recent war in Mooltan, and disturbances in the Punjaub, induced the British resident at Lahore to secure as an hostage the person of the boy king Maharajah Dhuleep Singh, and at the same time to seize the Koh-i-noor. Upon the defeat of the Sikhs it was yielded to the British Crown, by special clause in the treaty then concluded.

The Hon. W. C. Osborne, in his work, "The Court and Camp of Runjeet Singh," gives the following graphic description of the mode in which this famous diamond was worn by its equally famous possessor by right of conquest, Runjeet Singh:—"Cross-legged upon a golden chair, dressed in simple white, wearing no ornaments but a single string of enormous pearls round the waist, and the celebrated Koh-i-noor or Mountain of Light on his arm (the jewel rivalled, if not surpassed, in brilliancy by the glance of fire which every now and then shot from his single eye, as it wandered restlessly round the circle), sat the Lion of Lahore."

Upon the gem falling into the hands of its present possessor, enormous and exaggerated ideas of its value (under all circumstances a difficult matter to decide) were formed, and even in the Exhibition Catalogue the lustrous cynosure was set down as representing a (fictitious) value of two millions sterling. Professor Tennant, however, has, upon a careful calculation, arrived at the more moderate estimate of £276,765, as the market value, supposing it to be perfect in every respect. A minute examination, however, showed that the Koh-i-noor was not perfect, arising from the unskilful mode in which it had been dealt with, both in the original cutting and subsequent setting. To remedy these defects was desirable. How to do it was the question. Professor Tennant and the Rev. W. Mitchell were consulted, and, in an elaborate report, were favourable to the proposed re-cutting as a means of improvement, but threw out doubts as to its complete practicability, unaccompanied with danger to the integrity of the stone. Upon this report Messrs. Garrard, of Panton-street, Haymarket, the Crown jewellers, were instructed to obtain the opinions of practical diamond-cutters, and with this view those gentlemen consulted Mr. G. Coster, of Amsterdam; the trade of diamond-cutting, which originated in this country, and being at present chiefly confined to Holland. This practical lapidary, while not disputing possible danger from various causes, expressed his belief that, with the requisite care and skill of experienced artists, it might be avoided. These reports were duly considered, and eventually Messrs. Garrard were instructed to execute the work of re-cutting the diamond, and converting it from its present imperfect shape to that of an oval brilliant, with corresponding alterations of the two smaller diamonds its accompanying pendants. Two skilled workmen were brought over from Holland, and a steam-engine was erected, to assist in the intended operation. An engine of from two to four-horse power was erected under the direction of Mr. Joshua Field, of the firm of Maudslay, Sons, and Field, and somewhat of Nasmyth the apparatus was for the first time practically employed; on which occasion his Grace the Duke of Wellington, who had evinced great interest in the undertaking, honoured Messrs. Garrard's factory with his presence, and inaugurated the work by himself cutting the first facet on the stone.

We will now endeavour to explain the *modus operandi*, which from its novelty in this country cannot fail to be interesting. In a copper vessel or cup, called the *dop*, is melted a quantity of solder—a mixture of tin and lead which is allowed to cool until it attains a certain consistence, when by means of tongs the diamond is embedded in the metal until entirely covered with it, except the salient angle intended to be polished. The *scaife* is the next piece of machinery: it consists of a cast-iron disc, which is wheel horizontally revolving in the centre of the lapidaries' table, at a velocity of upwards of 2000 revolutions per minute, upon which the exposed portion of the diamond is placed by means of forceps fixed to the table, and steadied by the pressure of heavy weights of lead. The rapidly revolving wheel or *scaife* is kept constantly supplied with diamond dust, the only known medium for cutting diamonds; and the intense heat generated by the friction, which if not guarded against would speedily melt the metal in which the stone is deposited, requires that the jewel should be frequently cooled in a pan of tepid water, which is kept at hand for that purpose. From the anxious care and cautious skill required in the performance of these operations may be inferred the length of time which the undertaking is likely to occupy —an operation the parallel of which has not occurred in Europe for at least a century.

In our two illustrations of portions of the machinery, Fig. 1 shows an elevation of the lapidaries' table, A A being the *scaife* and B the forceps, with the *dop* loaded with solder, part of load to retain it in its position, and increase the pressure of the diamond upon the *scaife*.

Fig. 2 contains a top view of the forceps; B the *dop*, with the diamond embedded; c the forceps holding the *dop*; D the charcoal fire with *dop* containing the solder liquifying.

FATAL ACCIDENT AT BOLTON.—About ten o'clock on Monday morning a dreadful accident occurred at the Star Inn, Bolton, by the falling of the eastern wall of the concert-room and premises destroyed last week by fire. Several workmen were at the time engaged taking down the walls, which were very strong. The wall in question suddenly gave way, falling upon some two-pair-back houses in Wigan-lane, occupied by poor Irish families, crushing three of them to atoms, and burying the unfortunate inhabitants—men, women, and children in the ruins. Every effort was instantly made to extricate them from their perilous position, and many were dug out, having suffered little or no injury. Three persons were, however, found suffocated—viz. Nabey Kilgallen, a girl aged ten years; Michael Lurkins, between forty and fifty years of age; and Mary Carney, a widow with six children.

While Mr. Watts, landlord of the Admiral Keppel Tavern, in the Fulham-road, was engaged canvassing for the Marquis of Blandford on Monday, accompanied by Mr. Hewitt, an supporter of the noble Marquis, the chimney in which they were riding was upset when turning the corner of Jubilee-place, King's-road, Chelsea, by which accident both gentlemen were thrown out and seriously injured. Mr. Watts having fractured three of his ribs, and Mr. Hewitt having had his leg frightfully broken. The vehicle itself was smashed to atoms.

LAUNCHING LIFE-BOATS.—Colonel Colquhoun, director of the carriage department in the Royal Arsenal, had, on Monday, a carriage for launching life-boats brought round to Woolwich Dockyard, for the purpose of showing its advantages in launching life-boats to the Lords of the Admiralty (who had been expected on an official visit on that day), and Mr. Richardson, senior, and Mr Richardson, junior, were present with their life-boat, or life-raft, for the purpose of exhibiting its advantages for saving lives from shipwreck or such items at sea. Several pontoons have been lately built at the Arsenal, which, whose pontoons have been introduced into the service for conveying troops across rivers or narrow arms of the sea; with Captain Washington, R.N., Captain Fraser, and several gentlemen connected with the shipwreck societies, arrived about two o'clock at the dockyard, and witnessed the inventions experimented with, Colonel Colquhoun having launched his boat from the carriage several times with twelve men for rowing on board; but the launches took place. The launch of the boat was very simple and easy effected by backing the carriage into the water under the slip from which the *Agamemnon* was recently launched until five feet depth of water was obtained, the wheels being ten feet in diameter, and then raising the fore part of the carriage the boat went down the inclined plane into deep water, and by its own momentum went a considerable distance from the carriage. The boat is to be landed by the same carriage from any beach, however sightly inclined. Col Beaumont, Capt. Perrot, and several ladies and gentlemen went on the Messrs. Richardson's raft, and were rowed for some time by six men with six oars up and down the river. Every person was on the raft, as it can scarce y be upset, on a former trial Mr. Richardson was standing on one side having failed to upset it. Further experiments will be made with these inventions when their Lordships visit the yard.

A young woman of good family lately defended her own case before the Civil Tribunal of Bourges, and spoke for three hours with great ability. Nothing could be more closely reasoned than her address, and the Court decided the case in her favour.

CALENDAR FOR THE WEEK.

SUNDAY, July 25.—Seventh Sunday after Trinity.
MONDAY, 26.—St. Anne.
TUESDAY, 27 Almanack duty repealed. 1834
WEDNESDAY, 28.—Robespierre guillotined, 1793.
THURSDAY, 29.—Month ends. Courts of three days commenced. 1830.
FRIDAY, 30. William Penn died, 1718.
SATURDAY, 31.—Ignatius Loyola died. 1556

London (Euston Station)	£8 10 0	£5 5 0
Edinburgh, Glasgow, Hull, Bristol, Carlisle, Oxford	6 6 0	3 5 0
Worcester, Cheltenham, Gloucester	5 15 0	4 15 0
Birmingham, Rugby, Leicester, Coventry, Lincoln	5 5 0	3 0 0
Wolverhampton, Huddersfield, Leeds, Sheffield, Derby	5 0 0	4 5 0
Manchester, Warrington, Stockport, Macclesfield	4 19 0	3 10 0
Liverpool, Chester	4 0 0	3 5 0

They enable the holders to proceed to Chester, Bangor, Dublin, Cork, the Lakes of Killarney, and by the new and remarkable route of Kenmare and Glengariff, and back to the station at which the Ticket was issued.

The holder of each Irish Tourist Ticket is entitled to have landed to him, at very reduced rates, tickets for a tour in the county of Wicklow; for the journey from Dublin to Belfast; for the tour through the North Giants Causeway; and one Jaunting Car for the tour through Connemara.

Every purchaser of a ticket is presented, gratis, with a copy of the "Illustrated Irish Tourists' Hand-Book," compiled solely for these tours.

The full and complete information afforded at the Chester and Holyhead Company's Office, 29, Westland-row, Dublin. See also "Bradshaw's Guide," page 123.

PATENT SILICEOUS STONE COMPANY.—Provisionally Registered.—Capital, £50,000, in 5000 Shares of £10 each. Deposit of 1s per Share to be paid as a deposit, and £2 3s on the completion of the Company. Future calls, not exceeding £3 10s per Share, to be made at intervals of three months.

PROVISIONAL COMMITTEE.

Professor D T Ansted, F R S, 17, Manchester-street, London	J A Lankester, Esq, Row-market
James Bendel, Esq, Gresham-street, London	Frederick Raymond, Esq, Ipswich
Peter Bruff, Esq, C.E, Ipswich	Wilmer Wilmer, Esq, 34, Wilton-crescent, London
J C Cobbold, Esq, M P, Ipswich	

SOLICITORS.—Messrs Palmer, Francis, and Palmer, Bedford-row, London.
BANKERS.—Messrs Alexander Sir J W Lubbock, Bart, and Co, London.
SECRETARY.—W Thomson, Esq
Temporary Offices—71, Cornhill.

The object of this Company is the working of the patents taken out by Mr Frederick Ransome, of Ipswich, "for improvements in the manufacture of artificial stone, &c." The Patents were secured some three years since, and the Patentee has subsequently devoted his energies in developing its powers and overcoming the mechanical and chemical difficulties attending the introduction of a new manufacture. He has fully succeeded in attaining these objects, and it is now found desirable to organize a company for the sale of production.

The process of manufacture is exceedingly simple, consisting in the solution of silica in caustic alkali at high temperatures; the solution thus obtained producing a gelatinous compound which set in moulds is converted into a hard and durable stone. This is one of the most distinctive impressions. In this stone it is buried in a kiln, the result being a Siliceous Stone equal to the best sandstone and admitting of any ornamental design. The great value and advantage of this material that no shrinkage occurs during the drying and baking, and no flaw or unequal contraction. It is proof against the effects of any climate, and is of great elasticity, much so, &c.

The principal applications hitherto used in the Arts have been in the execution of architectural decorations, such as inlaid and ornamental pavements suitable for facing buildings, mouldings, chimney pieces, terrace work, monumental tablets, &c. &c.

In all these applications the results have been eminently successful, and show a steadily increasing demand.

The Patentee has received [illegible] most valuable and [illegible] commendations of the day, and the Patentee is able to refer to specimens which have been subjected to exposure to the action of the weather for nearly three years, without exhibiting the slightest appearance of decay. The "Inflexed Medal" of the Institution of Engineers, and the Prize Medal of the Great Exhibition of the year 1851, have been awarded in testimony of its merits.

[illegible] the exclusive license which the Patentee has granted to the Company [illegible] the particulars of which may be ascertained, on inquiry at the Office.

[illegible] from the cost of manufacture of this material at Ipswich, and the price obtained, a profit of at least 15 per cent per annum may be confidently anticipated upon the whole of the capital proposed to be invested. The limited extent of the [illegible] hitherto prevented the full development of the [illegible] considerable extent have been already executed, and numerous [illegible] are in progress. Several large contracts are also now under consideration.

Applications for shares may be addressed to the Secretary, or to A B Cook, Esq, stockbroker, Sun Chambers, Threadneedle-street, Prospectuses, containing full particulars, with forms of application for shares may be obtained, and applications of the above rates, at the office, 71, Cornhill, from 11 till 3 daily.

THE NEW SOCIETY of PAINTERS in WATER COLOURS WILL CLOSE their Eighteenth Annual EXHIBITION on SATURDAY NEXT.—GALLERY, 53, Pall Mall, near St James' Palace, open from Nine o'Clock till Dusk. Admission, 1s. JAMES FAHEY, Secretary.

SOCIETY of PAINTERS in WATER COLOURS.—The FORTY-EIGHTH ANNUAL EXHIBITION WILL CLOSE, at their Gallery, 5, PALL-MALL EAST, on SATURDAY NEXT, July 31st. Admittance, One Shilling. Catalogue, 6 pence.

GEORGE FRIPP, Sec.

GALLERY of ILLUSTRATION, 14, REGENT-STREET.—The Grand Moving Diorama, illustrating the WELLINGTON CAMPAIGNS in INDIA, PORTUGAL, and SPAIN, concluding with the BATTLE of WATERLOO, is now exhibiting Daily; Afternoons at Three, evenings at Eight o'Clock. Admission, 1s, Stalls, 2s 6d; reserved seats, 3s. Doors open half an hour before each representation.

BARTLETT'S DIORAMA of JERUSALEM and the HOLY LAND, daily at Twelve, Three, and Eight. Admission, 1s, 2s, and 3s 6d. A distinctive character was given to this Diorama at its opening, April, 1851, by introducing Sacred Vocal Music, including "Kyrie Eleison," "Gloria in Excelsis," "Jews' Hymn of Waiting," &c., which has added so much to its celebrity.—It is needful for intending visitors to mark the address, ST GEORGE'S GALLERY, Hyde-park-corner.

HINDOSTAN.—This GRAND MOVING DIORAMA is NOW OPEN DAILY, at 12, 3, and 8 o'clock, at the ASIATIC GALLERY, Baker-street Bazaar, Portman-square. Admission, 1s, 2s, and 3s 6d. Painted by Mr F Phillips, Mr Hughes, and Mr Knell, from Lieutenant-Colonel Lenard's own and other original drawings. The Museum is open half an hour before each exhibition. "The spectator is made to ascend from the flat region of Oude to the glorious ranges of the Himalayas, and everything of interest in the way is mapped and pictured with the fidelity of a geographer and the skill of an artist."—Athenæum.

ROYAL POLYTECHNIC INSTITUTION.—LECTURES—By J H PEPPER, Esq, on Testing Gold, and on the Australian Gold Districts, and also on the Adulteration of Bitter Ale. By Dr Bachhoffner, on the Patent Pyrotechnic Gas Fire, and on Experimental Philosophy. By Mr Crispe, on Morrall's Patent Needles. By George Buckland, Esq, on Music, Classical and Popular, assisted by Madame Brogazzi, and Miss Blanche Younge, R A of Music. Dissolving Views, Microscope, &c., Admission: to Schools and Children under ten years of age, half-price.

A Single Copy of any Number a month after the date of publication is charged *One Shilling*; and may be sent free, by Post, to all parts of the United Kingdom.

Office, 198, Strand, June 25, 1852.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 24, 1852.

THE county elections are now nearly completed, and Lord Derby and Lord John Russell may severally estimate the gains and losses of the parties which they represent. Mr. Disraeli is of opinion that he will have "an absolute majority;" though the grounds upon which he forms it are not very obvious. That the Administration has strengthened itself by a few votes is indisputable; but that it has acquired a real majority is impossible to concede, except upon the supposition that the large class of members who style themselves Liberal Conservatives, and who only differ from the Whigs in never having yielded allegiance to recognised Whig leaders will throw the whole weight of their influence in favour of the Administration. But we should think that the Premier and Mr. Disraeli would scarcely be sanguine enough to form such a supposition as this. The broken but yet powerful ranks of the friends and followers of the late Sir Robert Peel are sufficiently numerous in Parliament, although the election has made sad havoc in their ranks, to hold the scale between the Whigs and Liberals on the one side, and the pure Ministerialists on the other. *With* them the Premier might occasionally reckon upon finding himself in a majority; *without* them it is all but certain that his Ministry will exist in the new upon the same terms as it did in the old Parliament, upon sufferance alone. There is no room for supposition upon which a lengthened period of existence may be anticipated for it. If Mr. Disraeli should so far exceed popular expectation as to produce a Budget which should satisfy all parties in the House, and be as acceptable to the graziers and corn-growers of Essex and Lincolnshire, as to the manufacturers of Yorkshire and Manchester, to Liverpool as to London, to the producers as to the consumers of food, there is no saying how long his power might continue. The Minister promises the country some such happy consummation, but the promises is, at best, as vague, as its fulfilment would be incredible. The temper of the country is, however, such that the Ministry will be allowed a fair trial; and we may be certain that no attempt will be made to eject them from office until they have had an opportunity of explaining their policy, and introducing a measure or measures founded upon it.

THE fine weather has set all the travelling classes in motion, except the ambitious in search of seats in Parliament, and the attorneys and agents severally interested in their success or discomfiture. The watering-places at home and abroad are crowded; Switzerland, the Rhine, Belgium, and France are again swarming with the rubicund faces of the travelling English. Baden-Baden, Homburgh, Kissingen, Schlangenbad, and all the Brunnens, are looking up. The echoes of Mont Blanc repeat not only the noise of falling avalanches, but the sound of the vernacular Saxon, or of the bad French of the English abroad. Continental innkeepers are feasting their imaginations on the clink of British gold, and wishing that the elections were fairly over, in order that a new crop of tourists might be emancipated from the hustings, and let loose to admire scenery and spend money. The French easy classes, if any such exist, have quitted the unsufferable heats of Paris, for the shades or waters of Fau, Vichy, or Eaux Bonnes. The Germans and the Russians are also on the move to the Brunnens and the gaming-tables; while the Americans, who are becoming more inveterate tourists than the English, are darting through Europe, from right to left—beginning with Liverpool, and ending with St. Petersburgh or Constantinople, or perhaps with Gibraltar and Lisbon, and leaving many autographs and much cash behind them. Kings and Queens, Emperors and Empresses, Presidents and Vice-Presidents are smitten with the same *furore*. The boundaries of their own countries no longer serve them for their relaxation and pleasures. They desire a change like other people; and if, like other people, they can combine business with pleasure, they are surely in the right, in these days of rapid locomotion, to see as much as they can, and to amuse themselves as much as is consistent with their health, their gravity, and their interest. The Emperor of Russia is in Germany upon a double mission of this kind; the Empress is at

Schlangenbad; the King of the Belgians has been bathing and drinking the waters at Wiesbaden; the French President has extended his triumphal tour from Strasburg—the scene of one of his early exploits—to the tempting territory of Baden, which may one day be the scene of another; and already meditates a flight across the Mediterranean to the land of Abd-el-Kader and Bou-Maza. Whether it is merely to inhale the tropic air, and gain new experiences of travel, or whether it be to try his "'prentice hand" in a real battle with the enemies of France, and thus acquire a zest and flavour in the estimation of his attached army, remains to be seen. And last, but by no means least, our own Gracious Sovereign, in a manner that becomes the Lady of the Isles and the Queen of the Ocean, has set out on a gallant cruise among the ports and harbours of the west, arousing the affectionate loyalty of her devoted people wherever she goes, and gaining, as every Englishman and Englishwoman devoutly hopes, health, comfort, and satisfaction from her trip. The mighty power of steam is converting all classes, from the highest to the lowest, into travellers; and among the most striking proofs of the increase of the locomotive frenzy, that afforded by the change in the habits of the French people is not the least remarkable. As a people, the French have less love of travelling than almost any other that can be named, unless it be the Japanese; but holiday trips to the sea coast have lately been organised among them with considerable and increasing success. One of the greatest, if not the greatest of modern French poets is said to have never beheld the sea; and the same want of curiosity, or of energy, is not uncommon among the educated classes in France. But the railway is changing all that, and Frenchmen are learning to travel as well as their neighbours. All this is of good augury for the future, and will produce results, as yet unexpected or unimagined, which can scarcely fail to be of advantage to the development of European civilisation. If great Kings, Queens, and potentates had travelled as much a century ago as they do now, the state of the world might have been very different, and many wars and revolutions might never have taken place; and if the mass of the people had had similar facilities for making acquaintance with foreign nations as with their own, the world would have been none the poorer, while it might have been very much the wiser and happier.

METROPOLITAN NEWS.

STOKEBLACKS' SOCIETY.—Last year, a few weeks previous to the opening of the Great Exhibition, at the suggestion of the committee of the Ragged School Union, a considerable number of boys were selected for their good behaviour from the various ragged schools, were clothed with a uniform dress, provided with brushes, blacking, and a stand or footstep, and placed in the most frequented thoroughfares in the metropolis, to clean the boots and shoes of such passengers as chose to employ them. The report just made proves that the scheme was highly satisfactory. The financial sheet of this little society for the past year is curious and gratifying. Out of £650 earned for cleaning 156,000 pairs of boots and shoes, the sum of £360 was paid directly to the boys, £140 was expended in working expenses, while the balance, no less a sum than £150, was deposited in the Savings Bank by those boys who had been the most industrious and saving; 36 boys are still employed in this manner, and although their earnings are not now so much as during the Great Exhibition, yet they average 7s. per week each. The success which attended the London experiment has induced the committees of the Ragged Schools at Brighton, Liverpool and Dublin to follow the example, and a great number of boys are now thus honestly earning their living.

BRITISH ORPHAN ASYLUM, CLAPHAM RISE.—On Monday an election of seventeen children into this institution took place at the London Tavern, Bishopsgate. The report which was presented to the meeting stated that, during the past year, sixteen children had been elected by the subscribers and three admitted by right of election. The average number of the children in the asylum during the year was one hundred. The report of the examiner to the schools, the Rev. James Hill, expressed in the strongest terms the marked improvement in the school both of the boys and girls. The receipts during the year amounted to £2835 13s 4d, and the disbursements to £2482 16s 8d, leaving a balance of £352 2s 8d.

CHARING-CROSS HOSPITAL.—The annual general meeting of the governors of this charity was held on Tuesday afternoon, in the board-room of the hospital; the chair being taken by a governor, in the absence of Lord R. Grosvenor. The report, which was read and agreed to, stated that during the year there were 17,990 pat ents admitted. The number of accidents admitted was 2238. Of the total number of patients, 16,468 had been cured or relieved, 87 had died, and 240 were under treatment. The funds received during the year amounted to £3554 13s. 2½d., including a former balance of £318 8s. 2½d, and the expenditure had amounted to £3499 11s. 2½d., leaving a considerable balance. The committee were very anxious to complete the upper portion of the building, which still remains unfinished, and for that purpose had opened a separate building fund, the total amount of which was at present £1781.

ST. KATHARINE'S DOCK COMPANY.—At the meeting of this company, held on Tuesday, the dividend declared was at the rate of £3 per cent. on the stock for the half year ending the 30th of June. The net earnings of the company for the six months were stated at £45,231. The present price of this stock is 87½, as stated in the Stock Exchange official list. It was also resolved to authorise the directors to carry into effect the alterations and extensions proposed in the report, and to raise the sums necessary for those purposes, not exceeding £7,000, either on debentures or mortgage.

METROPOLITAN COMMISSION OF SEWERS.—On Wednesday a special Court of Sewers took place at the Sessions-house, Newington-causeway, Mr. D. Jacb president. The financial statement showed a balance in hand, on the 17th ult., of £7824 9s. 10d., and a present available balance of £5695 1s. 8d.; but payments were ordered to the amount of £6631. It appeared from the report of collectors that the sum collected during the month was £9784 19s. 6d., and that there remained at present uncollected £37,739 17s. On the motion of Major DARACO, seconded by Captain Veitch, it was resolved, "That application be made to the directors of the Union Bank of London for an extension of the time appointed for the repayment of the £10,000 loan until the 24th December next. New works were ordered in the Randegh district to the amount of £52 10s.; in the Westminster district of £360; in the Holborn division of £243; and in the Surrey and Kent district of £30. A great number of reports, applications, memoria ls, and communications underwent a careful consideration, and occupied the court some hours.

LONDON PHILANTHROPIC SOCIETY.—The annual festival in aid o f the funds of this society was held at the London Tavern on Tuesday, Lord STANLEY, M.P., in the chair. The noble Lord, in proposing the toast of the evening, said that, in a book lately published, entitled the "Charities of London," he found that their annual permanent income arising from property amounted to not less than £700,000 a year, and that this income arising from subscriptions and casual donations was a million more. Of this sum a quarter of a million was devoted to the relief of the aged and the infirm; the institutions for giving medical assistance took another quarter of a million; upwards of a million was spent for education and religious purposes, while the sum devoted to relieve general destitution did not exceed £74 000 a year. In the report it was stated that during the year upwards of 10 000 tickets for bread and coals have been issued. In the course of the evening, subscriptions to the amount of £200 were announced, including one of £25 from the noble chairman.

WEST-END NIGHTLY REFUGE.—On Thursday a meeting of the friends of this institution (which is situated in Market-street, Edgware-road), was held at the Hanover-square Rooms—Lord Dudley Stuart, M.P., in the chair—to receive the report of a committee as to its management. The committee reported that the accounts were unsatisfactory, that the manager had repudiated their authority, and that a public charity had been allowed to degenerate into a private speculation. Under these circumstances the report was adopted; and it was resolved to reform the society on the model of the Leicester-square Soup Kitchen.

FIRES.—On Tuesday night an alarming fire broke out on the premises of Mr. F. Hammond, bookbinder, &c., No. 3, Great Dyer-street, Edgware-road, which destroyed a considerable amount of property. It was insured. —On Wednesday evening another fire broke out on the premises belonging to Messrs Southgate and Barrett, tile literary auctioneers, &c., No. 23, Fleet-street. The damage done was confined to the gutting of the attics and slight injury to the ceilings under by water. The building was insured.

METROPOLITAN BIRTHS AND DEATHS.—Last week the births of 781 boys and 687 girls, in all 1468 children, were registered in the week. The average number in seven corresponding weeks of 1846-51, was 1267. The deaths were Males, 481; females, 449: total, 921 - showing a slight declension of mortality from the previous week. The deaths from tubercular diseases have fallen from 221 to 193; from diseases of the heart, &c., from 49 to 43; from the respiratory organs from 123 to 98; from diseases of the digestive organs from 74 to 47. Diarrhœa and fever have, however, become more active. Scarlatina has declined Small-pox carried off last week 21 children and 4 adults. Four deaths were registered as caused by cholera. They occurred in the neighbourhood of Hackney and Clerkenwell.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean height of the barometer in the week was 29.852 in. The mean temperature of the week was 57.3 deg., which is less by 3.6 deg than that of the previous week, and higher by 3.1 deg. than the average of the same week in ten years. The mean daily temperature was 63.4 deg. on Sunday, and rose till it reached 72 deg. on Thursday, the highest in the week. The highest temperature of the day was 87.4 deg., or 9.9 deg. above the average, and the highest in the sun was 116 deg. The wind was in the north-east till Thursday, when it changed to south-west.

THE ILLUSTRATED LONDON NEWS.

THE ELECTIONS.

The elections have not yet been concluded. Amongst the members returned since our last publication is Mr. Cobden, for the West Riding of Yorkshire without a contest; and Mr. Bernal Osborne, for the county of Middlesex, after a severe contest, in which the hon. gentleman was opposed by the Marquis of Blandford (Ministerialist). The numbers at the close of the poll on Wednesday were—

Lord Robert Grosvenor	5197
Mr. Bernal Osborne	4377
The Marquis of Blandford	4226

Mr. Macaulay has addressed the following letter to the electors of Edinburgh, in acknowledgment of the honour they have conferred upon him:—

London, July 14, 1852.

GENTLEMEN.—At a late hour yesterday evening I learnt that I was once more your representative. I am truly sorry that it was impossible for me to appear before you to-day in the High-street, and to give utterance to some part of the feelings with which I accept from you a trust, honourable itself and made doubly honourable by the peculiar manner in which it has been offered to me. On as early a day as my health will permit, I shall have an opportunity of explaining to you the general view which I take of public affairs. But on this day, the day on which my old connexion with you is, after an interruption of five years, to be solemnly renewed, I will avoid every subject which can excite discussion, and will only assure you that I am proud of your confidence, that I am grateful for your kindness, and that the peace, the prosperity, and the renown of your noble city will ever be to me objects of affectionate solicitude. I have the honour to be, gentlemen, your faithful servant,

T. B. MACAULAY.

In Ayrshire (Scotland), Mr. Cardwell, who lost his election in Liverpool, having consented to be put in nomination, in opposition to Colonel Sir D. H. Blair (Ministerialist), was accordingly proposed at the nomination on Saturday, in the town of Ayr, by Mr. Alexander Oswald, the late member for the county. Mr. Oswald, in an able speech, dwelt upon the great claims of Mr. Cardwell, as an advocate of civil and religious liberty and of Free Trade, and, amidst the enthusiasm of the meeting, recommended his hon. friend to the choice of the electors. The show of hands was declared to be in favour of Mr. Cardwell, and a poll was accordingly demanded for Colonel Blair. The result of the polling, however, was not equally favourable to Mr Cardwell; for though on the first day he polled 923 votes to Colonel Blair's 1086, he lost the election; on the second day's poll, Col. Blair having been returned.

The following is a list of the members returned within the past week:—

	Liberals.	Ministerialists.
ANGLESEY	Sir R Bulkeley	
ARGYLESHIRE ..		Sir A I Campbell
ARMAGH (County)	Colonel Caulfield	Sir W Verner

POSTSCRIPT.

HER MAJESTY'S CRUISE.

On Thursday morning, at six o'clock, the Royal squadron left Plymouth Sound, steering eastward. At the time of leaving it rained slightly, which, however, shortly ceased, and the weather soon became beautiful. The squadron sailed direct for Cowes, the Royal party reaching Osborne the same evening at sunset. The armed escort arrived at Spithead at eight o'clock on yesterday (Friday) morning.

ROYAL VICTORIA YACHT CLUB.

On Thursday morning, the contest for Her Majesty's Cup of 100 guineas attracted to the pier at Ryde a crowded and fashionable attendance. Amongst the latest arrivals were her Royal Highness Princess Mary of Cambridge (to join her Royal mother), Lord de B'aquiere, Baron Knesebeck, Lady Webster, Captain Chester, &c. The display of yachts off the pier had a very animated appearance, as nearly the whole fleet from Cowes had changed quarters and had come down to witness the start, and accompany the contending yachts round the course. The main object of interest was the celebrated *America*, of which all kinds of rumours were afloat. Some little disappointment was experienced that the *Alarm*, hitherto the fastest vessel on this station, and which had recently been altered to the *America*'s form and rig, was not to start for the prize; but the race was confined to vessels of the Royal Victoria Yacht Club, of which, we believe, Joseph Weld, Esq., the owner of the *Alarm*, is not a member.

At half-past ten o'clock, the various yachts took their stations off the pier. The following yachts started:—*Mosquito*, 50 tons; *America*, 180 tons; *Arrow*, 102 tons; *Zephyretta*, 180 tons.

At thirty-five minutes past ten the starting gun was fired, the signal being made that the yachts should proceed to the eastward, the course being round the Isle of Wight. There was a good stiff breeze blowing at the time, and the day was peculiarly favourable for testing the powers of the yachts capable of standing under a heavy press of sail. The *Mosquito* was the first to get under way, and soon showed her bowsprit ahead of the *Arrow*, who followed closely in her wake. The *America* was somewhat tardy in getting her gaff topsail set, which gave the cutters a decided advantage in the start; but that was of trifling account when compared with the extent of the course. The *Zephyretta* was the last to get away, and was almost twice her length astern of the *America*; but at 11.2, when abreast of the Warren sand, the *Zephyretta* had considerably overhauled the *America*—the *Mosquito* still leading, the *Arrow* being about half a mile astern of her, and about a quarter of a mile between her and the *America*. In this order they passed the Nornan buoy, beating up against the tide.

At Shanklin the *America* got rid of the *Zephyretta*, and at Black Gang had weathered the *Arrow*, which she shortly afterwards passed; the *Mosquito* still keeping her position in most gallant style, and was first round the Needles, the *America* about two minutes after her, and the same time between her and the *Arrow*.

Having now a fair and lighter wind, the two cutters quickly mounted their large gaff topsails and balloon jibs, and the *America* becoming out, they all stood over towards the other shore. Off Yarmouth the *America* passed the *Mosquito*, and became the leading vessel, and shortly afterwards the *Arrow* came up with and passed her, but the little vessel soon regained her position, and off Cowes the two cutters were stem and stern, the *America* leading by about two lengths. They succeeded in passing her off Osborne, and, still keeping the same position with respect to each other, they gradually dropped the schooner, and arrived off the Commodore's vessel so close together, that it seemed a dead heat between them. The first and second guns were fired for the *Arrow* first, and the *Mosquito* second, a few minutes' future event—and the third for the *America*, about two minutes and a half after the *Mosquito*. A more beautiful and exciting race could not have been witnessed.

SIEGE OPERATIONS AT CHATHAM.—His Royal Highness the Duke of Cambridge visited Chatham on Friday (yesterday), when several interesting siege operations took place in his presence, under the direction of Colonel Harry D. Jones, commanding Royal Engineers at Brompton barracks.

LATEST FOREIGN NEWS.

FRANCE.

From PARIS our accounts of yesterday (Friday) communicate the melancholy intelligence of the accidental death of Marshal Excelmans. He was thrown from his horse while riding across the bridge of Sèvres on Wednesday evening, for the purpose of dining with the Princess Mathilde at St. Cloud. He died a few hours afterwards from the effects of the injuries received. The veteran Marshal had nearly reached 80 years of age.

With reference to the movements of the Prince President, we learn, by telegraphic despatch from Strasburg, that he slept at Baden on Tuesday, and at mid-day on Wednesday appeared on the balcony of the Palace, where he was greeted by the crowd below with the loudest acclamations. He intended to leave on the following morning (Thursday), on his return to Strasburg, where he was to breakfast, and then to resume his journey back to Paris.

THE WEATHER.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

SIR,—The weather, since I wrote to you a fortnight since, relative to the then great and sudden increase of temperature, has continued warm up to the present time; the temperature of each day having exceeded the average of the season (which may be taken at 65°). From July 9, the successive daily excesses have been as follows:—9°, 8.5°, 1.5°, 2.4°, 4.6°, 5.4°, 9.8°, 7.7°, 4.6°, 0.5° 3.1°, 2.8°, and 0.5°. The average daily temperature, from July 3 to July 21, was 68½°; being higher in value for a greater length of time than any period since the first half of July, in the year 1836. Between July 9 and 21, the temperature of the air has ranged between 53° and 89°; the average of the highest by day has been 81°, and of the lowest by night has been 57°.—I am, &c.,

13, Dartmouth-terrace, Lewisham. JAMES GLAISHER.

THE RECENT COLLISION AND SINKING OF THE DUCHESS OF KENT STEAMER.—An inquest was held on Wednesday, at Gravesend, on the body of Mr. John Sard, a gentleman who, on his return to London from a tour through Egypt, arrived at Ramsgate from Ostend, and became a passenger on board the *Duchess of Kent* steamer, was on board that steam vessel at the time of her collision with the *Ravensbourne*, Antwerp steamer, off Northfleet. The body was discovered floating in the Thames, on the 8th inst., by James Weston, a lighterman, who took it ashore, and gave it into the custody of Mr. Godfrey, an undertaker. A gold watch and guard, a gold ring, 22s. in silver, several foreign pieces, 9d. in copper, and some gold studs, were found on the body. Mr. Sard, it appeared, was known to the proprietors of the Ramsgate Hotel, one of whom, in a letter, which was put in evidence, said:—"The only difference was observed of Mr Sard's usual appearance was that he had a beard nearly a foot long. He told us he had been travelling in Egypt for some months, and that he had contracted a fondness from sleeping in a boat on the Nile with the window open. A neighbour of ours here was aboard the *Duchess of Kent* steamer, and happened to be in conversation with Mr. Sard; he says at dinner he took off a belt and placed it on the table, saying it was all he possessed in the world. It is reported he was seen rushing down to the cabin after the vessel came in contact." The belt is missing. The evidence chiefly related to the identification of the body, which was at last satisfactorily established, the proceedings were adjourned for a fortnight.

SURREY GARDENS.—The fourth flower-show of the South London Horticultural Society was held on Wednesday, at the Surrey Gardens, and the specimens exhibited had the usual excellency which might be expected from the fine weather, and the advanced period of the season. The picotees and carnations were much admired, and the show altogether was of first quality. There was a numerous and fashionable company, and the amusements, including the evening performances of Madame Sainthill, and the fireworks, were off with their usual éclat. A great number of prizes were distributed.

The Duchess of Bedford and Lady Rachel Russell are expected to leave town next week, for their seat, the DOUNE, N.B.

THE KILKENNY ELECTION.—CANVASSING FOR VOTES.

THE ELECTIONS OF 1852.

THE SUCCESSFUL CANDIDATE.

THE hour has chimed, the poll is closed, and the battle is lost and won. All is over, though, from the front of the hustings a furious attorney is denouncing the officials for shutting the books by London instead of by local time, and threatening not only to vitiate the election, but to have the whole of the opposite party in Newgate the first day Parliament meets; and though, also, one stalwart and red-faced elector insists on fighting his way through the jeering crowd, that he may "tender" his vote, which he swears shall be recorded for "the Colonel." The patriot has dined, and laughs to scorn the dissuasive argument of friends, who assure him "the Colonel's all right." He fights on, but is finally suppressed, his hard heavy hat being beaten down over his eyes, and before he can extricate himself, his friend the Colonel is thundering out his grateful thanks.

But the struggle (and a tremendous one it has been) lay between the two other candidates, Sir Lincoln Green and Turmeric Flummey, Esq. Both are new to the constituency. Sir Lincoln is a wealthy Whig, of "gentlemanly politics; Mr. Turmeric Flummery is a successful barrister who has judged it meet, upon the present occasion, to take a brief from the "extreme Liberal" party. He has made brilliant and unscrupulous harangues, which really ought to have convinced anybody but impenetrable bigots; but, somehow, at the close of the poll, the numbers are:—

Colonel Rasper (T)	1337
Sir Lincoln Green (W)	1011
Mr. Turmeric Flummery (R)	976
Majority for Sir Lincoln over Flummery	25

So, one vote is safe for Lord Derby, and goes to swell the "absolute majority" which his Chancellor of the Exchequer believes will be marshalled under Prince Rupert's banner on the day of the battle. The Colonel is an uncompromising man, and has had a series of very explicit flags painted for this contest. They are planted in the outskirts of the crowd. "No Popery," "No Free Trade," "Rasper and the Constitution," "Rasper and the Crown," "Rasper and the Church," "Rasper and the People," "Rasper, and Plenty to Eat and Drink."

Sir Lincoln has had a more difficult game to play. He had to blazon himself moderately, and a pantomimic banner we once saw at Covent Garden would have suited him admirably, "The Sword, but draw it mild." He has been obliged to deal in compromises. He would have liked to write "No Popery" because he speaks at Exeter Hall, and could, in his next address there, have referred to his efforts in support of Protestantism. But a good man's path is full of trials, and much as he would have wished to say "No Popery," there are 246 Catholic electors in the borough, whose votes are essential to him. So he writes up "Civil and Religious Liberty;" but privately explains in his canvass in Protestant houses, that "there can be but one way of regarding Maynooth, and he shall be always ready to give his vote for discouraging the hideous teaching of Dens." But he makes amends on other points, and has "Green and a Big Loaf," "Green and Reform," "Green and Emancipation of the Jews," Green and Free Trade," not forgetting "Green and the People," for everybody is for the people.

THE REJECTED CANDIDATE.

As for Mr. Flummery, the unsuccessful candidate, his flags are models of frankness. "Flummery and the People," of course, is among them; but Podds enters into details—a prosaic mode of conduct which cannot be charged against his adversaries. "No Derby Dilly!" "No Asian or Caucasian Mysteries," "No Cats for Militia Men," "No Class Legislation," "No Tax-eating Tyrants," "Flummey for Ever." And all these sentiments, in the most legible typography, dance round and through the crowd, and each in turn is a centre of battle.

The Successful Candidates having spoken, it becomes the duty of Mr Podds to address the crowd; but what he says it is unnecessary to repeat. Is it not recorded in a thousand newspapers? And is not the staple of all such addresses the same? The honourable candidate having said his say, flings from the hustings in a rage; but the cheers of his audience, delighted at their flagellation, rise loud and high, and follow him to his hotel, from the window of which, while his carriage is preparing, he treats the mob with one more dose of abuse, of extra pungency.

Then a terrible band, with crow-bar and axe, rushes upon the scene, and poll-clerks, committeemen, and agents flee from the doomed hustings. With crashing, and oaths, and fighting, the constitutional machine comes down, and is carried off piecemeal by the brawniest ruffians, to be sold to jobbing and watchful carpenters, the price to be spent in debauchery. Then placard-men—weary, irritated, and half intoxicated—hurl away their standards recklessly, and broken heads and savage combats follow. A ragamuffin procession—instigated, if not headed, by the glaziers of the town—rushes through the streets, smashing windows with impartial recklessness, hurling stones into quiet, orderly drawing-rooms, and terrifying helpless ladies. The agents and committee-men get home as fast as they can, to refresh themselves after the fierce excitement of many days. The members are off, either to their own seats, or those of friends near the town, as the declaration of to-morrow will require their presence. The evening darkens, and there are symptoms of riot. A policeman has been brutally beaten in an alley, by one of the pugilists brought across from Birmingham. There are rumours that the Catholic chapel is to be burned, and a Catholic apothecary's shop to be stormed. The mayor is bewildered, and doubts whether sending for troops at election time is not a breach of Magna Charta. The public houses are lighted from cellar to garret, and are crowded with riotous guests, for whose revel the successful candidates will pay heavily. In some of the houses there is fighting, and it is said that a man has been thrown out of a window. The respectable inhabitants have long since shut up all their shops and places of business, and, having mustered all their household, have drawn bolt and chain. Rascalism of every form has all its own way that night, and the best wish that a philanthropist can venture on that occasion is, that drink may do its work so rapidly as to disqualify the drinkers for further mischief.

So ends too many an election in this part of the United Kingdom of Great Britain and Ireland. Such scenes have, to our minds, few redeeming features; and certainly, within our somewhat extended acquaintance with such matters, the "fun" or "humour" of contested elections is marvellously slight. We have seen insolence and effrontery, and we have heard slang and abuse. Gross abuse is lavished upon the candidates, and we are bound to say we have very lately, too, heard replies every way worthy of the attack which produced them. We hope that, independently of graver considerations, good taste will soon proscribe what is termed "election fun," much as "larks" and other snobberies have been proscribed. Our Artist has done good service to this end in his faithful transcript of scenes which, the better they are understood, the sooner they will be terminated.

THE KILKENNY ELECTION.—PEASANTRY READING THE CANDIDATES' ADDRESSES.

In Ireland, we admit, the natural humour of the country sometimes comes out at election times in an irresistible way. The readiness of repartee common to the lowest peasantry is then illustrated to perfection, and is "quite intirely" another thing from the vulgar impertinence of some of our English mobs. And although much of the grotesqueness of an Irish crowd arises from causes which are no laughing matter, the exceeding enjoyment which these queer, quaint creatures derive from any political demonstration, and their good-humoured promptitude in taking part in it, makes it difficult to look at or speak of an Irish election riot in the way one is compelled to do of a similar muster in England. There is often a real expression of national feeling to be found in the strange dialogues which pass around an Irish hustings, and perhaps remembering how very small a proportion of the Irish population is possessed of the franchise, their non-electors may be listened to, with some consideration, when making themselves heard in that strange mixture of pathos, humour, fancy, and utter nonsense which incessantly ebbs and flows from morning to night around an Irish voting station. But religious bigotry has this year done its fatal work in Ireland as elsewhere, and the elections present but too often a melancholy story of violences and brutalities, for which those have much to answer "who first began this fray." Our Artist has happily caught the lighter features of the scene; but it will be observed that neither in the physiognomies nor in the distances has he forgotten to give significant indication of the coming storm. Some day, let us hope, we shall collect a nation's voices in more seemly fashion.

THE SUCCESSFUL CANDIDATE.—DRAWN BY [illegible]

THE REJECTED CANDIDATE.—DRAWN BY [illegible]

THE LAY OF THE DEFEATED CANDIDATE.

I'M NOT A MEMBER NOW!

BY AN EX-M.P.

I.

THERE was a time when I could feel
An M.P.'s hopes and fears;
When by "the Duke" I swore, and Peel
Had every night my cheers!
Those hours have fled for evermore;
With them each pledge and vow;
I'm verging close on fifty-four:
I'm not a member now!

II.

When Maynooth Grants were small and few,
I saw vast mischief brewing;
When a dozen times as large they grew,
They'd save us all from ruin!
If grief be great because 'tis small,*
'Twere easy, sure, to show,
'Twould greater be if none at all.
I'm not a member now!

III.

Next on Protection bent, a hack
From Lord George Bentinck's stud,
I mounted, but from off his back
He threw me in the mud.
Since then I've boxed the compass round,
Been dragged through many a slough,
And progress-bound have stood my ground.
Though not a member now!

IV.

The *Times* no more in columns dense
Will print my last night's speech,
Nor can my nonsense into sense
(Of privilege a breach!)
Nor can I e'er—delightful task!—
With grave, portentous brow,
My little puzzling questions ask:
I'm not a member now!

V.

All hopes of place I must resign,
(So fate relentless wills!)
No soup screens can now be mine
For pushing "private bills."
My house, with frosted silver deck'd,
Looks splendid, all allow;
Such little perquisites are check'd:
I'm not a member now!

VI.

No "Parliamentary dinners" now
Refresh my inward man;
To Lord Mayors' feasts no more I go;
I dine where'er I can.
The "companies" their hearts have shut,
I mourn each jilter'd brow,
They'd certainly invite me—but
I'm not a member now!

VII.

The "Goldsmiths," whom I hugg'd of yore,
As misers hug their gold,
Their invitations send no more,
As they were wont of old;
At "Merchant Taylors'?" well-spread board
I ne'er again shall bow,
They've "cut me out" with one accord:
I'm not a member now!

VIII.

No Treasury cad again will send
His circulars to me;
Committees I no more attend;
From such vile drudgery free,
My rump-steak and my pint of port
In peace, the Fates allow;
I go to bed betimes: in short,
I'm not a member now!

IX.

No sturdy rogues my rest invade
For places for their sons;
All in a row each morn arrayed—
Most merciless of duns.
I'm spared the thousand lies a day
(I here the truth avow!)
I used to tell those beasts of prey:
I'm not a member now!

X.

"Eternal Catholics and Corn,"
I bid you here farewell!
Justice to Ireland, how I mourn
To part from you as well!
Protection, Railroads, Debtors Small,
Free Trade for Loom and Plough—
"A fair good night to one and all!"
I'm not a member now. W.

* My grief is great because it is so small.—DRYDEN.

MR. MECHI'S FARMING.—On Wednesday, Mr. Mechi drew together his annual agricultural gathering at Tiptree Hall Farm, Essex, for the purpose of submitting to the inspection of his guests his stock, crops, and new system of irrigation. The invitations were issued on a very extensive scale, and upwards of 250 gentlemen from various parts of the country attended. Among the throng we recognised Earl Fortescue, Viscount Ebrington, his Excellency the Honourable Abbott Lawrence, the American Minister; his Excellency Baron Bentinck, the Netherlands Minister; Colonel T. B. Lawrence, the Viscount Ourzay, the Hon. C. L. White, Commissioner from the United States; Sir J. Duke, Bart., M.P., Sir J. P. Wood, Bart, Professors Henslow, Way, and Morton; Mr. Fowler (inventor of the draining plough), Mr. Mark Phillips, Dr. J. Farnell, &c. The attention of the company was first directed to the improvements recently introduced by Mr. Mechi in the irrigation of his farm by liquid manure, conducted over every part of it by iron pipes, which draw their supplies from an immense tank, into which the superfluities of the stock-yard are constantly falling. A hose 200 yards long, composed of gutta percha, is employed to distribute the unsavoury but fertilising shower over the adjoining fields, and the beneficial effect produced thereby on the crops was apparent to the most careless observer. A trial was made of three American reapers—one being M'Cormick's machine, which received the award of the council medal at the Great Exhibition; the other two modifications of Hussey's American reaper, one being of Mr. Crosskill's construction, while the other was manufactured by Messrs. Garrett and Son. Mr. Mechi generously placed a noble piece of green wheat at the disposal of the competitors. All three machines did their work rapidly and well, but the unanimous verdict of the leading agriculturists present was given in favour of Hussey's reaper. The inspection of the crops and stock being concluded, an unusually large and brilliant party sat down to a cold collation, which had been carefully provided by the liberal host.

ROMAN CATHOLIC COLLEGIATE SCHOOL.—The presentation of prizes to such pupils of the Catholic Collegiate School, Bedford-row, as were deemed worthy of the honour, took place on Wednesday night, at the Music Hall, Store street. The principal of the school, Mr. Morris, apologised for Cardinal Wiseman's absence, and the business of the evening was conducted under the auspices of Dr Morris, Bishop of Troy. The preliminary proceedings commenced with a prologue and Latin ode, composed by Mr Morris. These were followed by recitations in Greek, Italian, and German, the second part of "Les Plaideurs" of Racine, and the tragedy of "Cato." The pupils were, of course, the speakers and actors on the occasion, and acquitted themselves with considerable credit.

The Duke and Duchess of Norfolk have left town for Arundel Castle, Sussex.

PRICES FORMERLY AND NOW.—COFFEE.

ALTHOUGH prices, as our readers are aware, are measured by money, money is itself purchased by labour, and by labour all price is ultimately paid. Labour, as every one knows, is continually made more skilful and productive by knowledge; and thus price, by a beautiful contrivance of nature, has, as the rule, a general tendency downwards. To attempt to keep up prices by law is to prevent skill and knowledge from assisting labour, in opposition to the endeavour of all men to produce commodities as easily and as cheaply as they can. The fall in price, consequently, of which so much has of late been said, is in the natural order of things, and those who have suffered from it erroneously and vainly attempted to thwart the progress of society. A different opinion was prevalent. The destruction that ensued from the first French Revolution and the war that followed, interrupting trade and the arts of peace, caused between 1790 and 1814 an almost continual rise of price. From the experience of that period it was asserted that there was a natural, necessary, and universal tendency of price to rise as population increased; and this theory, expounded by Mr. Malthus and Mr. Ricardo, was embraced by the greater number of political economists. The successive and continual fall of price since 1826 has not yet swept it out of our books, and our remarks will shew in detail its erroneousness.

Coffee illustrates the rise of price during the war, and the subsequent fall. For the five years 1782-86 the average price of superior British plantation coffee in bond, or irrespective of the duty, was 65s. per cwt. In 1792 the price of West India coffee rose to 94s., mainly in consequence of the revolution in St. Domingo, which destroyed the cultivation of coffee in that island. From that time (except at the Peace of Amiens, when it fell, for a short period, to 80s.) to 1824 the price was considerably above 100s., and in 1806 reached 177s. From 1824 till 1837—when unwarrantable speculation, ending in bankruptcy, carried up the price of coffee and other things to an extraordinary height, 117s. the price varied between 40s. and 88s., and was, on the average, about 64s. Latterly it has been about 60s., or half the average price of the war; and at the commencement of the year the different sorts of West India varied between 40s. and 76s., as the following table, which gives the prices of the several descriptions of coffee at that period, will show:—

	Prices in Bond.		Prices in Bond.
West India, fine to f. fine ord. low. mid. to fine	44s to 49s 51 „ 75	Padang	36s to 38s
Ceylon, Native	39 „ 40	Costa Rica, good to f. fine ord.	43 „ 46
Plantation, f. ord. to low mid.	45 „ 51	La Guayra, Porto Rico, &c. do	40 „ 46
Mocha, fair clean garbled ..	68 „ 72	Brazil, ordinary	36 „ 38
Java, good ordinary ..	39 „ 41	washed	40 „ 45
		St. Domingo	40 „ 41

We have little information of the price of coffee prior to 1782. It was first introduced into England about 1630, but was scarcely known to the public before 1652, when Mr. Edwards, a Turkey merchant, encouraged his servant to establish a coffee-shop in St. Michael's-alley, Cornhill. The first berries produced in Jamaica, in 1728, sold for a *bit*, about 6d. each; but this was a fancy price, and is no measure of the usual price at a period when it had come into frequent use. Sonini speaks, towards the end of last century, of the price of coffee being 10d. per lb. at Kous, in Upper Egypt, and 5s. per lb. at Paris, where the price is now for Mocha not more than half that sum. The price of other coffees now most in use is not above one-third of the price of Jamaica coffee during the war, and one-half may be stated as about the average reduction in the price of coffee since then. At the same time it must be remarked that the comparatively high price of sugar till a late period, and the bounty given on its production by different Rajahs, have tended to retard the equal cultivation of coffee, and its price has not fallen so much as the price of those commodities that are the production of competitive and skilled labour.

The consumption of coffee has increased so rapidly that supply has scarcely kept ahead of it; and the duties on it being heavy, persons have used chicory or roasted grain instead of the genuine berry. In 1789 the quantity consumed in Great Britain was 980,141 lb. In 1838 it had increased to 16,592,423 lb. Last year the consumption, including Ireland, was 32,564,164 lb. Greatly, however, as the consumption has been increased, it has been retarded from the first by onerous duties. Soon after it was introduced, an excise duty of 4s. per gallon was levied on it; and this was afterwards changed to a duty of 8s. per lb. In 1732 the duty was lowered to 1s. 6d. As the taste increased, smuggling took place to an enormous extent; the revenue obtained from coffee declined to almost nothing, and in 1784 the duty was reduced to 6d., the Government obtaining more than thirteen times as much revenue from the 6d. duty as it had obtained from the 1s. 6d. duty. Again, the necessities of war compelled the Government to increase the duty till it reached, in 1807, 1s. 8d. per lb., and then the consumption was 1,170,164 lb. In 1808 the duty was raised to 7d., and the following year the consumption of duty-paid coffee increased to upwards of 2,000,000 lb. Subsequently the duty was again increased, and again lowered, every change in the duty affecting the quantity consumed. At present the duty is 2d., and the annual consumption upwards of 32,000,000 lb., with the probability of a rapid increase.

With the exception of Mocha, West India coffee bears the highest price. It is now comparatively little cultivated, and being in demand stands high in the market. Prior to this century our supply of coffee was chiefly obtained from our West India, now it is obtained from our East India possessions. In 1822 we received 7,300,000 lb. of coffee from the West Indies, or seven-eighths of the whole; in 1830, 27,000,000 lb.; last year not 5,000,000 lb. Of the whole 32,000,000 lb., 28,000,000 lb. comes from Ceylon and the British territories in India. Coffee is grown in many places, while tea is grown chiefly or only in one, and out of England is much more generally in use than tea. Considerable quantities are used in all the countries where grown, and the whole produce is stated at 476,000,000 lb., grown as follows:—

	lbs.		lbs.
Brazil	176,000,000	French and Dutch West Indies	2,000,000
Java	124,000,000	Malabar and Mysore ..	5,000,000
The Philippines ..	3,000,000	St. Domingo	35,000,000
Arabia	3,000,000	Ceylon	40,000,000
Celebes	1,000,000	Costa Rica	9,000,000
Cuba and Porto Rico ..	20,000,000	Sumatra	5,000,000
Leguayra and Porto Cabello	35,000,000		
British West Indies ..	8,000,000		

This quantity, at 40s. per cwt., would be worth £8,500,000; and to distribute it employs somewhere about 200,000 tons of shipping. Such is the immense amount of wealth invested, employments supplied, and remarkable enjoyment provided by introducing into the Western world the Asiatic practice of drinking coffee. That and the introduction of the practice of tea-drinking have done much to promote civilisation; and it is remarkable, that, with all extant religions, they both originated in Asia.

THE STOCKPORT RIOTS.—The adjourned inquest on the body of Michael Moran, who was killed in the affray that took place at Stockport, was held on Tuesday at the Court-house in that town. The evidence adduced went to prove that the unfortunate man was struggling on the ground at the top of Rock-row with an Englishman, when an Irishman went up and gave him a blow with a shepherd's crook, apparently intended, however, for the Englishman's head. Before he could get up, and while in the act of rising, an Irishman, named Michael Mulligan, ran up with a poker in his hand, and struck him the blow on the side of the head which the surgeon said was the cause of death. One witness supposing that this blow, too, was aimed at the Englishman, but merely carrying it, as he thought, to the fire, to light his pipe. Mulligan is in custody, and was present at the inquest. It appears that he did not run away when he had done the mischief, but remained near the unfortunate man, with the fatal weapon in his hand and with several stones in his pockets. The jury returned a verdict of "Wilful murder" against Mulligan, who is only 18 years of age. The prisoner was then upon committed for trial at the Chester Assizes.

THE LATE LOSS OF LIFE AT BLACKFRIARS BRIDGE.—The inquest upon the three persons drowned by the upsetting of a pleasure-boat, at Blackfriars-bridge, by the *Dahlia* steamer, was concluded on Tuesday, when the jury returned a verdict of "Accidental death," and at the same time the jury were unanimously of opinion that a sufficient look-out was not kept on board the steamer, and recommended that in future arrangements be made by the steamboat company that will secure the public from accidents as far as possible, during the present crowded state of the river."

There are fifty-seven masters and assistant-masters employed in the schools of design in the United Kingdom. Of these, 16 are engaged in the metropolitan, and 41 in the provincial schools. The salaries paid vary from £400 (paid to the head master at the Glasgow school) to £25, but in many instances a portion of the fees are receivable by the masters and assistants. The number of hours engaged per week vary from 5 to 36.

In the late storm upwards of 10 feet of the steeple of the Church at Leighton Buzzard was struck down; some portions were forced through the roof of the church, which is closed for the present.

CHURCH, UNIVERSITIES, &c.

APPOINTMENTS AND PREFERMENTS.—The following appointments and preferments have recently taken place:—*Minor Canonry:* The Rev. T. Hirst to one in Canterbury. *Rectory:* The Rev. W. J. Jenkins to Fillingham, near Lincoln. *Vicarages:* The Rev. A. T. Attwood to Leaks, in the peculiar of Northallerton; the Rev. A. P. Burrell to Ovring, near Chichester; the Rev. K. C. Bally to Harwell, Berks; the Rev. W. Johnson to Llanbadrig, Anglesey; the Rev. J. Jones to Brynllyo, Brecknockshire; the Rev. G. Stone, M.A., to West Bradenham, Norwich.

TESTIMONIALS.—The following clergyman have recently received testimonials of esteem and affection:—The Rev. A. R. Harrison, curate of St. George's Church, Leicester, from the members of the congregation; the Rev Isaac Bowman, incumbent of St. Cuthbert's, Holme Cultram, from his parishioners and a few friends; Rev. G. Davenport, Birmingham, from the ladies of St. Jude's congregation; the Rev. E. Edwards, from a large number of friends; the Rev. J. F. Serjeant, St George's, Douglas, Isle of Man, from his congregation.

NEW CHURCH AT BLACKHEATH.—The foundation stone of this building was laid a few days ago, by J. Angerstein, Esq., at whose sole expense the building is to be erected. The ceremony was performed in the most private manner, and but few persons were present. The site chosen is in the lane leading from Myrtle-place to Blackheath, and great energies are being used to complete it as early as possible

SOCIETY FOR PROMOTING CHRISTIAN KNOWLEDGE.—At the July meeting of the Society for Promoting Christian Knowledge—the Lord Bishop of St. Asaph in the chair the sum of £2000 was voted towards a third See in the present diocese of Cape Town; and another sum of £2000 towards a collegiate institution in Newfoundland.

INCORPORATED SOCIETY FOR PROMOTING THE ENLARGEMENT, BUILDING, AND REPAIRING OF CHURCHES AND CHAPELS.—This society held its last meeting for the present season at 7, Whitehall, on Monday last; the Earl of Powis in the chair. There were also present the Bishops of Gloucester and Bristol, Salisbury, and Chichester; the Rev. Sir Charles Trumbly, Bart., Rev. H. Howarth, &c. The applications for assistance were again extremely numerous. Grants of money were made in aid of the following objects:—Building new churches at New Wortley, in the parish of Leeds; East Harnham, near Salsbury; Framlode, near Stroud, Gloucestershire; the district of St George, Leicester; St. Mary's district, Wakefield; Christ Church, West Bromwich; Lutton, near Stapeburn, Devon; Rushank, near Frenham, Staffordshire. Upton, in the parish of St. Mary, Chester; Savernake, an extra-parochial district near Marlborough; Somerstone, near Alfreton. Rebuilding churches at Faxton, near York; St Peter the Less, Chichester; and Colnbrook, Bucks. Enlarging, &c., churches at Weston, near Kirkham, Lancashire; Healey Heath; Lacsby, near Great Grimsby; Wrentingham, near Wymondham; Haselor, near Stratford-on-Avon; Turnaston and Avon Turville, near Chippenham; Selby, Yorkshire; St. Thomas, Scarborough; Acton Round, near Bridgenorth; Fyfield, near Chipping Ongar; Willanhall, near Walsall; Harpsden, near Henley-on-Thames; Langenneck, near Llandaff; Ferdwich, near Canterbury; and Debden, near Saffron Walden. The total amount of grants made by the society during the session just closed is £17,841, being £2629 more than the grants of the previous session, and indicating that the demand for aid is increasing. Nearly £10,000 was voted at the three last meetings.

FURTHER MONITION OF MR. GLADSTONE.—Mr. Gladstone, who has accepted the pastorate of a Free Episcopal Chapel, at St. Mary's, Torquay, was to have preached there on Sunday last. This, however, was prevented by a further ecclesiastical document from the Dean of Arches, arising out of and admonishing him to obey the decision of that court. In consequence of this, Mr. Gladstone's plans are, for the present, frustrated. He did not preach on Sunday last, as advertised, nor will he do so until he has taken further legal advice. The monition embraces the whole of "the province of Canterbury;" therefore includes the diocese of Exeter, in which Mr. Gladstone's new church is situate

CATHEDRAL AND COLLEGIATE CHURCHES.—A return just printed has been made by the Ecclesiastical Commissioners for England of the payments made to them in each year since 1840 up to the present time, on account of the suspended stalls in the several cathedrals and collegiate churches of England and Wales. The total amount received was £244,141 17s. 1d.

ARCHBISHOPS AND BISHOPS.—By a return printed on Tuesday, it would seem that the incomes assigned to the Bishops are as follow:—The Archbishop of Canterbury, £15,000; the Archbishop of York, £10,000; the Bishop of Durham, £8000; the Bishop of London and Wells, £5000; the Bishop of Chester, £4500: the Bishop of Chichester, £4200; the Bishop of Lichfield, £4500; the Bishop of Hereford, £4200; the Bishop of Ely, £3800; the Bishop of Llandaff, £4200; the Bishop of Manchester, £4200, the Bishop of Oxford, £5000; the Bishop of Peterborough, £4500; the Bishop of Ripon, £4500; the Bishop of Rochester, £5000; the Bishop of Salisbury, £5000; the Bishop of St. Asaph, £4200, the Bishop of St. David's, £4800; and to the Bishop of Worcester, £5000.

The Lord Bishop of Tuam will consecrate eight new churches this autumn, which have been built for the Protestant converts in the western part of Dr. Lordaby's extensive diocese.

The Rev. Clement Francis Cobb, B.A., curate of St. John's Church, Clapham, has been appointed principal of the new Church of England College, Benares, in the diocese of Calcutta.

The Rev. Johnes Knight, rector of Welwyn, and vicar of Allhallows, Barking, one of the representatives of the family of Johnes, of Hafod, died on 8th inst., at Welwyn Rectory, in his 97th year. He was the most aged clergyman connected with the metropolis, and had held his living longer than any other incumbent, having been instituted to the rectory of Allhallows in 1783, 69 years since, when he was in his 28th year. The vacant rectory is in the gift of the Archbishop of Canterbury, and is worth upwards of a £1000 a year. By Mr. Knight's death, the rectory of Welwyn, Hertfordshire, to which he was presented in 1797, also becomes vacant: it is worth £700 a year, and is in the gift of Al. Souls College, Oxford.

By an act of the late session it is enacted that places of religious worship for Protestant dissenters need not to be certified or registered in a Bishop's registry; such places are to be registered in the General Registration-office for births, deaths, and marriages. A fee of 2s 6d. is to be taken for each certificate of registration, and a list of such places to be open to inspection without charge.

The Congregation of the Index at Rome has condemned the following books:—"Histoire de la Reforme au 16me Siecle, par J. H. Merle d'Aubigny;" "Studii sull' Apocalisse, Scuola Legasia, by Professor Grisanfil;" "De la Papauté, Etudes Historique de Philippe de Boni;" "Dictionnaire Universal d'Histoire et de Geographie, etc., by N. Bouillet;" and the "Gerstio Sacl.ana" (Journal of Sacred Literature).

A few days ago, a young man, a member of a body of dissenters called "Ranters," having gone to Osmotherley feast, became intoxicated. On the following day, being taunted with his drunkenness, and afraid of meeting his brother Ranters, he ran nearly a mile in a state of desperation, and threw himself head-long into a reservoir, and was drowned.

MARRIAGE IN HIGH LIFE.—On Tuesday the marriage of Miss Georgiana Caroline Lascelles, eldest daughter of the late Right Hon. W. S. Lascelles, M.P., and Lady Caroline Lascelles, with Mr. Grenfell, M.P., was solemnised in the parish church of Kensington, in the presence of a numerous and brilliant circle of relatives and friends. The bridal party entered the church soon after eleven, the bride being accompanied by her uncle, the Earl of Harewood, and her mother, the Lady Louisa Lascelles. A service of the bridesmaids followed. The Earl of Harewood gave the bride away, and the ceremony was performed by the Hon. and Rev. F. Grey, uncle to the bride. At the conclusion of the ceremony the party proceeded to Rutehouse, Campden-hill, the seat of Lady Caroline Lascelles, where a sumptuous *déjeuner* was laid out. Messrs. Bentham and Jones, of Kensington, were the caterers. At two o'clock the happy couple left for Charlton, near Maidenhead, the seat of their noble relatives, the Duke and Duchess of Sutherland. Mr. Charles William Grenfell, M.P. for Windsor, the bridegroom, is son to Mr. Pascoe Grenfell, late M.P. for Preston.

THE NEW CLOCK TOWER AT BILLINGSGATE.—For some days past workmen have been busily engaged in fitting the new clock tower at Billingsgate with the works of the clock and bells, and on Tuesday one of the different bells erected in the tower in connexion therewith, and for other purposes. The faces of the clock on each of the four sides of the tower had been previously completed, and the hands, which have been fixed, on Tuesday was set going on Tuesday morning, and kept very good time during the day. It strikes the quarters, and the tones are very sonorous, resembling those of a large cathedral church in quality

UNCLAIMED PROPERTY OF RAILWAY PASSENGERS.—On Wednesday a sale was held by Mr. Goddard, at the City Auction-rooms, Leadenhall-street, of the unclaimed property left from time to time in the Great Western Railway. Amongst the articles disposed of were 436 umbrellas and parasols; 450 pieces of muslin; 171 lace collars; 150 caps; 80 shawls; and every possible article of dress as well as of ornament and utility. There were but 150 volumes of books; but among the numerous variety of articles were a colleague's silk gown, a hamper of wine, musical instruments, a china tea service, a levelling machine, and other articles, some being costly, and others as trifling as the crew's copy of verses.

NATIONAL LAND COMPANY.—The Master in Chancery has directed the official manager to inquire into the claims and titles of the allotments on the O'Connor-ville estate, near Rickmansworth.

LEXDEN-AND-WINTER TERRACE AND BRIDGWATER.—The extension of the electric telegraph has just been completed from Bristol to Bridgwater, a distance of 35 miles, or a total from London of 161 miles. The wires will be at work in a few days, and messages sent to London and vice versâ for 1s. 6d., where they will join the existing telegraph from Exeter to Plymouth, completing the range of telegraphic communication for the west of England, a distance of 246 miles.

Mrs. Chisholm has received numerous remittances (amounting in one week alone to £3000) from the emigrants sent out to Australia by her society, for the purpose of providing passages for their relatives and friends left in this country.

The *Inverness Courier* states that the Ness promises to be more productive this year than it has been for many seasons. As the Friars' shot the net, on Tuesday morning last, captured at one haul thirty five trout, one grilse, and one salmon—the latter fully eighteen pounds weight.

EPITOME OF NEWS.—FOREIGN AND DOMESTIC.

On Sunday last a sermon was preached to a numerous and fashionable congregation in the parish church of West Hackney, by the Rev. W. Charles Williams, M.A., in behalf of the Royal Dispensary for Diseases of the Ear, Dean-street, Soho, which has rendered such numerous and signal benefits to the various classes of the community, as shown by the report which states that 335 patients have been cured during the past year, 192 relieved, and 502 remain in weekly attendance at the institution, under the skilful treatment of the surgeon, William Harvey, Esq. The congregation responded very liberally to the appeal in behalf of the funds of the institution.

In our paper of last week we mentioned that a Mr. St. Albin Quin, cashier to Bright and Co., of Liverpool, had absconded with a large sum of money, and we have received a communication stating that the only firm generally known of that name in Liverpool is Gibbs, Bright, and Co.; and that their cashier, whose name is different from that of the alleged delinquent, still retains their confidence, and is not the party referred to in the paragraph.

The unusual sight of a rowing match on the Seine between light gigs, such as abound on the Thames, attracted a good many spectators on Thursday morning (last week). The race was the event of the day, because it was between French and English gentlemen. The English boat, the *Nil Desperandum*, was built in London; and the French, the *Filleda*, at Neuilly. The course was from the bridge of Suresnes for about four miles and a half towards Asnières. The French won, and were warmly congratulated by the vanquished.

The *Parana*, which brought the West India mail last Saturday, came home several hands short, owing to desertion at the West India ports, where there is a demand for sailors for ships bound for Australia.

By the West India mails received this week, we learn from Barbadoes that Captain Evans, of the schooner *Sally Evans*, had been apprehended there, and committed for trial for the wilful murder of Thomas Walcott, the cook of the vessel, whom he had stabbed, and who expired immediately.

The latest advices from Barbadoes (June 26) mention that intelligence had reached the island of the loss of the barque *Parramatta*, Captain Whitney, of Philadelphia, which vessel was run down on the 21st of May by the *Tennessee*; the captain, a lady, and eight of the crew being drowned.

The French Archæological Congress has terminated its session by a visit to the numerous monuments of the middle ages in the town of Beaune, and particularly the fine picture of Jean of Bruges, representing the Last Judgment, and which formerly hung in the chapel of the hospital of that town. Before separating, the Congress devoted a sum of 3000f. to be divided among fifteen country churches, for making urgent repairs in them.

Lord Strathmore is rehabilitating Glamis Castle, in Forfarshire, the traditionary scene at least of the first Lord Glamis—Macbeth.

The mortal remains of the Duchess of Bedford, daughter of Jean-sans-Peur, which were buried in the Celestins in Paris, in 1432, are about to be removed to one of the towers of St. Bertand de Dijon, by the side of those of her father. M. Thierry, president of the commission, charged by the Commission of the Beaux Arts to make the search for them, has ordered the coffin for the purpose.

The Pacha of Egypt has put on board the Peninsular and Oriental Company's steam-ship *Ripon*, Captain Moresby, several lions and panthers, besides some very curious and rare animals, from the Nubian desert, as a present to the London Zoological Society. The *Ripon* left Malta for Southampton on the 11th July, having a number of Indian passengers on board.

A report is current at Naples that a large Russian fleet might probably visit the ports of the Two Sicilies before autumn.

On Saturday last the Rev. R. Martin, minister of the "Lower Chapel," Heckmondwike, put a period to his existence by cutting the main artery in his left arm. "Unhappy differences in ecclesiastical matters" is ascribed as the cause.

The public opening of the Blackwall and Poplar baths and washhouses, situate in the East India Dock-road, near Poplar Church, took place on Saturday last, in the presence of all the heads of the district. The establishment is a very large one, and his style of architecture renders it quite an ornament to the neighbourhood.

An act of Parliament, which received the Royal assent on the 30th ult., has just been effect in relation to the election of representative Peers for Scotland. By this act (16th and 16th Victoria, chap. 38) Peers of Scotland may take the oaths, &c. in courts of Ireland, or b fore any judge of a county court in England, and before other officers, to enable them to vote by proxy.

The Crystal Palace is now a skeleton in its appearance. Nearly the whole of the transept has been removed. It was feared there would have been a great destruction of the materials by the removal, they being rivetted together, but this has been carefully avoided by cutting the rivets off, a work of much time.

The criminal returns for the year 1851, for Ireland, show a decrease in the committals of 6642, as compared with the previous year, or 21·29 per cent.

There is an act now in force, passed on the 30th of June, by which justices of the peace having jurisdiction in other matters in any city or place may act in cases relating to the relief of the poor.

An ascent of Mont Blanc has just been accomplished by a Mr. J. D. Brown, who performed Mr. Glaisher's feat in company with Mr. Hart and Gondall, of the Engineers. The ascent was considered a very "successful" one.

During the past week no fewer than three cases of defalcation occurred. A youth, aged 17, absconded from Weymouth-street, Commercial-square, with a sum, containing £200 in gold and silver, a £10 bank note, and a £5 ditto. A person in a situation of trust in Leeds, named Andrews, also disappeared with a considerable sum belonging to others; and an Irishman from Dublin came off with £85. All the fugitives, it appears, have been traced to vessels sailing for California.

The famous Roman pavements at Woodchester are about shortly to be uncovered for the purpose of making accurate drawings, and others among in such matters, an opportunity of inspecting these celebrated remains, which have not been seen now for several years

A respectable husbandman, named Fenwick Harrison, of Easington, near Sunderland, who is in his 82d year, has just mown a field of grass, upwards of two tons per acre.

A Welsh paper says that during the last few days the beach in the neighbourhood of Tenby has been covered with cocoa nuts, which have been washed ashore in great numbers.

The *Kilmarnock Journal* estimates the loss that town has suffered by the late fire as at £50,000.

According to an act now in force, the provisions of former acts with respect to sites for schools are extended to schools and colleges for the religious or educational training of the sons of yeomen or tradesmen, or others, or for the theological training of candidates for holy orders of the established church, which are erected or maintained in part by charitable aid.

The *Hamlet* has arrived at Falmouth from Sydney, with gold to the value of £60,000. Her dates are to the 6th April.

Two crack shots, Charles Lobb, of Saddock, and Henry Hill, of Kirkheaton, met late y on the Halifax cricket ground, for the purpose of deciding the championship between them for £10 a side, by shooting at seven birds each, at 35 yards rise and 60 boundary. Such was the interest among the fea hered tribe, that 21 escaped! The only one said to be "killed" was, at the close of the match, found walking away!

A gentleman in Blackburn has in his possession a small piece of printed calico carefully wrapped up in paper, which is evidently not of modern make, on the outside of which there is the following memorandum, which explains the reason why this otherwise insignificant rnice has been preserved with such care:—"The block from which the enclosed cloth was printed was the first ever cut by Robert Peel, now Sir Robert Peel, Bart., when he and his brother Jonathan, now of Accrington House, were apprentices to Thomas Yates, of Moorgate Field, Livesey, near Backburn, with whom they were boarders."

A gunner of the Royal Artillery, and a convict, almost at the same time, were struck to the earth a few days ago by a *coup de soleil*, in the Woolwich Arsenal, where they were employed at their respective duties.

The delivories or tea in London last week were rather larger, being 634 238 lb. The market has been quiet

About two o'clock on Friday (week) afternoon, the herbage on one of the cuttings near the bridge crossing King Henry's Walk, Balls-pond, Islington, on the East and West India Dock Railway, to ok fire. It was supposed, from the intense heat of the sun. After blazing away for some time, it was extinguished without doing any damage to the railway or works, but leaving a large space on the bank comp tely charred by the fire.

On Friday week the Irish Telegraph Company succeeded in laying down from the Irish coast seven miles of the cable out of the 26 miles that will be required for the communication between Donaghadee and Portpatrick. In consequence, however, of a strong cross current setting in, it was deemed advisable to postpone further operations until the spring tides are over.

CHESS.

TO CORRESPONDENTS.

ANOTHER SUFFERER.—We have so repeatedly warned Chess amateurs against the gentry known as the "shilling shares" of the cigar divans, that those who now play with them have only their own folly to blame for the consequences. Take it as a rule, wherever you are accosted in a public room by a person who asks you if you are disposed for a game at Chess, and is a stranger, it is customary to play for "a small stake," that the individual has a design upon your pocket, and act accordingly

C. L. North Carolina. It is under consideration

G H F, Dundee; R B W, Oxford. The games shall be examined and reported on

CANTHUSIANUS. I have must always be at least one square between the two Kings

R S W, Barnstaple.—You are quite wrong. See our solution

SCOTIA.—The Edinburgh Chess Club now numbers upwards of fifty members, and there can be little doubt, by Christmas, the list will be doubled

A G.—In Externa No 764 the white Rooks should stand on King's 8th and Q R's 3d. The easy move is either Book to K's 3d, after that all is easy enough

BOMBAY. Your Solution of No 412 is incorrect. We purposely withhold the key for another week

E M H, Bath.—Received with thanks

SOLUTIONS OF PROBLEM No 441, by Dawson, Honrius Johannes, Stevens, Judy, M P, R W, Phillis, Oselan, F R S, Simple Simon, L S D, C F L, Minor, Brettell of Welshpool, G T, Mungo, Geordie, S P Q R, Amicus.—All are correct

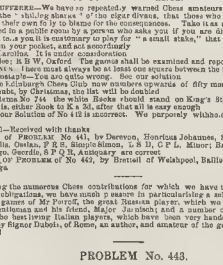
SOLUTION ONE OF PROBLEM OF No 442, by Brettell of Welshpool, Baillo, Scotia, R M Y, B S, G F, Omega

* * * Among the numerous Chess contributions for which we have this week to acknowledge our obligations, we have much pleasure in particularising a selection from the home games played between Mr. Forrest, the great Russian player, while he was on the residence of that gentleman and his friend, Major Jaubach; and a number of fine problems by some of the best living Italian players, which have been very handsomely placed at our disposal by Signor Dubois, of Rome, an author, and amateur of the game, deservedly distinguished

PROBLEM No. 443.

By the Rev. H. STEVENTON.

BLACK.



WHITE.

White to play, and mate in four moves.

CONSULTATION GAME

Highly in tructive game played at Glasgow by Messrs. DONALDSON (Delta) and M'Coombe, consulting together, against Mr. STAUNTON, t o latter giving the odds of the Pawn and two moves

Remove Black's K B's Pawn from the Board.

29. R to K Kt 3d	B to K R 3d	57. R to R sq	Q to K B 8th (ch)

And the game was given up as drawn.

(a) This was not a safe m. v. It not only loses time, but withdraws the Bishop from the attack on the adverse King's side

(b) Black is now compelled to exchange Pawns or double a Pawn disadvantageously

(c) Instead of this move, they should have played the K Kt to Q Kt 3d, threatening afterwards to play the Bishop to his 5th

(d) An important step to prevent White from freeing their pieces by the advance of the Pawns on the Queen's side

(e) Again the allies err sinn

(f) Threatening to gain at least a piece

(g) With the intention, if White played the Rook to K R's 3d, to take the Rook with the Queen, &c

(h) Opinions appear to have been divided on this move, some of the Club advocating the taking of the Queen's Pawn instead

(i) The might have taken the Pawn in safety, but they would then have removed their queen somewhat too far from the points of action

(j) Already White would be in a commanding for a drawn battle

(l) Lost time. The Pawn might have been taken without danger

(m) From the moment, we believe, if Black play the after moves with common care, it is impossible for White to save the game

(n) From the moment the game will amply repay an attentive analysis. The only feasible mode of play they have here, instead of attempting to defend their Pawn are among the adverse K Kt Pawn either with the Rook or Pawn. These moves were both tried in a back-game, and Mr Staunton clearly proved they were unavailing. For example:

First Back-game

WHITE.	BLACK.	WHITE.	BLACK.
36. R takes K Kt P	R takes R	38. K to R 3d	B to K R 4th (ch)
37. P takes R	B takes K Kt P (ch)	39. Kt to K B 4th	(the winning coup R takes Kt

And Black must win

Second Back-game.

WHITE	BLACK.	WHITE.	BLACK.
36. P takes K Kt P	B to K B 6th		

This is the best move for White, as it will then be compelled to make the following

WHITE	BLACK.	WHITE.	BLACK.
37. P takes R	R takes B		

The natural move. If, instead, White play the Rook to K Kt 3d. Black may take the K Pawn with the K Bishop, &c

WHITE	BLACK	WHITE	BLACK
38. R to K Kt 3d (best)	R takes K R P (ch)	40. R to K Kt sq	B takes K P
39. R to K R 3d.	R to K B 7th	And Black wins easily	

(o) If now they had taken the K Kt Pawn with the Rook, the following is the probable

WHITE	BLACK.	WHITE.	BLACK
37. R takes K Kt P	R takes R	41 Q takes K R P (ch)	K to Kt sq
38 P takes R	B takes A Kt P (ch)	42 Q to K B 5th (ch)	R to K B sq
39. K to Kt sq	B to K 6 8th	43. Q takes P (ch)	K to R sq
40. K to K B 4th, the only move	B takes Kt	44. Q to K Kt 6th	P to Q 8th
			And wins

(p) They were obliged to sacrifice a piece, for if R to K Kt 6th, then Black would have played P to K B 8th, &c

(q) Black might now have won in the easiest manner possible, but by the step when he had nothing to do but win in three or four moves, he suffered his opponents to escape. By the way by losing R to K B 8 (ch), the game was drawn. *Ed. Sporting*

WHITE.	BLACK.	WHITE.	BLACK.
44	R to K B 8th (ch)	46 B to K Kt sq	R to K 5 sq
45. K takes R	Q takes R	And the game became a second drawn	

(r) This and the two following moves of the Glasgow players are very ingenious and well conceived

(s) A clever resource

(t) As there appeared some danger and a good deal of difficulty in avoiding the draw, Black took the simple course of inserting it

THE ROYAL AGRICULTURAL SOCIETY'S SHOW AT LEWES

We this week engrave Portraits of a few of the prize cattle, sheep, and poultry; but are prevented, by want of space, from giving the entire list. The following are the prizes engraved:—

CATTLE.

Class 1.—Prize of £40 to Mr. Edward Price, of the Court House, near Pembridge, Hereford, a four years and five months old Hereford bull, bred by himself.

Class 1.—Prize of £40 to Mr. Thomas Crisp, of Hawkhill, near Awwick, Northumberland, for a four years and four months old short-horned bull, bred by himself.

Class 1.—Prize of £40 to Mr. Samuel Farthing, of Stowey Court, near Bridgewater, Somerset, a three years and six months old pure Devon bull, bred by himself.

Class 1.—Second prize of £10 to Mr. William Botting, of Westmeston, near Hurstpierpoint, Sussex, and four years and six months old Sussex bull, bred by himself.

SHEEP

Class 1.—Prize of £30 to Mr. Jonas Webb, of Babraham, near Cambridge, a 17 months old Southdown ram, bred by himself

Class 1.—Prize of £20 to Sir Edward C. Dering, Bart., of Surrenden Dering, near Ashford, Kent, a 3½ months old Romney Marsh ram, bred by himself.

Class 1.—Second prize of £10 to Sir Edward C. Dering, Bart., of Surrenden Dering, near Ashford, Kent, a 4 years and 3 months old Romney Marsh ram, bred by himself.

By the portraits of the Hereford and Short-horned bull, it will be at once seen that, whilst the respective animals possess every good point in a high degree of perfection, they were not unnecessarily obese for a breeding-stock show, and more calculated for the Christmas exhibition of fat beef than for the propagators of future stock. To the classes of pigs and sheep the same remark applies.

In the Downs, the first prize was awarded to an animal highly deserving in every respect.

The Portrait of the Sussex Bu l will give such of our readers as have not seen this breed a correct impression of its general appearance. The principal characteristics of the Sussex, distinguished from the Devon breed, is the smallness and, we might almost add, the precision of its wave.

The Southdown Ram exhibited by Mr. Jonas Webb, which obtained the principal prize, was an animal rarely equalled, if ever excelled; and this, and the ram exhibited by the Earl of Chichester, were greatly admired.

The drawings of the prize animals in the Romney Marsh, or Kentish sheep, will make our northern and western readers acquainted with the characteristics of this peculiar breed, which is confined to the south eastern district of England; and out of which it is never seen, except at the Smithfield Cattle Market. We gave in our last number an account of the most prominent characteristics of this breed.

The show of Poultry was numerous and good, and our portraits represent some of the finest varieties. The eggs of this breed are considered by epicures as superior to those of the turkey or plover; notwithstanding which, we prefer the Poland and Dorking for their genera ly useful qualities as layers and for the table. For sitting, none equal the Bolton greys, of which, and the speckled pheasants, there were some excellent specimens exhibited.

The Pavilion Dinner took place on Thursday, last week. Earl Dacre occupied the chair, and the Earl of Chichester the vice-chair. Earl Dacre entered into various remarks upon the Show, complaining of the extreme fatness of some of the animals. "It is difficult," he said, "to overcome olden customs, but we may gradually lead the public taste to approve animals in a more natural state. Lord Palmerston "thought we might perhaps discover a substitute for guano a few yards from our own dwellings. Dirt has been defined as 'a thing in its wrong place,' and the country might cleanse the towns, and the towns fertilise the country; the health of the townspeople and the finances of the farmers might thus be improved."

Lord Ashburton is the President elect for the ensuing year.

In our Journal of last week we engrav-d a portrait of Earl Ducie, the President at the recent meeting. His Lordship was born in 1802, and succeeded his father to the Earldom in 1840. The head of the Ducie family, early in the 17th century, employed Jethro Tull as his steward, and assisted him in those experiments and improvements to which made Tull's name famous. Lord Ducie has likewise distinguished himself as an excellent landlord and practical farmer, by excellent buildings, first-rate machinery, improved implements, thorough drainage, and great judgment in advancing the quality of his stock. A well-engraved portrait, with a memoir of his Lordship, opportunely appears in the *Farmer's Magazine* for the present month.

AN IMPROVED RAILROAD.—Mr. Carpenter, of Rome, New York, U.S., has made an improvement in the ordinary iron railroad, calculated greatly to diminish the liability, if not utterly preclude the possibility, of a train running off the track, under any circumstances. The improvement consists of a middle rail of iron or wood, running the whole length of the track, precisely in the centre, and standing a foot or so above the side or bearing rails. Friction rollers are attached to the engine and cars beneath, to play upon the sides of the middle or guiding rail, whereby the motion of each car is steadied, and any tendency to swerve from the track across recent dangerous and most eminent engineers concur in the opinion that the adoption of this invention would add great y to the safety and security of railroads, and prevent a large class of accidents to which they are now exposed. As they now are, it is little chance and good luck whether or not we are carried safe. If nothing happens, well—if nothing is thrown upon the track, by accident or by design—if no stone or rock should happen to roll down upon it from along its numerous banks—if no limb from a tree, or a rail or post from a fence, is blown upon it—if no animal gets upon it—if no child, in its innocent sports, should place a strip of board upon it—(as was recent y the case in England, thereby throwing the cars off and killing five persons)—if none of these and numerous other similar unforeseen and unavoidable casualties should occur, we may be carried along safely enough on railways as now constructed. With this improvement the speed may be increased to almost any velocity, with entire safety, so far as there would be any danger of running off. In short, with it, a railroad is incomplete, as much so as a ship without a rudder or a carriage without a tongue. We are informed by Mr. Carpenter that the only objection made to his improvement is the cost of it; and yet he is fully of opinion that it would be matter of economy and for the manifest interest of railroad companies to adopt this improvement. It would not only prevent a large class of accidents, but it would prevent the wheels from wearing as they now do, the flanges being much less.—*New York Tribune.*

The *Ariel* French steamer has just captured twelve more English fishing boats, while in the act of poaching on the French oyster-beds, and brought them into Havre.

Sweden has just lost one of its most distinguished men, V. Hisinger, renowned for his chemical and mineralogical acquirements. He not only published several works which are still valuable, but assisted the great Berzelius in his first efforts, allowing him both pecuniary support and the run of his laboratory, where Berzelius pursued for a long time those delicate investigations which have since rendered him so famous.

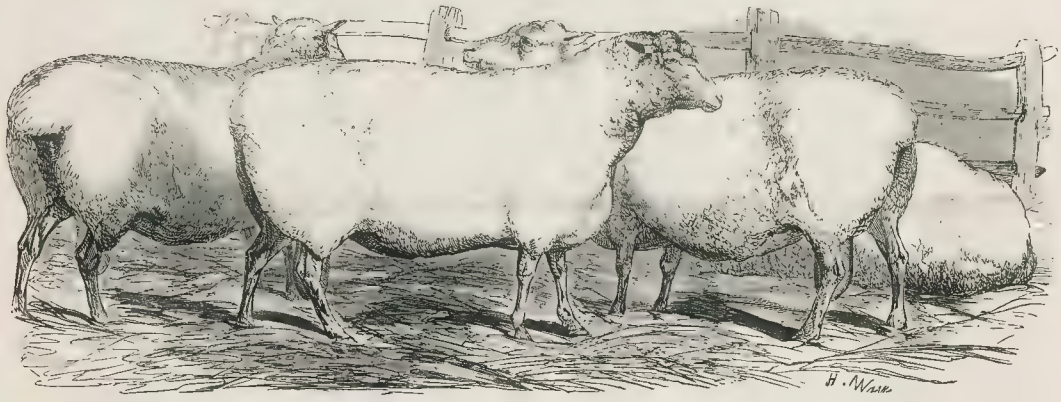
The following remedy for the cure of hydrophobia is copied from the number of the *Annonces, affiches, et avis divers de la Haute et Basse Normandie* of Friday, May 27, 1763, preserved in the library at Rouen:—"Take the weight of two hlarks of the dust of rotten oak, dry and well sifted, and four eggs, from which the yolks must be carefully removed. Beat the whole together to make an omelette; fry it in the best warm nut oil, and make the person or the animal eat it. If the person be a child of tender years, the dose must be proportioned to his strength. The patient must be three days jejunating in order to ensure that it may act. This remedy has not been tried on persons labouring under attacks of hydrophobia, but it has been tried successfully on more than 2000 who had been bitten by animals really mad."

The ship *Lady Montague*, in which there was such a great loss of life, as noticed a few weeks back, amongst Chinese emigrants, on their way from China to the Australian colonies, has been chartered by the Government to take out convicts, and is expected shortly to leave for Portsmouth, Portland, and Plymouth for that purpose. Out of a crew of thirty-six persons which went out in the *Lady Montague* from Southampton to the eastern seas a few years ago, not half a dozen have returned to England; all the re t either perished in the ship or deserted from her. Three of those who did return are natives of Southampton, and are mere youths, named Mainbridge, Millard, and Lee. Government officials have visited Southampton, and have taken the evidence of these boys, which evidence is of a most important nature, testifying as it does to life and limbs once subjected of appalling depravity and misery. The captain used to get drunk every morning, and the crew were so maddened by his conduct that they broke open the spirit stores and medicine chest, and drank all the strong drinks they could find. Three times Mainbridge had the fever, was delirious, and recovered without medical assistance. It was his province to throw overboard the dead Chinese emigrants in the Pacific, a dozen of whom would die in the night, and be partly eaten by rats before the morning. The water and food the crew and passengers had to eat was bad to a degree, and the ship was becalmed at until they were nearly starved. Mainbridge is the son of poor parents. He was an apprentice on board. His friends, of course, were anxious that he should get indemnified, and after some fruitless attempts he had undertaken, but the owners refused. The boy, however, expressed neither inclination nor objection to rejoin. At length he gave evidence before a magistrate, and he was to rejoin, or his father was to forfeit £20. As the payment of the penalty was impossible, the father said to his family, as they were at dinner, "I think the boy must join the ship, or you, mother (speaking to his wife), must sell the little property we have to pay the penalty." After a slight pause, "I father," said the boy, with a slight trembling of the lip, "mother had better go to London." And to London she went, and made such good interest that the owner and magistrate were induced to cancel the indentures. It was through the l ttery to London of this poor woman that the Government party became acquainted with the terrible recital of what had happened on board the *Lady Montague*. Mainbridge has now a comfortable situation in the service of the Peninsular and Oriental Company. The former commander of the *Lady Montague*, to whose atrocious conduct the disease, sufferings, and death on board of her is attributed, is a fugitive from justice. It is supposed he is in the neighbourhood of London. His name is Smith, and when he left Southampton he was about 30 years of age, with large whiskers, and either a fair complexion. It is al cerly to be hoped that the Government will not allow him to escape the vengeance of the law.

PRIZE CATTLE AT THE ROYAL AGRICULTURAL SOCIETY'S SHOW, AT LEWES.

HEREFORD BULL.—CLASS I.—FIRST PRIZE, £40.—(SEE PRECEDING PAGE.)

SHORT-HORN.—CLASS I.—FIRST PRIZE, £40.



KENTISH SHEEP.—CLASS I.—SECOND PRIZE, £10,

SOUTHDOWNS.—FIRST CLASS.—FIRST PRIZE, £30

KENTISH SHEEP.—CLASS I.—FIRST PRIZE £20.

DEVON BULL.—CLASS I.—FIRST PRIZE, £40.

SUSSEX BULL.—SECOND PRIZE, £10.

COCHIN CHINA. WHITE COCHIN CHINA (HARE). POLAND

PRIZE POULTRY AT THE ROYAL AGRICULTURAL SOCIETY'S SHOW, AT LEWES.

SOUTH WALES RAILWAY.—OPENING OF THE CHEPSTOW BRIDGE.

THE South Wales Railway bids fair to become one of the great arteries of communication between our metropolis and several of the most important countries of the globe.

Its terminus, at the best and safest harbour in the kingdom, Milford Haven, has already led to the formation of a company for constructing a class of steam-vessels of a size, hitherto deemed impossible. The Eastern Navigation Company, guided by their scientific engineer, Mr. Brunel, we understand, contemplate vessels of 500 feet in length, and of a proportionate power, which will perform the voyage from Milford, *viâ* the Cape, to India in less time than is at present occupied by the overland mail. Other companies contemplate making their port at Milford, which is the most westerly harbour in the kingdom.

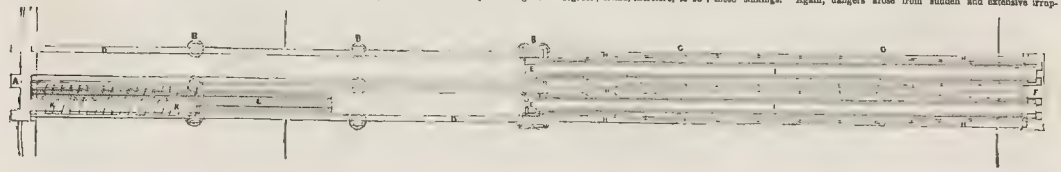
Hitherto an unfortunate break occurred at Chepstow, where passengers had to be conveyed about two miles over a rough country from station to station. On Monday this hiatus was abolished by the opening of the stupendous Iron Bridge over the river Wye for public traffic; and we may now anticipate that the rich minerals of South Wales—its coals of every available description for steaming and household purposes—will be found in all the midland and London markets.

The railway having to cross a rapid navigable river without interruption to vessels, the Admiralty very properly required that the span over the mid channel

SOUTH WALES RAILWAY.—THE CHEPSTOW TUBULAR SUSPENSION BRIDGE, AND JUNCTION OF THE WYE AND SEVERN RIVERS.

should not be less than 300 feet; and that a clear headway of 50 feet above the highest known tide should be given. Bridges of this size are so rare that we propose to illustrate the present one in detail. These works require the highest effort of mechanical and constructive skill. Mr. Stephenson's magnificent Britannia bridge displays one method of crossing wide spans. The present work of Mr. Brunel's is another mode, and shows, as might have been expected, his peculiarly original and bold conception, accompanied by extraordinary economy, by arranging his materials in the form of a large suspended truss, and attaching the roadway to suspension chains kept in a state of rigidity by vertical trusses or struts inserted between the chains, and a circular wrought-iron tube, spanning the river, 309 feet in length.

The bridge is 600 feet long; there are three spans over the land of 100 feet each, which are supported upon cast-iron cylinders, 6 feet in diameter and 1¼ inch thick. These cylinders were sunk to an average depth of 48 feet, through numerous beds of clay, quicksand, marl, &c., to the solid limestone rock, which was found to dip at an angle of 45 degrees; it had, therefore, to be carefully levelled horizontally, and the cylinders bedded level. These cylinders were sunk by excavating within them, and pressing them down by heavy weights; in doing which very great difficulties were overcome—immense volumes of fresh water were tapped, requiring a 30 horse engine to pump them out. The quantity very much increased during high water, which rises 44 feet, and in many of the cylinders work had to be suspended until the tide receded Although the Wye is a tidal river, and therefore salt, no salt water was found in these sinkings. Again, dangers arose from sudden and extensive irrup-

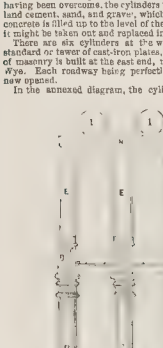


PLAN OF THE CHEPSTOW TUBULAR SUSPENSION BRIDGE.

tions of soft river silt, often bursting in with such rapidity that the men had hardly time to escape. Some of the strata were found covered with immense conglomerate boulders, indicating a former river bed. These having been overcome, the cylinders were filled with concrete, composed of Portland cement, sand, and gravel, which set in a few days as hard as rock. The concrete is filled up to the level of the roadway, so that, should a cylinder decay, it might be taken out and replaced in sections in safety.

There are six cylinders at the west end of the main span; upon these, a standard or tower of cast-iron plates, fifty feet high, is erected. A similar tower of masonry is built at the east end, upon the edge of the rocky precipice of the Wye. Each roadway being perfectly separate, we will describe that which is now opened.

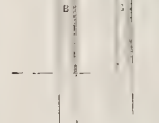
In the annexed diagram, the cylinders are A; the standard (B E E) having openings to admit the train to pass. On the west standard is a cross girder of wrought-iron (N) upon which the tubes (I) rest. The tube serves to keep apart and steady the towers, and to the ends of the tube are attached the suspending chains. Now, in an ordinary suspension bridge the chains hang in a festoon, and are free to move, according to the United weights passing under them; but this flexibility would be inadmissible in a railway bridge, and the continuity of the rail would be destroyed if a very small deflexion took place when passed over by a heavy locomotive. With a view to give this necessary rigidity, Mr. Brunel has introduced at every third part of the tubes a shift wrought-iron girder, connecting firmly the tube to the roadway girders; and, with the aid of other adjusting screws, the suspension chains are pulled or strained as nearly straight as desirable. Other diagonal chains connect these points, so that at whatever part of the bridge an engine may be passing, its weight is distributed all over the tube and chains by these arrangements.



The tube is fixed upon the iron standard, but is free to move upon rollers at the top of the masonry standard. The expansion on the hottest day yet experienced has not exceeded one inch.

The tube is strengthened within by the introduction of diaphragms or discs at every 30 feet, which, render it both light and stiff.

The roadway girders (B) are formed of a deep thin plate of iron, stiffened at intervals. At the top of



has a strong triangular cell to resist compression, and at the bottom a double plate of riveted iron to resist extension.

Between these side road girders are small cross girders (K) riveted to them diagonally. Upon the cross girders 4-inch crossted planks are secured in the contrary diagonal direction (L), so that by crossing each other stiffness is produced. Eighteen inches of gravel are laid over all, and then the ordinary permanent way upon longitudinal sleepers.

The land abutment (A) is built of masonry. In the plan the letters indicate the supporting cylinder; E E are the tubes; H H the chains radiating from the ends of the tube, which is 9 feet in diameter, to the saddle links on the sides of the roadway at G, where the width is 14 feet.

The second tube is now complete, and may be seen in the yard near the Bridge: it is expected to be floated next month. The pontoons for carrying one end of the second tube across the river are somewhat complicated, but it is primarily iron canal-boats, from which the bottoms have been removed, and decks put on.

The other end of the tube will be conveyed upon a railway formed upon piles, extending from the land to the six river cylinders; to that while the pontoons are pulled across by powerful tackle at one end, the latter end will be on a carriage rolling upon the railway to its place. Strong temporary erections or trestles are constructed upon each side of the river to lift the tube over the water, but must not omit to mention that the elaborate drawings instructions and calculations, connected with this laborious work were made under Mr. Brunel by his principal assistant in London, Mr. Henry F. Brereton, the resident engineer of the line and of the bridge is Mr. William George Owen, assisted by Messrs. Dibbin and Sayers

The contractors for the iron-work are Messrs. Finch and Wilcox, of Windsor Foundry, Liverpool; for the masonry, Mr. Sharpe.

Annexed is a summary of the cast and wrought iron used in the bridge:—

	Tons. cwts. qrs.
Wrought iron, in three spans of 100 feet each, double line	577 3 0
Wrought iron in the girders, floor-bearers, and other work of the main span of 300 feet, double line	576 0 0
Two wrought iron tubes, each 312 feet long	362 11 0
Wrought iron beam on the standard to support the tubes	30 5 0
Vertical trusses	37 0 0
The girders to connect the caps of columns	19 0 0
Suspending links in main chains and diagonals	2 1 2
Saddles at points of suspension rollers	41 10 1
Adjusting screws	3 7 0
Rivets of main tubes	17 3 3
Rollers of girders	2 17 0
Bolts	5 1 0
Total wrought iron	1231 2 3
	Tons cwts. qrs.
Cast-iron Bed-plates for Trusses	54 6 0
Standard	126 8 0
Caps for columns and parapets	21 0 0
Cylinders in the supporting piers	850 0 0
Total cast iron	1052 14 0

	Tons cwts. qrs.	
Wrought iron	1231 2 3	2234 14 4
Cast iron	1052 12 1	
Masonry in abutment and piers, 2240 cubic yards		
Total estimated cost of the Bridge when entirely completed, £6 420.		

The Bridge has been visited by a great number of engineers from the Continent and the East Indies, indeed, it is only by a personal inspection that the numerous ingenious arrangements can be understood.

The whole seems, when finished, to be very simple; yet engineers will fully enter into the complexity of design, and the intricate and careful proportioned scantlings given to every part. We would specially call their attention to the cast-iron ring or circle attached to the ends of the tube to prevent collapse; to the wedges introduced under the vertical trusses to adjust the exact tension upon the chain; to the curve given to the tubes themselves, increasing their strength; and to the roller-boxes under the vertical trusses, by which means the road girders are maintained in a position to expand or contract independently of the movements of the main tubes.

The private trial of the Bridge took place on Wednesday, the 14th inst., and was described in our Journal of last week. The public opening of the Bridge took place on Monday last, the 19th. The first train that passed over was the six o'clock train from Swansea. To show the public utility of this great work, it may be mentioned that two years ago the journey from London to Swansea, partly by railway and by coach, crossing by a ferry-boat the dangerous passage of the Severn at Beachley, occupied 15 hours. The express trains are now timed to perform the same distance (216 miles) with ease and comfort in five hours.

At Oulmes, La Vendée (France), last week a young ox was seized all at once with madness, and attacked every one in its way. Two persons were so grievously injured as to be thought past recovery. The gendarmerie were at last obliged to be called out, and they killed the animal.

On Saturday last an engine-driver named Stanley, at Gobowen, near Shrewsbury, was instantaneously killed by the explosion of a machinery attached to an engine on the Shrewsbury and Chester Railway. Three or four waggons which were moving down on an inclined plane towards the engine having come up before it came upon him and mangled his body in a frightful way.

The *Nigo Journal* states that Mr. Townley, the newly-elected member, was followed by a bailiff when leaving Sligo in his carriage the other day, and served with a writ pro summary to a large debt of his constituents.

During the thunder-storm in the south of England, on Friday week last, the lightning entered the Electric Telegraph office at Southampton on the wires, and played round the instruments in such an a armine manner that the telegraph clerks rushed from the office in a fright. The case journals could receive no telegraphic intelligence that night previous to their publication on the following morning, in consequence of the thunder-storm.

On the recommendation of the Earl of Rosse, president of the Royal Society, the following pensions have been granted: £200 per annum to Mr Hind, £100 per annum to Dr Mantell, and £75 to Mr. Ronalds, of the Kew Observatory.

MUSIC.

A new association, for the purpose of performing sacred and classical music both of the ancient and modern schools, has been formed. The performances are to take place in Exeter Hall, under the direction of Benedict, the composer and pianist, and Hatton, the composer. There will be one chorus, consisting of 200 singers, and choruses are to be on the grandest scale, comprising the best amateur as well as professional talent. The object of the society will be to strike out a new path by affording an opportunity to living composers to produce their orations or cantatas. The greatest attention is to be bestowed on the rehearsals. We shall take an early opportunity of referring to the divers points handled in the prospectus of the new association, which has already a considerable number of influential subscribers.

The seventh season of the Réunion des Arts was given at the New Beethoven Rooms last Monday.——The Harris Rooms had a *matinée musicale*, on Wednesday, at the Queen Anne-street Rooms.——Balfe and Bunn's new comic opera, founded on the popular farce of "The Devil to Pay," will be produced at the Surrey Theatre next week.——Lover's new opera, "Rory O'More," was lately successfully presided at the execution of his choral works, "Faith, Hope, and Charity," by amateurs and artists of the Philharmonic Society, amongst whom must be cited the Princess Poniatowski, the Countess Orsini, and Prince Carlo Poniatowski.

THE THEATRES.

HER MAJESTY'S.

Rossini's "Otello" was given for the second time last Saturday night, with Mdme. de Lagrange, Signori Bettini, Calzolari, Mercuriali, De Bassini, and Lablache.

On Tuesday night Rossini's "Cenerentola" was presented for the fourth time, Mdlle. Favanti sustaining the part of the persecuted heroine, in place of Mdlle. Angri. Favanti is an Englishwoman (Miss Edwards), who was a pupil of the Royal Academy of Music, and who subsequently sang in Naples. On the 23d of March, 1844, she made her first appearance at Her Majesty's Theatre as *Cenerentola*, and during the season performed the characters of *Fidalma*, *Orsini*, *Susanna*, *Pippo*, and *Zerlina* in Mozart's Ricco's "Corrado;" besides *Elvira*, in "Don Juan;" and *Adelgisa*, in "Norma." Much controversy was raised by Mdlle. Favanti's *début*, and the ill-judicious attempt to keep her before the public, in opposition to the opinion of the subscribers, was a fatal mistake of the management. Her return, after an absence of eight years, was looked upon with interest, to ascertain if the defects of her style had been amended by consultation with masters in Italy. In one respect a marked improvement has certainly taken place; the production of the voice is no longer attended with the same disagreeable effect, as in 1844. In point of execution a marching has also been perceptible; but her imperfect intonation has not yet been remedied; and, with one of the finest voices a vocalist has ever been gifted with, Mdlle. Favanti still retains the exaggerations which were noticed in former days. Like Mdlle. Grisi, the organ of Mdlle. Favanti from the highest to the lowest notes of the soprano and contralto registers, and in quality it is infinitely more sympathetic. She fails, however, to turn to account her natural gifts when she attempts to move the passions, and she labours solely to astonish and not to charm. The music of the concerted pieces she sacrifices entirely; in this respect it must be admitted that she only follows the example of Jenny Lind, Mdlle. Favanti's great contemporary, whose success has been and is, in supposing that the *ensemble* of a delineation may be dispensed with, for the sake of the rondo finale; and, so long as she adopts this view, her really beautiful voice will not suffice to place her in the rank of a *prima donna*. In the "Racqui all' affanno," which was re-demanded, whenever she first sided solely to the rich tones in the cantabile she enlisted the sympathies of her auditory; but, when she arrived at the cadenza, where the passage "Non piu mesta" occurs, the charm was dissolved, and the nervous passage in the "Non piu mesta" (the allegro) was executed in a manner that left no doubt of the fact that Favanti is not thoroughly mistress of her vocal organ. The interpretation of the opera, with the exception of Calzolari's *Ramiro*, most artistic as sung, was very unsatisfactory. Lablache was unwell, and out of spirits, and omitted the "Miei rampolli." Ferranti was imperfect in the part of *Dandini*, both in acting and singing; and the *Alidoro* of Furini was equally as objectionable.

On Thursday, Madame de Lagrange sang *Lucia*, Gardoni being the *Edgardo*, and De Bassini appeared as *Enrico*.

Madame Sontag is expected to arrive in town this day. The Duke of Saxe-Coburg Gotha's opera, "Casilda," and a new ballet, are also underlined in the bills.

ROYAL ITALIAN OPERA.

Spohr's "Faust" was repeated on Saturday and Tuesday, under the direction of the composer, who has left town for Cassel, in Germany.

On Thursday, for the extra night, Meyerbeer's "Huguenots" was performed, for the seventh time. Julliea's new opera, "Pietro il Grande," is in preparation.

CREMORNE GARDENS.—Aquatics have been added to the attractions of this delightful places of amusement. On Monday and Tuesday the Royal Thames Watermen's Regatta took place, the starting point being, as the tide served, from Vauxhall-creek, and down to Cremorne Esplanade. There were several prizes contested for, the principal ones being a silver cup, a silver wherry, coat, badge, and freedom; an appropriately engraved glass goblet; and a handsome shaft, the gift of Mr. T. Simpson, the lessee of the gardens. The struggle, by young Coombes. On Tuesday evening the various prizes were presented to the success ul competitors in the Gardens, which were crowded.

MDLLE. VANDERBERGH'S "Soirée Parisienne," gave her last but one public *matinée*, at Willis's Rooms, St James's. Here is a specimen of their ex, cits: Mdlle. Vanderbergh borrows a watch from a gentleman of the audience, and requests him to keep before the eage, she tells her little pupils mark the hour. She then liberates one of the birds, which perches upon a little rack containing some hundreds of cards. Presently he tins out one from some of the cards, and hands it to the company. It is marked with the figure 4. Another little fellow as quick ly finds a card on which is inscribed 20, asking this "20 minutes to 4," the precise time indicated by the watch. This is but one of a hundred tricks equally surprising and as full of elegance of the entire performance, and, above all, such the grace of Mdlle. herself, that it is impossible to conceive a more agreeable mode of spending an hour than at the *séances* at the "Orleans Marvellous."

THE FIRST NEWSPAPER.—Some almanacs state that Friday, July 23, was the anniversary of the publication of the first English newspaper in 1588. A contemporary upon this subject says that the *Daily Universal Register*, alluded to as the first English newspaper, and preserved in the British Museum, is palpable forgery. There are three printed papers dated in the time of Queen Elizabeth, but the type is of a comparatively modern cut there are four written papers of the same date, but the paper has been found to have a water mark with the Royal arms, and the initials G. R. These forgeries are supposed to have been perpetrated about 1766. At the beginning of the seventeenth century, as early as 1611, accounts of particular occurrences were published in England, such as "News from Spain," 1611; "News out of Germany," 1612; "Strange News of a prodicious monster born in the township of Addington," 1613; and many others. These occasional pamphlets of intelligence soon became regular publications. In 1621, Nathaniel Butler printed the "Courant, or Weekly News from Foreign Parts;" which was soon followed by "The Certain News of the Present Week," 1622 From that period to the present there has been perpetual progress, till, at the close of last year, there were 563 journals in existence in England, Ireland, Scotland, and the Islands.

DIFFERENTIAL DUTIES.—An Act of Parliament received the Royal assent on the 30th June (which is now in operation), to enable her Majesty to abolish, otherwise than by treaty, on certain conditions, differential du ies on foreign ships. It provides that where the trade and shipping of Great Britain have been placed in the ports of any foreign power on a footing of reciprocity, her Majesty may issue an order in Council declaring that the duties of such foreign power are the benefit of the provisions of the act, and thereupon the provisions of the 59 Geo. III., c. 54, shall be applicable. Such orders of council may be revoked.

THE POST-OFFICE.—In the year 1838, under the old system, 76 907,872 letters were delivered, and 6,568,024 franks. In 1840, under the new system, 168,758 344; in 1841, 196,500,191; in 1842, 208,434,451; in 1843, 220,450,309; in 1844, 242,091,884; in 1845, 271,410,789; in 1846, 269,386,702; in 1847, 322,146,243; in 1848, 328,830,184; in 1849, 337,399,159; in 1850, 347,069,071; in 1851, 360,647,187. The net revenue in each of the above years, ending the 5th of January, including the charges on the Government departments, has been—1839, under the old system, £1,659,809, 1840, including one month of the fourpenny rate, £1,833,764; 1841, under the new system, £305,785; 1842, £561,249; 1843, £600,141; 1844, £646,417; 1845, £719,597; 1846, £761,982; 1847, £820,119, 1848, £984,496; 1849, £740,429; 1850, £840,787; 1851, £803,898; 1852, £1,118,054

REGISTERED LETTERS.—The Postmaster-General has ordered a relaxation of the stringent rules now in force respecting the delivery of registered letters. At present a registered letter can only be delivered to the party to whom it is addressed, and whose receipt alone is taken for it. For the future, when this is impossible, a receipt will be taken for a registered letter from the husband, wife, or, failing this, from a member of the same family residing under the same roof as the party to whom such letter is addressed. This will be a very great convenience to the public.

It appears by a Parliamentary return that the total amount due by turnpike trusts in England and Wales to the Public Works Loan Commissioners, on the 5th of January last, was £5,648,264. This sum is to be added £12,466, for unpaid interest. The original amount of loan was £16,5,150, but £58,503 has been repaid. In Scotland, the interest due by the trusts exceeds the debt, the former being £70,158, and the latter £58,884. The principal portion of the loan was obtained in 1820, for highland roads and bridges, and interest at the rate of five per cent has been accruing ever since.

Her Majesty, while proceeding from Ryde to Osborne in her carriage on Friday evening week, was overtaken by a heavy storm of thunder and lightning, with hail, at Binstead, and in consequence of the fearful state of the tempest, she was compelled to alight from her carriage and to take shelter at Binstead Lodge, the residence of Lord Dawnes, where her Majesty was most courteously received by the noble owner, and where she remained for upwards of an hour until the storm had passed over. She then pursued her journey to Osborne House

NATIONAL SPORTS.

Saving a couple of small meetings at Downham Market and Wenlock on Wednesday, the ensuing week will be devoted to Goodwood, where the high and aristocratic character of the sport is likely to be fully maintained. In the course of the meeting, which commences on Tuesday, no less than four Cups, of great value and interest, will be contested, in addition to a daily average of rich prizes altogether without parallel; and there can be no doubt, now that the elections have terminated, that the attendance will be unusually large.

The REGATTAS for the week are the Royal Cup Yacht Club on Tuesday and Wednesday, the Cornwall on Thursday, and Richmond Amateur on Saturday.

CRICKET FIXTURES.—Monday: an All England match at Runnerford; return match at Horsham, between the gentlemen of Surrey and Sussex: Lansdowne v. Taunton, at Bath; West Hants v. South. White, at Salisbury; Leeds v. Bradford, at Leeds; and the Oval v. the Belmont d Club, at Kensington. Tuesday: Carshalton v. West Wickham, at Carshalton. Wednesday: At Lord's, the annual matches between Harrow, Eton, and Winchester, to last four days, the Vine v. the West Kent, at Sevenoaks. Thursday: Kent v. Sussex, at Tonbridge Wells; Taunton v. Tehbridge, at Taunton.

TATTERSALL'S.

MONDAY.—An outlay of £800 on Stilton was the only investment of any amount, the quotations being chiefly made up from small transactions.

BURGHLEY STAKES

3 to 1 agst King of Troy	4 to 1 agst Purser	4 to 1 agst Lady Eden

GOODWOOD STAKES.

12 to 1 agst Houlston	13 to 1 agst Weathergage (t)	15 to 1 agst Brahmin
13 to 1 —— Hampton	13 to 1 —— Harlem	20 to 1 —— Palmer and Leda
13 to 1 —— Buskranger	16 to 1 —— Caribou	33 to 1 —— Montague

GOODWOOD CUP.

2 to 1 agst Stilton	6 to 1 agst Alnagton	13 to 1 agst Hermitage
5 to 1 —— Little Harry	12 to 1 —— Newminster	12 to 1 —— Joe Miller

DERBY

100 to 70 each in one bet agst The Reiver and Orestes, and 20 to 1 agst Vandercoken.

TUESDAY. The subjoined quotations are the result of a very small outlay.—

GOODWOOD STAKES.

13 to 1 agst Harlequin	12 to 1 agst Elf	13 to 1 agst Ch of Jus ice
1 to 1 —— Surprise	12 to 1 —— Weathergage	14 to 1 —— Hoc akin
	25 to 1 agst Mornin g-d	

GOODWOOD CUP.—2 to 1 agst Stilton

STAMFORD RACES. TUESDAY.

THE ASSEMBLY-ROOM STAKES Placid (Charlton), 1. Mountain Flower (Norman), 2.

THE BURGHLEY STAKES. Retall (Bartholomew), 1. Lady Eden (Charlton), 2.

THE STAMFORD ST. LEGER.—High Sheriff (F. Marson), 1. Mountain Flower (Norman), 2

HANDICAP PLATE of £50. Cowmore (Osborne), 1. King of Troy (Steggles), 2.

TWO-YEAR-OLD STAKES. Vest (Norman), 1. Eaton (Charlton), 2.

WEDNESDAY.

BARLETTHORPE STAKES.—Glee K. (Mr. Bevill), 1. St. Antonio (Captain Little), 2

MATCH, 50 sovs.—Wingemund (Fatman), 1. Utrecht (T. Rogers), 2.

GOLD CUP STAKES.—Ilex (S. Steggles), 1. Retal (Bartholomew) 2.

THREE-YEAR-OLD STAKES. Mountain Flower, walked over.

TWO-YEAR-OLD STAKES.—Vest, walked over.

HANDICAP of 50 sovs each.—Phegra (Norman), 1. Presto (J. Sharpe), 2.

NOTTINGHAM RACES.—THURSDAY.

THE SCARBOROUGH STAKES.—Lenity Whent, 1. Equal 2.

ROBIN HOOD STAKES.—Lambton, 1. Whalebone, 2

NOTTINGHAM HANDICAP.—Lindrick, 1. Lady Amyott, 2.

FRIDAY.

THE BUNNEY PARK STAKES.—Lambton, 1. Theon colt, 2.

THE GRAND STAND STAKES. Equa, 1. Mrs. John, 2.

THE CHESTERFIELD HANDICAP.—Candlewick, 1. Young England, 2.

ROYAL VICTORIA YACHT CLUB REGATTA.

On Tuesday the annual regatta of the Royal Victoria Yacht Club, which is under the immediate patronage of her Majesty, commenced at the Isle of Wight. The Queen, although not present on the occasion, presented a splendid cup, value 100 guineas, to be sailed for by the yachts of all nations; amongst the beauties for which was the celebrated American clipper *America*, which was especially sent home from Gibraltar by her noble owner, Lord Blaquiere, for the occasion.

Off the pier, the *Brilliant*, schooner, Commodore R. H. Ackers, Esq., was moored, on board of which the committee of the club were stationed, for the purpose of starting the vessels, and timing them as they passed the winning post. The ships was dressed from stem to stern with the colours of all nations, as was also the *Talisman*, lying to the left of the pier. Amongst the yachts were the *Florence Talisman*, *Brilliant*, *Zephyretta*, *Fawn Queen*, *Myrtle*, *Sybil*, *Forest Fly*, *Jealous*, *Alarm*, &c

The pier (notwithstanding the enormous pier dues) was crowded with company, and amongst them were her noble owner, the Duchess of Cambridge, the Right Hon. Earl Yarborough, Lord and Lady Manners, Lieut.-Col Sir John Burgoyne, Earl Nelson, Lady H. St. Maur, Sir J. Hevet Carnac, Bart., M.P., Baron Park and Lady Park, &c.

The prize for the schooners for on Tuesday was:—A Cup of £260, to be sailed for by small-class schooners, under eighty feet in length, or not exceeding 100 tons. O. M., belonging to the Royal Victoria Yacht Club, was the winner, with the *Jub Jub* light ship, passing each time outside the Nonman and Sandhead buoys; round *Calshot* Light-ship and all the four buoys off the Brambles; once or twice round according to the state of the weather, to be determined by the members of the committee A time race. The following were the entries

Owners	Tons.	Colours.
Princess Olga .... T. Rutherford, Esq ..	52	White, with blue cross
Benita ..... Colonel Preston	65	Red, white cross
Novice ..... A. Arcedeckne, Esq ..	79	Blue, berg., with lion
Julia ..... J. W. Dugmore, Esq ..	42	Blue, white, and blue
Vesta ..... C. P. Wemyss, Esq ..	86	White and red
Vestal ..... R. S. Reuss, Esq	74	Union jack, white border

At the close of the round the first three yachts appeared off the *Brilliant* schooner as under:—

	Hours	Min.	Sec.
Bianca	4	32	20
Princess Olga	4	33	5
Vesta	4	36	0

In the second round the yachts arrived at the *Calshot* Light at about nine o'clock; the tide was then strong flood, with very light wind, and a strong stream towards the Southampton shore. Darkness soon after came on, and the yachts were obliged to feel their way by dropping the lead line. The *Bianca* drawing less water than the *Princess Olga*, stood closer in towards the shore, and by that means she was enabled to gain a great advantage over her opponent. The time of arrival at the starting vessel was as follows:—

	Hours	Min.	Sec.
Bianca	11	44	0
Princess Olga	12	55	0

The *Bianca* was thus the winner, independently of the time that could have been demanded from the *Princess Olga* for her superior tonnage.

The only match for the second day was for £50 or Fifty Pounds, to be sailed for by any cutter yacht, of any Royal club, of 20 tons, O.M., or above, being under 30 feet in length. Victoria course, once round. Three started, *Lalla*, *Sea Serpent*, and *Antagonist*, and a close and exciting race terminated in the victory of *Sea Serpent*.

AQUATICS.

A series of rowing matches under various denominations has taken place on the Thames during the week.

THAMES WATERMEN'S ROYAL REGATTA.

This regatta combines matches with tradesmen and bandsmen, and took place under the Royal patronage of her Majesty and Prince Albert. The first day was

MONDAY.

The preliminary heats extended from Vauxhall-bridge to Lawn cottages and back to Cremorne-gardens, and the last from Putney to the same place. The racing commenced at half-past two, and continued till nearly dusk.

TRADESMEN'S SCULLER MATCH, for a Silver Wherry. Heats—Benjamin Lawn, 1. Richard Wharf, 2.

APPRENTICES' MATCH, for a Silver Badge, Coat, and Freedom. First Heat.—Richard Fenner, Whitehall (blue), 1. Alfred Chapman, Horseleydown (red), 2. Second Heat.—Henry Brown, Old Barge House (yellow), 1. Henry Burrows, Blackfriars (pink), 2.

TUESDAY.

PICKED SCULLERS RACE for a Skiff, presented by Mr. Simpson, the proprietor of Cremorne Final Heat. Thomas Coombes, Vauxhall, 1. George Shaw, Milbank, 2.

LAMBERMEN'S PAIR OARS Final Heat for a Silver Cup.—Messrs. Barn and Holmes, 1. Messrs. Wharf and M'Carthy, 2.

APPRENTICES' Final Heat for Coat, Badge, and Freedom Richard Fenner, Whitehall, 1. George Beckett, Limehouse-hole, 2

FOUR OARED MATCH (Watermen) for a beautiful Glass Goblet.—Greenland, Judger, Smith, Turner, Manning (coxswain), 1. Money, Linnegd, Sullivan, Bencoe, C. Money (coxswain), 2.

CHAMPIONSHIP OF THE THAMES.—Cole and Coombes are again matched for £200 aside; the race to come off in the second week in October.

COLLEGIATE AQUATIC CLUBS.—The very interesting four-oared cutter race between the gentlemen of Guy's and the King's College Aquatic Clubs came off on Wednesday, and was as lantly contested. The Guy's crew had been for some time in training for the event, and came to the starting point in very capital condition. The distance was from Hammersmith to Putney-bridge. The start was very pretty and the pace fine. The winners (the King's College Club) and the losers, and their opponents were so wide as to be considerably in the right. The race was won by three lengths, after severe rowing.

ST. MARGARET'S AND ST. JOHN'S, WESTMINSTER, REGATTA.—This event, in three heats, came off on Wednesday, for a purse of sovereigns. T. Coombes and A. Bray, 1. Jas. Coombes and T. Rush, 2. Won cleverly, after a good race.

ROWING MATCH FOR £50.—James, of Wandsworth, and Loader, of Barnes (both watermen), rowed on Wednesday a match of four miles, the latter being from Putney bridge to Hammersmith. Mr. Clark, the celebrated sculler, accompanied the men, and was crowded with respectable persons. Betts was the favourite, and at Hammersmith was half-a-length ahead, but in the subsequent run to the finish Loader nearly caught him, and both men appeared greatly distressed by the great pace they had come over. James retained his lead, and won by nearly half a mile.

PUTNEY AND ROEHAMPTON REGATTA.—The watermen at Putney rowed on Wednesday for a purse, given by the nobility and gentry of the neighbourhood. It was in three heats, with ten competitors.—James Robinson and Frederick Phelps (Yellow), 1. William Robinson and Thomas R. Green (White), 2.

BARNERIKE REGATTA.—This regatta (the 94th), in three heats—one of the oldest upon the river—took place also on Thursday, and was an immense, attended by a numerous concourse of spectators. William Hunter (brown), 1 John Ardley (pink), 2. Benjamin Nevil. (green), 3. William Terry (yellow), 4. Pink led, followed by green. Brown, however, passed them, winning by four or six lengths. The first boat was therefore entitled to a new skiff, value £22, the others receiving minor prizes.

The Commodore of the Royal Victoria Yacht Club (G. H. Ackers) and a party of ladies had a very narrow escape from the fate of the steam on Friday week last. While [illegible] the ebb, and the wind came [illegible] the vessel to [illegible] the deck, and the wind came [illegible] yards, as well as the sails and [illegible] tremblers, and it was, indeed, doubtful that they could make their way to Ryde. It is but justice to the ladies to say that they behaved with great courage on the occasion.

On Wednesday, as Mr John Dew Ivey, an old and respected member of the Albion Cricket Club, was in the act of making a run in a match between his club and the United Amateurs Club, at Copenhagen House, he suddenly fell to the ground and in a few minutes expired. The deceased was a county verging upon sixty years of age.

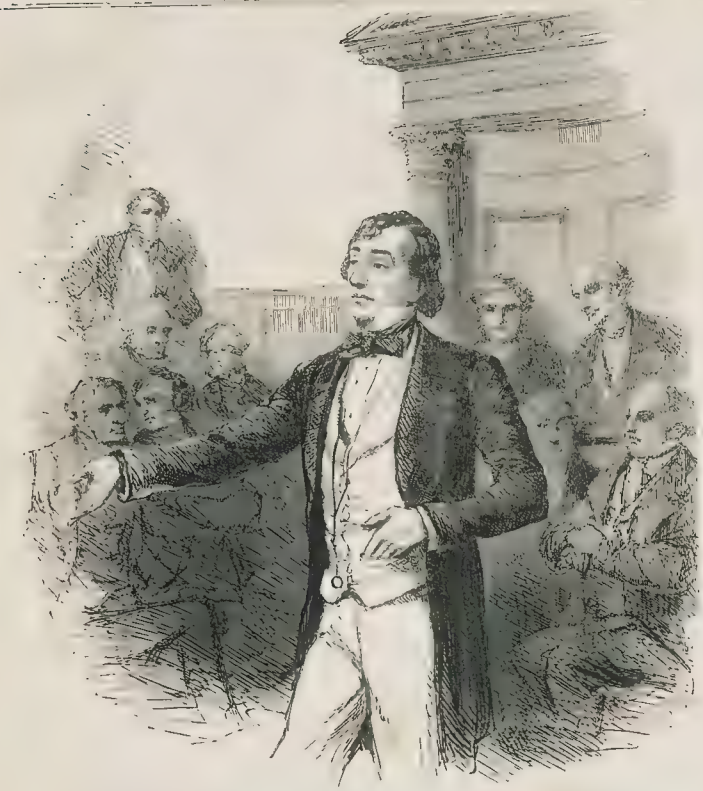
PUBLIC REVENUE AND EXPENDITURE.—The state of the public revenue and expenditure from the year 1822 to 1851 inclusive, may be seen at a glance by reference to a return, printed on Tuesday, by order of the House of Commons. By this it appears that in each year the total revenue, after deducting drawbacks and repayments, was £[illegible], and the expenditure £[illegible], leaving a surplus income of £1,741 41. In 1823 the revenue exceeded the expenditure by £[illegible], but the expenditure was nearly £1,000,000 more than in 1824, the public income gradually increasing until, in 1851, it reached £[illegible], showing a deficiency, as compared with 1824, of [illegible] thus during the thirty years [illegible] the total amount of the surplus income was £[illegible], leaving a deficiency of £[illegible]. In 30 years there was a surplus in 1851 amounted to £[illegible], there was a surplus in 19 years, and a deficiency in 11 years. The largest surplus in any one year was [illegible], in 1824; the largest deficiency in 1827, 1848, and 1852, [illegible] in 1841 [illegible], and in 1847 [illegible]. The total [illegible] during the 30 years was £[illegible], while [illegible] amounted to more than [illegible] pounds.

THE INDIA MAIL SERVICE.—At the present time there are two steamers employed to perform the Indian mail service between Southampton and Alexandria. It is intended by the Oriental Company that one steamer more on the line shall do the service next year (which will be done when it is at present), owing to the increase of speed that has been and will be attained on that line. The Alexandria steamers are [illegible] and [illegible] a month, [illegible] at Gibraltar, at [illegible] for Indian Mail [illegible] from Southampton, [illegible] from Alexandria, [illegible] every fortnight. Despatches are usually [illegible] the Peninsular Company's screw steamer *Formosa*, which [illegible] Alexandria with

MONETARY TRANSACTIONS FOR THE WEEK.

(From our City Correspondent.)

Notwithstanding that the amount of money business doing in the Consol Market this week has been comparatively small, and that several [illegible] large sales of stock have taken place, the quantity of the national securities have [illegible] the Money Market remains very [illegible] [illegible] for [illegible] at [illegible] per Cent. [illegible] Consols, however, have been [illegible] per Cent. [illegible] Bank Stock [illegible] per Cent. [illegible] Reduced [illegible] per Cent. [illegible] Long Annuities [illegible] Indian Stock [illegible] Exchequer Bills [illegible] 10s. to [illegible] Shares [illegible] Exchequer Bonds [illegible] Exchequer Bills [illegible] Stock [illegible] Bonds [illegible] Indian Stock



THE BUCKS ELECTION.—MR. DISRAELI ADDRESSING THE ELECTORS IN THE COUNTY HALL, AYLESBURY.

did not appear in the procession of the gentlemen opposite. (A laugh.) The time has gone by when these exploded politics could interest the people of this country. (Cheers.) No one supposes that the present Administration have any intention, or ever had any intention, to bring back the laws that were repealed in 1846. (Shouts of "Oh, oh!" and cheers.) I think that the laws that were repealed in 1846 were repealed in panic and in precipitation. I think that, in the haste of accomplishing what might be a necessary end, the interests of great classes—and the interests of great classes are the interests of the community, for the community consists only of classes—were not duly considered. I have told you before, and I declared my conviction in the House of Commons years ago, that if you resolved to maintain the change that was then effected you would, sooner or later, have to consider the whole financial system of the country. (Cheers.) I have said in the House of Commons, as I have said frequently in the county of Buckingham for years past, that you had a financial system in this country which was based upon a protective system, and that if you destroyed the protective system, you must consider the financial system, which was its creature. (Cheers.) Well, gentlemen, these were my principles, which I have—under great difficulties, under opposition even from many who were members even of my own party—always advocated. They are principles which I advocated in Opposition, and which, as a Minister of the Crown, I am prepared to put into practice. With respect to the question of local taxation, allow me to say, that as I have brought forward that subject in the House of Commons—not as a complete remedy for the redress of the grievance of any class, especially of that class whose grievances were acknowledged by the Ministry and from the Throne—nothing is more gratifying to me, after all the sneers with which my suggestions were first received, than to find that there is no man, however liberal may be his opinions or his political connexions, who is now canvassing a county, who does not admit the truth of the principle which I have enunciated, and his readiness to support its prudential application.

* * * * *

But, gentlemen, I don't pretend to think that any adjustment of local taxation would give the redress that is necessary to the cultivator of the soil; nor do I think that, in entering upon the question of a revision of taxation, we are to consider the interests of any class alone, however respectable. (Hear, hear.) I carry my views much further, and I look with confidence to the moment when the Government—whom some, who are not entitled to do so, now presume to treat with contumely, will bring forward measures which, while part of those measures will redress the grievances of the cultivator of the soil and place him in a fair position for the exercise of his industry and the employment of his capital—will at the same time, by their wise and comprehensive character, relieve every class in the country by the introduction into the system of taxation of principles more just and more beneficial than those which have hitherto been its basis. (Cheers.) I regard the present moment as no mean epoch in the political history of this country. Don't suppose that when the new Parliament assembles you will have merely marshalled before each other the old parties which have hitherto governed this country. You will have new principles of action introduced. You will have a new policy founded upon those principles recommended to the notice of the House of Commons; and you will find at last it is still impossible, notwithstanding all the passions of party politics, that a Ministry, great as may have been the difficulties with which it had to contend when it was first formed, which understands a phrase that has been often used, "the spirit of the age," can alone govern a great country like this by considering the interests of the whole community, and adopting a policy that will make it, if possible, more powerful and more prosperous than before. (Cheers.) I have been asked what are the measures which my colleagues are going to bring forward. With great respect for the gentleman who asked me this question, I must defer to the fitting occasion and to the fitting place the detail of those measures. ("Hear, hear," and cheers.) I am bound, as a solicitor for your favours, to state to you the general tenour of the policy which I shall recommend, and the great object of the policy which I wish to achieve; but can anything be more preposterous or more ridiculous than that I should be called upon to explain to the electors of the county of Buckingham all the details of measures so vast as they necessarily must be, embracing the interests of a great community like this? I tell you what is the spirit of the policy that animates us; I tell you what is the object we wish to attain; and I would express my firm and solemn conviction in the face of the county of Buckingham, after witnessing the present temper of the public mind, and scanning—I am sure with no prejudice—the results of the general election, that the Ministry will be permitted to bring forward their measures; that no manœuvres of faction will terminate their career—(Cheers)—and that those measures will obtain the assent, and I will even say the enthusiastic approbation, of the great body of the people. ("Hear," and cheers.) I cannot on this occasion be silent to those whose interests are most important among the constituency of the county of Buckingham—I mean the cultivators of the soil. Subject hitherto, as I have always believed, and as I think I should be able to show, not only with regard to taxation, but with regard to many other circumstances, to a burden which they could not have borne had they not secured the artificial price of their produce, the farmers of England have of course, naturally and quite justifiably, clung to that artificial price when the burdens, the restrictions, and the system to which that artificial price had alone reconciled them remained untouched. I would say to the farmers of England that there is one means of redress which is quite equal to artificial price, and which will always find favour with all classes of the country. It is a policy that reduces the cost of production.—(Cheers)—and which, when they are asked for cheap bread, will allow them to give that bread to the people more cheaply than their competitors. ("Hear," and cheers.) Now, gentlemen, that is the policy that I propose to carry into effect.

The polling took place on Monday and Tuesday, and at its close the numbers were as follow:—

Dupré	..	..	..	..	..	1999
Disraeli	..	..	..	..	..	1868
Cavendish	..	..	..	..	..	1403
Lee	..	..	..	..	..	665

The number of electors on the register is between 5000 and 6000.

DESTRUCTIVE STORM AT COLCHESTER.

AMONGST the various thunder-storms which visited different localities of the country during the last week, one of the most violent descended upon Colchester and its neighbourhood on Friday night, at eleven o'clock, by which a large amount of damage was done to several mills, especially Rainsford Mill, in the occupation of Mr. John Ratcliff. About half-past ten, a whirlwind commenced from the south-east, by which the sails of the above mill were broken, and the cap was blown off. Fortunately, the latter was stayed in its progress downwards by resting its edge upon the curb; one of the sails broke off at the "middling," with the end penetrating the body of the mill. The stage was also nearly demolished. The miller, Nicholas Freeman, was in bed in the mill at the time the accident occurred, but escaped unhurt. The house, in the upper room of which were Mrs Ratcliff and her daughter, is within 15 feet of the mill, and had the cap and sails fallen upon it, the death of the inmates of the house would probably have been the result. The effects of the whirlwind were traced from Mr. Attwood's park, near which a tree was twisted, across by the mill, and through Mr Bartlett's garden. The sails and the entire top part of the flack-mill in North street were thrown on an out-house, the roof of which was forced in. The mills in the Harwich-road, the Military-road, and at Greenstead, all suffered more or less. Those at Mile-end, Stoated, and Langham are also all injured, the last-mentioned having its sails carried away. So great a destruction of mill property has not been known in this part of the county for many years. The fury of the elements lasted nearly an hour and a half, and was succeeded by torrents of rain, but no lives were lost.

On the same night the storm also visited Henley-on-Thames, where it committed great havoc on the lawn of the beautiful residence, Park-place; a stately cedar of Lebanon which had long graced the west front of the mansion having

RAINSFORD MILL, COLCHESTER, STRUCK BY LIGHTNING ON FRIDAY NIGHT WEEK.

been completely shivered by the electric fluid from top to bottom, large portions of the timber being hurled to a distance, and the noble tree reduced to a complete wreck. On the east side of the house, however, a still more valuable cedar, which had been planted in Park-place by George III., when residing there in his minority, happily escaped the ravages of the storm.

No. 571.—VOL. XXI. FOR THE WEEK ENDING SATURDAY, JULY 31, 1852. [SIXPENCE {WITH SUPPLEMENT, GRATIS.

THE COMMERCIAL RELATIONS BETWEEN GREAT BRITAIN AND FRANCE.

WHILE in this country the great principles of Free Trade have for the last five-and-twenty, and especially for the last seven years been converting all the wisest heads of the nation, and playing sad havoc with parties in their triumphant progress, France has remained obstinately wedded to the old ideas. French manufactures and French agriculture are stringently protected. Under the system of Free Trade, which to a large extent has emptied our prisons and our workhouses, and given the labourer the big loaf instead of the little one, the English agriculturists have raised a loud cry of distress. It is true they complained as much in the "good old times," when they were protected, as they do now, in these "unhappy days," when they are unprotected; and that their groans were as loud from 1815 to 1845 as they have been from 1845 to 1852; but we only allude to the well-known fact to compare it with the state of feeling among the same class in France. There is not under the sun a race of agriculturists who make more bitter moans over their evil fortune than they do. They are protected to the full, but they are not satisfied. Nothing pleases them, and no kind of harvest is profitable enough to bring the smile to their faces. Their name is synonymous with "misery;" a fact which we borrow from the reports of the inspectors deputed by their own Government to inquire into their condition. If the harvest be a deficient one, they get high prices, but few customers; and their gains are not sufficient to enable them to pay the interest on their heavy mortgages, and meet the burdens imposed on them by the State which protects them; if it be an average one, they are in the same suffering, querulous, discontented condition; and if it be a bounteous one—rejoicing the heart of man—it brings to them no consolation: for prices fall, and they are as miserable as ever, and become the prey of the mortgagee, the tax-gatherer, and the attorney. If, by some hocus-pocus in commercial and mundane affairs, they could reap a plentiful harvest and charge a famine price for it, they would be well pleased; but, failing that impossible consummation, they jog on as well as they can, and grumble with the proverbial earnestness of their craft. The protected manufacturers of France are easier to please: they do not complain, though it is evident that the protection under which they live has not enabled them to compete successfully with this country, in any one of the great branches of manufacture which in our day make the fortunes and the greatness of nations, as well as of individuals. If a Frenchman be asked what Protection has done either for the manufactures or the agriculture of his country, he is puzzled to tell. It is English capital, that has made and is making French railways; and if a Frenchman corresponds with, or desires to cross the Atlantic, or to visit India, it is an English vessel to which he must trust his missive or his person, for his own country does not provide him with the necessary facilities or accommodation. The protected textile manufacturers of France cannot clothe the world, as the unprotected manufacturers of England can do; and in all branches of industry the Free-traders of England compete successfully with all the protected nations of the earth.

But while England has been giving to the world so brilliant a lesson in economic science, and inspires no less a person than the President of the French Republic with a desire to study the great truths which Adam Smith promulgated, which Mr. Cobden and Sir Robert Peel partially wrought out, and in which Lord Derby and Mr. Disraeli have finally acquiesced, as the only possible system in our day, we must admit that as regards its nearest neighbour, it has not acted up to the spirit of its own policy. Our Free Trade is at best but a partial and incomplete theory. It is not yet the fact that it ought to become. We have opened our ports to the corn of the world, because corn is that article of first necessity to which of right the great principle should be first applied. But there is no necessity why we should stop at corn. We offer to take from France all the bread-stuff she can spare us, though we well know that she cannot supply us to any appreciable extent, inasmuch as she produces little except what she needs herself; but we do not offer to take from her another article of agricultural wealth of which she is the largest producer in the world, for which she is justly and widely celebrated, and for the superabundance of which she would gladly find a market in this country. We tell her that we will take her Corn, although she has none to give us; but we say nothing about her Wine, though she produces so many millions of gallons more than she knows what to do with. It is hard to say what effect the heavy duties which we have laid upon French wine have had on the general intercourse between the two nations, or how much ill-feeling, war, and bloodshed have been indirectly produced by our unwise preference of heavy port for the light, wholesome wines of France, or what battles might have been avoided if our forefathers had judged it more expedient and more profitable to trade with rich and powerful France for her staple product, rather than with weak and poverty-stricken Portugal, for a more potent, but a less wholesome beverage.

But, leaving this question, on which it would be easy to generalise and form conclusions, as correct as they would be startling, we think it will scarcely be denied that the excessive duties we have imposed upon the light, unintoxicating wines of France have led in this country to a large increase in the consumption of stronger and cheaper beverages. Of the upper classes, as not greatly interested in the price, it is scarcely necessary to speak, yet it must be obvious that even they, for the sake of cheapness, have consumed greater quantities of strong Portuguese and Spanish wines than they would have done had Bordeaux and Burgundy been attainable at more reasonable rates. To the bulk of the middle classes port and sherry have been the

STATUE OF THE LATE SIR ROBERT PEEL, AT TAMWORTH.—(SEE NEXT PAGE.)

only wines known—except by name—while the lower classes have been as much strangers to the taste of wine of any kind as it there were no such thing in existence; and have drunk beer and spirits alone. The effect of this state of things upon the character and morals of the country was long a painful subject of contemplation; and though, happily, the great Temperance reformation of the last few years has diminished the evil of spirit-drinking to a considerable extent, it still exists to create pauperism, madness, and misery among the labouring population. While this has been the case in England, and while we have unhappily been acquiring a deservedly bad character among the nations of the earth for the large sums we habitually spend in intoxicating liquors, another nation, removed from us only by a narrow strait of twenty five miles of salt water, is able and willing to supply us with any quantity of a wine, favourable to health and longevity, at a price which might have rendered it the poor man's daily beverage.

Without entering any deeper into the question than this, it is clear, from the simple statement of the fact, that our Government has acted unwisely in a commercial point of view; that on political considerations it has been much to blame for the national estrangement and hostility that have been the consequence; and that it is by no means innocent of the moral degradation of the people, which has been the last, but by no means the least, result.

In three valuable letters upon the subject of the wine trade and its history, for which the public is indebted to Mr. Thomas George Shaw, we find some statistical tables which throw still further light upon the subject. From these it appears that between the years 1791 to 1800, both inclusive, when the population of the empire was but fourteen millions and a half, the consumption of wines in this country was actually greater than in the year 1851, when the population had increased to nearly twenty-seven millions and a half. In the first-mentioned period the annual consumption of wine averaged 6,513,000 gallons; while in 1851 it amounted to 6,280,000 gallons. It must not be supposed that it is to the Temperance movement alone that the result must be attributed, though, doubtless, the decrease is partly owing to that cause. The fact is, that Port wine, to which, with Sherry, the consumption became almost wholly restricted in consequence of the excessive duty on French wine, reached at last so excessive a price, that adulteration ensued. Adulteration with brandy and worse materials led in course of time to disgust, and the bulk of the public preferred good beer and pale ale to bad port and execrable sherry The decrease in the consumption of wine was accompanied by an increase in the consumption of malt liquor and spirits; and France, that had wine enough to afford every labourer more than his bottle per day, could find no market for her superabundance, and scowled upon her nearest neighbour, England, for being so foolish, short-sighted, and unneighbourly as to refuse to trade with her. In the present year, were it not for the almost prohibitory duty of 5s. 9d. per gallon upon good wine, that could be delivered in the Thames, all other expenses paid, at one shilling per gallon, every labouring man daily now drinks his pint of small beer, could enjoy as great a quantity of wholesome French wine; and the English farmer, as in the olden time which he deplores, could drink his Claret and his Burgundy.

The present time seems favourable for a consideration of this question. If it be desirable that the commercial relations of two such powerful Governments as those of Great Britain and France should be extended and improved, a readjustment of the wine duties would afford an opportunity for the commencement of a better understanding and a more profitable intercourse. No one advocates the free introduction of French or any other wines; for, as long as it is necessary to raise a revenue for the public service, wine is a proper object of taxation. But it should be taxed for revenue only, and with no hostile intent against the trade of another nation.

The main, if not the only, obstacle to the natural development of the wine trade with France, is the fixed import duty of 5s. 9d. per gallon on all wines, whatever their quality. This duty may be but ten per cent. upon the high-classed and expensive Château Margaux, Clos Vougeot, or Hermitage of the rich; but on the common and excellent wines which the middle and lower classes of the people would consume, it amounts to 500 or 600 per cent., and consequently to a virtual prohibition. An *ad valorem* duty would remedy the evil; and, while there can be little or no doubt that it would lead to a greatly increased consumption, and to a more extensive interchange of commodities between the two nations, there is every reason to believe that Great Britain, in taking this step, would not only establish a permanent good understanding with the French people, but raise in one year a larger amount of revenue from wine than she now raises in half a dozen.

Who knows but that, after all, England may become a corn-exporting country, and feed the French wine growers; who, in their turn, might devote a larger amount of acres to the grape, and fewer to grain? Such a result of the Free-Trade system would be as welcome to the agriculturists of both nations, as it would be beneficial to the general interests of the whole people of each.

STATUE OF THE LATE SIR ROBERT PEEL AT TAMWORTH.

YESTERDAY week, the 23d instant, the bronze Statue just erected to the late Sir Robert Peel, in the market-place of Tamworth, was inaugurated, though with little of the ceremony customary on such occasions. Tamworth owed this debt of gratitude to the fame of the deceased statesman; and it has been rendered—quietly, it is true, but still with every evidence of sincerity. From the highest to the lowest, nearly everybody subscribed for the Statue. Nor could the feeling with which the inauguration was witnessed be mistaken. The shops were all closed, and the whole neighbourhood assembled to do honour to the occasion. The Statue, as a work of art, possesses, according to the standard in this country, very high merit, and brings prominently and favourably before the public, Mr. Noble, the sculptor, who has certainly produced a very striking likeness of the great original. There is a severity of expression about the face to which objection may be taken; but the outline of the form is excellently preserved when the bulky vestments are remembered; and the attitude—Sir Robert is represented speaking—is at once spirited and easy. The drapery, also, is remarkably well arranged, the modern costume being sufficiently conventionalized to ensure an artistic effect without any extravagant departure from what we are accustomed to see around us. The inauguration took place at two o'clock, in the presence of the Mayor and town council, and a large party of gentlemen of local note.

Sir Charles Clarke first addressed the meeting, as chairman of the committee for the erection of the Statue, which, he remarked, was placed with its back to London and the west, with its face directed towards the place of Sir Robert's birth. On the right was the church in which he worshipped, and on the left was the palace which he erected, but which, unfortunately, he did not live long to inhabit. (The Statue having been uncovered, and having attracted during a brief interval general admiration) Sir Charles, turning towards the Mayor, continued:—I now call upon my friend the Mayor of Tamworth to undertake the duty which I impose upon him. Sir, I give into your custody this Statue of Sir Robert Peel. Preserve it as you would the reputation of a neighbour or a friend if he was in difficulty. I charge you to take care of this excellent memorial, due to the memory of an orator, scholar, an accomplished gentleman, a brave and ambitious member of Parliament, and a illustrious statesman, knowing as I do the attachment which you and many others near you bore to him while living, I cannot doubt that the sacred trust which I now commit to your hand will be diligently performed.

The Mayor briefly and appropriately expressed his willingness to undertake the charge of the Statue, and pronounced a high eulogium upon the memory of the late Sir Robert Peel, not so much in his public capacity as in his private relations, and especially in regard to his connexion with the borough of Tamworth.

At the close of the ceremony a *déjeuner*, very numerously attended by ladies as well as gentlemen, took place in the Town-hall.

Sir C. Clarke presided, and, after the health of the Queen, in a long and feeling speech proposed "the memory of the late Sir Robert Peel," which of course was drunk in solemn silence.

To "the health of the present Sir Robert Peel, and of the family."

Sir Robert Peel replied, and proposed "the health of Sir Charles Clarke and the committee."

The toast having been duly acknowledged, and "the Mayor and Corporation" having also been drunk, Mr. Frederick Peel addressed the company, and bore testimony to the sculptor of the statue having produced an admirable work, whether in the general outline, in the correctness of the proportions, in the resemblance of the features, or the ease and gracefulness of the posture. Mr. Peel concluded by proposing the health of Mr. Noble, congratulating him on the distinction he had won. (Cheers.)

Mr. Noble modestly returned thanks for the compliments that had been paid to him.

After one or two more toasts, the *déjeuner* terminated.

The proceedings connected with the day, however, did not terminate here, for at five o'clock the house and grounds of Drayton Manor were thrown open to subscribers and visitors.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The modification of the Ministry, which we noticed last week as likely to take place on the return of the Prince President from Strasburg, has been effected. M. Drouyn de Lhuys has been appointed Minister of Foreign Affairs, and M. Magne, Minister of Public Works, whilst M. Baroche is directed to take part in the Council of Ministers.

In our late edition of last week we noticed the death of Marshal Exelmans by a fall from his horse on Wednesday evening (se'nnight), close to the Bridge of Sèvres, near Paris. He was buried with great pomp on Tuesday in the Church of the Invalides. The richly decorated hearse set out at eleven from the Palace of the Legion of Honour, the official residence of the deceased marshal, as Chancellor of the order. The hearse was drawn by six horses, and followed by the white horse of the Marshal. This animal was an object of much curiosity, from the circumstance which caused the brave officer's death. The corners of the pall were held by Marshal Vaillant, and Generals Magnan, St. Arnaud, and Laureston. The *cortège*, at the head of which walked the family of the deceased, preceded by a detachment of guides, was received by the clergy at the iron railing of the Invalides. From an early hour detachments from all the regiments of the garrison were concentrated about the hotel. The bands played funeral symphonies, and the artillery fired salvos during the ceremony. The door of the church, the porch, and interior of the chapel, were hung with black cloth, embroidered silver with the arms and initials of the Marshal. Upon a series of scutcheons were inscribed the Archbishop of Paris, Prince Jerome Bonaparte, Prince Murat, all the Ministers, M. Baroche, the members of the *corps diplomatique*, several senators, deputies, and councillors of State; Generals Schramm, d'Hautpoul, Pyat, Regnault de St. Jean d'Angely, Tiburce Sebastiani, the Abbé Coquereau, a large number of public functionaries, and several officers and soldiers of the Imperial army in their old uniforms. The Prince President left the church at a quarter past one, with the same *cortège* with which he arrived. The clergy then advanced to the railing in front of the Invalides, and pronounced a blessing upon the hearse. After this the General commanding the troops approached the coffin with his staff, and the soldiers filed past in the order of the number of their regiments. At half-past two the ceremony was concluded, and the body was removed to the interior of the Invalides, to be lowered into the vault where many governors of the Invalides and Marshals of France are interred.

Another of the relics of the "Grand Army" of the Empire has also passed out of existence. Count Bertrand, General Gourgaud, the faithful aide-de-camp of the Emperor Napoleon, who accompanied him in his exile to St. Helena. He died on Friday se'nnight, at Paris, after a long illness, and was buried on Wednesday, with military pomp, in the cemetery of Père la Chaise. The attendance was very numerous, and the military display was on a large scale. There were, in addition to the troops of the line, several detachments of National Guards, for the General had been a Colonel of that force. There were none of the military household of the Emperor present at the funeral; his brother it was that the attachment of the deceased to the Orleanist family had made him an object of dislike to Louis Napoleon, or that the latter gave credence to the rumours which at one time prevailed that Gourgaud had not been faithful to the Emperor throughout his exile.

The rumours of the President's marriage are still rife; but now it is said that the future Empress is not the Princess Vasa, but another Baden Princess, the grand-daughter of Eugene Beauharnais and of Don Pedro.

The approaching elections for the new councils-general and the municipal councils has been made the subject of a second letter of instructions from the Count de Chambord to his adherents, the Legitimists. This document, which has been extensively circulated in Paris, although not published by any of the journals, is as follows:—

Frohsdorf, July 10, 1852.

The law for the renewal of the councils-general, the councils of the *arrondissements*, and the municipal councils, has just appeared. It makes no change in respect either to the qualification demanded or to the interpretation given to that oath. Consequently, all those who are willing to conform to the feeling which dictated the letter of the 27th of April, and the vote of the 10th of June, ought to abstain from taking part in the formation of those councils.

In the situation in which they are placed, it is not the adherents of the Monarchy who refuse the co-operation of their intelligence and of their patriotism to their fellow-citizens. It is the Government which excludes that co-operation, by attaching unacceptable conditions to it. On it alone falls the responsibility.

Calculating on their ancient attachment to the moral and material interests of the country, an attempt is made to draw the Royalists into a false route. They (the Royalists) will not accept a mandate which could not be confided to them, except on the condition of engaging their fidelity to a principle which is not theirs, and to a cause which they are not permitted to serve.

Let them submit, then, to refuse temporarily those mandates to which they attach so much value, thereby showing that there is no amount of sacrifice which they are not prepared to make to their political convictions.

Besides this, the retirement of the Royalists, in the present circumstances, cannot produce any danger to society. The law grants to the Government the faculty of dissolving and replacing the councils, which, by their composition, should not give to public order and to the regular administration of the communes all the necessary guarantees. It would, therefore, become a duty on the part of the authorities to make use of this right every time that they became sensible that it was necessary.

Under a régime which pretends to be founded exclusively on the principle of the sovereignty of the people, the refusal to elect or to be elected, when the possibility of accepting the mandate is not equal for all, is a protest against the trammels which create that inequality; it is a proof that the elections are not in reality free, since the choice of the electors is unheeded and limited by the impossibility, without any profit to their efforts, of their mandatories, of an oath and of engagements to which they cannot submit.

The Committee of Coast Defences now at Cherbourg, under the presidence of M. La Place, General of Artillery, has recommended the construction of two new forts on the coast of Cape La Hogue—one in Flamby Creek, and the other in Vauville Bay.

The *Pilot* of Calvados has been "warned" for calling the *fêtes of Strasburg* "theatrical." A "warning" has also been given to the *Journal de Rouen* for having said, with reference to the departmental elections, that the existing Government ought to be respected, rather because it existed than for any guarantee that it offered to the cause of progress of true liberty.

The *Moniteur* states that the Minister of Finance has, in consequence of the continual increase of money in the Treasury, been enabled to pay to the Bank of France 25,000 000, on account of the 50,000,000 lent to the Government in 1848.

The English Ambassador at Paris has communicated to the French Government the letter of a letter to be addressed by the Secretary of the Royal Commission of the universal Exhibition of 1851 informs the English Minister of Foreign Affairs, that the fire which took place a short time back in the printing establishment of MM. Clowes, printers to the Exhibition, has hitherto retarded the transmission of the reports of the juries, the illustrated catalogues, and the specimens of the medals destined for the Government of the states which took part in the Exhibition. Lord Cowley added that he was charged to express to the French Government all the regret that the Commission felt at the delay.

Twenty of the political prisoners transported to Algiers have received pardons from the Prince President.

UNITED STATES.

The advices from New York this week are dated the 14th inst.

From Congress we learn that the Senate had, on the 13th, passed the bill for the better security of the lives of passengers on vessels propelled in whole or part by steam.

The House of Representatives had passed, by a small majority, the bill giving an additional grant of money to the Collins line of mail steamers

The Hon. J. P. Kenney had accepted the Secretaryship of the United States Navy.

The item of "fatal accidents," with the details on a gigantic scale again recurs with painful frequency in the present advices. Thus we have noticed another steam-boat accident—a collision on Lake Erie—attended with the loss of 15 lives, on the 12th inst., near Cleveland; and a loss of life and property at Baltimore by a freshet, the extent of the damage done being 80,000 dollars; while at Covington a similar cause was attended with destruction of property to the amount of 35,000 dollars. Property valued at 300,000 dollars was destroyed by fire at Boston on the 10th, and several persons were killed. A violent hailstorm occurred at Fulton on the 10th, which destroyed a large quantity of growing corn. It is said that the hailstones were as large as pigeons' eggs.

From Cuba we learn that the Rio Grande by the disturbances prevailed to an anarchical extent. A boat had been robbed and some of its crew shot by a party of robbers under the command of Pedro Villareal, who holds a commission from General Avalos. A collision between this party and the citizens had been narrowly avoided.

A public meeting was about to be held in New York, to take into consideration measures for the relief of the sufferers by the Montreal fire. The total number of buildings destroyed by the conflagration was from 1200 to 1500, including chiefly those occupied by the poorer classes in the suburbs of the city. The Quebec suburbs were almost entirely destroyed. It was estimated that nearly 5000 persons had been rendered houseless by this calamity. The loss was variously estimated at from 3,000,000 to 4,000,000 dollars. The fire originated, it was believed, in a baker's shop. The Government had placed at the disposal of the committee appointed for the immediate relief of the sufferers a sum of £2500.

THE SUPPLY OF WATER IN PARIS.

Paris is divided into two distinct zones for the distribution of water. All the lower portion, that is to say four-fifths of Paris, might be supplied by the water of the Canal de l'Ourcq, arriving naturally from its own weight without the aid of machines and the expense of fuel. This is the first zone. The other portion, less important as to extent, cannot receive the water except by artificial means; on the left bank, it comprises the Montagne Ste. Geneviève and the neighbouring quarters, which are supplied by the waters of Arcueil, the well of Grenelle, and the forcing pump of Notre Dame. On the right bank, the second zone forms the line running parallel to the octroi wall; these are the richest and best-built quarters of the capital, yet they are the worst supplied with water from the Seine. The forcing pump at Chaillot gives a very insufficient supply. Wanting the means of action either on account of the small number of its pipes or of their small size, the city of Paris cannot utilise the mass of water which it has a right to draw from the canal de l'Ourcq. In fact, according to the agreements entered into in 1818 and 1851 between the company having the concession of the canal and the administration, 5000 inches of water may be taken as it may be required by the engineers, at 25 metres above the level of the Seine, and in all seasons of the year, to be used by the public fountains, or any other mode of distribution in the interior of Paris. Out of these 5000 inches, scarcely more than from 1400 to 1600 inches have been used during the greatest heats of summer, in consequence of the insufficiency of the means of distribution which we have just enumerated. In presence of the inconveniences which every day arise from this and state of things, in the simultaneous service of the fountains at the corners of streets, the watering and the public fountains, the city has decided on utilising all the water it can draw from the Canal de l'Ourcq. For this purpose the three reservoirs of the left bank—Vaugirard, Rochefort, and St. Victor—the supply of which, in consequence of the narrowness of the pipes, is not sufficient for those populous quarters, will be united to the aqueduct by large pipes of 50 centimetres. Thanks to this system the reservoirs will be always full, and in a state to supply uninterruptedly the accessory pipes which convey the water into the different streets of Paris. As to the right bank, a reservoir capable of containing 1800 cubic metres of water will be made at Chaillot, and new pipes will supply all those parts in which the distribution has been hitherto insufficient. As far as regards the second zone of Paris, a part lower than the level of the Canal de l'Ourcq, which is supplied by the waters of the seine, the new machines at Chaillot will convey to it 1400 to 1600 inches of water, instead of from 400 to 500, which are now distributed by the old machines. The works for the execution of these improvements will entail an expense of 2,800,000f., viz.:—

Distribution of the water of the Ourcq	..	1,300,000 fr
Do do the Seine	..	1,500,000 fr

In adopting this vast system in principle, and in devoting to it a first outlay of 300,000 francs on the budget of 1852, the city has come to an end that it would be a productive expense, and that the sacrifices which it was obliged to make would not be onerous for its budget. In fact, after provision for the service of the fountains at the corners of the streets, and the monumental fountains, the city now derives from the sale of its water a revenue of nearly 1,300,000 francs. This is a revenue which is every day increasing, and which will be still further increased by the ameliorations we have just spoken of. The receipts for the sale of water in

1830 were	..	..	..	875 641 fr
1840 were	..	..	..	945 271 fr
1848 were	..	..	..	1,265 488 fr
1851 were	..	..	..	1,367,300 fr

The amount of the receipts every year increases. Out of 35,000 houses, 6000 at the most have taken concessions; and this number will certainly augment as soon as the city can offer water to the proprietors of houses in every quarter. These are useful expenses; they will turn to the profit of the finances of the city, and to the comfort of the inhabitants; they will compete, with the new system of sewers now in use, an *ensemble* of desirable improvements.—*Journal des Débats.*

THE TRUE VALUE OF A PASSPORT.—According to advices from Berlin, of the 25th inst., the Prussian police at Oldenburgh have made the discovery of a sort of wholesale manufacturer of false passports, in the person of an individual giving himself out as a travelling artist, or dealer in specimens of art. He was arrested at Bremen, and, among other articles, eighteen false seals of different public authorities were found in his possession. The man appears to have been connected with a variety of swindlers and robbers, to whom he furnished passports from different States, all apparently issued and sealed with perfect regularity.

ASYLUM FOR NOBLE LADIES AT ST. PETERSBURGH.—The official journal of the Imperial Government of St. Petersburgh, published on the 13th instant the regulations for the newly-endowed asylum for unmarried ladies of noble birth. None are admitted under the age of forty years, unless they are in a sickly state of health. The expenses of this institution are defrayed entirely by the Crown. The ladies are divided into three classes. The first are those who have devoted at least fifteen years as class ladies' superintendents, or inspectors of female government schools, and have received the order of St. Mary as an acknowledgment of faithful services. The second class comprises those who have been educated either in Government institutions or at home, and have devoted at least twenty years to instruction either in private schools or in families, and can bring high testimonials. The third class comprises those ladies whose fathers have served with honour as assessors of colleges, or have attained at least the rank of major, and who, either on account of advanced age, bad health, the early death of their parents or other most satisfactory relations, are without any resources, and incapable of earning their own subsistence. A few pensioners will be received into the asylum, on payment of 150 silver roubles per annum.

SHOCKING COLLIERY ACCIDENT.—About half-past nine o'clock on Tuesday morning four of the colliers who had been working at one of the pits of the Right Hon. Lord Muddleton, O.C Radford, about two miles from Nottingham, observed that a portion of the roof was falling (for the purpose of drawing up and letting down the men), to be taken to the top of the pit. Everything appeared secure; when, however, they had reached a height of between forty and fifty feet, the rope to which the cage was attached suddenly snapped, and the whole of the unfortunate men were hurled to the bottom of the pit. It was an hour before they could be got out. They were shockingly bruised, and their recovery is considered very doubtful. Their names are William Sanger, John Husbands, and William Robinson. The men are all married, and have families. The pit is 87 yards deep.

DESTRUCTION OF THE RAILWAY STOREHOUSE AT ASHFORD.—An extensive fire, involving a loss of upwards of £16,000 occurred on Saturday last, at the extensive store warehouse belonging to the South-Eastern Railway Company, adjoining the station at Ashford. It broke out shortly after one o'clock in noon, and, before the officials were aware of its existence, the flames had spread throughout the interior of the building. No portion of the storehouse was saved, and every article of property it contained was consumed. It is stated that none of the property was insured.

THE LATE ACCIDENT AT STOCKTON-ON-TEES.—Mr. Grainger, of Edinburgh, the civil engineer, who sustained a compound fracture of the leg in the collision on the Leeds Northern Railway last Wednesday week, has died from the effects of the injury He was insured against railway accidents for the sum of £1000, by the Railway Passengers' Assurance Company, and the amount is now payable to his relatives. On Monday an inquest was held on the body of this deceased gentleman, at which evidence was given inculpating the driver of the goods-train for not stopping in time to prevent the collision with the passenger train, he having been warned by the usual signal to do so. The jury returned a verdict of "Manslaughter" against the driver of the goods-train, whose name is George Welborne.

THE ELECTIONS.

THE elections have been almost brought to a close this week, one or two in Ireland only being yet undecided.

At the election for the county Clare we regret to find that there has been a serious loss of life. The unfortunate occurrence took place at Six-mile Bridge, a village where there was a polling booth, to which a Mr. Delmege, a county magistrate, was leading a party of electors under the escort of a detachment of soldiers of the 31st Regiment, the object being to prevent their being tampered with by the agents of the Liberal party. The crowd of people assembled on the occasion hooted the electors and threw stones both at them and the troops, and a riot ensued, in the course of which the soldiers, it is said, without orders, and for the purpo e of self-defence, fired upon the crowd, killing six persons and wounding several others.

The general result of the elections in Ireland has been unfavourable to the Derby Administration; for both in Ireland and Great Britain the classification of the members of the new Parliament, has been necessarily very loose, and nothing beyond a highly probable and general result can yet be stated with any degree of certainty. That result appears to be opposed to the Government of the Earl of Derby.

Amongst the more distinguished members of the late Parliament who find themselves excluded from the new House of Commons is Sir George Grey, the late Home Secretary. The right hon. baronet had been a candidate for North Northumberland. The official declaration of the poll for that county was made at Alnwick on Monday, when the following was declared to be the result:—

Lord Lovaine ..	..	1414
Lord Ossulston	..	1338
Sir George Grey	..	1300

The right hon. baronet, in the course of his observations from the hustings, after the declaration of the poll, confined himself to adverting to the result of the contest without entering upon any political statement whatever. The right hon. gentleman took his defeat cheerfully. He said:—

Considering the circumstances under which this battle has been fought, considering the immense amount of territorial influence which has been exerted against me, we have no cause for being disheartened or dispirited. (Cheers.) For myself as an individual, I feel honoured and gratified by the large number of votes, which, under these circumstances, have been recorded in my favour —(Loud cheers)—and still more honoured and gratified personally do I feel, if you will allow me to say so, by the warm, hearty, and spontaneous demonstrations of regard and esteem with which, in the hour of defeat, I have been greeted, in a manner and to an extent which I could not have anticipated, and for which I can only express my most heartfelt gratitude. (Cheers.) This is the best reward which, on resigning his trust into the hands of his constituents, one who represents you can expect or receive for the attempt at least faithfully and honourably, to discharge the duties confided to him; and it is no small satisfaction for me to know that, subjected as my past conduct, as your representative, has been to the severest scrutiny, nothing has been laid to my charge except a conscientious adherence to the policy which here and elsewhere I have always openly avowed—a policy which has been alleged, I think erroneously, as injurious to the agricultural interest, but a policy which is now admitted, at all events, by our opponents themselves, to be irrevocable, because it has been ratified by the almost unanimous voice of the people of this country.

The following are the returns of the elections which have taken place since our last publication:—

SIR JAMES GRAHAM AND THE ELECTORS OF CUMBERLAND.

On Monday last Sir James Graham delivered a political address of a congratulatory and triumphant tone at Carlisle on the occasion of a public dinner given there to celebrate the success of the Liberal candidates at the recent elections both for the county and borough.

The dinner took place in a spacious marquee erected for the purpose in Victoria-place, Carlisle; and the hon. gentlemen, whose election was celebrated on the occasion, were Messrs. Howard and Marshall for East Cumberland and James Graham and Mr. Ferguson for the city of Carlisle. The company numbered about 500, and included most of the leading Reformers in the counties of Cumberland and Westmoreland. The chair was occupied by Mr. Henry Hodgson, of Greystoke, chairman of the Liberal committee for East Cumberland; and the vice-chair was filled by Mr. G. G. Mounsey, of Castletown, who holds a similar office in connexion with the Reform committee for Carlisle. At the chairman's table there were—Sir J. R. G. Graham, Bart., M.P., of Netherby; the Hon. C. Howard, M.P., Mr. W Marshall, M.P., Mr. Joseph Ferguson, M.P., Mr. W. B. Beaumont, M.P., Mr. P. H. Howard, late M.P. for Carlisle; Mr. John Dixon, formerly M.P. for Carlisle; Mr. Thomas Nelson, mayor of Carlisle; Mr. George Moore, Bow Churchyard, London; Mr. W. Crackenthorpe, Newbiggin Hall; Mr. F. L. B. Dykes, Dovenby Hall; Mr. G. W. Hartley, and Mr. Thomas Elliott.

Sir James Graham, in the course of his observations, referred to the policy of Free Trade established by the late Sir R. Peel; and to the position of the Protectionist cause at the present time, in the following terms:—

Many kind observations have been made with regard to the Free Trade policy which I have advocated to the best of my ability. It has been said, would that that great individual with whom I had the honour of serving, to whom this country is under eternal obligation, and whose name will go down to posterity in connexion with the great good which he rendered his country—it has been said, would that he were here to see the events of the last general election. Would, indeed, that he had been here! But, rejoicing in my conjunction with him in the passing of those measures, and feeling the fondest interest in his memory, I say that the utmost desire of his heart would have been satisfied by the appeal which has been made on the present occasion to her Majesty's people. (Loud cheers.) He was of opinion that the change which he made in the policy of this country was essential for the happiness of the people; and he told me after leaving office, that there was no effort he would not make, and no political combination into which he was not willing to enter, to render that policy safe; (Loud cheers). With respect to persons, I consider it a secondary question; but we have a strong proof, not only in Carlisle and East Cumberland, but throughout the United Kingdom, of the earnest desire of the people to maintain our commercial policy. (Cheers.) Protection is dead. (Loud cheers.) Free Trade is safe—(cheers)—and that policy, let who will be the Minister, never can be reversed in this country. (Reiterated cheering.)

Adverting to the views and presumed policy of the Earl of Derby's Administration, and to the question of the support to be given to that Government, the right hon. Baronet observed:—

Lord Derby has expressed his great fear of the extreme danger arising from the spread of democratic principles; and it has been said that it he is not maintained in office the danger will be very great indeed. I have no such great alarm at the spread of democracy. (Loud cheers.) I have seen the conduct of the electors and people of Carlisle, and I have also seen the conduct of the electors of East Cumberland, and, besides, I have seen the conduct of the nue electors during this contest, and, whatever apprehensions I may have had previously of the effects of democracy, they are very much mitigated now. (Loud cheers.) I must say to any person dreading an increase of the power of the people, that Lord Derby, during the period he has held office, has done more to give a sudden and violent spur to the popular party than any man in this country for the last twenty years; and I know—not that I am disposed to find fault—that the very first act of that Government was to make in one day eighty-five Privy Councillors to raise men to the highest ranks who had never held office before, and who were altogether wanting in experience. (Hear, hear.) I do not say that I find fault with that act; but I do say that what has been done once may be done again; and I say that it was an ingenious stride to the Democratic government. (Cheers.) The right hon. Baronet then proceeded to speak of the proposal of the Derby Government for the extension of the suffrage by the enfranchisement of the million. He said that was a proposal of a Socialist character. It is not education, it is not property, it is not successful industry they propose to regard, but it was dealing with the numbskit class first—from the whole breath of universal suffrage, without any of the advantages or the safe grounds that usually accompany it. The only proposal they have made to extend the suffrage was to give it to householders—to mere men who have not the courage to take a penny a day for two years, and to subject themselves to martial law for two years; and you are aware of the case of persons who would be willing to submit to that test. (Cheers.) I believe I have never told you that I would not be satisfied that the ballot would afford a safeguard against bribery, although against intimidation it might be useful. But I say to those in power: "You must be careful not to overstrain your power, otherwise the ballot will become universal throughout this country." (Loud cheers.) We are told that never upon any former occasion was influence used so harshly or so extremely as in the last general election. In all the outposts and boroughs where Government influence is strong. (Hear, hear.) Now we have counties ranged age st cities and we have large communities and large cities ranged against boroughs. I tell you that I have great respect for the people of this country. I have the strongest feelings that their deliberate sentiments must be carried, and prevail in the councils of this nation; but I tell you that I would never submit to the decision of the people of this country—(hear, hear)—that what I thought right I would propose. (Cheers.) I would stand by it. I would fall by it. (Renewed cheering.) Never would I say, "I throw the question of peace or war before the people of this country. I desire Protection, and can get it, but if the people are against it, I become the party to carry out the principles of Free Trade against my own private opinions." (Hear, hear.) This was what was propounded to the people; but this is a cause which paid a regard to democratic power, dangerous, in my opinion, in the extreme. (Hear, hear.) I do not abandon he is bound to propose a repeal of the Corn Laws. (Loud cheers.) Then we have Lord Derby, who says he entertains the opinion—an individual opinion entertained by a Prime Minister—that a duty should be imposed on corn, but it the people of this country think otherwise, he says, "I leave it to my Chancellor or the Exchequer to devise a method of rendering an equivalent by a revision of taxation." We are too far north to be led astray. (Laughter and applause.) It is not the word "Protection" to which we object, but it is the thing itself. (Loud cheers.) A friend of mine has most aptly described what it is. It is neither more nor less than an old-fashioned attempt to imp

MARSHAL EXELMANS.

HENRY JOSEPH ISIDORE EXELMANS, a Marshal of France and Grand Chancellor of the Legion of Honour, was born on the 13th of November, 1775, at Bar-le-Duc, in the chief town of the department of the Meuse in Lorraine. He joined the army very young, and distinguished himself in the 2d battalion of the Meuse under the orders of General Oudinot in 1799. Shortly afterwards he was attached to the person of Murat as his aide-de-camp, and their intimacy continued almost uninterruptedly until the close of Joachim Murat's adventurous and ill-starred career. At the opening of the campaign of Austerlitz he displayed extraordinary bravery at the affair of Wertingen, previous to the capitulation of Ulm. The Austrians were at dinner in a hamlet in advance of Wertingen when the advance of the French was announced. They sprang on their horses and rallied their men, whose fire checked the advance of the enemy. At this moment Exelmans, then a mere captain of dragoons, galloped up; and his share in the

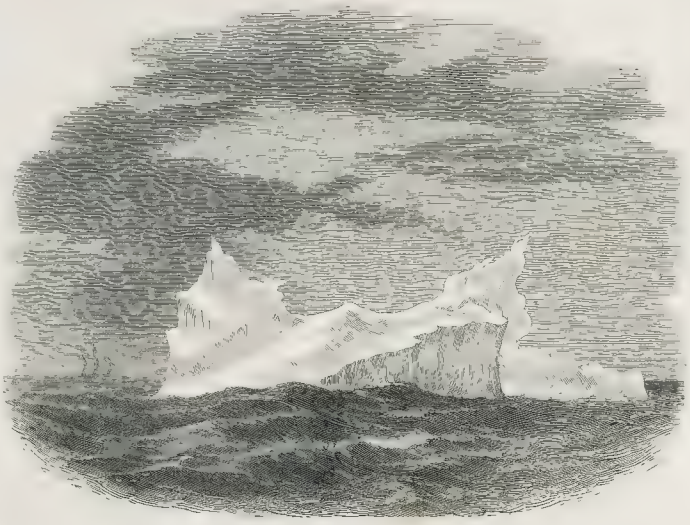
THE LATE MARSHAL EXELMANS.

honours of that day is thus recorded by the historian of the Empire:—"He dismounted, with two hundred dragoons who had volunteered, and, dashing forward with their carbines in hand, they cleared the spot of those who occupied it. Fresh detachments of dragoons came up in the meantime; the Austrians were pressed closer and closer; they were followed into Wertingen by the French, who passed through the town, and found themselves before a rising ground, with nine Austrian battalions formed into one square, not extended, but close and deep, and with artillery and cavalry on the wings. The gallant Exelmans, without a moment's delay, charged the square, and in the shock had his horse killed under him. Colonel Maupetit was killed by his side. Notwithstanding the vigour of the attack, the compact mass remained unbroken. At length Murat made his appearance with his masses of cavalry, and Lannes with the grenadiers of Oudinot. Murat charged the enemy with his squadrons; and Lannes led his grenadiers on the border of a wood in the distance to cut off the retreat of the Austrians. Two thousand prisoners, several pieces of cannon, and some flags were captured. Lannes and Murat, who had seen Exelmans actually on the point of the enemy's bayonets, commissioned him to convey to Napoleon the news of the first success obtained, and the flags taken from the enemy. The Emperor received at Donauwirth the young and brilliant officer, promoted him in the Legion of Honour, and delivered to him the insignia in the presence of the whole of the staff, in order to give greater distinction to the first recompence merited in this war."

He fought his way to the rank of General of Brigade on the field of Eylau, and shortly afterwards was sent with Murat to Spain, where he was employed in the plot of Bayonne, and conveyed the Royal family of Spain out of their dominions, not without some difficulty. Had he not been taken prisoner shortly afterwards, and detained for three years in England, General Exelmans would probably have risen earlier to the highest rank in the army. But he was exchanged in 1811, soon enough to serve in the campaign of Russia, and obtained the rank of Lieutenant-General, in September, 1812, on the day after the battle of Moscow. In this capacity he served with ability in Saxony and Silesia in the following years; especially distinguishing himself in the campaign of 1814, during which he was placed at the head of the cavalry of the Imperial Guard. He also commanded the 2d division of cavalry at Waterloo, and, as Napoleon attached the greatest importance to the fact and intelligence, as well as bravery, of those officers whom he especially selected for that arm, a higher compliment could not have been paid to the abilities of General Exelmans. After the loss of the battle he was almost the only officer in command of the scattered legions of France who appears to have retained his judgment and to have done his duty. He marched towards Paris to support the resistance of the capital, if any was made; but, finding that the war was over, he retired to Clermont-Ferrant, and sent in his submission to the King.

His active life may thus be said to have terminated before he was forty years of age, and another generation of men sprang up to wear the favours of the Court and the honours of the army. But the election of Louis Napoleon found him still in a vigorous old age. He was appointed Chancellor of the Legion of Honour by the Prince on the 16th August, 1849; and on the 2d and 3d of Dec. last Exelmans was actively engaged in securing to the Government the support of the army. He received the *bâton* of a Marshal of France the 10th of March, 1851.

He was as a man one of the best of those who followed in the train of Napoleon's fortunes, for he was without inordinate ambition, without ostentation, and without avarice. He was fondly attached to his nearest domestic connexions; and it was impossible to see his tall war-beaten form, slightly bent with age, or to watch his resolute countenance, without recognising the stamp of a soldier and a gentleman. There is something peculiarly melancholy in the abrupt termination of such a career by the stumble of a horse on a summer evening's ride from Sèvres to Bretenil, yet it is still more remarkable how many of the companions in arms of Napoleon, who escaped in early life the perils of innumerable battles, have died at last by more vulgar accidents. Marshal Exelmans's death occurred, as stated, from a fall from his horse on the 21st inst.



ICEBERG PASSED BY THE SHIP "NORTHUMBERLAND," ON HER PASSAGE ROUND CAPE HORN.

REMARKABLE ICEBERG.

ICEBERGS, it is well known, assume a variety of fantastic forms, of which the Berg here engraved is a curious specimen, passed by the ship *Northumberland*, Captain M'Kerlie, on her passage round Cape Horn from Victoria to London in March last. Its height is stated at 500 feet; but it must be remembered that when compact ice floats in water, the portion under the surface is about nine times as great as that above it; hence icebergs may sometimes descend to a great depth, though they should be far from consisting of very compact ice. Sometimes these huge mountains stand in majestic solitude; at other times they float in widely-spread groups or extensive chains.

It would be easy to multiply instances of extraordinary icebergs. On May 16, 1842, Captain A. Eyrie, in the *Acadia*, in lat. 46°, lon. 47°, saw, among about a hundred icebergs, one from 400 to 500 feet high, bearing so strong a resemblance to St. Paul's Cathedral, that it was at once so named by the crew and passengers: the dome was perfect; and it required no extraordinary stretch of the imagination to supply the *campanile* and other points of Wren's masterpiece.

SPAS OF ENGLAND.—MATLOCK-BATH, DERBYSHIRE.—(SEE PRECEDING PAGE.)

LEIGHTON BUZZARD CHURCH.

IN the great storm of Friday evening, the 16th instant, the spire of the parish church of Leighton Buzzard (so well known by travellers on the North-Western railway) was struck by lightning, and seriously injured. The electric fluid was attracted by the iron cross and weathercock on the summit; and, striking downwards from thence, displaced about twenty-five feet of the masonry; but from that point its progress was arrested by the conductor, and no further damage was done in this portion of the church. The massive stones, however, which fell—some few internally, but the greater portion externally—caused considerable havoc in each of the four limbs of this fine cruciform church. The chancel escaped most lightly; but the two transepts and the body of the church betray, in very many places, visible tokens of the damage done by the falling masses. Large stones dashed through the roof in all directions, carrying with them in their descent huge oaken beams and cross-rafters; and these, falling on the seats below, crushed all before them; in some instances penetrating even into the vaults beneath the flooring of the church. It is believed that the damage may be calculated at about £500; but the inhabitants of the town, naturally proud of their beautiful church, are resolved to restore it to at least its late condition, if not to take this opportunity for removing certain injudicious alterations, which tend neither to the beauty nor the convenience of the fabric.

Leighton Buzzard, in the county of Bedford, and diocese of Ely, is a peculiar and a prebendal stall in the cathedral of Lincoln. The property in the parish attached to this stall was given as far back as the time of Remigius, the first Bishop of Lincoln.

The church is a large and handsome building, cruciform in plan, with chancels, north and south transepts, nave, and aisles; and a tower and spire at the intersection, which, before the late accident, rose about 195 feet high. The greater portion of the edifice is of third pointed work, except the tower and spire, which is first pointed. In the chancel are some very good stalls, with carved *misereres*, and portions of the old Rood-screen still remain. The open oak roof of the nave is worthy of notice. Successive alterations have removed too many traces of the original building, but enough remains to reward any architectural student who may be inclined to inspect it in detail. Almost every passenger on the North-Western line

LEIGHTON BUZZARD CHURCH, INJURED BY LIGHTNING.

must have been struck with the elegance of the general appearance of the church as seen in passing, and noticed how beautifully it harmonises with the surrounding landscape.

THE NEW SILVER FLORIN.

JUST three years since, it will be recollected, a new florin was issued from her Majesty's Mint, but was almost immediately withdrawn from circulation, in consequence it was stated, of the imperfect legend of the obverse. The Mint authorities, after a lapse of three years, have just issued the amended coin, which we here engrave; and our readers will do well to compare it with the florin of 1849, engraved at page 133 of No. 337 of the ILLUSTRATED LONDON NEWS.

The new florin is a larger, or rather broader, piece than the former one; and the reverse is, if possible, in worse taste. The obverse presents the crowned bust of the Queen, with the legend in *Gothic characters!* VICTORIA D. G. BRIT. REG. F. D. MDCCCLII The reverse, an exaggeration of the absurd device which appeared on its predecessor; legend: ONE FLORIN—ONE TENTH OF A POUND.

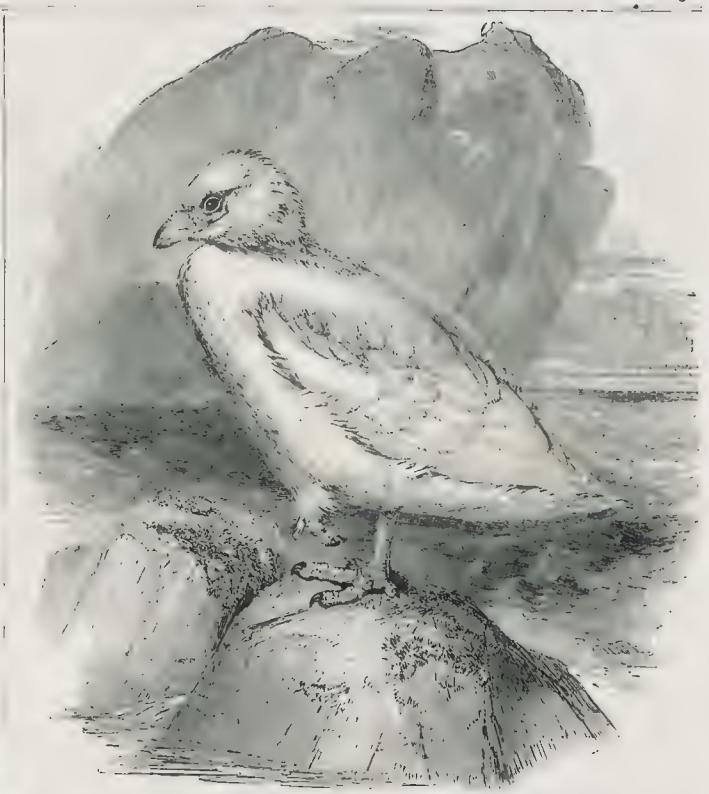
THE NEW SILVER FLORIN.

This issue of the Florin, or tenth, is noteworthy as the commencement of a decimal scheme of coinage, which, if strictly carried out, requires that the pound should be divided into tenths, hundredths, and thousandths—each represented expressly by a coin. This change is desirable; for all parties agree that if the unit, or pound sterling, were divided into 1000 parts, instead of 960, as at present, important gain in convenience would ensue.

THE SNOW-BIRD AT THE ZOOLOGICAL SOCIETY'S GARDENS, IN THE REGENT'S PARK.

AMONG the few species of birds said to have been seen on the shores of Australia, which have escaped the indefatigable research of Mr. Gould and his collectors, is the very remarkable one which has within the last few days been added to the menagerie of the Zoological Society. Although well known to navigators in the Southern Ocean since the voyage in which the naturalist Forster first observed it, the evidence of its being an occasional visitant to Australia was so uncertain that Mr. Gould has hitherto hesitated to include it in his great work. The specimen now in possession of the Zoological Society, the first which has ever been seen alive in captivity, gives some probability to the reputed fact of the species having been occasionally seen in Australia, for it flew on board a whale-ship while she was lying off Norfolk Island.

The Snow-bird (*Chionis alba*, also called Sheath-bill, from the peculiar horny sheath which covers the base of the bill) inhabits most of the islands of the Antarctic Sea, and even the southern shores of Patagonia. Mr. Darwin says that it feeds on sea-weed and shells upon the tidal rocks, and that, from some habit not easily accounted for, it is frequently met with far out at sea, although not web-footed. The vast masses of sea-weed which occasionally float upon the ocean, and perhaps the Southern icebergs, may afford sufficient resting places for a bird whose form is sufficiently buoyant to maintain it in the water as easily as a moor-hen. The Snow-bird's nearest kindred appear to be a little group of gallinaceous birds peculiar to South America, which, in many respects, closely agree with the quail in structure, and yet are so snipe-like in their habits, in their length of wing, in their flight, and in their cry, that the sportsmen in H.M.S. *Beagle*, in which Mr. Darwin sailed, "unanimously called them the Short-billed Snipe." Possessing such anomalous manners, so singular in form, and coming from so vast a distance, the Snow-bird may be considered as one of the most interesting ornithological rarities, as it is confessedly one of the most unexpected, which the society could have obtained, and we have therefore been anxious to give an illustration of it at the earliest possible period.



THE SNOW-BIRD, IN THE GARDENS OF THE ZOOLOGICAL SOCIETY.

Having accidentally visited the gardens of the Society on the day of the Snow-bird's arrival, we had an opportunity of seeing several works in progress which will add greatly to the completeness of some of the most attractive departments of the collection. The most popularly attractive of them is a spacious apartment, which has been constructed expressly for the largest reptiles, and which from the state in which we found it, will probably be completed in a fortnight. In the collection itself we found so vast an accumulation of new and beautiful objects that it seemed to us impossible to spend a summer afternoon more delightfully than to wander through the green shades of this "Atlantis realised," as Mr. Warren calls it, among the living wonders of all lands which have been so skilfully and industriously gathered together in this place, to refresh and to instruct the toil-worn minds of the inhabitants of London.

The most popularly attractive of them is a spacious apartment, which has been constructed expressly for the largest reptiles, and which from the state in which we found it, will probably be completed in a fortnight. In the collection itself we found so vast an accumulation of new and beautiful objects that it seemed to us impossible to spend a summer afternoon more delightfully than to wander through the green shades of this "Atlantis realised," as Mr. Warren calls it, among the living wonders of all lands which have been so skilfully and industriously gathered together in this place, to refresh and to instruct the toil-worn minds of the inhabitants of London.

THE CHIMPANZEES AT THE ZOOLOGICAL SOCIETY'S GARDENS.

Two Chimpanzees, one of which our Artist has portrayed, are among the most recent arrivals in the collection of the Zoological Society. They were both obtained at Sierra Leone, and owe their present healthy condition to the rapid means of communication with the African coast which is afforded by the monthly mail steamers.

The curang-outans and the chimpanzees, are the most highly organised animals in the brute creation, and have always on that account excited the greatest interest whenever they have appeared in the menageries of Europe. The chimpanzees, although generally less powerful than the ourangs, possess greater intelligence, and are probably susceptible of a considerably higher degree of education. They are at once distinguished from the ourang by their colour, which is black instead of red, and by their largely-developed ears—which although remarkably human in form, bear a much larger proportion to the size of the skull than the corresponding organ in man; while in the ourang it is considerably less. The ourangs are only found in Borneo, Sumatra, and some other islands of the Indian Archipelago. The chimpanzees are limited, in like manner, to the tropical portions of West Africa. It is not known how far they extend into the interior; but it is certain that they do not, like many other animals of that region, spread across the whole continent, from west to east, between the same parallels of latitude. It is stated by the natives of Sierra Leone and the adjoining coast that they are acquainted with two kinds of chimpanzee. It has been ascertained that, on the Gaboon, and probably on some of the other rivers which are derived from the same

CHIMPANZEE, IN THE GARDENS OF THE ZOOLOGICAL SOCIETY.

region, there exists a gigantic species, to which the name of gorilla has been given by the American missionary, Dr. Savage, who obtained the first specis of it since the days of Buffon. This tremendous giant of the woods is said by the natives to drive even the lion and the elephant from the forests in which it fixes its abode; and whenever they are successful in destroying one, the skull and bones are deposited with great ceremony in the fetish ground. The chimpanzee, when adult, attains sufficient size to be a formidable antagonist to man; and presents in that state a good miniature of the gorilla. The intellectual power of the chimpanzee is manifested by a multitude of singular actions which will strike even the most casual observer

The youngest of the chimpanzees in the Gardens is supposed to be three years old. On receiving a terrier puppy which was presented to her by a gentleman as a lap-dog, she carefully examined its teeth, and appeared to satisfy herself of their harmlessness. Less than she very much to caress it. No lady is more watchful of her Blenheim than is "Miss Jane Brown" of her terrier. She is intensely affectionate, and evinces the greatest jealousy when her keeper bestows the slightest attention either on the puppy or any other object. The terrier pet died during which it has hitherto been the possible to maintain the life of these rare and delicate aborigines of the African forest, has prevented any careful or continuous observations of their aptitude for instruction, or of the gradual development of their instinctive powers. The Society have, however, with their accustomed energy, constructed a large and airy building, in which the specimens they now possess will have some chance of being secured from the generally fatal effects of a London winter; and we hope to find them as completely at home in it as the giraffes and antelopes, not only live, but multiply, in the inclosure near the house. No bathing woman ever took more sedulous care in immersing a wayward child from the steps of a machine than does elephant mère with her lively offspring, who is compelled by the weight of the maternal trunk to remain a certain time under water, and when duly cleansed by these ablutions, to emerge and plaster herself with fluid mud.

We are glad to see that an authentic Guide book to the collection has been published by the Secretary, and is sold at various stations within the Gardens.

CALENDAR FOR THE WEEK.

SUNDAY, August 1.—Eighth Sunday after Trinity.
MONDAY, 2.—Battle of Blenheim, 1704. Lammas Day.
TUESDAY, 3.—Bank of England Incorporated, 1732.
WEDNESDAY, 4.—East India Docks opened, 1806.
THURSDAY, 5.—Lord Howe died, 1799.
FRIDAY, 6.—Prince Alfred born, 1844.
SATURDAY, 7.—Queen Caroline died, 1821.

TIMES OF HIGH WATER AT LONDON-BRIDGE.

SEVEN HUNDRED SPLENDID ENGRAVINGS.

Cases for Binding the Volume, 2s. 6d.; Reading Cases, 2s.; Portfolios, 4s. each.

Orders received by all Booksellers and Newsmen; and may be had at the Office, 198, Strand, London.

TO CORRESPONDENTS.

M A. Bromsgrove—The Accountant-General's office is in Chancery-lane

ENQUIRER, Folkstone—The statue in Whitehall Gardens is that of James II., by Gibbons

A Member of the Church will find a Memoir of the Archbishop of Canterbury in Vol 19 of the ILLUSTRATED LONDON NEWS

MERMAID—The pictures bequeathed by the late Mr Turner to the nation are at ha h nse, in Queen Anne-street, but are not yet shown to the public

W K, Worksop and New Zealand.—The office of the Colonial Land and Emigration Board is at 2, Park-street, Westminster, where information as to free passage may be obtained

JESUS HOUSE and an OLD SUBSCRIBER, Dorset, will find practical instructions in wood engraving in the "Illustrated London Drawing Book," just published

J N, Stourbridge—See the List of Prizes awarded by the Royal Agricultural Society for Implements, at their recent meeting at Lewes

A CONSTANT READER.—A prize was awarded to an economical French Alarum at the Great Exhibition

J B, Swansea—The practice of giving douceurs for Government situations is altogether illegal

J B—The *Great Britain* steam-ship was first fitted with a screw propeller

CYMRO—Wilkinson's work on South Australia gives a full picture of the agricultural capabilities of that colony

H. R., Feltham, Middlesex, will, perhaps, favour us with his name.

AN INQUIRER—A memoir of Bonington appears in Cunningham's "Lives of the British Painters," in the "Family Library"

CINDERELLA—See Brand's "Popular Antiquities," vol. 3, for Shoe Omens

ALPHA should write to the Secretary of St. Bees, Cumberland

JUVENIS—Apply, with your recommendations, by letter, to Sir Henry Ellis, British Museum, for admission to the Reading-room

ALBION refers to the "Reuters" of Drury-lane Theatre

G B—In a majority of our numbers, a showery period—which, with some latitude as to time and circumstances, may be admitted to constitute daily rain for 40 days—does come on about the time indicated by the tradition of St Swithin's Day (July 15)

O F, Liverpool—"The Greatest Plague of Life" was written by Henry and Augustus Mayhew

FANNY, Birmingham—An Oriel is that particular kind of bay-window which is made to project from the upper story of a building

A SUBSCRIBER, Cheltenham—The blue books on the Australian gold fields may be had of Mr Parkinson, Parliament Paper Office, Great Turnstile, Holborn

A SUBSCRIBER—"When Greek meets Greek" &c., is from Nat Lee's "Alexander the Great"

AN OLD SUBSCRIBER, Liverpool—All newspapers for foreign countries must be posted within seven days of their publication

B—January 1 to July 1, 1852—thirty-five Numbers at 5d, is the correct charge

A TEMPLAR informs a Recent Correspondent that by the statute so abluing the bishopric of Manchester, 9 and 10 Vic. c 108, s 2, it is enacted that the numbers of the Lords Spiritual sitting and vot ng in Parliament shall not thereby be increased, but only one bishop of Manchester and one bishop of Sodor and Man at a time

J T G—The arms of Greszbrooke: "Arg an eagle displayed gu, beaked or, on a chief sa; three bezants, each charged with a fleur-de-lis as. *Crest*: A bear's head or, muzzled as, charged on the neck with three fleurs-de-lis fessways az"

"Burke's General Armoury" is a full collection of arms

JUVENALIS In the case of the dukedom of Richmond, the Heralds have marked the illegitimacy of Charles LENNOX, the first Duke, by adding to the Royal arms "a bordure compony arg. and gu., charged with eight roses of the second, barbed and seeded ppr"

H W O—The son of English parents, though born abroad, remains for ever an Englishman

C, a SUBSCRIBER—Arms of Dryden: "Az. a lion rampant and in chief a sphere between two ogcoles, or. *Crest*: A demi lion or, sustaining in the dexter paw a sphere as in the arms"

OXON—Members of Parliament have no place, as such, in the scale of precedence. A magistrate takes precedence of a clergyman. He tors have clearly a higher precedence than curates

VERITAS—A wife's arms are impaled on the sin ster side of the husband's shield

W M P—"A female, an only child, representative of an old family," transmits her arms as a quartering to her descendants; but not her family's crest

A K—Lady Jane Grey's *arms* were, "Barry of six arg. and az., in chief three torteaux"

INQUISITOR—A Privy Councillor receives no pecuniary remuneration

A CONSTANT SUBSCRIBER—Berney or Barney bears for *Arms*, "Quarterly az and gu a cross srm. *Crest*: A gark or."

A CORRESPONDENT—In the parish church of Dursley the arms of Jacob Stiff, Esq., of Eagle House, in Lat town, a benefactor to the parish, are thus depicted: "Per chev., embattled or and az in chief two amulets, in base two tilting spears disposed saltirewise, counterchanged.

W SACKVILLE—Arms of Belknappe: "Az. three eagles in bend between two coticses arg."

X Z T—The Royal Arms of Scotland: "Or a lion rampant within a double tressure fory counterflory, gu. *Crest*: a lion sejant affronte gu, crowned or, holding in the dexter paw a sword, and in the sinister a sceptre, erect also ppr. *Supporters*: two unicorns arg., royally crowned, gorged and chained or, the dexter holding a standard of the Arms, the sinister the standard of St. Andrew: vis, Az. a Saltire arg. *Motto*: Nemo me impune lacessit; above the crest, In defence."

F T H—Arms of Hatch, of Devon: "Gu. two demi lions passant guardant couped, in pale, or

W S—W H F Gore Langton, Esq, M P, of Newton Park, county Somerset, is married to Anna-Eliza-Mary, only daughter of the present Duke of Buckingham

P Q—The marriage may take place the day after the licence is obtained

JUVENCOR—Arms of Barnes, of Cambridgeshire: "Sa two bars embattled or, in chief three besants." We cannot find or can mistake to "Barnes of Oxfordshire." Gules, of Devon, bore "Per chev. arg. and az. a lion rampant counterchanged"

BEATRICE—The letters S P stand for "sine prole," without issue

H E, of S—The heirs to the great Jennens property haveno yet established their claims. William Jennens, of Acton-place, Suffolk, who left the vast wealth to which our Correspondent refers, is stated to have been the richest subject of his time. He was born in 1702, and died at the age of 96, in 1798. His father, Robert Jennens, aide-de-camp to John Duke of Marlborough, was son of Humphrey, Jennens, an eminent iron-master of Birmingham. William Jennens, whose life was a long course of miserly accumulation, had property in almost every fund, and always kept a balance of £50,000 in his banker's hands, although he did not during the last fourteen years of his life draw a single draft. A will was found in his coat pocket, sealed but not signed, which was owing, as his favourite servant stated, to his master leaving his spectacles at home when he went to his so-lor for the purpose of duly executing it

ARMIGER—The servants of deputy-lieutenants may wear the cockade in their hats

P—Apply by letter to the head of Winchester College

M D—Nell Gwyn was never ennobled. She died plain "Mistress Eleanor Gwyn," Nov 17, 1687, in her 38th year. Her son, by King Charles, was created Duke of St Albans in her lifetime, viz. 10th Jan, 1683 84

S, Swansea—Marshal Soult died 26th November, 1851. The Earl of Shaftesbury (previously known by the courtesy title of Lord Ashley) succeeded his father 21 June, 1851. The Prince of Wales was created Earl of Dublin by patent bearing date 10th September, 1841

PAMMAS—An appointment in the Corps of Gentlemen-at-Arms is obtained by purchase. Apply at the Lord Chamberlain's Office

JULIUS—Tickets to view the state apartments, Windsor Castle, may be had gratis of the principal printsellers; and to view the House of Lords, at the office, New Palace-yard

A Single Copy of any Number a month after the date of publication is charged *One Shilling*; and may be sent free, by Post, to all parts of the United Kingdom.

Office, 198, Strand, June 25, 1852.

WITH THIS WEEK'S "ILLUSTRATED LONDON NEWS" IS PUBLISHED A SUPPLEMENT, GRATIS.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, JULY 31, 1852.

A DOCUMENT has found its way into the public journals of this country, which is likely to create considerable stir in all parts of Europe; but especially in France. It purports to be the minutes of a secret treaty agreed upon between the Emperors of Russia and Austria and the King of Prussia, bearing date the 20th of May, and subsequently signed, ratified, and exchanged. The object of the treaty is to settle the course to be pursued should Louis Napoleon declare or cause himself to be declared hereditary Emperor of the French. The high contracting parties are, it appears, willing to recognise him, if he should be elected Emperor for life; considering that title to be in no essential respect different from the one which he now holds; but this recognition is to be simply that of a Government *de facto*, and only on condition that he respects the international treaties of Europe, that he makes no attempt to extend the boundaries of France, and that he formally renounces all pretensions to the founding or continuation of a dynasty. The three Powers will not, however, recognise his power — even as a power *de facto* — if he be declared by himself, or by others, hereditary Emperor. In that case, they will address a protest to the French, as well as to all the other European Governments, and will afterwards consult, according to the circumstances, as to the ulterior measures which they may think it necessary to take. In the case that a popular or a military movement should overturn the Government of Louis Napoleon, or simply in the case of the death of that personage, the Powers bind and oblige themselves to aid and favour by all means in their power the restoration of the legitimate heir of the Crown, the Count de Chambord.

We do not yet know what effect the publication of this State paper, if it be a genuine one, will produce in France. Possibly, it may cause Louis Napoleon to ponder well on the serious difficulties that yet impede the realisation of a project which no disavowal on his part will cause the world to believe that he has not formed. Possibly, too, it may have the effect, by no means intended by its framers, of exasperating the military spirit of the French. By daring him to do a certain act under the penalty of such high displeasure, the document may actually make it easier for Louis Napoleon to seize the Imperial diadem, and to plunge into the Imperial robes. If the treaty be genuine, as there appears some reason to believe, though quite as much to doubt, it is well that this country is not a party to it. We have nothing to do with the antiquity or the legitimate heirship of the Count de Chambord; or with the decision of the French people with regard to Louis Napoleon, except to respect it as a fact, and to wish them well out of all the fast-coming troubles in which the unhappy revolution of 1848 has involved them.

THE Income and Property Tax is one of those subjects, the revision of which does not merely "loom in the future," but has assumed the shape of a more palpably defined reality. The draughts

of the report and resolutions respectively submitted for consideration by Mr. Hume, Mr. Sotheron, and Colonel Romilly, have just been published. Although neither of them was adopted by the committee, and although for this reason they are less important than they would otherwise have been, the arguments upon the subject are devoid neither of interest in themselves nor of a certain gravity, due alike to the position of the reporters and to the inherent importance of the subject. Mr. Hume's proposed report is the most elaborate, exhaustive, and complete; Mr. Sotheron's is as sensible, though more terse and general; while Colonel Romilly's means nothing at all but an expression of incompetence to come to a satisfactory conclusion on the evidence before it. Mr. Hume considers the tax objectionable because it fixes an arbitrary line of £150 per annum, below which it relieves both income and property from the operation of the tax, and because it establishes no difference in degree between realised property and the perishable income that depends on sanity, health, caprice, and life. In these respects Mr. Hume's reasoning is solid and unanswerable, and in accordance with the public sentiment. Mr. Sotheron, while he admits principles the same as those put forth by Mr. Hume, is of opinion that the remedy is difficult, and asserts that no method has been suggested of capitalising income so as to remove all cause of complaint which is not of itself open to grave objections. The only suggestion which he himself offers is, that realised capital should stand towards temporary income in the proportion of four to three, in the sums it is called upon to contribute to the State—a manifest improvement, no doubt, upon the existing system. Whether it would be entirely satisfactory to the earners of income is another question, which we are not now called upon to discuss. In despair of agreeing to a report before the dissolution of Parliament, the committee, on the suggestion of Mr. Disraeli, agreed to separate without one, and contented themselves with printing, for the use of the next Parliament, the evidence they had taken. Here, therefore, the matter at present rests; and Mr. Disraeli—if destined to remain in office, will find, at no distant day, that this particular question will be among the very first that he must dispose of. In the meantime the unanswerable report of Mr. Hume will, we have no doubt, produce considerable effect upon public opinion. If the tax remain, it must be rendered a just one. At present it is but the teacher of fraud and evasion. The Government commits injustice in refusing to remedy a palpable grievance upon the owners of income; and these, finding all hope of redress to be vain, take the remedy into their own hands, and cheat the Government. This is not a state of things that should be allowed to continue.

COURT AND HAUT TON.

THE COURT AT OSBORNE.

In our last we gave some details of her Majesty's cruise along the western coast, and the visit to Mount Edgcumbe.

On Friday the Royal party returned to Osborne.

It is understood that the Queen and Prince Consort will shortly resume their marine course, and that the route will be eastward

On Wednesday evening last her Majesty, the Prince Consort, and the Princess Alice and Princess Helena, drove over to Carisbrooke Castle.

Her Serene Highness the Princess Hohhenloe Langenhourg, accompanied by her son and daughter, arrived in town last week from Calais, and has since been on a visit to her Royal Highness the Duchess of Kent at Frogmore

Their Imperial Highnesses the Prince and Princess of Oldenburg and suite have arrived in London from Boulogne.

The appointment of Governess of the young Christian Princess of Coorg has, we understand, been transferred to the Viscountess Hardinge, who will assume the charge after the departure of the Rajah, which is at present fixed for autumn.

The Earl of Derby was among the members of the aristocracy who visited Goodwood during the week on the occasion of the races.

Viscount and Viscountess Palmerston have left town, on a visit to their Irish estate.

A marriage will shortly take place between the Lady Frances Hay, third daughter of the Earl and Countess of Kinnoull, and Captain Lloyd, of Aston Hall, Salop.

GOLD FROM AUSTRALIA.—Yesterday Mr. Arthur Herring had the honour of an audience at Osborne (introduced by Sir John Pakington), to submit to her Majesty's inspection a mass of pure gold, the largest yet brought from Australia, and engraved in the ILLUSTRATED LONDON NEWS for July 10.

CONVERSAZIONE OF THE ROYAL ACADEMY.—On Wednesday evening the Exhibition-rooms of the Royal Academy were brilliantly lighted up for a grand reception, given by the President and Council, to a numerous assembly of distinguished persons connected with the fine arts. Over 1500 invitations were issued and the attendance fell little short of that number. The effect of the fine suite of rooms with the grand staircase and hall gorgeously lighted up and crowded with more than 3000 persons, a great number of elegantly-dressed ladies, was truly magnificent. His Grace the Duke of Wellington arrived about ten, and remained about an hour—going attentively over the pictures of the different rooms accompanied by the President and Mr. Hardwick, R.A. Among the Royal Academicians present were Sir Charles Barry, Sir Edwin Landseer, Sir Richard Westmacott, Sir William Ross, Messrs. Herbert, Eastlake, Cresswell, Grant, Leslie, Stanfield, Cockerell, &c. The greater number of the Associates were present, and most of the exhibitors this season. The urbanity of the accomplished President, Sir Charles Eastlake, was well seconded by Mr. Knight's ready attention as secretary. Both gentlemen must congratulate themselves on the success which has attended this, their second annual reunion.

TALLOW-CHANDLERS' BENEVOLENT SOCIETY.—On Thursday the annual meeting of the society was held at the offices, Basinghall street; Benjamin Breckell Turner, Esq., in the chair. The report stated that during the nine years the society had been established, 72 distressed members of the trade had had distributed among them £6177 18s. There were now 47 pensioners on the funds of the society, and it was propo ed to raise the allowances of the men from 16s. to 20s. a month, and the women from 12s. to 15s. The total income of the year, including a balance in hand of £219 from the last account, was £892; and the expenditure, including £461 12s. paid to pensioners, £538, leaving a balance in favour of the society of £354 The funded property of the society amounted to £4000. The report was adopted, and the officers for the ensuing year elected.

THE TOURS OF THE EMPEROR OF AUSTRIA.—A correspondent at Vienna supplies the Paris *Constitutionel*, the following account of the excursions of the Emperor of Austria in different parts of his territories:—"In winter and in summer, in rain and dust, by night and by day, the Emperor never travels otherwise than in an open carriage. The consequence is that his health can brave the severity of the seasons—thirty degrees centigrade of heat as well as sixteen of cold. The journeys he is at present making in Hungary must be very fatiguing, as the Hungarian roads are in this season as full of dust as those of Frohsee. Add to that inconvenience the enthusiasm of gentlemen and peasants, who in all parts accompany the Emperor on horseback, and form sometimes an escort of 3000 horsemen, and you will have an exact idea of the fatigues of such travell ng, wh-n you know that the Emperor can only support galloping. The suite of his Majesty consists of 124 persons, and of 40 carriages or vans. In the first carriage is the Emperor and his first aide-de-camp, Count Grune, one of the bravest generals and one of the most distinguished men of the monarchy. In the others are the secretaries, the treasurers, and the principal officers of the Imperial household. Then come the vehicles containing the baggage and provisions. The kitchen service, which, on account of the scant resources of certain districts in Hungary, accompanies the Emperor, is in three divisions, which the principal inspector, a Frenchman of reason, M Martin, employs each day with so much intelligence, that the Emperor and his suite get, wherever they go, a complete dinner, accompanied by the most famous wines of France. 'It often happens,' said M Martin to me at Pesth, 'that when my first division arrives at the place indicated for the meal, we have not anything at all ready—the fowls being plucking corn in the fields, the sheep grazing in the meadows, and the oxen feeding in the stables. But four hours after the tables are served, and our two services are ready with all the luxury of the capital.' Every morning, on starting, every person, and the Emperor himself, receives in a tin box the day's ration, consisting of cold meat and *pâté*, a bottle of Bordeaux and one of champagne. We have said that his Majesty's suite consists of 120 persons: judge from that of the importance of the ordinary service. On arriving at any place, the Emperor, after having placed his toilette in order, takes his place at table, and afterwards receives deputations and the petitions of the peasants. The ceremonies are often prolonged to midnight. Francis Joseph never gives more than five hours to sleep; but it often happens in the course of the day that he causes all the doors and windows of the apartments he occupies to be closed, and throws himself on a sofa. Half an hour after he rises as fresh as if he had slept all night. An indefatigable worker, he does everything and sees everything by himself. In the young Sovereign of 21 there is the stuff of a great man."

POSTSCRIPT.

STATISTICS OF THE POPULATION.—On Thursday the return of births, deaths, and marriages for the quarter ending June 30, 1852, was published by authority of the Registrar-General. It comprises the births and deaths registered by 1200 registrars in all the districts of England during the spring quarter, and the marriages in more than 12,000 churches or chapels, about [illegible] superintendent Registrars' offices, in the quarter that ended [illegible] 1852. The general results of the return are not unsatisfactory; the marriages exceed the average number, the births are above, the deaths are but slight y above the average of the season.

A SCENE IN THE COURT OF CHANCERY.—On Friday morning, before the sitting of the Court, the well-known Captain Ackerley took up his position directly in front of the Lord Chancellor's chair, and was accompanied by a dark person, apparently an Indian chief, who was decorated with steel plates, bands, and various other outlandish articles. Upon his lordship taking his seat, Captain Ackerley (who had a constable's *baton* in his hand), addressing the Lord Chancellor, said he appeared there on the part of the Crown, as interpreter for the man (pointing to the Indian). The Lord Chancellor: Who are you? Captain Ackerley: I appear on the part of the Crown. (Turning to the Indian). Put your petition on the table, and say, there is my petition. The Indian obeyed, and placed the petition on the table. The Lord Chancellor: Hold your tongue. After various unsuccessful efforts to speak, the gallant Captain and his sable companion were forcibly ejected by the ushers from the court.

ASIATIC CHOLERA.—By a correspondent we learn that cholera has again broken out in a most virulent form on the frontiers of the kingdom of Warsaw, and that between forty and fifty cases have occurred within the space two days in the city of Warsaw. The cholera likewise made its appearance on the 10th at Posen, in the grand Duchy of Posen, and in ten days it carried off seventy persons out of twenty-two who were attacked.

THE GREAT EXHIBITION CERTIFICATES.—Proofs of the engraved certificates about to be issued to the exhibitors and others engaged in the late Exhibition, have been printed. One or these will be varied, so as to apply to the holders of prize and council medals and those of honourable mention was made in the jurors' reports, also to the jurors themselves, and will each bear a representation of the medal awarded. Another will be issued to the remainder of the exhibitors, the Royal Commissioners, executive committee, and staff, and will bear the autograph of His Royal Highness Prince Albert.

LATEST FOREIGN NEWS.

FRANCE.

According to the accounts from Paris yesterday (Friday) the Government warnings to the newspapers daily multiply, the *Journal de la Meurthe* being the last paper which has received the official rebuke. The *Independance Belge* has been stopped at the post-office, that journal containing a letter from M. Odillon Barrot addressed to the electors of the department of the Aisne, in which he declines to be put in nomination for a seat in the Council-General, upon the ground that, were he elected, he could render no good service to the country, governed "as France now is by the most absolute power that perhaps exists in the world."

With respect to the Ministerial changes, we find there is an idea prevalent that M. Fould will probably become Minister of Finance in the room of M. Bineau, who is likely to accept the office of Minister of State.

A fire broke out on Thursday in the hotel of the Minister of the Interior, which was not extinguished until it did considerable damage. M. and Madame de Persigny were both absent when the accident occurred

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—The following preferments and appointments have recently been made:—*Rectories:* The Rev. John Brown, to Kirkandrews-upon-Eden; the Rev J. Jackins, to Bawtsey; the Rev. William Haughton Stokes, to Denver, Norfolk. *Vicarages:* The Rev. John Denis Browne, to Beaconsfield; the Rev. William Harris, to Llanarthney, Carmarthenshire; the Rev. William Henry Oldfield, to St. Martin, Coney-street, York; the Rev. John Peel, to Scrivelsby, the Marsh, Lincolnshire

TESTIMONIALS.—The following clergymen have lately received testimonials of esteem and affection:—The Rev. G. W. Bramall, curate of Mansfield, on his preferment, from a large number of the more influential inhabitants; the Rev. R. P. Bakeney, from the ladies of the congregation of Bethel Church, Claughton; the Rev. W. Whitworth, from the teachers of St. James's Sunday School, Clitheroe; the Rev J. D. Brocklehurst, from a large number of friends at the Eastbrook School, Halifax; the Rev. John Brown, late curate of Bowness, from the principal inhabitants and other parishioners; when the Rev. Dr. Jeremie, Regius Professor of Divinity, resigned the posts of Dean and Professor at Halleybury, the resident students presented him with a handsome testimonial of their esteem. It is stated that the members of the Church of England in India have subscribed a sum of £450 for a similar purpose. £350 of which was laid out in a piece of plate, and the rest in books, which have been presented to Dr. Jeremie. The plate consists of a pedestal or column, supporting from the base by three figures representing Religion, Philosophy, and Literature, and surmounted by a graceful representation of a Hindoo female, symbolical of India. There are branches which may be fitted to the column when it is required to form a candelabrum.

NEW CHURCH AT CROYDON.—On Tuesday morning the Archbishop of Canterbury consecrated a new church, which has just been built by Croydon at his own charge. The parish of Croydon as now a population of 20,000, and there has hitherto been church accommodation for only 5000. The new church (Christ Church), which will accommodate 700 persons, and to which a district is to be annexed, is situated at the London end of Croydon, and has a burial-ground attached to it. The Rev. O. B. Byres is the incumbent of the new church. The sermon was preached by the Bishop of Winchester, who took for his text a passage in the 2d Epistle to the Corinthians—"If our gospel be hid, it is hid to them that are lost" After the service, many of the clergy and congregation (about 150 in all) proceeded to the Grey Lound Hotel, where Mr. Bean, the proprietor, who is one of the churchwardens, had provided an excellent *déjeuner*, which was admirably served The High Sheriff of Surrey, Mr. G. H. Smith, presided on the occasion. The health of the Archbishop of Canterbury was most respectfully and cordially received, the whole company rising to greet the much rev. prelate. His Grace acknowledged the toast in brief but appropriate language, and said, that just before he left Chester a munificent but unknown benefactor had put into his hands £5000 to apply in providing church accommodation. He had expended £4200 of that sum in the erection of a church at Brixton, and he added out of his own funds the necessary amount to the £800 that remained in order to build the present church.

NEW CHURCH.—A spacious church, with day, Sunday, and infant schools, is now in course of creation in the parish of St Anne, Limehouse, which contains a population of 30,000 inhabitants, with only one church, the interior of which was destroyed by fire, and the external gorgeously, on Good Friday, 1850, after which it was closed for upwards of two years. Miss Burdett Coutts has given £2000 towards the erection of the new church.

WINCHESTER CATHEDRAL.—The restoration of the ancient east window of Winchester Cathedral, comprising figures of our Saviour and the Virgin, St. Swithun (Bishop of Winchester, 9th century), St. John the Baptist, St. Peter, St. Andrew, and St Paul, the prophets Jeremiah and Haggai, Bishops Wykeham and Fox, Ethelwood, Henry VII., &c., has been completed.

At a Diocesan Synod held in the Brome Chapel of St. Mary's Church, Oxford, on Monday, and presided over by the Bishop of Oxford, two Proctors to represent the Order in the Lower House of Convocation, who are always appointed prior to the assembling of a new Parliament, were formally elected: they were the Rev. Henry William Mag-adie, Vicar of Speen, Berkshire, and the Rev. Robert Hussey, B D., Professor of Ecclesiastical History.

The *Cambridge Independent Press* announces that the Bishop of Ely has ordered the Rev. J. F. Bennett, M.A., Rector of Clevery, near Newmarket, to hold morning service in his church on every saint's day throughout the year, in compliance with the request of some of his Parsyits parishioners.

THE Rev. E. Bates, M.A., senior curate of St. Luke's district, parish of St. James, Westminster, and late second master of the Stoney Stanton School, in union with King's College, London, has been appointed principal of the West Riding Proprietary School, Wakefield.

EXTENSION OF THE TELEGRAPH THROUGH HYDE PARK AND PADDINGTON.—During the last few days, permission having been given by the Commissioners of Woods and Forests, workmen have been busily engaged in laying underground wires for the Electric Telegraph Company from Albert-gate, where the wires communicate with Lothbury and the Strand, through Knightsbridge-road and Hyde Park, to Paddington, so as to complete the line of communication between the metropolis and the wires on the Great Western Railway to the West of England. The wires that were laid down throughout the whole length of the late Crystal Palace have been worked so conveniently for this purpose, and are continued along the bridge over the Serpentine to Paddington, which the workmen reached on Thursday

FIRE IN LAMBETH.—On Thursday night, about ten o'clock, a fire broke out on the premises of Mr. George Thomas White, cabinet-maker, &c., at No. 47, Hercules-buildings, in the Westminster-road, Lambeth, which was not entirely subdued until it had de-troyed two workshops and their contents, a timber building belonging to Mr. West, the undertaker, and had seriously damaged the premises of Mr. Horam's oil-cloth and paper-hanging works, and the stabling of Mr Rutlell, a butcher. The property was all insured.

FATAL STEAM-BOAT ACCIDENT.—On Wednesday evening, about six o'clock, the Herne Bay Company's steam-packet *Father Thames*, from Margate and Herne Bay, when coming up the pool at full speed, ran down a boat containing five ballast-heavers, and a lighterman. They were all rescued, however, saved, with the exception of one man of the name of John Sullivan.

METROPOLITAN NEWS.

DRURY-LANE THEATRE.—The annual meeting of the proprietors of this theatre was held on Saturday last, in the saloon, to receive the report of the committee for the past year. S. B. Caldwell, Esq., M.P., presided. Mr. Dunne, the treasurer, read the report, which, after alluding to the general depression of theatrical property, stated that the theatre, owing to various adventitious circumstances, had lost little of its attraction or value. The theatre had been advertised to be let in the usual way, and tenders had already been sent in, but nothing decisive had been agreed upon. With regard to the finances, it was stated that a sum of £3492 14s. 11d. had been received, including a balance of £295 standing over from last season. The total payments were £4434 8s 9d., leaving £54 odd in favour of the proprietors. The payments included a sum of £505 7s 6d to the renters during the last season, which, however, was less than they were entitled to receive; and there was also an arrear of rent due to the Duke of Bedford, the ground landlord. The report stated, in conclusion, that Mr. Jullien and Mr. Gye had paid £1207 17s. being the full amount guaranteed in respect to their occupancy of the theatre. The report was received and adopted. Six vacancies in the committee were filled up, and the Earl of Glengall having been elected chairman of the sub-committee, the meeting separated

THE ORPHAN WORKING SCHOOL.—On Wednesday a special general meeting of the friends and subscribers to this charity, which was instituted in 1758, was held in the offices of the Institution, Lincoln's Inn, for the purpose of taking into consideration some matters relating to the copyhold property of the corporation, and upon business. Mr. T. M Coombs, the chairman, stated that the object had met to consider the terms of a proposed enfranchisement of the leasehold property of the Corporation situate at Haver-tock-hill, Hampstead, and, if thought beneficial, to sanction the same, and to authorise the trustees to effect it, and to sell the property, when entered into, in the Corporation; and also to consider the agreement entered into by the Corporation for building upon the City-road estate, and to adopt such resolutions with respect thereto as might be thought advisable. A resolution, agreeing to the above suggestion in the chairman's speech, was moved and carried *nem. con.* The report stated that there was at the present time in the school 171 boys and 87 girls. The receipts for the past year had been (including the small balance of £4 at the banker's) £9690 15s. 3d., and, after all the necessary expenses had been defrayed, there was left a balance in hand of £292 18s. 1d. Her Majesty had given 200 guineas, and Lord Southampton had promised 200 guineas.

THE SPECTACLE-MAKERS' COMPANY.—On Wednesday the worshipful Company of Spectacle makers held their annual festival at the Castle Tavern, Hendon (Wernbipful Master Hill presided on the occasion Among the distinguished members of the company present were the Right Hon. the Recorder of London, who has recently joined the Company; Sir James Duke, Bart., M.P.; Mr. Masterman, M.P.; Mr. Clarkson, the barrator, &c. It is a singular fact, that three out of the four representatives of the City of London are members of the Spectacle-makers' Company

BUILDING TRADES' BENEVOLENT SOCIETY.—The fifth annual general meeting of the friends and subscribers to this charity, which was founded for the purpose of giving relief to aged and decayed members of the building trade, was held on Thursday at the London Tavern, Bishopsgate-street; Thomas Grissell, Esq., president, in the chair. The report, which was adopted, stated that the society during the past year had made very satisfactory progress The total number of pensioners now upon the funds of the society is 19, viz 10 men and 9 women. Since the last annual meeting a new by-law had been passed, extending the benefits of the institution to the provinces, and very gratifying results had already sprung from the commencement at Brighton, where a local committee had been formed. The balance-sheet showed the total amount received to have been £1321 5s. 4d., and after all the necessary expenses had been defrayed, there was left a balance in hand of £241 12s. 6d.

ELOCUTION.—MISS. CHISHOLM.—This lady held one of her interesting evening meetings, on Monday evening, at the British Institution, Cowperstreet, City road. The meeting was crowded, and amongst those present were emigrants (295 in number) who are proceeding by the *Chalmers*, 680 tons, which sails to-morrow (Sunday) from Gravesend.

SECRETARYSHIP OF THE REFORM CLUB.—Amongst a very numerous body of candidates for the vacancy which had recently occurred in the secretaryship of the Reform Club, the salary being £400 a year, Mr. William Norway, a gentleman connected with the periodical literature of the day, has been declared the success ful one.

OBSTRUCTIONS AT THE MARBLE ARCH.—POLICE NOTICE.—The following notice has been issued by the Commissioners of Police:—"Regulations to prevent obstructions in the streets and thoroughfares near Cumberland-gate (the Marble Arch), Hyde Park:—Metropolitan stage carriages are to keep to the left, or proper side, according to the direction in which they are going, and must set down their company on that side. No metropolitan stage-carriage can be allowed to cross the street or road to Cumberland-gate, or set down there. No carriage can be allowed to stop in front of or near to Cumberland-gate, or across the entrance to a street, or at any place where an obstruction of the thoroughfare is to be caused. All drivers of carriages are to go slowly or stop when required by the police, to allow persons on horseback or walking to cross the street. RICHARD MAYNE, Commissioner of Police of the Metropolis, Whitehall, 1852." This is to obviate the great obstruction of traffic now daily caused by the stoppage of omnibusses at this immediate spot, especially since the establishment of the penny omnibuses.

SIR. MARTIN'S PAUPER EMIGRATION.—A contest which has assumed an unseemly and personal character has been for some time going on in St. Martin's parish respecting a penny rate proposed by the guardians to be levied for the purpose of promoting the emigration of paupers from that parish to Australia. On last Saturday evening an adjourned meeting of the ratepayers was held at the vestry-rooms, St. Martin's place, for the further consideration of a resolution authorising the churchwardens and overseers of the parish to levy a penny rate, amounting in the aggregate to £1000, to promote the emigration of poor persons having settlements within the said rate. The proceedings throughout were, however, of a most unpleasant character, and considerable excitement and angry feeling were displayed. The opposition to the guardians was led by Mr. Charles Cochrane, who proposed an amendment, which was a vote of censure upon the guardians, and a direct negative to the original resolution. Mr. Churchwarden Combs, the chairman, refused to put the amendment, which he declared to be a scandalous libel. Ultimately a poll was demanded on the original resolution, the result of which has not yet become known. On Tuesday night a meeting, convened by an anonymous placard, was held at the Aquarium Rooms, St. Martin's-lane, to consider, as the placard stated, the "local conduct of the guardians" The chair was occupied by Mr. Bent. Mr. Cochrane addressed the meeting in support of his views of the question at issue, and declared that he was opposed to permitting the present officials of St. Martin's parish, according to a system of emigration for paupers so long as other plans of employing those paupers at home remained untried. In conclusion, he moved a resolution, which was seconded and carried, to the effect "that the system of ratepayers already appointed wait upon Mr. Lee Bevan, to solicit his protection and assistance in emancipating St. Martin's parish from the frightful system of misrule under which it is labouring, and that Sir De L. Evans, Mr. J. Shelley, members for Westminster, be invited to accompany that deputation"

METROPOLITAN COMMISSION OF SEWERS.—On Tuesday evening a writ of *supersedeas* was received from the Lord Chancellor at the chief Sewers-office, Greville-street, Saloo, directing the old Commission of Sewers, and re-constructing it entirely. The old Commission must necessarily have expired in a very short period under the 12th and 13th Vic., chap 93, by which its duration was limited to one year from the 1st of July last; therefore, the present Chancellor's writ w s merely a formal act. The following 14 gentlemen are appointed, only five of their number having been sued to the former Commission:—Mr. R. Jebb (chairman), Mr. John Fox Burgoyne, Lieut.-Colonel Jebb, Major Graham, Mr. R. J. Mr. T. Hawes, Captain J. Veteh, R.E., Sir C. Fellowes, Mr. G. Baker, Mr. T. Field Gibson, Mr. Lewis D. B. Gordon, Mr J. Hawkshaw, Mr. W. Hosking (Officio Member under the Metropolitan Buildings Act), Mr. H. Arthur Hunt, Mr. Lawrence Redhead, and Mr. G. Spencer Smith.

ACCIDENT ON HOLBORN HILL.—On Tuesday evening, at about half-past seven, a dray belonging to Messrs. Jewson and Co., of the Yorkshire Ale Stores, heavily laden with casks, was proceeding down the declivity of Holborn-hill. When just abreast of the entrance to Shoe-lane, the horse, a very powerful one, tripped and fell; the driver, who was sitting upon the shafts, was violently flung forward, as was also his mate, and both were very severely hurt. Several individuals were knocked down by the casks, which rolled in every direction to the foot of the hill, and a very valuable horse attached to an omnibus had his knee cap severely cut and injured.

FIRE IN CHANDOS-STREET.—On Thursday morning, about ten o'clock, a very alarming fire broke out in the lower part of the house of Mr. Lonsdale, chemist and druggist, Chandos street. Charing-cross, by which much valuable property was consumed. The firemen, with their engines, from the adjoining s ation, at length succeeded in preventing the flames reaching the inflammable contents of the shop and laboratory. Insured in the Sun Fire-office

BIRTHS AND DEATHS.—The births registered in the metropolis during the week ending Saturday last (24, were 1,264—viz., 653 males, 611 females; the deaths during the same period were—Males, 488; females, 374; total, 862. The official return shows a decrease of mortality in the last week, when compared with the corresponding weeks of the last three years (1851-52-53). Fatal sickness among children, so frequent in London in the summer months, has, however, increased exceedingly. Last week 94 persons were carried off by diarrhœa, 74 in three weeks. The fatal cases from this cause in previous week. The deaths by cholera have risen from 4 to 10; those by scarlatina, from 31 to 45. Fatal cases produced by pneumonia have declined in the same time from 45 to 26; those by disease of the brain, from 35 to 19; while those referred to disease of the liver have increased from 7 to 14. Small-pox was fatal to 28 children and 5 adults.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean height of the barometer in the week was 29.873 in. The mean temperature of the week was 60 deg., which is 2.5 deg. higher than the average of the same week in ten years. The mean daily temperature was above the average on every day of the week, and was highest on Wednesday and Saturday. The wind was variable, but generally in the south-west in the first five days.

Among the acts passed in the late session was one to amend the law of evidence in Scotland. It is now provided that witnesses are not to be excluded by reason of crime, &c.

F E T E S A T S T R A S B U R G.

BENEDICTION OF THE LOCOMOTIVE ENGINES, AT THE RAILWAY TERMINUS, STRASBURG.

WE noticed fully, last week, the progress of the President of the French Republic to Strasburg, to inaugurate there the opening of the Great Eastern Railroad of France, and gave also a brief account of the festivities which the occasion called forth in the stronghold of the eastern frontier. The subject is one that calls for fuller notice; and the accompanying details, interesting in themselves, will also be found explanatory of the Illustrations with which our Artist has elucidated the more remarkable scenes of this festive display.

His "Highness the Prince President," as he has been styled for the first time on the present occasion by the Prefects of those Departments through which the Presidential progress lay, arrived at Strasburg on Sunday, the 18th inst., at half-past twelve o'clock (noon), amidst the

PROCESSION OF THE WAGGONS, AT THE PREFECTURE, STRASBURG.

FETES AT STRASBURG.

PASSAGE OF THE GREATER RHINE.

enthusiastic acclamations of the people and the authorities. A salute of 101 guns was fired as the train entered the terminus, and all the bells in the city immediately pealed forth a welcome. All the authorities of the place were assembled to receive the Prince in a magnificent pavilion erected for his accommodation.

The preparations for the ceremony of inaugurating the railway were upon the most extensive scale. At the extremity of the rails within the terminus a long platform was raised, on which an altar was erected, and along the sides of the line tribunes were to be seen, capable of holding between 3000 and 4000 persons. The pavilion above mentioned was constructed at one side of the railway, and contained a most elegant saloon for the use of the Prince and his suite. The Prince, on alighting from the state carriage, was complimented by the mayor and municipal authorities on his arrival, and was presented by them with the keys of the town, which he was pleased to return into their hands. The moment fixed for the commencement of the religious ceremony—that of blessing the locomotives—having arrived, the President took his place in a tribune on the right of the altar, with his suite and a number of the principal visitors from Paris, whilst the civil and military authorities occupied another tribune on the left side of it. In the other tribunes, at each side of the line, were seated a vast number of persons who had been admitted with tickets to witness the ceremony. The 62d Regiment was on duty inside the terminus, and their band played overtures and military pieces before the arrival of the train. Other troops of the garrison were appointed to do duty outside, in the neighbourhood of the railway. As soon as the Prince had taken his place, the Bishop, accompanied by a numerous body of the clergy, came forward and celebrated mass; after which he formally blessed the locomotives, according to the imposing ritual of the Roman Catholic Church, and then pronounced the following appropriate address (*See Illustration*):—

Monseigneur, Messieurs,—Whilst man, engrossed by the calculations o interest and the pleasures of sense, sees in these marvellous inventions of industry, which our age witnesses with so much just pride, the means of increasing his wealth and extending the circle of his enjoyments, the Christian, enlightened by faith, carries his views and his thoughts higher, and in these conceptions o human genius he beholds the means which God makes use of to accomplish His designs in favour of His people, and to conduct man to his immortal destiny.

Eighteen centuries ago the Apostle of Nations engraved on the front of the Church this sublime inscription—"One God one Faith one Baptism;" and Christ himself, explaining to His apostles and to His disciples the object of His labours and His mission, announced to them that a day would come when there should be on the earth only one pastor and one flock. Everything in the designs of God tends to constitute in the bosom of humanity that marvellous unity. "Man agitates, and God conducts him." Such is the observation of a Christian philosopher. Yes! man, a creature weak and limited, too often, alas! has no other view in his meditations and his efforts than a prosperity

THE ILLUMINATION AT STRASBURG.

material and perishable like himself; but God leads him towards regions and ideas which are unknown to him

Let us not suppose that Providence remains indifferent to that prodigious development of modern industry—to those astonishing discoveries which genius the most vast and the boldest never would have dared to foresee 50 years ago Let us not suppose that the wise and bountiful Creator will not cause that ardour for material interests which agitates the world in our day to serve the cause of truth. If distance be annihilated by industry—if the barriers that time and space oppose to its creations be broken, it also opens a way more rapid and more lasting to the conquests of the Gospel. It causes frontiers to disappear. It destroys the limits that separate nations, in order to make of them but one and the same family. It tied in charity and in the practice of Christian virtues

When God dispersed his people in all parts of the known world, the enemies of the holy nation applauded their reverses and their misfortunes; but they did not see that the dispersed children of Judah were missionaries that God sent to bear to the extremities of the universe the tidings of the coming of the Redeemer. Those magnificent roads which the Romans constructed, and which exist to this day as imperishable monuments of their grandeur and their power, what were they but the ways open to the preachers of Christ, and the missionaries of the gospel? And when Alexander led his victorious bands to the banks of the Euphrates and the Ganges, he fancied that he merely satisfied his insatiable ambition; and he did not see that he was really preparing the way for Christian truth, and transferring its progress more easy. Thus, men, whatever be their power and their genius, are but instruments of God for the accomplishment of his designs in favour of humanity.

Let, then, industry extend and multiply its powers—let it envelop the globe as with a vast network—let it command fire and steam to give to its works the rapidity of the thunderbolt—what shall it have done? Unknown to itself, it is only laboureis in the accomplishment of the divine will—it is only promoting the preaching of the gospel; the angels of peace will ascend with it on its rapid cars; they will go low it to the remotest climes, to carry to their inhabitants the good tidings of that great and holy religion, the sole of his death, demanded of his father as the price of his labour and of his sufferings.

Bless, then, O my God! bless this new way which is this day opening for the propagation of truth as well as for the prosperity of the country, and which science, united to faith, desires to place under your protection.

Bless those men who have laboured with such intelligence and devotedness to endow France with a new source of wealth, and who, after having given you such magnificent proofs of the power of their genius, give you at this moment so touching a mark of their piety by imploring on their work the benedictions of the Church

Bless all those who may use these formidable machines to traverse immense distances and to annihilate space Preserve them from all the accidents which might become fatal to their noble and generous hearts. Permit not that their material interests shall make them ever forget the interests of eternity. And, O my God! bless this magnanimous Prince who presides at the feast of inauguration, and who, after having preserved France from the disasters of anarchy, is only occupied with the care of obtaining for her the advantages of peace and the benefits of religion.

When the ceremony had concluded, the President withdrew for a short time to the pavilion, where he received a number of delegations from the adjoining towns and villages. The Prince then mounted on horseback, and, accompanied by a brilliant staff, proceeded to the hotel of the Prefecture, passing, in the midst of the greatest enthusiasm, by the Pont du Faubourg de Savarne, the Vieux-Marché-aux-Vins, the Rue de la Comédie, and the Rue Brulée. The streets were lined at each side with infantry; four squadrons of the 4th Cuirassiers and four of the 5th Lancers were also disposed at various points along the passage of the *cortège*. Strong bodies of mounted gendarmerie preceded and followed the President.

The streets of the city, thronged as they were by thousands of the peasantry of the surrounding country, in their brightly-coloured picturesque costume, and decked out with flags, garlands, and draperies, presented a most animated and gay appearance. The neighbourhood of the railway terminus and all the public squares and buildings were decorated in the most tasteful manner. Everywhere might be seen *escutcheons* bearing the initials "L.N." alternating with the arms of the city of Strasburg. Carriages and vehicles of every description were in every moment arriving from the surrounding country, with occupants eager to catch a glimpse of the President. The costume of the peasant women excited the attention of strangers from its quaint originality, consisting most frequently of a short petticoat of red or green serge, primmed with ribbon, a close-fitting corset bearing in front silver or gold embroidery, and a little cap on the back of the head.

Immediately after the Prince's arrival at the Prefecture he received the authorities and the principal inhabitants of the town. The whole passed over with perfect order, and there was delighted with the urbanity of the head of the State. At about half-past five o'clock the *cortèges* of peasants filed off before the President. It consisted of 120 cars filled with young girls, and 1200 horsemen all dressed in the costume of the country. (*See Illustration*.) On leaving the Prefecture the President the girls threw bouquets at his feet, uttering at the same time the cry of "*Vive Napoléon!*" which was taken up by the horseman, and re-echoed by the spectators. These cars were covered with ivy, branches of trees, and flowers, and as each of the inscriptions ingeniously alludes of the village which each had proceeded from. For instance, on one might be seen the words "The town of Molsheim to Louis Napoleon, who has re-established order and tranquillity"—and on another, "The town of Rosheim. We are proud of our glory! He watches over it, may he repose!" "Devotedness and gratitude!" and other phrases expressive of the pervading feeling that Louis Napoleon had saved the country from the perils of communism Each car was drawn by from four to six horses, well-caused, and clipped, and harnessed, and a body guard of young farmers, forming a democratic knighthood in honour of a popular despotism. The filing off of these rustic vehicles, filled as they were with the prettiest girls of each village, in their holiday attire, was a novel and pleasing spectacle. The costumes were rich as probably they have been for centuries past, and as each district has preserved certain peculiarities of dress, there was sufficient variety to keep attention awake, notwithstanding the rain. The prevailing colours were red, deep orange, and green. The body of the dress was generally of a darker colour, over which would be thrown a richly-figured shawl or handkerchief, careless y tied behind in a dashing *degagé* fashion, a broad flowered petticoat beneath. The head dress was chiefly composed of a tight-fitting cap, richly embroidered in gold and showy colours, with on a couple of immense knots of black ribbon, which flattered like wings. Those who aimed at more elegance were dressed in white, with broad-leaved straw hats.

Among the persons of distinction who were present with the President at this curious sight were the Grand Duchess Stephanie of Baden, who had arrived in the course of the day, and alighted at the Prefecture, Field-Marshal Count de Paur, deputed by the Emperor of Austria to compliment the President on his safe arrival; Prince Wasa, Swedish envoy, General in the Baden army; and several Austrian officers from the garrison of the Federal fortress of Radstadt, all having arrived during the day.

In the evening the President received at his castle the representatives of the foreign Powers, the Envoys of Prussia, Austria, Bavaria, Wurtemberg, Hesse Darmstadt, and Swiss Bâle, all the generals present at Strasburg, and all the high functionaries. After dinner a display of fireworks took place from the bastion opposite the Prefecture, and, notwithstanding the rain, a dense crowd assembled themselves before the building and hailed the President with loud cries every time that he appeared on the balcony, which he did repeatedly, with the Grand Duchess Stephanie of Baden.

A grand illumination of the magnificent cathedral in coloured lamps and Bengal lights afterwards took place, and presented quite a fairy scene. (*See Illustration.*) The Bengal lights within the spire, which is composed of light open fretwork, showed off to the greatest advantage the gracefully-fanta-tic and delicate tracery of this wondrous erection the effect being perfectly magical.

On Monday morning Louis Napoleon was early in the saddle, to witness a military review on the Robertsau (the public promenade of the town); and afterwards assisted at a sham fight and forced passage of the Rhine, by means of a bridge of boats thrown over it by a party of pontonniers (artillerymen trained to that special service).

At six o'clock all the troops were on the ground awaiting the President's coming.

The whole were under the orders of General Count de Waldner, commander of the 6th division, and having under him Generals Urich (in command of the sub division), André (at the head of the artillery), and Darnay (commanding the cavalry). The troops composed a body of the 11th and 12th Regiments of Artillery, occupied one part of the first line, the 17th Light Infantry, and the 24th and 67th Regiments forming the remainder. The second was composed of the Cuirassiers and the Federal troops of Lausanne. The third line was formed of four batteries of artillery furnished by the two regiments mentioned above. The whole number of troops present was about 8000

At half-past six Louis Napoleon left the Prefecture on horseback, accompanied by Generals St. Arnaud, d'Hautpoul, Fontanians, and Behramn, his aides-de camp and orderly officers, and a number of general officers from Switzerland, Wirtemberg, Baden, and Prussia; a great number of senators, deputies, and councillors of state; the Duke de Gaeuhe, M. de Sctignac Fénelon, and M. Engelhart, French Ministers at Carlsruhe, Berne, and Frankfort; M. Lacrosse, secretary of the Senate. M. Tonet, director-general of the department of the Police; and a crowd of military men. The Prince, who was received along his passage, as usual, with the loudest acclamations, arrived on the ground at seven o'clock. His appearance on the ground was the signal for repeated cries of "*Vive Napoleon!*" whilst occasionally that of "*Vive l'Empereur!*" might be heard. The crowd of spectators was immense, and consisted of every class of society, from the richest to the poore t. The Prince, after riding down successively the several lines of the troops, placed himself with his staff in the midst of the orangery; and the officers, non-commissioned officers, and privates, designated as meriting the cross, advanced to receive it from his hand. After the decorations had been given to them with fitting ceremony, the troops filed off in front of the President in admirable order, each regiment passing with the cheer in crying "*Vive Napoleon!*" A variety of evolutions succeeded, all being performed with extraordinary precision, and the whole proceedings terminated at nine o'clock. Immediately after, the troops marched off the ground, some returning to their barracks, and the rest proceeding to the place assigned them on the banks of the Rhine for the manœuvres to be executed there.

The 15th Regiment of Pontoniers (artillery), under the order of Col. de Pradal, a battalion of the 17th Light Infantry, and a battalion of the 6th, took part in transferring the troops across the river. The Prince arrived soon after, and, dismounting, took his place in a tribune of honour, richly fitted up for him, the foreign officers and his suite grouping themselves behind him. The Grand Duchess Stéphanie of Baden was seated by his side. The principal inhabitants of Strasburg and the numerous guests invited by the railway company were seated in other tribunes erected for the occasion. The pontoniers, on the signal being given, threw off their havresacks, and put on their working dress. The trumpets then sounded, and the operations commenced. A raft, hastily put together, was launched, and on it were placed the arms, the accoutrements, jackets, and caps of fifteen men, who swam with it across part of the river to some willows growing on a low island towards the right bank. There they commenced a sharp fire of musketry on the troops of the enemy posted on the right bank. Five boats, each containing twenty soldiers, next put off from the left bank to aid the small party in front; but, being received with a sharp fusillade, were forced to put back to the side from which they had started. A bridge was then launched, and passed at a little distance above the point of attack, and with one end firmly attached to the left bank, next received two companies of the 7th Light Infantry, and the upper end, set free, was allowed to be floated by the current across the river. The moment it touched the other side, the men occupying it sprang on the bank, and commenced an attack on the enemy. A large body of troops then dashed across the bridge, and in a few minutes the passage was forced, and the fire of the enemy almost silenced. The bridge was then consolidated, a battery of artillery was driven across, the full complement of ammunition, horses, and men. Once that the passage was free, the artillery took up position on the other side, and attacked the enemy. The latter, after some resistance, being beaten back, the military movement was entirely successful. The sound of the trumpet was then heard, and the troops prepared to return. The artillery having repassed the bridge, the infantry got on the bridge, which, being set free from the right side, was floated across until it became parallel to the other bank, just as the last of the artillery was driven to its seated.

The President then proceeded on horseback to the bridge of Kehl, which connects France and Baden, and took up his position there to witness the throwing of a bridge over the whole breadth of the Rhine, what had already taken place being merely over the branch of the river called the Petit Rhin. This operation (*see Illustration*) was effected in less than half an hour by means of boats, which passed successively in front of the President to take up their stations in various parts of the river. The Prince expressed his great satisfaction at the precision with which this operation was executed, and presented the Cross of Officer of the Legion of Honour to Colonel de Pradal and Lieut.-Colonel Perm, as a mark of his admiration of the high discipline which distinguished their men. The Prince then, followed by his brilliant staff, proceeded over the bridge to the town of Kehl, on the Baden territory. The whole of the garrison was under arms, and received the Prince with every mark of honour. After a short delay the Prince thanked the Baden authorities for their cordial reception, and then returned to Strasburg by the Fleur d'Orange, Rue Brogtie, and through the principal streets to the Prefecture. The fifteen artillerymen who had pushed forward the raft were, at his request, presented to him by General de Waldner, and each of them received from him a handsome silver watch, whilst the officer who commanded the party received a gold watch of great value. In addition, a sum of money was given by the Prince to the officer to be distributed amongst the other men.

About five o'clock Louis Napoleon, in plain clothes, and accompanied merely by General de Waldner, the Prefect, and Minister of Finance, drove out in an open carriage to the Robertsau, where the jousting on the water was going on, in presence of a great crowd of persons. The sudden arrival of the Prince in this simple and unpretending manner caused to electrify the spectators, who received him with a triple shout of welcome. The Prince then alighted, and remained for some time among the crowd witnessing the sports; after which, towards six o'clock, he returned to the Prefecture amidst the renewed acclamations of the people.

The whole proceedings of the day passed off in the happiest manner, the weather being delightful, and no stop or accident occurring to damp the general satisfaction.

The Prince in the evening gave a grand dinner of seventy covers to the principal officers who had taken part in the military operations of the day. The band of the 62d Regiment performed overtures and military pieces during the evening. A number of soldiers of this regiment, who had been trained by one of the captains to sing together in the manner of the Orphéonistes, gave the greatest pleasure to the guests by the admirable manner in which they executed choruses, and a *pièce de circonstance*, called "La Mathilde," composed expressly for the occasion. The President congratulated the captain on his decided success, and ordered a sum of money to be given to the men as an encouragement.

The Prince afterwards went to the ball offered by the town, which was of a most splendid description. He opened the ball with Madame Chastelin, wife of the Mayor of Strasburg, General de St. Arnaud and Madame Andre, wife of General d'Artillery, being their vis-à-vis. The Prefect of the Bas-Rhin and General de Waldner, with two Strasburg ladies, completed the quadrille. The President also danced with one of the seven young village girls, who the day before, at the procession of the peasants, had presented him with a basket of flowers. To each of these young women the Prince had ordered a jewel of value to be presented from him as a remembrance, and to the one who had spoken a short compliment to him on that occasion he now did the honour of making her a present in person. The Prince withdrew at eleven o'clock, but dancing was kept up with spirit for several hours later. The town was again illuminated, and the cathedral once more shone forth resplendent with its many-coloured lights.

On Tuesday (the 20th) Louis Napoleon, as we mentioned last week, proceeded to Baden to visit the Grand Duke (his kinaman), accompanied by his relative the Dowager Duchess Stephanie.

He stayed at Baden, on what is said to have been a matrimonial visit, until Thursday morning (the 22d), when he returned to Strasburg, and having breakfasted there, immediately set out on his journey back to Paris.

His Highness Monseigneur, the Prince President (as he was styled on the occasion in the *Patrie*, the semi-official organ of the Government), arrived in Paris on Friday evening (se'night), and his reception was right regal in its magnificence. The whole of the army of Paris was under arms, and formed a double line on his passage from the railway station in the Rue de Strasbourg to the Barriere de l'Etoile, on the Champs Elysée, on the road to St. Cloud. The Ministers then in Paris, in grand uniform—the General-in-Chief (Magnan), General Carrelet, all the general officers of division, and the officers of the staff—went to meet "His Highness," and escorted him from the railway station to his palace. The Archbishop of Paris was also amongst the dignitaries who were present on the occasion at the railway station. Although the President was not expected to arrive before six o'clock, the troops began to take up their stations as early as half-past four.

It was not until seven o'clock that the train conveying the President and his suite arrived amid the booming of cannon and the joyous pealing of all the bells of Paris. Louis Napoleon was dressed in the uniform of a general officer, and was accompanied by the Ministers of War, Foreign Affairs, and Public Works, and his cousins. The President, after thanking the directors of the railway for their polite attention during the journey, immediately took his seat in his carriage. He was accompanied by Marshal Jerome Bonaparte, General Roquet, and an aide de-camp. General Regnan and the other generals rode on each side of the President's carriage; several carriages following, which were occupied by Ministers, aides-de-camp, and other official persons belonging to the suite, and all in grand *tenue*. The unexpected presence of the Archbishop of Paris in a carriage in which were also seated the Ministers of Justice, Public Instruction, and Police, was the subject of general remark amongst the people, with whom his Grace has the character of being a stern Republican. The reception given to the President by the Parisians along the line of the procession was, upon the whole, favourable, though by no means so enthusiastic as the official accounts would lead us to believe. On leaving the station he was received with loud cries of "*Vive la Président!*" "*Vive Napoleon!*" mingled with a few cries of "*Vive l'Empereur!*" As the procession advanced the cries became less numerous; but on the Boulevards Bonne Nouvelle and Montmartre the cries of "*Vive Napoleon!*" were very distinct. The only cries of "*Vive l'Empereur!*" at this portion of the procession, and, indeed, all along the line, came from a few persons in blouses, who ran along, keeping close to the President's carriage, and crying out lustily. The cry did not appear to give general satisfaction, for in several instances it was answered by cries (which are now considered seditious) of "*Vive la République!*" But in general the attitude of the public was merely passive, and curiosity seemed to be the principal attraction. None of the troops raised any cry, with the exception of the Gendarmerie Mobile, who cried "*Vive Napoleon!*" Upon the whole, the reception, though favourable, cannot be considered enthusiastic, considering the excitement always produced on a crowd of Frenchmen by a military spectacle.

At a quarter-past seven the procession set out. The two squadrons of Guides, and the 1st Regiment of Lancers, with their respective bands, preceded the open carriage of the Prince, which was guarded by 20 carabineers. The 7th Regiment of Lancers followed. The procession proceeded at a foot-pace along the Rue Chabrol, the Faubourg St. Denis, and the Boulevards, as far as the Madeleine, where the Prince was received by the *curé* and clergy of that parish, who were drawn up with the cross at their head, in front of the portico of the church. The Prince then continued his route by the Rue Royale, across the Place de la Concorde, where three batteries of artillery were placed, down the avenue of the Champs Elysées to the Barrière de l'Etoile, and thence to St. Cloud.

GENERAL POST-OFFICE.—The following order for the reduction of postage on letters to Prussia, &c., and Belgium, has just been issued:—On and from the 1st of August next a reduction of postage will take place on all letters forwarded in the Prussian closed mails, and Belgium. The following table shows the rate of postage which will hereafter be chargeable on a letter not exceeding half an ounce in weight, posted in the United Kingdom, and addressed to Prussia, or to any of the undermentioned countries, when forwarded *viâ* Belgium:—

	s.	d.
Prussia, Austria, Saxony, Lubeck, German States (served by the Post offices of Tour and Taxis), including city of Frankfort, Grand Duchy of Hesse Electoral Hesse, Hesse Homberg, Nassau, Reuss, Saxe Coburg Gotha, Saxe Meiningen, Saxe Weimar, Eisenach, Hohenzolern, Schwartzburg, exclusive of subordinate Lordships, and Duchy of Luxemburg, Belgium and Prussia	0	8
Baden, Bavaria, and Wurtemberg, through France	0	8
Bremen and Hamburg, by packet	0	8
Hanover and Brunswick, by Hamburg packet	0	8
Meck.enburg-Schwerin, Mecklenburg-Streelitz and Oldenburg, by Hamburg packet	0	8
Switzerland, through France	0	10
Lombardy, ed Switzerland, ditto	0	10
Parma and Modena, ditto	0	9½
Tuscany, ditto	0	10½
Greece, ditto	1	2½
Denmark, by packet	0	11½
Sweden, ed Hamburgh	1	2
Norway, ditto	1	2
Ionian Islands, ed Belgium and Prussia	1	0
Lanenburg, ditto	0	10
Lippe Detmold, ditto	0	9
Russia and Pound, ditto	0	11½
Constantinople, Dardanelles, Tchesme, Cavas, Gallipoli, Ibraila, Lyras, Modelli, Rhodes, Candia, Salonica, Samsoun, Smyrna, Tenedos, Trabzond, Tultcha, and Varna, ed Belgium and Prussia	1	1
Egypt, by overland mail, ed Marseilles	0	10
Beyrout, ditto	1	1
Italian States not belonging to Austria, *ed* France, to Austrian frontier	0	8
All other places in Turkey, Moldavia, Wallachia, Servia, and the Levant, not mentioned above, *ed* Belgium and Prussia, to Austrian frontier	0	8

NOTA.—The rate above stated includes the whole postage, British and foreign, to destination, and the payment is optional with the sender.

The postage, British and foreign, upon all letters forwarded hereafter in the Prussian closed mails, *ed* Belgium, will be chargeable according to the scale of weight applied to inland letters, the Belgian transit rate being no longer levied by the separate convention with Belgium. It must be distinctly understood, letters forwarded to or through Prussia by any other route than Belgium will continue to be charged with the existing rates of postage.

PRE-PAYMENT OF LETTERS.—The following important notice, dated July, last, has been issued from the General Post-office:—On and from the 1st August next, all letters or packets for places within the United Kingdom, posted at any branch post-office or receiving-office in London, or within the limits of the London district post, must either be pre-paid by stamps or be sent unpaid. Money pre-payment for inland letters will no longer be permitted at these offices. Letters or packets, for places within the United Kingdom, posted at the windows of the chief office, St. Martin's-le-Grand, may be pre-paid by money up to the p.m. hour which hour they may be posted pre-paid by stamps or be sent unpaid. These regulations do not extend to letters for places abroad, which may still be pre-paid by money, or stamps, at the option of the sender.

JETTONS.—At a recent meeting of a society of antiquaries, at Manchester, called "The Resurrectians," a brother exhibited 16 silver jettons, or counters, nearly the size of the Horin, but more thin, and engraved instead of being struck by a die; the devices of this set being a series of the Kings of England; their full-length effigies on the obverse, and their Royal arms on the reverse, with the length of their respective reigns, and where each was buried The series commences with William Rufus. The last of the set fixes the period of its production, viz. the reign of James I., for it represents that King on one side, and his son—then Prince of Wales, afterwards Charles I.—on the other.

DISTRIBUTION OF EXHIBITION MEDALS.—At a meeting of the Manchester local committee, held on Wednesday afternoon, to consider the medal necessary issued by the Commissioners, after having for an opinion as to how the medals and copies of the jurors' reports, which it is proposed to give to the exhibitors, should be distributed, whether in Manchester or in London (the following resolution was, after some discussion, unanimously adopted:—"That, in the opinion of this meeting, the distribution of medals so liberally offered by the Royal Commissioners to exhibitors commemorative of the Exhibition, should be made publicly, and that application be made respectfully to the Mayor and Corporation of Manchester, assisted by Sir John Potter, as chairman of the Executive Committee, and the Lord Bishop of Manchester, to make the necessary arrangements.

THE VEGETABLE GAS-LIGHT COMPANY.—Among the new undertakings lately brought forward is one called the Vegetable Gas-light Company, the object of which is to introduce the patent of an inventor who has stated to have fully succeeded in perfecting an apparatus and concocting an oil by which gas or much greater purity and brilliancy than that obtained from coal can be generated in small quantities suitable for private houses, public buildings, lighthouses, steamships, &c. Its cost is represented to be relatively below that of common gas, while the trouble of its preparation is less than that required for ordinary oil lamps. For some months past the process has been in use at Eton College, the Harrow railway-station, the town of Blackpool, and other places, and certificates are given of the satisfaction it has afforded. Sir John Herschel, the Master of the Mint, bears testimony to the advantages of the invention. The capital proposed is £100,000, and the board of directors is respectably constituted.

ETON COLLEGE ELECTION.—On Saturday last, there was a large and fashionable attendance in the upper school at the Eton Col ege election. Amongst those who were present on the interesting occasion, were the Earl of Derby, the Duke de Nemours, Viscount Strelford de Redcliffe, Lord John Manners, the Marquis of Drogheda, &c., &c. After the election requiems had been delivered, a distinguished party of about 100 assembled in the library, and from thence proceeded to the College hall, when the usual banquet was given. The Earl of Derby presided, and greasy Colbert was the greasy cook. At seven o'clock the regatta commenced, and the aquatic procession to "Old Surley" was seni ar to that on the 4th June, with the exception of the "Eton Eight" in the victory, selected to the customary challenge to the Westminster boys. The usual elegant repast took place at Surley Hall, and the crews returned to Windsor at nine o'clock, when they rowed to the Cobler and round the Eyott, during the discharge of rockets, Roman candles, and other fireworks; and, the scene was remarkably fine, the houses, wharfs, barges, and every available spot, were crowded with spectators. The fine band of the 2d Foot Life Guards were stationed near the Eyott, and the grounds and banks of the Eyott formed the Cobler. Everything passed off without accident, and with the greatest decorum.

DEATH BY DROWNING.—Mr. William Higley, the proprietor of Lea Croft Farm, Knowle Green, Staines, was drowned on Monday morning while bathing, according to his usual custom, in a place of water called "Ship Hood," in the immediate vicinity of his residence. Deceased was in his fifty-seventh year, and was highly respected. He has left a numerous family.

BURSTING OF A BALLOON.—On Wednesday evening, as Mr. Henry Coxwell, the well-known aéronaut, was about to ascend in his balloon from the New Globe Pleasure-grounds, Mile-end-road, Stepney, in company with several persons who had engaged seats in it, the balloon suddenly burst with a loud noise, and was much torn and injured by the rupture of the silk.

NATIONAL SPORTS.

The ensuing will be a busy week in various parts of the country, the register embracing no less than a dozen meetings, including the professional and amateur gatherings at Brighton, of which great things are expected. They come off in the following order:—Monday: Blackley, Ripon, Great Grimsby. Tuesday: Hull, Staffordshire and Chewton Mendip. Wednesday: Brighton, and Barnet Fair. Thursday: Edgeware and Spalding. Friday: Brighton Club, Bungay, and Kinneil.

AQUATIC FIXTURES.—Monday: Doggett's Coat and Badge; and Blackwall, St. George and St. Peter's (Hanover-square), and Nottingham regattas. Tuesday: Chelsea regatta, Thames Club scratch match, and the Amateur Champion Sculls match. Wednesday: Bath and Royal Western (Plymouth) regatta. Thursday: Staines and Royal Yorkshire regattas.

CRICKET APPOINTMENTS.—Monday: Zingari at Sir B Smyth's eleven, at Hill Hall, Essex; all England match at Bath; Vale of Taunton v. Sherborne, at Taunton. Tuesday: Return match between Burton-on-Trent and South Derbyshire, at Burton-on-Trent. Wednesday: Return match at Chertsey between the Oval and Chertsey Clubs; Manchester v. Warwickshire gentlemen, at Manchester; Surrey v. West Wickham Club, at the Oval; return match with Liverpool Club, at Shrewsbury; and match at Appleshaw between West Hants and Druids. Thursday: Match at Enville Hall between Zingari and gentlemen of Staffordshire; and all England match, at Newark.

GOODWOOD RACES.—TUESDAY.

The Goodwood meeting commenced on Tuesday, with all the *éclat* which fine sport and princely patronage could not fail to ensure. The "House party" this year was unusually large. His Serene Highness Duke Bernhard of Saxe-Weimar, father of Prince Edward, arrived from Germany on Monday, and was the guest of the Duke and Duchess of Richmond during the race week. His Royal Highness the Duke of Cambridge, attended by the Hon. James Macdonald, also honoured the Duke and Duchess with his presence. The party included Prince George of Mecklenburg-Strelitz, Prince and Princess Edward of Saxe-Weimar, Duke and Duchess of Beaufort and Lady H Somerset, Duke and Duchess of Bedford, Baron d'Eyncourt, Marquis of Normanby, Earl and Countess of Derby, Earl and Countess of Chesterfield, Earl Jersey, Earl of Annesley, Earl of Zetland, Earl of Tankerville, Baron Brunnow Lord Enfield, Lord Clifden, Lord Maidstone, Lord George Manners Lord Bloomfield, Lord W. Lennox, Lord C. Lennox, Lord G Lennox, Lord H Lennox, Hon General and Mrs. Anson, Hon Captain Hay, Hon. F. Lawley, Hon. Thomas Villiers, Hon. Colonel Forester, Mr. and Lady De Vesci and Mrs J. Stanley, Colonel Peel, Mr. E. Williams, Captain Pattat, Mr. Grevi le, Mr. Payne, Mr. Talbot; and the Molesworths party (Lord March's) consists of Colonel Newton, Colonel Cox, Hon. Major Pitt, and Mr. Milner. Besides the above distinguished personages, there were present on the first day, the Marquis of Waterford, Marquis of Drogheda, Marchioness of Ailesbury, Earl and Countess of Wilton, Countess of Desart, Lord and Lady Newport, Lord A. Fitzclarence, Lord Forester, Lord Torrington, Lord Foley, Lord Andover, Lord R P Cinton, Lord Paget, Lord F Fitzroy, Lord J. Fitzroy, Lord Stanhope, Lord J. Scott, Lord Exmouth, Sir R. and Lady Pigot, Sir G. Armitage, Hon. H. Forster, Hon. Major Neeld, Hon. Hon. Captain Lyon, Hon. John Fortescue, Hon. S A. Eliot, Hon. S. Jocelyn, Hon. W. Scarlett, Hon. Colonel Peel, Colonel Hornby, Messrs. A. S Stanley, H Fitzroy, G Fitzroy, McKeam, C. Sanson Folgambe, Gratwicke, A. Lumley, De Burgh, Knighton, &c. The general attendance was very good for a first day, and the weather, until just before the start for the Gratwicke, when a slight shower fell, favourable in the extreme.

The following is a return of the day's sport:—

THE CRAVEN STAKES.—Lamartine (A. Day), 1. Maria (Garvey), 2.

SWEEPSTAKES of 300 sovs each.—Newminster (Templeman), 1. Harpsichord (F. Butler), 2.

FIFTY POUNDS.—Gold Dust (Bundy), 1, Vivandière (Bartholomew), 2.

THE LAVANT STAKES.—Sister to Mountain Deer (Hiett), 1. Lucciles (A. Day), 2.

THE GRATWICKE STAKES.—Longbow (F. Butler), 1. Father Thames (A. Day), 2.

THE HAM STAKES.—Refraction c. (Templeman) 1. Defiance(Whitehouse), 2.

WEDNESDAY

THE DRAWINGROOM STAKES.—Sockdut (Templeman), 1. Dex (Norman), 2.

SWEEPSTAKES of 300 sovs each, for fillies.—Hirsuta (Flatman), 1. Common Sense (H. Oates), 2

SWEEPSTAKES of 300 sovs each, for colts.—Stockwell walked over.

THE CUMBERLAND STAKES.—Race (Kendall), 1. Hermione (T. Sherwood), 2.

THE GOODWOOD STAKES.—Weatherglass, (Wells), 1. Montague, (G. E. Sharp), 2.

THE STEWARDS' CUP.—Kilmeagy (Barker), 1. Evadne, (Aldcroft), 2.

SWEEPSTAKES of 10 sovs. each.—Phlegra (Norman), 1. Old Rowley (Flatman), 2

SWEEPSTAKES of 10 sovs. each.—Cotton Lady (Rickards), 1. Maria (Wells), 2

THURSDAY.

THE SUSSEX STAKES. Defiance, 1 Belle Sauvage filly, 2.

TWO-YEAR-OLD MEMORIAL.—Refraction colt, 1. Bittingbourne, 2.

SWEEPSTAKES.—Harbinger walked over.

RACING STAKES.—Stockwell, 1. Maidstone, 2

THE MOLECOMBE STAKES.—Elmsthorpe, 1. Estrella, 2.

THE CUP. Kingston, 1. Little Harry, 2.

FRIDAY.

THE NASSAU STAKES.—Hirsuta, 1. Red Hind, left at the post.

CHESTERFIELD CUP.—Harbinger, 1. Evadne, 2.—Nineteen ran.

THE NURSERY CUP.—Catherine Hayes, 1. Elspeth, 2.

QUEEN'S PLATE.—Ilex, 1. Lamartine, 2.

HANDICAP PLATE.—Billy Bar, 1. Carrier, 2.

GREAT BOAT RACE.—The boat race between Thomas Coombes, of Vauxhall Bridge, and Philip Chandler, of Millbank, for £50, came off on Monday, and was most spiritedly contested throughout. Thomas Coombes, the brother of the ex-champion, has long been before the public for many years, has earned considerable reputation as a sculler and oarsman, and in the exercise of the prowess of the former won the beautiful boat given by Mr. Simpson, the proprietor of Cremorne, last week. Chandler, the son of the veteran of that name, exhibited so much style and game during last summer as deservedly to gain many friends, some of whom backed him in the match of Monday. The distance contested was from Putney to Mortlake, and Coombes, although a stale man compared with his opponent, was the favourite. Chandler won the toss for station, and took the best place. The start was extremely even, but was succeeded by Coombes taking a slight lead, which he increased foot by foot, at intervals throughout, winning by about two clear lengths, notwithstanding Chandler's very manly endeavours to change the fortune of the day.

GREAT PEDESTRIAN FEAT.—A one mile race for a sweepstakes of £75, between the three most noted runners of the day—viz. Charles Westhall, Seward the American Wonder, and William Jackson, Champion of England—took place at the Copenhagen Grounds on Monday last. A heavy storm having broken over the grounds about five o'clock P.M., made the course very heavy, giving an advantage to Westhall, who was the strongest man. At the firing of a gun, at eleven minutes before seven P.M., the men started. Jackson, having ten yards given him, of course went off with the lead; Seward being second, Westhall in the rear by at least fifteen yards. In that position they went for three-thirds of the distance, when Westhall began to draw upon his adversaries till he overtook them, when he had about 200 yards further to run to complete the stipulated distance. Then Westhall showed his superior strength and power of endurance, by passing first Jackson and then Seward, going in a comparatively easy winner, by at least ten yards before Seward, and a very much before Jackson, amidst the cheers of a large concourse of persons on the ground. Time taken in doing the mile was as follows: Westhall, 4 min. 30½ sec.; Seward, 4 min. 32 sec.; Jackson, 4 min. 33½ sec.

Mr Clare Ford, son of Richard Ford, Esq., has been appointed an attaché to the mission at Naples.

One of the longest, if not the longest, tunnel in the world, is now in a forward state of completion. It is situated in Hungary, and leads from the shores of the river Gran, not far from Zarnowitz, to the mines in the Schemnitzer hills; it is two geographical, or about ten English miles long. It is intended to answer the double purpose of a channel to drain off the water accumulating in the works, and of a railway to transport the ore from the mines to the river.

The *Dublin Mercury*, No. 283, August 16, 1768, contains the following masterpiece of advertisement:—"A neat beautiful black Negro girl, just brought from Carolina, aged eleven or twelve years, who understands and speaks English, very fit to wait on a lady, to be disposed of. Application to be made to James Carolan, Carrickmacross; or to Mr. Gavan, in Bridge-street, Dublin.

A kind of hurricane, or whirlwind, on Friday week, passed over the parish of Dymock, in Gloucester, and its neighbourhood, causing a great destruction of property, but happily no personal injury. Six acres of hay were completely blown away, large trees were uprooted, walls thrown down, and houses unroofed.

IRISH PEAT COMPANY.—On Thursday the first annual meeting of this company was held at the King's Head tavern, Poultry; Joseph Neeld, Esq., in the chair. The report was of a most favourable description, it being stated that Mr. Scanlan, who had gone over to the works of the company, had succeeded in profusely from the peat a peculiar species of tallow candles, which would readily sell at is. per lb.; some volatile and fixed oils, va ued at from 2s. to 4s. a gallon; and a very valuable charcoal. After a long discussion, the report was adopted, and a dividend of £2 per share declared on the paid-up capital, to bring the works into full and profitable operation, and £700 voted to the directors for their past services.

INTERESTING DISCOVERY.—A few days ago the workmen employed in excavating the mound in front of the infirmary, formerly the site of the Bishop's Castle, discovered a grout of the reign of James I, the head of an old Danish pipe, and a stone strongly impregnated with sulphur of a similar description to that which was recently mistaken in Yeshire for genuine gold ore. The coin, which is a curious relic of the fifteenth century, is considerably flattened, and bears the following inscription:—"Jacobus Dei Gratia Rex Sco." on the reverse are the words: "Dus. Pleetur M S. et Libator;" and on the inner circle; "Villa Edinburgh."—*Glasgow Mail.*

CHESS.

TO CORRESPONDENTS.

TUSCAN.—The Italian problems mentioned in our last were contributed by Signor Dubois, no "Dubois," which was a misprint. † Ignor Dubois has been long and favorably known to those Chess amateurs who have visited Rome, but his skill as the author is proved by his readiness and courtesy in rendering that skill available for the amusement of strangers

B N.—Apply to the publisher, stating the case

P. Lisbon.—1. The Problems shall appear shortly. 2. Your solutions are correct

T. B. of Hawley.—An improvement on the preceding

HENRY JOLLENDS.—You are mistaken, we believe. Mate cannot be effected in *three* moves

C F S, Bromwich.—The games are interesting, and the best shall appear when we are a little less pressed by other matter

C L. of Rutherford, North Carolina.—It is an easy matter in four moves, beginning with Q to her 5th (ch) &c

C L, Rutherford.—1. You should have sent another copy The former was destroyed when found incorrect 2 No. 437 (not 137, as you number it) can be solved in the way named

SOLUTIONS of PROBLEM No. 438, by Jack of Shrewsbury, Phiz, L M, Orient, Kohi-Noor, are correct

SOLUTIONS of PROBLEM No 443, by R R. of Ashford, Judy, Phiz, Magog, M P, Hector, Anderson Scotia, T R H of Woodford, are correct

SOLUTIONS of PROBLEM No 443, by Henrious Johannes, Stevens, R R. of Ashford, Sultan, Magog, Basil, Tregonic, M. P. R. B. Lemaire, F. B. Dereton, Rodger, Vardon, True Blue, Union Jack, are correct. All others are wrong

SOLUTION OF PROBLEM No. 440.

This position may be solved in one move less than the author stipulates for, as follows:—

WHITE.	BLACK.	WHITE.	BLACK.
1. K to Q R 5th	P to K 6th	3. R to Q Kt 7th (ch)	K to Q R sq
2. B to Q K 6th	P takes P, or Kt, or moves on	4. K to Q Kt 6th—	Mating next move

SOLUTION OF PROBLEM No. 441.

WHITE.	BLACK.	WHITE.	BLACK.
1. Kt to B 5th	Kt to Q B sq (best)	4 R to K 4th	Anything
2. B to Q 4th	P to Q 3d (best)	5. R mates	
3. B to Q B 5th	P takes B (a) (best)		

WHITE.	BLACK.	WHITE.
(a) 3.	P takes Q P	P to K 8 7th
	4 B takes Q P	Anything
	5. R or Kt mates	

SOLUTION OF PROBLEM No. 442.

WHITE.	BLACK.	WHITE.	BLACK.
1. Kt to B 3	P takes Kt (best)	4. R to K B 5th	P takes R

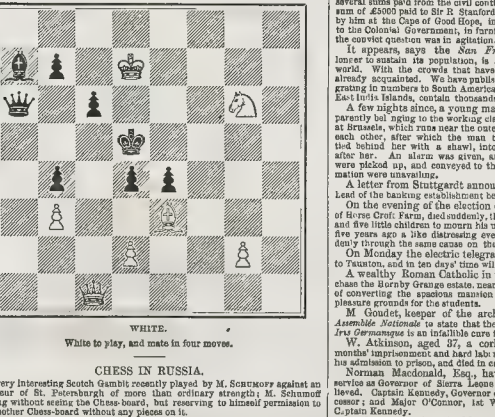
3. R to K B sq	P moves		

PROBLEM No. 444.

By E. A. M. M., of India.

BLACK.



WHITE.

White to play, and mate in four moves.

CHESS IN RUSSIA.

A very interesting Scotch Gambit recently played by M. SCHUMOFF against an Amateur of St. Petersburgh of more than ordinary strength; M. Schumoff playing without seeing the Chess-board, but reserving to himself permission to see another Chess-board without any pieces on it.

WHITE (M. Schumoff).	BLACK (Amateur).	WHITE (M. Schumoff).	BLACK (Amateur).
1. P to K 4th	P to K 4th.	22 B to K 3d	B takes B
2. Kt to K B 2d	Kt to Q B 3d	23. P takes B	Q takes K P
3. P to Q 4th	P takes P	24. Kt to Q B 3d	Q takes K P (ch)
4. K B to Q B 4th	K B to Q B 4th	25. Q to B sq	Q to her R 2d (c)
5. Castles	P to Q 3d	26. Kt to Q Kt 5th	Q to her R sq
6. Q to Q B Kt 5th	P to K B 3d	27. P to Q R 4th	P to Q Kt 3d
7. Q B to Q 2d	Q B to K Kt 5th	28. K R to Q B sq	Q R to Q 2d
8. P to Q B 3d	Q to K 2d.	29. Kt takes Q B P	R takes Kt
9. Q her Kt 3d	Castles	30. R takes R (ch)	K takes R
10. P takes P	Q B takes Kt	31. R to Q B sq (ch)	K to Q 2d
11. Q takes B	Kt takes P	32. Q takes Q Kt P	Kt to K 2d
12. Q to Q 3d	P to K Kt 4th	33. K to Q B 7th (ch)	K to K sq
13. P to Q R 4th	Kt to Q B 3d	34. P to Q R 7th	K to B 2d
14. P to Q R 5th	Q Kt to K 4th	35. R to Q Kt 7th	R to Q B sq
15. Q B to K 5th	Kt takes B	36. P to K R 6th	R to K Kt sq (d)
16. Q takes Kt	P to Q R 3d	37. Q to Q B 7th	R to K sq
17. P to Q Kt 4th	P to Q R 2d	38. R to Q Kt 8th	R takes R
18. P to Q Kt 5th	P takes P	39. P takes R	Q to her R 8th
19. Q takes P	Q to Q 2d (a)	(queens) (e)	(ch)
20. Q to her Kt 2d	P to K R 4th	40. K to R 2d	Q to K 4th (ch)
21. B takes P (b)	Q to K Kt 5th		

And the game was drawn by perpetual check.

(Notes by Major Jaenisch.)

(a) Black is anxious to compel exchanges, being aware that it is more difficult for the blindfold player to conduct an ending, or even the middle of a game than the beginning.

(b) The unsuspecting player sees well enough.

(c) Black would play better if he did not fear his adversary too much

(d) Black at last two moves have evidently no other aim than to try if White will see clearly enough not to expose himself to mate by playing P. Rook to Q Kt 6th; but M. Schumoff takes good care to avoid the snare.

(e) At this moment only, eight seems to have fallen the blind player. He had forgotten (as he afterwards acknowledged) that the position of Black's Pawn at Q's third permitted him to give perpetual check. In case White should make a second Queen. At move 39 Q takes R would evidently have been better pay

GAME BETWEEN PRINCE OUROUSSOFF AND AN AMATEUR.

The elder Prince Ouroussoff has recently played at Moscow upon several occasions, and with invariable success, a mode of attack which has hitherto been little practised. The constant defeat of his adversary, who, nevertheless, is a strong player, seems to prove that the correct defence of this method of attack is still a Chess enigma. A first effort to solve it has been attempted, however, in the April Number of the *Berlin Magazine* (1852), but which leaves much to be desired. The following game may be sufficient to show the extreme impetuosity of this move. variation:

(Allgaier Gambit.)

WHITE (The Prince).	BLACK (Amateur).	WHITE (The Prince).	BLACK (Amateur).
1. P to K 4th	P to K 4th	12. P takes Kt	Q takes Q P
2 P to K B 4th	P takes P	13. Castles	B takes Kt
3 Kt to K B 3d	P to K Kt 4th	14 B to K 5th (ch)	K to Kt sq
4. P to K R 4th	P to K Kt 5th	15. Q to Q 3d	B takes P (ch)
5. Kt to K Kt 5th	P to K R 3d (a)	16 B takes B	Q to K 4th
6. Kt takes P	K takes Kt	17. Q to her R 4th (ch)	K to R 2d
7. B to Q B 4th (ch)	P to Q 4th (b)	18. R to K B 7th (ch)	K to Kt 3d
8. K takes P (ch)	K to Kt 2d	19. R to K Kt 7th (ch)	K to B 4th
9. P to Q 4th	Kt to K B 3d	20. R to K sq (ch)	K to K 5th
10. Kt to Q B 3d	B to Q Kt 5th	21. B to K 5 6th (discovering ch)	K to K 4th
11. B takes K P	Kt takes B	22. Q to Q 3d—Mate.	

(a) This move is considered the best by all the authors except the celebrated Poza and (b) This is the coup which constitutes the new attack. The usual move is—

7 Q takes P	Kt to K B 3d	16 Q takes K B P	B to Q 3d

And the game is in Black's favour. Allgaier Blanc C. who has proclaimed his Gambit invincible, has not given the move 7. B to Q B 4th (ch), but it has been briefly alluded to by Der Lasa, in his "Leitfaden"

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The Dutch and Belgian Governments have concluded a railway convention, by which a junction line from Antwerp to Rotterdam will connect the systems. The Bavarian Government has granted a million and a half florins to the Palatinate company to complete the line from Ludwigsberger to Wittembourg.

M. Kossuth and his lady arrived at Liverpool on Sunday, by the British and North American mail steam-ship *Africa*. They travelled under the assumed name of Smith. He was accompanied by Count Col, Bletbon and Col. Ihaz, who also secured passages in assumed names.

On Saturday morning last some daring thieves broke into the cashier's office at the Highbury station of the East and West India Dock Railway Company, and stole £23 13s 3d

An influential committee has been formed for the purpose of erecting a colossal bronze statue to the memory of Doctor Jenner, to be placed in a public situation in the metropolis.

Intelligence has just been received at Lloyd's, under date St. John's, Newfoundland, July 6, of the total destruction by fire of the British ship *Resprocity*, on the 28th of June, whilst on her passage from Hobbie to Liverpool. The vessel was in lat. 46 when the calamity was discovered. The mate and eight of the crew escaped in the jolly-boat, and after being exposed for three days, without food or water, were picked up by a fishing vessel and landed at St. John's. The fate of the master and seventeen other persons composing the rest of the crew and passengers is at present uncertain.

On Saturday last the submarine telegraph between Portpatrick and Donaghadee was completed. By ten o'clock at night the cable was securely anchored on the Scottish coast. The additional length of cab e sunk was about fourteen miles, seven of it having been previously submerged, making a distance of twenty-one miles between the two coasts, or a difference of forty-four miles over the route between Holyhead and Howth.

During one of the recent storms, the church at Wethersfield, near Braintree, in Essex, was struck by the lightning, which entered the steeple and set it on fire. The top of the spire soon afterwards fell, and the smouldering fire was then extinguished.

A Lincolnshire paper describes an exceedingly clever and ingenious invention for the opening and closing of railway gates without the attendance of a single individual. A spring connected with the gates is fixed at any given distance on the line, immediately on the engine touching which the gates fly open, and remain so until the engine touches a spring on the opposite side, when they instantly close.

At the recent election for the eastern division of the county of Somerset riots unhappily took place during the polling days at several places, one of which (Banwell), a young man, named John Gosling, about twenty years of age, was stabbed with a pike, and died at the Bristol Infirmary last Saturday.

The clearances from the port of London for the gold colonies of Australia, for the week ending last Saturday, were large They consisted of seven vessels to Port Phillip, of an aggregate capacity of 4230 tons, and one to Geelong (to ballast) of 331 tons. There was also one vessel for Adelaide of 333 tons, besides two for Van Diemen's Land, of a joint capacity of 940 tons. Shirts and wines continues to be freely shipped, but the proportion of other goods has not been by any means large. The total number of passengers, it is supposed, have been nearly 1000

A parliamentary paper, just issued, contains returns relating to several sums paid from the civil contingencies of 1851. The first relates to the sum of £5000 paid to Sir R Stanford, as compensation for the loss sustained by him at the Cape of Good Hope, in consequence of the assistance he afforded to the Colonial Government, in furnishing supplies for the military at the time the convict question was in agitation.

It appears, says the *San Francisco Herald*, that China, unable longer to sustain its population, is sending out emigrants to all parts of the world. With the crowds that have poured into the country, our people are already acquainted. We have published statements showing that they are emigrating in numbers to South America. Manilla, Java, and many others of the East India Islands, contain thousands of them.

A few nights since, a young man about 30, and a female about 25, apparently both living to the working class, were observed walking near the canal at Brussels, which runs near the outer boulevards. They were seen to embrace each other, after which the man threw the female, whose arms had been tied behind her with a shawl, into the water, and then plunged headlong after her. An alarm was given, and after a considerable time both bodies were picked up, and conveyed to the hospital, but all attempts to restore animation were unavailing.

A letter from Stuttgardt announces the death of M. Moses Benedict, Lead of the banking establishment bearing his name in that capital, aged 81.

On the evening of the election day at Westbury, Mr. Richard Bourne, of Horse Croft Farm, died suddenly, through excessive excitement, leaving a wife and five little children to mourn his untimely end. It is a singular fact that five years ago a like distressing event happened this brother, who died suddenly through the same cause on the morning of the election day

On Monday the electric telegraph was completed from Bridgwater to to Taunton, and in ten days' time will be extended to Exeter

A wealthy Roman Catholic in the south of England is about to purchase the Hornby Grange estate, near Great Smeaton, Yorkshire, for the purpose of converting the spacious mansion into a Catholic college, and the park into pleasure grounds for the students.

M Goudet, keeper of the archives of Toulouse, has written to the *Assemblée Nationale* to state that the root of the plant known in France as the *Iris Germanique* is an infallible cure for hydrophobia.

W. Atkinson, aged 37, a cork-cutter, having been sentenced to six months' imprisonment and hard labour, swallowed a bad half-crown previous to his admission to prison, and died in consequence.

Norman Macdonald, Esq., having completed the usual period of service as Governor of Sierra Leone and its dependencies, is to be shortly relieved. Captain Kennedy, Governor of the Gambia, is understood to be his successor; and Major O'Connor, 1st West India Regiment, is likely to replace Captain Kennedy.

At the present time, in Manchester, while there is a weekly average of 3,418 persons less in receipt of relief than in January last, there is a reduction in the cost equivalent to a saving of more than £10,000 per year.

Mr. Uriah Wood, farmer, of Arnold, near Nottingham, has recently lost a young colt and a bullock from hydrophobia, having been bitten by a rabid dog a short time before A middle-aged female, named Cundy, was also bitten severely in two places by the dog. She is, however, reported to be in a mending state. The rabid animal was ultimately shot.

A young servant girl, named Mary Ann Jordan, has just been committed to Gloucester County Gaol for trial at the next assizes, on the charge of stealing between £100 and £200 in gold, silver, notes, and cheques, the property of a former mistress

By an act now in force, informations for penalties, &c., under the Excise laws may be heard before the Inland Commissioners, or by the metropolitan magistrates.

The *Liverpool Mail* gives the following return of the import of foreign grain, cheese, &c into Liverpool, for the fortnight ending 7th July, 1852:—165 boxes and 53,325 bushels dittos; 45,566 barrels dittos; 1113 sacks ditto; 12,123 bags Ind an corn; 80,348 bushels ditto; 18,725 bushels peas; 17 640 bushels beans.

According to the General Board of Heath Act passed in the late session (No. 2), local boards are to be established at the following places:—Wisbeach, Walsoken, Salisbury, Ashby-de-la Zouch, Woolwich, Stratford-upon-Avon, Leamington, and Newbury.

By the Nisi Prius Officers Act it is declared, "the fees heretofore received on the circuit by the marshal's man and the judge's bailiff respectively shall be and are hereby abolished, and no fee, gratuity, or reward whatsoever shall be demanded or accepted by any one exercising, or claiming to exercise, either of the said offices, or other person attending the circuit in any subordinate office or employment."

The servant girl, looking out of the window of a house in Farringdon-street, a few nights ago, at a band of itinerant musicians, overbalanced herself fell upon the pavement, and was killed.

A poor woman near the King's Head Hotel, in Durham, at the time when Mr. Parker was being so grossly insulted by a few leading teetotallers, expressed her determination to "drink beer all her life, if water made them that dait."

A few days ago Mr. Thomas Knight, of Clappery Mill, near South Molton, lost his life in endeavouring to save his child, about three years of age, who had fallen into the river near his residence. The mother preserved the child's life by taking it out of the river, but the father was drowned in the presence of several persons.

One day last week a swarm of bees attacked a terrier dog at Highfield Cottage, Holmer, near Hereford. The poor animal, maddened by pain, rushed into a field of beans, but it was consummated time before he succeeded in robbing his enemies off, when he was dipped in a pool of water. The dog died in a few hours afterwards.

It is stated, in the reports of the Surgical Society of Paris, as inserted in *L'Union Medicale*, that the society has been presented with the whole collection of Guy's Hospital reports (about 20 volumes) through the instrumentality of Mr. Birkett, of Guy's Hospital, corresponding member of the society.

We hear from Bavaria that the Pompeian house which King Louis I. ordered to be erected in the midst of the park of his domain is completed, and becomes an object of great interest to the archæologists of Germany. It is executed after drawings by the late celebrated Herr Klenze. The principal mural pictures are by Herr Nilsson, of Munich, who took the subjects from Pompeii itself, where he resided five years for the purpose.

By a recent decision of the Spanish Government, vessels arriving at any port of the Peninsula, with a clean bill of health, will be at once admit d without further precaution; and as the cholera has completely disappeared, no measure will now be taken to guard against it

There is a place in New Hampshire where they never have any old maids When a girl reaches the age of 29, and is still on the unsold list, the young fellows club together and draw lots for her. Those who escape pay a bonus to the one who gets her.

MARINE FESTIVITIES AT CORK.

THE Exhibition at Cork has contributed a great accession of gaiety to the life of that "beautiful city." In conjunction with the Squadron Regatta, which commenced yesterday week, a very amusing performance took place—a scene of pantomime, as the Sadler's Wells managers were wont to say, "upon real water." A sort of stage or raft—*a fleur d'eau*—was prepared, and six of the crew of H.M.S. *Leander*, dressed in pantomimic costume, were cast adrift upon it. One of the crew was dressed as *Columbine*, another as *Clown*; and a third as *Pantaloon*, who was provided with a fiddle; the three others being the *corps de ballet*. They executed several grotesque dances in the water, as it were, to the great amusement of the guests on board the frigate, &c.; and were afterwards towed round the squadron, and received the hearty cheers of the various crews. As a grand and most unexpected *finale*, they afterwards jumped overboard; but, Triton-like, emerged, and played all kinds of antics in the water. A similar nautical entertainment took place on board the *Prince Regent*, Captain Hutton, on Saturday.

RAFT DANCE AT THE SQUADRON REGATTA, CORK.

THE AUSTRALIAN MAIL COMPANY'S STEAM-SHIP "SYDNEY."

THE importance of the postal communication with Australia, which has been opened up by this Company, is well attested by their activity. Two vessels will have been despatched by the 3d proximo, full of passengers and goods; and all this has been effected within six months after obtaining the mail contract, which, at present, is with the Admiralty, for a bi-monthly mail; but it is expected to be extended immediately to a monthly one.

We have engraved one of the above vessels, the screw steam-ship *Sydney*, the second of the line, to follow the *Australian*, which sailed on the 5th of June last. These two steamers were built at Dumbarton, on the Clyde, by Messrs. W. Denny and Brothers, and are of the following dimensions, viz., 1560 tons N.M., with engines by Tulloch and Denny, of 300-horse power. Their length is 216 feet; breadth of beam, 34 feet; depth of hold, 25 feet. They carry 900 tons of goods in freight, and 500 tons of coals.

The *Sydney* is to sail from the East India Docks this morning (the 31st), and from Plymouth on Tuesday, where she will call for mails and specie. She has berths for 178 passengers, all of which are occupied.

The vessels are expected to make the voyage to Australia in 65 days, including stoppages at St. Vincent and the Cape of Good Hope, where they are to call for coals.

THE SCREW STEAM-SHIP "SYDNEY" BUILT FOR THE AUSTRALIAN ROYAL MAIL STEAM NAVIGATION COMPANY

VEVAY.

A SHORT time ago it was announced in the Swiss journals that M. Thiers, unable to find a resting-place for the sole of his foot in that France of which he had been the zealous, but somewhat mischievous, public servant, had taken up his abode in the quiet town of Vevay, on the borders of the Lake of Geneva. It appeared, however, that the announcement was not received with much satisfaction in Switzerland. A party in that country were apprehensive that the sojourn, in such close proximity to the French frontier of so dangerous a politician might give umbrage to the French President; and M. Thiers accordingly received a notification that his "internement" was desirable and necessary. By "internement" is understood removal into the interior. In other words, M. Thiers was warned to depart from the highway of travellers, where a political circle might have formed itself around him, to some more secluded spot at a distance from the usual resorts of men, where he might cultivate literature—or, if it so pleased him, cabbages. M. Thiers is understood to have taken the hint, but whether the French Government really prompted the action of that of the Swiss Cantons in the matter is still a doubtful point, which we are unable to elucidate.

Vevay is the second town in Canton Vaud, and is situated on the most charming point of the scenery of the Lake. The writings of Rousseau have greatly contributed to its celebrity; and from the little terrace at the end of the market-place, the eye commands the scenery of the "Nouvelle Héloïse." On the east is the village of Clarens, Montreux, and Chillon; beyond it, Villeneuve, and the gorge of the Rhone, backed by the gigantic Alps of the Velluis, the Dent de Midi, and Pain de Sucre (neighbours of the great St. Bernard); while on the opposite shore of the lake rise the rocks of Meillerie, surmounted by the peaks of the Dent d'Oche and the village of St. Gingough, at the foot of the mountains.

A little above the town is the church of St. Martin, where is buried Ludlow, the regicide; and Broughton, who read the sentence of death to Charles I. They died here in exile, a price having been set upon their heads; and applications were repeatedly made to the canton Berne to deliver them up, which the Government very properly refused to accede to. Ludlow's house still exists on the road to La Tour de Peil. He placed over his doorway this inscription:—"Omne solum forti patria."

The neighbourhood of Vevay is famed for its wines. The Romans are believed to have first planted the vine on the hills. A guild of Vignerons exists at Vevay; and here is held once in fifteen or twenty years, a festival called *La Fête des Vignerons*, possibly a relic of Pagan superstition. The last celebration took place about twelve months since: the reader will find its mythological processions, with the grand ceremony in the market-place of Vevay, pictured in the ILLUSTRATED LONDON NEWS, No. 513.

About two miles distant, upon a swelling eminence, looking over the lake, is the ancient Castle of Glonay, which has belonged to the same family for 700 years. About four miles from Vevay is Clarens, so sentimentally described by Rousseau in the "Nouvelle Héloïse."

'Twas not for fiction chose Rousseau this spot,
Peopling it with affection; but he found
It was the scene which passion must allot
To the mind's purified beings; 'twas the ground
Where early Love his Psyche's zone unbound,
And hallow'd it with loveliness; 'tis lone,
And wonderful, and deep, and hath a sound,
And sense, and sight of sweetness; here the Rhone
Hath spread himself a couch, the Alps have rear'd a throne.—BYRON.

VEVAY AND THE LAKE LEMAN.

ROYAL VICTORIA YACHT CLUB REGATTA.—THE MATCH FOR HER MAJESTY'S CUP.

THE ROYAL VICTORIA YACHT CLUB REGATTA.

(From a Correspondent.)

WITH the exception of the great race with the *America* last year, the Isle of Wight has probably never been the scene of a more interesting match than on Thursday week. On the former occasion, the misunderstanding about the course and the accidents which happened to some of the favourite yachts, greatly marred the interest felt in the result; this time there were, fortunately, no such drawbacks.

The course was round the Island, passing outside the Nab Light—which latter rule enabled many yachts to cut off the corner by Bembridge, and thus keep the race in view as far as Dunnose. Three yachts started to compete with the celebrated *America*, and various were the hopes and fears in respect of each. Mr. Chamberlayne's *Arrow* (built about a quarter of a century ago by the veteran yachtsman, Mr. Weld, and a celebrated vessel in her day), having been lengthened since last season, and now measuring upwards of 100 tons, is a noble vessel, and looked difficult to beat; while many, who had witnessed on former occasions, the weatherly qualities of Lord Londesborough's *Musquito*, built three or four years ago by Mare, of Blackwall, whose spirited challenge of the Americans is well known), imagined that if any of our present English yachts could wrest from the *America* the laurels she won last year, the *Musquito* was the craft to do so. In size, however, the odds were fearfully against her, she being only 50 tons, whereas the *America* is 180. A handsome schooner, the *Zephyretta*, also started, but had been left so far astern before rounding St. Catherine's Point, that the interest of the race lay thenceforth exclusively between the other three.

The weather was all that could be desired—a bright sun and a westerly breeze, somewhat variable so long as the course lay under the lee of the high land, but steady afterwards.

The *Musquito* was quickest in getting off, and was the first round the Nab, followed in about two minutes by the *Arrow*—the schooners somewhat astern. From the Nab to St. Catherine's, it was a dead beat to windward; the yachts working along the shore to avoid the strength of the tide, which still ran to the eastward. In this part of the race, the *Arrow* kept well ahead of the *America*; and the *Musquito*, true to her reputation for working well to windward, and carrying a jib-headed topsail which stood like a board, increased her distance ahead of both her rivals.

Off Shanklin, the *Musquito* prudently shifted jibs; and the *America* about the same time furled her jib, and appeared to hold a better wind under her three working sails with a small main-top-sail.

From the back of the Island to the Needles, the wind was on shore, which, added to the fact of the tide having now turned to the westward, caused the water to be less smooth than it had been to the eastward of St Catherine's. Here the yachts were just able to lie their course; and, while sailing thus for a considerable distance close-hauled on one tack, the *America* showed her wonted prowess; for she not only passed the *Arrow*, but having gained considerably on the *Musquito*, became a good second in the race.

From the Needles, until they were inside Hurst Castle, there was a change of position: there, however, the strong ebb-tide rendered it necessary for them to cross over to the Hampshire shore, which the *Musquito* appeared to do at an unfavourable moment, for she seemed awhile as though stunned by the tide; whereas the other vessels, which had kept somewhat longer under the island, on reaching the Hampshire shore, found themselves well up with her; the *America* having actually passed her, and become the leading yacht.

From Hurst to Leap the wind was on the larboard quarter; and the

SCENE FROM HALPE'S NEW OPERA OF "THE DEVIL'S IN IT," AT THE SURREY THEATRE.—(SEE NEXT PAGE.)

entters, notwithstanding the huge jibs and topsails which they had set after rounding the Needles, could do nothing with the *America* so long as her head-sails drew; but from Leap, through Cowes Roads, to Ryde, the tables were turned against the schooner: the wind was now right aft, and the superiority of the cutter *rig* in a chase dead to leeward was too apparent. Here, then, the contest became beyond expression exciting. The *America* still led; but the two cutters pressed on in her wake, as though mutually bent on the capture of a common enemy. At length they neared her so close that their sails appeared to beealm her; and then ultimately glided past her, side by side.

The race now lay between the two cutters; and itwas doubtful to the last. After passing the *America*, they had jibed from the larboard to the starboard tack; and the *Musquito*, having thus become the leeward vessel (if, indeed, either could be called to leeward with the wind so right aft), here made the manœuvre, which, although it at the time appeared advantageous to her, yet (as will appear from the sequel) was perhaps the cause of her losing the race: she bore up for a moment, then luffed gracefully across the *Arrow's* stern, and became the southernmost vessel.

Hence to the goal, they ran neck and neck. Unfortunately for the *Musquito*, in her new position, the Commodore's yacht (between which and Ryde pier was the goal), lay a trifle to the westward of the pier, which gave an advantage to the northernmost vessel; and thus the *Arrow's* bowsprit, appearing first across the diagonal line of sight, caused her to become the winner of a race which was probably more nearly a dead heat than any ever witnessed on the water.

Where all did so well, little can be held to have been proved as to the relative merits of the vessels. The *Musquito* out the water like a razor, while the *America* glided over it like a bird—the latter, perhaps the *safer* principle of the two. The superiority of the cutter rig, either in short boards to windward, or running dead to leeward, rems ns indisputable; while, on the other hand, the schooner was equally paramount on a reach, either close hauled or free. It is, however, a problem still remaining to be solved, whether a good cutter, or sloop, of the *America's* size, would not beat her on those points also.

The annual general meeting of the members of the club was held at Ryde, Isle of Wight, on last Saturday afternoon, for the purpose of determining on the merits of the respective protests that had been sent in against two or three prizes being given up that had been sailed for, and claimed by, yachts during the regatta. The first protest was by Thomas Rutherford, Esq., the owner of the *Princess Olga*, on the ground that the *Diancs* did not carry a boat during the race, as require! by the 14th article of the sailing regulations of the club. To this a counter-protest had been sent in, that two men left the *Princess Olga* after the preparatory gun for starting was fired. With respect to the former of these, it was deemed a fatal error, and invalidated her claim; but, as regards the latter, the objection was overruled. A new objection, however, to both the *Princess Olga* and the *Vestal* was raised under the 5th article, which requires that "in all matches, whether open to other clubs or not, the entrance-money must be paid to the secretary, or to the sailing committee, previous to starting." Mr. Rutherford omitted to pay his entrance until an hour after the race; and Mr. Rowles, the owner of the *Vestal*, did not pay his until Saturday morning. As the rules had not been complied with, the committee declared the race, on the whole, to be void; and ordered that the cup should be sailed for again, over the same course, without time, on the following Monday, the entries for it to close at midnight on that day (Saturday).

In consequence of this decision of the committee, the race was renewed on Monday morning. The following yachts appeared at the starting point off the pier:—

Yachts.	Owners.	Tons.	
Vestal	R. J. Rowles, Esq.	74	Union jack, white border
Princess Olga	Thomas Rutherford, Esq.	50	White, with blue diag cross
Benita	Col Frocstun, M.P.	60	Red, white cross

The course was the same as sailed on Tuesday, viz. round the *Nab* light-ship, passing each time outside the Noman and Sandhead buoys; round the *Calshot* light-ship, and all the four buoys of the Brambles: twice round, but with this difference, that no time for tonnage was allowed.

At half-past ten o'clock the starting gun was fired, and the race commenced. The first round was completed as follows:—

					H.	M.	S.
Vestal	,,	,,	,,	,,	7	42	30
Princess Olg	,,	,,	,,	,,	7	43	30

The *Benita* gave up on completing the first round, which she did about an hour after the *Vestal* and *Princess Olga*. The *Vestal*, therefore, became the winner of the cup, which was originally claimed by the *Dianes*, who, for some cause not stated, did not start a second time for it.

On Monday night the regatta ball was held at the Club-house, which was brilliantly attended by about 300 members of the fashionable world.

VENTILATION OF RAILWAY CARRIAGES.—A plan which appears to be well adapted for introduction during the present weather is proposed, of applying to the roofs of railway carriages horizontal tubes with ball mouths, arranged to catch the air while the train is in motion and direct it into the interior, the current of air being divided into streams by passing through wire gauze screens, and outward currents of air being produced by opening windows, composed of vertical panes of glass, and mounted so as to be capable of being turned in either direction, and accommodated to the motion of the train.

PROPOSED EXHIBITION OF METALLIC MANUFACTURES.—We understand that arrangements are now making by the Council of the School of Design, in connexion with the "Superintendents of Practical Art" (an office which has recently been created in connexion with the Board of Trade, having for its special object the supervision of the Schools of Design throughout the kingdom), to hold in Sheffield an exhibition, the object of which will embrace a display of metal work in all its manifold branches as adapted to the various staple manufactures of that town and district. We believe it is intended to exhibit the metal manufactures in each successive stage, from the ore to the finished product.

ACCIDENT TO THE "AMERICA" YACHT.—The *America* yacht, Lord de Blaquiere, in coming into Portsmouth harbour upon an ebb tide, on Wednesday, under sail, ran into a fishing smack, and carried away the smack's port water bulwarks; she then steered round, in endeavouring to avoid other mischief, took the ground on the Portsmouth shore, within a few yards of the floating bridge, and remained a fixture for several hours. She would have gone over on her bige or starboard broadside, but tackles were run out from her mastheads to the bollards of the floating bridge to keep her upright. It is thought her copper will be damaged, and the hull and masts strained by the accident.

Mr. Sharman Crawford, in a lengthened address to the friends of the Tenant League, and all others interested, has bade farewell to Parliamentary life.

A *soirée* on a grand scale took place at Wolverhampton on Monday night, to celebrate the taking possession of a new estate, purchased by the members of the Freehold Land Society; it is some eighty acres in extent, and has been laid out with great taste and beauty. Speeches were delivered by the Hon. C. F. Villiers, M.P., Mr. S. Scholefield, M.P., Mr. George Dawson, and other gentlemen in advocacy of the extension of the movement.

The *Giornale di Roma* of the 20th gives a long account of the construction of a sub-aqueous electric telegraph which has just been opened between Naples and Gaeta. The wires are covered with gutta percha; and the writer says it is the longest line ever constructed on the same principle.

Garotte robberies have become very frequent in the neighbourhood of Leeds. On Monday four ruffianly fellows—named Wood, Bone, Hudson, and Turner—were remanded by the magistrates on the charge of perpetrating two robberies. The victims were Michael Coleman, a young man, and a person named Broadbent. The latter had been found by the police, half strangled and bleeding, in a lonely part of the town on Sunday morning.

The *Cheltenham Journal* says:—"Pauperism appears on the increase in the town. There are now in the house as many as 110 persons—a larger number than can be remembered at any one time before."

Correspondence from Rome announces the discovery of a magnificent bath of Oriental alabaster by workmen employed in repairing the watercourses of that city. It has been found on the Piazza of the Holy Apostles, in the immediate vicinity of Trajan's Forum, and no doubt was formerly one of the ornaments of that gorgeous fabric. Unfortunately, it has been somewhat damaged by previous workmen, who appear to have broken a hole through the alabaster side, in order to pass a water conduit through it.

The latest accounts from the Philippines reach to the 18th of May. Don Mariano Ozaeta, who commanded the Spanish expedition against the island of Mindanao, had succeeded completely, and routed the inhabitants of Jugud. The Spaniards had but eight wounded, among whom was the commander himself, Ozaeta.

THE THEATRES.

HER MAJESTY'S.

Gardoni's *Arturo*, De Bassini's *Riccardo*, and Lablache's *Georgio* are unusually attractions in the "Puritani," and, combined with the artistic, if not dramatic, *Elvira* of Madame de Lagrange, has rendered the performance of this charming production one of the most successful executions of this season. The fourth representation, on Saturday, deserved the plaudits so liberally bestowed by the audiory. The new ballet-divertissement, produced on the same evening, "La Bouquetière," invented by Madame Guy Stephan, is founded on the well-known French print of "La Parisiaan de dix heures." *La Tulipe* (M. Durand), is the most gallant of Gallic Guardsmen, and therefore carries by storm the heart and hand of the graceful *Marietle* (Guy Stephan), during a dictaon in the flower market, by the side of a river, and the marriage of the soldier and flower girl is celebrated in a winter garden, under the roof of a crystal palace—which did not exist in the time of Louis XV., when the scene was laid—in which the anthoress and *danseuse* so curiously introduces in her *divertissement*; but, *cui bono* finding fault with anachronisms and impossibilities Does not Guy S ephan hold the patent for geology, and does not Fleetwood Lodge in the Isle of Wight, on a scale to show, without doubt, that she has never been a martyr to the Corn Laws; and Esper and Lamourenx, do they not prove that perpetual motion is clearly ascertainable, by the display of agility on the pedestrian and contradictions of a ballet in its progress, "La Bouquetière" will please, because its groupings are gay and animated, and the chief dancers are active and graceful.

Bellini's "Sonnambula" was given for the fourth time this season on Tuesday; Mdme. Charton replacing Mdlle. Cruvelli as *Amina*, and De Bassini appearing for the first time as *Count*. Mdme. Charton was the last singer in this country at Drury Lane Theatre, in 1846, with the Brussels company of the late M. Hanseens. She subsequently became very popular at the St. James's Theatre, and at Mitchell's, in Regent-street. Both in Paris and Brussels, in this "cabinet" description of opera, she has been a favourite. but her *début* in the extensive arena of the Italian Opera has evidently been a mistake, her physical power is totally inadequate for so large a house, and for such a music, it must be added, noisy orchestra. Her *Amina* is a comely coquette, quietly acted, and sang in the most subdued style; a smaller voice and a more *prunissimo* manner were probably more suitable. Mdme. Charton is also a pupil of Mdme. Ugalde, Mdme. Charton is at the Opéra Comique a triton amongst the minnows; but at the Italian Opera they are both out of their element. Her reception was as kind and as flattering as that usually awarded to *débutantes*, and her failure is really accomplished *artiste* not to be deceived by such hospitable signs. De Bassini's *Count* was a careful and artistic performance; the opening air sung in a very beautiful sentiment, and in a voice which, in a sleep-walking scene was admirable. The *Elvino* of Gardoni proved how much this tenor is gaining ground both in force and intellectuality. After a struggle of five years with a weak but thoroughly unpractised voice, his physical condition has so ame-lorated that he bids fair to take the highest position amongst great tenors. A good *seconda donna* is a great want, as Mdlle. Feller's *Lisa* painfully indicated. The ever-welcome sonnet in "La Prova," with Mdlle. Dole Lacrange and the two Lablaches, and "La Bouquetière" concluded a long programme.

Donizetti's "Lucrezia Borgia" was to have been revived on Thursday night, for the welcome return of Madame Frezzolini; but, owing to her indisposition, the opera was changed to "Don Pasquale."

ROYAL ITALIAN OPERA.

Bellini's "Puritani" was presented for the fourth time on Saturday, with Mdme. Grisi, Mario, Ronconi, and Marini.

Donizetti's "Anna Bolena" was revived on Tuesday. This was the first work which made the composer's name in Italy. It was produced at the Carcano, in Milan, in 1831, with Pasta, Galli, and Rubini, and was the precursor of Parisina, Torquato Tasso, Lucrezia Borgia, Gemma de Vergy, Marino Faliero, Lucia, Bellario, Betly, Roberto Devereux, La Figlia del Reggimento, Maria di Rohan, Don Pasquale, Maria di Rohan, Don Sebastian, &c. In making the enumeration, it will be seen by the amateurs that there are still many of Donizetti's productions which are worthy of revival. Pasta and Rubini, in Queen Majesty's Theatre, rendered "Anna Bolena" very popular, the *Guidici* of the former, and the "Vivi tu" of the latter live in the recollection of opera-frequenters, as unsurpassable displays of histrionic genius and vocal supremacy. The injured Queen has justly regarded as one of Grisi's finest delineations, and this opinion was not weakened by her acting on Tuesday, although her voice exhibited unmistakable indications of fatigue and uncertainty. Mdlle. Bellini appeared for the first time as *Lady Jane Seymour*; she was nervous, but her voice is fresh and well cultivated, and she looked the character well. The absence of Mdlle. Sorgola, through want of dramatic intelligence in her sympathetic voice was heard with pleasure in the romance "Deh 'non voler." Mario's *Percy* is not one of his best assumptions, and the "Vivi tu" is not well adapted to his voice; with the utmost fidelity he sang the music, but not in the subdued passages. Marini looked as if he had walked out of one of Holbein's frames in Hampton Court, and sang powerfully in the concerted pieces, especially in the dramatic act. Mdlle. Rambo, making her first appearance, of intonation seem to be chronic, and are a sad drawback. The accompaniments were exquisitely executed by the band under Costa's direction. The Tudor Hall of Grieve and Telbin is magnificently painted, with the cessation of the guard standing motionless like statues. This scene is thoroughly artistic as well as gorgeous

On Thursday the final subscription night of Saturday, September 4, was included. Meyerbeer's "Huguenots" was performed for the eighth time.

Spohr's "Faust" will be repeated to-night (Saturday), and, for the first time, under Costa's direction. Julllen's "Pistro il Grande" will be ready in a few days.

SURREY.

The announcement of an "entirely new and original comic opera," in two acts, entitled "The Devil's Daughter" (the music by Balfe, and the libretto by Mr. Bunn), attracted, on Monday night, one of the largest and most remarkable audiences ever collected within the walls of the Surrey Theatre. The pit and galleries were filled with the usual southern aborigines of the district, and in numerous waistcoatless; but the boxes and private boxes were tenanted by almost every professor and amateur of note in the metropolis, including the principal members of her Majesty's Theatre. Let it be recorded to the honour of the transpontine visitors, that their attention to the opera was as profound, and their enthusiasm as marked, as that exhibited by the most refined *connoisseurs*. It is an event of no ordinary significance, to find that Miss Romer (under whose direction this operatic establishment is) could have relied with such just foresight on the nationality of her patrons, to give a commission for a new opera to Bunn and Balfe, who heretofore had so successfully co-operated on the boards of a more aristocratic arena. Probably, the greatest success they ever achieved, in the "Bohemian Girl," which opera was founded on the ballet of the "Gipsy," at the Grand Opera in Paris, suggested the selection of the well-known ballet, "Le Diable à Quatre" (performed popularly by Adolphe Adam's cousin), and Carlotta Grua's exquisite dancing and pantomime. But it is an error to suppose that the admirable story, and the magic employed therein, are of French origin, under the title of "A Devil of a Wife; or, a Contested Succession," Mrs. Woodv's *Jobson*—a performance which some very ancient playgoers represent as perfect. Within the recollection of the present playgoers, the *Nell* of Mrs. Davison (Miss Tarrant) and of Miss Kelly, and the *Jobson* of Bunn and W. W. Farren, are cited as masterpieces of comic acting. Mr. Bunn has altered the locality and names of the characters in his adaptation, which has been written with tact and humour. Jobson, the cobbler, becomes Jobson, the basket-maker (Mr. H. Corri); and his wife, Neil, *Lelty* (Miss Romer). Sir John Loverule is called *Count Wallenburg* (Mr. Travers); and his wife, the *Countess* (Miss Poole). *Albert* (Mr. C. Romer); and *Nell* (Miss Romer), are Count and Countess's children; and the fencing-master in the ballet is appropriately made a music-master (Herr Klichler). The necromantic agency is exercised in an opening incantation, in the exchange of the wife with the wives, and in the gallery of flowers, thus enabling Mr. W. West to display his taste in grouping in a very picturesque spectacle.

A more decided triumph was never witnessed on any boards. Incessant merriment accompanied the comic situations, and repeated encores indicated the unbounded gratification at the musical portions. There were no less than eight encores, viz. the overture; the air sung by Mr. Travers, "Oh, sight encores, viz. the overture; the air sung by Mr. Travers, "Oh, did we know!" and "Some hearts we find all senseless grown;" Miss Romer's two ballads, "With dance and song," and "Were there ever seen such riches" Mr. Borrani's song, "If, in the Fairies' picture book;" the polka duet between Miss Romer and Mr. H. Corri; and the duettino at the dressing-table, between Miss H Coveney and Miss Romer. At the end of the first act poet and composer were called before the curtain; and at the end of the last the principal performers had the same ovation with bouquets, &c.; and Balfe and Bunn were again compelled to appear—the Drury-Lane lessee seizing this last occasion to make a neat and amusing address of thanks.

There can be no question that the selection taken to the Surrey demonstration. The libretto is one of the best books on the lyric stage, and the music is generally in Balfe's happiest vein—light, gay, elegant, ever grateful to the ear often sparkling, and in some instances, like his pretty orchestra. The duettino at the dressing-table is quite a gem of the Mozartian school, but thoroughly original; and the half-sleepy, half-intoxicated song of the basket-maker, at the beginning of the first act, is a most humorous effort. The instrumentation being as masterly as the voice part is characteristic. The trio between the musicmaster, the Count, and *Lelty*, as the Countess, at the pianoforte, is also extremely clever and characteristic. The duet between Miss Poole (as *Lelty*) and Mr. H. Corri, well acted and sung by the two *artistes*, is ingeniously handled. The ballads are, in the aggregate, Balfeish—a word that speaks volumes, by the way, for the individuality of the composer, who has the secret of stringing a few notes together in a plaintive theme, and, by its reiteration, fixing the subject on the memory. Amongst the best specimens is the opening air, artistically sung by Mr. Travers, with a pleasing violon obligato

The exertions of the vocal and orchestral forces to do justice to their respective duties merit the highest eulogium. One and all seemed resolved to act as if the fate of the work depended on individual effort; and with such a just and proper artistic feeling, many deficiencies, arising chiefly from, perhaps, unavoidable limited resources, choral and instrumental, may be overlooked. Still the *ensemble* was careful, zealous, and conscientious. Herr Meyer Lutz, the conductor, took especial pains with his small phalanx. Miss Romer's acting must be especially referred to, as worthy of the palmy days of the English drama.

MR. BUCHANAN, THE AMERICAN TRAGEDIAN.—Mr. Buchanan is the son of an officer in the American navy, and grandson of Thomas M'Kean (after whom he was named), who was a member of the Continental Congress, and signed the Declaration of Independence. Mr. Buchanan was educated for the navy, and, at the age of thirteen, entered the service as a midshipman. After four years' service, however, being wearied with the monotony of a sailor's life, he resigned his commission, and became a merchant at Louisiana, where, for nine years he was at the head of a shipbuilding firm. During his residence at New Orleans, he became the founder of probably the largest literary association in the world: it numbers 500 and odd members, and is a chartered institution, the Governor and State officials being members. They have a theatre, built by Mr. B., and capable of containing 3000 persons. It was there he first developed those powers which eventually induced him to abandon mercantile pursuits, and devote his energies to the histrionic art. His success from the first was unquestioned. He took a leading position in the first-class theatres in America, and, after a rapid succession of dramatic triumphs, has been at length induced to cross the Atlantic, and hazard his fame to the criticism of a British audience.

MUSIC.

BIRMINGHAM MUSICAL FESTIVAL.—Viardot, to the great delight of all admirers of her genius, is engaged at the Birmingham Musical Festival in September. Madame Viardot can sing in the English, German, French, Italian, Spanish, and Russian languages, and she is as useful in contralto parts as in the soprano one. Although, during the sudden illness of Miss Clara Novello, Madame Viardot once sang in one night in the two characters of *Alice* and the *Princess Isabella*, in Meyerbeer's "Roberto Il Diavolo!" and her *Azuree* is quite as great as her *Somnambula*. There is no living singer who can rival her in varied accomplishments and attainments, and in the wide range of her *repertoire*, whether on the stage or in the concert-room. Madame Viardot is now at her château, in Courtavenel, near Paris, and will arrive in Birmingham in September for the great triennial gathering, under Costa's direction The finest orchestra ever engaged at any meeting will be heard on this occasion, *carte blanche* having been given to one of the gifted conductors of the present century. Besides Viardot, Mdme. Castellan, Mdlle. Anna Zerr, and Mdme. Clara Novello, are the other sopranos; Misses Dolby and Williams, the contraltos; Signor Tamberlik, Mr. Lockey, Mr. Wilbraham, and Mr. Winn, the tenors; Herr Reichardt and the pieces from Mendelssohn's incomp'ete opera, "Lorely." Beethoven's choral symphony, Mendelssohn's "Walpurgis Night," Handel's "Messiah" and "Samson," Haydn's "Creation," and Mendelssohn's "Elijah," will also be executed.

NORWICH MUSICAL FESTIVAL.—The engagements are completed for the meeting, which will take place on the 21st 22d, 23d, and 24th of September, under the able direction of Benedict, the composer and pianist. We are happy to announce that Viardot is engaged for the morning and evening performances; and Madame Fiorentini, of Her Majesty's Theatre, for the evening concerts. Amongst the other engagements are those of Miss Louisa Pyne, the star of English opera, and Signor Belletti, as Don Dolby. the second buffo. Signor Gardoni and Belletti, Herr Formès, Messrs. Lockey, Sims Reeves, and Weiss. Mrs Fanny Kemble will read the "Midsummer Night's Dream," with Mendelssohn's music, at one of the evening concerts; and the pieces of Mendelssohn's unfinished opera, "Lorely," will be performed; as also gleanings from Benedict's MS opera. Two new oratorios by English composers will be brought forward—Dr. Bexfield's "Israel Restored," and Mr. Pierson's "Jerusalem." Handel's "Messiah" will be given on the last day The local choral and orchestral force will be strengthened by a selection of the most experienced instrumentalists and first-rate instruments from London. The managers of the festival have aimed at the introduction of novelty in every form; and, with such a fine executive, a brilliant festival may be anticipated.

THE HEREFORD MUSICAL FESTIVAL.—The programme of the meeting of the three choirs held this year at Hereford has not yet reached us. Mr. Townshend Smith, the organist of the cathedral, is the conductor, and the days are the 14th, 15th, 16th, and 17th of September. Mendelssohn's "Paul" will be performed for the first time at Hereford. Madame Clara Novello, Misses Dolby, Williams, and Mrs. Endersohn; Messrs. Sims Reeves, Lockey, Phillips, Hobbs, and Herr Formès are engaged.

MUSICAL EVENTS.

Letters from Spa, of the 27th inst., state that the health of Meyerbeer was in a very precarious state. Since his arrival from Paris he had suffered so severely from cramps that he had been unable to take the mineral waters. It is to be hoped that the next accounts will supply a more favourable report of the celebrated composer. The managers of the Birmingham Musical Festival have already applied to Meyerbeer to compose an present meeting, but his indisposition prevented the completion of a sacred work, which for some time had occupied his attention.

Madame Sontag sang at a concert at Wiesbaden on Monday last. She has written to decline positively the offers to sing either at the Birmingham Musical Festival, or at Her Majesty's Theatre, this season, being obliged to take her departure for the United States on the 20th of August.

Prior to the departure of Mdlle. Clauss, the Bohemian *pianiste*, for the Continent, she was commanded to perform before her Majesty at Osborne, the Duchess of Kent and Prince Albert being present. She played no less than twelve pieces, and the Queen was pleased to express her admiration of the genius of the gifted young performer. She will remain the winter in Paris, and return to London in the spring. Amongst the departures for abroad are Sivori, Charles Hallé, Brinley Richards, Sainton, Mr. and Mrs. Alfred Bishop. The present musical stars in the United States are Alboni, Anna Thillon, Miss Catherine Hayes, Ole Bull (the violinist), and Paul Jullien (the boy violinist) Madame Bosting is expected at New York in September, accompanied by Herr Eckert (as accompanyist) and Miss Arabella Goddard (the young *pianiste*). Mdlle. Parodi, the pupil of Pasta, who formerly sang at Her Majesty's Theatre, has returned from her American tour.

M. Sainton, Mr. Cooper, Mr. Hill, and Signor Piatti, the concertists of the Quartett Association, have had the honour to perform before her Majesty and Prince Albert, at Osborne.

The directors of the Philharmonic Society elected as directors for the season 1853 are Messrs. Anderson (con. treasurer), Sterndale Bennett, Benedict, J. B. C. atterton, Sainton, J. Cantun, and J. M'Murdie. Mr George Hogarth, secretary, Mr. Ella, musical director, and Messrs. Lucas, Mellon, and H. Blagrove, auditors.

At the twelfth and last concert of the Réunion des Arts last Monday, at the New Beethoven Rooms, the executian s were Miss Ellen Rowland, Miss Blanche Young. Misses M'Alpine, Mdlle. T. Wagner, Herrn Gregori, Janza, Griffin, and Mons Goffrie. Messrs. W. F. Reed, J. Parker, Goldie, Richards, and Kloss

At the Brunswick Musical Festival on the last and 4th of July, Mendelssohn's "Elijah" and Beethoven's choral symphony were executed.

At the Ballenstadt festival recently, the executants, under Liszt's direction, amounted to 350 singers and 150 instrumentalists. In the programme the following works were announced:—Overture to "Faust;" "Walpurgis Night;" Beethoven's choral symphony, No 9, Berlioz's "Harold" symphony; Liszt's cantata. "The Power of Music," for soprano and chorus; J. Raff's "King Alfred" overture, Beethoven's ninth symphony (choral), and pianoforte choral fantasia, Weber's Polacca for pianoforte, played by Mdlle. Rosalie Spohr, piece of the composer, a scene from G lick's "Orfeo," and R. Wagner's "Tannhauser" overture; a duet from his opera, "The Flying Dutchman," and an oratorio for male voices, "Das Liebesmahl der Apostel." There were more than 3000 persons present at each performance, and Liszt was received with enthusiasm. Wagner's works, about which there is now so much discussion in Germany, were well received.

VAUXHALL GARDENS.—On Monday, the *élite* of the vocalists of Her Majesty's Theatre—Lablache, Gardoni, Ca-sa-ni, and Belletti; Ferlotti, Lavenu, and Pentland—will assist at a Grand Musical Festival in those Gardens to be followed by a new ballet, "Leola; or, the Enchanted Lake."

Mr Pepper has been giving a series of lectures at the Polytechnic Institution during the present and preceding week, on the methods of testing gold; on ores, quartz, &c.; and on the Australian gold fields generally.

A two-year-old mare, the property of Mr. William Fairray of Gallehouse, near Appleby, died last week, having been ill for some time, and baffled all the veterinary skill in the neighbourhood. On being opened by Mr Hird, of Bongate, who was anxious to ascertain the nature of her disease, an adder measuring 3 feet 7 inches in length was found in her.

Eight more English fishing-boats have been seized and carried into Cherbourg, for poaching on the French oyster beds.

A fine sturgeon was caught a few days ago at Bonar Bridge, in one of Mr. Young's salmon nets. It was purchased by Mr. William Mackay, and was iced up for the London market. The salmon fishing in Inverness-shire is proving a successful one this season.

No less a sum than £6000 has been paid through one of the banks of Penzance, by two firms in London, for potatoes forwarded from the neighbourhood during the past few weeks.

The *Ayr Observer* states that a severe shock of earthquake was felt at Kilmarnock on Monday night, about ten o'clock.

As Mr. William King, of the Commons of Navan, Meath, Ireland, was returning from divine service on Sunday last, about three o'clock, he was struck by lightning, and lifted from the place where he was walking over a ditch and hedge fully eight feet high, where he lay in the most excruciating agony for about half an hour, when death put an end to his sufferings.

LAW AND POLICE INTELLIGENCE.

FRAUDS UPON EMIGRANTS.

On Saturday last, at the Mansion-house Police office, before Sir R. Carden, a cruel system of fraud practised upon emigrants proceeding to Australia, was exposed, and the delinquents were brought to justice. It appeared that two men named Henry Graham Montagne and C. Julius Tripe, had issued prospectuses, and opened an office, No. 6, Austin-friars, in the City, apparently for the object of facilitating the emigration of parties to Australia and the gold mines upon reasonable terms, and had unscrupulously used without permission the names of a Lord and several eminent well known gentlemen, as directors and members of the company, thus presenting a species of guarantee for the respectability and honesty of the pretended company, which was called "The Australian Gold Mining Company and Emigration Company." The parties whose names were made use of were Lord Kilworth, Mr. Ruston Reed, Major Hawkes, and others and those gentlemen on Saturday, last appeared before Sir R. Carden, in consequence of the application made by Captain Lean, R.N., the Government emigration agent, upon the part of several poor men who complained of having been defrauded by Tripe and Montagne, acting under the alleged authority of the above-mentioned names. Mr. Dawson, who was named in the prospectus as 80 to the company, also attended for the purpose of disavowing any connexion with or knowledge of it.

Montagne and Tripe having been brought up on warrants, charged with having defrauded several emigrants of the passage money, the evidence was proceeded with.

John Jones, who had been a farmer, stated that having been attracted by an advertisement outside the office in question, on the 24th June, he entered and stated to Tripe and two other men he saw there, that he and three and four of his friends wanted to go in a second-class cabin to Port Philip. Tripe, who appeared to be the leading party in the office, said he would take £2 or £3 off if there were four or five of a party emigrating, and that the ship was at the West India Docks unloading, and her name was the *Camilla*. Witness and another man went down and saw the *Camilla*. They were to pay £22 instead of £25 each. When they visited the ship they saw the first mate, who said in reply to inquiry, "Yes, before the ship has been docked at by the company." On the 26th June witness and his friends went again to the office in Austin Friars, when they saw Tripe, who said, "Well, are you going to take your places for Port Philip?" Witness having replied in the affirmative, Tripe said he would take £3 or £4 off the charge at any rate. They were then introduced to Mr. Montagne and a stout gentleman, who said to Montagne, "It's too much to take off." Montagne came into the room, and witness and others gave him pay, four of them, agreed to pay £11 each provisions to embarkation. Witness paid £11 to Montagne, who signed the receipt and put the money, which Tripe had counted it, into a drawer. The receipt was cut out of a sort of check-book, from which many did not appear to have been taken. Witness said to Montagne and Tripe he hoped that the company were all right. They said "Oh! there is no fear of that; they are all respectable gentlemen." He had not seen the prospectus; he had only seen the bill which Tripe had handed to him before he went to see the ship. The bill described the vessel as a splendid first-class sailing ship, and stated it at further particulars application must be made to Mr. Tripe, 6, Austin friars. It promised the attendance of a medical man on board, and a pint of port wine per day, bottle of wine a week during the voyage. He received afterwards, in another bill, that there was no wine mentioned "Oh!" said he, "it's all right; you shall have it all." Montagne added, "You will be very comfortable, I am going with you." Witness called several times afterwards and saw boys in the office, and asked them about the members of the company. "Wo!," said they, "there is a company, and they sit on Tuesdays and Fridays." He continued to make inquiries, and was informed by Tripe that Montagne, who had received his money, was at Bristol. A friend of his, however, sent him word that he was in Whitecross-street prison, and he told Tripe that he had been told he was not right. Tripe said, "It's all right." (Laughter.) He stated by both Tripe and Montague that the ship would sail from the 15th to the 20th of July. He was prepared to pay the remainder of the passage-money when required to do so. He had not heard the *Camilla* had been sold.

The company removed from Austin-friars to Harp-lane. Specimens of minerals were then shown to witness and his party by Montague and Tripe.

Several cases of fraud having been proved,

Sir R. Carden postponed the hearing of further evidence in the matter for a week, observing that the cases already entered into had been satisfactorily proved. It was his intention, on the occasion of the next day's examination, to commit the prisoners for trial. The worthy magistrate then said: —"With respect to the noblemen and gentlemen whose names have been placed upon the prospectus in this nefarious association, I cannot too strongly express my regret that they should for a moment have been subjected to the annoyance which they must have felt at finding that their names have been used for purposes of deception. I have instituted the inquiry, and have obtained all the facts, and I feel the greatest satisfaction in concluding the labour of the day by observing that every individual whose name appeared upon the prospectus, testifying that he was a director, is completely exonerated from any imputation or suspicion. I am sure, at this stage in the inquiry, it will all acquit me of any intention of giving them unnecessary trouble, and will admit that the course I have adopted was the best calculated to do justice to them and to the public."

The gentlemen alluded to bowed to Sir R Carden and retired.—The prisoners were then remanded.

THE LATE BARONESS VON BECK AND M. CONSTANT DERRA DE MORODA.—On Wednesday, at the Summer Assizes at Warwick, before Mr. Baron Alderson and a special jury, a trial took place arising out of the arrest at Birmingham, on the 29th day of August, 1851, on a charge of conspiracy of raising money under false pretences, of the Hungarian Baroness Von Beck and M Constant Derra de Moroda—a matter which excited great public attention at the time, on account of the Baroness Von Beck being the principal in the police office at Birmingham, while awaiting the decision of the magistrates. The money alleged to have been unlawfully obtained was a sum of £1 4s, which had been advanced by George Dawson, of Birmingham, towards the publication of a work by the Baroness Von Beck, on the recent war of independence in Hungary; the false pretence alleged being that the Baroness Von Beck had completed such a work. On the present occasion the action was brought by M. Constant Derra de Moroda, against Mr. George Dawson, Mr. Henry Witton Tyndall, Mr. Richard Peyton, and Mr. Arthur Ryland, at whose instance the plaintiff and the Baroness Von Beck were arrested, to recover damages on account of the imprisonment, and the general injury done to his character by the proceedings before the Birmingham bench of magistrates, which proceedings had at the time terminated in being set free on the 30th of August, after having been twenty-four hours in custody, the charge of raising money under false pretences not having been sustained. The damages at the trial on Wednesday were laid at £50000. The defendants pleaded not guilty. The plaintiff, who was examined in support of the facts contained in the declaration, stated that he was a native of Pesth, in Hungary, and that his father filled the hereditary office of Xquerry to the Emperor of Austria, who is King of Hungary. After the examination of several witnesses, and the putting in in evidence of certain depositions as having formed the ground of proceeding by the defendants against the plaintiff, Mr. Baron Alderson asked for the production of the warrant which he supposed had been issued to authories the arrest of the plaintiff? No such document, however, being forthcoming, his Lordship intimated his opinion that in case the defendants should fail to the ground, as there was nothing to sustain the charge brought against them. There was nothing to show who had actually made the accusation against the plaintiff. The following proceedings were then had touch discussion between the learned council on both sides, the learned judge said, that, in the absence of any warrant or any evidence to sustain the counts in the declaration, as against the defendants, he regretted to say he could not advise a non-suit. He thought that the coercive measures taken against the plaintiff were very rash and very wrong, because he was of opinion that there was no reasonable ground for suspicion of anything to do with the Baroness Von Beck that was wrong. The plaintiff was therefore non-suited.

IMPUDENT FRAUDS.—In a former number of this paper we noticed the case of a man named Thomas Collins having been committed by the magistrate of the Westminster Police-court on a charge of obtaining the portrait of Lord Desart from his Lordship, upon the fraudulent pretext of being engaged in a work he was about to publish, entitled "Portraits of Eminent Conservatives." On Tuesday the prisoner was again brought up before Mr. Arnold, the magistrate, when similar cases of fraud were proved against him by Mr. Ingram, 13, Upper Berry-street, Clerkenwell, John D. Harvey, 4, Ryder-yard, the well-known American Daguerreotype artist, 433, West Strand; and Captain Ward. The portraits were ultimately found at different pawnbrokers, to whom the prisoner had pledged them. He was again remanded for a week. Mr. Arnold said he could procure two good sureties in £100 each he would take them. As bail was not forthcoming, the prisoner was sent to gaol.

THE WINDING UP ACTS AND RAILWAY COMPANIES.—A document containing the opinions of the Common Law Judges as to the applicability of the Winding-up Acts of 1848 and 1849 to railway companies has just been published. These opinions were delivered shortly before the dissolution of Parliament, in the matter of the Birmingham, Oxford, Reading, and Brighton Railway Company ("Bright *v.* Hutton"). At the conclusion of the arguments relied upon by the learned counsel who were engaged in the case, the Lord Chancellor, on the part of the House, submitted the following question of law for the opinion of the judges:—A railway company was projected and provisionally registered by the promoters. A prospectus was published, containing a list of the provisional committee and officers of the company, with seven persons connected with their own consent, in which prospectus it was proposed to establish a railway company, with a capital of £2 000,000, in shares of £25 each. A meeting of more than seven of the persons whose names had been inserted in the prospectus as provisional committeemen was held, at which a provisional committee and also a managing committee were appointed, each consisting of more than seven persons, consented with their own consent. At that meeting it was resolved to establish the company as proposed by the prospectus for constructing the railway therein mentioned, and to apply for an act of Parliament to establish such company, and to procure the necessary plans, &c., for that purpose. 3000 shares were allotted to different persons, but 800 only were accepted by the allottees. It was at once found to be impracticable to procure subscribers for a sufficient number of shares to enable the parties to carry the project into effect, and it was, therefore, by an order under the Winding-up Acts, ordered that the company should be dissolved. Question: Are the provisions of those acts applicable to this case.—Mr. Baron Parke, on a subsequent hearing, read the opinions of the learned Judges, which were given at great length. They were unanimous in thinking that the persons who acted together for the purpose of obtaining an a t of Parliament to make a railway in the manner therein stated were a company or association within the meaning of the Joint-stock Companies Winding-up Acts of 1848-49, and that the association of those persons may be dissolved and wound up under the direction of the Court of Chancery, if that Court; consider that it is fit and proper that it should be so dealt with.

LAW OFFICERS.—In the new Nisi Prius Act there is a provision requiring the law officers to perform their duties in person. It is declared that where it shall be made to appear to the said Commissioners of the Treasury that any of the officers mentioned ought to perform the duties of his office in person the said commiss oners, unless it shall be shown to their satisfaction that such omission arises from temporary and unavoidable cause, and they shall in writing approve of such omission, period not exceeding in any one time six months, shall, as the case may be, require the whole of the fees due to be received by such officer for his own use during the time of such omission, to be accounted for and paid over to the Queen's Exchequer, or shall out of such officer pay any salary otherwise due to such officer during the time of such omission.

OPERATION OF THE NEW EMIGRATION ACT.—A conviction of considerable importance has taken place at Liverpool, under the new Emigration Act, which will have the effect, by precedent, of defining and fixing accurately the responsibility of "the charter party," in cases of emigration ships. It appears that the *Otillia* sailed on Sunday night, the 18th July, leaving 23 passengers, who had come ashore under the impression that the vessel would not take her departure until Monday. On Monday morning, finding, however, that she had sailed, taking with her their outfit, necessaries, extra stores, and money, they repaired to the office of the agent, when a steamer was sent out to the passengers in search of the emigrant ship. This step proving unsuccessful, on Tuesday last, they proceeded before the Mayor, when the question of the responsibility of the charterer was determined by the magistrates of the Emigrants' Police-court, upon the application of Richard Boothroyd, an emigrant, who claimed a return of his passage money. On the application of Mr. J. S. de Wolf, as charterer of the emigrant ship *Otillia*, bound for Port Phi.ip, which vessel had taken her departure on Sunday, the 18th July, instead of Monday the 19th, as he had described to the emigrant passengers upon the printed bill. Evidence was given on behalf of the claimant to show that the vessel was announced, by the captain and mates, to sail on Monday morning, the 19th July. It was on the other hand, proved by witnesses that the steamer was sent out on the responsibility of the charterer was determined by the magistrates of the Emigrants' Police-court, upon the application of Richard Boothroyd, an emigrant, who claimed a return of his passage money. On the application of Mr. J. S. de Wolf, as charterer of the emigrant ship *Otillia*, bound for Port Phi.ip, which vessel had taken her departure on Sunday, the 18th July, instead of Monday the 19th, as he had described to the emigrant passengers upon the printed bill. Evidence was given on behalf of the claimant to show that the vessel was announced, by the captain and mates, to sail on Monday morning, the 19th July. It was on the other hand, proved by witnesses that the steamer was sent out to the passengers in search of the emigrant ship. This step proving unsuccessful, on Tuesday last, they proceeded before the Mayor, when the question of

THE GOODWOOD RACE PRIZE PLATE.

THE STEWARDS' CUP.—ETRUSCAN.—"BATTLE OF THE CENTAURS."

"THE NURSERY CUP."—CINQUE CENTO.—PRESENTED BY MESSRS. HUNT AND ROSKELL.

THE GOODWOOD CUP.—LOUIS QUATORZE.—"VICORY."

Four superb pieces of plate have been contested for at the Goodwood Meeting during the past week. Three of these "Cups" were ordered and selected by the stewards as the usual prizes; and the additional one has been presented by Messrs. Hunt and Roskell, of Bond-street, at whose establishment it has been manufactured from a design by Mr. Alfred Brown. It is a rich table ornament in the *cinque cento* style; and is adapted to support flowers or lights; the arches and uprights springing from a group of figures representing the "Sports of the World"—by the bull-fight of Spain, the tiger-hunt of India, ostrich-hunting in Africa, and the catching of wild horses by means of the lasso in America. The design is very graceful and spirited, and is altogether very creditable to the artist and manufacturers.

The second Cup, manufactured by Messrs. Hunt and Roskell, is a vase of the Etruscan form, after a design by M. Antoine Vechte, a Frenchman of great reputation as an artist in the precious metals. It is of noble shape and large dimensions, on the one side is an alto-relievo, representing the "End of the Festivities between the Centaurs and Lapithæ (Ovid, Book xii., line 292). Below this is a medallion descriptive of "The Carrying-off of the Lapithæ Women." On the other side (the front of the vase) is another alto-relievo, "The Battle between the Centaurs and Lapithæ." The subject of the medallion underneath is "The Crowning of the Victor by one of the Lapithæ Women." The handles are formed by two female figures, surrounded by foliage, which is supposed to screen them from the attack of the Centaurs. The group at the foot (in relievo) expresses the discord between infant Centaurs and infant Lapithæ. The figure on top of cover portrays "The God of Love in displeasure, asserting his overruling power." The silver is oxydised, which gives a fine tone to the work. It is one of the most superb cups hitherto produced, and has been carefully modelled by Mr. Frank Hunt.

The third piece of plate is from the establishment of Mr. C. F. Hancock, of 39, Bruton-street, manufactured in bright, frosted, and matted silver, and modelled by M. Freret, from a design by M. Eugene Lamie, an artist well known in this country by the tasteful excellence of his works, and of high repute in Paris. The Cup is in the superb style of Louis XIV., and is exceedingly rich and varied in the accessorial portions. The vase has four panels, in which are figures in high relief of Victory, holding wreaths of laurel, the emblems of the deities and the reward of the victors. These figures are of great beauty, and very delicate execution. Above the panels project in bold relief, from four niches, horses' heads, of admirable workmanship and full of spirit. On the lower part of the body of the vase are Tritons, with wreaths of flowers, &c.; whilst from the upper part a finely-modelled statuette of the Ocean Venus is reclining. The vase is richly embellished with massive garlands of flowers, effectively arranged upon a varied ground of classical scrolls and devices in great variety of relief, of matted and polished silver. The neck and handle of the vase, as well as the foot, are in strict keeping with the style of the period of the Grand Monarque. On the outside of the lip is a mash in polished silver with scales, and on the foot a wreath of vine gives variety of effect and richness to the whole work.

The fourth Cup, being the third of the usual prizes, is of entirely French design and manufacture, being from the establishment of Messrs. Morel and Co., of 7, New Burlington-street. It is an allegoric vase of highly burnished silver, beneath which, and springing from a richly decorated ebony pedestal, is the car of Apollo emerging from a cluster of clouds, his horses at full speed. His chariot is attended by two genii, who hold branches of palm, emblematic of glory. The handles of the cup are formed of allegorical figures of Victory, with outspread wings, and holding crowns of laurel. The great merit of this prize is its peculiar elegance of design and delicacy of execution, and originality of form.

It will be seen that three of the above Cups are the work of foreigners; and their excellence cannot fail to excite the emulation of English artists.

THE CHESTERFIELD CUP.—FRENCH DESIGN.—"APOLLO AND VICTORY."

BUST OF LORD BYRON.

BY BARTOLINI.

It cannot fail to interest all lovers of the Fine Arts, to learn that the busts of Lord Byron and the Countess Guiccioli, taken from life, by the famous sculptor, Bartolini, have just been received in this country from Italy.

Most of our readers, no doubt, will remember the notice of these busts in the published letters of Byron. They have remained in Italy for the last thirty years, in possession of the family of the late Mr. Barry, of Genoa (the banker and friend of the poet Byron), into whose hands they passed under well-known circumstances; and by whom they were bequeathed to his son, Capt. Barry, of the Austrian navy, the present possessor.

As works of art, these busts are worthy the reputation of the sculptor, at whose express desire they were undertaken, and were consequently with him, as Lord Byron observes, a labour of love; while from the testimony of persons who well knew the originals (as well as from the remarks of Byron himself), there can be no question as to the accuracy of the likeness.

We have only reproduced in our illustration the more interesting of the two, viz. that of the noble poet. It will be seen that the countenance is somewhat more angular, and the aspect of a more manly severity, than is usually attributed to Lord Byron in his earlier years. The expression, however, is very fine, and the work altogether worthy of a distinguished place among the memorials of the poets of England.

BUST OF LORD BYRON, BY BARTOLINI.—FROM A DAGUERREOTYPE BY BEARD.

LITERATURE MUSIC FINE-ARTS DRAMA SCIENCE

ILLUSTRATED LONDON NEWS SUPPLEMENT.

VOL. XXI.] SATURDAY, JULY 31, 1852. [GRATIS.

ADDRESS TO OUR READERS.

IN commencing a series of Monthly Supplements to the ILLUSTRATED LONDON NEWS, to be devoted exclusively to Literature, the Fine Arts, Music, the Drama, and the general history and progress of Science, a few words in explanation of our design may be necessary. Hitherto, with the limited space left at our disposal, after a copious illustration, as well as complete record of the incidents of the week, we have not been able to devote as much attention as we wished to the important subjects of Literature and Art. A newspaper must, in the first place, reflect and contain the political history of the time, and must fully report all the daily occurrences at home and abroad, which are of interest or of importance, in the public, or the social life of the community. In this respect we may state without boasting, that our Journal has supplied a great domestic want. By the aid of illustration, it has spoken a language that not only our own, but all nations can understand. Year after year our resources have extended themselves. Our friends have so increased in every quarter of the globe, that we receive sketches of scenery and of events, of men and of manners, by every mail and packet that reaches our shores. Into whatever regions Englishmen penetrate—whether impelled by the love of gain or of adventure, or whether in fulfilment of public duties—the ILLUSTRATED LONDON NEWS, we are proud to say, possesses correspondents ready both with the pen and the pencil to narrate and to depict the events of which they are the witnesses. The revolutions of the Continent, and the daily life at the gold diggings of California and Australia, are alike portrayed in our pages. America on one side of the earth, and China on the other, contribute faithful pictures to our portfolio; and Northern Europe and New Zealand alike keep us informed of all remarkable occurrences within their boundaries, and enable us to present our subscribers with faithful representations of them. Far more than the stage we may claim to be "the mirror of the time;" but the very abundance of our resources in this respect has had the effect of so fully occupying our space, that we have been reluctantly compelled to postpone, though not entirely to neglect, many subjects that claim our attention, and to devote less space to Literature, to the Drama, to Art, and to Science than their importance demands. The wondrous activity of our age is not so entirely political and commercial as might be supposed from the sole perusal of the public journals. In every department of human thought great energies are at work. English Literature is active, prolific, and purpose-like. English Music is assuming its proper place in the world's estimation, and its capacity for administering to the transient pleasure and permanent elevation of the national taste begins to be acknowledged. English Art is receiving new developments, and meeting with an amount of encouragement and appreciation long previously unknown, while English Science is rapidly changing the face of the world, and the fortunes of humanity. Among other nations, especially amongst those unvisited by the sore infliction of large standing armies, and by the unhappy prevalence of the military mania, a similar activity is manifested. They are running the same race, and giving a corresponding impetus to all the arts of civilisation. In order, therefore, to record more fully than we have yet been enabled to do, the progress of our own and other nations in these several departments, we propose to publish on the last Saturday of each month a Supplement exclusively devoted to the topics we have just enumerated. We hope to be able to notice, at greater or less length, every new book of real importance; and to treat with becoming fulness and completeness all questions of Musical or Dramatic Art; or of that to which the term of "Fine Art" has been more particularly applied. We shall also, from time to time, as circumstances warrant, extend our critical researches beyond the limits of our own country, and, as far as possible, keep our readers acquainted with the progress of other nations—especially of France, Germany, and the United States, which, with this country, may at the present day be said to monopolise Literature and Science, if not the Fine Arts. We shall also endeavour to record on a more systematic plan than has been hitherto attempted the progress of Science, in its two great branches of discovery and invention. Hitherto, neither our own Journal, nor any other, as far as we have been able to perceive, has recorded from time to time in a popular style, and in intelligible language, unencumbered by technical and abstruse terms, the great discoveries of modern science, especially in physics and in chemistry; while even the mechanical inventions by which our age and country are so greatly distinguished, have failed to find a systematic record available for general use and comprehension. It shall be our object to supply this want as far as may be practicable, and to keep our readers informed of the sayings and the doings, the hopes and the achievements of the scientific world, on all matters that really relate to the public education on these points.

SCENE FROM SPOHR'S "FAUST," AT THE ROYAL ITALIAN OPERA.

Literature.

SHAKSPEARE and his TIMES. By M. GUIZOT. Bentley.

M. Guizot, leaving politics for letters, has reprinted his Essay originally prefixed to the Paris edition of "The Life and Works of Shakspeare:" and appended to his own lucubrations those of the Duke de Broglie reproduced from the "Revue Française." In both of these reissues there is much amusing and suggestive matter. We have a thoroughly French view of Shakspeare, somewhat odd at times, but frequently right, and always fresh and original. The writer commences with a justifiable defence of Voltaire, who, in calling Shakspeare "a barbarian genius," assumed more than the French public of his day were disposed to admit; and is therefore entitled to be considered as the initiator of a due recognition of Shakspeare among his countrymen. In discussing the dramatic system of either, therefore we should at least be as just towards the critic as he had been to the poet. The Duke de Broglie tests the matter anew, by taking us to the theatre and showing us the impression made on a French audience by the performance of "Othello." And here we are treated with several points of view, not less startling than were the scenes themselves to the unaccustomed spectators of that excellent tragedy—of all Shakspeare's plays one of the most regularly and best constructed.

It would seem that, in the tragedy as acted at Paris, the scenes at the end of the fourth act, in which *Desdemona* disarrays herself for bed, tells the tale of Barbara, and sings the simple song of "Willow," and which is usually omitted on the English boards, was performed; and, moreover, it is confessed that it was most effective with the audience. This scene, however, poetically beautiful as it is in itself, appeared to the ducal critic as a mere appendage, somewhat absurd perhaps, at any rate stopping the action of the play; and, tolerated as it was by the spectators, he was led to speculate on the change of taste which induced the public to delight in the performance, though on the previous evening it would not permit a similar interruption in the "Cid d'Andalousie." The scene itself is thus whimsically described :—

Enter into the Théâtre Français on the following day: there you will see *Desdemona* devoted to death by the stern *Othello*, yet half-assailing from his sister designs and terribly distorted misconceptions, on the point of crossing the threshold of that fatal chamber which was to become her sepulchre; you will see her, we say, pausing to detach, piece by piece, in the presence of the public, the ornaments with which she is decked, and to converse carelessly with her maid; you will see her interrupt your confidence in the reality of the distress which is harrowing her, by informing you that the news brought from Venice by her young relative, the messenger of the Senate; then, all at once, recalling to her memory the days of her childhood, you will hear her murmur, in an under-tone, an old ballad, no way indicating her position, except by the inexplicable sadness which is impressed upon her. You will see her at length terminate this conversation by gravely discussing the virtue and the frailty of women; by reproving with a modest and indulgent dignity the fickleness of *Emilia*, and humbly praying God to watch over her, and to keep her ever pure and discreet. And you will see the public justly delighted with this scene, and manifesting far more chagrin than impatience at its close.

The speculation which follows on this is subtle and refined to a thought; but it is not critical, it is merely witty; it is intellectual, but not æsthetic. There is a want altogether of the artistic feeling, although there is a thorough appreciation of popular apprehension.

The performance of the "Othello," in Paris, was like a resuscitation of the poet, and had, together with the charm, the tentativeness of a new discovery. It was treated by the audience as if it were an entirely new play, and had for the first time to be criticised. Accordingly, we are gravely informed by the Duke de Broglie, of the divisions of the play into comedy and tragedy, with a complaint that the former "appeared to be long, and rather overdrawn." Moreover, it produced "a feeling of disapprobation and impatience." The "shock" also was "unpleasant" of "abruptly passing from the gay and playful disposition" of the earlier portions "to the terrible pathos of the gigantic scenes of jealousy which terminate the third act." The "comic element," besides, is "purely adventitious."

The critic's estimate of the characters of *Othello* and *Iago* is crude in the extreme, and almost infantine in its incompetence. The former we are called to look upon as "in the first place a *sauvage*"—one "who has for a long time remained alone, and lived the live of a *brute*," cherishing, meanwhile, unconsciously, an "interior goodness," a "native generosity," such as "poetic fictions attribute to the lion, the monarch of the desert." Such a leonine man is *Othello*, transformed into a civilised one by war, and by war alone; "his discipline is that of the soldier, his moderation is that of the tamed animal." Love is "an accident of his existence: it is that of the tamed animal." Love is "an accident of his existence: it is that of the tamed animal." Love is "an accident of his existence: it

ishill wrote admirable songs, greatly above Burns' average level, and sometimes rivalling his highest flights. Thoroughly lyric and thoroughly national, it would be difficult to point out two more satisfactory specimens of Scotch rural songs than "Let us go, lassie, go," and "Gloomy Winter's now awa." Motherwell's forte was pathos. He was less a song writer than a composer of small poems; and into them he poured an artless tenderness, and sometimes a deep pathetic power which is irresistible in its simple truth. "My heid is like to rend, Willie," is just such a piece of pathos as would have made Crabbe weep; and "Jeanie Morrison" is a sweet reminiscence of rural Scotch childhood. Allan Cunningham wrote much, and well. He, too, had the lyric gift; and his songs were always songs, not poems under false colours. Hogg the Ettrick shepherd, was unequal, devoid of all but accidental taste; yet, with the strong poetic spirit tugging at heart and brain, he wrote songs full of national instinct and strong and manful *gusto de couer*.

The above remarks on Scottish lyric poetry have been suggested by the "Book of Scottish Songs," which the proprietary of the "National Illustrated Library" have brought out as a companion volume to the Book of English Songs." It has, as the reader will have seen, been less an object to give any critical account of the volume in question, its arrangement or its selection, than to fling together a few observations upon the poetic rank which Scotch lyric poetry is fairly entitled to take, and to analyse its constituent elements, separating it for a moment from the music which has been long its herald, its crown, and sometimes its staff. We have calmly endeavoured to point out the features, the peculiarities, the beauties, and the shortcomings of the Scottish muse; and we have done so, conscious that the many glowing, pathetic, and artless strains which she has sung, are only the higher honoured and the better appreciated by being separated from a sediment of doggrel by which they are too often debased, and delighted that in the "Book of Scottish Songs" this most desirable consummation has been ever kept in view, and steadily and conscientiously accomplished.

MODERN POETS and POETRY of SPAIN. By JAMES KENNEDY, her Britannic Majesty's Judge in the mixed Court of Justice at the Havana. Longmans.

The design of this work is better than its execution. The translations are evidently rendered with care, and, in the author's opinion, who has peculiar notions upon the subject, sometimes excel the originals. With superior authors, he tells us, it matters little in what language they are read. The reason he gives is thus magniloquently expressed:—"Words are the daughters of earth; but thoughts are the sons of heaven." English words he prefers to Spanish ones, because the former are monosyllabic, and the latter sesquipedalian. He flatters himself, too, that his lines will not be found ragged, since he totally differs from those writers, Coleridge and others, who affect a contempt for finished artification, and rely entirely upon the brilliancy of their ideas." Here there is manifestly some error; no such dictum being to be found in all the works of Coleridge, who, on the contrary, expressly required in a poem that it should be "a composition of which the parts and the whole should be equally pleasing;" and whose own verses are peculiarly remarkable for their melody. Notwithstanding, however, all these assumptions, and not a little that is his like pre-umption on the part of the translator, we may safely take his book for what it is—an agreeable miscellany in relation to modern Spanish poetry and poets, with some translated specimens of their productions, executed with considerable fidelity, and ambition, upon principles which he has been kind enough to explain, that are in themselves sufficiently intelligible, and, for the most part, unexceptionable and proper. Memoirs, also, of the modern Spanish poets are given, with a statement of dates; thus ending us to compare readily the periods in which they flourished.

MONEY and MORALS. A Book for the Times. By JOHN LALOR. John Chapman, 142, Strand

Those are not acquainted with two more expensive words than money and morals, nor with two words which, according to common opinion, are more severely placed in antithesis. Money is described as the root of all evil; morals are all that is good and great in the character of man. We cannot, however, say that the author of Mr. Lalor's book has carried out in his work, or that he points out in detail the mischief wrought by money, either as the temptation to individual crime, or as the instrument, by meddling with which statesmen have made sad havoc of public prosperity, and caused infinite public mischief. Mr. Lalor's main object is to show that attention to money exclusively will not promote national welfare, and he falls back, like many other writers on practical Christianity At the same time, though he depreciatingly puts money as inferior to morals, he assigns to it more functions and greater power than any other writer we are acquainted with. He speaks of all fluctuations and changes in the quantity of commodities being caused by money, and attributes all our commercial convulsions to it; shocking, as we think, though he mentions the fact, that in the end it is the quantity of commodities which determines the quantity of money, particularly of money founded on credit, that is required or can be maintained in circulation. The particular point on which he differs from other writers is that he denies the favourite opinion of political economists—"that capital cannot be too fast accumulated;" and the first part of the book is occupied with the refutation of that principle. By throwing out on their statement he has made some progress towards a more complete description of the phenomena connected with capital than has hitherto been given. It is obvious whenever an old machine is superseded by one more comprehensive, as when the steam-press superseded the hand-press, that the capital accumulated in the old presses was destroyed and destroyed, and the improvement, being the substitution of better for a worse machine, was the destruction rather than the accumulation of capital. Now, if the accumulation of old presses stood in the way of introducing the new invention into use, as in many cases old institutions have impeded the progress of new inventions, the old capital has been accumulated too fast. So, when a house is burned down, or capital destroyed, labour is required to rebuild it, and the capitalist will not labour to work to which he would have given no employment had it not been taken place. In this instance it is the destruction, not the accumulation of capital which gives employment. The loss of the house is a motive for additional exertions on the part of the owner. Does something more for other men; that something is their reward. This is the question. If, however, the technical restriction of the term capital, to "savings set apart for the employment of labour," be adhered to, it is difficult to see how capital, or the means of employing the rewarding labour can be accumulated too fast. The difference between these views from the modern extension of the term capital to all "real commodities," whether used or not for the employment and reward of labour, with a view to give a profit to the capitalist. Mr. Lalor adopts the extended definition. Practically, however, it is clear that the progress of society and the fair distribution of the wealth of the world, depend much less on the increase of capital according to the definition of the economist, than on the increase of knowledge. Mr. Lalor then has refuted some of the errors of his predecessors, but has not been equally successful in showing that the fluctuations in the quantity of money determine the increase and decrease of "real commodities." He has the merit of making a prevalent error known, but he does not establish the correlative truth. We can trace in the scientific part of his book any great leading principle; his mind is more devoted to criticising others, of whom he generally speaks with great kindness, than to discovering and producing new truth. Much excellent writing the reader will find in the book, much judicious praise of distinguished men, but not great discoveries. The scientific portion of the work consists more of remarks on the opinions of others than of a severe logical development of a principle in the important question of "how the new gold will get into circulation," which has probably given occasion to the book, does not receive a satisfactory solution.

The second part of the book treats of the dangers to which society is exposed, and generally Mr. Lalor rather leans on others than trusts to his own vigorous but careful observation. Society always appears exposed to great danger, because it has a source of its own, which no man sees, but it is doubtful whether any peculiar dangers now press on it; and it is impossible to look back on the career it has run, very often through opposition to the will of those who have undertaken to direct it, without feeling a very great confidence in the future. We are hopeful that it will emerge from its present condition, or from what some writers call its evils, with increasing grandeur and magnificence. Mr. Lalor treats of such topics as taxation, and the danger from the present dislike to it, of rural life and its employments, of loans for agricultural purposes, and loans for colonisation, national defences, working partnerships, and a variety of other very interesting and popular topics. They are all discussed with great elegance, but Mr. Lalor is no more successful than many other writers in discovering remedies for social evils, or obviating dangers which it is the fashion for writers to exaggerate. On the whole, we must describe the book as rather tasteful than profound.

WEBSTER'S DICTIONARY of the ENGLISH LANGUAGE. Revised and enlarged by C. A. GOODRICH. London: Ingram and Co., 227, Strand.

During the recent discussion among the London booksellers regarding the discount on new books, Mr William Longman stated that the publishing firm of which he is a partner had long been anxious to publish a new edition of "Johnson's English Dictionary," that they were willing to pay almost any sum for the literary labour, but that they had not succeeded in procuring a man fully qualified as editor. The want, however, has been supplied, and the boon has been conferred, not by an English, but by an American, lexicographer, who has produced a dictionary suitable to the present state of our common language.

The first edition of the great work of Dr. Webster was published in 1828. It was the result of the continuous and undefatigable labour of twenty-one years. In that first edition there were found 12,000 words and about 40,000 definitions not to be found in any preceding work. A biographer of Webster, speaking of this edition, says, "Seventy years had elapsed since the first publication of "Johnson's Dictionary," and scarcely a single improvement had been attempted in the various edi tions through which it had passed, or the numerous compilations to which it had given rise, except by the addition of a few words to the vocabulary. Yet in this period the English mind was putting itself forth in every direction, with an accuracy of research and a fertility of invention which are without a parallel in any other stage of its history. The political changes which so signally marked that period, the excitement of feeling and conflict of opinion resulting from the American and French revolutions, and the numerous modifications which followed in the institutions of society, had also left a deep impress on the language of politics, law, and general literature. Under these circumstances, to make a defining dictionary adapted to the present state of our language, was to produce an entirely new work, and how well Dr. Webster executed the task will appear from the decision of men best qualified to judge, who have declared that his improvements on Johnson are even greater than Johnson himself made on those who preceded him." A second edition was published in 1840, when Webster was eighty years old. The attention of nearly his whole long life had been devoted to this great work, and in the edition of 1840 a vast number of words were introduced which made it emphatically the best dictionary of the English language.

The edition now before us is even more complete than that of 1840. Mr. Goodrich, on whom Webster's mantle seems to have fallen, has devoted years of diligent study to its preparation; and to this work he brought not only the ample resources of his own cultivated mind, but the active and efficient assistance of a number of the most distinguished scholars and scientific men both in this country and America. Many thousands of new words have been added, and this edition contains 27,000 more words than the best and most recent editions of Johnson. It is not a mere dictionary of definitions, though these are exceedingly full and numerous, but it also gives the derivation of every word, and its correct pronunciation. As various writers differ regarding the pronunciation of some words, a long list of these words is given, in which the difference between the pronunciation adopted by Webster, and that of Walker, Percy, Jameson, Knowles, Smart, and Worcester, is clearly indicated. Walker's key to the pronunciation of Greek, Latin, and Scripture proper names, is added to the work, but in a greatly enlarged and revised form. In addition to this there is a very complete vocabulary, giving the pronunciation of modern geographical names; this is preceded by a short essay, giving the elements of the pronunciation of the principal continental European languages.

The mechanical execution of the volume is highly creditable to both printers and publishers. The type is clear, bold, and distinct, and though it contains about 1300 pages of letterpress, yet it makes a good portable volume, easy and convenient for constant reference.

It is published at a price which places it within the reach of all the classes to whom it is indispensable; and whether in the school or the counting-house, the library or the parlour, we are confident that this work will be found of the highest value.

THE CHANNEL ISLANDS: HISTORICAL and LEGENDARY SKETCHES. By C. J. METCALFE, jun., with illustrations. Simpkin.

The scenery and traditions of Guernsey and Jersey are treated in this handsomely printed volume, by means of a series of poems, some written in the fatally facile octo-syllabic verse, others in the heroic measure, and a few in ballad metres. All have merits both of description and characters, but those which are most of a feeling for the romantic are sufficiently evident. An acquaintance with the style of Scott; his easy flow, and sometimes a similar felicity of expression, are also observable. But the stories have not a strong enough interest, nor the poetry a deep enough sentiment, to enable these poems to make a lasting impression; though, as topographical illustrations, they merit in this regard of the neighbourhood, the associations of which they seek to preserve "in numerous verse." In some of the poems, there is a sly vein of humour, which is pleasing, such as we find in a narrative entitled "St. Maglorius and the Druids," in which the Irish character of the saint is aptly touched off. The writer is well entitled to take his place among those minute poets, who, contenting themselves with humble themes, seek a reputation in a limited sphere, and deserve it.

ADVENTURES and RECOLLECTIONS of COLONEL LANDMANN, late of the Corps of Royal Engineers: 2 vols. Colburn.

Colonel Landmann is the son of the late Professor of Fortification and Artillery to the Royal Military Academy; and his position there enabled him to make the acquaintance of George III. and people of the Court. His connexion with the great, a visit to America, and a store of anecdotes derived from a general intercourse with society, appear to have made Colonel Landmann conceive the notion that he had the materials of a book of which he might be the hero. There is some vivacity in the style of these memoirs, but the events related are not always worth the trouble of recording. After thus rambling about the world for twenty-five years, Colonel Landmann became dissatisfied with his military position, and yearned for actual service, "his anxiety increasing daily lest he might rise in rank and sink in years without once facing the enemy." With these feelings and setting on the advice of a friend, he wrote a letter in 1805 to General Morse, requesting employment, and soon after was ordered to proceed to Gibraltar. Here the narrative breaks off; and here, too, shall our notice conclude.

A TREATISE on the DIFFERENTIAL CALCULUS; with its Application to Plane Curves, to Curved Surfaces, and to Curves of Double Curvature. By THOMAS MILLER, M.A., F.R.S.E., Rector of the Academy of Perth. Edinburgh: M'Lachlan and Stewart.

The student in the exact sciences may peruse this little work with interest and advantage. Hitherto he has tacitly looked for instruction to the *Seasons* on the classic margins of the Cam or the Isis, or to the articles which have appeared from time to time, during the last quarter of a century, in the pages of the "Philosophical Transactions." The scholar can with safety now go further north, for on the banks of the "Silver Tay" Professor Miller has quietly achieved a work which has passed muster amongst the giants of modern Athens—men neither belonging to humble guilds of literature, nor *certes* prone to praise.

Fine Arts.

EXHIBITION OF THE ROYAL ACADEMY.

(CONCLUDING NOTICE.)

THE Royal Academy closed its doors for the season on the 24th inst., and the other picture exhibitions have already followed its example, or are preparing to do so very quickly. We therefore take a farewell glimpse at the walls of the parent institution, and at the works of various contributors which we have omitted to notice on previous occasions.

H. Lejeune, whose soft and delicate touch we have had occasion to admire at different times, has a single production (454) in the present Exhibition, with which we must confess ourselves somewhat disappointed. It is a scriptural subject—

> One thing thou lackest: go thy way, sell whatsoever thou hast, and give to the poor, and thou shalt have treasure in heaven.
>
> And he was sad at that saying, and went away grieved; for he had great possessions.—*St. Mark x.*, 21, 22.

In this picture the artist seems to us to strive too much after effect, and to have failed to realise the simple poetry of the subject. The figures are too numerous and scattered; that of the Saviour is formal and stiff; the young man to whom the unwelcome admonition is addressed bows his head and smites his breast with an excess of emotion, and looks as if he had heard his death-warrant. The scattered groups of bystanders distract the attention, without adding anything to the effect of the principal subject; many are altogether meaningless; whilst others give a forced attention to he scene, and assume a lively astonishment which is wholly unveiled for. It need hardly be observed, that in episodes of this description, depending upon a direct moral relation between two interlocutors, the group should be composed of as few figures as possible; indeed, should be confined to the principals, unless any good reasons be assignable for the introduction of a third party, as in Titian's "Tribute Money" in the National Gallery (engraved and described in our paper of the 17th instant). In Mr. Lejeune's work we should also notice that the colouring is almost wholly composed of cold and doubtful tints, strangely scattered about, without any discoverable system, and the eye, after wandering hungrily over the canvass in search of some generous spot to rest upon, eventually quits the scene absolutely "starved out."

Amongst other scriptural subjects we have noted two or three for observation. Cornicelius of Munich has a picture (148) of "Our Saviour and the Woman of Samaria," in which we observe a meritorious attempt to follow the method of the best Italian schools both as to colouring and design, though less successfully in the latter respect, the figures betraying the stiffness and study which German art has not yet learned to avoid.

If Mr. Lejeune's efforts in the distribution of disagreeable tints are not to our taste, no more can we applaud the hot brick-dust atmosphere in which Mr. Armitage has absolutely enveloped his large picture of "Hagar" (413).

J. Martin, long the undisputed dispenser of elemental terrors, absolutely revels in brimstone and fire in his "Destruction of Sodom and Gomorrah" (1133): a work very similar in character to many he has produced before, and which have enjoyed a world-wide renown. In the present instance he has not produced anything to compare with the "Belshazzar's Feast," the "Joshua Commanding the Sun to Stand Still," or the "Deluge."

E. Hannah has produced two small conceits, respectively entitled "The Novel" and "The Play" (572 and 573). "The Play" gives us a fashionable party in a private box at the theatre: mamma very intent upon the play, by the aid of a *lorgnette*; young miss drinking in the flattery of a bearded foreigner who stands behind her, shrugging his shoulders and grimacing like a monkey, to the great annoyance of a mild young gentleman, who sits calmly by. The play-bill is appropriately inscribed with the announcement of "The Rivals." The other picture represents two ladies enjoying their drive in the park, in an open barouche or britzska, and reading the last number of "Bleak House," the genius of which production appears to be even more intensely attractive to the lubberly footboy in "buttons," who sits in the rumble behind than to his young "mistresses," and who stretches forward his head in the hope by the aid of eye and ear to catch the thread of the narrative. The execution of both these little works is of high finish.

"A NEW YORK COMMUNIST ADVANCING AN ARGUMENT."—PAINTED BY R. C. WOODVILLE.

Amongst the foreign contributors we find Mr. R. C. Woodville, of Baltimore (U. S.), with a very spirited little piece, entitled "A New York Communist advancing an Argument," and which we engrave. The rough-looking gentleman who is laying down the law is an admirable portraiture of an experienced pot-house orator. His victim is evidently "a good listener;" but whether he understands what he hears, may be a matter of question. The details of the picture are all appropriate, and carefully finished. Altogether this is a little work of more than ordinary merit.

M. Zeleneki, an artist of considerable renown at St. Petersburgh, contributes two pictures, which are entitled to notice for the character developed in them: they are both sketches of Russian life. No. 720 represents "A Russian Peasant Woman" in a corn-field, and in the act of reaping, or rather reposing for an instant in the midst of her labours, with one hand resting on her hip. The face and carriage are natural and truthful. No. 881, "A Wet Nurse in the Russian Costume," is even more remarkable in as far as the features and expression of the face are concerned, which are evidently genuine copies from nature. The face of the infant also breathes of innocence and life. The colouring, though delicately executed, is, especially in the first-named, weak and unsatisfactory, owing to an injudicious selection of pale, uncertain hues.

In the south room, in which are the miniatures and drawings, Sir W. C. Ross has several portraits, executed in his exquisite style of finish. Amongst them are two of the "Earl of Seafield," and of his "Countess," and another of the "Duchess of Athol." Thorburn stands out as a master of delicate expression and good taste in his portrait of "Lady Seaham," in which nature and high breeding are happily combined, and with great simplicity of treatment. The "Hon. Miss Vernon" and "Lady Levinge," by the same hand, are also very successful. Four enamels by Pauline Laurent struck us as being of the highest merit. One is a portrait of the "Prince of Wales," another a portrait of the "Duchess of Sutherland"—both after Winterhalter. The other two are copies after Raffaelle: 641, the "Violin Player," and 644, "La Belle Jardinière"—the latter the property of her Majesty. Of the drawings, 954, a "Study for a Fresco," by W. Dyce, is a single figure half length, boldly studied and well executed; and 957, "The Woodland Stream," by S. Read, is a charming little landscape, feelingly treated; 1001, "A Head of Lord John Russell," by G. F. Watts, has a severe and anxious expression; 1015, a full-length of "Macready," by A. Wivell, is a good likeness.

"THE TRANQUIL HOUR—A SCENE IN NORTH WALES."—PAINTED BY F. W. HULME.

TWO LANDSCAPES.

BY F. W. HULME.

"THE STRID, YORKSHIRE."
"THE TRANQUIL HOUR."

LANDSCAPE scenery is peculiarly the forte of the English artist. He is quite at home in "Merry England," because he has abundant materials of beauty, unsurpassed in the whole world, to educate his eye and to practise his hand. Such works are always peculiarly grateful to the English taste; and we have great pleasure in presenting our readers with Engravings from two delicious pictures of this class by F. W. Hulme, exhibited by him at the National Institution, in Regent-street.

"That of "The Strid, Wharfdale, Yorkshire," is of surpassing interest and beauty. It is not necessary for us to remark on the historical and poetical interest of the spot. We confine ourselves to the extreme loveliness of the scenery. Its utter isolation is most striking. Deep in apparently interminable woods, it appears to be quite cut off from the great and busy world without, and to be removed from the vicinity of factory, mill, or rail, as if spared to tourists as a specimen of pure, wild, original English nature.

It should be explained that the picture gives a low-water, or summer aspect of affairs, when the stream, not at any time to be made light of in this gorge, is upon its best behaviour. How unlike this it is in times of flood, the rocks on either side afford fearful evidence. Some further particulars of this romantic spot may at this time be acceptable—they are from the pen of a tourist to whom it is well known:—"The depth of this chasm has, it is said, never been ascertained; in width it is nowhere more than a few yards. The *strid* of six centuries ago has widened to a good leap in our time, owing, no doubt, to the wearing effect of countless floods. To a pair of good legs with a clear head attached, it is practicable in two places, the leap being made across the chasm by one and the return by the other; in each case from a higher stone to a lower one. The rock is red sandstone. Swarms of tourists visit the place every year. The best way to go is from Bolton-bridge, a distance of about three miles, mostly through the woods, by a good private carriage-road made by the noble owner, for the convenience of visitors, for which he deserves their hearty thanks. Pedestrians able to *clear* the strid should return by a path on the other side of the river. By a footpath, in continuation of the carriage road which stops at the strid, a mile or so higher up the river, the visitor may get to Barden Tower, a picturesque ruin, most picturesquely placed, forming the centre of as fine a landscape as England can show."

The picture entitled "The Tranquil Hour—a Scene in North Wales," represents a charming spot, more domestic in character than the last, but equally imbued with the genuine poetry of Nature. A sluggish stream meanders through a mountain pass studded with trees, whither herds of cattle are accustomed to wend their steps at eventide for water. These are scenes which one meets with occasionally, and which, when once one has learned to love them, are never afterwards forgotten. Happy the art which can realise them for transfer to the walls of our dwellings in smoky

"THE STRID, WHARFDALE, YORKSHIRE."—PAINTED BY F. W. HULME.

cities, to tell of health and tranquil happiness which still, in humble seclusion, survive the glare and strife of the wide world!

"HIGHLAND REAPERS." BY F. H. MOLE.

THIS very pleasing picture, which was exhibited at the rooms of the New Water Colour Society, is full of character, speaking of Highland life in its most primitive relations, and ably illustrating the description given by the poet:—

The Highland reapers from their scatter'd huts,
With shining sickles o'er their shoulders slung,
In motley groups collect. And from the hills
In bands their weary wanderings begin.
Far, to some lowland farm in fertile vale,
To cut the yellow corn, onward they hie:
The young, the old, the stalwart, and the fair,
Onward, to toil in autumn's glowing sun.
Taking awhile a temporary rest
Where, 'midst the mountains, sweet Compassion dwells.

THE GREAT EXHIBITION OF 1851.

REPORTS OF THE JURIES ON THE SUBJECTS IN THE THIRTY CLASSES INTO WHICH THE EXHIBITION WAS DIVIDED. PRINTED FOR THE ROYAL COMMISSION. 1852.

THE long-promised reports of the Juries to the Commission of the Great Exhibition of 1851 have been printed, and will shortly be issued to the world. Men will look with curiosity to them to see how the simple awards which were promulgated immediately after the close of the Exhibition, and which excited so much discontent by the suspicion of unfairness which attach d to them, will be justified by the allegation of reasons in their support by the adjudicating parties. The juries, in fact, are now upon their trial in appeal before the great court of public opinion, and upon the merits of the case they make out they must stand or fall.

It may be in the recollection of our readers, that immediately after the publication of the awards, we protested in a series of articles against those decisions in sundry instances. We also stated that we should wait for the reports themselves before entering more at large, and with full confidence, into a scrutiny of the conduct of the parties implicated. We prepare to redeem our pledge.

In the first place we must confess our disappointment which we are sure will be shared by all who take interest in the matter—at the manner in which these reports have been drawn up; and particularly in the entire absence from them of a species of information which would be naturally looked for as the very life of the whole affair, namely, the minutes of the proceedings of the several juries and groups, and most especially those of the Council of Chairmen, by whom the highest honours of the council medal were given or withheld. We should like to know, for instance, whether, at the jury meetings the award of prize medals and honourable mention were put to the vote, and, if so, what the numbers were in a division; we should like to know whether reasons were stated for and against granting the particular award; and we should like to see those reasons reproduced in the report; we should be anxious to know the circumstances under which the recommendation for council medals were agreed to or rejected at the meeting of chairmen. In short, we should look for the same open and above-board dealing, the same freedom of revelation, on the part of the juries of the Great Exhibition, as are found in the reports of parliamentary committees, and other responsible tribunals. But we find nothing of the kind. The Reports consist chiefly of disquisitions upon the general contents of the several classes, and of the peculiar industry connected with them; affording, it is true, in very many cases, particularly in those relating to articles of raw produce, a mass of very valuable information. On the other hand, when treating of many of the classes involving manufacturing processes, the information is incomplete, and often betrays favouritism to particular producers, at the expense of the claims of others. Thus, whilst at best the juries in these reports only travel over the ground already so fully and ably discussed in various published accounts of the contents of the Great Exhibition; on the other, they revive the jealousies and heartburnings which their previous brief flats had occasioned amongst the great bulk of exhibitors, and at the same time afford no revelation of the order and rationale of their decisions—no clue to the amount or quality of the authority by which they were carried.

Having chanced to alight on the report of Jury Class 30, we shall confine

HIGHLAND REAPERS."—PAINTED BY F. H. MOLE.

ourselves for the present to the points which it suggests; leaving over more purely industrial, scientific, and mechanical matters for discussion in a future article

The jury of Class 30—that of the Fine Arts (excluding painting)—though, strictly speaking, having a jurisdiction limited to works in sculpture, mosaic, &c., appear to have constituted themselves into a sort of committee of taste by whom every sort of production was, in an æsthetic point, amenable for judgment. We think this a mistake; the whole range of fine art are clearly distinguishable from that of taste in the decoration of articles of utility. The manufacturer, or practical journeyman, may be a good judge of the latter; the former are determinable by the strictest abstract rules of beauty and propriety. Moreover, an award of honours in fine art is dishonoured by association with awards for mere prettinesses of production; and the grand object of such a contest as that instituted by the opening of the arena of 1851, is, as far as has high art is concerned, defeated. Models of Lincoln Cathedral, of Nuremburg Cathedral, specimens of anastatic printing and of chromolithography, designs for shawls and cotton prints, painted flowers on china, carpet patterns (Gobelins and Beauvais to wit), metal castings, and even wood carvings, are not works of "Fine Art" to be rewarded with the same honours, by one and the same jury, as those awarded to works in sculpture, which is the very highest walk of art. Yet this incongruity the jury of Class 30 appear to have courted, for they say:—

The jury of Class 30 have been most anxious not to pass over any of the numerous objects in the Exhibition, which might properly be considered to be their duty to examine. They think it unlikely that any article deserving notice should have escaped their repeated, minute, and diligent inquiries. On the other hand, the jury have occasionally abstained from examination of objects respecting which, owing to the necessarily uncertain limits of the several classes, doubt might be entertained whether they strictly belonged to the fine arts or not. Should the jury of Class 30 have been led, in some few instances, to limit their jurisdiction too much, they have the satisfaction of feeling that ample justice had been rendered to exhibitors by those juries, to whose judgment such objects as have not been considered to belong to this class have been finally submitted. Thus the jury of Class 30 have purposely abstained from judging of such metal casts as they conceived to have been exhibited merely for the purpose of showing the successful result of a new process, or for the invention of a particular metal. In this case they were aware that another jury were about to take these points into their consideration, and judge of these objects as specimens of mechanical ingenuity. In some few exceptional cases, for instance, the claims of Messrs. Perry, Wesshaupt, &c., certain objects have appeared to possess so strong a claim to be noticed in this class, that the jury have not hesitated to do justice to them by an award, although such award might have been awarded by other juries: but whenever such instances of double awards have been made known to the jury, the fact has been noticed in this report.

Can anything be conceived more absurd than this arrangement? the result of which is, that Messrs. Wesshaupt and Sons obtain two prize medals, from two several juries, for a set of chess-men in silver and gold: while Mr. Behnes, who produced the very best piece of sculpture in the whole Exhibition, namely, "The Startled Nymph," goes without any prize at all! There must be no blinking the matter on upon such points. We have here evidence either of monstrous jobbing or of deplorable fatuity.

The jury of this interesting department appointed Mr. Penzati as their reporter, a gentleman who, beyond the mere awards, has not ventured upon the utterance of a single suggestion or idea. The whole report of this jury makes but six pages in the bulky volume of 800 and odd; and, to make up for this meagreness of information, Dr. Waagen (one of the jury) appends a "Supplemental Report" of his own, extending to sixteen pages: and Mr. Redgrave (another of the jury) "A Supplementary Report on Design," extending to forty pages. These supplemental reports, however, though signed "G. Waagen, Reporter," and "Richard Redgrave, R.A., Reporter," respectively, do not appear to have been authorised by the jury as a body; indeed, from the very fact of their being dated "November, 1851," a month subsequent to the closing of the Exhibition, and to the award of the awards, they could not have formed part of the Reports delivered into the hands of Prince Albert upon which those awards were based. Nevertheless, these supplemental Reports are printed and issued by the Commission as part of the Jury Reports, and we have a right to make use of the as such, and to resort to them for explanation of the grounds upon which particular awards have been made. This privilege we avail ourselves of the more readily, as, in their first meagre Report, signed Panizzi, they state:—

The jury would willingly have endeavoured to state, as directed by the 30th clause of the Council of Chairman, the several grounds upon which four of the great medals have been recommended; but, they think, it has been found impossible to comply with such an instruction with reference to objects of such variety, although they feel how desirable it was that such an instruction should be observed in those cases in which the elements out of which the juries were to form their judgment, were of a more definite and uniformly appreciable nature.

Frankly confessing that we do not understand what is driven at in the latter part of this sentence, and certainly unable with the avowal of the jury, as a body, that they are unable to state the grounds upon which they recommended three out of four of the council medals which they awarded, namely, those adjudicated to works of sculpture. The jury, however, do not leave us entirely in the dark as to the principles by which they were, or fancied they were, guided in making their awards. The following passage does honour to their intentions, and points to a position at once magnificent and mysterious:—

In forming their judgment upon works in the highest branch of art coming within their jurisdiction, the jury have principally looked for the embodiment of ideas, thought, feeling, and passion; not for the mere imitation of nature, however true in detail, or admirable in execution. They have looked for originality in treatment, in those or more happily expressed in that style which has for twenty-three centuries been the wonder of every civilised people, and the standard of excellence to which artists of the highest order have endeavoured to attain. Wherever this originality, combined with a judicious adaptation of this style, have been met with, the jury have acknowledged a corresponding amount of merit; and it is this originality of conception, improved by such style, which the jury have recognised, by the honours placed at their disposal. They have endeavoured to record, in the most emphatic manner, their anxious wish that artists should study to give their ideas that form and life which spiritualises the work of art to be placed as a type of nature itself. The jury of Class 30 would point to the remains of the Parthenon as embodying the result of the great principles which they have been anxious to inculcate, and which they desire to see universally adopted. The limited number of council medals awarded must not, therefore, be regarded as a proof of deficiency of talent in the bulk of the works exhibited, but as evidences of the severity with which the principles adopted by the jury have been applied.

Here the jury point to "the embodiment of *ideas, thought, feeling* and *passion*—not mere imitations of nature, &c.," which is good; they point to the remains of the Parthenon, "as embodying the result of the great principles which they are desirous to inculcate," which is very good; they declare that they will only have rewarded with the highest honours "the highest works of the highest class," which is better still; and then they tell us that they have only awarded three council medals in sculpture, and that these are to Kiss's "Amazon," Marochetti's "Richard Cœur de Lion" (which braved the scorching sun and pitiless storm outside the building), and to Pradier's marble statue of "Phryne." In what respect these works give evidence of being of the highest merit in the highest walk of art; how they embody the principles of "that style which has for twenty-three centuries been the wonder of every civilised people, and the standard of excellence to which artists of the highest order have endeavoured to attain," the jury, by their reporter, Panizzi, do not condescend to explain; or whether it was for the negative recommendation of failure in respect of "mere imitation of nature" that they were selected for distinguished reward, we are left in utter doubt. We therefore turn to the supplemental report of Dr Waagen, in hopes of finding some critical remarks explanatory of the impressions under which the jury, of which he formed a member, arrived at their decision. Unfortunately, Dr. Waagen's opinions do not seem to be in consonance with those of the jury—they certainly do not support their awards as re-pects essentials of high art. Speaking of Kiss's "Amazon," Dr. Waagen says, we think with justice:—

The approbation which it has received proves that, where a work of art possesses an striking merits, considerable faults cannot counteract the favourable impression which is produced. It is one of the fundamental laws of sculpture "in the round," that from many, but at all events from the principal points of view, the outlines of the figures shall be distinct, and at the same time beautiful; and this rule is signally transgressed in the work of Kiss. The forms of the tiger and the horse are blended together in one confused mass, so that the former view is very untrue, and even in the side views we lose on one side the head of the horse, on the other that of the tiger. Council medal (!)

Of Marochetti's "Richard Cœur de Lion," he says:—

The frank and noble conception of the chivalrous king holding up his sword in his right hand, and the spirited action of the horse, make this a very remarkable work. In one part, however, it is to be doubted if the modelling of the horse there is a mark of knowledge. The hind quarter, and hind legs, especially, have rather a mean appearance, and the execution of this part of the horse is very imperfect; the disposition of the veins particularly is altogether arbitrary. The artist has, however, exhibited within the building a horse's head finished in detail, and from this sample we may see that even on further modelling may much improve the general effect. Council Medal (!!)

Of Pradier's "Phryne," he says:—

The careful chiselling of the surface, and the general breadth of the treatment, show that the sculptor has not studied the master-pieces of Greek art in this group, and the artist has been for the most part very happy in the selection and treatment of the forms. The execution, however, is not equally careful throughout. Council medal for the Phryne (!!)

We leave these comments, which come from the pen of a critic of no mean repute, to speak for themselves. If they have any value they signally condemn of incompetence, or of something worse, the whole of the jury concerned in this department. We have not space to go into further details, or to touch upon other departments at present: we propose doing so in a future article.

Music.

THE ITALIAN OPERA-HOUSES.

Charles Mathews, the facetious actor of the Lyceum, in his recent *brochure* on the state of the French and English dramas, thus refers to the conflict between Her Majesty's Theatre and the Royal Italian Opera:—

A few years ago Her Majesty's was the only Italian Opera in London, but as there were not audiences enough to ensure its constant success, another opera was started at Covent Garden to oppose it; an honourable rivalry sprung up as to which could give away the greatest number of free admissions, and a succession of disinterested stir-ups have been made ever since to impart fresh life into both establishments, by the most extensive endeavours to cut each other's throat. Which house will ultimately succeed in this amiable object I cannot say; but, in the meantime, while the ingenious problem is solving, our first national theatre is dead.

The comedian's jokes on the operatic conflict are amusing, but not novel; precisely the same witticisms went the round of the clubs in the year 1847, the commencement of the conflict; but the two houses survive, and what is more, we believe will outlive even Mr. Charles Mathews's pleasantry. It is true that Mr. Lumley has announced his retirement from the management; it is equally true that the dog-days, the elections, and Mdlle. Wagner have caused Mr. Gye nearly as many untoward results as those of the rival establishment; but the supremacy of the opera in the present generation is too firmly established to admit of its decay, and the boundaries of the lyric drama have been too extended, to permit the existence of any monopoly. When the Italian stage was confined principally to the works of Rossini, Bellini, Donizetti, and Verdi, and when its chief attraction was the female company, little or nothing was achieved for art; but the introduction of the masterpieces of the French and German schools, and the advent of *artistes* of every nation to constitute the executive, have effected a complete revolution in the operatic system. The vastly increasing facilities of the railroad have rendered the provincial amateurs part and parcel of the nightly assembled multitudes in the London Italian Opera-houses; and if they have failed to be both financially successful we shall be prepared to prove on a future occasion that such failure has arisen from the perversity of the managements—first, in persisting to perform on the same nights; secondly, to the high prices, maintained to ensure full houses only for a limited period of the season; and, finally, to the insane policy of preventing the introduction by the respective subscribers. This, however, is not the moment to enter fully into the subject; at the close of the season, we shall open our case to indicate that two opera-houses in this vast metropolis for the due interpretation of the lyric productions of the Italian, French, German, and *English* composers, will only suffice to supply a reasonable want of the musical community.

It is curious that the advent of the dog-days should be selected by the directors of both Italian Opera-houses for the production of the novelties they have promised their patrons and subscribers. At Her Majesty's Theatre, the grand opera, "Casilda," composed by the Duke of Saxe Coburg and Gotha, the brother of Prince Albert, has been only mentioned in the daily bills within the last few days; and that of "Martha," Balfe's most all-engrossing object of activity, no less than four ballets and *divertissements* having been mounted, even amidst all the contrarieties of the manager, who has fought, and is fighting, gallantly in his retreat.

The Royal Italian Opera directors have not the same excuse for their supineness as Mr. Lumley. They made a pompous announcement of five novelties, namely, Donizetti's "Martin," Spohr's "Faust," Jullien's "Pietro il Grande," Rossini's "Count Ory," and Weber's "Oberon." The subscribers have only had the advantage of hearing the two first-mentioned productions; the third is under way, and will only be produced when the *habitués* have departed, and "Count Ory" and "Oberon" are amongst the postponements to an indefinite period. Now the persons who have taken boxes and stalls on the faith of the prospectus, have just reason to complain of its non-fulfilment, and they have an equal right to protest against the presentation of any new works on a non-subscription night. As this system was one of the complaints, by the supporters of her Majesty's Theatre, against Mr. Lumley, the Royal Italian Opera directors, who affect to remedy old abuses, have drawn down just censure for their imitation of the bad policy of the ancient house.

Up to this period, the event of the operatic season, at both houses, has been solely confined to the introduction of Spohr's "Faust," under the composer's direction. Spohr was born in Szeen, in the Duchy of Brunswick, either in 1780, 1783, or 1784—he cannot say which year; and, as director of music to the Court, Frankfort, Vienna, and Cassell, has occupied a high position on the German lyric stage by his operas, "Der Zweikampf der Gepebten," "Der Berggeist," "Faust," "Jessonda," "Zemire et Azor," "Pietro d'Albano," and "Das Befreste Deutschen." Although "Faust" was composed so early as 1814, it was unknown out of Germany. It was politic on the part of the Royal Italian Opera management to make an experiment with Spohr's operas; but despite of the *prestige* of the composer's presence, and of the care bestowed on the execution, in which Costa asserted largely, cheerfully resigns his post in the orchestra to give Spohr's "Faust," as regards public opinion, has proved a failure. The causes which produced this result have been explained in our weekly notices, but the fact is one which ought to be highly suggestive to the managers of the two Royal Italian Operas. The exhumation of the works of ancient and living masters will not be a process of long duration. After the operas of Gluck, Mercadante, Spontini, Cherubini, and perhaps Mayer, have been essayed, and some untried ones of Mozart, Cimarosa, Weber, Donizetti, Auber, and Meyerbeer, there will be left open the "vexed question" of the new composers. But herein is the enormous difficulty to be overcome by the ruling powers of the two opera houses. Mr. Lumley liberally gave commissions to Costa, Verdi, Halévy, Alari, and Balfe; and yet "Don Carlos," "La Tempesta," "Le Tre Nozze," and "Florinda," were one and all failures in a financial point of view. Mr. Gye's only act in the way of bringing forward original operas has been in authorising his partner in the promenade concerts, Mr. Jullien, to try his luck with "Pietro il Grande;" but of this essay we cannot now write. The importations from Paris, as regards Auber, Halévy, and Gounod have been singularly unfortunate at both houses, save in the "Masaniello." Even "La Dame," a masterly conception in its way, has not yet made its public; and "Sapho," though brimful of genius, was not tolerated. This review of the doings is discouraging for both opera houses; but it is useless to shut one's eyes and ears to facts. Since Bellini and Donizetti, no composer has arisen for the Italian stage like Meyerbeer, and the star even of Rossini has paled by the side of the Gallic-teutonic writer. The "Huguenots" in one season, the "Prophète" in another year, saved the Royal Italian Opera from perdition. Composers and their advocates are bound then solely in all the trammels of counterpoint, would do well to reflect on the causes of such numerous failures, and to account for the successes of French grand opera. It may be found that the inspiration of the libretto writer has helped the genius of the composer in those works which exhibit the greatest vitality; but opera managers have generally a horror of offering such terms of remuneration to poets and composers as would induce men of acknowledged ability to bestow their time on a new opera. Perhaps the new international copyright law may lead to some important changes.

The Drama.

THEATRES.

THE closing of the Haymarket, the Princess', and the Lyceum Theatres, seems to point out the present as the fit nr time for a due consideration of the progress made in acting and the drama during the past season. The flourishing condition of the Princess' Theatre, as an arena of legitimate acting, is a living witness of the wisdom of the law that declared the liberty of the stage, and permitted every theatre, major or minor, to perform the best obtainable dramas. Sadler's Wells, it will be remembered, was the first theatre that took advantage of the new act; and, under the management of Mr. Phelps and Mrs. Warner, prospered in the channel of Shakspearian revivals. Nothing was wanting but this kind of free-trade in the drama to ensure its continuance of life. At the very moment when it was declared defunct at Covent-Garden and Drury-Lane, and by many was thought to have died of the two patent houses and their monopoly, it took refuge in a suburban dwelling; and, though it had exchanged a temple for what was but a bettermost barn, was found all at once in a renewed and progressive state. The enterprise thus commenced has continued to be conducted in the most laudable manner; and to the energy and judgment of Mr. Phelps the highest credit is due. Down to the end of the last season it has been confessedly a benefit to the neighbourhood. The tastes of the whole community in that populous district has been raised by the moral and judicious management of its local theatre.

Mr. Kean was later in the field, but came to the Princess' with the advantage of the experience won from the smaller establishment. That experience had taught that the public would be satisfied with a management that had an honest purpose in view, and worked it out steadily and energetically. The thing chiefly needed was, that the plan of the season's campaign should be mapped out from the beginning; that the management should predetermine what pieces it should produce, and the probable run of each, so as to enable itself to accommodate its company and accessories to the business, rather than the latter to the former. For the blind agencies hitherto directing the course of theatrical chances, the new system substituted an intelligent conduct, conducive at once to order and economy. The system has secured proper intervals of time for the production of new pieces or revivals. In fact, Mr. Kean has calculated on two months' rehearsal and preparation for every new piece, and has thus provided for its perfect representation on the first night, thereby securing the approbation of the audience by the general accuracy of the initial impression. This is a great point gained and evades a world of peril and difficulty.

The season just concluded was inaugurated with the costly revival of a Shakspearian comedy and tragedy, "Twelfth Night" and "King John." The latter was placed upon the stage with a profusion of historical accessories, and unequalled for their correctness and expressiveness. The resources of a theatre like the Princess' allowed of no e being done in this way than was possible in the confined space and with the lower prices of a suburban establishment. Mr. Kean was thus enabled to place his house beyond ordinary competition. It has, however, been asserted by some, that this attention to accessories is injurious to the drama, and too often a substitute for good acting. The latter, as the Princess', is the best that exists; but, as to the dramatic question, there can be no doubt that the necessity for this excessive ornamentation in such plays as "King John," is a proof that the Shakspearian drama is no longer self-supportant—that it requires an excess of illustration to give it novelty and currency, and that this bolstering-up of works rapidly becoming obsolete, as acting plays, can only last for a short while longer.

In this *resumé* we must not omit to mention that the career of the Princess' during the last season was signalised by the production of an extraordinary piece, entitled "The Corsican Brothers," a melodramatic ghost-story, which has called forth as much praise as censure. The novelty of its stage effects, the striking nature of the superstition, the national manners portrayed, the interesting way it

of these were selected, and a company engaged expressly suited to their efficient casting, these produced in a fore-ordained order of succession, the Haymarket Theatre would appeal to the more polite portion of the public, which it has no difficulty in attracting. A large number of pieces, of various shades of merit, but none of them ambitious in their class, has been produced during the season, with, as it is understood, but a moderate share of success. Of these, the most prominent, and the most meritorious, have been a three-act drama by Mr. Mark Lemon, entitled "Mind your own Business;" and a comedy by Mr. Buckstone, called "The Foundlings." Both of these are domestic in their topics, and affect a certain extravagance in their theatrical management rather to avoid the critical standard than affect it, and aim at a supposed popular style of composition, that, while it declines to challenge severe criticism, appeals to the less cultivated taste of a promiscuous audience. If it could be proved by experience that this is the sort of thing most profitable to the Haymarket Theatre, we should concede readily enough to the propriety of producing it. But this species of production has patrons elsewhere, and seldom draws even moderate houses at this establishment. A standard classical theatre is at present wanted, and Mr. Webster might make the boards of the Haymarket an arena where the highest genius both of author and actor might find its culminating point.

The expediency of unity in managerial tactics was never more strongly exemplified than in the late experiment made by Mr. Bunn at Drury Lane. Like "a man on double business bound," he attempted to combine two objects, and failed to render full justice to either. Though aided by our two best tragic actresses, and a strong operatic company, the season proved unsatisfactory and unprofitable. The public failed to recognise a determinate purpose and singleness of aim; and though willing, were unable, to patronise, for want of a specific object on which their attention could be fixed.

Drury-Lane was re-opened on Monday, under the direction of Mr. Sheridan Smith, for the purpose of introducing Mr. Buchanan, from the United States, to a London audience at the national theatre. Mr. Buchanan had previously performed at the Marylebone, and evinced the possession of great power and intelligence; but it was evident that his style wanted the discipline which only continuous practice can give. The experiment ventured on Monday, therefore, was nothing less than this:—whether a Drury-Lane audience would recognise an actor of indisputable force and talent, notwithstanding the crudities inseparable from inexperience. The tragedy of "Hamlet" was the play, and the part of the melancholy Prince that attempted by the *débutant*. The meditative element in the character was not that which Mr. Buchanan had prominently studied; hence there was a general want of repose in the performance; but the more passionate passages were given with extraordinary vigour, and elicited the most vehement plaudits. A certain excess of energy, however, natural to mere impulsive acting, excited the disapprobation of the more fastidious portion of the audience; but, though the election was evidently contested, the balance of suffrages was greatly in favour of the candidate. Time will do for Mr. Buchanan all that he requires; the elements of greatness are in him; and when he shall have become better acquainted with the peculiarities of the elocution fitted for the English ear, and has rid himself of the heavy and prolonged emphases which seem to be cultivated on the American stage, but which are *counter* to the British public, he will find himself, doubtless, in a position to achieve a high rank in the histrionic profession. The *mise en scène* and the scenery, under the stage-managership of Mr. Henry Marston, were carefully selected, and the whole getting up was highly creditable to his judgment and care.

We should be doing a great injustice to the enterprising spirit of Mr. Mitchell if we neglected to notice his engagement at the St. James's of the German *troupe* led by Herr Emil Devrient in Goethe's elegant, classic, and eminently pathetic tragedy of "Egmont," followed by Schiller's "Don Carlos," Lessing's "Emilia Galotti," and other dramas of inferior reputation. The acting by this company, in these plays, has no doubt already exerted a moral influence on the prospects of the drama in this country. These earlier models of the German theatre, with all the tones and contortions about them of original inspiration, survived adverse circumstance, and begetting a school of histrionic emulation, the poems of "Faust" and "The Song of the Bell." This was a homage paid to poetry which evinced that these German actors had not conceived that absurd aversion to it which was once current in our own green-room; and which, indeed, only a few years ago, was the great impediment to the revival among us of the poetic drama. These Teutonic performances have undoubtedly inspired a taste for the latter, and justified its right to maintain possession of the stage which it created. An intelligible and definite appeal was made to the public, and the response was immediate and decided. The course of performances was generally felt to have been too brief; and it is confidently augured that the re-engagement of the German company will another season prove a profitable speculation, in a strictly pecuniary sense, as well as in a literary and artistic one. Here was a learned and aristocratic audience assembled, and investing with the highest sanctions the character of the entertainment. Her Majesty and Prince Albert also expressed their approbation by their repeated presence; and no encouragement was wanting that could be given to these highly laudable repossessions.

In "a great fact" like this, as also in the smaller ones to which we have alluded, abundant evidence is tendered that the supposed decline of the public taste for the drama involves a fallacy. The public have on all occasions shown a disposition to patronise whatever is worthy in the higher-class theatres, while the crowded state of the *Saloons* shows everywhere that for the mere dramatic *form* of composition the popular taste is as widely spread and as deeply rooted as ever. But the public rightly demand that the higher-class theatre shall have a higher-class drama; and that the appeal should be there made to cultivated minds. All twaddle concerning the drama addressing a mixed audience should be scouted. We cannot think too well of the public—nothing will be found "too good" for them; and managers and authors may be assured that of what they have produced has failed it was "not good enough." The public taste is for "excellence," whether in kind or degree—whether for "The Corsican Brothers" or the German "Egmont;" and where that "excellence" is presented it will be duly appreciated, and the speculator in it amply rewarded. Private feeling or temporary prejudice may sometimes induce us to ignore or doubt this truth; but it is nevertheless an axiom, of a character so practical that the neglect of it becomes necessarily the earnest of failure.

Mr. Mitchell's attention to his new German friends was not, however, suffered to interfere with that due to his old acquaintances—the French company. The performances of the latter, indeed, extended to Wednesday, the 14th inst., when they closed with the representation of "Le Nuit aux Soufflets," the second act of "Le Gamin de Paris," and "La Sœur de Jocrisse," in which MM. Lafont and Levassor respectively appeared. These artists, with Dejazet, Lemaire, Clarisse, Regnier, Denain, and Rose Cheri, have given great celebrity to the season. Foreign performances of this kind extend our theatrical knowledge, and enlarge the domain of public taste. It is with pleasure, therefore, that we learn that Mr. Mitchell intends next season to pursue his plan much further, by adding to his French and German *troupes* those of Spain and Italy. This design will make the St. James's Theatre one of the most interesting places of amusement to those who desire the cultivation of the understanding, as well as the amusement of the fancy. The standard of art must needs be elevated by this congress of artists on the same boards, representing the *chefs d'œuvre* of their different countries.

MR. CHARLES MATHEWS AND THE PARISIAN DRAMATISTS.

As regards the proposed dramatic convention between England and France, intended to secure some measure of justice to the Parisian dramatists, who at present, to all intents and purposes, supply the English theatres for nothing, Mr. Charles Mathews, of the Lyceum Theatre, has addressed an amusing letter, in French and in English, to the playwrights over the water. The Gallic portion is a curious specimen of a reckless scramble through an unfamiliar tongue; but both French and English are exceedingly droll, lively, and piquant.

Mr. Mathews's production contains one main proposition, which he quite fails to prove; and a number of minor ones, in which he is right enough; with a dashing account of our own London theatres, and a great deal of amusing, but overstrained, description of the immorality of French vaudevilles and comedies, and of the wonderful masses in which the Parisian theatrical writers find themselves when they attempt English subjects. The main proposition is, that we are not, to any great extent, dependent for the supply of our theatres upon the French. But what is the fact? Mr. Mathews, in one part of his pamphlet, professes to be a "weasel" who has been slily sucking the eggs of the Parisian dramatists, climbing up to nest after nest, and crushing the property of the owners to the last drop. Since he succeeded to the Lyceum Theatre, there have been produced (to the very least ten French adaptations to one English work, while the burlesques have invariably been adaptations from a French book of fairy tales. In his first season, Mr. Mathews brought out "The Pride of the Market" (French), "The Jolly Tragedy" (French), "Brother Sam" (French), "The Rough Diamond" (French), "Box and Cox" (French), "Peggy Green" (French), "Tragedy Queen" (French), "Anything for a Change" (French), "Used up" (French), "Appeal to the Public" (French), and "A Peculiar Position" (French). There is a "weasel" for you! There are a number of eggs sucked as slily and as snugly as you like. Nor has our "weasel" changed his manner of life. All of Mr. Mathews's best recent parts—his *Lanater*, his character in the adaptation of the "Enfant du Peuple," and, above all, his *Mercadet*—that is to say, his *Mr. Affable Hawk*—have been French to the core.

Notwithstanding this fatal flaw in the arguments of the writer, his practical suggestions are good. Altogether, the epistle is lively, offhand, and readable.

Science.

PHOTOGRAPHY.

ITS ORIGIN, PROGRESS, AND PRESENT STATE.

FIRST ARTICLE.

THE importance of Photography, whether we consider it simply in its relation to art, or as an aid to those investigations which promise to advance our knowledge of those radiant forces which perform most important offices in regulating the physical constitution of organic matter, is so great, that we feel some historical notices of its progress cannot be otherwise than interesting to our readers.

The slow advancement of this natural truth is exemplified in a very remarkable manner in the department of science which is devoted to the consideration of the physical phenomena of the sunbeam. It is tolerably certain that in the 16th century the darkening of horn silver (*fused chloride of silver*) was observed by the alchemists; but it was not until the 18th century that any examination of the phenomenon was made. Even then the influence of light on the crystallisation of salts first attracted attention, and memoirs on this subject were published by Petit in 1722, by Chaptal in 1788, and by Diel in 1789.

In 1777, Scheele, the celebrated chemist of Sweden, writes: "Fix a glass prism at the window, and let the refracted sunbeams fall on the floor. In the coloured light put a paper strewed with *luna cornua*, and you will observe that this horn silver grows sooner black in the violet ray than in any of the other rays." Scheffer, in 1790, ascertained that this white salt of silver darkened in the violet ray in fifteen seconds to a shade which required the action of the red ray for twenty minutes. In 1801, Ritter, of Jena, demonstrated the existence of rays beyond the spectrum, having no illuminating power, but possessing active chemical properties. A similar set of researches were undertaken by Dr. Wollaston about the same time, which also proved the remarkable difference existing between the differently coloured rays.

These researches led the way to the experiments of Wedgwood, the celebrated porcelain manufacturer of Etruria, in Staffordshire, which, beyond all dispute, must establish him as the first photographic artist. From the journal of the Royal Institution of 1803 we copy the title of Mr. Wedgwood's memoir, and a few of his remarks, with the notes of Sir Humphry Davy:—

"An Account of a Method of Copying Paintings upon Glass, and of making Profiles by the Agency of Light upon Nitrate of Silver; with Observations by Humphry Davy."

A solution of nitrate of silver spread on white paper or white leather was the photographic material employed; and he remarks—"The alterations of colours take place more speedily in proportion as the light is more intense. In the direct rays of the sun two or three minutes are sufficient to produce the full effect; in the shade several hours are required; and light transmitted through different coloured glasses, acts upon it with different degrees of intensity. When the shadow of any figure is thrown upon the prepared surface, the part concealed by it remains white, while the other parts speedily become dark. For copying paintings on glass, the solution should be applied on leather; and in this case it is more readily acted on than when paper is used. After the colour has been once fixed on leather paper, it cannot be removed by the application of water, or water and soap, *and it is in a high degree permanent*. Besides the applications of this method of copying that have just been mentioned, there are many others; and it will be useful for making delineations of all such objects as are possessed of a texture partly opaque and partly transparent. The woody fibre of leaves, and the wings of insects, may be pretty accurately represented by means of it; and in this case it is only necessary to cause the direct solar light to pass through them, and to receive the shadow upon prepared leather." Sir Humphry Davy adds, "*The images formed by means of a camera obscura* have been found to be too faint to produce in any moderate time an effect upon the nitrate of silver. *To copy these images was the first object of Mr. Wedgwood in his researches on this subject.* In following these processes I have found that the images of small objects produced by means of the solar microscope may be copied without difficulty on prepared paper. In comparing the effects produced by light upon muriate of silver with those produced upon nitrate, it seemed evident that the muriate was the most susceptible. Nothing but a method of preventing the unshaded parts of the delineation from being coloured by exposure to the day is wanting to render this process as useful as it is elegant."

No further investigation of the subject appears to have been made for many years. The failure on the part of Wedgwood and Davy was due entirely to the want of these chemical agents, which were afterwards employed as the fixing materials. Hyposulphite of soda was not discovered by Sir John Herschel until 1819, when he at once detected and described the habitudes of the salts of silver in connexion with hyposulphuric acid. Iodine was not known before 1812, when it was discovered by Courtois, a manufacturer of saltpetre at Paris; and bromine was a yet later discovery, by M. Balard, of Montpelier. Without these agents Photography could not have advanced beyond the point at which Wedgwood and Davy left it.

In 1814 M. Niepce, of Chalons, on the Saône, turned his attention to the chemical agency of light, his object being "to fix the images of the camera obscura," and he discovered the peculiar property of solar radiations in altering the solubility of several resinous substances. By spreading bitumen on a glass or metal plate, and placing this in the camera obscura, Niepce found that in five or six hours a *dormant image was impressed on the plate*, which was rendered evident by placing its prepared material in any solvent of the bitumen or resin employed. This development of a dormant image has been patented as though it were a new discovery of Mr. Fox Talbot, whereas it was known exactly twenty years before he commenced an experiment on the subject. Niepce resided at Kew in 1827; and still pursuing the subject, he produced many of these pictures, some of which are still in the possession of his friends in this country. They possess much of the air of Daguerreotypes, but are necessarily imperfect as pictures when compared with the Photographs which we are now producing. In 1824, Daguerre commenced his researches, employing, as Wedgwood had, the nitrate and chloride of silver. In 1826, Niepce and Daguerre became acquainted, and they pursued their inquiries together. In 1829 Niepce communicated his processes to Daguerre, from which communication we must make a few extracts of great importance in the history of Photography:—

"The discovery which I have made, and to which I give the name of *Heliography*, consists in producing spontaneously, by the action of light, with gradations of tints from black to white, the images received by the camera obscura. He then describes his process, and says:—"The plate thus prepared may be immediately submitted to the action of the luminous fluid in the focus of the camera. But even after having been thus exposed a length of time sufficient for receiving the impression of external objects, nothing is apparent to show that these impressions exist. *The few rays of the future picture remain still invisible. The next operation, then, is to disengage the shrouded imagery*, and this is accomplished by a solvent."

In 1829 *Iodine* was first employed by Niepce and Daguerre to "black the resinous plates on which the heliographic pictures were obtained." Daguerre appears, however, to have noticed some peculiarity in the action of light on the silver plates, as Niepce, in a letter to him, speaks of "a decoction of thlapsi (shepherd's purse), fumes of phosphorus, and particularly of sulphur, as acting on silver in the same way as *iodine*, and that caloric produced the same effect by oxidizing the metal, for from *this cause proceeded in all these instances this extreme sensibility to light.*"

Niepce died in 1838; and in January, 1839, Daguerre's great discovery was announced, and specimens were shown to the *élite* of Paris. In July following a bill passed the Chamber of Deputies securing to M. Daguerre a pension for life of 6000 francs, and to M. Isidore Niepce, the son of the originator of Heliography, a pension of 4000 francs, as the purchase price of the secret of the process of Daguerréotype—*for the glory of endowing the world of science and of art with one of the most surprising discoveries that honour their native land.*" "This discovery France has adopted; from the first moment she has cherished a pride in liberally bestowing it—*a gift to the whole world.*" Such was the language of M. Arago, and we find M. Duchâtel saying, "*the invention does not admit of being secured by patent, for as soon as published all might avail themselves of its advantages.*" Notwithstanding these assertions, made no doubt with the utmost honesty by these distinguished Frenchmen, we find M. Daguerre trafficking in the English patent market; and on the 15th July, 1839, Mr. Miles Berry patents for "*a certain foreigner residing in France,*" this process which her Minister declares cannot be patented.

The Daguerréotype patent has nearly expired, and, from the circumstance that some points of legality remain undecided, it may already be regarded as having run its period.

On the 31st January, 1839, Mr. Fox Talbot published "Some account of the Art of Photogenic Drawing;" and on the 21st February, 1839, he gave the mode of preparing the paper employed. This included a mode of covering paper with chloride of silver, which he rendered, by repeated washings, sufficiently sensitive for the camera obscura. There we have the same agent used as Davy recommended to Wedgwood, and employed himself, there being scarcely any difference in the manipulation recommended. Mr. Talbot advised the fixing of these pictures by a solution of common salt; but this was of the most imperfect kind—the pictures turning blue in the white parts after the slightest exposure.

The next publication in order of date, of any novelty was that of Sir John Herschel to the Royal Society, 14th March, 1839, which was followed by his admirable memoir on the "Chemical Action of the Rays of the Solar Spectrum," &c., read 20th February, 1840. In the first of these, Sir John Herschel recommends the use of the *hyposulphate of soda* as a fixing agent; and, in the second, he advises its being used for the iodide of silver, as being less soluble in it than the chloride. Sir John Herschel also introduced the use of the hydr odate of potash for the purpose of converting the dark oxide into iodide of silver, and what is still more to the purpose, published the peculiarities of "*iodised paper*"—we quote his words:—"The preparation of this paper (with hydriodate of potash and nitrate of silver) is very variable in its results, according to the strength of the solutions used. If strong solutions of the hydriodate be used, it is nearly or quite insensible; if weak, the reverse."

At the meeting of the British Association at Plymouth, in July, 1841, Mr. Robert Hunt made a communication "On the influence of the Ferrocyanate of Potash on the Iodide of Silver, producing a highly sensitive Photographic preparation," in which he gave particular directions for the preparation of *iodised paper*, as follows:—"Highly glazed letter-paper is washed over with a solution of one drachm of nitrate of silver to an ounce of distilled water; it is quickly dried, and a second time washed with the same solution. It is then, when dry, placed for a minute in a solution of two drachms of the hydriodate of potash in six ounces of water, placed on a smooth board, gently washed, by allowing some water to flow over it, and dried in the dark, at common temperatures."

Iodised paper was also employed by Mr. Ryan, Lassaigne, and others, from which it appears quite certain that any dealer in Photographic materials may make and sell any of the iodised papers prepared as published by Sir John Herschel, Mr. R. Hunt, or others, previously to the date of the Calotype patent.

In Sir John Herschel's paper, already referred to, we find particular mention of the use of *gallic acid* as an exciting agent; but this able experimentalist, says that he failed "*of any marked success in this line, with the somewhat problematical exception of gallic acid and its compounds.*"

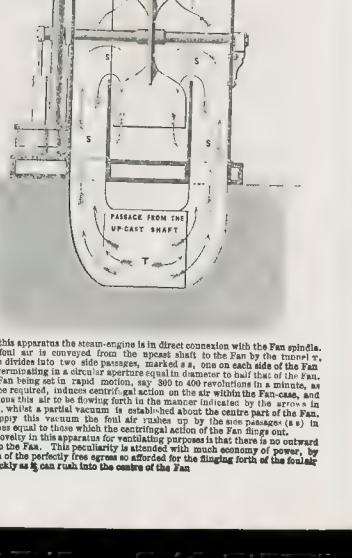
(To be concluded in our next.)

STEAM SUCTION FAN FOR VENTILATING MINES.

THE frequent lamentable occurrence of frightful explosions in coal-mines, scattering death, havoc, and misery around the scene of their occurrence, cannot but render any effectual means of preventing such disasters highly interesting. In this persuasion a Sketch is given of the Direct-Action Suction Fan, for the better ventilation of coal-pits.

This Fan is now in full and most successful action at one of Earl Fitzwilliam's mines, and is giving the utmost satisfaction to the proprietor. The ventilation of the mine is perfect; and the machine being on the surface of the ground above, passers-by, as well as the persons entrusted with the management of the Fan, can see at all times whether it be in proper action. This grand point has not hitherto been attained by any other device. The Davy lamp, for example—however efficacious when closed and in a perfect state, is liable to accidental damage if the surrounding wire-gauze, as is often opened or broken into by some reckless miner, when the flame of the lamp ignites the explosive gas, and all living beings within its reach are hurled into eternity.

The Steam Suction Fan is another of Nasmyth's splendid inventions. His well-known steam-hammer, which has such unprecedented power over large masses of the most obdurate metal, is capable of such a reduction of its force as to chip an egg without breaking the glass that holds it. So the power of this Steam Fan is variable at pleasure; it can raise a perfect gale throughout the workings of a mine when requisite, whilst it is so entirely under command than that on general and ordinary occasions it causes no more wind, as it were, a gentle zephyr to play through the mine, thus invigorating the operatives below ground without annoying them.



In this apparatus the steam-engine is in direct connexion with the Fan spindle. The foul air is conveyed from the upcast shaft to the Fan by the tunnel T, which divides into two side passages, marked s s, one on each side of the Fan they terminating in a circular aperture equal in diameter to half that of the Fan. The Fan being set in rapid motion, say 300 to 400 revolutions in a minute, as may be required, induces centrifugal action on the air within the Fan-case, and occasions this air to be flowing forth in the manner indicated by the arrows in Fig 1, whilst a partial vacuum is established about the centre part of the Fan. To supply this vacuum the foul air rushes up by the side passages (s s) in volumes equal to those which the centrifugal action of the Fan flings out.

A novelty in this apparatus for ventilating purposes is that there is no outward case to the Fan. This peculiarity is attended with much economy of power, by reason of the perfectly free egress so afforded for the flinging forth of the foul air as quickly as it can rush into the centre of the Fan

NEW BOOKS, &c.

MADAME CARLEN'S NEW NOVEL.
Ready to-day at all the Libraries.
IVAR; or, the SKI JUTS-BOY.

Greek, Latin, French, and Drawing, one guinea each per quarter extra.
Music, Dancing, and the Gymnastic Exercises on the usual terms.
The Establishment has existed for many years under the superintendence of Mr and Mrs Hughman, who have ever directed their best attentions to the comfort and welfare of their pupils, as well as to the education, of their pupils. It is situated in the most healthy and picturesque part of the eastern coast of the county of Suffolk, pleasantly known as "The Garden of Suffolk."
The present Session will terminate on the 27th of July.

CLERICAL, MEDICAL, and GENERAL LIFE ASSURANCE SOCIETY.—Persons of all ages, and in every station, may assure with this Society, and the assured can proceed to any part of Europe, the Holy Land, Egypt, Canada, the Cape, Australia, New Zealand, and in most parts of North and South America, without extra Premium.
FIFTH DIVISION OF PROFITS.
The Fifth Bonus was declared in August last, and the amount varied with the different ages, from 24½ to 35 per cent on the Premiums paid, during the last Five years; or from £1 to £7 15s per cent. on the Sums assured.
The same share of Profit will be given in future among the Shareholders being assured for the whole period intervening on the amount made by the regular business, the ASSURED will hereafter derive all the benefit obtainable from a Mutual Office, with the security and responsibility of a Proprietary Company, secured by an ample Proprietary Capital—thus combining the advantages of both systems, at the lowest rate of Premium.
A copy of the last Report, setting forth full particulars, with a Prospectus, may now be obtained or any of the Society's Agents, or by addressing a line to
GEO. H. PINCKARD, Resident Secretary.
99, Great Russell-street, Bloomsbury, London

SARL'S ARGENTINE SILVER PLATE.—No 17 and 18, CORNHILL.—This beautiful metal continues to stand unrivalled amongst all the substitutes for silver, and, during the recent excitement, combined with its brilliant appearance, defies all competition. It is upwards of 10 years since this manufacture was introduced by SARL and SONS, to the public, and, notwithstanding the many spurious imitations which have been brought forward, it has increased in former proceedings, thus giving a convincing proof of its having answered the one purpose which was the object in view—namely, possessing the durability and appearance of solid silver at one-sixth its cost. The magnificent stock has recently been enriched with many splendid novelties in Dinner, Tea, and Breakfast Services, and never possessed so many attractions as at the present time. The Spoon and Fork department, as well as the various patterns that are manufactured in solid silver, and orders to any extent can be immediately executed. Fiddle pattern is the only pattern at present in London. A new and enlarged pamphlet of sketches and prices is just published, and may be had gratis. It may be obtained gratis by applying at the manufactories.—SARL and SONS, 17 and 18 Cornhill

CAUTION.—The great success which has attended the sale of SARL'S ARGENTINE PLATE has induced some unprincipled persons to imitate the article and pirate the name. The public are hereby cautioned that no article is genuine except purchased at SARL and SONS' London Bank premises, 17 and 18, Cornhill. No other parties are authorized to sell it.

THE LONDON MORNING NEWSPAPERS sent into the country on the evening of publication at a reduced price. Apply to W DAWSON and SONS, Newspaper and Advertising Offices, Cloth-court, 74, Cannon-street, City, London. Established 1809.

BINDING the ILLUSTRATED LONDON NEWS.—The Volumes of the Paper are elegantly bound in an uniform cloth gilt and lettered, at the rate of 2s each. Post-office orders should be made payable to AUGUSTUS SUTHERLAND (late M C Round), Bookbinder, 16, Seven-dials, Lincoln's-inn, London.

MODELLING in LEATHER.—Specimens of this elegant accomplishment (superior to anything of the kind in London) may be seen at the Soho-square Bazaar, Stand No. 197. Lessons given by the Artiste at Mr JOHNSON'S (late Dobbs and Co.) No. 13, Soho-square.—Ladies supplied with materials.

MR. SAMUEL RYMER, SURGEON-DENTIST, lately with Mr. Evans, 56, Old Bond-street, and from the Western General Dispensary, Marylebone, may be consulted upon all Diseases of the Teeth, at his private practice, No. 5, Argyle-place, Regent-street, and supply of teeth, at his residence, 96, Norfolk-road, Croydon, Surrey. At home daily from 10 to 5.

WHITEHALL, July 12, 1852.—The Queen has been pleased to give and grant unto GEORGE GIBSON, of BRADFORD BRIGG, in the county of Surrey, Esquire, in the Commission of the Peace for the counties of Sussex and Surrey, her Royal license and authority that he and his issue may, in compliance with a covenant contained in a certain indenture, henceforth take and bear the surname of CAREY, in addition to and before that of GIBSON. Also to command that the said Royal concession and declaration be registered in her Majesty's College of Arms, otherwise to be void and of none effect.

£29,000 to be advanced in LOANS upon good Personal Security, or upon the Security of Real Property situate in any part of Great Britain and Ireland.—For particulars apply to Mr WILLIAMS, 88, Upper Stamford-street, London.

DINING TABLES, Mahogany Chairs, two Chimney Glasses, and Brussels Carpets, all SECONDHAND, to be DISPOSED OF, at a low price. To view the same, apply at No 11, Tavistock-street, Piccadilly

FISHER'S DRESSING-CASES, for Travelling or the Toilet-table, cannot be surpassed for durability or beauty of workmanship. The prices are calculated to suit the Economical or Luxurious.—135 and 136, Strand, corner of Arundel-street.

CHESSMEN in Ivory, Bone, and Hard Woods, cheap, at HALLETT'S Ivory Turnery Manufactory, 62, High Holborn. Ivory Chessmen, Boards, and Tablemen. Ebonised Inlaid and other Chessmen repaired Ivory turning taught at 1s 6d per lesson.

TO ANGLERS.—CHARLES FARLOW, Fishing Tackle Maker, 191, Strand, invites Anglers to inspect his well-known Stock of Rods, Lines, Flies, and all other gear for the sure capture of river fish Catalogues forwarded by post grade.

WILLIAM ASHTON HACKETT, FISHING-ROD, TACKLE, ARTIFICIAL BAIT and FLY MAKER, 38, Patrick-street, Cork.—Tourists in Ireland are invited to inspect HACKETT'S Cases of Rods and Tackle, and Classified Cases of Flies for the various waters in this kingdom. Lists of prices post free

TROUT FISHING.—The DERBY TROUT KILLER. 10d brace of Trout have been killed in seven hours by one rod and fly, with the use of this lure in all parts of the United Kingdom; and for brightness of colour, rapidity of spinning, and general life appearance, are unequalled. Price 1s 6d each, post free. Pike Baits, 2s 6d each, post free. Address, J. SPENCER, Derby. Trade supplied. Also of JAMES LAW, 31, Lindgate-hill, Lincoln. Ideas of prices post free

TROUT FISHING.—The DERBY TROUT KILLER. 10d brace of Trout have been killed in seven hours by one rod and fly, with the use of this lure in all parts of the United Kingdom; and for brightness of colour, rapidity of spinning, and general life appearance, are unequalled. Price 1s 6d each, post free. Pike Baits, 2s 6d each, post free. Address, J. SPENCER, Derby. Trade supplied. Also of JAMES LAW, 31, Lindgate-hill, Lincoln. Ideas of prices post free

GLENFIELD PATENT STARCH, used in the Royal Laundry at WINDSOR CASTLE, and by the Nobility and Gentry throughout the kingdom, and awarded a Prize Medal, at the GREAT EXHIBITION, 1851, and Honourable Mention, at the Paris Exhibition, 1849. Sold by all grocers and druggists.

COOL SUMMER DRESSES.—Ladies about to leave town will find a very large assortment of the most elegant and fashionable thin materials for dress in the show-rooms at Regent-House (Lilliwhite's), 342 and 343, Regent-street. Great variety, novelty, and economy are aimed at in this establishment.—REGENT HOUSE, 342, Regent-street.

AT the IRISH LINEN COMPANY'S FAMILY LINEN WAREHOUSE, 49, Hart-street, Bloomsbury-square, is always to be found a STOCK of HOUSEHOLD LINENS, the manufacture of which, from flax, Mahogany, Rosewood, and Walnut-tree Woods; also, their Priced List of Bedding. Sent free by post. Goods forwarded to any part of the kingdom. Bedstead and Bedding Manufacturers, 196 (opposite the Chapel), Tottenham-court-road.

Established in 1778.
CAPPER, SON, and Co., 56, BISHOPSGATE-STREET, CITY, LINENDRAPERS TO THE QUEEN
CAPPER, SON, and MOON, 184, REGENT-STREET, LONDON,
MANUFACTURERS and OUTFITTERS for Ladies and Infants.

Parcels of £3 sent, free of railway carriage, throughout the Kingdom.

GOLD CHAINS by Troy Weight and Workmanship.—EMERSON and BROGDEN, Manufacturing Goldsmiths, established A.D. 1798, having been awarded a Prize Medal for their Gold Chains, at the Great Exhibition, 1851, by publishing, beg to announce that, in obedience to the numerous calls made upon them, they have thrown open their Manufactory to the Public at MANUFACTURING PRICES. The system of weighing chains against sovereigns being one of the greatest frauds ever practised on the public. Watches and Brooches sold under cost price at 61 and 62, Fleet-street (next Bell Yard), Temple-bar. Builders' work executed with reference to the peculiarity of their pattern. A general assortment of Jewellery, al made on the premises. Manufactory, 16, Henrietta-street, Covent-garden, London.

LIST of PRICES.—JAMES LAW, 31 Lindgate-hill, CARPET, CABINET, and GENERAL FURNISHING WAREHOUSEMAN, sends (postage free) books containing accurate list of every article and price) requisite for furnishing Spanish Brussels Carpets, 2s 4d. Rich Tapestry ditto, 2s 6d: the very best Brussels, 3s 9d; the very best Tapestry, 3s 9d; Rich Velvet Pile, only, 4s 9d per yard.
Cabinet Furniture and Upholstery of every description Purchasers of upwards of £30 sent carriage free within 200 miles of London
Observe! JAMES LAW, 31, Lindgate-hill.

London: Printed and Published, at the Office, 198, Strand, in the Parish of St Clement Danes, in the County of Middlesex, by WILLIAM [illegible] 18, Strand, aforesaid.—SATURDAY, JULY 31, 1852.—SUP-[illegible]

THE ILLUSTRATED LONDON NEWS

No. 572.—VOL. XXI.] FOR THE WEEK ENDING SATURDAY, AUGUST 7, 1852. [SIXPENCE.

THE MINISTERIAL POLICY.

THE elections have at length closed; but almost before there has been time to make up the lists, and to range the members into the rank and file of party, a mightier than party has removed two of them from the mortal scene. Thus a new appeal to two important constituencies has become necessary. But the results, whatever they may be, cannot sensibly affect the general character and tendency of the Parliament of 1852. Its opinions are known, although it has not had an opportunity of expressing them. On each of the two great sides into which English politics divide themselves, we behold a strong phalanx. But these two parties, as far as their names are concerned, represent old traditions rather than modern wants. The one is marshalled under the banner of Liberalism; the other yields allegiance to the older principle of Toryism. But it is so difficult in these days to define what either Toryism or Liberalism means, that the Earl of Derby, the Tory, is, possibly, more liberal in many respects than Lord John Russell, the Whig; and Mr. Joseph Hume, in some others, may be a stauncher Conservative than Mr. Benjamin Disraeli. Names, more than principles, decided the greater number of contested elections. The only real principle at issue—that of the stability or reversability of Free Trade—has not only been solemnly re-affirmed by all the large constituencies, but has made converts more or less willing, cordial, and sincere among constituencies that, not many months ago, looked upon a corn-tax as the bulwark of the rights of the Throne, of the sanctity of the Church, and of the liberty of the people. The principle is no longer in question; and, if it were, a third party, with Sir James Graham at its head—weak in point of numbers, but powerful in point of character and talent—is sufficiently strong to turn the scale in its favour, and to be the arbiter of the national destiny.

But, although the sympathies of the new Parliament are clearly enough defined, the country has yet to learn the policy of the Ministry. Perhaps the Ministry has almost as much to learn as the country in this respect, and awaits the word of command from Mr. Disraeli. The Chancellor of the Exchequer is the head and the tongue of the Administration. He is its representative and its oracle, and is in reality the leader, though apparently but the follower. If the Derby Ministry have any policy, it exists in his mind. It is to his speeches alone that the country can look to discover anything like a clue to the intentions of the Government. From all the other members, from the Premier down to Mr. Christopher or Sir Fitzroy Kelly, comes nothing but contradiction or vagueness. Mr. Disraeli speaks more to the purpose. He is ambitious, and he is clever. He has wrought his way to power by means that he himself does not in all probability entirely approve; but, having attained this high position, his whole previous history, and the character of his mind, lead the impartial critic to conclude that he will not allow any feeling of personal consistency, or any very chivalrous and romantic attachment to his party, to prevent him from carrying out any new convictions that may have taken possession of his mind. The Sir Robert Peel, whom he attacked with so much bitterness, will, in all likelihood, prove to be his own model. The name of Disraeli will in that case be added to the long and unhappy, but illustrious, list of the victims and the instruments of overwhelming public necessity. In spite of his former self, Sir Robert Peel untaxed the food of a nation. In spite of himself, Mr. Disraeli will, or has, become a Free-trader; and it seems to be his "mission" to carry out that great principle to a further extent than Sir Robert Peel ever imagined, and to make all bread-producers as satisfied with it as all bread-consumers notoriously are. Like that lamented statesman, Mr. Disraeli, will assuredly find himself in a difficulty between his past professions and his present responsibilities; between the allegiance which he owes to his party, and that higher allegiance and more sacred duty which he owes to his country. "Do not," said the right hon. gentleman, a few weeks ago, to the electors of Buckinghamshire—"do not suppose that, when the new Parliament assembles, you will see marshalled before each other the old parties who have hitherto governed the empire. You will have new principles of action introduced, you will have new policies, founded on those principles, recommended to the notice of the House of Commons; and you will find at least that it is possible, notwithstanding all the passions of party hatred that a Ministry, which understands the 'spirit of the age,' has had to encounter—*that it is possible, I repeat, for such a Ministry to govern a great country like this by considering the interests of the whole community, and by adopting a policy that will make it, if possible, more powerful and prosperous than before.*"

These are eloquent words, and they proclaim a great principle, as well as a great fact. It is not for us to attempt to reconcile such a declaration and such a confession with the previous words and actions of the speaker. He who is bidding for power, may, when scrambling or fighting in the ranks of party, say many things which he would dread or scorn to utter when he has attained power, and felt its weighty responsibilities upon him. In the heat of the conflict the vision is not clear. There *is* the dust of the battle to obscure it, and there is the fierce excitement of the fray to inflame the passions, and to silence the voice of reason. But on the cold summit, far above the tumult of the crowd, the vision is more extended. In solitude reason resumes the power which she for awhile may have abdicated in the crowd. So we confidently expect it will be with Mr. Disraeli. He has given his party due warning. If they will not take it, the fault will be theirs, and not his. For months, if not for years, it was evident, from the whole tendency of Sir Robert Peel's measures and speeches, that he would repeal the Corn Laws; but his party refused to see that which to the rest

GREAT FIRE AT MONTREAL.—DALHOUSIE-SQUARE, HAY'S HOUSE, &C.—(SEE NEXT PAGE.)

of the world was plainly visible, and confided in him until the last moment. When, at length, their eyes were opened, their vexation with themselves was vented with double and treble acerbity upon him. Perhaps such a fate will be that of Mr. Disraeli. The signs of it are many—so many that even the clever debater who is to perform upon Disraeli what Disraeli performed upon Peel has buckled on his armour, and prepared himself for the encounter. The electors of Middlesex will know whom we mean.

But whatever be Mr. Disraeli's principles or intentions, the fiscal system of this country requires and will command revision. He who shall reduce it into order and consistency, and who shall deprive it of all injustice, will be a great public benefactor, whatever his party or personal antecedents may have been. To maintain the public credit and restore to untaxed industry, knowledge, health, and food; to open up profitable trade with near or remote nations of the earth, and to place all necessary and inevitable burdens upon the backs best fitted to bear them, are objects of ambition which have evidently flitted over the mental sight of the Chancellor of the Exchequer. It is a great thing to be the farmers' friend, but it is a still greater thing to be the friend of the whole people, the farmers included. The various rumours that are afloat as to the means by which the great consummation is to be attempted under Mr. Disraeli's auspices need not at present detain us. Taxes to be abolished and to be imposed—the one as grand in amount and in operation as the other—are freely spoken of; but it will be time enough to consider them when they have emerged from the obscurity of rumour into the full blaze of Ministerial avowal. Enough, however, is evident to strengthen the belief that the Government has no power—or chance of power—to take such steps as Mr. Disraeli has indicated, "in the interests of the whole community," except as ultra Free-traders. This would certainly be a curious result of the angry squabbles of the last six years. "You have given us free trade in corn," say the farmers; "let us have free trade in tea, in coffee, in sugar, in wine, in every other article of necessity or luxury that we require." The request is reasonable; and it will certainly be edifying if Mr. Disraeli and his colleagues be the men who are destined to comply with it.

CONFLAGRATION AT MONTREAL.

THE great conflagration at Montreal, Canada, which commenced on Thursday morning, the 8th of July, and continuing throughout that day and part of the next, destroyed 1100 houses, and property amounting in the aggregate to £201,000, was briefly noticed last week and the week before in our columns at that early period of the disaster. We now give some details of this dread.ul catastrophe, taken from the local papers; which, with the aid of the accompanying illustrations, will enable a fuller conception to be formed of the great extent and disastrous character of the calamity.

The St. Lawrence Main-street may be said to divide the city of Montreal in its length into two nearly equal parts. Its direction is about north-east going out of town; but, for the sake of clearness, we shall speak of it as if it ran due north, accommodating the same topographical error to the streets which cross it. On the east side, then, of this St. Lawrence-street, are a number of other streets running parallel to it, viz. St. Dominique, St. Constant, St. Germain, St. Elizabeth, Sanguinet, and St. Denis streets. Including the east side of St. Lawrence street, these form the St. Louis Ward. The southern boundary of the ward is Craig-street; the next going northward is Notre-Dame, and then Lagauchetiere-street. South of Lagauchetiere-street there was little destruction. But north of it, the whole ward may be said to have been burnt quite to the fields, as the first act of the dreadful tragedy. The streets running on the east side of it in the direction we take the liberty of calling east and west, northward of Lagauchetiere street, are Dorchester, St. Catharine, Mignonne and Fortiere streets. The whole oblong comprised between the boundaries we have described, will be about 2750 feet (say half a mile) north and south from Lagauchetiere-street to the fields, perhaps by 1250 feet (say a quarter of a mile) from St. Lawrence to St. Denis streets.

The first outbreak took place either in a house on the east side of St. Lawrence-street, or, immediately at the back of it, at a point about midway between Lagauchetiere-street and the fields. Here it burned with great fury among the houses on the east side of the street, extending itself southwards to the St. Lawrence Market, which, though of wood, was fortunately preserved, and northwards as far as Mignonne-street. St. Lawrence-street is very near St. Lawrence-street, and just at that point there was a lumber yard owned, we believe, by Judge Aylwin, and occupied by Mr. Insley. At 10 o'clock the flames had not yet attained those premises, and the open space which seemed to offer the means of combatting the conflagration. Unhappily there had been throughout the morning no efficient supply of water, and no means had been taken for taking down the piles of dry wood. It was probably nearly eleven, some two hours after the fire began, before this place began to blaze. When it did the greatest anxiety began to be felt for the General Hospital, situated on Dorchester-street, which, where it makes the corner with St. Dominique-street. Happily, between it and the wood-yard there was but one low wooden house, flanked by a large garden. Several gentlemen here exerted themselves with great zeal in covering the roof and gable with blankets, and eventually the wood-yard burnt out without having done more than threaten the hospital. The latter had in the meantime done good service in the parts of the city lying to the south of the wood-yard; for its great height, and the vacant ground it stands upon, had formed a barrier against the flying sparks, and so checked the southward march of the flames. In the meantime everything to the southward was going as if made of matches: a few stone houses scattered through the ward, generally with wooden galleries and offices, were utterly unable to resist the heat and flakes of fire from the whole streets of wooden houses by which they were surrounded. The flames, fanned by a very strong westerly breeze, rushed from street to street, and from house to house, like water pouring down a rapid. It crossed St. Constant-street in one broad sheet of red flame many yards wide, about noon, and very shortly after it attained the easterly limit of the Ward—St. Denis street—by the wooden buildings which serve for stables at the back. St. Denis-street is, or rather was, throughout nearly the whole length, built only on one side, the eastern side being occupied by a very spacious garden, with a couple of wooden houses standing in it, except on the corner of St. Catherine-street, where stood the Bishop's or St. James Church, St. James St. Catherine-street, where stood the Bishop's or St. James Church, St. James Schoolhouse, the R. C. Bishop's late residence, and a splendid palace, recently built for his Grace, and only completed within a few weeks. All these buildings built for his Grace, and only completed within a few weeks. All these buildings are contiguous. On the side which forms the boundary of St. Louis Ward, there were rows of very handsome wooden houses, one part called Cornwall-terrace, occupied as the residences of several military officers and others of the most respectable families in town. North of these, however, there were some less extensive buildings of brick, and farther on, south, of wood; a large block of the latter kind being directly opposite the episcopal residence. Stone or wood, however, seemed now to be alike feeble. The flames came on a quarter of a mile broad, and apparently sealed the whole of the line of buildings in the street. At the southern end of it, there is a short street going westerly to the Champ de Mars, where are the General's office and the Town Major's office. A strong party of the 30th Regiment were stationed there, together with all the clerks of the departments, and by great exertions they contrived to save the street, having, however, been in sufficient danger to induce the removal of the papers. Northward, everything was burned, except some detached houses standing in the fields. It was three o'clock in the afternoon when the wooden block at this part of the street, took fire. Happily the stables at the back had no sooner ignited than they continued along St. Catherine-street, while, the flames had no sooner ignited than they continued along St. Catherine-street, the ecclesiastical property adjoining. From St. Lawrence-street at this moment, the ecclesiastical property adjoining. From St. Lawrence-street at this moment, looking across the blank left by the conflagration, the sight was one of classical grandeur. Suddenly an immense column of smoke, with a round dome like top, outwoved up into the air, and there stood for many minutes, preserving all its outlines with great distinctness. The Asile, a convent for aged persons, is situated upon the prolongation of St. Catherine-street, eastward from the St. Louis Suburbs. The happily escaped; but directly opposite, a fine large stone house, belonging to Mr. Coffin, the prothonotary, was utterly destroyed. Fortunately the flames were arrested at that point, for had they continued along St. Catherine-street, scarcely a house would have been left standing in the city east of St. Denis-street.

Meanwhile the flakes of fire had been conveyed by the wind to a distance of half a mile, and had ignited the timber-yard and saw-mills of Messrs. Sims and Hamilton, on the river side, which were entirely destroyed. About five o'clock a.m. seemed to be over. People summed up the loss as the St. Louis Ward, the one extending to buildings, and Sims and Coleman's; but still they did not go to bed without trembling for the night. Their fears were but too well founded.

Towards six o'clock it was discovered that the wooden buildings behind the east end of Notre Dame-street were in flames, and very speedily that the Hays House was on fire. Here some further local explanation is necessary.

The Hays House Hotel was an immense block of stone buildings of four stories, with a theatre at the back, entered into a narrow lane, called Champ de Mars-street. On Notre Dame-street it formed the corner of a large open square, of which it made the western boundary. From the houses on the north side of this square there was nothing but a barrack ground; and some artillery barracks to the river, the space between the barracks and the square being occupied by two streets, Notre Dame and St. Paul, which meet just eastward of it. At their juncture, St. Mary-street begins, and runs westward till it becomes the high road to Quebec. There are no parallel streets between it and the river, but northward of it are Lagauchetiere and St. Catharine streets, running, like it, the whole length of the city to the field.

Text here has stopped at St. Catharine st a few yards east of St. Denis-street,

and eastward of that street throughout its whole length there was a lot of vacant ground extending nearly one thousand feet from St. Denis to Lacroix-street and Campeau-street; and Dalhousie-square was only divided from it on the south side by St. Louis-street, a few houses at the east end of which were burned. Thus eastward of Dalhousie square there was a prolonged tract of houses, bounded on the north by Lagauchetiere-street and on the south by the river. By ten o'clock at night the square was destroyed and the flames had attained this district, known as the Griffintown, Wolfe, Amherst, Montcalm, Visitation, Panet, Dessaberry, Voltigeurs, St. Adolphus, Papineau-road, where is a large square with a wooden market standing in it, and Gain-street. It took the whole night to travel through this space, and everything eastward of it by the end of Lagauchetiere-street, the latter of which was untouched throughout its whole length to Papineau-road, with the exception of a house or two in the centre, and a few houses at the corner of the Papineau-road. From the square to the gaol is a distance of some 3000 feet more than half a mile and it at space is traversed by the following streets; viz., Campeau, St. Nicholas Visitation

States Consul, was still imprisoned in his own house, notwithstanding the receipt of an order from the Mexican Minister of Justice for his liberation.

Later accounts from Texas state that considerable alarm was manifested on the Guadalupe in consequence of the breaking out of the cholera. Caravajal, it was said, had determined to again attack the city of Matamoras; but preparations were in progress in that city to repel him.

The latest intelligence from California comes down to June 28; and from it we learn that murder and Lynch law (the victims being Indians) were still going on. The mining intelligence was very favourable, and the number of Chinese immigrants continued to be considerable, the number that had arrived between Feb. 10 and June 6 being 6770. For the first time, perhaps, in the history of the Celestial empire, an emigration of Chinese women had been permitted. The 18 members of "the sex" who had arrived were reported to be looked on quite as curiosities at the diggings, even among their countrymen. The prejudice against the Chinese was still active.

The town of Sonora had been laid in ruins by a conflagration.

The number of passengers landed at San Francisco during the month of May was 10,641; the departures for the same period did not exceed 1000

An Indian war appeared to be anticipated, as many of the Indians had fled to join the wild tribes in the mountains. Upwards of 3000 Indians attended a feast at the *rancho* of Major Savage, at which two head chiefs were elected. During the night of the feast some wild Indians crept into the camp and stole most of the horses.

The exports of gold from California is thus given by the *San Francisco Herald*:—The total shipment of gold dust appearing upon the Custom-house books, from this port, during the first quarter of 1852, was 7,710,332 dols., of which 7,277,000 dols. was taken by steamers to Panama and 332,700 dols. to San Juan del Sud. The remainder, 100,729 dols., was carried by sailing vessels to Hong-Kong, Valparaiso, and other ports upon the Pacific.

In the month of June the export of gold from San Francisco amounted to 5,000,000 dollars.

The last arrival at New York from San Francisco had been effected in twenty-four days, the shortest passage yet achieved.

WEST INDIES.

There are accounts from Jamaica this week to July 12. The ravages of the small-pox still continue, and seem to be increasing.

A severe shock of earthquake of longer duration than any since 1813 occurred on the morning of the 7th July, but happily had occasioned no serious damage. It took place at half-past seven o'clock in the morning, and was preceded by a loud rumbling noise, similar to the distant rolling of carriages. Every house shook to its foundations, and in Spanish Town several old buildings were thrown down. All the clocks stopped immediately, and the shock of the convulsion was felt very sensibly by the crews of the ships in the harbour. The weather since the earthquake had been excessively hot.

The Legislature was not in session, but it was thought that the Governor would call a special meeting, with the object of providing for the return passage to India of some of the Coolies, whose contracts had expired, and who demanded to be sent back.

Universal complaints of the want of labour prevailed, and on a great many estates no preparations whatever were being made for the coming crop. All classes were anxiously looking for a helping hand from the parent Government, without which it was much feared the impending ruin to all interests could not be averted. Emigration to Australia on an extended scale, and the consequent enlightened of the community was taking place, and shipping for this purpose was in much demand.

From Barbadoes the dates are also to the 12th July. The Legislature was in session, and the new Tariff bill, abolishing the Imperial Customs, and assimilating the Imperial and colonial duties on imports, had passed the second reading, an amendment vesting the appointment of the new staff of officers in the Local Government, instead of in the Board of Customs, as at first intended, having been carried and embodied in the Bill.

From Martinique we are informed that the yellow fever was unabated, and had committed severe ravages. A special commission of the faculty, appointed by the Governor, had presented a report upon the subject.

From the other islands there is nothing of interest.

REVOLUTION IN TAHITI.—QUEEN POMARE.

We have news from the Society Isles (Pacific) vid New York, of great interest. Early in May a revolution occurred, resulting in the flight of Queen Pomare. Rioters had been the scene of a conflict between the Republicans and Royalists. The half-breed native who was elected by the former as President *pro tem.* was overpowered and forced to fly with his troops before the sudden assaults of the Royalists. The Republicans, however, rallied, received strong reinforcements, and marched against Queen Pomare's retreating forces with considerable loss on both sides, and reinstating their President. Queen Pomare, hearing of the defeat of her troops, hastened in person to Rioteo to turn the tide of war. She was assailed with fury, and barely escaped with her life, by taking refuge on board a French frigate which arrived at Mani, one of the Sandwich Islands group, on the 15th of May. Ultimately, however, the Queen was restored to her throne, under the protection of French vessels of war.

FRENCH RESEARCHES AT NINEVEH.—The Minister of the Interior has received further accounts of the explorations which are being carried on by M. Place, Consul of France at Mossoul, in the ruins of Nineveh. He has found large statues, bas-reliefs in marble, pottery, and articles of jewellery, which throw light on the habits and customs of the inhabitants of the ancient city, he has been able to examine the whole of the Palace of Khorsabad and its sepulchres, and in so doing has circulated some doubtful points, and obtained proof that the Assyrians were not ignorant of any of the resources of architecture. He has also discovered a twelve feet high, which appears to have been one of the entrances to the city, several constructions in marble, two rows of columns apparently extending a considerable distance, the cellar of the palace still containing regular rows of jars, which had evidently been burnt. Such are the results of the researches he has made, which have caused excavations to be made in the hills of Bachieeha, Karamless, Ten Leuben, Mattai, Karakook, Digan, &c., on the left bank of the Tigris, within ten leagues from Khorsabad. In these he has found ornaments, tools, jewellery, and coins arising in gold and other metal and stone. At Digirgan there is a monument, which, it is supposed, may turn out to be as large as that of Khorsabad. At Mattai, and at a place called Barsarin, M. Place has found bas-reliefs in solid rock, they consist of a number of colossal figures and of a series of full-length portraits of the Kings of Assyria. M. Place has taken copies of his discoveries by means of the photographic process; and he announces that Colonel Mawlinson is continuing for him to make diggings near the places which the English are engaged in examining.

THE VALUE OF "ORDERS OF MERIT."—The *Droit* (Paris paper) contains the following curious statement:—"Our readers may remember the history of the famous impostor who represented himself to be Count Ponts de Ste. Hélène, and who played his part with such perfection that Louis XVIII., knew no less, was deceived by him. The police have just made another adventurer, who promised, if allowed to go on, to equal the high deeds of Cagniard. This individual pretended to be the last scion of the illustrious family of Gonzague. He called himself Duke of Mantua, Prince of the Roman Empire, Officer of the Legion of Honour, Grand Officer of the Order of Stanislaus, Knight of the Order of Military Valour of Poland, Grand Master of the Order of the Pelican, Grand Cordon of the Grand Master of the Supreme Order of the Four Emperors of Germany, Protector of the Orders of Merit of Prussia and of the Lion of Holstein, &c. In 1845 the pretended Prince de Gonzague lived in Paris in great style, and was received by high society, which, however, had prohibited papers which left them no doubt of the quality which he assumed. Under the last reign he solicited the title of general in the service of France, and that for more than it was in contemplation to appoint him Colonel of the Foreign Legion. Meanwhile he obtained his entries at Court. However, it was discovered that under the name of Count Maniszeski, a Polish refugee, the soi-disant Duke of Mantua received an allowance from the French Government. That discovery brought disgrace on him, and he thought it prudent to remain in the shade. A few days back a brilliant equipage drew up before the grand entrances of the Elysée. From it alighted a gentleman covered with orders, who declared his name to be the Prince de Gonzague, and asked to see the Prince President on the instant. General Roguet, feeling some suspicions from the tone and manner of the stranger, replied that the Chief of the State could not at that moment receive any one; he would, however, take care to mention to him the visit thus made. As soon as the visitor had withdrawn the General sent to the Prefecture of Police to ask for information concerning him. An inquiry was accordingly instituted, and the result was that a warrant was issued against him. A perquisition having been made on Wednesday at his apartment, in the rue Montaubr, a discovery was made of the means by which the soi-disant Prince de Gonzague defrayed the expense of his luxurious existence. He had taken on himself the right to confer all the orders mentioned above, for which he caused large sums to be paid. It was that he decorated with three orders for a considerable sum, an engineer of the Place de la Bastille, who had acquired a large fortune in manufacturing machinery. The illustrious dignitary did not confine himself to selling titles and crosses to honourable persons; he gave them also to individuals who had been disgraced by judicial condemnations. He had metamorphosed into a baron another adventurer who had been liberated from the prison Mazas, and who, by his assurance, succeeded in making a number of dupes. It is supposed that it is by the aid of papers purloined from the succession of the Gonzague family, of which no member now exists, that the adventurer who has just been arrested was able for 18 years to abuse the public credulity. His trial will, without doubt, bring to light many curious facts."

THE ILLUSTRATED LONDON NEWS.

CHURCH, UNIVERSITIES, &c.

NATIONAL EDUCATION.—THE MANAGEMENT CLAUSES.

A petition to both houses of Convocation of the province of Canterbury on this important subject has been prepared, and has received the signatures of a large number of eminent clergymen.

The petition enters at considerable length into the well-known causes of disagreement between the National Society and the Committee of Privy Council on Education, and declares that notwithstanding her Majesty's Government have in the present year allowed to founders and promoters of schools the option of certain modifications of the management clauses A, B, C, D; which modifications are, in the judgment of the petitioners, a very salutary—and for which they express themselves thankful; nevertheless, there still remains unredressed the primary grievance of an undue interference with that liberty of Churchmen which is sanctioned and commanded by the order and practice of the Church—that the Church of England is the only religious body, with the constitution and form of management of whose schools the Committee of Council on Education has exercised a substantial power of interference; and they therefore represent that it would only be simple equity to allow that any constitution and form of school management to which the Committee of the National Society gives its building grants freely and unreservedly, be entitled, as freely and unreservedly, to a building grant out of the money voted by Parliament, subject only to the two conditions agreed upon in 1840; viz., the necessary inspection at all reasonable seasons and the legal tenure of the site; and to say other condition if any such should hereafter appear to be required—of a like purely civil and secular character.

However, they add that they do not press for those concessions to the full extent mentioned, but that they would consider sufficient provision had been made for the liberty of Churchmen in this particular if a free and unrestricted choice among all the clauses A, B, C, D, together with a like free and unrestricted choice of any modifications which have been, or may hereafter be, admitted into the said clauses, were permitted to all founders and promoters of Church schools.

The petition concludes by praying the Convocation to make a representation of the matter to her most gracious Majesty. Amongst the signatures appended to the petition are the following:—G. A. Denison, J. Keble, M. W. Mayow, E. B. Pusey, W. H. Mill, R. H. Froude, Nelson, W. Heathcote, J. W. Awdry, R. Cavendish, F. H. Dickinson, A. J. B. Hope, F. B. Portman, W. B. Allen, E. J. Carter, J. Carter, J. Thynne, W. Greesley, R. Harrington, W. J. Irons, W. H. Lamphier, J. M. Neale, J. B. B. Clarke, J. Linsell, N. Oxenham, H. Newland, W. U. Richards, Thos. Keble, Jas. Page, G. H. Fagan, C. S. B. Grueber, R. Seymour, J. H. Spry, W. Scott, R. Liddell, A. Watson, J. H. Markland, W. J. E. Bennett, C. Page, J. J. Coles, W. Short, W. D. Willis, R. W. Huntley, A. Fane, J. S. H. Horner, J. J. Barlow, F. M. Smythe, J. E. N. Molesworth. Signatures will be received by the Venerable the Archdeacon of Taunton, East Brent, Weston-super-Mare; the Rev. John Keble, Hursley, Winchester; the Rev. M. W. Mayow, Market Lavington, Devizes.

ELECTION OF PROCTORS TO CONVOCATION.

During the past eight or ten days the election of proctors to serve in Convocation has taken place in several dioceses throughout the kingdom, and as there seems to be a sort of indefinite expectation entertained that the strenuous efforts now being made to make Convocation a reality in practice, instead of being a mere shadow and a name, may be crowned with success, great interest attaches to the elections on the present occasion.

DERBY.—The election of two proctors to represent the clergy of the archdeaconry of Derby, in the election to be held at Lichfield, of two members of Convocation for the province of Canterbury, took place in All Saints Church on Monday. Venerable Archdeacon Hill presided, and, after stating the object of the meeting, read the mandate ordering the election. The Hon. Edmund Bucknall Estcourt, vicar of Kelvington, proposed the Rev. Reginald Chandos Pole, rector of Radbourne and rural dean, as one of the proctors of the archdeaconry. The Rev. E. H. Smith, vicar of Killamarsh, seconded the nomination. The Rev. W. Leeke, vicar of Holbrook, proposed the Hon. and Rev. Thomas Cavendish, vicar of Doveridge, one of the old proctors, for re-election, which was seconded by the Rev. E. M. Wade, perpetual curate of Trinity Church, Derby. The Rev. J. Hamilton Gray, vicar of Bolsover, then proposed the Rev. Frederick Anson, vicar of Sudbury, who was seconded by the Rev. J. R. Errington, vicar of Ashburne. The Rev. R. Macklin, perpetual curate of Christ Church, Derby, proposed, and the Rev. J. Weekes, rector of Ault-on-Peuit, seconded, the Rev. E. H. Abney, vicar of St. Alkmund's and rural dean of Derby. A poll then took place, when the numbers proved to be Rev. H. R. Chandos-Pole, 17; Rev. F. Anson, 16; Hon. and Rev. T. Cavendish, 14; Rev. E. E. Abney, 12. The Archdeacon then declared the Rev. H. Reginald Chandos-Pole, and the Rev. Frederick Anson, duly elected. Both parties are favourable to the revival of Convocation. None of the candidates addressed the meeting, they were only thanked of them.

DURHAM.—At a meeting of the archdeaconry of Durham, held in the parish church of St. Mary-le-bow, in the city of Durham, in accordance with letter of mandate issued by the Bishop of Durham, the Rev. T. Storrey, rector of Ledgefield, and the Rev. J. D. Kade, vicar of Ayelliff, were elected proctors to attend the forthcoming Convocation of the province of York.

EXETER.—On Friday was the rectors, vicars, incumbents, and licensed curates of livings within the diocese of Exeter were cited to attend in the Cathedral Court to elect two proctors to appear for the clergy of the diocese, in the house of Convocation of Canterbury, on the 31st inst. Cathedral, the day after the assembling of Parliament for the dispatch of business. The Rev. Canon and Rev. Chancellor Marlin, chancellor of the diocese, took the chair, and Mr. R. Jose, the deputy registrar of the Court read the formal documents on which the proceedings were grounded. These documents consisted of the Bishop of London's mandate to the Bishop of Exeter, reciting the Queen's writ to the Archbishop of Canterbury for the convocation of the two houses of Convocation; the Bishop of Exeter's mandate to the several Archdeacons of the archdeaconries, and the returns made by the Archdeacons to those mandates. The two gentlemen elected as proctors are the Rev. James Duke Coleridge, D.C.L., vicar of Thorverton, and the Rev. Edward H. Browne, vicar of Kenwyn, Cornwall, and prebendary of the Cathedral. Dr. Coleridge, who was the only proctor present, pledged himself to use his best endeavours to restore synodal action to the Church.

LEWES.—On Tuesday the election of proctor for the archdeaconry of Lewes took place in the county hall, St. Michael. Between 80 and 90 of the clergy were present. The Chancellor of the diocese, Dr. Phillimore, took his seat at about twelve o'clock. The Rev. R. Grace, vicar of West Ham, having been proposed by the Rev. H. Y. Elliott, perpetual curate of St. Mary's, Brighton, and seconded by the Rev. Dr. Wellesley, rector of Wordmanscote, the Rev. J. Jeffreys, rector of Seaford, proposed the Rev. R. Gream, rector of Rotherfield, and in doing so spoke favourably on the restoration of synodal party spirit. The Rev. W. de St. Croix, vicar of Glynde, having seconded the nomination, a show of hands was taken, the result of which was for the Rev. H. T. Grace, 45; Rev. R. Gream, 26. The former gentleman was therefore pronounced to be duly and legally elected proctor for the archdeaconry of Lewes.

LONDON.—A meeting of the clergy of the archdeaconry of London was held on Wednesday in the vestry room of St. Sepulchre's Church, to elect two proctors to Convocation. The chair was taken by the Venerable Archdeacon Hale. Forty-five clergymen were present, the entire number in the archdeaconry being 168 Mr. Liddell, of Dalston, rector of Poplar, was proposed by the Rev. William Hinson, incumbent of St. Mark, and seconded by the Rev. Mr. Rowsell. The Rev. Mr. Toogood, rector of St. Andrew's, Holborn, was proposed by the Rev. Mr. Wright, of Dalston, seconded by the Rev. Mr. Poynder. The Rev. J. E. Cox, vicar of St. Helen's, Bishopsgate, said he had a decided objection to the two gentlemen nominated, one of whom, it was well known, was a party man. The Rev. Mr. Lockwood proposed the Rev. Mr. Rowsell, and the Rev. Mr. W. Champneys, canon residentiary of St. Paul's, were afterwards severally put in nomination. The result of the poll, which was taken, was as follows:—Rev. Mr. Bardley, 21; Rev. Mr. Toogood, 31; Rev. Mr. M'Neil, 23; Rev. Mr. Russell, 4; Rev. Mr. Champneys, 9. The Archdeacon declared that the Rev. Mr. Toogood and the Rev. Mr. M'Neil were elected. A vote of thanks was then passed to the Archdeacon, and the meeting separated.

MIDDLESEX.—In this archdeaconry, the election of one of the candidates was proposed. Dr. Spry was returned unanimously; but Mr. Baker, the other candidate, not having satisfied the clergy present as to his readiness to support the revival of the powers of Convocation, the Rev. Cyril W Page was nominated by Mr. Liddell, and seconded by Mr. Buckley. With the Archdeacon's permission, Mr. Baker then answered a question which had been put to him by a clergyman, that he would exert himself by all "constitutional" means to obtain as soon as possible the revival of the active functions of Convocation. The nomination of Mr. Page not being withdrawn, a show of hands was taken, when 29 hands were held up for Mr. Baker, and 14 for Mr. Page, giving Mr. Baker a majority of 15.

SALISBURY.—On Thursday week the Revs. Richard Crawley and W. T. Wyld were elected as proctors for the diocese of Salisbury.

SALOP.—On Tuesday the Rev. John Yardley, M.A., vicar of St. Chads, Shrewsbury, and the Rev. George Lavington Hale, M.A., vicar of Wrockwardine, were elected proctors for this archdeaconry.

SARUM.—On Thursday week the Rev. G. P. Lowther, M.A., rector of Orcheston St. George, and the Rev. Henry Caswell, M.A., vicar of Figheldean, were elected proctors for the archdeaconry of Sarum.

DEATH OF TWO AMERICAN BISHOPS.—The American papers announce the death of two prelates connected with the Episcopal Church of that country, viz. Dr. Henshaw, Bishop of Rhode Island, and Dr. Gadsden, Bishop of South Carolina.

The Bailey memorial, viz. the altar-screen for Hereford Cathedral, is finished. It is at present in the studio of Mr. Cottingham, architect, London. It is expected that by the middle of August it will be fixed in the cathedral.

THE SYNOD OF THE CHURCH OF ENGLAND.

The following petition to the two houses of convocation has been left for signatures at the offices of the "London Union on Church Matters," Lancaster-place, Strand:—

TO THE MOST REVEREND THE ARCHBISHOP AND THE RIGHT REVEREND THE BISHOPS OF THE PROVINCE OF CANTERBURY, IN SYNOD ASSEMBLED.

The humble petition of the undersigned

Showeth—That your petitioners view with increasing anxiety the abeyance of synodical action in the Church of England.

That, in accordance with the teaching of Holy Scripture—the witness of the undivided Church—the testimony of history, and the consent of all Churches, and even of religious bodies separated from the Church—the only appointed and natural remedy for disputes, divisions, and misunderstandings, which may become as fatal as actual separation, is for the Church to meet in representative synod as often as matters concerning the common salvation require ecclesiastical deliberation.

That, in the judgment of your petitioners, there are at present grave matters of doctrine and discipline affecting not only the well-being of the Church of England, but, under God, its very existence, which require the most serious attention of those to whom is entrusted the weighty and responsible care of all the Churches.

That, since, in the existing convocation of this province is vested an immediate and direct authority to consult on all matters pertaining to the good of the Church, your petitioners feel that, without your concurrence, or rather, unless the first step is taken by convocation, the revival of free synodical action is not, in the present position of the Church, to be expected without a serious disturbance of its peace.

Bearing in mind, therefore, the solemn and awful prayers in which your honourable house has so lately joined; how you have begged the presence of the Holy Ghost in your deliberations; and how you have been cited to the present Convocation "to treat, confer, and conclude of and upon those things which shall," in your session, "by mature deliberation, be agreed upon for the honour of God and the good of the Church;" your petitioners earnestly entreat that you will, by all lawful means, endeavour to wipe away the disgrace inflicted upon our Church by the formal meetings and formal arrangements of Convocation—a course of proceeding calculated to bring the very name of religion itself into contempt.

Your petitioners do, therefore, with all importunity, entreat your venerable house, not only to withstand any undue attempts to shorten your deliberations, but to present an address to her Majesty, praying the Royal license for this present Convocation to consult together on certain matters deeply affecting the spiritual interests of the Church, but especially, or perhaps exclusively, to deliberate upon some scheme either for the reform of Convocation as at present constituted, or for making that institution a fairer and fuller representative council of the English and colonial Churches.

And your petitioners, &c.

FORM OF ADDRESS TO THE LOWER HOUSE.

To the Very Rev. the Deans, the Venerable the Archdeacons, and to the Rev. the Proctors for the Clergy of the Province of Canterbury, in Synod assembled.

NEW COLONIAL BISHOPRICS.—Arrangements have been made, and have received the sanction of her Majesty's Government, for the erection of two new bishoprics in Southern Africa—one for Natal, and another for the eastern division of the present diocese of Cape Town. The Society for Promoting Christian Knowledge has subscribed £2000 towards the endowment of each of these new dioceses, and other Church societies have subscribed liberal sums towards the same object. Several churches have been erected in the Natal district since Bishop Gray went out in 1847, and clergymen have been sent out by his Lordship to serve them. The eastern districts of the diocese of Cape Town contains a perfect ecclesiastical organisation under Archdeacon Merriman, and the seat of the new bishopric will in all probability be at Grahamstown.

APPOINTMENTS AND PREFERMENTS.—The following appointments and preferments have recently been made:—*Prebend:* The Rev. W. G. Humphrey to the prebendal stall of Twyford, in the cathedral church of St. Paul's. *Rectories:* The Rev. E. Bassett to North Luffenham, Leicestershire, the Rev. D. D. Dewar to Edgecott, Bucks; the Rev. J. M. Dixon to Trinity, Bath; the Rev. J. Saunders to Week St. Mary, near Stratton, Cornwall. *Vicarages:* The Rev. H. Jones to Damelsterley, Yorkshire; the Rev. D. D. Evans to Langaeig, Montgomeryshire; the Rev. J. Nelson to Hailing, Kent.

The Rev. E. Bates, M.A., senior curate of St. Luke's district, parish of St. James, Wednesbury, and late second master of the Stepney Grammar School, in union with King's College, London, has been appointed Principal of the West Riding Proprietary School, Wakefield.

TESTIMONIALS.—The Rev. B. Maturin, a very handsome silver inkstand, by Messrs. Barnard, of Bridgewood, on the occasion of his curacy for the living of Lymington; the Rev. William Whitworth, by the teachers of St. James's Church Sunday-school, Clitheroe, on his promotion to St. Jude's, Manchester.

NAVAL AND MILITARY INTELLIGENCE.

THE LOSS OF THE "BIRKENHEAD."—The *Birkenhead* committee met on Saturday last, at the Royal Naval College, Portsmouth, when relief was afforded to about 100 widows, orphans, and relatives of persons, military and naval, that perished in the *Birkenhead*; to the widows and families of officers there were sums of money awarded in proportion to their necessities.

THE PORT OF PLYMOUTH.—The contractors for the formation of the Great Western Docks and breakwater have commenced the works. The cofferdam across the mouth of the bay is nearly complete, and it may safely be anticipated that in the course of twelve months the accommodation will be equal to the present large vessels of war now lying at Cawsand Bay, and so will no longer render it necessary that they should go up the Channel for examination and repair.

SAILORS' HOMES.—It has been determined, after much thought and considerable discussion, to form independent sailors' homes at Plymouth and Devonport.

THE MILITIA.—The uniform for the militia is in a forward state, Government having contracted for several thousand sets, of which the greater part are already perfected. The coat is scarlet, light yellow collar, cuffs, and facings, with the narrow peak or "boo" tail; one row of Firmin's buttons, of a dark leaden colour, ornamented by a crown, fastens the coat close up to the neck.

COURT-MARTIAL.—On Tuesday, the court-martial that had tried First Lieutenant Henry Watson Hall, of the Royal Marine Artillery, on a charge of having been drunk and improperly dressed whilst on duty, on the 1st of July last, at Fort Cumberland, as officer of the day, re-assembled at the Royal Marine Artillery barracks, Forton, for the purpose of reading their sentence, it having been determined by the Horse Guards and the Admiralty, when they pronounced the said Lieutenant Henry Watson Hall to be cashiered.

RIFLED MORTAR.—A large piece of ordnance, of an entirely new construction, has just been finished at the Royal Arsenal, and will shortly be competed with Shaw-bury-lass, to try accuracy at a long range. Some idea may be formed of the strength of the mortar when it is stated that it is 24 inches in diameter, and has 13 inches of solid metal round the bore, which is 5 inches in diameter and four deep. The shell is large, compared with other mortars, it is probably intended for firing solid shot or shells of the elongated or sugarloaf shape, or similar to the Minié balls. The grooves in the mortar are spiral, and placed horizontally opposite each other, and of an oval shape, without any flat part, as in small rifled arms. The rifled mortar weighs upwards of 114 cwt.

SAILORS' HOME.—The annual meeting of the Portsmouth Sailors' Home was held on Wednesday in the hall of the institution, Portsea. Lord Lennox presided. The report of the committee of management was highly satisfactory, showing very numerous benefits and good results from the establishment of the Home. The head of each of the Government departments at the station were appointed *ex-officio* officers of the institution for the year ensuing, and some admirable addresses were delivered by the supporters of the establishment, which needs extension already, in order to provide for the accommodation daily and nightly demanded, but which the present limited premises do not enable the committee to grant.

THE CHAMBERED MOUND OF NEWGRANGE, MEATH (IRELAND).—Above two miles from Drogheda is one of the most extraordinary relics of the past in the kingdom—the chambered mound of Newgrange, in the county of Meath, often quoted because of its resemblance to the treasuries of ancient Greece and other structures of the Pelasgic period. The mound in which the apartment is formed is of a circular form, and is covered with grass and trees all around the base of it a circle of upright stones, some of which, seven or eight feet high, and four or five feet square, still remain. The chamber is approached by a passage about 50 feet long, the outer half of which is about four feet high, with sloping sides of upright stones, three feet two inches apart at the top, and three feet six inches at the bottom, covered with flat stones. In one part of the gallery the stones have been squared together at the top, so that it is necessary to move upon the hands and knees to obtain access. The plan of the chamber is made cruciform by three recesses, one in front of the entrance gallery, and the other two east and west. The chamber is covered over by large stones placed flat one upon the other, each slightly overhanging, and gradually approaching the centre, where a single flat stone covers in and completes the whole, at the height of about 20 feet from the floor. The whole chamber, from east to west, may be 20 feet. In each of the three recesses is a large flat stone, slightly hollowed on the upper surface, so as to form a sort of basin. This singular construction is made further extraordinary by the circumstance that on the face of many of the stones are carved, or rather engraved, volutes, circles, and zigzags. The flat stones over the gallery at the entrance are of considerable size, 12 or 14 feet long.

The Minister of Public Instruction in France announces that M. E Deville is to undertake a scientific mission, having for its object the exploration of Brazil, Paraguay, and the provinces of Para, Pernambuco, and Bahia.

GREAT FIRE AT MONTREAL—SKETCHED FROM THE NORTH CORNER OF THE CHAMP DE MARS.—(SEE PAGE 90.)

RUINS OF THE GREAT FIRE AT MONTREAL.—ST. DENIS-STREET, NEAR THE BISHOP'S CHURCH.

ENCAMPMENT OF SUFFERERS BY THE GREAT FIRE AT MONTREAL.

FUNERAL PROCESSION OF MARSHAL EXELMANS TO THE CHURCH OF THE INVALIDES, AT PARIS.

GENERAL GOURGAUD.

Gaspard Gourgaud was born at Versailles on September 14, 1783, in the midst of the brilliant career of his maternal uncle, Henri Gourgaud, the comedian, at whose house he was brought up, and who was known in the annals of the Théâtre Français by the pseudonyme of Dugazon. After having been at the Polytechnic School and at that of Metz, young Gourgaud entered in 1801 the 6th Foot Artillery, and in 1803 became the Aide-de-camp of General Eblé, who had discovered his abilities. The battles of the Empire succeeded with wonderful rapidity, and at Austerlitz, Jena, Friedland, Essling, and, above all, Wagram, Gourgaud gave proofs of an intelligence and courage which raised him the honour of being appointed orderly officer to the Emperor. In that quality he accompanied him to Holland, and returned afterwards to France to secure from a *coup de-main*, on the part of the English, the islands of Rhé, Aix, and Oleron, which England had designated as points for landing at. The coast was put by Gourgaud into such a state of defence as to render any attempt on the part of the enemy impossible. At Dresden, Ostrowno, and Smolensko, he behaved with great gallantry, and contributed with the principal general officers of the French army to the success of that terrible battle of Moscowa, opening scene of the horrors of Russia. It was in that country that an episode took place which rendered the young officer dear to his brothers in arms. Napoleon was at the Kremlin. The destinies of the world were in his hand; but the fruits of victory were about to pass from him. Rostopchin, the Russian general, had placed under the Kremlin and the neighbouring buildings nearly 300,000 lb. weight of gunpowder, for the purpose of blowing up the staff, the military household, and the guard of the Emperor. The fire was already set to the match, which was slowly burning, when Gourgaud, without measuring the extent of the danger, rushed into the gulf and succeeded in extinguishing the light, and so saved the Emperor and his satellites. Another time, at Brienne, on January 29, 1814, Gourgaud was again able to save the Emperor's life. The Emperor, on that occasion, found himself enveloped by a body of Cossacks, who pressed him closely. At that moment one of them, lance in hand, spurred at Napoleon, and would certainly have transfixed him had not Gourgaud dashed between, and lodging a ball in the soldier's chin, saved the Emperor's life. In recompense, Napoleon, throwing himself into his aide-de-camp's arms, gave him the sword which the Imperial hand was used to grasp since he gained his first battle in Italy as General Bonaparte. That sword Gourgaud wore in his turn at the battle of Waterloo.

THE LATE GENERAL GOURGAUD.

General Gourgaud, who was with the Emperor at St. Helena, once had very singular charges brought against him: they were, that, on his return from St. Helena, he had given information to the British Government to the effect that the complaints about the Emperor's ill-health, his want of resources, and his ill-treatment by the Governor, were not founded in truth: and the correspondence that passed between Sir Walter Scott and the General on the publication of the "Life of Napoleon," in 1827, on the same subject, produced much sensation at the time.

One of the last great affairs in which Gourgaud was engaged was the bringing home of Napoleon's remains to rest for the future among his well-loved French people.

General Gourgaud died on the 23d ult. His funeral obsequies were solemnized that day in the Church of St. Louis d'Antin, in the Rue Caumartin, opposite to which he resided for a considerable period. The coffin in which the body was deposited had been placed in the courtyard of the house, in a sort of *chapelle ardente*. At eleven o'clock in the morning a hearse, magnificently decorated, surmounted by a cluster of tri colour flags, and drawn by four horses covered with black, arrived at the Church of St. Louis d'Antin. The corners of the pall were borne by Generals de Lawenstein and Lahitte, and two other general officers. It was followed by a crowd of the private friends of the family, by artillery officers (to which arm the deceased General belonged), and a deputation of old soldiers of the Empire in the uniform of the period. On both sides of the hearse advanced detachments of artillery, and the fourth company of the second battalion of the National Guard, in which the General, wearing his grand uniform and covered with his decorations, carried a musket, and fought in the ranks during the terrible insurrection of June, 1848. In the centre of the church stood a magnificent catafalque on which the coffin was placed. The entire church was hung with black, and in alternate compartments were suspended shields with the arms of the deceased surmounted by a baron's coronet, and underneath the names of the battles in which he had fought, from Austerlitz to Waterloo. On the last shield, placed at the extremity of the church, were inscribed the dates—"1815, St Helena, 1840." The former representing his departure with the fallen Emperor for his place of exile; the latter his departure with the Prince de Joinville to bring home the ashes of his master. The four battalions of the National Guard of the 1st arrondissement were under arms, and with two half battalions of the line, detachments of artillery, and the general officers above-mentioned, accompanied the body to the cemetery of Père la Chaise. The clergy, the sisters of charity, and the friends of the deceased occupied sixteen mourning coaches, which followed the hearse.

FUNERAL OF MARSHAL EXELMANS.

In our Journal of last week we recorded the funeral of Marshal Exelmans, on the 27th ult. We now describe the ceremony more in detail, and present the accompanying Picture of the *cortege*, which left the Grand Chancellerie of the Legion of Honour, the official residence of the Marshal, at eleven o'clock. A squadron of Guides, a battalion of the 6th Regiment of Infantry, preceded by its band, moved in front. A mourning coach, with the clergy of St. Thomas d'Aquin, was immediately followed by the hearse, drawn by six horses, covered over with black cloth, adorned with silver lace, and embroidered with silver stars; the pall was held by general Magnan and three other general officers. Three mourners, arrayed in black cloaks, carried, on rich velvet cushions, the *bâton* of the Marshal, his coronet as Count, and his various decorations. Then came his white charger, covered with black crape, also sprinkled with silver stars; the beautiful animal was led by two soldiers, a guide and a lancer. Captain Exelmans, the eldest son of the deceased, followed immediately after. A crowd of dignitaries of the highest rank, in full costume, civil and military, senators, councillors of state, generals, deputies, &c., walked after. Not the least interesting part of the spectacle were the old soldiers of the Empire, wearing the uniform of the period, which is so familiar to every one. A great number of persons, dressed in deep mourning, private friends of the deceased, followed; and the rear was closed by a detachment of infantry and a squadron of lancers.

The *cortège*, thus composed, followed the Rue de Lille as far as the Chamber of Deputies, traversed the Place de Bourgogne, and issued on the Esplanade of the Invalides by the Rue de l'Université. On approaching the principal entrance, which was hung with black, the bells of the Invalides announced its arrival, and the clergy attached to the hotel proceeded to the gate to receive it. The hearse entered the external court, through the whole extent of which the Invalides, who are the inmates of the asylum, were drawn up in a double row. In front of the avenue leading to the hotel, detachments of troops had long before taken up their position. The Boulevards in the same direction were lined on both sides with infantry; and in the rear were stationed a battery of artillery, and a body of cavalry, consisting of several squadrons of the Republican Guard, Guides, and Lancers; while detachments of gendarmerie, and the mounted Republican Guard, assisted by squads of sergens-de-ville, kept the ground clear. The Invalides were drawn up from the portico of the church to the outer gate, in a double line. As soon as the bells gave notice of the approach of the corpse towards its last resting-place, the drums beat to arms. In a few minutes after, the Archbishop of Paris, arrayed in full pontificals, and attended by his clergy, arrived. The corridors

WRECK OF THE "RENOWN," AT SHEERNESS.—(SEE NEXT PAGE.)

overlooking the courts were filled with spectators. The *façade* of the edifice was hung with black, with the escutcheons and initials of the Marshal embroidered on it. The interior of the chapel was simi arly arrayed, and hung with the escutcheons of Exeimans, in medallions with the names of his battle-fields, &c. From the door to the catafalque, a double line of Invalides stood in their blue uniforms, and holding lances surmounted by smal. tri-coloured flags covered with b a k crape. The old soldiers of the Empire, wearing the historic dress of the period, took their station at the upper end, intermingled with parties of the Guides. The coffin, being removed from the hearse, was deposited on the lofty and gorgeous catafalque, encircled by lighted tapers.

At twelve o'clock precisely the drums sgain beat to arms, and the trumpets of the cavalry outside gave note of the approach of the President, who entered the church accompanied by his uncle, Marshal Jerome Bonaparte, followed by a crowd of Generals and other dignitaries. The service then commenced; the Archbishop of Paris officiating.

From the moment the hearse left the Palace of the Chancellerie till the conclusion of the ceremony, minute guns were fired; the drums and full bands alternately played, and, at the elevation of the Host, the whole of the troops, both outside and within the walls of the Invalides, presented arms.

THE ALLEGED "WRECKING" ON THE THAMES.

The Illustration upon the preceding page shows the position of the wreck of the *Renown*, surrounded by the alleged "wreckers," the boatmen of Southend. The spot where the schooner went ashore on the Nore Sands is about three-quarters of a mile on the west of the Nore Light, and within gunshot of the *Waterloo* (flag) ship, lying abreast of the dockyard.

Details of the scene were given in our Journal of last week, and the declaration of the boatmen in vindication of their conduct was there adverted to. The *Essex Herald*, in giving a direct contradiction to much of their statement, bears testimony to the generally good character of the Southend boatmen. "Two of their vessels crews only last winter received praises and reward for their gallantry in saving the lives of nine men from the rigging of a vessel sunk on the Mouse sand; and for years, through danger and fatigue, they have earned an honest reputation."

There seems to be some difference of opinion as to the conduct of the men in the minds of the representatives of Lloyd's at Southend and Sheerness. The office of the former port, in his report to the directors of the schooner, records the amount of salvage brought in by the boatmen from the wreck, but makes no mention of the interference of the Government steamers, although their attendance must have been clearly observable from that place. Mr. Reynolds, the owner of the schooner *Renown*, in conjunction with Mr. Edgecumbe, the agent, made on Wednesday a formal demand for the stores and cargo taken to Sout-end by the boatmen. In obedience to his instructions from the Receiver-General of Drifts of the Admiralty to his representative at that port, the stores, &c., in his possession have been delivered over without payment of salvage, leaving the pretended salvors to seek their own remedy for any claim they may consider themselves entitled to.

CALENDAR FOR THE WEEK.

SUNDAY, August 8.—Ninth Sunday after Trinity.
MONDAY, 9.—Accession of Louis Philippe to the French throne, 1830.
TUESDAY, 10.—St. Lawrence. Greenwich Observatory founded, 1675.
WEDNESDAY, 11.—Half quarter Day. Dur Days end.
THURSDAY, 12.—Lord Castlereagh died, 1822.
FRIDAY, 13. Old Lammas Day. Queen Adelaide born, 1792.
SATURDAY, 14.—Printing invented, 1437.

A CONSTANT READER.—*Arms* of Foster.—"Arg. a chev. vert between three bugle-horns ss, stringed gu. *Crest*: A buck trippant ppr."

FERATUM.—In the article in our last, upon the wine duties and the commercial relations between Great Britain and France, the omission of one word, and the transposition of another, obscured the meaning of a sentence. Instead of "Every labouring man daily now drinks his pint of small beer," we wrote "Every labouring man who now da..y drinks his pint of small beer," &c.

THE NEW CRYSTAL PALACE.

ON SATURDAY NEXT,

THE ILLUSTRATED LONDON NEWS

WILL CONTAIN

ENGRAVINGS

OF THE

NEW CRYSTAL PALACE AT SYDENHAM.

AND OF THE

CEREMONIAL OF "PLANTING THE FIRST PILLAR."

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, AUGUST 7, 1852.

THE "planting of the first pillar" of the New Crystal Palace at Sydenham, on Thursday last, is an event which is alike interesting from its old associations, and for the new hopes which it awakens. We are willing to confess that we were among the number of those who looked with regret upon the removal of the old Crystal Palace from Hyde-park; and who thought that the want of sympathy evinced by the Government in a question of so much importance to the rational amusements of the people, was an event to be as much deplored as condemned. But out of this apparent evil we are no less willing to believe that a real good has already ensued.

The duty of Government in this country seems to be merely the duty of stopping the way against innovation of all kinds, and of refraining from interfering with all matters, however good and praiseworthy in themselves, that do not fall clearly and fully within its well-defined and antique province. In consequence of the determination of the Government to adhere strictly to the letter of a by-gone promise—a determination of which there was much to be said in defence—we shall have a New Crystal Palace, better than that of 1851, standing in a more eligible situation.

The new edifice for which we shall be indebted to Sir Joseph Paxton will as much surpass the previous one in beauty and splendour as that surpassed in novelty of design, material, and execution, every other building ever before erected. It was, no doubt, highly desirable that an institution capable of aiding so greatly in the development of the public taste for, and appreciation of, the beauti ul and the useful in art, science, and manufactures, should have been founded and perpetuated under the sanction, and with the authority of the State; nevertheless, as this was followed, there is no reason to anticipate, that in the private hands into which the management of the New Crystal Palace has fallen, there will be any cause for regret that it is a merely commercial speculation. There is sufficient guarantee in the high honour, the sound common-sense, and the elevated motives of its projectors, that it will not degenerate into a mere shop, to be kept open because it will pay, independently of those more ennobling dues and impulses which characterised the Great Exhibition, in which it originated. That which does not pay will, of course, come to a speedy end. Such is the natural course of speculations and undertakings everywhere; but, fortunately for the Crystal Palace, and for all interested in its success, either as shareholders or as visitors, the Great Exhibition of 1851 is a proof that that pays best which administers most largely and most wisely to the higher qualities of the public mind, which educates, and amuses, and refines at the same time. The English people, as a body, have been somewhat too much accustomed to indoor recreations and amusements. No attempt has ever been made until now to bring the domestic and industrious from their homes, and the idle from their ale-houses and gin-palaces, by the attractions of the beautiful in art and science. The pipe, the pot, and the paper have been too often their only resources, and the last of the three alliterative luxuries has but too often been powerless to neutralise the ill effects of the two first. But the success of the Crystal Palace of 1851, and the visits of six millions of persons in six months, prove that the fault lay more in circumstances than in the people; and that it only needed a proper inducement to command their encouragement. The "new palace of the people" has been well begun. We have every confidence that it will be well continued and carried on. We have also every hope that, however much it may answer the purposes of the shareholders, it will still more beneficially answer the purposes of those who desire that in her amusements and in her studies, as well as in her literature, her arts, her science, and her manufactures, England should still be the foremost nation of the world.

In our last article on the impolicy of the present wine duties, we omitted to mention Mr. Disraeli's reply to Mr. Anstey's question, whether the Government intended to take these duties into consideration with a view to their reduction? It may be recollected that the Chancellor of the Exchequer then stated that he did not purpose to make any alteration, and that he considered wine, as a luxury of the rich, to be very fairly and properly taxed. This reply proves either that Mr. Disraeli did not at that time understand the full importance of the subject; or that, in his opinion, the revenue was the first object—the public morality, and our international relations with a neighbouring country, only secondary ones. In the first case, it is to be hoped Mr. Disraeli will reconsider it. In the second, the soundness of that policy may be questioned which restricts to a minimum of a large community the consumption of an article so generally acceptable as wine, and confines the mass of the people to the use of stimulants. If we take into consideration the amount of crime which results from the use and abuse of the common beverages of this country, the cost which its repression and punishment involve, with the loss sustained by the community, by the diminution of the products of industry caused by intemperate habits, it will be found that the amount of duty arising out of the consumption of malt liquors and spirits cannot be reckoned as clear gain. A little reflection on the drawbacks connected with the advantages arising from high import duties may lead us to infer that any injury to the revenue caused by a reduction of them would be compensated by the improved morals, increased health, and more productive industry of the community. With a duty of 1s. the gallon, the wines of the Canaries, Sicily, and the Cape, with some of those of Spain and Portugal, could be profitably sold in England at from 10d. to 1s. the bottle; and many of those of France, Germany, Italy, and other countries—with whose flavour and qualities few Englishmen are acquainted—at equally low prices. A taste for these wines would be speedily acquired. Their wholesome qualities would soon be appreciated; they would be imported in large quantities, and be so generally consumed, as to afford double, and perhaps treble, or even sextuple the revenue derived from the present duties. By their importation a check would be given to those dishonest practices by means of which deleterious compounds under the specious names of Port, Sherry, and Madeira, or the still more taking titles of Champagne and Claret, have so long been foisted on the public. Persons of moderate incomes might then procure excellent wines without the intervention of those merchants monopolists of vineyards, whose profits add so largely to the cost of foreign wines.

From the fact that the wine-merchants are so generally opposed to an alteration in the wine duties, we may infer that they anticipate smaller profits and greater competition in the event of a reduction being made; but, looking at the subject from a hi her point of view than theirs, we feel convinced that the duty on wine, as well as on tea, will ultimately be reduced. Sooner or later we shall have a Finance Minister who will see the monstrous folly as well as injustice of maintaining the present imposts on these articles, and who will have the courage to undertake the needful revision.

COURT AND HAUT TON.

THE COURT AT OSBORNE.

Her Majesty and his Royal Highness Prince Albert, with the youthful members of the Royal family, have been enjoying the beautiful weather during the past week at their marine residence in the Isle of Wight. Her Majesty has cruised almost daily in the *Fairy* Royal yacht, and on several occasions paid visits to her Royal relatives the Duchess of Gloucester and the Duchess of Cambridge, who are at present sojourning at Ryde.

On Saturday her Royal Highness the Duchess of Kent, accompanied by their Serene Highnesses the Princess Hohenlohe, Prince Charles, and Princess Adelaide of Hohenlohe, arrived at Osborne on a visit to the Queen.

On Sunday divine service was performed at Osborne, before her Majesty, his Royal Highness Prince Albert, their Royal Highnesses the Duchess of Kent, the Prince of Wales, the Princess Royal, and her Serene Highness the Princess Hohenlohe.

On Monday afternoon her Majesty and his Royal Highness Prince Albert, accompanied by their Royal Highnesses the Duchess of Kent, the Prince of Wales, Prince Alfred, and the Princess Royal, their Serene Highnesses the Princess Hohenlohe, Prince Charles, and Princess Adelaide of Hohenlohe, embarked in the *Fairy*, and cruised round the steam squadron lying at Spithead.

On Tuesday his Royal Highness the Duke of Parma, attended by M. Massini, arrived from London on a visit to the Queen. On the same day Sir William C. Ross, R.A., had the honour of taking the last sitting for a miniature of her Royal Highness the Princess Helena (painted by command of her Majesty).

On Wednesday her Royal Highness the Duchess of Gloucester paid a visit to her Majesty. The Princess Mary of Cambridge also visited her Majesty. In the afternoon, her Majesty and the Prince Consort, accompanied by the Duchess of Kent, the Princess Hohenlohe, Prince Charles, and Princess Adelaide of Hohenlohe, honoured Colonel and Lady Catherine Harcourt with a visit at St. Clare, and afterwards sailed on the Duchess of Cambridge, at Ryde

It is understood that her Majesty and the Prince Consort are expected to embark on Monday next, and proceed to Antwerp on a visit to the King of the Belgians.

Lord Colville has succeeded the Hon Colonel Grey as Equerry-in-Waiting to her Majesty; and Col. Bouverie has succeeded Lieut.-Col. F. H. Seymour as Equerry-in-Waiting to Prince Albert.

THE EX-QUEEN OF THE FRENCH.—The Countess Neuilly and their Royal Highnesses the Duke and Duchess de Nemours and family, with their suite, numbering upwards of thirty persons, are at present residing at Teignmouth, Devon.

Her Imperial Highness the Princess Peter of Oldenburgh, her august family, and suite, have left the Clarendon for Tenby, South Wales. The Prince remains at the Clarendon, whence he will proceed in a few days to Osborne, on a visit to her Majesty.

Her Royal Highness the Duchess of Kent, and their Serene Highnesses the Prince and Princess of Hohenlohe, will leave the Isle of Wight on Monday next for Scotland.

NON-ARRIVAL OF THE OVERLAND MAIL FROM INDIA.—A telegraphic dispatch from Trieste of August 3d stated that the expected mail from Bombay had not arrived up to that date; and from Marseilles under date August 4th, a telegraphic dispatch has been received to the following effect:—"Marseilles, August 4, nine A M. Her Majesty's steam-packet *Cuvalee*, Lieutenant Commander Dorriman, is just arrived without the Indian mail, which had not been signalled at Alexandria up to the 27th July. The Bombay and Calcutta mails will arrive together. The cause of delay is not known.

THE NEW CRYSTAL PALACE.

The ceremony of "planting the first pillar" of the New Crystal Palace at Sydenham took place on Thursday; and, if we are to augur of its success from the *éclat* which attended this first step towards raising a building which is to rival, if not to exceed, in magnificence that which it succeeds, it will be great indeed. A special train conveyed a number of the directors from London-bridge to the Sydenham station of the Croydon Railway at half-past twelve; and as the visitors arrived they were received in an elegantly decorated tent, and conducted to a second tent, in which were displayed the plans and drawings of the new building, with its park and gardens.

At half-past two the ladies present were formed in lines around the ground marked out for the future transept; the gentlemen being formed in lines behind the ladies. A procession of the directors and officers of the new company, headed by six workmen, carrying a banner inscribed "Success to the Palace of the People," was shortly afterwards formed, and proceeded to the spot marked out for the erection of the first pillar of the new building, it being one of those brought from Hyde Park. The pillar having been hoisted by means of ropes into the socket prepared for its reception, it was duly secured in its place, and

Samuel Laing, Esq, M.P., proceeded to address the company present. He said that the duty of fixing the first pillar of the new palace of the people had devolved upon him, as chairman of the company. He could have wished that some one of greater importance had had to perform the duty of officially inaugurating a building which had originally sprung from the philosophic and enlarged ideas of a Prince to whom they owed the deepest obligations, and which now, phœnix-like, was about to arise from its ashes, he trusted, with renewed and increased splendour. Perhaps, however, under existing circumstances, it would not be proper to expect that those holding the most exalted position in the land could take part in any ceremonies connected with this building until they had given an earnest that they were able to carry out all that they had promised, and that this would become truly a palace of the people: though he hoped, at a more favourable stage, they might receive the deepest sympathy of those exalted personages who had always shown an earnest desire to elevate and improve the position of the people He would ask those present to look around them, and say whether a better or a more beautiful site could be found for a people's park and a people's palace than that on which they were standing? (Cheers.) The new palace was intended to carry out to the fullest effect the intentions of the promoters of the Great Exhibition of 1851, of which this would ever be a great and lasting memorial. The hon. gentleman concluded by pointing out the various trees to which the palace might be applied to promote the amusement and education of the people, and by proposing "Three cheers for the people's Queen."

The invitation was most heartily responded to, and a military band struck up "God save the Queen," when the ceremony concluded with a Royal salute from guns placed upon the ground.

The following is the inscription placed beneath the column:—

This Column, the first support of the Crystal Palace, a building of purely English Architecture, destined to the recreation and instruction of the Million, was erected on the 5th day of August, 1852, in the sixteenth year of the reign of her Majesty, Queen Victoria, by Samuel Laing, Esq., M.P., Chairman of the Crystal Palace Company. The original structure of which this column forms a part was designed under the design of Sir Joseph Paxton, by Messrs. Fox, Henderson, and Co., and stood in Hyde-Park, where it received the contributions of all nations, at the World's Exhibition, in the year of our Lord, 1851.

The grounds were plentifully and gaily decorated with flags, and every person present appeared to be of opinion that a site commanding more extensive or exquisite views of the surrounding country could not have been selected; and there can be no doubt that the park and palace will, when completed, become the greatest attractions in the vicinity of the metropolis.

Shortly after the conclusion of the ceremony, about five hundred ladies and gentlemen sat down to a magnificent *déjeûner*, to which they had been invited by Messrs. Fox and Henderson, and which was served under the superintendence of Mr. Higginbotham, late of Bridle Hotel, Cockspur street, in one of Mr. Benjamin Edgington's elegantly decorated marquees. The chairman of the company, Samuel Laing, Esq., presided; supported by Lord Stratford de Redcliffe, Lord Ernest Bruce, Lord F. Hallyburton, Mr. Peto, M.P.; Mr. Pollatt, M.P.; Mr. B. Cochrane, M.P.; Sir James Duke, M.P.; Sir John Labbock; Sir Charles Barry, R.A.; Sir Charles Lyell; Professors Ansted, Forbes, Solly, and Wheatstone; Drs. Faraday, Latham, Lindley, and Marshall Hall, and a large number of gentlemen distinguished in literature, science, and art.

At the conclusion of the *déjeûner*, the health of her Majesty was drunk with the greatest enthusiasm, which was succeeded by that of the Royal Highness Prince Albert, Albert Prince of Wales, and the rest of the Royal family; the chairman hoping that they would often have the pleasure of seeing them within the walls of the Crystal Palace of the People.

The chairman next gave "Success to the People's Palace," and in doing so descanted at considerable length upon the advantages it was calculated to bestow upon society, in elevating the feelings, and instructing the people in a knowledge of the wonders of nature and art. He was happy to state that he had received a large number of letters from the most distinguished men of the day, expressing their approval of, and sympathy with, the objects of the company, including the Earl of Derby, Mr. Hume (to whom the public were indebted for the throwing open to them of so many parks and palaces), the Right Honourable Benjamin Disraeli, the Right Honourable J. Henley, Lord John Manners, the Attorney-General, Lord John Russell, Mr. Cobden, Mr. Walters, and many others of all shades of politics—this being a place in which politics could never enter. He regretted that those distinguished men were not present, although he believed most of them would be on a future occasion; and he was glad to see so many noblemen and scientific gentlemen then present, as it gave them a surety of future success. They had also received the support of Chevalier Bunsen, Mr. Van de Weyer, and Mr. Abbott Lawrence; and he believed that the palace, when completed, would be the means, like the Exhibition of 1851, of extending and cementing peace and good-will amongst the nations of the earth. He believed that the palace when completed, as it would be under the direction of Sir Joseph Paxton, would be as far superior to that which was erected in Hyde Park, as that building was to anything they had previously seen; and that it must become the great source of recreation and instruction to the people. And, though it was a commercial speculation, he was sure the shareholders would rather lose all their money than degrade it below the attainment of the great objects for which the Exhibition of 1851 was originally intended. The hon. gentleman concluded by proposing "Success to the People's Palace," which was drunk with loud cheers.

The health of the chairman, and of the visitors (acknowledged by Sir C. Lyall, Sir Joseph Paxton, Sir Charles Fox), "the Ladies," and a variety of other toasts, were subsequently drunk, the company breaking up shortly before eight o'clock; though the large majority remained for a considerable time on the grounds to admire the beauty of the scenery and contemplate on the magnificence of the intended works, which the contractors are pledged to complete by the 1st of May next—a work which would, indeed, appear marvellous, if the public were not already acquainted with what their skill and energy, combined with that of Sir Joseph Paxton, Mr. Owen Jones, Mr. Digby Wyatt, and the other gentlemen with whom they were associated, effected with regard to the former Crystal Palace. Mr. Hasker acted as master of the ceremonies during the day.

THE site chosen for the re-erection of the New Crystal Palace is an irregular parallelogram of its scene, extending from the Brighton Railway, where it will have a frontage of 1300 feet, between the Sydenham and the Anerley stations, to the road which borders the top of Dulwich wood, where it will have a frontage towards the road of 3000 feet. The fall from this point to the Brighton Railway is 200 feet. It was at once felt that the only position for the new building was on the summit of this hill, and immediately adjoining the road. The building, placed in this commanding position, will be visible from London on the one side, and from a vast extent of country on the other. In consequence of the rapid fall of the ground, an additional story became necessary on the park front of the building; and this will remedy a defect universally felt in the old building, viz., the little elevation of the front.

By the choice of this site, also, a complete change became necessary in the external character of the building. What in Hyde Park was the side, will here become the front. The great length of the old building prevented it being comprehended in one view; the new building will therefore be shorter by 240 feet. A transept similar to the transept of the old building will be placed at each end, and a centre transept, with a vast circular roof 120 feet in diameter, rising majestically over the circular

roof of the nave. The transepts, with their aisles, will advance from the main line of the building, and thus form a most majestic group; at the intersections of the roofs of the transept and naves will be low towers, adding immensely to the general effect.

A further improvement, of vast importance, is the introduction of arched recesses at the ends of these transepts, 24 feet deep: that of the centre transept 194 feet high and 120 feet wide; those of the side transepts 150 feet high and 72 feet wide.

The improvements which will be made in the interior are not less important. Independent of the vast additional effect afforded by the increased height of the nave (44 feet higher than the old building), advantage has been taken of the necessities of the reconstruction of this important feature to add greatly to the artistic effect of the interior

In the old building the effect was secured by the simple repetition of two elements, a column and a girder; and although great grandeur was thus obtained, it may be said that there was hardly sufficient variety and the full effect of the vastness of the structure was not entirely realised. At the extreme ends of the building, the columns and girders fell so rapidly one on the other that the eye had no means of measuring the length; this defect had to be remedied in the new design, and it has been done in this wise—the columns and girders do not keep to one line as before, but every 72 feet, pairs of columns, 24 feet apart, advance eight feet into the nave, and from these columns spring arched girders eight feet deep, in lattice work of wrought iron, which support the longitudinal girders of the roof. These advancing columns are tied together, and thus form groups of pillars, like those of a Gothic cathedral. These groups occurring every 72 feet down the nave, thus furnish the eye the means of measuring the building, which it had not before.

As regards the contents of the building, it has already been announced that the whole of the sides of the nave, transepts, and the divisions on either side between the several courts will be lined with the plants and trees of every clime, interspersed with statues and works of art. On the north-east side of the building will be ar anged the historical galleries of sculpture and architecture, with casts of the finest works of sculpture and portions of buildings of ancient art. On the south-east side will be displayed similar collections of mediæval art: while the north and south-west portions of the building, as well as the whole of a 24-feet gallery round the building, will be devoted to the purposes of exhibition. The machinery will be placed in the lower story, on the park side, in a gallery 24 feet wide, extending the whole length of the building.

Outside, the decorations will have reference to the furnishing of the interior. The ends of the building will extend into large wings projecting a considerable distance forward into the park, and will accommodate passing terrace-gardens, which will themselves occupy more than 30 acres. Attached to one of these glass wings will be the railway station, so arranged that persons descending from the railway carriages are at once introduced to the Palace; and to the other wings will be terminated with grand glass towers, from which will be obtained extensive views of the gardens, fountains, and grounds, and also a view of the surrounding country to a very great distance. Beyond the terrace gardens, which will be adorned with fountains and statuary, Mr Joseph Paxton has undertaken to carry out a design for waterworks, temples, and statuary, in forms and on a scale hitherto unknown. Two of the jets which he has in hand will rise to a height of 200 feet, and will form the main objects of interest from their size. We have already spoken of Sir Joseph has also in preparation an unequalled collection of hardy and half-hardy plants, and an illustrative series explanatory of the natural and Linnæan systems of botany. He has already secured for the Crystal Palace Company the magnificent collection of palms and other choice plants brought together during the past century by the Messrs. Loddridges, specimens hitherto unrivalled in Europe, and is daily adding to the number of his treasures by other specimens purchased from well-known collectors, or conferred upon him as gifts.

THE ELECTIONS.

The general elections have at length been concluded; the only returns remaining unpublished up to this week being those for Donegal county (Ireland), and Orkney (Scotland). In the former, two Ministerialists have been returned—viz., Mr. T. Connolly and Mr. C. Hayes; in the latter, the Liberal candidate (— Dundas), has been returned.

There is a vacancy in Oldham, caused by the death of one of the recently elected members (both Ministerialists), Mr. Duncuft; and it is thought that the Liberals have a good chance of recovering their lost seat there. Amongst the candidates mentioned as likely to offer themselves, are Mr. Fox, the late member, and Mr. Cardwell, the latelyrejected Free-Trade Conservative member for Liverpool.

A second vacancy by death has also been caused in another place (Peterborough), which had returned two Liberal members Mr. R. Watson being the deceased in this case. Amongst the candidates named as likely to be proposed for the vacant seat are Sir George Grey (the late Home Secretary), rejected at North Northumberland, and Mr. Forman, the lately rejected Liberal member for Cockermouth.

There is also a vacancy in Devonport, caused by Sir George Grey, one of which is to the effect that upon the assembling of Parliament the Hon. Captain Howard will retire from the representation of Morpeth, in order that the Right Hon. Baronet may take his seat in the House for that borough.

With reference to the classification of the members of the new House of Commons, as we have on a former occasion stated, nothing very definite can be effected in that respect, the confusion of parties is so great, and the positions, professions, avowals, and reservations of a large proportion of the newly-elected and re-elected parliamentary representatives are of so varied, and often so contradictory, a character, that the first grand division on a vital question of principle, such as that of Free Trade, for instance, can alone clear up the doubts and uncertainties which beset the matter.

Ingenuity, however, has not been idle as to the solution of this Gordian knot; and we find it generally believed, in circles non-Ministerial, that the following is a fair summary, viz.:—

Liberals and Whigs	304
Radical Reformers	87
Newly-elected Reformers	26
Peelites	38
Total Opposition	357
Ministerialists	270
Ministerialist Free-Traders	29
Total Ministerialists..	299
Majority in the New House of Commons against Ministers	58

CUTTING OF THE ELECTRIC CABLE.—On Saturday morning last, the captain of a schooner belonging to Larne, in the county of Antrim, Ireland, which was among all the private craft outside the port waiting for the tide, while hauling in his kedge anchor, found he had caught what appeared to him to be a four-inch hempen hawser. His crew hauled both ways, but not coming to an end, they cut the rope, and pulled away seaward until they had on board about four hundred yards of what they considered a fine new rope cable. They then cut it a second time, keeping the light on board, and setting to work afresh, they hauled in 72 yards more, still without arriving at the end of the rope. The captain cut through a third time, and, with his supposed hempen prize, bore away for Larne, where he arrived in the course of the same day. It was then discovered that the supposed hawser was nothing more nor less than a large portion of the hempen cable which encased the electric wire of the Irish Telegraph Company, and which was but a few days ago laid down between Portpatrick and Donaghdee.

THE MONSTER STEAM-SHIP "LA PLATA," belonging to the Royal West India Mail Packet Company is expected from Greenock, at Southampton, on this day (Saturday,) and setting to work afresh, they hauled in 72 yards more, still without arriving at the end of the rope. The captain cut through a third time, and, with his supposed hempen prize, bore away for Larne, where he arrived in the course of the same day. It was then discovered that the supposed hawser was nothing more nor less than a large portion of the hempen cable which encased the electric wire of the Irish Telegraph Company, and which was but a few days ago laid down between Portpatrick and Donaghdee.

THE ILLUSTRATED LONDON NEWS.

METROPOLITAN NEWS.

MEDICAL BENEVOLENT COLLEGE.—The funds of this excellent institution have been recently augmented by a grant of one hundred pounds from the directors of the Southern, Brighton, and South Coast Railway Company, who have also promised to carry all the building materials for the college at one penny per ton per mile, thus affecting a most important saving in the erection of the extensive building. The subscription list now amounts to about £10,000.

CITY ORTHOPÆDIC HOSPITAL.—At a meeting held on Wednesday, in the board-room of the institution in Easton-garden—the Rev. Thos. Gregory, B.D., in the chair—it was stated by the chairman that the charity was progressing most satisfactorily, and that several liberal donations had been received, independent of the amount announced at the late anniversary dinner; among them was a donation of £10 10s. from the Baron Lionel Rothschild, M.P. (a vice-president); Messrs. Barclay and Co., £10 10s.; and from A. W. Roberts, Esq., £5 5s. It was also stated to be the intention of the committee to fit up immediately six additional beds, for in-patients. Mr. E. J. Chance, of Old Broad-street (the senior surgeon), also stated, that the number of patients now under treatment was 871.

CHARING-CROSS HOSPITAL.—The annual distribution of prizes to the students most distinguished for their acquirements in the various branches of medical study at this institution took place on Saturday last, in the presence of a very numerous assemblage of ladies and gentlemen. The Rev. Hen. Hutton, A.M., rector of St. Paul's, Covent-garden, occupied the chair.

DEAF AND DUMB CHARITABLE AND PROVIDENT INSTITUTION.—On Wednesday the annual general meeting of the friends and subscribers to this valuable society—which was founded in the year 1836 for the purpose of granting small pensions among the poor deaf and dumb who have attained the age of sixty, or who have become otherwise incapable of work—was held at Radley's Hotel, Blackfriars bridge. The report, which was read, stated that the funds of the institution were very low. The balance-sheet showed the total amount received during the past year (including a small balance in hand) to have been £152 16s. 6d.; and after all the necessary expenses had been defrayed, there was left a balance in the hands of the treasurer of £39 0s. 3d.

NATIONAL AND PAROCHIAL SCHOOLS OF ST. GEORGE'S, SOUTHWARK.—On Wednesday evening the annual meeting of the subscribers to those schools was held at the schoolhouse, Borough-road; Mr. Edward Palmer in the chair. A sub-committee having been appointed to consider the revision of the rules, the meeting adjourned.

SOCIETY FOR THE PROSECUTION OF DOG-STEALERS AND THEIR CONFEDERATES.—On Wednesday the usual monthly meeting of this society was held at the offices, 170, New Bond-street; Viscount Chewton in the chair. The secretary announced the summary convictions that had taken place at the instance of the society. The receipts during the last month in aid of the funds of the society amounted to £45.

FEMALE EMIGRATION.—On Monday thirty-six female emigrants embarked on board the *Northumberland*, lying off Gravesend, to proceed to Australia. Thirty of these go out at the expense of the Female Emigration Fund, originated by Mr. Sidney Herbert; and the remainder perform the voyage under the auspices and protection of the same society, but defray their own expenses. Amongst the ladies and gentlemen who accompanied the emigrants on board were—Lady Wenlock and the Hon. Mrs. Stuart Wortley; the Right Hon. S. Wortley, Recorder of London; Lord Wenlock, the Hon. and Rev. Baptist Noel, the Rev. Mr. Queckett, &c. A letter was handed to each of the emigrants from Mrs. Sidney Herbert. The Recorder and the Rev. Baptist Noel then severally delivered parting addresses, urging upon the women the necessity of good conduct and obedience to their superiors during their voyage, as well as on their arrival at their destination. When these ceremonies had been gone through, the visitors sat down to an entertainment provided for them by Mr. Green, the eminent shipbuilder. Soon after this was concluded the visitors retired, and the *Northumberland* proceeded on her voyage.

LONDON AND NORTH-WESTERN RAILWAY.—On Thursday the accounts of this company for the past half-year were issued, from which it appears that the total revenue of the line was £1,196,071. 16s. 6d., and the expenditure £728,830 19s. 2d. The proposed dividend for the half-year is at the rate of 4½ per cent. per annum.

THE VICTORIA (LONDON) DOCKS COMPANY FOR THE NORTHERN AND EASTERN RAILWAYS.—On Tuesday the first half-yearly meeting of this company was held at the offices in Parliament-street; Mr. S. M. Peto, M.P., in the chair. The report which was read stated that Mr. Bidder, the company's engineer, had matured his plans for the proposed docks and works intended in the first instance to be constructed, and which would comprise an area of water accommodation of 90 acres, with a mile of wharfage and quay room, and 160,000 feet of open sheds. Messrs. Peto, Betts, and Brassey, the eminent contractors, were prepared to undertake the completion of the works for £400,000, the amount of the company's capital. The contractors were so convinced of the return that might be anticipated for this outlay that they had offered to pay for the docks for twenty-one years at a rent of five per cent. per annum on the amount of their contract. The directors, having applied their attention to commanding the shore line, had to announce that a body of capitalists had volunteered to join the company, which would ensure the requisite funds. The report, having been unanimously adopted, the directors were appointed, and the chairman returned the usual vote of thanks to the chairman.

THE LONDON CHARTERED BANK OF AUSTRALIA.—Under this title a bank is about to be established in London, with the object of providing additional banking facilities to the numerous colonists in parts of Australia, namely, Sydney and Melbourne, where the ordinary business of banking will be transacted, such as the discounting of bills, issuing notes, the advancing of money on mortgage, &c. The capital will be £500,000 sterling, in shares of £25 each, and wool, gold, and other produce. It will also be within the province of the bank to undertake the transmission of the funds of emigrants, as well as to transact such other business as may be legitimately conducted. The directors include a gentlemen of high position in the commercial world, many of whom have great practical and local experience in these colonies, and who are well able to estimate the advantages to be derived from the undertaking in which they have now embarked. There can be but little doubt that the recent mineral discoveries in New South Wales and Victoria, and the consequent increase in population and commercial enterprise in those provinces, have opened up a new field for the extension of banking and mercantile enterprise, in which capital may, under judicial treatment, be profitably employed. At present there are but two companies in the United Kingdom carrying on banking operations in the colonies referred to. Both were formed previous to 1840, and are now dividing large profits; and it is believed by the promoters of the undertaking under consideration, that the increasing wants of the several colonies will require greater facilities of extended banking co-operation to aid in the development of the new resources which those interests now possess. In addition to the board of directors in London, the management at Sydney and Melbourne will be assisted in their duties by local boards selected from the leading members of mercantile firms established in those cities.

CLAUSEN'S FLAX COMPANY.—The first general meeting under the act for incorporating Clausen's Flax Company for England and the colonies was held on Wednesday, when it was stated that the shares had been subscribed for, that an adequate amount of capital for acquiring the patent and carrying on business had been paid up, and that extensive works at Bromley, Middlesex, had consequently been taken, which would shortly be put in operation.

PAUPER EMIGRATION.—A public vestry meeting of the parish of St. Martin's was held on Saturday last, at the vestry-hall, to receive the report of the poll on the question of the penny rate proposed to defray the expenses of pauper emigration, and which had been opposed by Mr. Cochrane (as noticed last week). Mr. Cosnitre, the senior churchwarden, presided, and there was a full attendance of the ratepayers; Mr. Cochrane and his friends, however, were absent. Mr. Griffiths read the result of the poll: it gave, for the rate, 1107; for the amendment, 380: majority, 727. The parish is under Sturges Bourne's act, which apportions the votes in proportion to the rateable value.

LOWER HOLLOWAY DEFECTIVE DRAINAGE.—On Monday evening a general meeting of the governors of the Holoway Dispensary was held at the dispensary house, to take into their consideration the defective drainage of the locality; Samuel Lewis, Esq., in the chair. The result of the meeting was a motion by Mr. Prentice, seconded by Mr. Greenway, for the nomination of a committee to call a public meeting of the inhabitants, as a preliminary step upon the new commissioners of metropolitan sewers to urge the necessity of immediate operations to drain the neighbourhood, especially as for some years past there has been a stagnant pool created for that purpose.

UNIVERSITY COLLEGE.—On Saturday last the distribution of prizes took place in the theatre of the college, to the pupils of the institution who have distinguished themselves in the junior classes, in the various branches of education during the academic year just closed. The Right Honourable the Lord Mayor presided, and, having briefly opened the proceedings, delivered the prizes to the different scholars who had proved themselves worthy of the distinction.

THE GENERAL SCREW STEAM-SHIP "LADY JOCELYN."—This splendid screw-steamer, appointed to carry London for Plymouth, to embark mails for the Cape, Mauritius, and Ceylon, was taken out of the Limehouse Dock on Thursday. The large dimensions and superb fittings of this ship have attracted a great many distinguished visitors. Lord and Lady Jocelyn and their eldest son, the Marchioness of Abercorn, Lady Harriet Hamilton, and a distinguished party of their friends, visited the noble ship, where they were received by Mr. Lambert, Mr. Major, and Mr. Fox, M.P., as directors; and Captain Fore, as superintendent of the fleet. After a minute and gratifying inspection they partook of luncheon in the grand saloon.

HYDE PARK IMPROVEMENTS.—The improvement which has been effected in the carriage-road in Hyde Park on the Serpentine side is now very evident. The widening of the road to the extent of several feet has been completed the whole of the distance from Kensington Gardens to the east end of the river, the old wooden palings replaced by handsome and substantial iron railings similar in character to those in the most frequented portions of the park, as this has now also become, and a gravel walk formed on the opposite side of the road along the whole distance, in order to relieve the frequently crowded state of the path on the water side. This important improvement now gives a handsome appearance to this favourite portion of the park, and will be a source of comfort and convenience to the public, and one which has long been felt to be required. It is intended to continue the improvement of widening the road and forming a new pathway along the whole line of road to the opening at Hyde Park corner, for which purpose the works are actively carried on, and will be completed in a very short space of time.

CONSERVATIVE BANQUETS IN MIDDLESEX.—The first of a series of dinners, to celebrate the recent Conservative conflict for the county of Middlesex, was given on Tuesday, at Marlborough House, Fulham: Viscount Ranelagh in the chair, who was supported by Lord Alfred Churchill (proposer to the Marquis of Blandford), Sir Charles Forbes, Colonel Brownlow Knox, M.P., Colonel Dickson, Colonel Addy, Major M'Lean, Major Forbes, the Rev. Dr. Wellington, Henry Fownall, Esq., Chairman of the Middlesex magistrates; Captain Ives, Dr. Wing, Dr. Powell, Messrs. Bailie Cochrane, Holmes, Rowland, Stewart, Carlile, King, Chessamore, Hackmann, Walford, &c. Upwards of eighty electors sat down to dinner, which was served in a tent in the grounds, the use of which had been granted by Dr. Lausmann. The loyal and occasional toasts were duly honoured; and the fact of 123 out of 132 resident voters of Fulham having polled for the Marquis of Blandford was made a subject of congratulation. The determination to fight the battle in the registration courts, to establish freehold land societies, and to renew the contest at the earliest occasion, was strongly expressed. Letters of apology for the absence of the Marquis of Blandford and Viscount Maidstone were read.

THE NEW WATER SOURCES PROPOSED FOR THE SUPPLY OF THE METROPOLIS.—On Saturday last, a party of noblemen and gentlemen were conducted over the proposed gathering grounds, in Surrey, by Mr. F. C. Ward, who explained on the spot the new mode of collecting the "bull-top" water recommended by the sanitary party, instead of the "valley-bottom" water pumped up by the two monopolist companies for the supply of London. Among the party were Lord Kerrington, Professor Wheatstone, Mr. Babbage, Mr. Parr, Mr. Ford, Professor Way, Mr. Chadwick, Mr. Hans Busk, and several other gentlemen eminent in science, or distinguished as supporters of sanitary reform.

ELECTION OF A SHERIFF.—On Tuesday, at Common Hall, Mr. Benjamin Chandler, the surgeon, citizen and ironmonger, was elected to serve the office of Sheriff of the county of Middlesex, in the room of John Hulbert, Esq., who had refused and neglected to give bond to take upon him the said office.

MONEY ORDERS.—A notice has been issued from the General Post Office, which states that minor money-order offices were opened at the undermentioned places, under the respective days named:—

County.		Post-town from which served (when the office itself is not a post-town)	Date on which the office was opened
Cowbridge ..	Lincolnshire ..	Peterborough	2d August
Bradford ..	Yorkshire ..	Bradford-field	6th August
Lambourne ..	Berkshire ..	Hungerford	3d August

On the 2d August the major money-order office at Brough, Westmoreland, was reduced to a minor money-order office. It was erroneously stated that the minor money-order office, at Higher Mill, in the county of Lancaster, instead of Yorkshire. It was also incorrectly stated that Heywood is served from Bury, Lancashire, instead of Manchester.

MECHANICS' INSTITUTION AT STRATFORD.—By favour of the directors of the Eastern Counties Railway, the members of the Eastern Counties Mechanics' Institute, at Stratford, were enabled, on the 28th ult., to enjoy a most agreeable day's excursion, free of charge, to Ipswich, and thence by steamer to Harwich. The trip was greatly enjoyed by those who participated in it. It appears from the half-yearly report, that the committee of the institution have to regret that it has not been more extensively supported by those for whose benefit it more especially instituted, viz., the working-classes themselves. The committee would therefore earnestly impress upon the members individually, the nec ssity for using their best exertions to induce their fellow workmen to participate in the advantages to be obtained by attending the lectures, and introducing their respective families to a knowledge of the rational enjoyments provided by the institutions for its members.

EXTENSIVE FIRE.—On Thursday morning a fire broke out in the spacious factory belonging to Messrs. Knuth and Co., English, French, and German leather and steel goods dealers, situate at No. 7, Allen-street, Goswell-street. The whole building, which covered an area of several acres, was in a very short period of time destroyed. The loss will be immense, as the firm was only insured for £2400. The principal portion of the saw-mills of Messrs. Walker in Limehouse consumed, and serious damage has been done to several of the contiguous premises.

FRIGHTFUL BOILER EXPLOSION AND LOSS OF LIFE.—On Monday afternoon, at one o'clock, an explosion took place on the premises of Mr. Mark Hardiman, the proprietor of the Green Bank Saw-mills, Old Gravel-lane, Wapping, which resulted in the sacrifice of one life, and serious injury to several other persons residing in the vicinity. Charles Verrall, aged 63, a blacksmith, who happened to be at work on the roof of the building at the time the accident occurred, was the unfortunate deceased. A great number of private dwellings in the neighbourhood were more or less injured. Mr. Tomkins is tenant, and the damage is estimated at about £4000. The cause of the sad disaster is attributable to some defect in the boiler.

SPONTANEOUS COMBUSTION.—On Wednesday evening, between the hours of five and six, one of the large waggons belonging to Messrs. Lumley-husband and Co., tea railway carriers, &c., of the Old Bailey, was proceeding through London-street-fields, laden with hemp; the horses were at the same time driven by a young man, who was sitting on the shafts. Suddenly a cry of fire, and a sudden a huge sheet of flame shot forth from the centre of the hemp, and almost ounce ed the driver. He instantly jumped off the waggon, and before he had time to stop the horses in the midst of the crowd, the waggon was all of flame, and by a desperate effort he succeeded in taking the horses out, and a number of persons soon came to his aid. They succeeded in turning the vehicle over, and dragging the burning mass into the carriage road, where it burnt more furiously than before. In the course of an hour or so, by the aid of an engine and a body of firemen, the flames were entirely extinguished. The property belonged to Mr. Maggs, of Somersetshire, and was worth from £120 to £.50

FIRE AND LOSS OF LIFE.—Of several fires which took place on Sunday in various parts of London, one, which occurred at a fruiterer's in Jamesstreet, Lisson-grove, was unfortunately attended by the loss of life of a boy named Hardiman, whose escape was cut off by the flames.

BIRTHS AND DEATHS.—The births registered in the metropolis for the week ending July 31, were males, 701; females, 669; total, 1430. The deaths during the same period were—males, 532, females, 508; total, 1040. The health of London during the last week was disturbed by the prevalence of summer complaints and diarrhœa, yet 96 deaths were 118 below the weekly average in the previous ten years, in proportion to the increase of population; 386 of the deaths were those of children under 15 years of age, 289 were in the middle period of life, and 165 were of the age of 60 years upwards. The districts of Chelsea and Greenwich, as well as Kensington and Wandsworth, experienced more than the usual mortality. During the week 18 deaths are assigned to small-pox, 12 cases are recorded as having occurred after vaccination. Fifteen children were left unprotected by their parents, and died the victims of this negligence; 84 children died of scarlatina, which is prevalent; 34 persons of typhus, 145 of consumption; 49 children of convulsions; 31 persons (61, except 2, adults) of diseases of the heart; 17 of bronchitis, 32 of pneumonia; 13 of erisipelas; 14 of disease of the liver; and 25 of violence. Diarrhœa was the reigning disease, it was fatal to 116 children, 7 adults, and 8 persons of advanced age. It often approached in the severity of its symptoms to summer cholera, of which 10 children, 4 adults, and 2 persons over the age of 60 died. Here, as in epidemic cholera, early and prompt medical treatment is called for.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean height of the barometer during the week was 29 601 in. The mean temperature of the week was 65 70 deg., which is 4·4 deg. above the average of the same week in ten years. The highest mean temperature during the week was 67 1 deg. on Tuesday. The highest in the sun was 105 1 deg. on Saturday. The wind blew from the north-east and north.

REPORTS OF THE JURIES OF THE GREAT EXHIBITION.—We are requested by Messrs. Philips, Brothers, of Cockspur-street, the agents of Messrs. Westhamp, to declare "that the charge of obtaining two prize medals from two several juries, for their beautiful chess-men and board, is wholly unjustifiable." They add that Mr. Westhamp received but one, and that a councils medal; and that, in the estimation of the best judges in Europe, and of the public, they justly and honourably acquired it." We give Messrs. Westhamp and their agents the full benefit of the explanation. It was solely on the internal of art that we noticed the case at all, and if they received a council medal for their chessmen, and Mr. Holmes, who produced the finest statue in the exhibition, the blatted Nymph, received no medal at all—as stated by us in our notice of the recently-published volume of reports—our charge against the fine-art jury remains as before. If the jury were not guilty of jobbing, they are, at all events, open to the charge of fatuity or incompetency.

The Berlini gallery of pictures and sculpture, one of the finest collections in Venice, has been purchased by the King of Wurtemberg, and presented to the Academy for the encouragement of the fine arts.

DEPARTURE OF THE AUSTRALIAN MAIL STEAMER, "SYDNEY."—The screw steam-ship *Sydney*, Captain Franklyn, which arrived at Plymouth from the Thames on Sunday last, having completed the repairs from Gravesend to that port, twenty-seven hours, sailed on Wednesday morning, with mails for St. Vincent, Cape of Good Hope, St George's sound, Adelaide, Port Phillip, and Sydney. She had a full cargo of merchandise, in manufactured and other goods, and 1,000 specie on merchants' account, and 180 passengers; every berth of each class full. The mails were the largest ever embarked at this port, including several tons of newspapers. Tuesday was her proper day for sailing, but in consequence of some slight defects pointed out by the captain, her sailing was delayed until the next morning. Considerable inconvenience was likely to have fallen to the lot of several of the passengers, who, notwithstanding Tuesday was fixed for the day, on some rumour that it was possible the vessel might not be detained till the next morning, took themselves off on excursions of pleasure into the country. It was for some time doubtful whether the inspector would allow the detention of the vessel; and had he decided on sending her to sea, the absent tourists would have found themselves unpleasantly situated on their return to the anchorage.

THE ADULTERATION OF COFFEE.—On Tuesday the Board of Inland Revenue received an order from the Treasury rescinding the Treasury minute of 1840, allowing the admixture of chicory with coffee. The effect of this order will be to [illegible] the duty on chicory from [illegible] to [illegible] per lb.

CORK HARBOUR REGATTA.—THE DOUBLE START FOR HER MAJESTY'S CUP, AND THE NATIONAL EXHIBITION CUP.

CORK HARBOUR REGATTA.

The races of this regatta took place last week, but, owing to the extreme calmness of the weather, there was a total absence of that brisk and animated contest which forms the main interest of those occasions. On Thursday (se'nnight) several attempts were made to start the yachts for the Queen's and the Exhibition Cups; but, owing to the absence of anything like a breeze, they proved unsuccessful. Such races as came off were mere drifting matches. They were as follows:—

Yachts not exceeding 7 tons, Cork and Passage Railway Cup, value £10. The following entered:—

Yachts.	Owners.	Tons.	Place.
Gazelle ..	Capt. Biddulph, R.H. ..	.. 5 ..	Milford.
Cushla ..	W. C. Hickman, R.C.Y.C. ..	.. 6 ..	Wexford.
Experiment ..	P. S. French, R.C.Y.C. ..	.. 5½ ..	Cork.
Djalma ..	Abraham Hargrave, R.C.Y.C. ..	6 ..	Ditto.
Truant ..	Robt. M. Grimsell, Birkenhead ..	2½ ..	Liverpool.
Midge ..	L. Pearcy	..	Cork.

Djalma led off at starting, followed by the *Truant*, which, in a little time, took the foremost place, and kept it all through, coming in at twelve minutes before seven; *Djalma* a very good second. The other yachts were not timed, and it is presumed that they gave up during the progress of the race.

There were a few other private matches between row-boats. The boats of the *Warhawk*, *Aquila*, and *Cynthia* had a rowing match, in which the *Warhawk* came off victorious, the *Cynthia* following close, and the *Aquila* coming in third.

On Friday, about twelve o'clock, a light breeze started from S. by W., and the following yachts were ordered to prepare to start for the Exhibition and Queen's cups, time race.

Name.	Owner.	ons.	Place.	Prize.
Cynthia	H Roe	55	Dublin	Queen's
War Hawk	J. Bartlett	56	Thames	Queen's
Aquila	J. M. Rowan	43	Greenock	Queen's
Tartar	W. H. Dawes	49	Cowes	Queen's and Exhibition.
Pauline	C. Brandreth	39	Ipswich	Queen's
Bacchante	B. H. Jones	79	Liverpool	Queen's
Stella	H. M. Lang	43	Largs	Queen's
Eglinton	J. Wheeler	36	Cork	Queen's and Exhibition.
Fingal	F. Gowan	16	Kingstown	Exhibition
Cushla	W. C. Hickman	6	Wexford	Exhibition
Atalanta	Mr. Scovell	29	Kingstown	Exhibition
Antelope	W. Hull	17	Cork	Exhibition
Enchantress	S. Hodder	55	Cork	Exhibition

The boats started at half-past twelve, and were immediately under way. They had an exceedingly beautiful start, the *Tartar* getting first place, the *Eglinton* second, *Aquila* and *Stella* following almost close together, *Warhawk* next, and the remainder following in a line. As they proceeded towards the Spit light, the *Fingal* unfortunately got aground and lost some minutes in freeing herself. While rounding the Spit the *Tartar* was first, *Aquila* second, *Warhawk* third, *Cynthia* fourth, *Stella* fifth, *Bacchante* sixth, *Atalanta* seventh, and *Enchantress* eighth, the remainder following in a body. This was at a quarter to one, and in a few minutes afterwards the vessels slipped one by one out of sight. Their appearance as they rounded the Spit was very picturesque, their masts gently bending to the breeze, and their sails flapping in the wind. As they rounded the point, the *Aquila*, which had obtained the weathermost position near the Spit, got the start of her competitors, and was the first boat out of sight.

The yachts for the Queen's Cup came in in the following order shortly after eleven o'clock at night—

	h.	m.	s.
Stella	11	15	39
Tartar	11	24	30
Atalanta	11	29	20
Cynthia	11	30	15
Aquila	11	36	10
Pauline	11	38	46
Bacchante	11	43	20

Those that started for the Exhibition Cup arrived about the same time, as follows:—

	h.	m.	s.		h.	m.	s.
Antelope	11	40	30	Fingal .. .	11	47	12

The others were not placed.

Several other races of minor interest took place during the day.

Both the Queen's and Exhibition Cups, which are very tasteful works, were manufactured by West and Son, her Majesty's goldsmiths, at Dublin. The Queen's Cup represents the globe, supported by Tritons, and surmounted by the figure of Victory, showering forth wreaths. The figures are modelled in a bold masterly style in frosted silver; the zodiacal figures are burnished upon a frosted ground. The whole stands upon an ebony pedestal, and is a most highly wrought and appropriate nautical prize.

BILLINGSGATE NEW MARKET.

This handsome building, which has been partially opened in time for the Oyster Season, which commenced on Wednesday last, is in the Italian style, of red brick; the arcaded river front presenting a very pleasing effect. The central tower, which serves as a ventilating shaft, has a clock, which strikes the hours on a bell of extremely fine tone. The fish market is divided into two stories: the upper on a level with the ground line of Thames-street, and the lower some feet below that level; this latter is the market for all kinds of shell-fish. The upper market, at present, is not finished; it is spacious compared to the Billingsgate of the olden time, and will be considerably enlarged when the leases of some houses fall in, which prevent the completion of the building according to the full intentions. The shell-fish market, however, is open; the places for the shell-fish market bearing some resemblance to square pits, with grazed divisions at the sides, as cellars for the respective salesmen.

In a future number of our Journal, when the upper fish market is ready for the transaction of business, we shall illustrate it, and the fountain which graces its central avenue.

BILLINGSGATE NEW MARKET.

KEW GARDENS.

CENTRE OF THE GREAT PALM HOUSE AT THE ROYAL BOTANIC GARDENS OF KEW.

THE GREAT PALM HOUSE, KEW GARDENS.

In the latest of Sir W. J. Hooker's annual "Reports" on the Royal Gardens of Kew, we find the [illegible] building the new Victoria House in the Royal Gardens]; the glass, tinged purposely with a greenish hue, and of which there are 45,000 square feet, was prepared by the Messrs. Chance, of Birmingham; the timbers by Messrs. [illegible] and two wings, enclosing an area [illegible] feet in length, the centre is 100 feet wide, and 66 feet in height; the wings are 50 feet wide and 30 feet high. The roof is curvilinear, with glass [illegible] docks of Cornish [illegible] and these are jud[illegible] level of the floor. The smoke from twelve great under-ground furnaces is conveyed by under-ground flues within a brick tunnel 466 feet long, in a straight line [illegible] an ornamental tower. [illegible] through the brick tunnel above-mentioned, by a Railroad.

On entering the house by the main approach, we feel ourselves at once, as it were, transported into a tropical forest; and if we enter by one of the principal side doors, we find a [illegible] walk traversing the [illegible] right [illegible] ground [illegible] the [illegible] to the south we will look across the pleasure-ground to the pagoda; on the west is seen the "Syon Vista," recently formed, three-quarters of a mile long, bordered the whole way to the river with young deodaras; on the north, he will see the Victoria House, [illegible] the Queen's [illegible] and the greater part of the Botanic Garden, with the main walk or approach to the Palm House

Within the building hours may be advantageously spent in inspecting the noble forms of the many gigantic palms, which give the name to the building; the bananas, the strelitzias, the lofty bamboo, the huge foliage of the "travellers' tree" (*Urania speciosa*), the numerous figs, the great variety of the zamia tribe, with bulky stems and feather-like leaves (in the present day natives only of the Tropics, but found in a fossil state abundantly in England); the mango trees bearing flower and fruit, the sugar-cane, the papyrus (an aquatic), the chocolate, coffee, assam tea (requiring greater heat than the Chinese tea), the papaw tree (available in making old and tough meat tender), the bread-fruit, the poison-nangilla, the cinnamon, and cassia, the bo-myan tree, the pepul (the peaceore of Scripture), the cotton plant, and, above all, perhaps, for rarity, grace, and elegance, the tree-ferns. Among the palms, or at least among those most interesting to a stranger, are the cocoa-nut, the ela-palm of Guinea, the wax-palm of Sumbabi, the vegetable-ivory palm, the pleticocomia—the tallest of all our palms, yet with a stem so slender that it is tied to a stout wire attached to the bottom and top of the house to keep it upright. In its native country (Java and the East Indies) it is supported in an erect position in the dense forests by means of the long tails of the great pinnated leaves, which are provided by nature with inverted hooks as strong as iron. These leaves thrust themselves upwards among the branches of the surrounding trees, and hook themselves on most securely.

We are limited to the above brief outline of this magnificent palace of the vegetable Titans, which the reader will find more fully detailed in Sir W. J. Hooker's "Popular Guide." Tenth Edition.

LAW AND POLICE INTELLIGENCE.

ROMAN CATHOLIC BEQUESTS.—IN RE CLANCY'S TRUSTS.—In the Rolls Court on Monday, a petition of the Rev. John Ringrose, of Reading, and Francis Dearlove, a resident Roman Catholic ratepayer of the parish of Reading, was presented, the object of the petitioner was to have trustees appointed of certain charitable bequests left by the will of the late John Clancy, of Reading, dated the 7th of April, 1849. The testator, after giving certain legacies to various charitable institutions, gave and bequeathed to the Catholic Bishop for the time being of the London district, and to the chaplain for the time being of St. James's Catholic Church in the Abbey road, for poor Catholic children in Reading aforesaid; and his residuary estate he gave to them to be divided equally between the said school for Catholic children and the Society for the Relief of Aged and Distressed Poor Catholics. The testator died on the 10th of May last, and his executors paid in the above sums into Court under the Trustee Act, in consequence of there being no person answering the description of Catholic bishop of the London district. It appeared that Dr. Grant is Roman Catholic bishop of the district in which Reading is included, and the application was to have him and Mr. Ringrose appointed trustees. It was objected, on the part of the next of kin of the testator, that the bequest was void under Lord Mortmain Acts; and it was argued also, that the late Ecclesiastical Titles Act prevented any such person as Catholic Bishop of the London district being recognised. After the arguments of the counsel for the different parties had been heard, the Master of the Rolls was of opinion that as to the gift for the school being for the establishment of a school, it necessarily supposed the taking of land, and was, therefore, void under the Mortmain Acts; but as to the other part—the alms people—he would appoint Dr. Grant and Mr. Ringrose trustees.

OLDFIELD *v.* COBBETT.—In the Court of Chancery, on Saturday last, Mr. Cobbett, who has been for several years detained in the Queen's Prison, at the suit of Jesse Oldfield, for non-payment of the costs of that suit, was brought up on a *habeas corpus*, and intimation made to him that he was discharged by the consent of the plaintiff. After an attempt to address the Court, which the Lord Chancellor refused, the order for his discharge was been placed in the hands of the officer, Mr. Cobbett was discharged from custody, and left the Court.—The Court then rose for the long vacation.

SOCIETY FOR PROMOTING THE AMENDMENT OF THE LAW.—The sixth annual report of the council states that the chief subjects that have occupied the attention of the society during the past year have been the removal of the distinction between the procedure of the courts of law and equity in this country; the reconstruction of the Master's office, involving its partial abolition; the enfranchisement of copyholds; the simplification of the transfer of land; the relations between the bar, the attorney, and the client; and the establishment of a law school, which, under an effective system of examination, before granting a law degree on admission to the bar. The Society for the Amendment of the Law has suggested and investigated the principal improvements that have recently taken place in the law. They commend the simple statement of action; and the fusion of law and equity as the only means by which a real reform of common law procedure can be obtained. They say that technical pleadings ought to be abolished, and informal statements couched in ordinary language, and verified by the oaths of the parties substituted for them. They deny that a system free from technicality can ever be made to conform to the technical divisions of actions; they do not believe that the common law courts of the present age will long endure the expense, the delays, and the absurdities incident to a system which insists that parties shall express themselves in a court of justice in language different from that employed in similar transactions out of doors in ordinary life. They recommend the establishment of a system of legal education, and a comprehensive digest; consolidation and codification of the whole of the statute and common law.

THE DIGNITY OF THE BENCH IN CALIFORNIA.—The San Francisco papers give the particulars of a "difficulty" which occurred at Sacramento on the 16th of June, between Judge Wilson and two men named Caulfield and M'Kune. It appears that M'Kune struck Judge Wilson with a bludgeon, whereupon the Judge drew a sword from a cane and ran his assailant through the body. Deputy Sheriff J. M'Donald then came up to separate the parties, when Caulfield drew a pistol and aimed at Judge Wilson. M'Donald, however, interposed his body, and received the shot, which entered his left side and passed out at the right. M'Kune, although at first supposed to be mortally wounded, would, it was thought, recover. Fears were entertained that M'Donald would not long survive.

LAW AND LITERATURE.—The tender care of the interests of authors which the French tribunals take in displaying, has been again exemplified this week. A physician was employed to write an article on "Médecine" for an encyclopædia now in course of publication. The editor modified some portions of the article, and cut out others; and then declined to pay for more "copy" than was actually used. The physician brought an action, and the Court sat down that the editor had no right to alter the MS. supplied on an article without the author's consent. It accordingly condemned him to cut out the article from the copies of the encyclopædia still unsold, and to replace it by the one originally written, to print sufficient copy of the latter for sale to all the subscribers of the work, and to pay the author the full value. *Athenæum.*

LETTERS PATENT.—By letters patent was meant originally letters from the Crown that were open to everybody who could read, and were not, when lampreys were first caught, they should not be sold for more than 3*s.* each, until after February, when they were to be sold at a lower price. In another case his Majesty granted a licence to Peter Bullo to carry any religion he pleased. In another instance he granted safe conduct, or the right of proceeding, without molestation, to enable Stephen, Archbishop of Canterbury, to come to Staines. By another, a licence was granted to Margaret de Lacie to have whatever religion she pleased; and, in another case, his Majesty issued his Royal letters patent, to certify that Robert, the son of Robert the mercer, lost his ear at Chatteaneuf, in the King's service, and not on account of any felony. The usual punishments for felony was nailing one of the ears of the offender to the pil ory, it was highly necessary for a man who had sustained a loss of the kind to be able to account for the same in a satisfactory manner. Many of the letters patent in the olden time; they are now issued for a very different purpose.

PARISIAN STATISTICS.—The police in the month of June arrested 1837 persons, 936 of whom were men, 580 boys, 242 women, and 47 girls. In the number were 939 who had previously been convicted of offences, 156 beggars, and 159 foreigners; 32 of the arrests were for embezzlement, 42 for rupture of ban, 107 for cutting and wounding, 17 for political offences, 242 for different offences, 48 for swindling, 31 for manslaughter, 148 for resisting the police officers, &c., 441 for vagabondage, 5 for sale of printed papers, 314 for robbery. The total number of arrests was 100 more than in the month of May. The number of abandoned children was 270. The number of articles found in public vehicles was 284. Among them were several important sums of money—one of 6000*f.* The owner of the latter presented the coachman who found it with 30*f.*!

FAIR-HEAD HARBOUR COMPANY.—The projected Harbour of Refuge, and for commercial purposes, at the N.E. extremity of Ireland, seconds at all times to the latest moment, seems to be in a fair way of realisation, and the mercant le interest in its first impetus arose from the comparatively small cost of carrying it out by the plan of Mr. W. H Smith, the engineer, and which received the sanction of the Admiralty; and the following glance at the plan may will show its desirableness, not to say its vital necessity. A now truly hazardous channel to the north and east of Scotland, Londonderry, Limerick, &c., will become a valued and rapid course, by which vessels from Glasgow, Liverpool, and elsewhere, bound to the United States, Canada, &c., may shorten their passage by nearly a week.

PROPOSED SORTING OF ENGLISH LETTERS IN NEW YORK.—The sorting of American letters directed in England, are their transit, prevents to a great extent the inconvenience which is felt in Liverpool on the receipt of the packets of letters from the States. The Liverpool Chamber of Commerce have decided to solicit the influence of the New York Chamber with the postal authorities in America, in order that a similar arrangement may be effected.

THE THEATRES.

HER MAJESTY'S.

Rossini's "Barbière" was given for the eighth time on Saturday night, supported by Madame de Lagrange, Signori Calzolari, Susini, De Bassini, and Lablache.

On Tuesday was the fifth representation of Bellini's 'Puritani," with Mdme. de Lagrange, Gardoni, D'e Bassini, and Lablache

On Thursday night was produced, for the first time in this country, the romantic opera, in four acts, "Casilda," the composer of which is a Royal amateur, the Duke of Saxe-Coburg-Gotha, brother of Prince Albert, who is also an accomplished musician, in addition to his other varied attainments. The Duchess of Kent is known as a composer, and our most gracious Queen has musical talent of a high order. Those amateurs who have watched the programmes of the Royal concerts will have observed the truly cosmopolitan feeling for art, displayed therein. Her Majesty and Prince Albert display an exclusiveness nor bigotry in their selections; the gems of every school are appreciated, and services of more than merit are heard in the palace. It is to be regretted that "Casilda" has been brought out after the departure of the Court from town, although the interest in the fashionable and musical circles to hear the new work was strongly manifested, even at this late period of the season. The work was originally produced at Gotha, in April, 1851, and the highly favourable impression made on the amateurs of that musical city was the inducement for director of the opera-houses in Germany to produce it, and Vienna amongst other capitals, confirmed the verdict of approval. More recently (in April last) a French adaptation of the German version was given at the Théâtre Royal in Brussels, where "Casilda," met with a cordial reception, although the *artistes* to whom the principal parts were allotted were of an inferior rank. The Italian arrangement of the opera has certainly not suffered in this respect, as the cast included Madame Charton, as *Casilda*; Mdme. de Lagrange, *Donna Anna*; Mdlle. Feler, *Rosita*; Signor Calzolari, *Alfonso*; Signor Susini, *Gomez*; Signor Mercuriali, *Pueblo*; and Signor De Bassini, *Don Lamyt*. In the *divertissement* attached to Mr. Gosselin, in the fourth act, Lamorricas, Algerini, and the two Pascales appeared as principal dancers. The action being in Spain, the scenic *artists* and the *costumiers* have had their chances of distinction; and in choosing gypsies, Mr. A. Harris's taste has been effectively put in requisition for picturesque groupings, especially in the first act; the development of the story, however, leaving little scope for a very attractive *mise en scène*. The peculiar circumstances connected with the opera, is in fact, the libretto, which is an uninteresting and wearisome imbroglio. The scene is at and near Seville. *Casilda* is of the Precious and Esmeralda species—a kind of Bianca Capello, only that she is more of a *fast* of the period. She has no less than three lovers—first, *Don Alfonso*, who, owing to a duel, in which he believes he has killed a rival, has joined the gipsies; secondly, *Don Lamyt*, the favourite of Seville, who is married to *Donna Anna*; and, lastly, *Gomez*, a rough "child of the mist." *Don Lamyt* invites *Casilda* and her comrades to a *fête*, where she discovers that *Alfonso*, on whom she has bestowed her affections, has been slain by his fourth act, Lamorricas, Governor, discovering the double intrigues, throws *Alfonso* into a dungeon; but, repenting of his harshness, releases him; and it is ascertained that the Don Ruy of Arcas, supposed to have been killed by *Alfonso*, is still living. A happy denouement is, of course, achieved, *Casilda* being united to *Alfonso*. The misfortune of this confused libretto is, that *Gomez*, who is the only reputable character in the entire opera, appears to be badly used. The remaining personages are, one and all, very scampish. If we have left *Rosita* and *Pueblo* unaccounted for, it is that they only figure in the last act, at a bridal party, without the slightest influence in the events of the piece; and it is the explanation of the book be not very lucid, we must frankly own that it arises from our utter inability to comprehend the poet's intentions. That the composer must suffer from such a concoction was inevitable. He has had to write a vast quantity of meaning-less recitative, and it is rarely that he has been afforded situations sufficiently striking to command sympathy, much more to excite those profound emotions, without which the lyric drama becomes an intolerable nuisance.

There is, however, some nice writing in "Casilda," some elegant instrumentation, and some pretty ideas. The principal defects are in the want of individuality, in the lack of spontaneous imagery, and in the deficiency of force and imagination. The machinery is unnecessarily complicated and abstruse, the composer is not prolific in melodious ideas, and overflows with chromatics as Spohr. The constant changes of key leave no time for the ear to be charmed with a catching theme. If the Royal amateur had been as happy throughout the work as in the wild and opening romance of *Casilda*, how different would have been the result! This plaintive melody steals upon the senses at once, and its reiteration at divers parts of the score is always delightful. So the finale to the fandango is irresistible. Rendered by the musical snuff-box voice of Charton, it was the right soul in the gloomy portions of the opera. The *aria cantabile* of Madame de Lagrange was highly effective, as was the cavatina of Gardoni in the cabaletta were finely executed. A chorus of the ancient style, "Casita," has merit; but the long scena of *Casilda*, a bet elegantly scored, was tedious. A very clever duet between De Bassini and Susini in the third act, and broader in construction than any o her winding-up act. A prayerful gipsies, and a tramp chorus were the prominent items in the concluding act. The tramp chorus was unstrung to the ultimate point, and the finale the fandango, very skilfully carried out. Harris, who played a Bohemian, gave immense life to the grouping. An unaccompanied trio, sung by Madame Lagrange, Calzolari, and De Bassini, must be cited as another charming feature in the opera. Gardoni was encored after each act, and deserved the compliment, for their task was arduous, the facility for good voicing not being one of the Royal composer's attributes.

This (to-morrow) evening, the opera of "Casilda" will be repeated; this evening (Saturday); the theatre will remain open for some additional representations at play-house prices the first of which will be given next Monday, for the benefit of the orchestra and ballet-band. Grisi, Persiani, and Castellan, with Mario, Tamberlik, and Ronconi, will perform Mozart's "Don Giovanni" will be produced for the first time this season, with Madame Fiorentini's *Donna Anna*, Calzolari's *Don Ottavio*, and Lablache's *Leporello*. Madame Tedesco, who formerly held a high position as a *prima donna*, will be the *Zerlina*; Madame Garcia, of Drury-Lane Theatre, will be *Donna Elvira*, busini, the *Commendatore*, and F. Lablache *Masetto*. Rosati and Fanny Cerrito dance the minuet, and Madame de Lagrange, Madame Charton and Gardini will sing some of their favourite airs.

In the next ILLUSTRATED LONDON NEWS Monthly Supplement of Literature, Music, Fine Arts, Science, we shall publish our summary of the season, which Mr. Lumley has brought to a conclusion, under such trying difficulties. It is stated that he will commence his campaign in Paris, in October, and that he will continue in the direction of her Majesty's Theatre during the next season of 1853.

ROYAL ITALIAN OPERA.

The fourth representation of Spohr's "Faust," on Saturday night last, conducted for the first time by Costa (no little gain in the animation of the execution), with Mdme. Castellan, Mdlle. Anna Zerr, Mdlle. Seguin, Tamberlik, Stigelli, Mm. Soda, Ronconi, Gassier, Gregorio, and Polonini. The fifth representation, on Tuesday, of Donizetti's "Lucrezia Borgia," with Grisi, Mdlle. Zerr, Mario, Mei, Soldi, Ronconi, Polonini, Tagliafico, and Ronconi, followed by the third and fourth acts of Donizetti's "Marino Faliero," with Mdme. Julienne, Tamberlik, Ronconi, Stigelli, and Marini; and the sixth night of Meyerbeer's "Prophète," on Thursday, with Grisi, Castellan, Formes, Stigelli, Polonini, Tagliafico, Romconi, Soldi, and Mario, have been the events of the week. Auber's "Crown Diamonds," announced for production under the composer's direction this evening (Saturday), has been postponed till next Tuesday. Mdlle. Anna Zerr will sustain the part of *Catherine*, and Tamberlik that of *Peter the Great*; the first act will be at Saardam, in Holland; the second is at the battle of Pultwa; and the last at Moscow.

ASTLEY'S

To this theatre Mr. Fitzhall has contributed a new spectacular drama, under the title of "Peter the Great," which, for its well managed situations, and its processional groupings, deserves more than common praise. The scene is a wooding and wedding of the Emperor of all the Russias with Catharine, a peasant and a slave; and the machiavelian ons of Eudocia, the divorced Empress, which are all defeated, the curtain falling on the consecrated marriage ceremonial. The dialogue of the piece is not brilliant, and the hero, the Great Peter, better acted than might have been expected. The temporary vacation at the Princess' has placed Mr. Ryder at the service of the management, and he gave to the part of the illi-tempered Emperor an artistic interpretation which elevates the present performance in histrionic rank above the usual level attained at this theatre.

After the melodrama, the Scenes in the Circle demanded attention, and were rendered no sinkable by what the bills truly call the "wonderful" feats on le Perch of the MM. Legrier, from Paris. A lofty pole is sustained on the back of one performer, and on the top of this pole is the human gymnast. The upper, balances himself there for awhile, then indulges in several bodily contortions and suspensions, head upwards or downwards as it may happen; finally prostrating himself in the horizontal position, and transferring the whole of the pole to the shoulders of his coadjutor below, reaching with a somersel the ground in safety. The feats are astonishing, and require the utmost precision from both performers.

OLYMPIC.

"Sink or Swim" is the name of a new comedy, in two acts, by Mr. Thos. Morton, produced on Monday. The piece is founded on the marriage and domestic ills of poets, whose dreams of suicide and desires for work: and the author has availed himself to the utmost of pre-existing materials, both in regard to characters and incidents. The main situation is that of the bond *Lord Lavendy* (Mr. Hoskins), determining to drown himself, and, in the attempt, rescuing against *Adam Sterling* (Mr. Farren), a ruined merchant, intent on the same purpose. Mutual explanations ensue, and their common object is accomplished. *Miss Sterling* (Mrs. Walter Lacy) however, being run away with by one of his Lordship's companions, *Lord Twenty* fines occupation in the pursuit and a duel. A further trial awaits him, owing to a lirted goodnatured poet contrived at his expense by his uncle, *Sir Felix Fyndoran* (Mr. G. Cooke), who passes off Mr. Compton, in the character of an old eccentric gardener, as the true claimant of his lordship's title and estates. The news is received by the jilted nobleman with perfect equanimity; right willing is he to work for his living on a three-legged stool, in Snelling's counting-house. Hereupon the new comedian of the uncle falls to the ground. The faults of this production are its alternate sentimentalism and extravagance; with these the performers had to contend; but as they acted well, the drama was brought successfully through, though it was by no means without the usual incidents of the Olympic. Mr Compton's drollery was, indeed, the chief attraction of the piece, but this formed only so small a portion of it as to fail in sustaining the requisite degree of interest. Mr. Farren's pathos, in some domestic scenes, was irresistible; but the opportunities were too few to realise the full advantages even of such acting. Mr. Hoskins, also, had a part entirely to his taste, which he performed with gentlemanly ease, though perhaps somewhat ostentatiously assumed.

VAUXHALL.

VAUXHALL.—The Gardens on Monday were crowded to excess, the attraction being, in a great degree, the announced appearance of the Italian singers; but the concert was postponed, in consequence of a slight rehearsal, which is to take place on the same evening, of the new opera of "Casilda," at Her Majesty's Theatre. The sudden fact, however, seemed to have no very powerful effect upon the multitude of visitors, who entered with great spirit into the various enjoyments of the Gardens. The new ballet of "Leda" is exceedingly pretty, and the scenery, dresses, and dances are graceful and appropriate. Mdlle. Pearon and M. Vaudris executed a *pas de deux* which elicited great applause. The Grand Chinese Fête is announced during the week.

ALBERT SMITH'S ASCENT OF MONT BLANC.—Among the fashionables who [illegible] during the past season, were his Serene Highness Duke Bernhard of Saxe-Weimar, who [illegible] Prince Leopold of Saxe-Coburg, the Duke of Montrose, the Earl and Countess of Derby and Lady [illegible], Duke of Montrose, Marchioness of Westmeath, Earl and Countess of [illegible], Marchioness of Aylesbury, Earl and Countess Grey, Viscount Jocelyn, Lord Castlemain, Earl and Countess of Wilton, Earl and Countess of Chesterfield, Duke of Leeds, Marchioness of Abercorn and the Ladies Hamilton, Countesses of Shaftesbury, Earl and Countess of Harrowby, Viscount and Viscountess Ossulston, Lord Boyle, Earl of Darnley, Viscountess Milton, Lord Stanley, Countess of Westmoreland, Viscount and Viscountess Dupplin, Lady St. Leonards, Earl and Countess Fortescue, Right Hon. Benjamin and Mrs. Darwall, Colonel Harvey, &c.

ROYAL SURREY GARDENS.—The members of the National Temperance Leaguе gave a series of *fêtes* in the Gardens on Wednesday and Thursday. The former was opened by a grand lancy fair, which presented a number of marquees very handsomely ornamented with flags, banners, and wreaths of flowers. The stalls, likewise, were tastefully arranged and divided into different compartments representing the different trades, and the whole was on a scale of total abstinence. The foil band of the Scots Fusilier Guards was in attendance. In the evening of each day there was the usual concert, presided over by the great *maestro* Ismail A. Julien. The whole of the evening was terminated by the eruption of Mount Etna, the display of fireworks during the course of which elicited immense applause. It was understood at the entrances that not less than 20,000 persons had passed into the gardens during each day.

CREMORNE GARDENS.—This very seasonable resort continues to attract crowds of afternoon and evening visitors. In the Cirque Oriental, the performances of Devare, the Italian Brothers, and the boy-rider, Soulilier, maintain their popularity in the unflagging round of amusement.

MUSIC.

HEREFORD MUSICAL FESTIVAL.—The programme of the 129th meeting of the three choirs is before us. The stewards, who undertake the financial responsibilities, are the Bishop of Hereford, Lord Rodney, Archdeacon R. Lane Freer, B.D. (for the second time), the Rev. W. T. Napleton Fenoyer, R.A. (for the second time), Edward Bosley, Esq.; and T. Evans, Esq. The festival will commence in the Cathedral on Tuesday, September 14, when Handel's "Dettingen Te Deum," Luther's 100th Psalm, F. Hemphrey's "Jubilate," Mendelssohn's Psalm xcv. will be executed, besides a Chant for the Psalms, and an Anthem for eight voices, by Mr. Townshend Smith, the organist and conductor. Haydn's "Creation," Spohr's cantata, "The Last Judgment," and portions of Beethoven's Mass in C are included in Wednesday's scheme. On Thursday, Mendelssohn's "Paul" and Spohr's "Last Judgment" are the oratorios; and on Friday morning the festival ends with Handel's "Messiah." For the evening concerts of Tuesday, Wednesday, and Thursday, in the Shire Hall, the singing of the English Glee and Madrigal Union (Mrs. Edgworth, Miss Williams, Messrs. Lockey, Hobbs, H. Barnby, and Phillips) will form a powerful feature of the performance. Mdme. Clara Novello, Miss Dolby, and Herr Formaby, will sing their most popular pieces; and, in addition to the before-mentioned vocalists, will be heard in the oratorios and sacred selections. Concerto and orchestral pieces by Beethoven, Spohr, Cooper, Dando, Mellon, Watkins, J. Loder, Cusins, Seymour, E. Chipp, Hill, R. Blagrove, Trust, Weslake, Lucas, Hatton, W. L. Phillips, Calkin, Howell, Fower, Severn, Pratten, Barrett, Nicholson, Williams, Richardson, the Lavenus, the Harpers, the Smithies, Chipp, André, &c., in the band—will be Beethoven's D, and Mendelssohn's in A, Mozart's "Zauberflöte," Weber's "Oberon," A. Mellon's in A minor, and Handel's "Dettingen Te Deum" and Saturday evenings, after the concerts, balls will be given, with Mr. E. T. Jones as leader of the band.

THE ORCHESTRA AT THE BIRMINGHAM MUSICAL FESTIVAL.—Costa has caused the number of the orchestra to be materially increased, as the following names will amply prove:—First Violins: Sainton, Blagrove, Banister, Bezolli, Browne, Case, E. Chipp, Clementi, Cooper, Cusins, Dando, Day, Dando, Doyle, Goffrie, Griesbach, Hill, Hobbs, Howell, H. W. Love, Mellon, Pulitzer, Pollitzer, Seymour, Thirlwall, Thomas, Tourneur, Watson, Zerbini. Second Violins: Watkins, Anderson, Blagrove, W. Burt, Bradley, Boeis, Calkin, J. F. Crowdeck, Card, Cox, Dando, Dando, Field, Foley, Loder, Marshall, Newbank, Neckel, Payton, Perry, Picott, Shergold (2), Thirlwall, Jun., Westropp, Wilkins. Tenors: Hill, Alsopt, Bolleau, Blagrove, R. Betts, Calkin, Chipp, Crowdeck, Cusins, Dando, Dando, Hobbs, Howell, Hutton, Mould, Shergold, Stanley, Tolbecque, Tolbecque, Lucas, Aylward, Calkin, G. and J., Guest, Hancock, Hatton, Hausmann, Paque, Pratt, Phillips, Read, E. and W., Regé, Schroeder, Shepherd, W. L. Thomas, Thomas, Howell, Reinfelt, Ball, Campanile, Castell, Edgar, Flower, Griffiths, Mount, Pratten, Reynolds, Rowland, Severn, Schroeder, L. D., Vandrelon, Winsor, Winterbottom. Flutes: Pratten, De Folly, Stanier, Tilley. Oboes: Barret, Nicholson, Malsch, Horton. Clarionets: Lazarus, Williams, Meyrock, and Rinck. Bassoons: Baumann, Larkin, Godfrey, and Blythe. Trumpets: Harper (2), Irwin, and Handle. Horns: Harp r, C., Jarrett, Rae, and Kellbach. Trombones: Reinfelt, Smible, Jun., Healey. Ophicleide: Prospere. Serpents: Standen and Thurstan. Double Drums: Chipp. Side Drum and Triangle: Seymour; and Base Drum, Horton. Total: 28 first violins, 25 second violins, 18 tenors, 18 violoncellos, 16 double basses, 16 wood, 12 brass, and 3 percussion, in all, 140 executants. The chorus will comprise 80 sopranos, 70 contraltos, 60 altos, 80 tenors, and 83 basses—323 voices; Mr. Stimpson being the chorus master and organist, and J. O. Mason, Esq., orchestral steward.

THE SICILIAN SOCIETY.—Handel's "Acis and Galatea" was performed on Thursday, at the Albion Hall, London Wall, by the members, under the direction of Mr. Hullah, Mr. Stimpson presiding at the harmonium as organist.

THE ITALIAN OPERA AT BERLIN.—The season will commence in October, with Madame Fiorentini as *prima donna*, for an engagement of two months only, as she has resolved to return to this country, and to sing in oratorios and concerts.

FOREIGN MUSICAL NEWS.—The effect of the hot weather in Paris, in the receipts of the theatres and other public entertainments, is manifested in the returns of the Opéra Comique, which show a falling off in receipts as compared with a preceding month of no less than 330,086*f.* 54*c*, nearly one half.——A new opera entitled "Udina," will shortly be produced in Vienna, the music by M. Lwoff, an aide-de-camp to the Emperor of Russia, director of the Imperial Chapel, and author of the National hymn; the libretto is by M. de Saint Georges Ruhinstein's new opera, the "Battle of Koulekowo," is also in great favour in St. Petersburgh; and Meyerbeer's "Etoile du Nord," composed expressly from his own map arrive from the north, as well as the new *prima donna*, if faith is to be attach d to Rellstab's glowing colory of Bertha Westerstrand, from Sweden, who is to appear soon in Berlin, with a voice up to F sharp, and an organ of a *timbre* and charm without precedent.

BRESLAW EXHIBITION.—In the Exhibition of Manufactures now open at Breslaw are seven ingots of native gold. Up to the end of the 16th century considerable quantities of gold were found in Silesia, in the sands and detritus of the beds of rivers flowing from the Sudetes Mountains, and especially in the last-mentioned town was built by the gold-seekers. The extraction of gold was abandoned from the end of the sixteenth century up to 1837, when two gold-seekers, the same names of Heit-ceiner and Sonntag, with their 120,000 or 130,000 inhabitants. This scheme was originated out of the efforts which, during the past few months, have been made by a number of gentlemen, principally merchants of Breslaw and Berlin, to form a company, with the view to the establishment of public gardens. Mr. Woolcombe's scheme is much more extensive than anything contemplated by the first promoters; it embraces gardens to the south of the Serpentine, of 25 to 30 acres, and the Crystal Palace, covering an acre of ground. The land to be leased by the trustees of the manor, free of cost, will a view to the improvement of the surrounding property; the cost of laying out and the Crystal Palace is estimated at £70,000, of which Sir Joseph Paxton is of opinion the Crystal Palace would cost about £12 000: besides Sir Joseph Paxton, Mr Woolcombe has consulted Mr. Scott Russell and Mr. Brunel, the engineer, by the whole of whom his plan is highly approved. The site selected is contiguous to the Cornwall Railway, and just in front of the Fawley Villas. It commands views of the Sound, Mount Edgcumbe, the Channel, and a considerable extent of country on the eastward. The project seems to arise fie money by debentures. The subject will be farther considered at a meeting to be held in a fortnight's time.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

We learn from Berlin that the *Prussian Gazette* has pronounced the recent alleged convention of the Northern Powers, published in the *Morning Chronicle* last week, to be a complete fabrication. The *Morning Chronicle*, however, persists in its accuracy.

Advices from Demerara of the 9th of July state that gold has been discovered in that colony up the Cuyuni river, and that about £200 had already been brought in. It is alleged to be remarkably pure and to consist of small lumps, and also of scales and dust. The locality is said to be not more than two or three days' journey into the interior. At present there had been no movement on the part of the population, but it was expected that the arrival of any further quantity would lead to an active exploration.

The clearances from the port of London for the gold colonies of Australia during the week ending Saturday last have again been large. They consisted of five vessels to Port Phillip of an aggregate burden of 3037 tons, and three to Sydney of 1491 tons. There was also one of 534 tons to Adelaide. South Australia. The exports to Port Phillip and Sydney of goods, tobacco, and spirits were very heavy, although in the latter place has been a slight falling off, as compared with previous weeks, on account of the heavy shipments already made. The number of emigrants is supposed to have been upwards of 1000.

A Quebec paper of the 15th of July gives an account of the loss of seven lives by a land-slip at Cape Blanc.

The late American statesman Henry Clay's will, has been proved. He has bequeathed his property entirely to his members of his family, his widow retaining for her sole use and benefit the Ashland homestead. In regard to his slaves, he has directed that all born after the 1st of January, 1850, shall be liberated and sent to Liberia, the males when they arrive at the age of 28 years, and the females when 25, previous to which they are to be taught to read, write, &c.; and the proceeds of their labour for three years previous to starting are to be appropriated to defray their expenses to their new home. The older slaves are to remain for the benefit of the family.

Mr. J. C. Lanyon, of Redruth, has received from his son in Adelaide a very perfect specimen of a malachite, which we believe is the largest ever found, even in Australia. It measures 4 feet 5 inches on its largest circumference, and 2 feet 1 inch on its smaller, and weighs 112lbs.

On Tuesday afternoon a man named Charles Mayo was shockingly maimed on the Great Western Railway, near the terminus, by an engine passing over his legs, and nearly severing them from his body. He expired on the following morning.

The amount of railway calls falling due in August is small, being only £649,494 against £1,867,655 last month. The proportion called by foreign companies is £272,940.

Most disastrous accounts are received of the future prospects of Madeira. It seems not improbable that the celebrated wine of Madeira will be a matter of history. A blight of some sort has entirely destroyed the vintage for this year, and seems likely to destroy the vines themselves. It appears in the shape of a thick white powder, which entirely covers the clusters of grapes.

It is said that of 1500 weavers at present unemployed in Paisley, 1200 are desirous of emigrating; representing, at least, 6000 individuals. Arrangements have been made to give free passages to 300 adults. The weavers in other parts of the country are also in distressed circumstances, and many of them are making application to be taken to Australia.

The *Kilkenny Moderator* states that Captain Evans, late Poor-law inspector, has been appointed Assistant Poor-law Commissioner for Carlow, in the room of Mr. Ball, now one of the members for that county.

The Customs duties for the port of Dublin for the last week were only £1,900, against £17,800 in the corresponding week of last year; tea, £6900; sugar, £2300; wine, £1400; spirits, £400; tobacco, £3900. Mercantile matters of every description have been exceedingly dull throughout the week.

Several provincial papers announce the fact of the potato disease having made its appearance in different parts of England, as well as of Ireland.

The country journals already teem with notices of the approaching harvest. On the whole (except pertaps as to the potato) their tone is favourable.

A valuable seam of blackband ironstone has recently been discovered in the farm of Rashmoor, in the parish of Fenwick, Scotland, and is considered to extend over a large tract of country.

On Saturday, while a number of men were employed in the excavation of the Leeds sewerage works on the Wellington-road, a portion of the tunnelling fell in, burying five of them. Four of them were soon rescued, but the fifth was not got out until several hours had elapsed. He was found alive, though in a most exhausted condition.

A man named James Fletcher, who is of respectable personal appearance and somewhat gentlemanly manners, has been apprehended by the police at Bristol upon charges of uttering forged £5 notes of the Bank of England at several shops in the neighbourhood.

Shortly the various police stations in the metropolis and its outskirts will be connected with one another and the railways by electric telegraph.

Accounts have been received *viâ* Honolulu from the Gallpagos Islands of the massacre of the crew of an American ship, and the destruction of the vessel by the convicts at Chatham Island. An American cruiser has been sent to inquire into the affair.

At Looe the mackerel seines have taken during the past week about 70 cole scads. The greater part has been taken to Plymouth.

Captain Charles Schomberg, R.N., lately serving in the *Wellesley*, under the flag of the Earl of Dundonald, is appointed emigration officer at the port of Dublin.

A font and paten, of elegant and elaborate workmanship, enclosed in a walnut box, have been presented to the parish of St. Peter, Colchester, by an American gentleman named Sears or Sayers, of Boston, United States, with this inscription:—"The gift of David Sears, of Boston, Massachusetts, in the United States of North America, to St. Peter's Church, Colchester, where repose the ashes of his English ancestry."

The election of president at the Wesleyan Conference was attended with the following result:—Rev. John Scott, 151; Rev. Dr. Alder, 62; Rev. John Lomas, 36; Rev. Sam. D. Waddy, 9; Rev. R. Keeling, 4: Rev. William Naylor, 3; Rev. Dr. Bunting, 1; Rev. Dr. Beaumont, 1.

The first coller steamer, the *John Bowes*, has arrived in the river. She is a long narrow steamer: her length of keel is 140 feet, with a considerable rake both forward and aft; extreme breadth, 25 feet 6 inches; depth of hold, 12 feet 6 inches; draught of water, with 600 tons of coals on board, 13 feet. This, however, was not a full cargo, the vessel, on her first voyage, being somewhat out of trim.

A subscription has been entered into at Alnwick, in North Northumberland, to defray the heavy expenses incurred by Sir George Grey during the severe election contest to which he had been exposed.

In addition to the liberal donation of £1000 to the Cambridge Asylum from her Royal Highness the Hereditary Duchess of Mecklenburg Strelitz, the Hereditary Grand Duke has contributed a donation of £50.

As a large Newfoundland dog was walking along the banks of the Seine, near the Barrière de la Cunette, Paris, the animal perceived something floating in the water. The dog immediately jumped in, and with some difficulty, on account of its being muzzled, seized the packet and brought it on shore. On examination it was found to contain the body of a new-born child.

A few days since a Norwegian vessel, bound from Arendal to Portsmouth, came to anchor in the Straits of Dover. On again getting under way, she brought up the cable of the submarine telegraph, which the captain was about to cut with a hatchet, when a French pilot who happened to be near ran rushed with him, and but not without some difficulty—induced him to refrain, and eventually the cable from his anchor without injuring it.

Two more deaths by drowning have recently occurred in consequence of the dangerous practice of bathing in the Thames. The one is that of George Bousfield, aged fifteen years, whose parents reside at No. 70, Suffolk-street, Borough; and the other that of a boy supposed to be about nine years of age, but whose name is at present unknown.

Mirrors upon locomotives has been tried experimentally so far back as 1840 on the London and South-Western Railway; but were discontinued on account of the mirrors being calculated to distract the attention of the drivers, who's duty it is to look a head, and of the guards to look fore and aft.

Mr. Lucas Stephenson, a tailor and draper, at Bridgegate, Rotherham, was killed a few days ago at the Leeds Central Railway station, in consequence of having incautiously attempted to enter one of the carriages while the train was in motion. He fell on the line, and the wheels of the carriages instantly cut off his head.

It is rumoured that a gold mine has been discovered on the Earl of Ere's estate, within two miles of Lanaskea.

Some of the doctors in the Tower Hamlets have resolved upon a public subscription, in order to purchase a freehold house in that borough to present to Mr. T. Compton, as a testimony of respect for his late parliamentary services.

Last week we noticed the occurrence of a fire at the railway storehouse, Ashford. The amount of damage sustained on the occasion was not so great as was at first supposed, not exceeding one-fourth its extent. The varnish, deals, boxes, glass, cloth, &c., departments were not destroyed, and only about a third of the property contained therein was consumed.

Mr. H. Snowden, the well-known proprietor of the dining-rooms in Maiden-lane, committed suicide on Wednesday morning by cutting his throat most into the cistern of his house which contained only about three feet of water. He was previously apparently in his usual excellent state of health and spirits.

The *Official Savoy Gazette* states that the cure of the grape blight lately recommended, consisting of a deep incision to be made in the trunk of the vine close to the root, has been extensively tried, and everywhere with success.

Arrangements have been fully consummated by which a line of ocean steamers is to be established between Canada and Liverpool, in connexion with the Portland and Montreal Railroad, commencing in the autumn of 1853, in season for the fall and winter business.

A young lady, Miss Fanny Wilson, of Newry, Ireland, lost her life a few days ago, in consequence of her clothes having caught fire while she was making arrangements for tea.

CHESS.

TO CORRESPONDENTS.

SOLUTIONS of PROBLEM No 443, by Nebob, M E N, Beppo, P D, Fiddy, Kitty Dunlop, are correct.

TUSCAN The work in question was printed and published at Rome in 1815. It is intituled "Les Principales Ouvertures du Jeu des Echecs, dans les quel Manières Italienne et Française, par Semphin Indiste de Rome."

J M, Perth Salle, N S.—In list of the Edinburgh Chess Club already numbering above six hundred members, is now published, and may be had on application to the Hon Secretary, Dr Rob Evans.

A H.—Weeks ago you are right, but the author's copy has been destroyed, and we have no ready means of ascertaining positively

A MEMBER OF THE CAMBRIDGE CHESS CLUB.—If we meet with any analysis of the variation in question you shall hear of it

AN AMATEUR OF JUDY.—They shall be examined and reported on next week. We have not sent the Score as at hand

NORTHUMBRIENSIS.—The best move in the first instance, we think, is—7. P to Q 4th; and in the second, 26. B to K 2d.

LEX.—Perhaps so; lately, Mr Staunton having the assistance of Mr Petroff and Major Jaenisch; but the thing is positively settled yet

ARDENS.—The articles by the great Russian players was too lengthy for our columns but it will be found complete in the May and June Numbers of the *Chess-players' Chronicle*

* * Any young provincial Chess Club desirous of engaging in a Match by Correspondence is requested to communicate with the Secretary of the Greenwich Literary Institution

SOLUTION OF PROBLEM No. 443.

17. Q takes Q	P takes Q	50. R takes R (ch)	K takes R
18. B to K 3d	R to Q B 3d	51. R takes Q P	B to Q R 3d
19. K R to Q B sq	K to B 2d	52. P to K R 4th	B to Q B sq
20. K R to Q B 7th	P to Q Kt 4th	53. P to K R 5th	P takes P
21. K to Q B 5th	P to Q Kt 5th	54. P takes P	B to K 3d
22. K R to Q B 4th	P to Q Kt 6th	55. R to K 4th	B to K Kt 5th
(d)		56. P to K R 6th	P to K 8th
23. P to Q R 4th	P to Q 4th		(Queens) (ch)
24. K R to Q Kt 4th	K R to Q sq	57. K takes Q	R to K R 7th
25. B to Q Kt 6th	K R to Q 3d	58. R to K 7th (ch)	K to Q B 3d
26. P to Q R 5th	B to K 2d	59. R to K Kt 7th	R to K B 4th
27. Q R to Q sq	Q R to Q R sq	60. R to K Kt 8th	B to Q 6th
28. Q R to Q 4th	Q R to Q B sq	61. B to K B 8th	B to Q R 3d
29. K R takes Q Kt P	Q R to Q B 7th	62. P to K B 5th	K to Q 4th
30. P to K 3d	A to K R 4th	63. P to K B 6th (dis ch)	K to his 3d
31. K R to K Kt 3d	P to K R 5th		
32. K R to K Kt 5th	P to K Kt 3d	64. B to K Kt 7th	B to Q B 5th
33. R to K 8th	Q R to Q B 7th *(e)*	65. R to Q B 7th	B to Q 6 h
34. Q R to Q sq	K R to Q B 3d	66. R to Q B 6th (ch)	
35. K R to K Kt 8th	K R to Q B 6th *(f)*	And Black gave up the contest.	

(a) An unusual move, and one not to be commended; as it gives the adversary's men far too much command of the board

b K to K B 3d would have been still worse

(c) The attack is formidable, but Black proves himself equal to the emergency, and continues to come out of the struggle at this point without any very serious disadvantage

(*d*) R to K B 3th (ch) and then R to Q Kt 5th, at the proper moment, would perhaps have been better

(e) With the object of playing the other Rook to the Q B 7th presently and thus getting an attack upon the K Kt Pawn

f We believe that our readers Black's can emplated play of K R to Q B 7th quite useless; his ingenious moves in a K loss in the hope of planting it at K Kt 6th

g The judgment and precision of Mr Petroff a play from this moment render the whole ending an excellent study for the young amateur

CHESS ENIGMAS.

NATIONAL SPORTS.

The racing engagements for the coming week stand as follows:—Monday, Wolverhampton: Tuesday, Yarmouth; Wednesday, Tunbridge and Reading; Thursday, Coventry and Lynn.

AQUATIC FIXTURES.—Monday: Shadwell, Hatchman New Town (tuesday Canal), Purfleet, Torbay, North Shields, Goole, and Manchester and Salford Regattas. Tuesday: Prince of Wales's Yacht Club Match, Champion Sculls, the Tower, and Tolgumouth Regattas. Wednesday: Regetta at Budleigh Salterton. Thursday: Dawlish (Devon) and Royal Southern Yacht Club Regattas. Friday: Exmouth. Saturday: Barnes Regatta.

CRICKET REGISTER.—Monday: Matches at Ashfold, Sussex, Beverley (All England), Appleshaw, and Bradford; Tuesday, at Southwell; Wednesday, at Taunton; Thursday (All England), at Northampton, at the Vine (Sevenoaks), and Appleshaw; and Friday, at the Vine.

TATTERSALL'S.

MONDAY.—So much time was taken up in settling the Goodwood account that we can only furnish a short nominal quotation:—

BRIGHTON STAKES.

5 to 1 agst Ivelin	6 to 1 agst Hesse Homburg	8 to 1 agst Phlegethon
5 to 1 —— Phlegra	7 to 1 —— Harpsichord	8 to 1 —— Rampion

ST LEGER.

3 to 1 agst Songstress	4 to 1 agst Sir Roswell (t)	20 to 1 agst Herbinger

BRIGHTON RACES.—Wednesday.

The fine weather attracted a large and fashionable attendance to the Grand Stand, which has been greatly improved by the addition of a commodious suite of rooms for the transaction of the business of the course. The late hour, however, at which the races commenced—a quarter before three—was very generally disapproved, and the half-hour intervals caused the sports to be protracted until nearly seven o'clock.

The following is a return of the day's racing:—

The TRIAL STAKES.—Little Savage (Flatman), 1. Knight of the Thistle (Charlton), 2.

The BRIGHTON STAKES.—Hesse Homburg (Pettit), 1. Smarty (T. Sherwood), 2. Phlegra (J. Mann), 3. Stamford (Aldcroft), 4.

The TOWN PLATE.—Margaret of Anjou (Steggles), 1. The Moor (S. Rogers), 2.

The PAVILION PLATE.—Timid Fawn (Charlton), 1. Young England (Denman), 2.

The BRIGHTON NURSERY STAKES.—Kenvery (Aldcroft), 1. Miss Emma (J. Goater), 2.

The INNKEEPER'S PLATE.—Cotton Lady (Rickards), 1. Plumstead (Barker), 2.

THURSDAY.

The TWO-YEAR-OLD STAKES.—Ratsplan, 1. Cotherstone colt, 2.

The BRIGHTON CUP.—Sharatogue, 1. Fan, 2.

The MARINE PLATE. Timid Fawn, 1. Kilmeney, 2.

The DIENNIAL STAKES.—Catherine Hayes walked over.

AQUATICS.

DOGGETT'S COAT AND BADGE.—This most popular and old-established wager was contested for on Monday, on the Thames. In addition, the Fishmongers' Company have liberally granted various money prizes, as an extra incentive to exertion. The following contended:—Charles Constable, Lambeth, 1. Thomas Kent, Rotherhithe, 2. Benjamin Coslade, Paul's-wharf, 3. Joseph John Rook, Battersea, 4. Joshua J. Fifield, Rotherhithe, 5. Matthew W. Field, Limehouse, 6. The first man received the livery and badge, bequeathed by Thomas Doggett, "a famous comedian," in commemoration of the happy accession of the family of her present Majesty to the throne of Great Britain, and a guinea given by the Fishmongers' Company; the second and third, £4 10s. and £2 14s 2d., the gift of the late Sir W. Joliffe, arising from the interest of £212, South Sea Stock; and the fourth man a guinea and a half, and the fifth and sixth a guinea each (if they rowed the distance), from the Fishmongers' Company. The distance, as it is well known, was from the Swan at London-bridge to the Swan at Chelsea. After a well-contested race, the boats came in in the order as above stated. The men were afterwards substantially regaled by the Fishmongers' Company, at the Old Swan at Chelsea.

ST. GEORGE'S, HANOVER-SQUARE, AND ST. PETER'S, PIMLICO, REGATTA.—A very respectably conducted race, worthy of support, took place on Monday, for a purse of sovereigns, subscribed by the ladies and gentlemen of the above parishes. Grand Heat: Edwin Gale, 1. John Wing, 2. Sullivan, 3. Burton, 4. ST. MARGARET'S AND ST. JOHN'S, WESTMINSTER, REGATTA.—The watermen and lightermen in these parishes afforded considerable gratification to a vast number of spectators in their contest on Monday. Grand Heat: J. Goatley and W. Ellise, 1. Hunt and Hubert, 2.

BLACKWALL REGATTA. This annual aquatic sport took place on Monday, and would have drawn a vast assemblage of both sexes, who crowded the shore the whole distance to which the race extended. The boats existed from the Folly House to the East India Dock Buoy, twice round. The Final and Grand Heat: C. Gay (dark blue), 1. C. Atkins (yellow), 0. The winner, J. Cory, is thereby entitled to a new boat.

FULKESTONE REGATTA.—The annual regatta was fixed for Thursday; but, in consequence of the boisterous state of the weather, all the matches were postponed, except the first sailing match. Considerable interest was excited by the exhibition of Mr. Lacon's boat-lowering apparatus, which was fitted to one of the splendid steam-ships of the South-Eastern and Continental Steampacket Company. A boat was lowered by one man three times, with Mr. Lacon and three other men in her, while going at the rate of 12½ knots per hour, and the experiment was repeated several times during the course of the day, with perfect success. An Engraving of Mr. Lacon's apparatus appeared in No. 551 of the ILLUSTRATED LONDON NEWS.

A few days ago Mr. Jonathan Steele, of Hawkshead, while fishing in Esthwaite Lake, in Westmoreland, caught in his landing-net a pike, which measured nearly two feet long. He kept it alive for some time, and then destroyed it.

THE KILKENNY ELECTION.

GEORGE ALEXANDER STEVENS once declared an English election to be "madman's holiday." However significant this comparison may have been of the extravagance of our elections in times past, it but ill characterises the savage and revengeful spirit in which the elections have just been conducted in Ireland. Kilkenny has been one of the hotbeds; and each succeeding account has added to the list of enormities committed in the exercise of what each party perversely terms freedom of opinion. Obstruction of voters, fore-by carrying them away, and in some cases imprisonment, are recorded; and fierce intimidation rendered the polling-place perilous to approach.

The *Kilkenny Moderator* states that, on the evening before the polling commenced, almost all the cars sent out to bring in Lord James Butler's voters had been attacked in the roads by mobs who broke the vehicles, slipped and disfigured the horses, and drove the drivers back. At Castle-Comer, Bridge the voters flung the cars into the river. A large proportion of the missing electors had been turned off from their own houses during the night by regularly-organised and armed bodies of men, each having its own district marked out for operations; the others were met at short distances from the town by similar parties stationed on all the roads, and forced, in terror of their lives, either to return home or to join the captors and poll for Greene and Shee. Several fights were made to obtain possession, but in few cases did they succeed, the force of the enemy being far too strong for them. Yet, in the face of these records of violence, the electors of Kilkenny have been complimented on their *orderly and peaceable conduct* during the recent election!

The scene which the Artist has pictured upon the next page is, however, in a far better vein. Here the county electors are returning victorious; the street is hung with banners of defiance, branches of trees in triumph; the shouting was tremendous, as the mounted electors poured along the road in anything but processional order and dignity; but their enthusiasm is in a far happier spirit than that which marked the previous days of "freedom of election."

SUSSEX ARCHÆOLOGICAL SOCIETY.

NOTHING could be more appropriate than the choice of Battle Abbey as the meeting-place of the Sussex Archæological Society, which assembled within its venerable walls on the 23d ult. About one o'clock, the visitors, about 600 in number, had themselves safely installed within the great hall to hear the various "papers" read. The Earl of Waldegrave presided at the table placed across the dais, taking his seat in the state chair. At either end of the table were Lady Webster and the Countess of Chichester; the Countess of Waldegrave, Lady Sophia Pelham, and other guests of distinction being also present:

Amongst other matters of curiosity exhibited was a portfolio of drawings, contributed by W. H. Brooke, Esq., F.S.A., containing sketches of Fr. 30 Battle Abbey discovered on cleaning the walls of Battle Church; 6 sketches, interior of the church and mural paintings; 4 sketches, remains of Roman Villa, discovered at Eastbourne, Sussex; large view of Roman Villa, at Hartlip, Kent; large view of Roman Castrum at Lympne, Kent; 6 sketches of Shelbred Priory, and Fresco Painting; 7 sketches of Winton Hall and ancient remains at Steyning; 6 sketches, remains of Cowdray House, Sussex; 6 sketches of Herstmonceux Castle, Sussex. There was also a number of autograph letters from the collection of P. O Callaghan, Esq., St. Leonards-on-Sea.

Lord Waldegrave having opened the meeting, the business of the day was commenced by Mr. Blaauw, who proposed a considerable number of new members, who were unanimously elected.

At the close of the reading of the several papers (illustrative of Battle, and other interesting portions of Sussex), Mr. M. A. Lower kindly acted as cicerone to go through the grounds, explaining the architectural features of various por

MEETING OF THE SUSSEX ARCHÆOLOGICAL SOCIETY, IN THE HALL OF BATTLE ABBEY.

tions of the abbey. The first visit paid was to the cloisters, where Mr. Lower pointed out the various works referred to in his interesting and ably-written "Chronicles of Battle Abbey," as having been executed by Abbot Walter, in 1171. The party thence proceeded to the refectory, a structure in the early English style. After explaining the features of this fine building, and pointing out the peculiarity of "the reader's staircase" on the eastern side, Mr. Lower led his followers to the beautiful and spacious crypts beneath. Pending the examination of the crypts, a discussion ensued between several of the persons present as to the origin of these chambers; which ended in Mr. Lower's deducing from their occurrence in the earliest churches that they had some reference to the catacombs under the city of Rome. The party then bent their steps to the long range of vaults of Norman date under the terrace, supposed to have been used as vaults for the stowage of wine, &c. These vaults terminate in two slender and elegant towers, situated at the western end of the terrace. These towers are the only fragments remaining of a building commenced in the time of Henry VIII. for the reception of the Princess, subsequently Queen Elizabeth, by Sir Anthony Browne, who had been appointed one of her guardians. Death, however, cut off Sir Anthony before the completion of the suite of apartments destined for her use, and Elizabeth never became a guest of Battle Abbey. Emerging from these vaults by a long and dark passage, the party of explorers next visited the site of the Abbey Church and of the high altar, the spot where Harold's body is stated to have been found. It was here remarked by a gentleman, that however true might be Mr. Hunter's theory of the comparatively unreliable character of tradition, still it was to tradition that we were indebted for the discovery of the spot where Harold fell. Proceeding through the private side-door of the outer wall, the party then visited Battle Church, where Mr. Lower directed their especial attention to the monument of Sir Anthony Browne, and of his lady, daughter of Sir John Gage, an ancestor of the present owner of Firle-place. Mr. Lower pointed out the various brasses, monuments, and other objects of architectural interest, presented by this ancient church. Proceeding thence through the street, the party approached the splendid Great Gateway, which, Mr. Lower said, was recorded as having been built by Abbot Ketling, in the time of Edward III., though some portions of the wings were of Norman date. The left wing, Lady Webster explained, was formerly used as a town hall; but this practice was discontinued on the ground of the supposed insecurity of the building; and, in 1793, it fell down twenty-four hours after a crowded meeting had been held in it. Upon re-entering the abbey walls, the party received a large accession of numbers, and the attention of these present was directed to the examination of several interesting antiquities exhibited by Robert Mercer, Esq. Amongst them was a flint celt found on that gentleman's estate at Brede, and a particularly fine medal of Gustavus Adolphus. The visitors then proceeded to the gardens.

While Mr Lower and his band of listeners had been going their interesting round, various parties had been examining the grounds, inspecting the refectory, and availing themselves of the "free warren" so unstintedly accorded by the noble owner of the abbey, to visit the different apartments. The saloon, an elegant and charming room, constructed (apparently) out of one of the cloisters, attracted especial attention.

At four o'clock, dinner was served in the ancient Refectory fitted up for the occasion. The abbey bell rang out its summons, and the guests poured in from every part of the garden and grounds. Upwards of 400 guests sat down to table.

NEW CHURCH AT BOTTISHAM LODE.

The parish of Bottisham, in the county of Cambridge, is one of considerable extent; and one part of it, rather thickly inhabited, is at so great a distance from the parish church, that practically it may be said to be destitute of that spiritual ministration to which every Englishman has a claim from the religious establishment of the country. Out of a population of 1549, the hamlets of Bottisham Lode, Lang Meadow, and the neighbouring fen, contribute no less than 771, that is, almost one-half; and none of these are nearer their parish church than mile and a half, while some of them are distant four miles from it.

The Vicar of Bottisham, the Rev. Mr. Hailstone, has long sought to remedy this defect, and on the 28th ult. he had the satisfaction of laying the foundation-stone of the new church of St. James, at Bottisham Lode. It will be a neat, small building, the cost of which is estimated at £1400. The architect is Mr. Hawkins, of London. The Master and Fellows of Trinity College, who are patrons of the living of Bottisham, give the site (one acre), the farmers of the parish give the carriage of the materials, more than £100 value; and upwards of £900 has been raised by subscription, of which the Vicar munificently gives £500, the Church Building Society £300; E. Hailstone, Esq., the Vicar's brother, £50; George Jenyns, Esq., £30; and the Archbishop of York (late Vicar) and the High Sheriff (W. P. Hamond, Esq.), each £25. Then there is the Endowment Fund, which must be within 1000 pertions to consecration; to this the Vicar and his brother give sums equal to those contributed by them to the building-fund, and Trinity College adds £250, the Master of Trinity making also a private donation of £20.

The ceremony of laying the foundation-stone was attended by a large concourse of people from the surrounding villages; by the clergy of the district, the High Sheriff, Mr. R. G. Townley, &c. A hymn was sung, the Vicar read the 132nd Psalm, the stone was laid by the High Sheriff, the Vicar then offered up suitable prayers, another hymn was sung, and the blessing closed the ceremony.

The company then withdrew to Anglesea Abbey, which has recently been partially restored by Mr. Hailstone; and in the grounds a rural fête was given to the children of the parish, who were plentifully regaled with tea and plum cake.

At six o'clock upwards of 100 ladies and gentlemen partook of the splendid hospitality of the Vicar, in the Abbey hall, which was decorated with evergreens and floral devices. The tradesmen and labourers connected with the Church had their dinner of beef on the ground, at the Lode.

Several appropriate toasts were drunk, and Mr. Witt, of Swaffham Prior, handed to the Vicar a cheque and cash amounting to £24, as the result of a little subscription which he had set on foot amongst the strangers present.

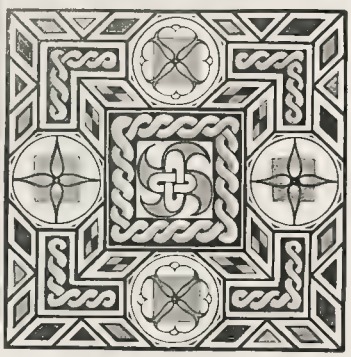
After the company had separated, the Vicar retained his seat for awhile, to

NEW CHURCH AT BOTTISHAM LODE, CAMBRIDGE.

entertain the cricksters, the musicians, and many others, with the good things which still remained on the table.

EXHIBITION OF THE ROMAN PAVEMENT, AT WOODCHESTER.

The celebrated Roman Pavement discovered towards the close of the last century, at Woodchester, near Strond, in Gloucestershire, has just been opened, and exhibited for the benefit of a local charity, at the suggestion of the Rev. John Williams, rector of Woodchester. The pavement is partly in the churchyard, and partly in the adjoining orchard. After being partially uncovered for many years, in 1793 the Rev. Mr. Lysons ascertained by various openings which he caused to be made in the ground to the depth of about four feet its complete design, form, and dimensions. It appears to have been a square of 48 feet 10 inches. Its general design is a circular area of 25 feet diameter, inclosed with a square frame of 24 compartments, enriched with



SQUARE OF THE ROMAN PAVEMENT, WOODCHESTER.

a great variety of guilloches, scrolls, frets, and other antique architectural ornaments, edged on the inside by a braided guilloche, and on the outside by a labyrinth fret. The large circular area is enclosed by a highly-ornamented border, and immediately within this are representations of various beasts, originally twelve in number; in an inner circle are figures of birds, and within this circle is an octagonal compartment with representations of fish; no part of the central octagon is at present in existence, and some of the figures of the animals and birds are also mutilated and destroyed. Our Artist has engraved one of the many squares into which the pavement is divided. The Rev. Mr. Lysons considered this pavement to be unquestionably superior to anything of the same kind hitherto found in Britain.

THE KILKENNY ELECTION.—CHAIRING OF THE RETURNED MEMBERS.—(SEE PRECEDING PAGE.)

GRAND PROCESSION OF THE GORBALS TEMPERANCE SOCIETY, AT DUMFRIES.

TEMPERANCE GRAND EXCURSION.

The Gorbals Temperance Society have recently given their members and friends an excursion, which for economy and enjoyment, we think, scarcely has a parallel in the record of such festivals. The treat consisted of a journey on the 19th ult., from Glasgow to Dumfries and back, a distance of 184 miles, at the unprecedentedly low fare of 2s. 6d. each. The party, which consisted of about 900 individuals, left Glasgow by the South-Western Railway at a quarter to nine o'clock: there were additions made to the number at Paisley, Kilmarnock, and Sanquhar; and the train reached Dumfries at about one o'clock. Here great preparations had been made by the Dumfriesians, and the teetotallers of the south to give them a hearty and enthusiastic reception. The whole town turned out to meet them, while several hundreds of teetotallers from Sanquhar, Kilwinning, Lockerby, &c., were in waiting with temperance banners flying, and bands of music playing. On the platform of the Dumfries station, Mr. Livingstone and the directors of the trip were kindly greeted by a deputation from the committee of the Dumfries Total Abstinence Society, headed by the Rev. Mr. Gould, vice-president of the society; the Rev. Mr. Clark, the Rev. Mr. Scott, the Rev. Mr. Fullar, Messrs. Sharp, Milligan, &c.

The whole party having been marshalled within the station gates, marched out with their banners flying, and preceded by the Gorbals Society's fine band, amid the cheers of the assembled multitude. The Sanquhar, Kilwinning, and other parties, followed the Glasgow detachment; while the entire procession was preceded by the above-named clergymen, Messrs. Livingstone, Sharp, Milligan, and the committees of the various societies represented. The town bells rung out a merry peal in honour of the visit, and the bands played martial airs. By previous arrangements preparation had been made at the town's academy for the reception of the party, and refreshments were spread out for them in the various class rooms of that large institution. Here the company assembled on the lawn, whence they marched in order into the apartments, where they partook of sandwiches, tarts, and clear cold water. In each of the various class rooms one of the clergymen presided, and said grace. The multitude having been refreshed, again formed in procession to see the objects of public interest in Dumfries, proceeding along the principal street, through the market-place, where the beautiful fountain placed there was in full play, to view the grave of Robert Burns. On entering the romantic graveyard, the bands ceased to play and the banners were furled, in respect to the resting-place of the silent dead. The company, on entering the gate, turned round the west gable of the church, along the walk and past the grave and mausoleum of the ploughman bard. The gates of the monument were kindly thrown open, and the interior, with its fine sculpture, inspected. The visitors then returned to the street, and proceeded to the docks, and along the verdant banks of the Nith, turning across the ancient bridge and on towards the observatory on the Maxwelton side of the river. After passing the observatory, the procession advanced to the top of Corbelly Hill, and enjoyed the picturesque view of the town, and the splendid panorama bounded by the mountain-ridges of Cumberland and Galloway, and the lofty Criffle, with its cloud-capped summits.

The visitors, having given three hearty cheers to the proprietor, for his permission to climb the hill, returned to the academy in the town amidst the loud cheers of the spectators. On their reaching it, Mr. Livingstone proposed a vote of thanks to the Provost and Magistrates for the arrangements they had made for the reception of their visitors, to the clergymen who had honoured them with their countenance and encouragement also to the committee of the Dumfries Temperance Society, and specially to Mr. Welsh, the secretary, for his indefatigable exertions in preparing for their reception. The vote was acknowledged by three hearty cheers, and the procession having re-formed, walked back through the town to the railway station, to the music of the steeple bells.

A carriage, with a printing-press upon it, gaily decorated with evergreens, followed the procession, and several pressmen were busily engaged throwing off a song of welcome to the total abstainers of the West of Scotland, on their visit to Dumfries; also "An Address by the Dumfries and Maxwelton Total Abstinence Society, on the Day of the Grand Temperance Demonstration, held on the 19th July, 1852."

The excursionists, after a pleasant journey, reached Glasgow safely about half-past nine o'clock.

In the evening a monster open air meeting was held, when the Rev. Mr. Gould presided; and the assembly was addressed on the subject of Temperance, by Messrs. Ferguson and Adamson, of that city.

THE ROYAL FREEMASON'S SCHOOL FOR FEMALE CHILDREN, WANDSWORTH COMMON, OPENED ON MONDAY LAST —(SEE NEXT PAGE)

THE ROYAL FREEMASONS' SCHOOL FOR FEMALE CHILDREN.

It is worthy of remark that, as the buildings for the charitable institutions of the metropolis become too small for the benevolent objects for which they were erected, they are almost invariably rebuilt in the environs: thus insuring to the inmates health and comfort which the increase of the great town, in many instances, renders very problematical. On Monday was inaugurated a very interesting specimen of this removal -in the Freemasons' School for Female Children, just completed upon Wandsworth Common, contiguous to the Clapham Railway station. The new building is in the Elizabethan style of architecture, and has a lofty central tower, surmounted by a low spire, at the angles of which are pinnacled turrets. This portion of the design is very full massive and harmonises with the gables and dormer windows of the main building. Mr. P Hardwick is the architect. The materials are red and grey bricks; and the work have been well executed by Messrs Piper, the contractors.

Previous to the ceremony of dedication, the girls from this institution, and the boys, supported by the craft, attended divine service at St Ann's Church, Wandsworth, where an eloquent sermon was preached by the Rev. J. W. Stadhil, and produced an excellent collection at the doors The grand lodge was next opened in due form by the Right Hon. the Earl of Zetland, M.W.G.M.; then the children, followed by the Masters, Past Masters, &c., arrayed in full masonic costume, with the military bands, walked in procession to the spot appointed for the dedication.

Mr. P. Hardwick, the architect; B. B. Cabbell, Esq., M.P., the treasurer; Mr. Bendon, the magistrate; and Mr. F. Crew, the secretary, delivered appropriate addresses, explanatory of the cause of erecting the new building in lieu of that so long known in the Westminster-road.

A poetical address, written by Mrs. S. C. Hall, was very effectively recited by one of the girls belonging to the school; which was followed by an anthem, sung by Misses F. Smith, Gener, Perrin, Jay, as also Mrs. A. Newton, and the Misses Wall's. At interva's, the 1st Life Guards and Coldstream bands, and Adams's band were called into requisition.

The ceremony of dedication was preceded by a *déjûner*, served by Messrs. Watson, Coggin, and Banks, of the Freemasons' Tavern, of which about 1200 ladies and gentlemen partook, beneath a marquee ant smaller tents

The Earl of Zetland, M.W.G.M., presided, supported by the Earl of Yarborough, D G M, Lord D. Stuart, B. B. Cabbell, Esq , &c.

In the course of the day several considerable subscriptions were announced, amongst which were 300 guineas, presented by Mr. Bellamy, one of five guineas each, and which renders them life governors of the institution.

COUNTRY NEWS.

THE CAMBRIAN ARCHÆOLOGICAL ASSOCIATION held their sixth annual meeting at Ludlow, on Monday, August 23d, and the following days; the Hon. R. H. Clive, M.P., president. The town and neighbourhood abound with objects of interest to the antiquarian. It is scarcely necessary to mention the castle, the church, and the remains (small indeed) of the old monastic building adjoining it, called the college. In the town are several curious old houses, the Feathers Inn, and the almshouses in Old-street. Close adjoining is Ludford, where James II. was received on his flight to France; and not far distant is Whitton, another old seat of the Charltons, one of the rooms of which is still hung with ancient tapestry. Near to Whitton is Cainham Camp, probably Roman. On the other side of Ludlow is the gate and remains of the Priory of Bromfield, and farther on is Stoke Castle, with its great hall in good preservation. On the Welsh side is the modern building of Downton Castle, with a fine collection of pictures, made by that learned and distinguished man, Mr. Payne Knight; beyond is Wigmore Castle; and at the Grange, the great barn of the Abbey of Wigmore. In the church at Leintwardine, the *rredds* is of the finest work, though small and simple. Besides these are Brandon Camp, remains of Hopton Castle, and Offa's Dyke, and many other matters of archæological interest.

THE GREAT YORKSHIRE AGRICULTURAL SHOW.—The fourteenth annual show of the Great Yorkshire Agricultural Society commenced its manifold proceedings at Sheffield on Monday. The centre of the society's operations is a grass field, situated about a mile from the centre of the town, known as the Boyd's cricket ground. The entries exceed those both of the Thirsk and Bridlington meetings, the excess over the latter being of nearly 100 entries. Among the sub's exhibitors, and the names thereof, are the Duke of Devonshire, Earl Fitzwilliam, Lord Feversham, and Lord Wenlock. There are about 60 exhibitors of implements, and 400 entries in this department. There is a large entry of stock, the number being pretty nearly 600. The trial of the implements began on Monday night. The entries for the operations of the ground implements was two adjacent fields situated at Attercliffe, on the margin of the Sheffield and Rotherham Railway. The trial of the other implements, including threshing machines, brickmaking machine, &c., are conducted in the show yard. The machines were three in number; namely M'Cormick's, manufactured by Burgess and Key (price £185); Hussey's, manufactured by Crosskill (price £21); and Hussey's, manufactured by Wood and Co. (price £18). The machine that first concluded its performance was M'Cormick's, having worked about an hour and a half. Crosskill's machine finished some twenty minutes after M'Cormick's. The other machine (Wood and Co.'s) remains, sustained a fracture, which for some time disabled it. The trial of ploughs, it is stated, was not of a quality suggestive of very superior implements. The trial of reaping machines and other implements was to take place on Tuesday, in the presence of a large number of spectators, and excited much interest.

THE WINDSOR ROYAL SOCIETY.—This society, which was established some months ago, under the immediate patronage of her Majesty the Queen and his Royal Highness the Prince Consort, for the purpose of promoting the improvement of the dwellings of the industrial classes in Windsor, has commenced active operations. Freehold ground, midway between the Long-walk and the Cavalry Barracks, containing nearly an acre and a half, has been purchased of the Commissioners of Woods and Forests for £237 19s. 3d., including expenses, and has been laid out in section of four houses, each opposite one another, to accommodate, together, about forty families, each having small gardens.

COLLISION ON THE CLYDE.—On Friday week, as the *Princess Alice*, Londesberry steamer, was passing up the Clyde, a little below Govan, she touched the ground by the stern—the tide being low at the time—which caused the vessel's bow to swing round in the channel. At this moment the *Glasgow Saltern*, river steamer, came down at a high rate of speed, intending to pass the steamer on the north side; but having so much way on, and the engine not having been reversed—even when a collision must have been evident—she ran into the *Princess*. By the force of the collision the *Clarce* was cut down to the water's edge, the *Princess* sustaining no damage beyond a slight scratch. We regret to add that a woman and child, who had leaped from the deck of the steamer *Clarence* immediately after the accident, were drowned. Their bodies have since been recovered The name of the unfortunate woman was M'Kinlay, the wife of a pilot. That of the child is not stated.

FATAL ACCIDENT IN THE BRISTOL CHANNEL.—On Sunday afternoon four young men were drowned in the Bristol Channel, in consequence of the upsetting of a small boat while returning from Weston-super-Mare to Clevedon, from which place they had gone for a pleasure excursion. The boat was but known until the body of one of the young men and a portion of the boat's gear were washed ashore.

FATAL RAILWAY ACCIDENT.—On Tuesday morning, as the up-train, which left Birmingham at a quarter past nine o'clock, had approached near the Hampton Junction station, upon the London and North-Western Railway, the ash-pan and a portion of the fire-box fell from the engine on to the line, and, coming in contact with the front axle of the break-van, it separated the latter from the engine and tender, and threw it off the up-line across the down-rails. At the same instant the 9 15 A.M. down-train from Leamington to Birmingham met the upset van, and the engine and tender were thrown off. Mr. Boddington, an optician, of Birmingham, and a youth named Floyd, said to be on his way to college at Oxford, who were in the second-class carriage, were killed on the spot, and a third was very seriously injured. Several others were more or less shaken and hurt.

THE LATE FATAL ACCIDENT ON THE SOUTH-EASTERN RAILWAY.—On Saturday evening last an inquest was held in Canterbury, on the body of Samuel George Daniels, of Bethnal-green, who was killed at the Ashford station of the south-Eastern Railway, while travelling in a third class carriage. The deceased was on his journey to Ramsgate, to join his wife, who is near her confinement, and has already eight children to mourn so melancholy an event. The company were represented by their solicitor (Mr. Church) and Captain Barlow. From the evidence adduced it appears that the deceased and his death by incautiously protruding his head out of the window of the carriage when passing the Ashford Station, whereby he came in contact with an iron pillar, which was only a distance of 9 inches from the carriage as it passed it, further appeared that this accident could not occur in the first and second class carriages, inasmuch as the windows are barred; but the third class carriages were left without this protection. The jury was then cleared, and in a short time the jury found a verdict of "Accidental Death," and accompanied their finding with the following:—"And we cannot separate without expressing our surprise and regret that so little care and attention are paid to the safety of persons travelling in the South-Eastern Railway Company's third-class carriages." Mr. Church stated that the company intended to place bars in all the third-class carriages.

MATRICIDE.—A poor widow, named Elizabeth Thomas, who had resided in a cottage at Prenten, near Birkenhead, with her three sons, was murdered last Saturday night, by her son, William Thomas, aged 23, as it is supposed, in a fit of insanity. He cut her throat with a razor while she was fast asleep in bed. The deceased was an industrious, steady woman, and since the death of her husband, nearly nine years ago, had laboured hard for herself and family as a charwoman. The body of the victim was found buried in the garden, about two feet from the surface. She was dressed in her night clothes only, and her winding-sheet was an old blanket, tied tightly round her body with a thin cord. The accused was at once removed to the Birkenhead in Birkenhead. On Monday an inquiry into the sad affair took place before the magistrates, at the Town-hall, Birkenhead, during which the prisoner exhibited not the slightest interest or feeling, but appeared perfectly stupified for trial at the an utter indifference to what was going on. He was committed for next Cheshire assizes, which will commence on Monday next. It appears that he was the favourite child, and that there was a peculiar affection always manifested by him towards his mother.

A FATHER STABBED BY HIS SON.—On Sunday evening last, during the time of divine service, George Marsh, a lad about 18 or 14 years of age, son of Henry Marsh, of Berkhamstead, shoemaker, after having some angry words with his father relative to buying him a blouse jacket, and which the father not just agreeing to do, the lad (who had a clasp-knife in his hand) immed iately inflicted a severe wound by stabbing him in the fleshy part of the thigh. A medical gentleman was called out of the church and dressed the wound, and we have since heard that it is not of a dangerous nature.

THE LATE GAOLOTTE ROBBERIES.—On Wednesday the seven men in custody, charged with assaulting and robbing two persons at the west end of Leeds, on the night of the 24th ult., were finally brought before the magistrates, and all of them committed for trial at the next assizes for wester part delivery at York. Bail was applied for on behalf of two of the prisoners, but peremptorily refused. Coleman, who was "garotted" with a degree of severity which had almost proved fatal to the unfortunate gentleman, is very ill from the effects of the infamous outrage perpetrated upon him. The eighth person implicated in these outrages, although known to the police, still evades apprehension.

THE RECENT RIOTS AT STOCKPORT.—On Monday the inquiry before the magistrates at Stockport terminated. Seven journeymen printers were formally committed for trial on the charge of having participated in the riot and destruction of property at the Edgeley Chapel, and at the residence of the Rev. Mr. Frith.

FATAL FROLIC.—On Tuesday an inquest was held at the Westgate police-station, Newcastle-on-Tyne, before Mr. J. G. Stoker, coroner, on Barney M'Guigkan, aged 19, a native of Newcastle-on-Tyne, who died on the 26th of July, from severe scalds upon his head, face, and other parts of his body The deceased and a man named John Williams, both trampers, having, about midnight on the 6 th of July, called at the premises of Messrs Bell, Brothers', iron works, at Wylam, about nine miles from Newcastle, with the view to find shelter for the night, they were permitted to remain there by an engineman, named Johnson, who supplied them with food. Soon after they retired to rest; but it was found that they should lay down in the morning to wheel out his ashes. They lay down about a yard and a half from one of the boilers and fell asleep. About four o'clock in the morning, it appears that Johnson, for the purpose of a frolic, and to give the men a start, took the plug out of the boiler, intending to replace it immediately, but not being able to do so, the place was soon full of steam, and the two poor men were dreadfully scalded. M'Guigkan lingered until the 26th ult., and died. William recovered slowly. The inquest was adjourned. There is, however, little doubt but that Johnson will be committed for trial.

COMMERCIAL DOCKS AT PORTSMOUTH.—At a meeting of the Portsmouth town council, on Monday, a letter was read from Mr. Hall—the project for the establishment of commercial docks at that port occupied much attention, reports of an important character on the facilities and necessity of such docks being read from Captain Washington, a distinguished officer of the Royal Navy, and Mr. Rennie, the eminent civil engineer. This project has obtained much importance from the fact of a steam navigation company of considerable respectability, who are on the point of starting a line of first-class screw and wheel steamers to Australia, in connexion with the Panama route, having selected Portsmouth as being the most fitting port for their purposes. The object immediately in view is to procure the Government to the use of a large enclosed piece of water known as the Millham, which communicates with the harbour, and is situated in the centre of the borough. Should the acquiescence of the Government be secured the capital required will be immediately forthcoming.

PUBLIC HEALTH IN MANCHESTER.—Heat, unripe fruit, and other causes of sickness and mortality peculiar to the season, are doing their work among the inhabi ants of Manchester. During the week ending Saturday the 24th ult., the deaths exceeded the births by 59, standing at 229 to 174, and we find enumerated among the deaths one case of English cholera after four days' illness, and not fewer than 63 cases of diarrhœa. There were also 10 fatal cases of fever, 2 of scarlatina, and 5 of measles.

There is growing in the garden of a person named Whatford, of Aunty Green, an enormous single stem of cabbage from one grain, which has thrown out the astonishing number of 118 off shoots, each bearing a good haw of grain, besides many minor sh ots that are smothered by the superabundance of the stronger ones It is calcu lated that there are at least from 4000 to 5000 ears ripening on this single stem.

The Prefect of the Doubs has followed the example of the Prefect of the Pas de Calais, and decided that any rural sellers of wines or spirits giving liquor to persons already drunk, or what ih.y had taken, shall be held responsible for the acts of such persons.

MONETARY TRANSACTIONS FOR THE WEEK.

(From our City Correspondent.)

Owing in some measure to the absence of many of the large jobbers, the Consol Ma ket has ruled very inactive during the whole of the week, and prices were fallen fully one half per cent. The principal cause for the check is fairly attributed to the continuous sales of money stock on the part of the public, and the heavy shipments of gold to Australia, which, within the last fortnight, have amounted to nearly £700,000. Fortunately, however, we see nothing in the latter feature at all calculated to excite the alarm or surprise. It is true that we shall have a diminished stock in the Bank of England, in consequence of these exports; but it is well known that the whole of the gold as yet received from the above colony is for the purpose of purchasing sovereigns, which are now finding their way out in due course, according to previous instructions. Had a step not been taken in this direction, such an immense sum would have been absolutely necessary; the heavy expenses entailed upon the gold-finders and others, in the shape of freight, insurance, and other charges, would have been saved.

On Monday the Three per Cents were 2 300 to 2 400 for the Account, 100¾. A slight decline took place on the following day, whilst on Wednesday the closing quotation was 100, for time. The business transacted on Thursday was very limited, and on Friday, as we go to press, the turn is unchanged, whilst several *Bear* operations were entered into, at the following prices:—Bank Stock, 221; Three per Cents Reduced, 100¾, ⅞, ⅝; Three per Cent Consols, 100¾; New Three per Cents, Quarter Days, 100⅝, 100⅞; India Stock, 258 to 260; Consols for Account, 100, 99¾, 100; Long Annuities were 6 15-16; India Stock, 253 to 256; India Bonds, under £1000, 24s. to 21s. Exchequer Bills, 72s. to 75s., and March, 71s. to 73s., and Exchequer Bonds, 100 per cent. Bills on London, 1¼ to ⅜ premium. The imports of bullion have been large, upwards of 3 300,000 dollars having arrived by the West India packet, and 300 000 dollars from New York, together with a few packets of gold from Spain and Hamburg. The rates of exchange upon which have a small margin of profit to the shippers.

It has been asserted in some quarters that the Chancellor of the Exchequer, in order to effect an equalisation of the income-tax, has resolved to propose an increase in the mileage-tax upon railways. We give the report without vouching for its accuracy; but it is evident that, in the event of a measure of the kind being carried into effect, a most serious blow will be given to the railway interest at large. Notwithstanding that money has been in great request, we have very little change to notice in the rates of discount.

The arrival of the Cambria from Halifax and Boston, and the receipt of upwards of 47,000 dollars for the dividends, have had very little effect upon Mexican Stock, in which large speculative sales have taken place. Most other foreign bonds have sold to a limited extent, but little variation in prices. On Thursday, Brazilian, Small, were 103¾; Ditto, New, 102⅝; Danish Five per Cents, 108; Mexican Three per Cents, 21¼; Russian Four-and-a-Half per Cents, 105½; Ditto, Five per Cents, 110; Spanish Three per Cents, 45½; Ditto, New Deferred, 22¾; Ditto, Passive, 5¾; Ditto, Coupons, 5⅝; Bargains have taken place in Dutch Four per Cents at 98¾; Portuguese Four per Cents, 36.

Bank Shares have been tolerably firm, yet, in some instances, prices have tended downwards. The following have marked 8½ ¾: British North American, 59 ex div.; Commercial of London, 30¾ ex div.; London Joint Stock, 19¾; London and Westminster, 35 to 32 ex div.; National Provincial of England, 49¾; Oriental Bank Corporation, 20¾; Provincial of Ireland, 4¼; Union, 42¾ ex div.; Union of Australia, 50 to 49¾ ex div.; Union West, 9⅜ ¼ ex div.; Union of London, 10⅝ ex div.

Dock Shares have been on the advance, St. Katharine Stock having realised 90 to 92, ex div.; London, 131, ex div.; and Southampton, 28¾.

SUNDAY AFTERNOON.—The amount of business doing in the Consol Market to-day has been comparatively small. Prices, however, are fairly supported. The three per Cents are 99⅞; the Three per Cents Reduced, 100⅛; and the New Three-and-a Quarter per Cents, 100⅛; Bank Stock, 233; Long Stock, 20⅝; Exchequer Bills (June), 73s to 75s pm. In Foreign Bonds and Railway Shares, very few transactions have taken place.

THE MARKETS.

CORN EXCHANGE (Friday).—The present week's arrival of English wheat, constwise, has been moderate, six 2810 quarters, mostly from Essex and Kent. A few parcels came fresh to hand, but the condition and samples, on the whole, remained much the same as last week. Owing to the changeable state of the weather, and the unfavourable accounts from various parts of England respecting the wheat crop, few days have passed without some extra demand was firm, and a clearance was effected to a much greater extent than before the close of last week. In some instances, without any alteration in the currencies quoted, the sales of other kinds was well supported. We were but moderately supplied with foreign wheat. The few parcels arrived for the week, very much out of condition, were taken off rapidly, at prices but little varying from those of Monday. Fine or good new qualities of malting barley were in limited supply, and commanded full prices. Grinding sorts, however, were in request, and a clearance was effected to a moderate extent. Malt, to the close of last week, was in good demand, and fully supported. The best parcels were taken off rapidly, at full prices. Fine pale malt moved off in retail, at very full prices and there was more inquiry for low and middling parcels of coarse and ordinary qualities. Beans and peas were in limited request, but prices were fully maintained. Flour was in fair demand, at a slow sale, scarcely any English barley was brought forward at the Corn Exchange, and the supplies from Essex were but moderate. Some improvement in the trade was in a sluggish state, at the late decline. Most the supplies of wheat was rather limited, and the trade ruled very inactive, at previously quoted prices. We had only a retail inquiry for oats, for which only the finest were wanted, at full prices. Beans and peas were supported. Beans, pea, and flour as last week.

ARRIVALS.—English: wheat, 2810 quarters; barley, 80; malt, 1210; oats, 670; flour, 1750 Irish: barley, 2080; oats, 2080; beans, 2080; peas, 2080; flour, 2080 sacks.

English.—Wheat, Essex and Kent, red, 38s to 41s; ditto, white, 38s to 43s; Sussex and Surrey, red, 37s to 39s; ditto, white, 40s to 43s; rye, 27s to 28s; grinding barley, 23s to 27s; distilling ditto, 28s to 30s; malting ditto, 30s to 34s; Peak, Derby, and Lincoln malt, 54s to 57s; Brown ditto, 46s to 47s; Kingston and Ware, 50s to 53s; Chevalier, 59s to 63s; Yorkshire and Scotch, 50s to 52s; Suffolk and Norfolk, 50s to 52s; Devon and Somerset, 50s to 52s; tick beans, 34s to 36s; old ditto, 36s to 38s; harrow ditto, 34s to 36s; grey peas, 34s to 36s; maple ditto, 36s to 38s; white ditto, 36s to 38s; boilers, 36s to 38s; Essex and Suffolk, 34s to 36s per quarter. PARIS FASHIONS FOR AUGUST.

PARIS FASHIONS FOR AUGUST.

The excessive heat has at length driven from Paris to Vichy, Baden, Dieppe, &c., the last persons whom the rains had caused to linger in the capital. The warmth has led to the adoption of styles of dress of extraordinary lightness. White, which was before somewhat in favour, is now greatly preferred to colours. Printed organdies, jaconets, nansouks, and muslins, are the only tissues which are appropriate wear. Barège and taffetas, of whatever colour, have been proscribed as too heavy. With very light stuffs no artificial flowers can be worn, however perfect they may be in style and finish. Only natural flowers are worn at present on the head, and those in bunches or wreaths, similar to those fashionable in the winter; but we recommend bunches or wreaths for the head, without pendants.

There is no change in the form of bonnets; those made tight, or closing in at the ears, and with spreading fronts, are still in high fashion, but are lighter. Tulle and gauze predominate; even straw is considered too heavy, and is no longer employed except for trimmings upon crape and tulle. The pokes of bonnets are overspread with very light flowers, which are placed between the plaits or puffings; or they are worn in bunches of flowers made of straw, or artificials, with small narrow ribbons of two-thirds of an inch width, and velvet ribbons still narrower. Very small roses china-asters, jessamine, any climbing shrubs and liserons, are the only small flowers which can be employed for this description of ornament. Similar flowers are used to trim the insides of the bonnets

Some modification is noticeable in the form of sleeves. Instead of the pagoda, wide and open, the sleeve is made tight to the wrist from the elbow, and closing on the side by a row of buttons. They resemble very much the sleeves which were called formerly *à l'Amadis*.

Mantelets of the Talma form are very much the fashion, in muslin embroidered by the hand. Strips or bands are embroidered, and placed in the form of *volants* all round, for morning dress. For the evening, a *mantelet* entirely of lace is very rich. *Mantelets* made in muslin are worn single or double; others, of a less rich description, are much ornamented with small tucks alone, forming plaits, which are placed above the *volants*. For the morning, dresses are made in muslin and jaconet, embroidered in the English style, and are worn with caps of the same. Sometimes thin tissues of printed colours on white ground are used, but the plain white is preferable.

THE ILLUSTRATIONS.

Head-dress, pink taffetas trimmed with black velvet and black lace; a band of black velvet round the neck closed by Louis XV. buckle diminishing a little towards the waist, the *volants* finishing at ten or twelve inches from the waist; the petticoat continues to the top; the head of each *volant* is ornamented with a letting-in, embroidered, which reaches to the next *volant*. Pardessus of muslin open in front, and closed by a *coque tuyottée*, finished at the bottom by two *volants*, which form, as it were, a continuation to those of the dress, which rise to the waist; they are both ornamented by the same embroidered letting-in as the dress. The sleeves are open, and formed like the lower part, with under-sleeves, plain or closed at the wrists.

A charming morning-dress for watering-places is thus formed: a dress of *barège*, of silk pattern, with three *volants* trimmed with a small quilling *à la vieille*, and open in front, displaying a lace-trimmed neckerchief (Mechlin lace), while two small *volants* finish the sleeves; the last surmounted by a quilling similar to that of the body of the dress.

The morning pardessus is also worn with a dress of percale, likewise embroidered; *volant* and sleeves in English embroidery; the front is trimmed in the same manner; the body is ornamented with a double plait in the stuff, and above the *volant*, and which replaces the braiding, generally placed on pardessus of tissue. Lastly, are

PARIS FASHIONS FOR AUGUST.

models of sleeves trimmed with lace, one with two open *volants*; the other closed at the wrist, and trimmed with a *manchette* of lace.

"KINGSTON," THE WINNER OF THE GOODWOOD CUP.

We engrave Mr. Morris's "Kingston," the winner of the Goodwood Cup, on Thursday week. The great improvement displayed by Kingston on his Epsom form occasioned considerable surprise. The care bestowed on his preparation was unmistakably manifested. His coat shone like highly-polished mahogany, and his eye sparkled with health and spirit. As he galloped past the stand he indeed appeared iron-jointed and supple-sinewed. The winning is thus described:—Kingston waited upon Teddington and Little Harry until they were within a dozen strides of the chair, when, with admirable tact, his powers were brought into full requisition, and he was very cleverly landed the winner by half a length; Little Harry beating Teddington for the second money by three parts of a length. Kingston is a remarkably fine specimen of the thorough-bred English race-horse.

The result was hailed by loud and prolonged cheering, and as the jockey (Flatman) returned to the stand these gratifying manifestations were again renewed. Mr. H. Stebbing the trainer, was warmly congratulated on his success, and the fine condition in which he had brought the horse to the post was generally and deservedly acknowledged. The owner of Kingston and his immediate "party" were the principal winners.

KINGSTON," THE WINNER OF THE GOODWOOD CUP, 1852.

THE ILLUSTRATED LONDON NEWS

No. 573.—VOL. XXI.] FOR THE WEEK ENDING SATURDAY, AUGUST 14, 1852. [SIXPENCE.

THE BRITISH NORTH AMERICAN FISHERIES, AND THE DISPUTE WITH THE UNITED STATES.

AN unfortunate difference has arisen between the Governments of Great Britain and the United States of America. The subject of dispute is the "right" or "liberty," whichever it may be, of the American fishermen to fish in the waters of the Bay of Fundy. The American fishermen and their Government plead that the Bay of Fundy is free sea—open to all the world; that if any portion of it be reservable, it is only that portion which extends three miles around the coast of the British territories of New Brunswick and Nova Scotia. The British Government insists, on the other hand, that the whole bay, to the north of a line drawn on the map from the extreme south-west to the extreme south-east of the British possessions, is strictly British; that the Americans have no rights whatever in it or over it, except such as are stipulated by treaty; that, if they have been allowed to fish in it, it has only been by favour and on sufferance; and that circumstances have arisen which render it necessary that the liberty formerly acceded should be restricted. Hereupon issue has been joined. The subject is not a new one, for it has been debated with more or less of earnestness between the two Governments ever since the declaration of American independence. It has only been of late years that the British Government has been even partially awakened to the importance of establishing and maintaining its own rights, not only in these, but in other North American waters; and it has only been since the Derby Administration came into power that measures have been taken which have unfortunately wounded the pride of a great and sensitive nation, and led to a state of feeling on the other side of the Atlantic which is very much to be deplored.

The history of this untoward business, from the first to the last, is a very simple one. In the year 1783, when the British Government recognised the independence of the United States, the conditions on which the citizens of the new Republic were to be allowed to carry on the deep-sea fisheries in British waters were definitively arranged. By the treaty of that year, as originally drawn up, the Americans were to enjoy the "*right*" of fishing in the waters of Newfoundland and other British seas. The British Government objected to acknowledge a right, and the word "*liberty*" was substituted. This was an essential difference. It is not necessary to reproduce the conditions upon which this liberty was conceded to the Americans. The war that broke out between the two nations led to the abrogation *de facto* of this treaty, and in 1818 a negotiation upon a fresh basis was commenced. By the new treaty of that year—the terms of which are now in dispute—the American Government once for all consented to be permitted to fish in British waters, upon certain conditions, thus waiving the question of right altogether, and acknowledging the supremacy of Great Britain in her own seas. There still remained the question of what was or what was not a British sea. The Americans, as before stated, always contended, that under the treaty of 1818, the Bay of Fundy was as free to them as the Atlantic or any other ocean, provided they did not fish within three miles of the British shores. The British, on the other hand, as invariably insisted that northwards from the two southern extremities of the bay it is a *mare clausum*, and as much British as Windermere or Loch Lomond. But Great Britain has unwisely neglected her own fisheries in that sea, as well as in the equally if not more valuable fishing stations of Newfoundland and Labrador; while not only the Americans but the French have been fully sensible of the wealth to be derived from them, and of their additional value, as nurseries of able and experienced seamen for their respective navies. The governors of the various British colonies have been powerless to enforce the rights of the mother country while the home Government has hitherto been supine, indifferent, and negligent. The consequence is that the Americans as well as the French have profited by our folly and *laches*. The French secured to themselves by treaty the right to fish and to cure the produce along the coast of Newfoundland, from Cape Ray to Cape St. John; while the Americans, more favourably situated, turned their attention more particularly to the Bay of Fundy, where for upwards of a quarter of a century they have made encroachments, almost unquestioned, and until within the last few months unmolested. The lapse of so long a time has seemed to the American fishermen and their Government to constitute a legal right; and when at the eleventh hour the Administration of Lord Derby has deemed it just, in a sudden fit of vigour or of zeal, to seize the American fishing vessels employed in what they consider their legitimate trade, a state of feeling has been produced in America, which is very lamentable, but very natural, and not in the least degree surprising.

Upwards of 2000 American vessels, employing more than 30,000 seamen, were engaged in a trade, of which the value is estimated at the present time to amount to 12,000,000 dollars, when Lord Derby and his Colonial Secretary, Sir John Pakington, resolved to cut the Gordian knot of a difficult subject by ordering a British fleet to capture American fishing vessels found in the Bay of Fundy. No proper and timely notice appears to have been given to the American Government of the determination of Great Britain to enforce her legal rights in this or in any other way. The Americans were utterly unprepared for violence, and the seizure of two of their vessels but a few weeks ago, under express instructions, fell like a thunderclap upon the Union. A cry of war has been raised. A considerable party in the States desires nothing better. America is young, rich, powerful, and ambitious; and it would flatter the vanity of many Americans if Great Britain could be punished for what is generally looked upon as an unjust aggression. But without reference to the opinions of any party in America, the people of Great Britain will consider this question with calmness, and without prejudice. Indeed, it may be said that public opinion has already pronounced itself in an unmistakeable manner against the precipitancy of Lord Derby and Sir John Pakington, and against the uncourteous and unusual mode of their procedure towards a nation that supposed itself to be at peace with us. That great and prosperous nation speaks our language, and is flesh of our flesh, and if the interesting relationship of blood and lineage, and common traditions, customs, and sympathies, existing between them were not sufficient to maintain the closest amity; a reason more than sufficient might be found in the fact that the interests of civilisation, religion, and humanity imperatively require that they should be united in the most

DEPARTURE OF "THE LIZZIE WEBBER," THE FIRST EMIGRANT SHIP FROM SUNDERLAND TO AUSTRALIA.—(SEE NEXT PAGE.)

fraternal and enduring alliance. But Lord Derby has rashly imperilled all this. He has gratuitously wounded the honor of a great and free nation; made this country act unjustly in a cause that is possibly a just one, and with unlucky perversity made the better appear the worse cause in the estimation of the rational and impartial all over the world.

We hope, however, that the good sense of these two great nations will prove strong enough to prevent the unlucky vigour of Lord Derby from assuming any unnecessary and factitious importance. The Parliament that must shortly assemble needs no other question than this to be enabled to do justice upon the present Administration. There can be little doubt that as soon as it assembles it will condemn unequivocally the conduct of the Minister, who at such a time and in such a wanton mode, so unnecessarily endangered the good understanding between the two foremost nations of the world. If America, however, requires a victim, the approaching fall of the Derby Administration upon this very question, if upon no other, will supply it. We do not anticipate that any serious rupture will, in the meantime, take place. The public opinion of Great Britain would not tolerate a war in such a cause. At the same time common prudence suggests that this nation should once for all come to a positive and final understanding with the United States upon this subject. "Free Trade" and "Free Fisheries" are the solution of the difficulty, and it is one that would be of reciprocal advantage to all parties interested. Whilst every friend of humanity indulges the hope that the dissension will be but temporary, and that it will, on its close, produce a permanent good understanding between these two mighty brothers, the people of Great Britain may be excused for hoping, in addition, that a more correct appreciation by the Government of this country of the immense resources which we have so long and so unwisely neglected in the seas of North America will result from it.

THE AMERICAN FISHERIES.

The *Morning Herald* of Monday has the following statement on this subject, which, as that paper is regarded as the organ of the Government, is presumed to emanate "from authority:"—

In reference to a question which naturally at this moment absorbs the public attention both in England and in the United States the facts are as follows: —

Her Majesty's Government have made no new claims on the United States, and have withdrawn no concessions made to that Government. No renewal of the long-vexed question respecting the Bay of Fundy has been mooted. Lord Aberdeen's concession of 1845, respecting that arm of the sea (guarded as it was by his Lordship by an assertion of our rights over the whole bay), remains where it was. The disputed interpretation of the technical terms of the treaty of 1818 remains where it was. All that has been done by the Government is to strengthen our squadron on the coast of Newfoundland, Nova Scotia, and New Brunswick, to defend a right which the United States do not, and never did, dispute —namely, that of retaining exclusively in our possession the water within three miles of own shores from the encroachments of both French and American fishermen; and the American vessel, the *Coral*, alluded to, was seized within a quarter of a mile of our own coast. Our squadron is now no larger than the French one on the same coasts.

Our right is that which demands the respect of all nations of the globe—one acknowledged by international law; and if for many years our successive Governments have neglected to protect their fellow-subjects as France and the United States always protect theirs, both in America and in the Channel, we can only be grateful to our present Ministers for repairing their fatal supineness.

We shall return to this subject, upon which, both here and across the Atlantic, the public have been most grossly misinformed and misled.

EMIGRATION FROM SUNDERLAND.

The sailing of an emigrant ship from Sunderland for Australia, the first that ever left that port for the Pacific, took place on the 31st ult., under very interesting circumstances.

So vast an assemblage of persons, and so brilliant and exciting a scene had not been witnessed in Sunderland since the opening of the Dock as was presented at the moment of the brave vessel, freighted with her living cargo, leaving the harbour.

The new vessel is a splendid clipper brig, named the *Lizzie Webber*, built by Mr. Pile, of Sunderland, and commanded by Captain Rowntree; her registered tonnage being only 213 tons. On the 31st she moved out of the south dock into the roads outside of the harbour, having on board emigrants for Australia. She is understood to be the first of a line of emigrant ships from Sunderland to the gold regions. Many of the passengers being from distant parts of the country, and it being market-day at Sunderland, an immense concourse of strangers, added to the spectators of the town and neighbourhood, thronged the piers, docksides, seabanks, &c., to witness the departure of the ship and passengers. It was truly affecting to see many of the emigrants and their friends taking a farewell leave.

When the *Lizzie Webber* came to anchor in the roads, the friends of the emigrants having bid them adieu, were preparing to take their departure. when, upon the announcement of Captain Rowntree, commander, Mr. Wright addressed a few parting words to the company upon the occasion of the departure of the first emigrant vessel from Sunderland to Australia. On Sunday, about noon, she weighed anchor, and proceeded on her passage with a light south-west breeze.

THE DUTCH EMIGRANT FARMERS AT THE CAPE OF GOOD HOPE. —THE CHIEF PETITIONS.—Amongst the various details of news received this week from the Cape, one of the most interesting is the announcement that a convention, or federal treaty, of a highly important character, has been entered into by General Cathcart, in his capacity as High Commissioner, with the community of emigrant farmers settled beyond the Vaal river (the northern boundary of the Orange river Sovereignty), whereby they have acquired the position of an independent state. By this convention, the terms of which had been previously agreed upon at a meeting of the Assistant Commissioners and a deputation of the principal farmers, headed by their elected Commandant, Pretorius—the inhabitants of the trans-Vaal country are guaranteed "the right to manage their own affairs, and govern themselves according to their own laws without interference or encroachment from the British Government. They are assured that "it is the fervent desire of the British Government again to establish free trade and an amicable understanding with the emigrant farmers inhabiting, or who may hereafter inhabit, these territories." It is agreed that this non-interference and free trade shall be reciprocal; that trade in gunpowder with the natives shall be peremptorily prohibited on both sides; that no slavery shall be allowed north of the Vaal river; that the British Government repudiate all alliances with coloured tribes north of the Vaal river; that escaped criminals shall be mutually given up, if required; that certificates of marriage issued by competent officers be held valid; and that, with the exception of criminals and debtors "every person now in possession of any landed property residing within the British territory shall have full liberty and power to dispose thereof, and to remove unmolested beyond the Vaal river, and to and fro." His Excellency has formally ratified this convention, in a proclamation expressing his trust "that the freedom which the emigrants are thus permitted to exercise may result in lasting friendship with the British Government, neither entertaining past prejudices, nor adopting former causes of quarrel;" assuring them that "he is, on the contrary, most anxious, about it to be in his power, to contribute to their welfare by promoting religion and education amongst them."

Lamentable accounts have been received of the mortality among the inhabitants of the trans-Vaal country, arising from a contagious disease peculiar to the country, which has this season assumed an unusual degree of virulence. Upwards of 300 of the settlers have been cut off in one locality. The disease, it is said, is very rapid in its operation, generally ending in death within a few hours of its appearance.

EXPLOSION OF A GUNPOWDER-MILL BY LIGHTNING.—At nine o'clock on Friday evening, August 6th, one of Kames and Co.'s gunpowder-mills, at Cowall, in Argyleshire, was struck by lightning, and exploded with terrific force. The whole of the building was completely destroyed, but, fortunately, no one was injured. This, we believe, is but the third instance on record of a misfortune to a powder-mill by the electric fluid.

FOREIGN AND COLONIAL NEWS.

FRANCE.

Louis Napoleon has seen fit this week to relax the stern policy, in accordance with which he considered himself bound, after the *coup d'état* in December last, to banish from the country some of the most eminent of the politicians, military chiefs, members of the Legislative Assembly, and journalists in France. He has issued a decree authorising the return to France of MM. Creton, Duvergier de Hauranne, Chambolle, Thiers, de Remusat, Jules de Lasteyrie, and General Laidet; and removing the sentence of temporary exile, or interdiction to reside in France, in favour of MM. Michel Renaud, Signard, Joly, Theodore Bac, Belin, Besse, and Milotte.

The *Moniteur* announces that as the conferences lately held at Paris between the Minister of Foreign Affairs and the Plenipotentiaries of Belgium have not led either to a renewal of the old treaty of December 13, 1845, or to a new arrangement; and as the treaty in question expired on the 9th inst., the commercial relations between France and Belgium have now fallen under the regulations of the general tariff. According to the *Débats*, however, a provisional treaty, continuing the present to the end of the year, will be signed, and the Belgian Chambers will be convoked for the express purpose of passing the new treaty.

Commercial negociations with Holland have been renewed.

The approaching *fête* to-morrow (Sunday), in honour of the reorganised National Guard, has excited much attention. Letters from Paris state that preparations for the festive display are on a grand scale. In the Champs Elysées a great number of workmen are engaged in erecting fountains on both sides of the roadway, and in cutting trenches for distributing the water. The basins of the fountains are to be in zinc, and the wood-work stuccoed. There are to be two falls of water in each fountain, one from a considerable height. The electric light playing on the water, it is expected, will produce a great effect. In the centre of the Rond-Point a temporary pedestal destined to receive the equestrian statue of the Emperor is erected. The pedestal has been covered with stucco, with bassi-relievi on it. Stands have been raised on the Quai de Billy, to afford a view of a grand naval combat which a frigate, stationed in the Seine, is to maintain against some steamers; and in the neighbourhood of the Chamber of Deputies frames and other works are being erected for the fireworks, which are to be of the most magnificent and brilliant kind. Fourteen young females have been selected to receive dowries on the occasion of the *fête*. The marriage contracts are to be signed at the Hotel de Ville, in presence of the Prefect of the Seine; and the marriage ceremony, both civil and religious, to be performed on Saturday (this day).

In the departments petitions to the Senate continue to be numerously signed, praying a restoration of the Empire. One in course of signature at the Meuse, says:—"Penetrated with gratitude for the services rendered by the Prince Louis Napoleon, who saved society on the 2d of December, and who since he has been at the head of the French nation has each day the more merited of the country, call on the Senate to propose the advent to the Imperial throne of Prince Louis Napoleon Bonaparte."

The *Moniteur* of Wednesday contains nearly three columns of names of soldiers who have had conferred on them the Cross of the Legion of Honour, or the new medal.

The Prince President's marriage, it is rumoured, is deferred; but from what cause is not assigned.

M. de Persigny, having gone for a few days to Dieppe, in order to recruit, after a slight indisposition, the duties of his office as Minister of the Interior have been confided *ad interim* to M. Magne, Minister of Public Works.

The personal *entourage*, or immediate household attendance on the Prince President, has of late assumed so imposing and regal a character that it forms quite a prominent feature in the *Almanach National*, which is compiled or edited by no less personages than MM. Guizot and Soribe, who have, within the past week, presented a copy of the work to Louis Napoleon. The President's establishment consists of the civil and military household. The former consists of the following officers:—

Government of the Palace: General Vaudrey, governor; Count Napoleon Lepic, sub-governor. Prefect of the Palace: Baron Treilhe de Boville, colonel of engineers; Captain Merle, sub-prefect. Cabinet: M. Mocquart, private secretary of the Prince; M. Albert de Daimas, sub-chief du cabinet. Library: M. Lefèvre-Deumier, librarian of the Elysée and Tuileries. Equeries: Lieut.-Colonel Emile Fleury, Baron Faron de Pierres, equerry. Veteneria: Colonel Edgar Ney, captaine des chasses, head huntsman. Marquis de Toulongeon, first lieutenant des chasses, second huntsman. Ceremonies: Count Felix Baciocchi, master of the ceremonies. Introducer of ambassadors: M. Feuillet de Conches, deputy master of the ceremonies. Intendance of the Household: M. Charles Rure, intendant-general; M. Magne, sub-intendant (office for Charitable Aid). Dr. Conneau, director: M. Poupin, sub-director. Privy Purse: M. Charles Thelin, treasurer. Medical Aid: Dr. Conneau, head physician; Dr. Andral, consulting physician; Dr. Robert de Lamballe and Dr. Baron Hippolyte Larrey, consulting surgeons; Dr. Tenaln and Dr. Delaroque, jun., physicians of the Household.

The military establishment consists of eleven sides-de-camp, and eleven orderly officers. The following are the names of the former:—

General Roguet, first aide de-camp; General Vaudrey, General Carrobert General de Cotte, General de Gorsse, General de Montebello, General de Lourmel, Genera. Espinasse, Colonel Treilhe de Boville, Colonel Edgar Ney, and Lieut.-Colonel Fleury.

The orderly officers comprise the following gentlemen:—

Captain Excelmans (of the navy), Commandant Lepic, Commandant de Toulongeon, Commandant Fard, Captain Mocqual, Captain Merle, Captain de Rochemi. Captain Brill, Captain Cambriels, Captain Taschet de la Pagerie, and Lieutenant de la Tour d'Auvergne.

The *Almanac National*, being apparently apprehensive that its readers may not comprehend what some of these titles signify, takes the trouble to explain them. Thus, the Prefect of the Palace, it states, is to superintend the lighting, firing, provisions, plate, linen, liveries, &c. He is to exercise an incessant control over the expenses, and all the menial persons employed in the household are under his orders. The Captaine des Chasses is to order everything relating to the hunting or shooting parties of the President. He is to keep the various forests appropriated to the President's amusement well stocked with game, lest at any time the head of the State might be disappointed in finding sufficient sport.

The Council of the Order of Advocates of the Court of Appeal of Paris on Monday elected M. Berryer, the celebrated orator, as its *bâtonnier* for the ensuing year.

The inauguration of the statues in bronze of Bernardin de Saint Pierre and Casimir Delavigne took place on Sunday at Havre. The statutes, executed by David (d'Angers), are set up in the Place François I., in front of the principal entrance to the Museum. The Académie Française had deputed MM. de Salvandy and Alfred de Musset to represent that body at the ceremony, but M. Salvandy was prevented from attending by a sudden indisposition. The arts and sciences were respectively represented by the Count de Niewerkerque and M. Michel Chevalier. When the statues were uncovered in the presence of the municipality, M. de Musset made a brief speech, in which, alluding to the unexpected absence of M. de Salvandy, who was to have made the speech, he said he could not venture to dilate upon the graceful tenderness of the author of "Paul and Virginia," or the manly genius and pure style of Casimir Delavigne without study and reflexion. M. Ancelot, of the Academy, read some verses composed for the occasion. Count de Pelleport, a relative of Bernardin de St. Pierre, thanked the town of Havre for the honour done to his ancestor.

The postal service between Paris and Strasburg will soon be definitively organised. The mail train will leave Paris every evening at half-past seven, and arrive at Strasburg at twenty-five minutes past eight next morning.

A clandestine powder manufactory has been discovered at Izieu, near St. Etienne. The Procureur of the Republic has arrested several men in consequence, but it is believed that the powder was destined for the supply of poachers, and not for any political object.

The Government has received despatches from Cayenne, dated the 13th of July. The penal colony was in a perfectly satisfactory state, and, notwithstanding the number of convicts, which then amounted to 1900, the sanitary report was very favourable.

Michel Ney, the grandson of Marshal Ney, and son of General the Duke of Elchingen, has entered the 7th Dragoons as a volunteer. The young dragoon is only in his 18th year.

The *Emancipation*, of Brussels, states that General de Lamoricière, having been forced to quit Prussia, will fix his residence at Hamburg.

UNITED STATES.

From New York, under date the 31st ult., we learn that almost the sole topic of interest noticed in public was the misunderstanding between the Governments of Great Britain and the United States, relative to the fisheries carried on by American craft in British colonial water which we referred to last week.

Nothing of any moment had further transpired on the question except that Mr. Webster, Secretary of State, had, on the occasion of a visit to his mansion at Marshfield, delivered a speech, in which he advocated in a very belligerent tone the American view of the question. The same tone is generally adopted by the New York papers, while on the other hand the *Boston News* asserts that the intention of the British Government being only to exclude American fishing vessels from those bays and inlets of the coast which are less than six miles wide, there will be an acquiescence on the part of the American authorities.

The general feeling among the best-informed circles was that the matter would be amicably settled, notwithstanding that the United States steam-frigate *Mississippi* and other vessels had been ordered to the fishing-grounds, under Commodore Perry. The *New York Herald* asserts that the President disapproves of Mr. Webster's views upon this subject. Two more schooners had been seized by the British ships. An anchorage duty of 6d. per ton had been demanded by the British upon all United States fishing vessels. Fourteen ships of war (English) were cruising on the ground, four more being fitted out at St. John's.

At Washington a rumour was prevalent that the Committee on Commerce in the House of Representatives had prepared, and intended shortly to report, a British North American Reciprocity Bill, expressly providing that the north-eastern fisheries shall remain open to the fishermen of the United States. This, it was said, had been determined upon some time back.

In the United States Senate, on the 27th ult., a resolution, having reference, no doubt, to the misunderstanding with Great Britain, was adopted, calling on the President for information as to what portion of the navy is now available, and capable of being called into immediate service; and another, requesting copies of certain letters from the Mexican Minister relative to the Mexican boundary.

The case of the extradition of Thomas Kaine, claimed by the British authorities as a fugitive from justice, on the charge of an attempted murder in Ireland, had caused a serious riot in New York, arising out of an attempt to rescue the prisoner as he was conveyed from the Courthouse to the Tombs prison. The final decision had not been yet come to, but the prisoner was in safe custody at the Tombs.

A man named Simmons, who had committed a forgery on an English bank to the amount of 2400 dols., on which he obtained the money in New York city, had been arrested, and was about to be sent to England, under the same extradition treaty as that under which Kaine is claimed to be given up.

The lamentable fact that the *Henry Clay* had caught fire, between Albany and New York, by which upwards of 66 passengers had lost their lives, is announced.

A statement, to which some importance is attached, had been published in the *New York Herald*, to the effect that General Scott, the Whig candidate for the Presidency, had some time ago written a letter advocating the annexation of Canada to the United States; and it was added that the prospective elevation of Scott to the supreme power of the Union had called into active force all the latent energies of the Canadian party, who formerly had acted with Papineau and his companions in the Canadian rebellion.

From Louisville we learn that the United States expedition to the head of the Red River had been encountered by the Camanches and Keowsy Indians, and eighty of the American troops had been slain in the action.

The British ship *Reciprocity*, bound from Mobile to London, was lost by fire on the 23th June. The officers and crew, after being in the boats sixteen hours, were picked up, a portion taken to St. Peter's, Martinique, and the remainder arrived at Boston on the 23rd July.

CAPE OF GOOD HOPE.

There are accounts from the Cape this week, by the mail steamer *Pyrenée*, of so recent a date as July 3; and from the immediate vicinity of the seat of war, viz., Graham's Town, of June 24; but they are by no means of a satisfactory character. So far from hostilities appearing likely to terminate speedily under the new command of General Cathcart, it would seem that the Kaffirs are acquiring even more boldness and confidence in their *rencontres* with our troops since the departure of Sir Harry Smith, than they had ever manifested previously, and that so far from the war being on the eve of its conclusion, its looks quite as interminable as it did six months ago.

Independently, too, of the ordinary casualties of war, our troops, the colonists, and their servants, are exposed to the murderous depredations of roving bands of savages, who are generally Hottentots. For instance, the *Zuid Afrikaan*, of May 31, mentions an outrage which had just occurred in the vicinity (the second of the kind within a few days), viz., the murder by a band of rebel Hottentots of two herdsmen, in Manley's Flat, ten miles south of Graham's Town. These men (a Fingoe and a Hottentot) were out in the field with the cattle, when they were attacked and shot by the rebels, who carried off the cattle. Occurrences of this kind were very common; and the general tenor of the advices indicates the almost universal prevalence of robberies, attended with murder; cattle lifting, intercepting the mails; skirmishes, resulting only in a useless loss of life on both sides; surprises ably executed by the enemy; and a state of things and a general productive only of bloodshed, confusion, and misery, without any hope or prospect of a termination to such evils being at hand. The *South African Commercial Advertiser*, of July 3, after stating that it gives a summary of events and operations during the past month, adds, "But the details of assaults, robberies, murders, pursuits, skirmishes, and personal exploits, in which colonists have been distinguished actors or sufferers, would fill many more columns. Disorder and danger, as well as actual war, have become familiar to us 50 miles or more on both sides of a border line some 100 or 150 miles in length." This is the kind of field that General Cathcart has to operate against, with an enemy "adroit, active, desperate, and well armed."

With reference to the operations in the field against the Kaffirs, we find in the monthly summary of events mention made of an attack, on the 17th of May, by Colonel Buller, upon a body of the enemy in the Waterkloof, at a place called the Horse-shoe, where on a former occasion Colonel Fordyce was killed. The Kaffirs fought bravely. The colonel destroyed a number of huts, and the enemy gave way before the troops; but the instant the retreat was sounded they reappeared in thousands, and commenced a desperate attack on the rear guard, only repulsed by the good working of the artillery, which Col. Buller had brought with him. One of the riflemen was severely, and two others slightly wounded.

On the 2d of June a body of the enemy (principally Hottentots) attacked a missionary station at Mount Coke, carried off a large number of cattle, killed an Englishman and seven natives, and wounded ten.

Twice during the month the post beween Graham's Town and head-quarters has been intercepted by the enemy. On the first occasion the mail bags were wholly carried off, but in the second instance they were opened and only the newspapers taken.

On the 12th of June a most disastrous affair occurred. Five waggons, proceeding from Graham's Town to head-quarters at Fort Beaufort with military supplies, consisting of a very large quantity of ammunition (30,000 rounds of ball cartridge), 50 Minié rifles, a box of carbines, and forty suits of clothing, and other stores, were captured by a party of Kaffirs and rebel Hottentots, who had lain in wait for them near the Konap-hill. The escort, under Captain Moodie, R.E., consisted of 35 men of the 91st regiment and Sappers and Miners, none of whom, with two of the drivers, were killed, and seven wounded, by the murderous fire suddenly opened upon them. Fortunately, the nipples of the rifles were sent by another conveyance, so that the weapons will be of no service to them; but the ammunition is of much value.

On the 20th an assault was made by our troops on the camp of the rebel leader Uithaalder, on the Buffalo, by a combined force under Major-General York, Colonel Eyre, and Colonel Michel. The movement was apparently intended as a surprise, but the enemy was on his guard, and the column of Colonel Eyre, which had moved from the Keiskamma, coming first upon the ground, was received with a heavy fire. Two companies of the 43d, while being placed in position, were sur-

rounded by about 500 or 600 of the rebels, whom they charged in gallant style; and a squadron of dragoons coming up, with the 73d, under Major Pinckney, the enemy was completely routed, about twenty-five being left dead on the spot. The encampment, consisting of about 200 huts, was burnt, and a considerable quantity of ammunition taken. A number of articles were also found, belonging to the Sappers and Miners who fell at the Konap, and three of the Minie rifles were recovered. One of the rebels, formerly a corporal in the Cape Corps, was captured by the column under Major-General York, and has been executed in this affair only five were wounded on the side of the troops; one of them, it is said, being struck by a Minié ball which had been rammed into the gun the wrong way.

On July 1, Gen. Cathcart had issued a proclamation, stating that he should carry the war into Kreli's country, and calling upon the burghers of certain districts to assist him in his endeavours to put down the enemy.

Two important questions, viz. the origin of the Hottentot rebellion and the source whence the Kaffirs obtain their ammunition, had had some light thrown on them by a statement which had been made by a captured rebel Hottentot, from which it would appear that the rebellion is in some way connected with the apprehension which has been, from time to time, unfortunately raised amongst the coloured classes, that it was the intention of the whites to pass compulsory labour laws, which would deprive them of their freedom. With respect to the supply of ammunition, it appears that some of our own countrymen still make a regular trade of supplying the enemy with gunpowder purchased for cattle in Moshesh's country. A proclamation has, in consequence, been issued by the Governor, offering a reward of £50 for the apprehension of any person discovered furnishing ammunition to the enemy, with proof to hang him or her; which penalty, under martial law, he declares he will inflict, without hesitation, when convinced of the fact.

The death of Major Hogge, one of the assistant-commissioners sent out by her Majesty's Government, little more than a year ago, to aid in the peaceable cession of the country with gunpowder and ball, the cost of which story beyond the colonial boundary, is announced. He died on the 9th of June, of fever, brought on by exposure during the heavy rains, in the Orange River Sovereignty.

In the Sovereignty peace continued to prevail, and affairs appear generally prosperous. Considerable alarm, however, had been excited by Earl Grey's intimation that her Majesty's Government had resolved upon withdrawing British dominion from that territory. A strong remonstrance against such a measure had been addressed to General Cathcart.

The decision of Governor Cathcart as to the fate of Andries Rothe, the Hottentot field-cornet of the Kat River Settlement, sentenced to death for high treason, had been announced. The punishment was commuted into imprisonment, with hard labour for life.

AUSTRALIA.

We have intelligence this week from Melbourne to the 22d of April, which establishes the fact of the constantly augmenting production of the gold-fields, which was at that date estimated at £100,000 per week, or at the rate of more than £5,000,000 per annum for this colony alone. The *Statesman*, which brings the latest account, has taken home about 60,000 ounces, valued at £230,000; and the *Vanguard*, which had sailed a few days previously, but which has not yet arrived in London, took 17,400 ounces, or nearly £70,000 worth.

Great doubts continued to be made of the prevalence of crime, owing to the influx of convicts from Van Diemen's Land, many of whom were among the most successful people at the mines. Rain had begun to fall at Mount Alexander, but not so as to increase the facilities for working, and in the other districts it was still delayed.

The statement of the public revenue of the colony for the quarter ending in March had created both satisfaction and surprise, the increase being £35,893, a sum nearly equal to the whole public revenue of the corresponding quarter of last year. Much of this arose from the duties on spirits, tobacco, and foreign goods. In the territorial revenue, likewise, there was an extraordinary augmentation. For the corresponding quarter of 1851, the total amount of that revenue was £9138, and now it was £106,827, the chief items of increase being the land sales, which amounted to £95,248; the gold licenses, which produced £48,597; and the gold escort, which produced £4489.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

WILLIAM, LORD KENSINGTON.

This nobleman died at Kensington on the 10th inst., aged 75. His Lordship was only son of the late William Edwardes, Esq., who inherited at the decease of his first cousin Edward Henry, 7th Earl of Warwick, the estates of the Rich family. by maternal ancestors, and was raised to the peerage of Ireland as Baron Kensington, in 1776. The Edwardes is of ancient Welsh descent, being derived from the famous Tudor Trevor, lord of Hereford, founder of the tribe of the Marches.

Lord Kensington married, 2d December, 1797, Dorothy, daughter of Richard Thomas, Esq., and by her (who died 9th December, 1843) had six sons and three daughters: of the latter, the eldest, Caroline, married Henry Handley, Esq., M.P., of Culverthorpe Hall, county Lincoln; and the youngest, Jane, married Sir Edward Chetwode Derry, Bart. Of the sons the eldest survives is William Lascelles, third Lord Kensington, Captain R.N., who was born 3d February, 1801, and is married to Laura Jane, daughter of Cuthbert Ellison, Esq., of Hepburn, county Durham, by whom he has several children.

LIEUT-GENERAL SIR THOMAS CHARLES F. DOWNMAN, K.C.H., C.B.

The death of this highly distinguished officer, Colonel-Commandant of the Royal Artillery, occurred suddenly at Westwich a few days since. Sir Thomas was born at St. Neots, Huntingdonshire, in 1773, the eldest son of Colonel Francis Downman, of the Royal Artillery. He entered the military service in 1793, being then appointed Second Lieutenant in the Artillery; and soon after accompanied the expedition under the Duke of York to Flanders, where he was present at the actions at Cateau, Lannoy, and Roubaix. At the last-named he was taken prisoner. During the Corunna campaign, Captain Downman commanded a troop of horse artillery; and from 1810 to 1813 served in the Peninsula, taking a distinguished part at Ciudad Rodrigo, and Salamanca, for which he received a medal. In 1846, he attained the rank of Lieutenant-General, in the same year was appointed Colonel Commandant of the Royal Artillery. Sir Thomas was aide-de-camp to King George IV and William IV. He married first in 1804, the second daughter of William Hosmer, Esq.; and secondly, Miss Marsh, only daughter of John Marsh, Esq., of Brighton.

THE HON. RICHARD WATSON, M.P., OF ROCKINGHAM CASTLE, COUNTY NORTHAMPTON.

Within the brief period that has elapsed since the elections three members have passed off the scene; Mr. Duncuft we referred to in our last, and this week we have to include in our obituary Mr. Granger, M.P. for Durham, and the Hon. Richard Watson, the newly-chosen representative for Peterborough, who died and occurred at Homburg, on the 26th ult. The honourable gentleman was youngest son of the late Lord Sondes, and grandson of the Hon. Lewis Monson, who assumed the surname of Watson on inheriting the estates of his maternal ancestors, the Earls of Rockingham, and was subsequent y created a Peer of that name. These estates was Rockingham Castle, in Northamptonshire, where the Hon. Richard Watson resided.

The deceased member was born 6th January, 1800, and married, 21st December, 1839, Lavinia Jane, daughter of Lord George Quin, by whom he leaves four children. Barry in life he entered the army, and attained the rank of Major in 1846. In 1846 he served as High Sheriff of Northamptonshire, and in the following year was appointed a Deputy Lieutenant. Through the Lords Rockingham, Major Watson was related to Earl Fitzwilliam, whose influence at Peterborough is very great.

THOMAS COLPITTS GRANGER, ESQ., M.P.

This gentleman was called to the bar in 1830, and practised on the northern circuit. He was in Queen's Council, a Bencher of the Inner Temple, and Recorder of Hull. In 1835 and 1837 he offered himself as a candidate for the representation of Durham, but was unsuccessful. In 1841, however, he became M.P. for that city, and was re-elected in 1847 and 1852. In politics he acted with the Whig party. Mr. Granger was known in the literary department of his profession, as being editor, with Mr. Serjeant Manning, of a series of very able Common Law Reports. He also, in conjunction with Mr. Peter Burke, of the same circuit, edited the last edition of Mr. Roscoe's work on the law of evidence in criminal cases.

Mr. Granger's death occurred somewhat suddenly, on the 9th instant, at York, where he had been staying since Durham assizes.

Mr. Hewitt Bridgman, an ex-M.P.—This gentleman, who for many years was the Liberal representative for the borough of Ennis (Ireland) in the House of Commons, flew new pencil ess and almost friendless, paralysed and dangerously ill, in the King's College Hospita . He is now about 80 years of age, and will probably be removed, should he recover his health, to the universal ailer of a workhouse, unless succoured by the kind of charity. Amongst the few of his former friends to whom he has indebted for some temporary relief is the O'Gorman Mahon, who, on hearing of the lamentable plight of his co-partner, immediately called on him and gave him £5.

At a special general meeting of the proprietors of the Union Bank of Australia, held on Wednesday, it was agreed that the remuneration to the directors should be increased from £200 to £3000 annually.

METROPOLITAN NEWS.

Royal Botanic Society of London.—The anniversary meeting of this institution was held on Tuesday, in the council-room of the society, Regent's-park. Mr. Canon Jer presided. The report of the council congratulated the fellows on the increasing prosperity of the society. The number of fellows who had been elected since the last anniversary was 122, and the receipts from that source had amounted to £3007 18s. The sale of exhibitions, &c. had produced the sum of £3405 4s. 6d. The interest bearing debts of the society had been reduced this year from £14,350 to £13,300 in 1851 52. The voluntary subscription list for the present year had been £1458 9s. 6d., and the total of the final cost of which was £1679 4s 8d., had reached the sum of £1296 1s 6d; the difference having been defrayed out of the general income. The balance-sheet showed that the receipts of the society had been £14,859 0s. 4d., and the payments £11 271 7s. 6d., leaving a balance in hand at the present time of £3,597 13s. The report of Mr. Sowerby, the secretary, stated the number and character of plants of interest and value which had been introduced to the garden during the past year. The several reports having been adopted, three new members of council were elected, and the business of the meeting concluded.

Institution of Civil Engineers.—The Council of the Institution of Civil Engineers have awarded the following premiums:—1 A Telford medal, in silver, to Captain Mark Huish, Assoc. Inst. C.E., for his paper "On Railway Accidents." 2. A Telford medal, in silver, to Braithwaite Poole, Assoc. Inst. C.E., for his paper "On the Economy of Railways." 3. A Telford medal, in silver, to Colonel Samuel Colt (U.S. America), Assoc. Inst. C.E., for his paper "On the Application of Machinery to Manufacture of Rotating Chambered-breech Fire-arms, and the peculiarities of those Arms." 4. A Telford medal, in silver, to Frederick Richard Window, Assoc. Inst., C.E., for his paper "On the Electric Telegraph, and the principal improvements in its construction." 5. A Telford medal, in silver, to Charles Coles Adley, for his paper entitled "The Electric Theory, and Practice of the Electric Telegraph." 6. A Telford medal, in silver, to Eugène Bourdon (Paris), for his "Description of a new Metallic Manometer, and other Instruments for measuring Pressures and Temperatures." 7. A Telford medal, in silver, to Pierre Hippolyte Boutigny (d'Evreux), for his "Description of a new Diaphragm Steam Generator." 8. A Telford medal, in silver, to George Frederick White, Assoc. Inst. C.E., for his "Observations on Artificial, or Portland Cement." 9 A Council premium of books, suitably bound and inscribed, to John Baldry Redman, M. Inst. C.E., for his paper "On the Alluvial Formations, and the Local Changes of the South Eastern Coast of England, from the Thames to Portland." 10. A Council premium of books, suitably bound and inscribed, to William Thomas Doyne, Assoc. Inst. C.E., and to Professor William Binden Hood, for their paper, entitled "An Investigation of the Strains upon the Diagonals of Lattice-Beams, with the resulting Formulæ." 11. A Council premium of books, suitably bound and inscribed, to George Donaldson, Assoc. Inst. C.E., for his paper "On the Drainage and Sewerage of the Town of Richmond (Surrey)." 12. A Council premium of books, suitably bound and inscribed, to William Bridges Adams, for his paper "On the Construction and Durability of Railways in Europe and the Modifications most suitable to Egypt, India &c."

National Provident Institution.—The object of this institution, the sixteenth annual report of which has been recently issued, is to extend the benefits of mutual life assurance to all classes of society, and for the better attainment of that end it is enrolled under the acts of Parliament relative to Friendly Societies. From the report it appears that since the establishment of the institution in December, 1835, 13,725 policies have been effected, and that this extensive issue of policies has not been occasioned by any indiscriminate acceptance of proposals for assurance, the board having every year, after giving full consideration to each proposal deemed a considerable number uneligible; in the last year no less than 95 having been rejected on this ground. The number of deaths since the last report has been 95; the claims arising therefrom, including bonuses, amount to £45,836 17s. The total sum paid since the commencement of the institution to the families or representatives of deceased members is £241,065 3s. The annual income is now £189,240 2s., and the balance of receipts over the disbursements is £114,623 2s. 9d.; the capital stock of the institution being £736,492 18s. 4d., which is invested in real and Government securities.

Butchers' Charitable Asylum.—The annual *fête* commenced on Tuesday was resumed on Wednesday, at two o'clock in the afternoon. Notwithstanding that the weather was most unpropitious, the committee have not only covered their expenses, but derived from the *fête* a considerable surplus in aid of their laudable and benevolent undertaking.

Sir Roy for the Protection of Young Females.—On Wednesday the annual meeting of this society took place at the Asylum, Tottenham. The meeting was preceded by an examination of the children educated in the society's school, which formed a very interesting feature of the day's proceedings, and was held in the school-room, in presence of a distinguished company of the friends and patrons of the institution. The Rev. Mr. Cranwell, of Christ church, Herne Bay, presided. After the conclusion of the examination, the annual meeting was held. The Right Hon. Lord Ashley occupied the chair.

Sir Thomas Parochial and Southampton Paving Trust.—On Tuesday the annual dinner of the St. Pancras Parochial Association and the Southampton Paving Trust, in commemoration of the passing of Hobhouse's Act and the establishment of local self government, took place at Bagnigge Wells Tavern. Mr. W. Cubitt, one of the churchwardens of St. Pancras, occupied the chair; and was supported by Lord Dudley Stuart, Mr. J. Williams, ex-M.P. for Macclesfield, and several of the Southampton commissioners, and other gentlemen sat down to dinner. After the usual toasts had been given and responded to, the company adjourned to the ball-room, where dancing was kept up with great spirit until a late hour.

The Late Fire at Montreal.—A preliminary meeting, convened by public advertisement, was held on Wednesday in the Egyptian Hall, Mansion-house, for the purpose of subscribing to the sufferers by the late fire at Montreal; the Lord Mayor in the chair. Among the gentlemen on the platform we observed Mr. Thomson Hankey, the Governor of the Bank of England; Baron Rothschild; Edward Ellice, Esq.; James Gold, Esq., &c. The Lord Mayor, having addressed the meeting, concluded by reading the requisition, which states:—"The recent most calamitous fires at Montreal have laid nearly one-third of the city in ashes, and destroyed property little, if anything, short of half a million. The principal scene of the conflagration was densely inhabited, chiefly by a labouring population, or by persons little elevated above that rank in life; and in the brief space of a few hours above 10 000 human beings, or nearly one-fifth of the population, have found themselves houseless, and a very large proportion of these utterly destitute, and dependent upon the sympathy and liberality of their fellow-citizens. To rebuild the ruined quarters will require much time as well as money, and in a few months a Canadian winter, with all its rigours, will close in upon this mass of destitution. Meanwhile, subscriptions in money and provisions for their immediate relief has been opened in Montreal, Quebec, and other towns in Canada, and liberal contributions are being raced; but such is the extent of the calamity that the entire population remaining are unequal to aid so far assist to their fellow-subjects in the mother country and the sister colonies." Resolutions in favour of the object mentioned in the requisition were unanimously agreed to, and a very handsome subscription was entered into by the gentlemen present. The meeting was not numerously attended, but the subscriptions gave great satisfaction.

Seizure of an Extensive Illicit Distillery.—On Monday afternoon a seizure of a very extensive illicit distillery was made by Mr. Alexander Williams, an officer of the Inland Revenue department, at 19, Green-street, Lamb's Conduit-street. Behind the coach-house he found a place fitted up as a complete illicit distillery, with all the necessary apparatus, and a still fully at work, with a large quantity of spirits ready for sending away. There were near 2 900 gallons of molasses wash prepared for continuing the working, and all the usual apparatus for carrying on an extensive trade. The spirits, capable of producing spirits sufficient to defraud the revenue of £70 per week, if worked but twelve hours per day. Two men were found in the house, who were taken into custody. The still and entire apparatus were conveyed to the Inland Revenue wares' ouses in Broad-street.

Shoeblack Fete.—A most unusual procession passed through the City on Tuesday, consisting of five shoeblacks in their red costume, each bearing a standard, surmounted by two brushes, and a black-ng-bott e holding a bunch of flowers. A number of friends accompanied the "polishing brigade" to Erith, where a gentleman had made extensive arrangements for the day's amusement. The boys were well supplied with pies, cakes, and all the necessaries of such an occasion. Several hymns and the "National Anthem" were sung with excellent effect.

Cank-street Dispensary.—A meeting of the friends of this institution was held on Tuesday, at the dispensary, Mr. R. Twinning in the chair. From the report it appeared that the number of patients received during the last quarter was 1326, of which number 223 were visited at their own homes. The best produce of the triennial festival at which the Duke of Cambridge took the chair, after paying all expenses, was stated to be about £400, which had enabled the committee to pay off a debt of £200, with interest. A debt, however, of £300, still remained due to the bankers. The report was adopted, and a vote of thanks given to the chairman.

The Late Disaster to the "Duchess of Kent" Steamer.—The inquest, held at the Town-hall, Gravesend, upon the body of Mr. John Sard, who lost his life by the collision between the *Duchess of Kent*, Ramsgate, and the *Ravensbourne*, Aberdeen, on Saturday, the 7th inst., at the mouth of the Thames, on the first of July last, and by which the former was sunk, terminated on Wednesday last. After a considerable body of evidence had been offered, the jury, after a short consultation, returned into court, and after an absence of nearly two hours they returned into court. The foreman then read the verdict of the jury as follows: "That the deceased, John Sard, came by his death through an accidental collision between the *Duchess of Kent* and the *Ravensbourne* steamers, off North Fleet, on the 1st of July." The jury cannot separate without expressing their feelings in terms of strong condemnation, in consequence of the neglect of the owners of the *Duchess of Kent* not advertising the property of the said John Sard in their [illegible], they having had the means of ascertaining the name from papers found in his pocket when he was taken from the wreck." The professional gentlemen acting for the various parties having severed their examinations to Mr. Hinder, the coroner, for the way in which he had conducted the investigation, and for his courtesy and urbanity, the proceedings of this protracted and important inquiry terminated.

Metropolitan School of Practical Art.—The wood engraving class of the female students of the Metropolitan School of Practical Art, is about to be re-organised and removed from Gower-street to Marlborough House, and to be placed under the direction of Mr. Thompson. Instead of meeting only twice in the week for two hours, the class is to meet daily (except Saturdays) for three hours, and an effort will be made to render the instruction as efficient as possible, especially in the art of drawing.

Births and Deaths.—The births registered in the metropolis for the week ending Saturday the 7th of August were males 751; females, 713; total, 1464. The deaths were 1124. The mortality is near the average of the first week of the month, on which 861 persons died in 1849, and 1009 in 1848, when the epidemic of Asiatic cholera was so fatal. Six hundred and fifty six children under 15 years of age, 299 men and women, and 169 persons of the age of 60 and upwards, died in the week; 597 were males and 527 females. Diarrhœa occasioned the deaths of 23, and cholera of 21 persons—16 of these cases occurred on the north side of the Thames, and 5 on the south. The official report states that "in its leading symptoms the cholera which prevails at present differs little from Asiatic cholera, but it is in London less rapid in its course than Asiatic cholera, it is less influenced by elevation of soil, it always prevails more or less in summer, and comparatively few persons are attacked, hence it is a variety, which for the sake of distinction may be called summer cholera." Dr. Macloughlin, an inspector during the epidemic of 1849, requests the registrar-general to call the attention of medical inspectors to the importance of attending in all cases how long the premonitory symptoms of the approach of cholera preceded the attack in its fatal form. No cases of diarrhœa should be neglected in the present season. They should be immediately treated.

Meteorological Observations.—At the Royal Observatory, Greenwich, the mean height of the barometer last week was 29.379 in. The mean temperature of the week was 63.3°, which is 1.8 higher than the average of the same week in ten years. The mean difference between the dew point temperature and air temperature was 11.8°; although the air was dry, about one inch of rain fell in the same period; and the direction of the wind during the week was from the south and south-west, with an average horizontal movement of rather more than 116 miles each day.

CHURCH, UNIVERSITIES, &c.

ELECTION OF PROCTORS TO CONVOCATION.

Gloucester and Bristol.—On Wednesday, at a meeting of the clergy of the united diocese of Gloucester and Bristol, held in the chapter-room of the cathedral, and presided over by Dr. Phillimore, D.C.L., chancellor of the diocese, the Rev. Dr. Warneford and the Rev. Mr. Huntley were elected Proctors to Convocation by a large majority.

Diocese of Canterbury.—At a meeting of the clergy of this diocese, held on Tuesday, in the south transept of the ancient cathedral at Canterbury, and over which the Venerable Archdeacon Croft presided, it was declared that the election of Proctors had fallen upon the Rev. W. J. Chessbyre, rector of St. Martin's, Canterbury, and the Rev. W. Hodge Mill, D.D., rector of Brasted.

Archdeaconry of Cleveland.—The Rev. S. Gambier, M.A., vicar of Boosall, formerly of Ballio. College, and the Rev. Charles Carter, D.D., rector of Sockesley, formerly of Brasenose College, were elected Proctors.

Archdeaconry of Richmond.—On Friday week the election for two Proctors for the archdeaconry of Richmond, Yorkshire, took place in the parish church; the Ven. Archdeacon Headlam presiding. Three gentlemen were nominated. On a show of hands being taken, there appeared a clear majority for the Rev. C. Dodgson; but the numbers in favour of the Rev. T. Collins and the Rev. L. Oxley being nearly equal, a poll was taken, when the numbers proved to be—Rev. C. Dodgson, 33; for Rev. T. Collins, 12; for Rev. L. Oxley, 12. Some discussion then ensued as to the correct course to be pursued in this emergency; but it was at length decided by the Archdeacon that he should return the Rev. C. Dodgson as duly elected, and state in the return the equality of the other two, leaving it to Convocation itself to decide what course should be pursued.

Archdeaconry of Lindisfarne.—On Monday last, the benefced clergy of the archdeaconry of Lindisfarne, in the diocese of Durham, elected by large majorities, the Hon. and Rev. the Rector of Morpeth, and the Rev. the Vicar of Chillingham, as their Proctors for the ensuing Convocation. Both Proctors expressed their determination to contend earnestly for the synodal rights of the Church of England.

APPOINTMENTS AND PREFERMENTS.—The following appointments and preferments have recently taken place:—*Rectories:* The Hon. and Rev. A. Byron, to Corton Denham, Somerset; the Rev. W. F. Radclyffe, to Tarrant Rawston, with Tarrant Rawston annexed, Dorset; the Rev A. Templeman, to Puckington, Somerset; the Rev. J. O. Parr, to Stanton Wyville, Leicestershire; the Rev. J. White, to Sisley, Norfolk. *Vicarages:* The Rev. J. Lyons, to Tibenham, Essex; the Rev. W. G. Humphry, to Northolt, Middlesex; the Rev. John Thomas, to All-Hallows Barking, in the City of London.

Testimonials.—The following clergymen have recently received testimonials of esteem and regard:—The Rev. O. P. Vincent, curate of St. Michael's, Coventry, on leaving, from the parishioners; the Rev. Archdeacon Bonney, from the Rev. M. Berkeley, of King's Cliffe, on behalf of 225 parishioners and friends; the Rev. T. J. Lee, late curate of St. Mary's Church, Bridgewater, from the parishioners of that town; the Rev. R. Faulkner, incumbent of Hawarden, from the parents of the Sunday-school scholars; the Rev. H. W. Seawell, from the subscribers to the Little Beckhamp-ton Provident Society; the Rev. B. Maturin, from the parishioners of Ridgwood, Hants; the Rev. W. Bowen, curate of the parish church at Leamington, from the congregation and others; the Rev. A. Lloyd, from his friends in and around the parish of Selattyn, on his departure; the Rev. W. Browne, late curate of Elsing, in Norfolk, from the parishioners; the Rev. E. K. Luff, from a portion of the parishioners of Frome St. Quintin, Somerset; the Rev. H. Dupuis, an assistant master of Eton College during a period of eighteen years, from the pupils on his leaving; the Rev. William Harris, vicar of Llandrinney, from his parishioners; the Rev. James Thomas, from the teachers and children of the bible class of the Winslow Sunday-schools.

St. Michael's, Coventry.—The *Coventry Standard* states that the Right Hon. Edward Ellice, M.P. for that city, being highly gratified at the manner in which the St. Michael's Church has been restored, has munificently offered to bear the whole expense of filling the great east window of the noble edifice with stained glass.

Parish Church, Leamington.—The congregation of the parish church at Leamington have presented to the Rev. W. Bowen, curate, a purse of 100 sovereigns. The gift was accompanied by an address.

Extensive Robbery of Gold on board Ship.—Australia.—The *Melbourne Argus* of April 3 contains the following:—"Yesterday morning, at an early hour, two boats, with muffled oars, containing twenty-two men, armed to the teeth, proceeded from the beach at Sandridge to the barque *Nelson*, lying off the lighthouse at William's Town. This vessel, which has recently arrived from Geelong, is bound for London, and on board 8183 ounces of gold. Notwithstanding so large an amount of treasure was deposited in her, no watch was kept, and the pirates succeeded in boarding her, and securing two men and a boy, who were left in the forecastle, before they could raise any alarm. Having dispersed themselves over the vessel, some went aft and seized the chief officer and a friend, together with the carpenter, who were asleep in the cabin, whilst others engaged themselves in throwing overboard all the small arms within their reach, as well as the swivel-guns mounted on the poop deck. Mr. Draper, the chief officer, received a slight wound in the thigh, from a shot fired by one of the robbers, which was the only shot discharged, powering him and his companions, which they soon did, and having lashed their hands together, they commenced plundering the lazarette, of the position of which they appeared to be well acquainted. The second officer, in charge of the vessel, was ashore, and seven only of the crew remained on board. Having secured the treasure of which they were in search, and deposited it in the boats, they took the precaution, before quitting the vessel, of fastening the hands in the lazarette, where it is difficult to conjecture how long they might have remained had they not been released by a seaman, who, in the early part of the fray, during the confusion which ensued, succeeded in secreting himself, and who emerged from his hiding-place when well assured of the departure of the assailants. So soon as the chief officer was liberated from his confinement he proceeded to Williamstown, and gave information to the proper authorities of what had occurred. The harbour-master's and water police boats were immediately manned and proceeded to sea, in the hope of overtaking the plunderers, but they could discover nothing until daylight, when they found one of the boats had a mile from the beach at Red Bluff, broached on the sand, together with the tracks of dray wheels brought there to convey away the plunder. Another boat was found on the beach at Williams Town. Upon the arrival of Mr. Levet, the inspector of water police, on two yesterday morning, with intelligence of the occurrence, Captain Sturt started off with a body of the mounted police, and scoured the country, with the view of discovering what direction the dray had taken after leaving the beach. Up to the hour of going to press last night, we regret to say, no tidings had been heard of them; but it is expected that, in the event of their capture, some of their number could be recognised, though many of them had the lower part of their face disguised in black handkerchiefs, with caps over their eyes."—"April 6. Theresis Hale to aid in reference to the daring act of piracy committed on board the *Nelson*. Yesterday morning, as a companion in our employment, named Mr. Masters, was proceeding to the beach, within half a mile of the hotel, at a short distance from the land, he stumbled over the empty boxes which had contained the gold, and which were concealed in the tea-tree scrub. They are now lying at the watch-house. A fancy pipe was also found close by, as well as a bone shirt, which perhaps may afford some clue to the perpetrators of this daring deed. In the hurried departure of the spoil, some of the gold had been spilt on the place, and several people were employed yesterday afternoon in carrying away the sand for the purpose of washing it. A bag of gold dust was found on Saturday morning, which is believed to have formed a portion of the plunder."

Annexation.—An Englishman, perusing an American newspaper, exclaimed impatiently, on noticing some of Wonder's sensational improvements, "Those people ought to be denied the use of the English language, if they cannot treat it better." "*English* language?" echoed a Yankee, without removing the cigar from between his teeth, "guess you're mistaken, Bub; it's the American language." "American?" repeated the wondering Englishman. "Guess it's that," said Jonathan, coolly, "we've annexed it."

GARDEN FETE, GIVEN BY LORD AND LADY HOLLAND.

GARDEN FETE AT HOLLAND HOUSE.

On Thursday (last week), Lord and Lady Holland entertained a large party of visitors to the grounds of Holland House during the Scottish *fête;* and in the evening was given a superb garden *fête*. For this purpose the gardens, orangery, conservatory, and part of the pleasure grounds were brilliantly illuminated; tiny glass lamps of all hues, and the more fanciful *lampions*, shedding their sparkling lights in every direction among the trees, and the gay parterres, illumined the floral beauties everywhere. The room set apart for dancing was at the end of the orangery, forming the termination to a long conservatory. We believe that erstwhile these buildings formed a part of the stables of Holland House, but a few years since they were altered, and, having been tastefully decorated, form now elegant and useful additions to the garden. Above the room in which the dancing took place, and also above the orangery, the roof of the building is perfectly flat, forming a delightful promenade, which on the evening of the *fête* was lighted by lamps placed in the interstices of the open-worked parapets. An excellent band of musicians was placed in a *loggia* a little above the ball-room, into which the spectators could look through lattice of pierced stonework. The gardens of Holland House are very beautiful; the quaintly-formed parterres filled with rich flowers; the knots and devices of clipped box, with all their quaintness, harmonise admirably with the Elizabethan character of the fine old mansion. Here are parterres in Italian scrolls and devices, and box and dwarf oaks clipped into globes; flower-beds in the forms of a *fox* (in allusion to the family name), and the old English H; the effect of the flowers aided by coloured sand, and the outlines of box-edging. In a parterre near the house, upon a granite column, is a bronze bust of Bonaparte, by Canova, the pillar inscribed with a verse from Homer's "Odyssey;" and in the north garden-wall is an arbour with this distich by the late Lord Holland:—

Here Rogers sat—and here for ever dwell
With me those "Pleasures" which he sang so well.—
Vil. Hd.

Beneath are some lines added in 1818 by Henry Luttrel.

In the French garden, in 1804, was first raised in England the dahlia from seeds sent to the late Lord Holland from Spain.

THE TORQUAY CHORAL SOCIETY'S FETE AT WATCOMBE.

This picturesque *fête* took place on Wednesday, the 28th ult., in the neighbourhood of Torquay, Devon. The site may be described as a grand amphitheatre, formed by a gigantic land-slip. On the north stands a towering precipice of conglomerate, like a bold sea-worn promontory, fissured by the storms of centuries. Beneath and around, the green-sward clothes the *débris* of the rocky avalanche which has rolled downward to the beach, between a second range of precipices and bold swelling hills.

The company included not only the *élite* and a vast assemblage of all classes from the immediate neighbourhood, but nearly an equal number from distant towns. A special train from Plymouth and Exeter brought more than seven hundred persons, whilst great numbers arrived by later trains.

For the performance of music in the open air the form of the ground was admirable. "Here," says the programme, "has Nature in her mighty workings displayed a sylvan dell, whose rocky sides faintly echo the tones which float upon the air." Ably did the Choral Society avail themselves of these advantages. Vocal or instrumental—whether in glee or madrigal or the full-toned choruses—the whole was admirable. "Foresters sound the cheerful Horn" and the "Huntsman's Chorus" were especially effective, and in character with the scene. "Hail, smiling Morn" and "Now is the month for Maying" rolled back the hours, and made the season young again. At sunset, the choir performed in admirable style the bold characteristic music of the Witches formed in admirable style the bold characteristic music of the Witches in "Macbeth," by Locke; followed by "God save the Queen," in full and enthusiastic chorus. "Good Night" formed the finale.

The scene was truly exhilarating: there were between 6000 and 7000 persons present: hosts of lovely children, with garlands on their heads, joined in the merry dance; others tripped it round the Maypole; and beneath a rock was formed the *al fresco* orchestra; whilst aloft upon the rocky point were perched hundreds around a gay flag.

Our Illustration is from a Sketch by Mr. Colebrooke Stockdale, who obligingly acted as honorary secretary to the Choral Society; the musical performances being ably conducted by Mr. Melhuish.

MUSICAL FETE CHAMPETRE AT WATCOMBE, NEAR TORQUAY.

THE SCOTTISH FETE.

The annual gathering for the performance of manly, open air sports took place on Thursday and Friday (last week) in Holland Park. Hitherto, these displays have been almost confined to Highland games but this year the sports and pastimes of England were brought into greater prominence; and, perhaps, this may yet be found a convenient mode for reviving in the public mind a taste for amusements which of late years have fallen into somewhat unmerited contempt. There can be no good reason why now, as in the olden time, feats of strength or of agility should not be made a source of legitimate pleasure to large bodies of spectators, so long as humanity and propriety are not offended.

The entertainments commenced with a Highland reel, very spiritedly danced. Then came "putting" with a 19 lb. iron ball, in which a Highlander named D. Kennedy, achieved an easy triumph, hurling the mass 43 feet through the air. To the putting succeeded some really admirable Cumberland wrestling, by two men named Williamson and Hinde, with finely balanced power and skill. To the wrestling succeeded a morris-dance, nicely performed by a theatrical *troupe*, under the direction of Mr. Flexmore. The morris-dance was followed by single-stick practice, in which Jackson and Newton, the guardsmen, especially distinguished themselves; and then came "The Sword Dance," a Highland terpsichorean effort, wherein a very elastic belt, belonging to the clan M'Intyre, performed prodigies of pedipulation. A sack race followed. Next two French *athletes* in full flesh-coloured circus costume appeared on the platform in front of the stand, and performed many gymnastic prodigies with a finished ease well entitling them to the applause which they received. To them succeeded a revival of some of the ancient chivalric games connected with the tournament. Tilting at the ring is not a very interesting performance; but "the jousts," or lance against lance, was better; the "Behordicum," or sword opposed to lance, a further improvement; sword against sword better still; and the final combat of lances and swords mounted, against the bayonet on foot, was extremely good and amusing. These different encounters took place at two distinct intervals in the afternoon. To the combats of the grand tournament succeeded a dance round a May-pole, 40 feet high, gaily ornamented with garlands and streamers. Mr. Flexmore had arranged this dance so as to represent the weaving of a tartan with the variegated streamers, and the effect of the performance altogether, shared in by 32 people in appropriate costume, and seen under such advantageous circumstances, was extremely pleasing. Another point in the proceedings was the exhibition of the French *canne* and *bâton*—a mild form of the old English quarterstaff practice. The *canne* and *bâton* was followed by a new and extraordinary feat of strength exhibited by the brothers Seigrist, and called "*La Perche*." One of the performers balances on a socket attached to his waist in front a pole 40 feet high, up which, while in an almost perpendicular position, the other nimbly climbs. Having reaching the top he executes summersaults upon it, twists himself about in every possible way, and finally glides down it head foremost. After such a display, "throwing the hammer," which was 17 lb. weight, came off with less *éclat* than usual, though the victor, D. Kennedy, sent it spinning through the air to the distance of 107 feet. The exhibition of hawking, by Mr. Barr, the Scottish falconer, did not prove so attractive as was expected.

Besides the Cumberland wrestling, there was, later in the day, a specimen of the Cornish style. The wrestlers do not grasp each other round the body, but by the hands or collar, and the first effort is to trip, after which victory turns upon a single effort. Mr. Harrison's Indian club exercise must not be omitted among the list of performances. The clubs he now wields are larger and heavier than those of last year; yet he whirls them round his head with perfect ease. A three-legged race, managed by Mr. Flexmore, excited much amusement; as also a jingling match, all but the jingler being blindfolded. But perhaps the most laughable of the entertainments of this class was a race with one half of the competitors on stilts, the rest with their arms and legs tied, and all blindfolded.

MR. HARRISON'S INDIAN CLUB EXERCISE, AT THE SCOTTISH FETE.

We have engraved Mr Harrison's admirable performance—the Indian Club Exercise.

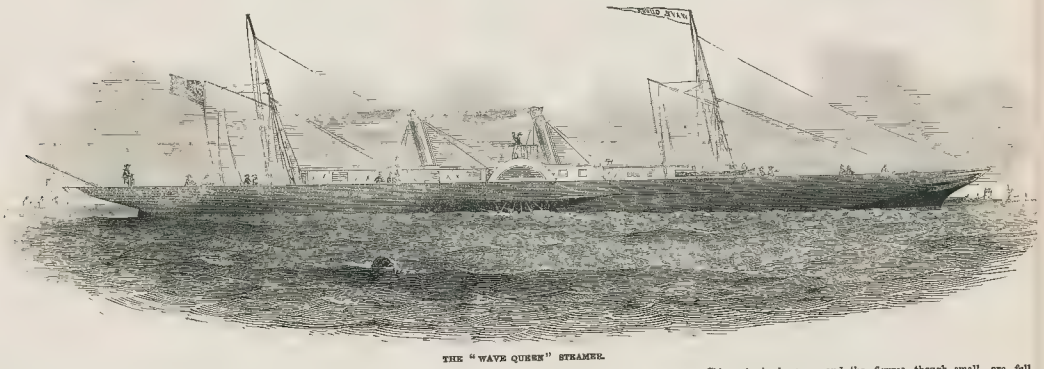
We learn that Mr. Harrison first began to use the clubs three years ago, at which time his muscular development was regarded as very great, his measurement being then:—Round the chest, 37⅛ in.; round the upper arm, 12½ in.; and round the fore-arm, 10½ in. The clubs with which Mr. Harrison commenced weighed about 7 lb. each; he has advanced progressively until he can now wield with perfect ease two clubs, each weighing 37 lb., and his heaviest weighs 47 lb. The effect of this exercise on the wielder's measurement is as follows:—Round the chest, 42½ in.; the upper arm, 15 in.; and the fore-arm, 14 in. At the same time his shoulders have increased immensely; and the muscles of his loins, which were weak when he first used the clubs, are now largely developed and powerful. In short, all the muscles of the trunk have been much improved by this exercise.

PLATE PRESENTED TO CAPTAIN CRACROFT, R.N.

This elegant group has just been presented to Captain Cracroft, commander of the war-steamer *Reynard*, by his friends, British and native merchants in China; in commemoration of the noble efforts made by this gallant seaman to save numbers of his sailors and others, at the imminent peril of his own life, in the shipwreck of his vessel on the coast of China.

In this characteristic design the glass vase to contain flowers is composed of four shells, supported on a stem of coral, lotus leaves, and bloom. Around the stem are grouped figures of Wisdom, supporting Commerce; while Prosperity, the result of successful enterprise, spreads her mantle to catch the gentle winds. Commerce stands by bales of British merchandise, and rests her left arm on a rattan sail, in order to indicate the joint interest sought to be commemorated on this occasion. The pedestal, of a triangular form, bears the inscription, arms, and cypher.

PLATE, PRESENTED TO CAPTAIN CRACROFT, R.N.



THE "WAVE QUEEN" STEAMER.

THE "WAVE QUEEN" STEAMER.

This beautiful steamer, recently launched by Messrs. Robinson, Russell, and Company, at Millwall, is an object of much curiosity as she lies at her moorings, near Greenwich. She has already made the passage to Denmark; and the result of this and other trials has proved her admirable qualities as a sea boat. She is remarkably dry and easy, and fully instances how much may yet be accomplished by the efforts of science in conjunction with steam and iron.

The length of the *Wave Queen* exceeds 200 feet; while her breadth is little more than 18 feet. She is fitted with engines of 80-horse power. Her wheels, which are on the feathering principle, are remarkably small, and, to a casual observer, appear totally inadequate to the propulsion of a boat of such great length: this, however, we are assured is not the case. The fittings of her cabins, &c., are of the most costly description. Altogether, the *Wave Queen*, by her novel and beautiful appearance, cannot fail to call forth admiration from all who see her, differing as she does from anything hitherto seen upon the river Thames.

NEW CHURCH OF ST. MARY, ABBERLEY, WORCESTERSHIRE.

THE HONG-KONG CUP.

The object of this handsome testimonial is thus recorded in its inscription:—

"Presented by the Race Committee to Chas. St. Geo. Cleverly, Esq., Surveyor-General, for his services in the improvements of the Race Course in the Wang-hi-Chung Valley. — Victoria, Hong-Kong, 1852."

The group, representing a mounted race-horse, led by a native of China, is in bronze; and the figures, though small, are full of character, and beautifully executed. The base is octagonal, composed of ebony, and bears tablets of silver containing the inscription, the crest, implements of husbandry, Chinese workmen, and a view of Hong Kong.

"THE HONG-KONG CUP," PRESENTED TO CHARLES ST. GEORGE CLEVERLY, ESQ.

NEW CHURCH OF ST. MARY, AT ABBERLEY, WORCESTERSHIRE.

THE Church engraved upon the preceding page, founded by the pious munificence of the Mosliet family, at Abberley, in Worcestershire, and designed to supersede the old parish church, was, on the 27th ult., consecrated by the Lord Bishop of Hereford, in whose diocese Abberley is situated. The old church, which dates from the Norman period, has for many years been in a very dilapidated condition, but instead of attempting its restoration, which would have been very costly, it was considered more desirable to erect a new edifice When this project was entertained, James Mosliet, Esq., generously gave an appropriate site within a few hundred yards of the old Church, and on the 27th of July, 1850, the first stone was laid by Miss Mosliet, that gentleman's daughter. The architect selected was Mr. Cole, of London, and the execution of his designs was entrusted to Mr. J. Lee, of Birmingham; and the work has been carried out in a manner highly creditable to both architect and contractor. The edifice is in the style of the Early Decorated, or pure Geometrical period, and is composed of a nave, chancel, north and south aisles, with a chapel at the east end of the south aisle, tower with broad spire, sacristy, and porch; the whole being built of hewn stone from Abberley, Elmley, and Ombersley. The porch bears the inscription, "O Lor l, open Thou our lips." The sacristy is placed north of the chancel, and the tower is fixed at the south angle of the west front. In the tower is hung a peal of six bells, three of them brought from the old church, and the other three have been re-cast by Messrs. Mears, of Gloucester. The bells are not, as usual, swung, but by an ingenious mechanical contrivance one man may ring the whole peal by playing with the fingers on a table of keys

The interior of the sacred edifice is arranged in a church-like fashion. The baptistry occupies its proper place in an enclosure near the western door, and contains a handsome carved hexagonal font, the gift of the Misses Mosliet. The rails for the choir is also enclosed at the west end. The aisles are separated from the nave by five arches on either side; the roof is open-timbered, the wall pieces being supported by well-carved corbels, bearing shields inscribed with sentences from the Holy Scriptures. The pews are oak, and the floors of both nave and chancel is laid with encaustic tiles. The prayer-desk is placed on the south of the chancel arch, and the pulpit on the north; the latter is of stone, hexagonal in form, with a cinquefoil-headed arch on each face, and is enriched with a diapered ground and carved spandrils and angles. The Tables of the Law are printed in illuminated characters. The Mosliet Chapel, at the east end of the south aisle, contains a monument to John Lewis Mosliet, Esq, who died in 1845, and which forms a part of the south wall of the chancel. There are also in the chapel a memorial window and a tablet to Lucy Harriot, the wife of James Mosliet. Esq., who died in 1848. The window, which was executed by Mr. Wilmeburst, of London, contains subjects illustrative of four of the acts of mercy, designed by Miss M. A. Cole, the sister of the architect. The sittings will accommodate nearly 400 persons. and all of them are free. The total cost of the erection has been, we understand, about £7000.

The old Church we are gratified to learn, is not to be destroyed; the chancel will be devoted to the purposes of a mortuary chapel, as no burials will take place in the new ground, and it may be hoped that the interesting architectural associations connected with the remainder of the fabric will preserve it from destruction.

At the conclusion of the consecration service, on the 27th ult., the family company departed, some to Abberley Hall, the beautiful residence of Mrs. Mosliet, and others to the rectory, at both of which places an elegant repast was served The children of the schools dined in a tent on the lawn, facing the hall.

CALENDAR FOR THE WEEK.

SUNDAY, August 15.—Tenth Sunday after Trinity. Napoleon born, 1769.
MONDAY, 16.—Assumption of the Virgin Mary.
TUESDAY, 17.—Duchess of Kent born, 1786.
WEDNESDAY, 18.—Bastile died, 1803.
THURSDAY, 19.—The *Royal George* sunk at Spithead, 1782.
FRIDAY, 20.—Bloomfield died, 1823.
SATURDAY, 21.—St. Bernard. Blackcock shooting begins.

TIMES OF HIGH WATER AT LONDON-BRIDGE,

FOR THE WEEK ENDING AUGUST 21, 1852

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
M. A.	M. A.	M. A.	M. A.	M. A.	M. A.	M. A.
h. m. h. m.	h. m. h. m.	h. m. h. m.	h. m. h. m.	h. m. h. m.	h. m. h. m.	h. m. h. m.

ROYAL SURREY THEATRE.—Balfe's new Opera, the Siren, will be produced by A. Harris, Esq., will be repeated every evening till further notice.—Both and Last Times of ALICE MAY.—On MONDAY August 16th, and every evening during the week, to commence with (FOR THE FIRST TIME) the Comedy by Messrs Craven and Rosenthal Carel Barrand, Herr Klickitzer Miss Poole, Miss H Cooney, and Miss Romer. Musical Director, Herr Meyer Lutz To conclude with, all the Scenes in ALICE MAY, and the Last Appeal. Private Boxes £2 2s £1 11s 6d and £1 1s, to be obtained of Mr Kerschner, at the Box-office, from Eleven to Three Stage Manager, Mr W West

ASTLEY'S ROYAL AMPHITHEATRE.—MONDAY, August 16 and during the week PETER the GREAT; or, the Storming of Marienbourg After which the BROTHERS SCHMIDT and La Perche In the Ring To be followed by the wonderful feats of the American Company, just arrived; and the Equestrian Family of ring, who will make their first appearance. To conclude with a Laughable Farce —Box-office open from 11 to 4.

BATTY'S GRAND NATIONAL HIPPODROME, Kensington.—The Season now Drawing to a Close.—On MONDAY, 16th AUGUST, and every Evening, the amusements will commence at half-past Five, with CHARIOT RACING in Three Ladies, the Circles and Fast Reining, Greek Youths Struggling for Liberty, the Ascent of the Rope over the top of the building by Madame Saltier, Double Rope Dancing, Stiles Ascent, the Brothers Elliott, Monkey Boxers Jumping the Hurdles, and other Entertainments TWO BALLOON ASCENTS MONDAY, 16th, and THURSDAY, 19th AUGUST, at half-past Five. Doors open at Five Reserved Seats, 3s.; First Class, 2s.; Second Class, 1s.; Third Class, 6d

DISTIN'S CONCERTS.—Mr. DISTIN and SONS will perform at the HALF or MAY MONDAY 16 h AUGUST, and during the week Vocalist, Mrs Theodore Distin pianist. Mr J Wilson—Letters to be addressed to HENRY DISTIN, Military Musical Instrument Maker, 31, Cranbourne-street, Leicester square, London.

MR. JOHN PARRY'S PORTFOLIO for CHILDREN of ALL AGES.—Mr JOHN PARRY will give the above Entertainment at ST. MARTIN'S HALL, on WEDNESDAY MORNING next, AUGUST 18th, at Three o'Clock; Thursday, 19th; at Worthing, on Friday, 20th; and at Hastings, on Monday evening, August 23rd.

MR. ALBERT SMITH'S ASCENT of MONT BLANC, Illustrated by Mr W BEVERLY, EVERY EVENING, at Eight o'Clock.—Stalls, numbered and reserved (which can be taken from a plan at the Hall every day from Ten o'Clock), 3s; area, 2s; gallery, 1s. Children, Stalls, 2s; area, 1s.
A MORNING PERFORMANCE every Tuesday, Thursday, and Saturday, at Three o'Clock
EGYPTIAN HALL, PICCADILLY.

GALLERY of ILLUSTRATION, 14, REGENT-STREET.—The Grand Moving Diorama, Illustrating the WELLINGTON CAMPAIGNS in INDIA PORTUGAL, and SPAIN concluding with the BATTLE of WATERLOO, is now exhibiting Daily, afternoon at Three; evening at Eight o'clock. Admission, 1s; Stalls, 2s 6d; reserved seats, 3s. Doors open half an hour before each representation

PANORAMA of the CITY of SALZBURG, in UPPER AUSTRIA, and the TYROLEAN ALPS.—JUST OPENED at BURFORD'S large ROTUNDA, LEICESTER-SQUARE, the above splendid View, with its Castle, Palaces Cathedral Churches, Mountains and the surrounding magnificent mountains and lovely valleys The Views of Nineveh, with its Palaces, after a lapse of 3000 years, and of the Lake of Lucerne are also now open. Admission, 1s each view, or 2s 6d to the three views. Schools half price. Open from ten till dusk.

THE GOLD FIELDS OF AUSTRALIA.—The New MOVING PANORAMA, painted by J. PROUT, from the sketches made upon the Spot, and at the Mining Republic of BALLARAT, and at the Newest Diggings in VICTORIA. Also the Scenery on the passage out. Views of Melbourne, Geelong, Port Phillip Heads, Cape of Good Hope, South Sea Whale Fishery, Melbourne, Ballarat, Mount Alexander, Forest Creek, Bendigo, The Black Hill, Mount Korong, Mount Ararat, Other Encampments of Gold Diggers by Moonlight At 8h, 3s; area, 2s; gallery, 1s. Children half price. Admission 1s; Reserved Seats, 2s; Gallery, 1s. At Two and Eight o'clock.

ROYAL POLYTECHNIC INSTITUTION.—LECTURES.—By J. H. PEPPER, Esq., on the Australian Gold Districts: and also on the Adaptation of the Barton Blow-Air By Dr Bachhoffner on the Patent Portable Gas Fire; and on the Mode of Preserving Fresh Provisions By Mr Crosse, on Morse's Patent Needles. By Mr. Newton, Esq., on Morse, Hughes's and Bain's Electric Telegraphs, Assisted by Messrs. Newton, R.A. of Maidenhead Dissolving Views. Microscopes, &c. &c. Open from Ten in the Morning till Half-past Ten at Night.

THE ZOOLOGICAL GARDENS, Regent's Park, are OPEN to VISITORS DAILY. The Collection now contains upwards of Fifteen Hundred Specimens; including two fine Chimpanzees, the Hippopotamus (presented by his Highness the Viceroy of Egypt), Elephants Rhinoceros, Giraffes, young Leopards, and Polar Bears. Boa-constrictors, Camels, Zebras, Lions, Tigers Jaguars, Bears, Cariboos and the Aperyx presented by the Lieutenant-Governor of New Zealand All visitors are now admitted to Mr Gould's collection of Hummine Birds without any extra charge The Band of the First Life Guards will perform, by permission of Colonel Nail, on every Saturday, at four o'clock, until further notice. Admission, 1s. on Mondays, 6d

THE FETES AT PARIS.

ON SATURDAY NEXT, AUGUST 21, WILL BE PUBLISHED

A GRAND DOUBLE NUMBER

OF THE

ILLUSTRATED LONDON NEWS,

CONTAINING

A SERIES OF ILLUSTRATIONS

OF THE

GREAT FESTIVALS AT PARIS.

ALSO, SKETCHES OF

HER MAJESTY'S VISIT TO BELGIUM,
The AUSTRALIAN GOLD DIGGINGS,
SCENES in the KAFFIR WAR,
The NEW CRYSTAL PALACE at SYDENHAM,
And all the News of the Week.

The price of the DOUBLE NUMBER will be ONE SHILLING.

LONDON and NORTH-WESTERN and MIDLAND RAILWAYS CHEAP EXCURSION to the MIDLAND and NORTHERN COUNTIES, and to YORK RACES NEXT TUESDAY, AUGUST 17th, at 8 15 A.M., a SPECIAL TRAIN will leave EUSTON STATION for the following places, at the fares stated

	First Class	Covered Car.
To Leicester and back	18s 0d	8s 6d
To Derby, Nottingham, or Newark and back	20 0	10 0
To Masbrough or Rotherham and back	24 0	12 6
To Sheffield or Normanton and back	36 0	18 0
To YORK or Leeds and back	36 0	20 0
To Bradford or Skipton and back ..	40 0	21 0
To Scarborough and back	42 6	21 0
To Morecambe and back	42 6	22 0
To Darlington and back	50 0	24 0
To Durham and back	55 0	27 0
To Newcastle and back	60 0	30 0

Tickets will be available for returning any day (except Sunday) up to September 7th.
For fu.l particulars, apply (if by letter, with stamp for answer) to the Manager, Mr T COOK, of Leicester; at the Waterloo Dining Rooms, 14, Seymour-street, Euston-square; or at Perth's Hotel, 33, Ludgate-hill.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, AUGUST 14, 1852.

THE Cape of Good Hope continues to be a thorn in the side of the British nation, and threatens to be a source of as long protracted trouble, expense, and loss of dignity to us, as Circassia is to Rus-ia, or as Algeria was to France. The last arrivals from the colony repeat the old story, but in an aggravated form. The new Commander-in-Chief finds himself in the same position as that in which Sir Harry Smith was so continually placed. He is involved in a desperate and apparently interminable struggle with enemies whom he cannot meet in fair combat, but who every now and then prove their existence in some unexpected spot by falling upon detachments of the British force, and "picking off" his officers and men. The frontier is too wide to be occupied; the Kaffirs too agile to be caught, and too numerous to be beaten; while, to crown the mischief, our native allies are not to be depended upon, and sometimes openly aid that vexatious and indestructible enemy to whose arms they always wish success. The Kaffirs do not act upon the defensive alone, but appear, unheralded, almost in the very centre of the colony, and after burning their heads, killing the inhabitants, and driving off cattle, disappear amid the mountains, and defy General Catchcart to discover their whereabouts. Perhaps the most dispiriting part of the whole business is the fact, that Great Britain can neither prosecute nor abandon the war with advantage. We must not attempt to exterminate the savages, for that would be cruel and unchristian; but we must carry on a civilised war against an uncivilised enemy, and submit to expenses and the blood of our brave soldiers in a struggle from which there is positively nothing to be gained, let it end which way it will. It is just possible that, if the colonists were properly and finally conciliated by the Home Government, and allowed to deal with their enemy in their own way, without reference to orders from England, the Kaffirs might even yet learn a lesson of sufficient severity to keep them quiet for the future. At the present time, however, it must be admitted that the prospect of either one solution or the other is not very encouraging.

The anomalies and injustice of the transportation system pursued by this country have been often pointed out; but they have seldom received so striking an illustration as that afforded by some recent letters from Australia. Whether we have a moral right to flood a distant portion of the earth with the vilest and most incorrigible portion of our population is a question that has long since been decided in the negative by those who have studied it. Whether it is expedient or politic to do so, is another question on which public opinion has pronounced itself in a manner almost equally as strong. The care and the reformation of our criminals are duties that ought strictly to devolve upon ourselves; and we have no justification whatever for burdening or attempting to burden our colonies with them. The justification that Robin Hood might have pleaded when he robbed the Bishop of Hereford, namely, that he was strong enough for the purpose, is not sufficient; because, although we may have strength enough to expel our criminals upon, and to retain them in, a colony, we have not strength enough to compel the colony to fulfil its delegated duty. The criminals, therefore, remain unreformed. The colony becomes degraded in the first place, and discontented in the second; while a third and greater evil is in some instances produced. Positive encouragement is afforded to crime. The expatriated thief and scoundrel has a better chance of making his fortune than the poor man who has not "qualified" by offences against the law for his free transmission over the Atlantic or the Pacific. But these are different, though equally important questions. On the first mentioned we learn, by a very sharp remonstrance addressed to the Colonial Secretary, that the Australians are not disposed to submit to any further contamination from this country. The *Aboukir* convict ship having brought nearly 300 prisoners to Hobart Town, most of them with tickets of leave, the council of the Southern Tasmanian branch of the Australasian Anti-Convict League addressed the following document to Earl Grey, the colonists not having received information on the day of its date (the 27th of March, 1852), of the change of Ministry in England:—

My Lord,—We, the undersigned, as the Council of the Southern Tasmanian Branch of the League, had the honour to transmit to your Lordship, on the 27th January last, a protest against the introduction of prisoners into this colony, and we now enter the like protest against the renewed breach of faith committed by her Majesty's Government in pouring into this colony 279 convicts from the *Aboukir*, recently arrived from London. In making this protest, we beg to assure your Lordship that we are not weak enough to suppose that any regard for good faith, or sense of justice, still less any care for the welfare of the Australian Colonies, will influence your Lordship's conduct; but your Lordship may form some idea of the feelings of the colonists in reference to transportation from the proceedings of their representatives, who, in giving expression to those feelings, have merely discharged the trust reposed in them; and we beg to suggest to your Lordship that, if the continuance of the unprincipled and wicked policy hitherto pursued should sever these colonies, with their newly-discovered and incalculable wealth, from the parent state, your Lordship may possibly be held amenable for their loss. We have the honour to be, my Lord, your most obedient servants, T. D. Chapman, M.C., J. Dunn, M.C., A. M'Naughtan, W. Crooke, W. Rout, J. Allport, H. Hopkins, E. Officer, F. Haler.

It may be said that this remonstrance is too violent; but the country should, and will, remember that it is in the wrong; that the colonists have only too much reason for their indignation; and that a less cause of complaint once proved sufficient to bring about the independence of a still more splendid colony. When we recollect, also, that these felons with their tickets of leave—sent out free of expense to themselves—can procure almost immediate employment, at twice or thrice the wages that honest men receive in England; and that they have, moreover, a chance of obtaining or taking permission to run to the diggings, the gross injustice to our own honest poor at home becomes even more flagrant than the injustice of our conduct towards our colony. The subject is no doubt a very difficult one; but difficult or the reverse, the rulers of this nation are equally bound to take it into their immediate and serious consideration, unless they will incur the risk of immediately dismembering the empire, or of producing a chronic dissatisfaction that will lead to the same result at some future period.

COURT AND HAUT TON.

ROYAL CRUISE.—VISIT OF HER MAJESTY TO BELGIUM.

Her Majesty has this week paid a visit to her Royal kinsman, Leopold, King of the Belgians. The weather, unfortunately, has not been so propitious as that which her Majesty usually enjoys in her Royal progresses, whether upon sea or upon land; and on Sunday, the day on which her Majesty had intended embarking on board the Royal yacht, the weather was so tempestuous, that the Queen did not venture on board. The delay thus arising in her Majesty's departure caused the excursion to be considerably modified, it having been originally intended to embrace the Channel Islands in the circuit of the Royal cruise

On Monday evening, about seven o'clock, the weather having considerably moderated, the Royal party, consisting of her Majesty, Prince Albert, the Prince of Wales, Prince Alfred, the Princess Royal, and the Princess Alice Maude, proceeded on board the Royal yacht, then lying off Osborne. There were in attendance the Countess of Gainsborough, the Hon. Miss Byng, Lord Colville, Colonel Bouverie, and Sir James Clarke.

The steam squadron on the occasion manned yards, dressed ship, and fired a Royal salute of 21 guns from each vessel. The Royal party dined and slept on board on Monday night, and

On Tuesday morning at seven o'clock, the Royal yacht, with the Royal steam squadron and the armed escort of deep sea steamers got under way, the Dover steam-packet, the *Vivid*, taking the lead. The *Victoria and Albert*, Lord Adolphus Fitzclarence, followed, bearing the Royal standard at the main and the Admiralty flag at the fore; then the *Black Eagle*, with the First Lord of the Admiralty, the Duke of Northumberland; the *Fairy*, Captain Grispin, came next. These formed the Royal squadron. They all had their leading sails set, except the *Fairy*. The armed escort formed line in the following order: *Odin*, 16, Captain W. B. Henderson, C.B., first; *Magicienne*, 16, Captain Ramsay, second; the *Barracouta*, 6, Captain the Hon. S. T. Carnegie, third; the *Sampson*, 6, Captain Lewis T. Jones, fourth; and *Retribution*, 28, Captain the Hon. J. R. Drummond, last. These were all under plain sail except the *Retribution* and *Magicienne*, which added studding sails. On coming up to Spithead the *Tiger*, *Birkenhead*, and *Niger* fired Royal salutes, the two former also manned yards and dressed ship. The whole squadron being under canvass as well as steam, presented, in the bright clearness of the early morning, a very beautiful spectacle from the shore, and many, even at that early hour, were assembled on the walls and beach on either side of the water to get a view of the Royal pageant. The *Nab* light, a distance of about ten miles from the starting-point of the squadron, was run in about forty minutes by the *Victoria and Albert*, the *Vivid*, the *Fairy*, and *Black Eagle*, the larger ships being left somewhat behind. The *Vivid* well sustained the lead as *avant courier* of the squadron, whilst the *Fairy* and *Black Eagle* kept well up with the *Victoria and Albert*, which had a fore-topsail set, and was pressing on at the top of her speed, a slight haze prevailing, the squadron began to get undistinguishable at about half-past eight o'clock, when the *Vivid* was still ahead, and the *Victoria and Albert*, *Fairy*, and *Black Eagle* in the positions already stated; whilst of the large steamers the *Retribution* appeared about a mile and a quarter astern of the Royal yacht; the *Sampson*, *Odin*, and *Magicienne* about two miles astern; and the *Retribution* nearly four. At nine o'clock the leading vessels of the squadron were out of sight, running towards the Downs at a rapid rate, having accomplished in the first hour after their start from Osborne a distance of about 14 miles.

Shortly after four o'clock in the afternoon the Royal squadron appeared off Dover. The *Vivid* led the way, followed by the *Victoria and Albert* and the *Fairy*. The *Black Eagle* and the remainder of the squadron were far astern. The Royal yachts went into the Downs, anchoring shortly after five o'clock P.M., abreast of Deal and Walmer. The Royal standard was immediately hoisted on Walmer Castle and on the Naval Hospital buildings, and a Royal salute fired. Shortly afterwards his Royal Highness Prince Albert went on shore and visited his Grace the Duke of Wellington, at Walmer Castle, where, after a short delay, his Royal Highness returned to the Royal yacht. Throughout the evening the towns presented a most animated appearance, the various small craft in the neighbourhood displaying their flags, while the vessels of the squadron were gaily decorated; and afloat and on shore a crowd of sight-seers thronged every available spot whence a good view of the Royal yacht could be obtained. The houses of Walmer were illuminated as night, and altogether much gaiety was manifested during the evening.

On Wednesday morning, at six o'clock, the Royal party weighed anchor under a Royal salute from Walmer Castle, and proceeded towards the Belgian shore, in the direction of the Scheldt. The squadron arrived in the evening, at about seven o'clock, at Antwerp. His Majesty the King of the Belgians reached Antwerp from his palace at Laacken at a quarter to eight o'clock, and immediately went on board the Royal yacht, and joined the Royal dinner-party. The Royal squadron remained at anchor in the Scheldt on Wednesday night; and on Thursday morning her Majesty went on shore at nine o'clock, and, amidst the rejoicings of his Belgian Majesty's subjects, proceeded to Brussels, and thence to the palace at Laacken, where the Royal party arrived at eleven o'clock.

Her Majesty, it is expected, will return to Osborne on this day (Saturday).

Her Royal Highness the Duchess of Kent, accompanied by their Serene Highnesses the Princess Hohenlohe and the Princess Adelaide of Hohenlohe, and attended by Sir George Couper, arrived at Clarence House, St. James's, at three o'clock on Saturday, the 7th inst., from Osborne. Her Royal Highness and party have since left town for Abergeldie, N B.

Her Royal Highness the Duchess of Gloucester is at present staying at the White Lodge in Richmond Park.

His Excellency the Russian Minister, and the Baroness Brunnow, have during the past week been entertaining her Imperial Highness the Grand Duchess Catherine of Russia and her consort his Highness the Duke George of Mecklenburg-Strelitz.

The Duke and Duchess of Somerset received a distinguished party at dinner on Saturday evening, the 7th instant.

The Marchioness of Exeter and Lady Mary Cecil have gone on a tour in Germany.

The Earl and Countess of Eglinton purpose entertaining a distinguished company at Eglinton Park, county Ayr, during the ensuing races.

MARRIAGE IN HIGH LIFE.—The marriage of the Right Hon. Lord Carbery to Miss Shoolbraud, daughter of General Shoolbraud, took place on Thursday, the 5th of August, in the cathedral church of St. Finbar, Cork, in the presence of a brilliant circle of relatives and friends. The ceremony was performed by the Hon. and Rev. T. Bernard, rector of Kilbegan, assisted by the Lord Bishop of Cork and other clergymen.

The *Gateshead Observer* lately mentioned a rumour of the demise of the Rev. of Lanercville We are happy to say the report is unfounded.

Lady Ernestine Edgcumbe, the only daughter of the Earl and Countess of Mount Edgcumbe, had the misfortune last week to fall on the slope of the terrace at Cotheli, and broke her arm just above the wrist.

POSTSCRIPT.

NORTH-WESTERN RAILWAY COMPANY.—The ordinary half-yearly meeting of the proprietors of this company was held on Friday at twelve o'clock, at the Euston-square station; Mr. Glyn, the chairman of the company, in the chair. There was a numerous attendance of directors and shareholders. The statement of the half year's accounts showed a disposable balance of £618,206 16s. 4d.; and the directors recommended a dividend of £2 15s. per cent, for the six months, amounting to £346 903 13s. 6d., leaving a balance of £68,303 2s. 10d., to be carried forward to the next half-yearly account. After some discussion the report was agreed to, and a dividend of £2 15s. per cent. declared for the half-year.

PROCLAMATION OF OUTLAWRY.—On Thursday, at the Sheriffs' Court, Red Lion-square, Mr. Hemp, the principal officer to the Sheriff of Middlesex, proclaimed the following persons as outlaws:—The Rev. J. Prendergast Walsh; E. H Lane, at two suits; Sir J. Malcolm; Algernon Bassingbard, at four suits; William Thomas Thornton, at two suits; G. H. Simpays, G. A. Laing, Augustus Mayhew, William Wilson, Wil iam D. Saerif, F. Smith, William Burt, Sidney William Alston, F. J Mannuge, J Armine Morris, J Cruikshank, Walter Lockhart Scott, G. Spieler; F Angerstein, at two suits; Edward Addison, H Baddely, Margaret Coleman, G. Chitty, J. D. Hinxman, Augustus Nugent, and Edward J. Dare.

THE RUSSIAN EMBASSY.—We understand that the seat of the Russian Embassy is about to be removed from Ashburnham House to Chesham-place, the lease of the former having expire!

THE "SEVERN" STEAMER.—This mail steamer, which arrived at Southampton on Thursday evening, from South America, has had a narrow escape from destruction. On her voyage to England she caught fire, supposed to be from the carelessness of one of the crew, when, having been immediately discovered, was soon put out, or the *Severn* probably would have shared a similar fate to the *Amazon*.

THE GALE.—On Thursday most disastrous accounts were received from the several coast-guard stations on the south and west coasts. The gale is described as fearful, and such as has not been experienced in the Channel for many years, with a most tremendous sea. The storm was so violent from south to south-west that the tide did not ebb twelve feet from the shore (as was the case on Tuesday). During the whole of Wednesday night and Thursday, Portsmouth was visited with a truly awful gale—in the night amounting to a hurricane, which shook the houses in the town. The sea dashed over the ramparts, and flooded the beach, where no wall checked its advance, inundating the cellars of the houses and damaging merchandize stored in such places. The shipping seems to have suffered materially in the rigging, though we have heard of no fatal casualties. The sea seemed literally boiling, and heavy showers of rain fell at intervals, accompanied by loud peals of thunder and flashes of lightning. Dublin was visited by a severe thunder storm on Wednesday evening. Rain fell in torrents, and there were occasional claps of thunder. From six to nearly eight o'clock clap after clap followed at brief intervals. During the period the greatest alarm prevailed, but no casualty to person or property occurred. The following morning was calm.

MILITARY PRISONS.—It appears, according to the report of Lieut.-Colonel John, Inspector-General of Military Prisons, on the discipline and management of those establishments during the year 1851, that there has been a gradual decrease in the number of prisoners admitted during the last five years.

LUSUS NATURÆ.—A leveret was found lately on the estate of H. Corbet, Esq. of Adnington Hall, having one perfect head and two bodies, with eight legs perfect.—*Worcestershire Chronicle*

THE STOCKPORT RIOTERS.—*Thomas Feeny*, aged 21; *Patrick O'Hare*, 30; *Roger M'Dermot*, 50; *Michael M'Dermot*, 15; *Thomas Murphy*, 30; *Thomas Garvey*, 29; and *Patrick Naughten*, 18, were tried on Thursday, at Chester, before Mr. Justice Crampton, on an indictment which contained several counts, for a riot at Stockport on the night of the 29th of June last. After the examination of several witnesses, the Jury returned a verdict of "Guilty" against all the prisoners on the first and second counts, which charged them with rioting; and *Murphy* was found "Guilty" on the count for malicious wounding. Sentence was deferred

FIRE AT STEPNEY.—On Friday morning between three and four o'clock, a fire broke out in the premises of Mr Cowles, batmaker, Luke-place, Jubilee-street, Stepney. After an hour's hard work the fire was extinguished by the firemen, but, however, until the shop and contents were destroyed, also the furniture, &c., of the upper rooms partly consumed and damaged. A similar loss occurred also at three years ago. Insured in the General and Provident Fire Offices. Cause unknown

FATAL ACCIDENT IN WIMBLEDON PARK.—Mr. William Gale, a gentleman of property, residing in Broadhy, was drowned on Wednesday afternoon, in the large fish-pond in Wimbledon Park, while bathing in it. He had been for several days previously staying at an inn in the neighbourhood for the purpose of enjoying the pleasure of fishing in the pond.

RELEASE OF ABD-EL-KADER'S BROTHERS.—The *Journal d'Indre et Loire* states that on the 16th inst, five of the Arab families who were taken prisoners and brought to France with the ex-Emir, Abd-el-kader, quitted the Chateau d'Amboise, where they have been detained, in order to return to their native country. These five families, comprehending about twenty-five persons, left under the conduct of M. de Brunier, captain of the 41st regiment of the line, destined as his escort. M. Charles Gabaud, interpreter, by the side of the cook coach, which was to conduct them to Chateaurenx. From Chateaurenx they were to be led, by Nevers and Lyons, to Marseilles, where they would embark for Algeria. Among the prisoners who are thus about to recover their liberty are the four brothers of Abd-el-Kader Sidi-Mohammed-Said, Sid el-Mustapha, Sid-Hezasdin, and Sid-Hamed—but none of the *Kalyfas* of the Emir. On the eve of departure, the number of the *détenus* at the Chateau d'Amboise will be reduced to forty persons

THE PORTUGUESE TARIFF.—According to intelligence from Lisbon, dated August 5th, a commercial treaty is at present in course of negotiation between Portugal and France. Two decrees have recently been issued by the Government—one having for its object a reduction of import duty on tea, and the other the abolition of the salt monopoly at St. Ubes; neither of which measures, it is supposed, would have received the approval of the Cortes had it been sitting. It is expected that the import duty on port wine will be immediately equalised by the Portuguese Government. Such a determination will prove of great advantage to this country, as that luxurious beverage is charged higher duty here than when shipped to any other part of the globe.

RECENT DISASTERS IN TURKEY (ASIA) announce the destruction of a great part of that city by earthquake.

LATEST FOREIGN NEWS.

FRANCE.

The accounts of yesterday (Friday) from Paris are of little interest. It is understood that Louis Napoleon will not visit Bordeaux until the 15th of the month; and towards the close of that month the inauguration of the statue of the Emperor will take place at Lyons, at which he intends to be present.

A decree of the *Moniteur* abrogates that of the 16th June, 1848, which confined the lieutenants of the first class the capacity of taking command at sea, and extends it to lieutenants of the second class, of two years standing. The report of the Minister explains the policy of the decree, that it is good to exercise young officers in early habits of command.

A member, named Philibert Duchesne, has been condemned by the Correctional Tribunal to 13 months' imprisonment and 100f. fine, for using threatening language in reference to the Prince President.

THE RIVER PLATE

Advices were received yesterday (Friday) from Buenos Ayres to the 1st of July, from which we learn that General Urquiza had declared himself Provisional Dictator, and in that character had suppressed the newspapers, dissolved the Chamber of Representatives, and ordered four of its more violent members out of the country. He then commanded the delegates of the states of the Argentine Confederation to meet in the present month (August), to select the first President, and to settle the terms of the Constitution. The spread of a spirit of Demagoguism, analogous to the revolutionary Socialism which prevailed on the continent of Europe during the years 1848-49, is given as the cause of this *coup d'état*. The city was in an apparently tranquil state, though a rankling feeling of discontent, it was thought, lies buried underneath.

MONEY ORDERS.—NEW REGULATION.—An order has been issued by the Postmaster-General to the following effect:—1. On and after the 1st of September, 1852, an additional commission will be charged in every case of transfer or re-payment of a money order. 2 The payment of the additional commission, viz 3d. on all sums not exceeding £5; and 6d. on all sums above £5 and not exceeding £20 and £5, must be invariably made by postage stamps transmitted with the application for transfer or repayment; and unless the amount be so transmitted, the application will not be complied with. 3. All applications for transfer or repayment must be addressed to the president of the London, Dublin, or Edinburgh Money-order Offices, according as the order was issued in England (or Wales), Ireland, or Scotland. 4. In the event of the transfer, in consequence of an order being erroneously drawn on a different office from the one at which payment is desired, the public are advised to furnish in writing to the issuing postmaster, at the time of application, the full particulars of the money order required, and also to ascertain, before quitting the issuing office, that the order corresponds with those particulars.

LATE ROBBERY AT THE CHANCELLOR OF THE EXCHEQUER'S RESIDENCE.—On Tuesday notice was issued, offering £5 reward for the discovery of the parties who had broken into the vinery of the Right Hon. Benjamin Disraeli, M.P., at Hughenden House, Bucks; and, besides stealing and carrying off a large quantity of ripe grapes and cucumbers, had thrown open the pit frames and done considerable damage.

LAW AND POLICE INTELLIGENCE.

THE KING OF THE BELGIANS *v.* PERREE.—On Saturday an action was tried at Guildford, before Mr. Justice Maule and a special jury, by which his Majesty ought to recover damages for the improper cultivation of a farm, and to recover a sum of money borrowed by the defendant to the King's use. It appeared that the farm in respect of which the claim arose belonged to the estate of Claremont, vested by the country in his Majesty. The present defendant had occupied the farm since 1840, when he applied to the bailiff of the Royal plaintiff to allow a portion of the valuation to remain as a charge on the farm, and he now contended that he was not now liable to pay the amount. Evidence having been given on both sides, the jury returned a verdict for the plaintiff —Damages, £65 10s.

ESTHOPE *v.* ESTHOPE.—A DISPUTED WILL.—An application was made to Sir John Dodson, the Judge of the Prerogative Court, on behalf of Miss Elizabeth Esthope, to obtain probate of a will made by her brother, Mr. John Esthope, on the 25th of February, 1844, by which the testator gave legacies of £500 each to Mrs. M'Gillivray and Mrs. Doyle, two of his sisters residing horses and carriages to Sir John Esthope, his father, and the remainder of his personal property, which was estimated at £15,000 (with some trifling exceptions) to the applicant, Miss Elizabeth Esthope The testator died on the 9th of January, 1849, a bachelor, leaving his father, the only person who would have been entitled to his personal estate and effects had he died intestate. In the latter part of 1846 the testator became insane, and by a commission *de lunatico inquirendo* he was placed under restraint, and his father was appointed committee of his person. From that period up to the time of his death he continued a lunatic. The present application was opposed by Sir John Esthope on the ground that there was some doubt of the existence of the will at all, because it could not be found; but, from evidence adduced it was clearly shown that such a will had been really in existence, and also there was presumptive evidence to show that the will was destroyed by the testator's own hand while apparently in a fit of anger because he could not get his solicitor to alter the draft of the will as to have his father removed from being the executor. The arguments in this case occupied several days. On Tuesday last the Court gave judgment, deciding that it must be held such a will had been in existence, and, therefore, that probate must be granted upon it; thus deciding in favour of the applicant, Miss Esthope, each party to bear their own costs.

ACTION FOR LIBEL.—At the Edinburgh Jury Court, second division, Mr. William Scouller, a pawnbroker in Glasgow, sued Mr. Robert Gunn, of the same city, the proprietor of the *North British Mail*, for an alleged libel in the report of a proceeding at the Glasgow police-office. It was stated that the plaintiff and his partners were placed at the bar charged with refusing to give up certain stolen property; and then was added this statement: "One of the prisoners was exceedingly contumacious, and asserted perfectly determined resist the ends of justice as far as lay in his power. They were, however, obliged to disgorge their ill-gotten pledge." The jury awarded £50 as damages. The damages laid by the plaintiffs were £800

IMPORTANCE TO EMIGRANTS.—On Tuesday, Mr. Mansfield, the stipendiary magistrate of Liverpool, gave his decision in a very important case which was heard before him on Saturday. The point involved was, whether the charterer of an emigrant ship is liable, in case of the detention of the ship under certain circumstances beyond its appointed day of sailing, to the passengers for the return of the passage money and compensation for loss of time. The complainant was a person named M'Tark, who, with others, had taken passage in the *City of Lincoln* for Australia, and the defendant was Mr. J. Johnson, the charterer of the vessel. Johnson had failed to pay the whole of the contract money to the owner, who detained the vessel in the river fifteen days beyond the specified day of sailing. It was contended for the defendant that he was not the cause of the detention of the passengers in the sense of the 23d section of the Act of Parliament, recently passed for the protection of emigrants. Mr. Mansfield decided that the plaintiff was entitled to his passage money, and something as compensation—£15 passage money and £3 compensation to be paid immediately.

EMIGRANTS AND EMIGRATION AGENTS.—On Tuesday last, Mr. Thomas Woolley, of Cullum street, Lime-street, ship-agent, appeared at the Mansion House, in accordance with a summons issued under the provisions of the Passenger Acts Act, 1849, 12th and 13th Victoria, c. 32, s. 32, for the return of a deposit of £10 10s., and for compensation for breach of contract to convey Mr. H. F. Bastard, of Portlea, to Port Phil p, Australia, by the ship *Prince Alfred*, advertised to sail on the 7th of July last. There were several emigrants present who were stated to have similar complaints, and the case attracted a great deal of attention. Much evidence was gone into on the part of the complainant to show the great inconvenience and expense he had been put to by the unreasonable delay in the departure of the ship, the vessel, though advertised to sail on the 7th of July, and again on the 21st of July, not being at the present time ready for sea; while, on the part of Mr. Woolley, it was endeavoured to be shown that the delays in the departure of the vessel were inevitable and beyond his control, that she would sail on the next day but one (Thursday last), and that he was willing to return the deposit money, &c. Business to the complainant, and also to allow him his day for each day of the delay, an amount which the defendant rejected as being wholly inadequate, claiming at least a compensation of £10, the remuneration provided by law. The complainant, when asked why he would not prefer going out at once with the ship on Thursday, to incurring a further delay by seeking another vessel, stated that he apprehended that in consequence of his having taken the active part that he had in bringing the matter forward for a legal decision he would be an object of resentment on board ship, and he treated with harshness at a time when, far away from land, he could possibly obtain no redress, and he therefore declined altogether going out in the defendant's ship. The case occupied the greater portion of Tuesday and Wednesday, and ultimately, as there were several cases of the same kind appertaining to the same ship depending upon the decision of this one, it was agreed on both sides to leave the matter to the arbitration of Captain Lean, the well-known Government emigration agent, both as to the terms of recompense due to the complainant and other emigrants, and as to whether they should accept a passage in the defendant's ship.

EXTENSIVE ROBBERY.—On Monday information was received at the Metropolitan Police-station, of an extensive robbery having taken place at Messrs. Gowa and Beaver's, merchants, 12, Mark-lane, City; upwards of 200 pounds of various kinds having been carried off, besides purses, &c. In a few hours afterwards Sergeant Godfrey, of the F division, apprehended two suspicious-looking men he met walking through Blackman-street, Borough; upon the person of one of whom he discovered a case containing 48 brooches, and a large part of the stolen property. It appears that the men, after committing the robbery, met a Jew at a lodging, to whom they disposed of the whole of their booty, but while his back was turned for a minute they succeeded in secreting the 42 brooches found upon them, their cupidity thus proving the means of their detection.

GUILDHALL.—On Wednesday the unusual circumstance occurred at this court, of what is termed a maiden sitting, of the energy-sheets from the several police stations comprised within the district not presenting a single charge or prisoner, either for drunkenness, disorderly conduct, or felony; and the only business to be transacted was two summonses for cases of assault. This occurrence, by an ancient custom, entitles the sitting alderman and the chief clerk to claim a pair of white kid gloves; and some time since Mr. Alderman Sidney inserted upon the custom being carried out, and sent Rec. the officer of the court, at once to purchase the gloves out of the office funds.

DISTRIBUTION OF MEDALS TO THE POLICE FORCE OF LIVERPOOL.—The officers and men of the Liverpool police force, whose conduct on the day of service have been deemed worthy of some special mark of approval, have lately received from the hands of Mr. J. A. Tobin, chairman of the Watch Committee, silver medals, or more bars according to the length of time each man had been in the force—each bar denoting five years' service, dating from the amalgamation in 1836.

GREAT WESTERN RAILWAY.—On Thursday the half-yearly meeting of this company was held at Bristol, C. Russell in the chair, when a most important report was read, including the announcement of a negotiation between the London and North-Western and the company. The London and North-Western directors propose the amalgamation of the two companies, and agreements of either company with other companies to be acknowledged and stand on the same footing. This the Great Western directors object to, but offer to enter into arrangements for preventing competition, and a division of northern traffic from places which both lines either do or will hereafter touch. The report was adopted, the dividend of 4 per cent. declared, and the directors authorised to take the preliminary steps for making a new railway from Weymouth to Dorchester, in order to protect the company from the threatened opposition of the South-Western.

MIDLAND RAILWAY.—From the accounts of this company it appears that the last half year's receipts (including the balance from the previous half year of £30,953 14s 9d.) amounted to £625 884 11s. 6d., and the expenditure to £466,943 19s., leaving a disposable balance of £158,940 12s. 6d. The proposed dividend on the old stock is at the rate of 3 per cent. per annum, reducing the balance to £3154 2s. 10d

ANNUAL REPORT OF THE REGISTRAR-GENERAL.—In the 13th annual report of the Registrar-General of Births, Deaths, and Marriages, for the year 1850, has been printed, pursuant to the General Registration Act The abstract of marriages shows the following statistics:—The total number of marriages registered in England and Wales during the year 1850 was 154,251, at which 130,583 were celebrated according to, and 21,785 no according to, the rites of the Established Church; 7451 men and 23,16 women were not of full age; and the register was signed by marks by 47,370 men and by 70,043 women. In the first quarter the number of marriages was 30,567; in the second, 39,504; in the third, 37,636; and in the fourth, 45,331. The total number of births was 593,442 of these, 302,834 were males, and 290,588 females. 144,351 births were registered in the first quarter; 155,855 in the second; 146,911 in the third; and 146,095 in the fourth. The number of illegitimate births was 40,306, being 20,488 males and 19 818 females. The number of deaths in the first quarter of the year was 98,418; in the second, 92,975; in the third, 83,846; and in the fourth, 91,847: making in all, 368,986 deaths. Of these, 186,489 were males, and 182,497 females.

It having been publicly announced for some days past in Liverpool, that the various lodges of Loyal Orangemen would celebrate the anniversary of the battle of Aughrim by a public procession on the 14th inst. Thursday last), the Mayor, with the approbation of the magistrates generally, issued a proclamation prohibiting the intended meeting.

THE OLD CRYSTAL PALACE.

BY THE GHOST OF THE EXHIBITION OF 1851.

(To the Editor of the ILLUSTRATED LONDON NEWS.)

I AM no shrieking, gibbering ghost, but a gentlemanly and quiet shade. My voice is low, but musical: it has a slight tone of sadness in it, imparted by an early presentiment of a premature fate, and of a career embalmed in the affections of my friends. If I were asked to describe my psychological characteristic, I should say it was a certain gentle sympathising earnestness. During the last few moonlight nights I have been brimful of emotion, for I have been haunting the scene of my past existence, and realising my past glories. A few devotees who have lingered about my ruins, have done me the honour to say that I am the finest wreck in the world, and that the Coliseum itself by moonlight is not so grand a sight. Standing at the great western entrance, with the full moon in the south-east, the lofty frame work of the great nave certainly forms two magnificent perspective lines; while the congeries of skeleton columns and girders, seen through the glazed sides of the building, and lit up by the moon, have a misty and hazy look, at once spectre-like and poetical.

I have finally decided not to accompany the Crystal Palace to Sydenham. It will be so changed that it will no longer be the same building. It will have a history and an individuality of its own. When the time comes, it will have its own ghost and its own retrospections. Don't suppose I look down upon the *New* Crystal Palace because it is a purely commercial speculation. I am above such affectation. I was a purely commercial speculation myself, although conceived in the large heart and brain of a young German Prince. My reminiscences of Royalty are most dear to me. But how do I know that the Crystal Palace at Sydenham may not be as much honoured and cherished by Royalty as I? It is enough for me that I passed a short and delicious existence. Living, I had nothing to wish for—dying, I had nothing to regret. I made millions happy; I made the gentlest bosoms throb with pulsations of innocent pleasure. I brought together wisdom, genius, and sense, and lovingly introduced them to beauty, purity, and womanly grace. I gave to the wise new hopes of his species; to the industrious, new motives; to labour, a new dignity; and to work, a new reverence. I studied all art and all science in the inner minds of visitors and exhibitors, and whispered the results in the ears of our gentle Queen. In a word, I became so interpenetrated by the beauty, music, poetry, and genius assembled together in the Great Exhibition, that I am Shade in Elysium—although I say it—has a keener sense of grace, a quicker ear for melody, a truer sympathy for heroic endurance, or a more instinctive appreciation of virtuous endeavour in the most lowly walks of life. In these busy days it is not permitted even to a ghost to pass his time in pleasant musings upon the best spent life; and so being what I am, the Spirit of all the happy influences of the Great Exhibition, I have had serious notions of becoming the Spirit of the Time. It has seemed incumbent upon me to impress my lineaments upon the age. You know my mission. It is to blend the highest utility with the highest refinement. At first I thought, as all spirits do, who have a new purpose in view, of "starting a paper." But then, remembering the true and eloquent things you said about the Crystal Palace, the spirit and taste with which your artists reproduced its countless objects of beauty and utility, and the wholesome influence which the ILLUSTRATED LONDON NEWS is exercising in the cause of progress and brotherhood, I abandoned my design. My mysterious revelations from spirit-land shall be murmured in your ear alone. It will be mine to hallow every inch of ground in Hyde Park which Paxton obtained for his fairy structure; yours it will be to follow him to the scene of his further triumphs, and to show the consecrated agencies at work in his New Palace of Iron and Glass at Sydenham.

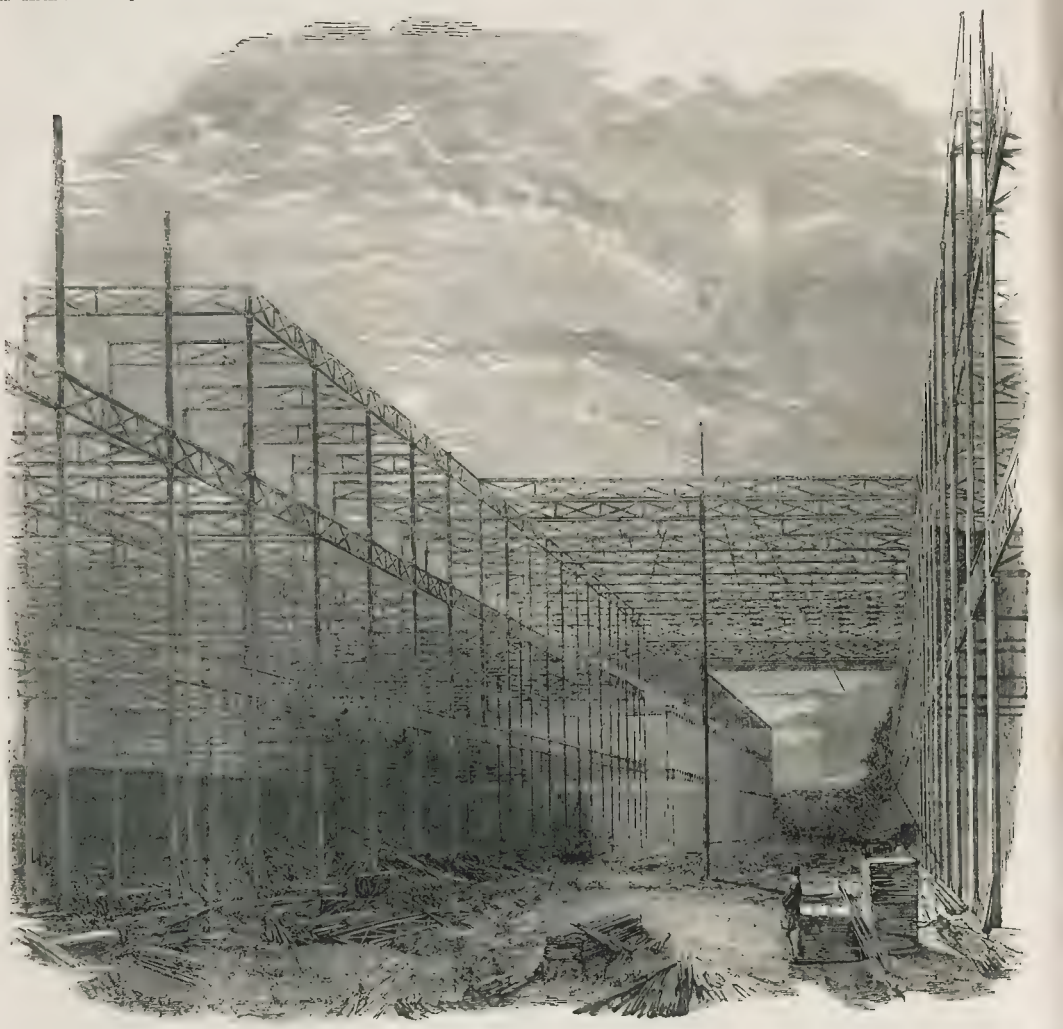
I pass over the first moments of my embryo existence, when the wiseacres all agreed that the iron girders could not possibly bear the weight of the galleries, when filled with people, and it was impossible to prevent, moreover, they could be fixed in time—when it was still more absurd to suppose so fabulous an amount of glazing could be performed—and when it was the *acme* of absurdity to think that the painting could be finished in time. The first and proudest day of my life was not, perhaps, that on which, like a young beauty at a drawingroom, I was intoxicated by the smiles of the Court and the adulation of the crowd; but it was a day chequered by a few clouds and some misgivings, and I enjoyed seasons of more assured happiness afterwards. It was, of course, pleasant to me, for it was then a novel sensation, to witness the refreshing start of pleasure and surprise with which my visitors on the 1st of May acknowledged the fairy-like lightness, the indescribable cheerfulness, and the vast proportions of the edifice they had come to inaugurate. The first wonder was that the "blazing arch of hued glass" should span the lofty transept at a height that dwarfed the noble elms which it enclosed. The elms remain, and so long as they flourish the building will never want a monolith to mark its site. Need I remind you how beautifully the delicate spring-like tints of these fine old trees contrasted on the first of May with the heavier and darker greens of palms, palmettos, and the other tropical exotics that flourished in such luxuriance by their side—or that, interspersed among the foliage, and standing against the sides of the transept, were statues by some of our best English masters, bright in the virgin freshness of Carrara marble? Scarcely recovered from the first "shock of mild surprise," my visitors were borne on to the gigantic glass fountain, and when they caught the first glance of the lofty and almost interminable nave on either hand, it was pleasant to note their awe-struck and bewildered look. Mr. Owen Jones had already pointed out to me, that if you carried the eye along the roof, the blue and white colour of the pillar and entablature united at length into a distant haze. Sir David Brewster said, indeed, on the day of opening, "that the eye required a little green;" but on that particular day, you must remember, we were all too much delighted to be critical. Then those vertical naves, with their colossal statues, mirrors, rich brocaded silks hung trophy-wise, domes of iron rising almost to the roof, and fountains: shall we ever forget how they first looked, all arranged as in some "grand motionless procession?" Have you forgotten how you adored the light and elegant galleries of the naves where the eye was caught by chandeliers in crystal and in richly-coloured glass—by tapestry and carpets of floral richness of design and colour, or by objects of manufacture glittering in gold and silver? Let me felicitate myself that the only state pageant enacted within my walls was one of the most gorgeous and glittering of modern times. People about the Court of Queen Victoria tell me that for novelty, splendour, and grandeur combined, their memory and experience supply no parallel to the scene at my inauguration. Some gentle spirits, indeed, were never able to pass the seat or place from which they had viewed the ceremony without a thrill of pleasure and emotion. There are others who think that, when but a confused recollection of the Great Exhibition, and its countless products, remain as the "sables of the brain," the oriental magnificence of my inauguration scene will still be "freshly remembered."

It was a proud moment for me, when the Queen, giving her left hand to Prince Albert, and her right to the youthful heir-apparent, and attended by the Court, the Ministers of State, and the *corps diplomatique*, traversed in grand procession the naves and south transept. How the trumpets rang through the building—how the lusty organs leaped into life and sound—how the excited assemblage broke forth into shouts, and every man considered himself a sworn member of her Majesty's body-guard! All these things are agreeable to me to remember, but perhaps wearisome to repeat. But you were so intently watching the Queen and the Prince Consort, and the Duke of Wellington, and the Chinese Mandarin, and the Prince of Prussia, and the Prince of Orange, and Garter-King-at-Arms, that you all omitted to notice one or two little incidents which it is not too late even now to mention. When the Royal procession returned to the crystal fountain, after making the circuit of the building, it was clear that the hearts of the Royal group were full of emotion, inspired not less by the grandeur of the spectacle than the loyalty and enthusiasm of which they were the illustrious objects. Do you know what the

Princess Royal did? Her little heart was full; and she sprang forward to kiss the Duchess of Kent, regarding "grandmamma," perhaps, as the only member of the Royal circle with whom, at such a moment, she could take such a liberty, and to whom she could turn for sympathy. The clear and piercing notes of the trumpets are again heard. The Queen's lips moved, and she gracefully pointed to east and west nave. She had given a command to the Lord Chamberlain, who forthwith proceeded to obey the Royal mandate. THE EXHIBITION WAS OPENED! and I sprang into full and happy life. Again the shrill trumpets executed a flourish, which stirred every bosom, and again the assemblage broke forth into shouts. Here again a little incident occurred, in which the mother of the Queen and, this time, the Prince of Wales took part. Her Majesty most graciously—I thought even fervently—bent to her subjects, and looked her thanks. The Prince Consort bowed. The Princess Royal, who held a bouquet in her hand, with a buoyant manner, as if she could begin the steps of a quadrille at the shortest possible notice, followed the example of her seniors, and practised with great success two or three graceful courtesies. But the youthful Prince of Wales was not so self-possessed. He still gazed at the scene with timid wonder. A sense of enjoyment was absorbed in childish awe. It was necessary for some one to remind him that *he*, also, must acknowledge the salutations of his mamma's loyal subjects; and this office was performed by the Duchess of Kent, who leaned down and whispered something to the heir apparent. The child-Prince hereupon made low obeisance to the majesty of the people, to the infinite delight of the excellent Duchess, who appeared to have taken the two young people under her charge for the day, and who watched their movements with maternal interest and affection.

The next great day inmy history was the last day of five-shilling admissions. That Saturday was the grand climax to a series of gradually increasing assemblages. Name to me, if you can, any edifice in modern Europe that has ever contained a more splendid gathering of beauty, fashion, and rank. The June Flower Show of the Horticultural Society at Chiswick—at which I am told from 12,000 to 15,000 of the A*ut ton* promenade upon the lawns and grounds of the society—is the only assemblage worthy to be compared to it. But I had 50,000 visitors Did you ever see a more glorious display of female loveliness? I am not ashamed to say that on that day I drank such ravishing draughts that I was absolutely drunk with beauty. Rich carnations, such as Titian revelled in; complexions of alabaster purity, such as Guido loved to paint; smiles soft and tender as ever mantled upon the cheek of virgin innocence, in the canvass of Correggio; winning grace of form and feature, such as Raphael alone could imagine, were here seen in bewildering profusion. Twenty syrens might have taken the bunch of grapes that Charles James Fox presented to the lovely Duchess of Devonshire, with his motto, "Je plais à l'ivresse." The exquisitely chiselled features of English aristocratic beauty have been often sung, and may be seen in the sculptor's studio. But were you heart-proof against the eyes that darted remorseless murder at every step? Only spirits could bathe unharmed in that sea of light, love, and radiance, but all could drink in the blessed influences of so much beautiful and breathing womanhood.

I heard much disputing about "eyes." My foreign visitors gave the palm to the *blue* eyes, which they had come prepared to admire, and which were, certainly, of unsurpassed depth and beauty. They said that, with fair hair and a pure complexion, they were irresistible and angelic. And then I heard something about *angeli* and Angles, which I believe you will find in Goldsmith's History. I luxuriated in the blue eyes, certainly. But if I should give them the unmeasured superiority that it was very natural for foreigners to award, there would pass reproachfully before my mind's gaze eyes of the richest hazel with auburn hair, for which I have a weakness; and they would be followed by eyes of the expressive grey, which "melt into love" prettily enough, but which, unlike those of Sir Walter Scott's hero, do *not* "kindle in war." And then I am by no means likely to forget certain black-eyed houris, who, with tints of rich carnation upon their cheeks, and black hair, always look handsome, whatever their features. And then, above all, there was one young girl, whose face was not so strictly beautiful as many others, but who exercised an unaccountable witchery. I was puzzled myself to account for it; but my powers of abstraction and analysis, being less disturbed than those of the young men around me,



REMAINS OF THE CRYSTAL PALACE IN HYDE PARK.

I succeeded in resolving her beauty into its component parts. Her eyes then were of a singularly deep blue, fringed and shaded by eye-lashes —mark me!—unusually long and black, beautifully arched eye-brows, and hair of raven hue. The deep blue eyes had a half sleepy and dreamy look, which, as I told Sir Peter Lely, I could have trusted him to paint, if he would have left out the voluptuous court-leer of his day, which, happily, we don't see in these days of Crystal Palaces.

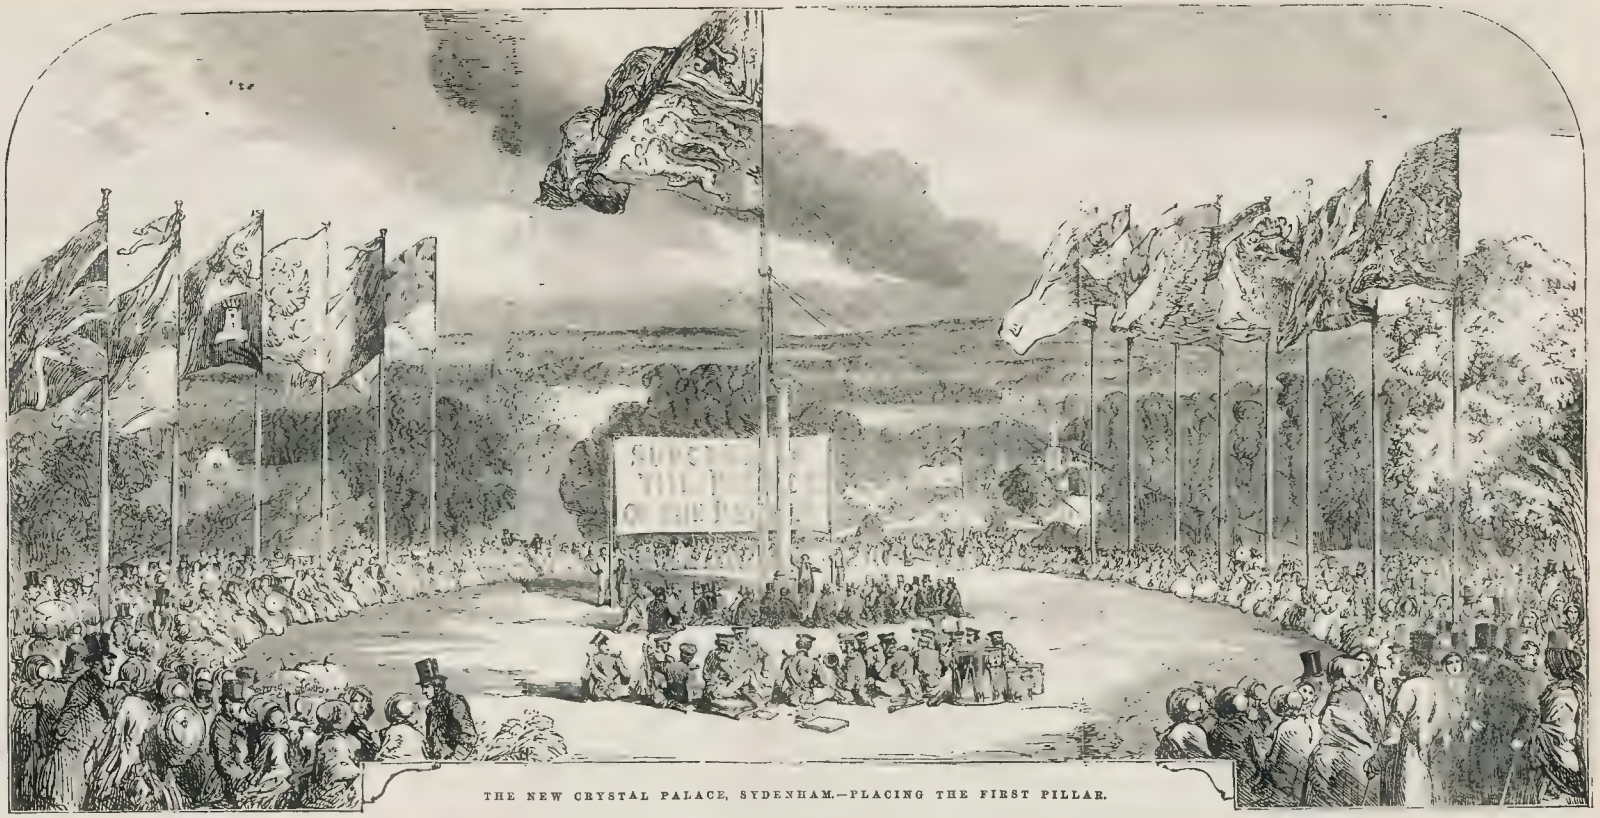
I might swell this catalogue of pure and high-souled beauty, for there were charms enough in the Crystal Palace on that day to set up a hundred poets and novelists for life. Suffice it to say that it was the only day of all the year in which people with my fullest consent abandoned themselves to the pleasure of seeing and being seen. Some young members of the Society of Friends made manful attempts to go through their catalogues, but forms and faces, such as rarely haunt even poets in their dreams, passed before them with most distracting effect. At last—to my great joy, but not at all with the consent of the modest Tabithas and Ruths in pretty cottage bonnets by their side—the bulky volume was closed (but not got rid of) for the day, and they promenaded to and fro with the rest, not ashamed honestly to admire where the *nil admirari* would have been absurd and impossible even to George Fox himself. When I saw this I was content. The foreigners had come to admire. A beautiful English girl in the *Champs Elysees* strikes a party of French exquisites dumb. They gaze as if transfixed with adoration. This is a matter of course, and nobody is surprised at it. But for an honest young English Quaker to abandon the compartments and galleries, to shut his book, and to swell the fashionable crowd that rendered the naves and transepts almost impassable, was a triumph indeed for the fair sylphs in gauze-like attire, who led these young members of the Society of Friends in their train.

Eight-and-forty hours afterwards the scene had indeed changed. How great the contrast between the last five-shilling day and the first shilling day, you do not require to be reminded. Everybody told me I ought to be nervous and apprehensive for my safety; and certainly there were moments when I reflected that never were treasures and valuables such as I possessed thrown open to a promiscuous mob—to anybody who could afford a shilling. Every great city must have its burglars, its pick-pockets, its *marauds sujets*, I remembered, as I took one of my early walks about the building, when, in one of the most solitary and unfrequented compartments, I came upon a strong body of police, who I found were placed there as a matter of precaution for my protection. Following a line of policemen who were placed at signal distance from each other, and from this spot, I found myself in a side aisle just opposite the Koh-i-Noor. Here, within signal distance again, a policeman was on duty, whose instructions seemed to be never to take his eye off the wondrous diamond; while the policeman on duty over the golden cage in which the Mountain of Light was enshrined appeared to have his hand upon the spring which would have relegated the costly jewel, the price of a kingdom, in an instant to his iron chest. How many police were on duty that day at Prince's Gate, and how many in Scotland-yard, I never had the curiosity to inquire, for a glance round the building, when the public were admitted, re-assured me. London had made up its mind that Hyde-park would hardly contain the people who would throng for admission, and the belief was enough to defeat its own realization. On the Derby day, when everybody went because it was thought nobody would go, I had the fullest attendance that had yet arrived. On the first of the shilling days, when everybody stayed away because it was thought everybody would go, I looked positively deserted: only a paltry 15,000 were present; and as they dispersed themselves over the building much more than the fashionable loungers, the Crystal Palace looked for the first time bare and bald, wanting the air of gaiety and animation which the presence of a well-dressed crowd in motion naturally imparts. Never had there been so good an opportunity of studying the objects in the sections undisturbed, and the fortunate 15,000 seemed much more anxious to avail themselves of it than to possess themselves of the Koh-i-Noor, which I thought, indeed, they regarded with a certain contempt and indifference, not at all complimentary to a precious stone then currently valued at two millions.

I could discourse to you of a thousand instances in which the humanising and elevating influences of the Great Industrial Exhibition have since borne the richest fruit. In millions of workshops abroad and at home, men are working more cheerily, with more of faith and purpose in their work, and grace in the manner of doing it, than heretofore.

The early morning light has surprised me, and I have so much still to say that I am not willing that these should be quite "the last words of the Great Exhibition." This week you will have to describe the sale of "50,000 squares of glass" by the hands of the public auctioneer. If you wish to see how philosophically I, the most cheerful of spectres, bear this indignity, leave, I pray you, a little space in your next for

THE GHOST OF THE CRYSTAL PALACE.



THE NEW CRYSTAL PALACE, SYDENHAM.—PLACING THE FIRST PILLAR.

THE NEW CRYSTAL PALACE.

In our Journal of last week we recorded the commencement of the erection of the New Crystal Palace at Sydenham on Thursday, by the placing of the first column of the structure. We now engrave the very interesting ceremony; and add two passages from the addresses, characterising the leading objects of the great undertaking.

Mr. Laing, M.P., in the course of his able speech, after fixing the column, observed:—"When we consider the work which has this day been formally commenced, it is no light enterprise which lies before us. Former ages have raised palaces enough, and many of them of surpassing magnificence. We have all read of the hanging gardens of Babylon, the colossal palace temples of Egypt, and the gorgeous structures of Nineveh and Persepolis. Many of us have seen the scattered fragments of Nero's Golden Palace on the Palatine-hill, and the vast ruins which still speak so magnificently of the grandeur of Imperial Rome. But what were all these palaces, and how were they constructed? They were raised by the spoils of captive nations, and the forced labour of myriads of slaves, to gratify the caprice or vanity of some solitary despot. (Hear.) To our own age has been reserved the privilege of raising a palace for the people (Loud cheers.) Yes, the structure of which the first column has just raised its head into the air, is emphatically and distinctly the possession of the British people, as it is the production of their own unaided and independent enterprise (Hear, hear.) On us, to whom circumstances have intrusted the direction of this great popular undertaking, devolves the duty of seeing that it is carried out in a manner worthy of the public spirit of the age in which we live, and of the magnitude of our high mission I assure you we all feel very deeply the responsibility of our position; and although we have judged it premature and unseemly to make any formal religious ceremonial on the present occasion, we feel not the less profoundly that in carrying out this undertaking, as we hope to do, to a successful issue, we are but acting as the instruments of that beneficent and overruling Providence which is guiding our great British race along the paths of peaceful progress. (Hear, hear.) I trust that the assurance that we are all deeply and intimately impressed with what I may almost venture to call a religious feeling of our duties and responsibilities, will be accepted as a guarantee that, to the best of our judgment and ability, the great undertaking shall be constructed in a proper spirit and with a view to noble and elevating objects. (Hear, hear.) As regards the material portions of the enterprise, words are but feeble instruments in which to paint the triumphs of art and the beauties of nature. It is better to ask you to look around you and say for yourselves whether the site is not worthy of the People's Palace and of the People's Park. (Cheers.) Figure to yourselves the surrounding area which is now defined by a circle of beauty—(Cheers)—converted into a crystal dome, and raised aloft under the blue vault of heaven, and you will form some indistinct image of the new central transept as it exists in the genius of a Paxton, and as it will shortly exist as a tangible reality for the wonder and admiration of millions." (Cheers.)

In his second address Mr. Laing observed:—It would be proper briefly to advert to the principal objects proposed to be kept in view in the erection of this glorious building, surrounded by that enchanting park, which the same genius would call into existence. They might be comprised under the heads of recreation, instruction, and commercial utility. (Hear, hear.) We could not but feel that there was some ground for the reproach often cast upon Englishmen, that while they knew well how to work, they did not know how to amuse themselves—("Hear, hear," and laughter)—that, in that respect, we were very inferior to the nations to whom, in other respects, we might reckon ourselves superior. (Hear, hear.) If for the mass of our population we could provide some more refined amusements than those of Greenwich or Windmill-hill, or, worse than all, the gin palace or the saloon, we should go a great way towards advancing the character of the English nation (Hear, hear.) * * * * * * What was wanting for the elevation of our working classes was that very description of refinement which it might be hoped would be afforded by contemplating the marvels of nature and art in a palace like that about to be erected. (Cheers.) As the means of recreation the question turned upon the temptation that could be offered to them to visit a scene easy of access. Now, the experience of the Great Exhibition of 1851 had fully confuted the notion that they were unworthy of a place of amusement—that they were so immersed in the fumes of tobacco and gin that it was useless to hold out to them any temptation to better things. 6,000,000 of visitors in less than six months—(Hear, hear)—conducted themselves with a propriety which refuted that calumny, and proved that, if the palace be made worthy of the people of England, the people of England would flock in millions to it. (Hear, hear.) But, further, it was proposed to combine instruction with amusement. The tendency of the age was, not to appeals to the faculties by dry abstraction or words, but to appeals to the eye: and the object would be to present, as in an illustrated edition, on a large scale, all the marvels of industry and art. (Hear, hear.) Take ethnology—take the science which classifies and arranges the various branches of the human family; how delightful it would be to a young man, studying such works as Prichard's, to see in this Crystal Palace classified specimens of the varieties of mankind, prepared by eminent artists, under the superintendence of the most eminent ethnologists of the age! (Hear, hear.) Or suppose any one taking a lively and intelligent interest in some of our great staple manufactures, which gave employment to our millions and made the wealth of our empire—cotton, for instance. A man might confuse his brain by reading books about spinning jennies, and then have to go down to Manchester, and endeavour to understand the different processes by looking on amid the whirl and confusion and dust of a mill in actual work; how much better if he could come to this palace, as he could to the Great Exhibition, and trace the cotton from the berry on the plant to the garment which decorated the ladies who stood by him.

MUSIC.

THE ITALIAN SINGERS AT VAUXHALL GARDENS.—On Tuesday night the principal singers of Her Majesty's Theatre sang in the Rotunda at Vauxhall, giving their gratuitous services, in aid of Signor Grisipa, formerly the prompter. Mr. Lumley, the director, kindly gave permission for his company to appear at the Royal property, and a large attendance was therefore insured for the charitable occasion. Signor Lisalni was the able accompanyist; and Madame De Lozrance Mille. Ida Bertrand, Signori Labocchetta, Gardoni, Calzolari, Perlotti, and De Bassini sang their favourite airs, enthusiastic encores following their exertions.

HERR HENNEN.—We have been premature in announcing the end of the concert season; above we record a *soirée*; and now a *matinée* must be mentioned, that of Herr Hennen, the pianist, and Herr F. Hennen, the violinist, at the New Beethoven Rooms, Queen Anne-street, last Monday. We learn from the programme that they were assisted by the Misses Brougham, and Mr. G. Tedder, the tenor, with Mr. Anschütz as accompanyist, and that some of their own compositions were performed, besides those of the standard composers.

AMATEUR BALL FOR DISTRESSED MUSICIANS.—We feel pleasure in stating that £479 12s was the amount distributed among 42 distressed musicians, as the result of the ball given by the Amateur Musical Society. The names of the amateur band, which played on the occasion, under the direction of Mr. Bussey, of the Scots Fusilier Guards, were as follows, viz.:—Messrs. Moodie, D'Egville, A. Leslie, and Pawle; second violins, Messrs. St. V. nent Jervis, Ames, and Captain Hotham; tenors, Messrs. Owen and Wilmot Adye; violoncellos, Captain Paget, Messrs. F. Lawrence, and Leslie; double basses, the Duke of Leinster, Lord Gerald Fitzgerald, Sir A. R. Macdonald, Bart., and Mr. F. Leslie; flutes, Major the Hon. Horace Pitt and Lieut.-Colonel Hamilton; and cornets à-pistons, Captain Baillie and Mr. Breedon.

BIRMINGHAM MUSICAL FESTIVAL.—The programme of the forthcoming festival, which will commence in three weeks, has afforded universal satisfaction. The engagement of the gifted Viardot has been a fortunate hit of the committee of management. There is every prospect of a most brilliant meeting; and the performance of the "Christus" and "Lorely" of Mendelssohn, for the first time in this country, is looked for with the greatest interest. Costa's direction of the Beethoven Choral Symphony, with such an imposing orchestra and chorus, will be one of the most prominent attractions of the programme.

THE NORWICH FESTIVAL.—Mr. Henry Hugh Pierson, the composer of the new oratorio, "Jerusalem," one of the novelties to be produced at the Norfolk gathering, was a pupil of Attwood, Crotch, and T. A. Walmesley, in England; and of Carl Banck of Dresden, and Thomaschek of Prague. Mr. Pierson obtained the chair of the Professorship of Music in Edinburgh chiefly, it is stated, through his organizing the Choral Society there, on the testimonials he had received from Meyerbeer, Mendelssohn, Reissiger, and Johann Schneider. After Mr. Pierson's resignation of the Edinburgh Professorship, he returned to Germany, and composed in Vienna some songs and other pieces under the name of Mannsfeldt. These lieder gave rise to some discussion in the musical organs of Germany. Some pleasing from an opera, "Faria," were given at the concerts at the palace of Charlottenburg, during the composer's stay at Berlin, and the work was subsequently produced at Hamburg, with decided success. Mr. Pierson is the composer of another opera, "Leila," the libretto being based on one of Victor Hugo's plays; but he has vainly endeavoured to obtain a hearing of the work in this country. He then composed the oratorio of "Jerusalem," and with the greatest difficulty obtained a trial of a portion of the composition at Norwich, before the festival committee, and the result was that the oratorio was accepted for the ensuing meeting. These antecedents of the untried composer ought to be quite sufficient to secure for him a fair and impartial hearing.

SURREY ZOOLOGICAL GARDENS.—One of the efficient hon. secretaries of Mr J. L. Hatton, the pianist and composer, a concert is given every evening, the programme of which consists chiefly of glees and madrigals, sung by the Misses Messent and Hendrickson; Messrs. Manvers, Young, and Hatton. A solo instrumentalists are Richardson, flute; Cliff, trombone; Viotti Collins, violin; Lazarus and Wallis, clarionet; S. Pratten, flute; and Collinet, flageolet.

MADAME FIORENTINI.—We have to correct an error in our last week's number. Madame Fiorentini declined the proposal she received from her by the director of the Italian opera in Berlin, in which capital she was so popular; having resolved to remain in the country to sing, as we have before stated, in oratorio and concerts.

ITALIAN OPERA AT THE LYCEUM THEATRE.—A benefit was announced for last night (Friday) at this establishment, for Mr. Harris, the active stage-manager of Her Majesty's Theatre, the director of which gave his permission to the principal *artistes* to perform on the occasion, "Don Pasquale," with Madame De Lagrange, Calzolari, De Bassini, and Labiache; the last scene from the "Somnambula," with Madame Charton; the last scene of "Lucia," with Gardoni; and dancing by Rosati, L. Henry, M. Durand, &c., were the entertainments. Mr. Balfe was the conductor.

MUSIC AT THE DIGGINGS.—Madame Thillon will follow Madame Bosisdanti, who has gained a fortune in California; and Mrs. Bloss, late Miss H. Cawse, is about to imitate the example of the Australian belle about to be visited by visiting Australia, where the amateurs, instead of bouquets, throw nuggets and digests for the singer.

FOREIGN MUSICAL NEWS.—On the 1st, 2d, and 3d inst., the singing tournament took place at Düsseldorf. On the first day the prize was won by the Cæcilia Society of Bonn, the second by the Polhymnia of Cologne; and the societies of Crefeld, Gladbach, &c., gained the smaller honours. The singing of the hymn by Mendelssohn, "So ritch shone the glorious," from Bonn and Cologne, created unabated enthusiasm. At the concerts, Madame Schumann (Clara Wieck) was the chief pianiste; her ballad-player, Mdlle. Schloss was the leading vocalist; and Herr Schumann's "Faust" and "Manfred" music also figured. Op. 121 in C. A new work, "The Calm of the Sea," by Herr Felber, of Mayence was also performed.—Madame Sontag has been singing at Bidenbaden with some success.—Mr. Swift, English tenor, is engaged to sing at the Italian opera-house in Lisbon, at which Madame Castellan will be the *prima donna*.—The Madrid Opera-houses will open on the 1st of October with Verdi's "Jone Lauri." Signora Capdeli, *prima donna*, Ropia tenor, and Corsi baritone. Madame Dora Arnal will be engaged for a limited number of *débuts* in the second week in Rossini's "Semiramide," in the title of Tesla." Donizetti's "Martiel," Verdi's "Luisa Miller" and "Lombardi" will be also given.

PANORAMA.—AUSTRALIAN GOLD-FIELDS.—We were admitted to a private view, on Tuesday, of a new moving panorama, presenting a voyage to Australia and a visit to the gold-fields, proposed to be opened at 309 Regent-street, near the Polytechnic, and we are told that Mr. Beverley has taken on a considerable series of paintings not highly finished and admirably executed. More than one artist has been engaged on the work—the sketches on the spot, for instance, were taken by Mr. J. S. Prout; the marine subjects have been painted by Mr. W. C. Nicholas; and those pertaining to natural history by Mr. C. W. Cope; the combination of talent has accomplished a highly successful result. The series of views commences with the Thames, Sound and Eddystone Lighthouse, and proceeds to Madeira, Rio Janeiro, and the Cape of Good Hope. We know not but that some of these more familiar places might have been omitted with advantage, as we are impatient for "fresh fields and pastures new." But we were soon rewarded: South Sea Whale Fishery, Melbourne, the valley of the Goulburn, and Geelong are all excellent pictures. These were followed by Sydney, and the monument to Mount Alexander, and an amusing kangaroo hunt at Illawarra. The series concluded with a view of Sydney, the Parramatta river, the Blue Mountains, Summer-hill Creek, Ophir, and the encampment of gold diggers by moonlight. Some of these were very effective, from the highly dramatic groupings of human figures. The subjects of the views were explained by a lecturer, who also undertakes to give practical information relative to the gold regions. These painted are so charming executed, and illustrate spots so beautiful in themselves, they are likely, we think, to rank among the number of impulses to emigration. They well deserve at any rate a visit on their own account, and, owing to their merit, must acquire rapid popularity.

ANTIQUARIAN RESEARCHES AT ATHENS.—From Athens, under date the 4th inst., we learn that on the previous day the King of Greece visited the Acropolis to examine the sculptures recently discovered there by M. Beulé, a Frenchman. Some of the excavations made under his directions have brought to light the last steps of the staircase which led to the principal entrance and the surrounding wall of the citadel, as well as a great number of marble, and not a few of them has been displaced. The door is 12 feet high, and of the Doric order. The lintel and the casing of the door are in a single block of marble. The wall is 21 feet in height. It is composed of different kinds of marble. At its base are pedestals and fragments of the Roman epoch. The upper part, on the contrary, comprises the entablature of several Doric temples anterior to Pericles. Above this architrave is placed the frieze, with its triglyphs in stone and its metopes in marble, in the same style as the first Parthenon. The cornice does not crown the wall, but is in its turn surmounted by an elegant attic formed of fine white marble, which is likewise continued to the interior of the temple. M. Beulé had commenced another excavation in the south-west angle of the great bastion to discover the construction of the western wall. He has already found a portion of it, but they do not date further back than the middle ages or the Byzantine epoch. Several fragments of architecture and sculpture, and 23 inscriptions, have been discovered. A bas-relief, well executed, represents eight young Athenians dancing.

A SOMNAMBULIST.—A Bordeaux journal states that a wealthy farmer in the neighbourhood of that city having perceived that some of his fowls and pigeons were stolen. As two successive days were let loose in the farmhouse at night, it was supposed that the theft must have been committed by some person in the house. The farmer, in consequence, determined to post his men in various places in the premises the next night, and have a strict watch kept. The men remained at their posts until a little after 12, when the noise of a key turning in a lock was heard, and the moment after the farmer himself made his appearance in his shirt, and evidently in a state of somnambulism. He proceeded straight to the pigeon house, twisted the necks of two birds, and carried them off with him. He did the same to two ducks, and then returned tranquilly to his own room, where he hid the birds carefully in a press, and went to bed. This occurrence being related the next day to his sons, they adopted measures to prevent it taking place again.

THE THEATRES.

HER MAJESTY'S.

The Duke of Saxe-Coburg-Gotha's four-act opera "Casilda" was to have been produced on Saturday night, but, owing to the indisposition of Calzolari, the tenor, the "Somnambula" was substituted at this time; being followed by the ballet-divertissement *Armida*. De Bassini sustaining the *Count*, and Gardoni the *Podestà*, Piave. At this was the forty-fifth and concluding night of the subscription, the National Anthem was sung at the conclusion of the opera, before the ballet of "Zélie."

Monday was set apart, at play-house prices, for the especial benefit of Balfe, the musical director and composer, who has now completed his seventh season in that honourable position. The popular composer presented his patrons and friends—who, notwithstanding the advanced period of the operatic campaign and the untoward circumstances thereof, rallied around him in no limited force—with Meyart's "Don Giovanni" for the first time. The cast included Madame Fiorentini as *Donna Anna*; Mr. Lablache as *Masetto*; Calzolari, as *Don Ottavio*; and Lablache as *Leporello*, all well and favourably known to the amateurs in their respective parts. The *Zerlina* on this occasion was the Countess Tascani-Tasca; the *Elvira*, Mdme. Garcia, of Drury-lane Theatre; the *Commendatore*, Signor Busiol; and the *Don Giovanni*, Signor de Bassini. Madame Tasca made her *début* on this night; she was some years since distinguished as a *prima donna* in Italy, and has been heard here during the season at divers concerts. With every allowance for a benefit night, when any absurdity is allowed to pass muster, free from adverse criticism, it would be a failure in our duty, as faithful chroniclers of the times, if we did not record the fact, that the opinion is unanimous, as to the performance having been the most crass massacre of the composer's masterpiece ever heard in this country. The magnificent organ of Madame Fiorentini, the artistic skill of Calzolari, the tact of F. Lablache, the glorious singing of the great Lablache, and the handsome figure and animated action of De Bassini, could not compensate for the glaring deficiencies arising from want of rehearsals, and from *artistes* being in utter ignorance of the music allocated to them, no opera ever had greater exactitude in the ensemble than the sublime scene at "Don Giovanni." It was a painful position for Madame Fiorentini, who has only been heard twice this season in "Maria di Rohan," to be exposed on her own benefit to such an annoying ordeal. Her artistic life ample room for improvement, her vocalisation was consistentous; and many portions of the recitatives were superbly rendered. Madame De Lagrange electrified the house in the Mazurka and Bolero; Catalani; and Mdlle. Charton and Mdlle. Ida Bertrand and Gardoni also contributed their aid, in their favourite pieces, to console the audience for the Mozartian disapointment.

On Thursday there was first time of a second ballet nights, at a reduced tariff; "Casilda" being given for the second time, with Mdme. Charton, Mdme. de Lagrange, Ca zolari, Susini, and De Bassini. The evening (Saturday) there will be a variety of entertainments, beginning with "Il Barbiere."

ROYAL ITALIAN OPERA.

The seventh representation of Meyerbeer's "Prophète" took place on Saturday last.

Berlini's "Norma," with Grisi, Mademoiselle Bertrandi, Herr Formes, Signor Soldi, and Signor Negrini, is to be first performed this season, and the second act of Meyerbeer's "Roberto il Diavolo," with Mdme Julienne, Signor Stigelli, Signor Marini, and Signor Tamberlik, and Mdle Robert, the *danseuse*, were Tuesday's entertainments. It may be remembered that on the suspension of Her Majesty's Theatre there appeared the following notification:—"The ratification of the engagement with Signor Negrini, primo tenore, from La Scala, Milan, and the principal theatres of Italy, is daily expected." A few days afterwards, the production of the Royal Italian Opera announced that the ratification of Signor Negrini's contract had been received by the directors, and that his services were consequently secured. This apparent struggle to obtain the tenor, it would seem as if he had been regarded as an invaluable acquisition by both the rival managers. Signor Negrini has been known to have been in town for some time, but his *début* was been delayed, owing to the discovery that he was only "up" in Verdi's operas. It is, moreover, reported that he sang *Polito* for the first time on Tuesday night. So this as it may, and making every allowance for the unwillingness of the part of the Roman Lothario, a more serious impediment to the success of the new tenor is answered by certain hindrances was under discussion. Not but at Her Majesty's Theatre, for at Royal Italian Opera-house there are two tenors who contend for the leading position. It would be an insult to Mario or Tamberlik to institute any comparison, however distant, with them and Negrini; and even Fraschini could not be mentioned, but he must be dishonoured by putting their pretensions against the new comer, whose voice is of the rougher quality, whose style is defective, and whose intonation is imperfect. Gaez an artiste, always an artiste—this is an aphorism in art; and, be drawbacks and counterbalancings a *débût* with what they may be, the indications of good vocalisation are unmistakeable. With immense power, Negrini has no compass in the upper octave; the *timbre* is hard and of the opposite metallic, and he has not yet mastered his scales. It can readily be conceived that in the shouting, lungs-taking exertions in Verdi's works, Negrini's strength would carry him through with the Covent Garden audience; but a first-rate tenor must possess attributes greater than those of a leading chorus singer, there must be intellect, taste, science, sentiment, and, above all, poetry in his nature, to enlist the sympathies of his present generation of opera hearers. Signor Negrini must, however, do more than Gardoni, Marini, and Tamberlik. Negrini was a failure, like Ander, proving how little Continental fame can now be relied upon.

On Tuesday, "Il Trovatore" attained its eighth performance, Mariani being *Leonora* for the first time this season.

Julien's "Pietro il Grande," after four postponements, is fixed for Tuesday night.

HAYMARKET.

The Adelphi company has been transferred to the Haymarket, and a new piece with Mr. Keeley is produced there. The construction and materials are the same as those which have so long supported the Adelphi. The relief of extravagance—the same war between the magisterial class and the general population—with the usual moral, that of guilt for a time successful, but finally punished. Mr. Emery is here for a while the triumphant parish, who, after cutting the throat of a magistrate who had condemned his father, sees the wealth he has thus procured in gradually buying up his victim's landed property, and finally effecting the ruin of the grandchild son. This notion, extravagant as it is, constitutes the "powerful interest" of the piece, with the leaven of a love story, in which the successful villain claims the hand of his victim's daughter. But all the complicated web of mischief is unwound by the agency of a companion in the crime, *Bob Smithers*, an itinerant musician and tumbler-rigger (enacted by Paul Bedford), who acts his confederate proceed for five and twenty years in the most amusing and unscrupulous manner for the behalf of his gains. This, of course, he resists, notwithstanding the awkward fact that the murdered man had contrived, with his own blood, to write his murderer's name on the wall, which, at the sequel, *Smithers* has, however, concealed with a heavy screen, which had never been removed, the chamber having been since kept locked up. *Richard Oliver* (such is the name of the delinquent hero) determines to oh therate the record, and from the door, the wine he discovers *Margaret* the daughter of the murdered man, *Bob Smithers*, and others, the fatal screen being removed, and the blood-writing revealed to the eyes of all. He endeavours to make his escape, but is secured. The younger son of the victim had been an unsuspected of the crime, and had therefore disguised himself as a blind beggar; but is by the *denouement* restored to sight. There is an underplot, turning on the adventures of *Augustus Frederick Fay*, of Pocock's Rents, Spitalfields, which, with

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

From St. Petersburgh, under date July 27, we learn that the negotiations which have been so long pending between Russia and Austria, relative to a junction of the telegraphic lines, are now concluded. Russia has accepted the regulations of the Austro-Germanic Telegraph Union without actually joining it, with the reservation, however, that the transmission of private despatches, except those of the prices of funds and state of the Bourse, is for the present prohibited.

A communication has been received this week at Brussels from the Belgian Consul at Athens that a very serious disease has attaked the currant crop, and it is found that the nalf is destroyed. This circumstance has had great influence on the crops of last year, which are now quite large, although the owners refusing every offer in the determination of raising up the prices to 85 colonnates per 1000 lb, or 100 francs for 100 kilogrammes.

The clearances from the port of London for the gold colonies of Australia for the week ending Saturday last consisted of seven ships to Port Phillip, of an aggregate capacity of 3093 tons (besides an East Indaman of 1292 tons, freighted in part for that colony), and of four ships to Sydney, of 2048 tons, exclusive of the mail steamer *Sydney*. There was also one vessel of 835 tons to Adelaide, South Australia. The exports of manufactured goods, as well as of wines, spirits, and tobacco, were again large, although emigrants at present constitute the chief portion of Australian cargoes, the number of these for the week having probably been from 1200 to 1500. Among the mass lane us exports were two rather large consignments of hops.

A subscription has been set on foot by the non-electors of Cockermouth and the neighbourhood, for the purpose of purchasing a piece of plate, to be presented to Mr. Horsman, the late M P. for that borough.

On Sunday morning, shortly before four o'clock, a fire broke out in the immense range of premises in the occupancy of Mr. Bell, and well known as the Tottenham Mills, situated on an island surrounded by the river Lea, near the Tottenham station of the Eastern Counties Railway, which, within a short period of time, destroyed an oil and a flour mill, with their contents, and several of the adjoining buildings. In the flour mill it is stated that there were 2000 quarters of wheat. Mr. Bell was partially insured. About fifty families are thrown out of employment by this disaster.

On Friday night (last week), as Mr. Whittington, of Brandon-row, Walworth, was sitting in the shop of Mr. Simpson, hairdresser, Walworth road, he was suddenly taken ill, and dropped from his chair apparently insensible. Mr. A. G. Power, surgeon, London-road, was immediately sent for, and promptly applied the usual remedies, but in vain, life being totally extinct.

A few days ago, as Mrs. Morrell, of High Grove Park, Plumstead-common, was driving a four-wheel chaise, in which were seated four other ladies the horse became frightened when passing near the Woodman, Old Charlton, and rapidly running down the hill came into a collision with a waggon. By the shock the ladies were all thrown out upon the road. Mrs. Morrell had her arm broken, and she, as well as the other ladies, were seriously cut and injured about the head.

A few days ago the side of one of the limestone quarries in the vicinity of Llanystlodi, Montgomeryshire, gave way, when about 60,000 tons fell upon two, if not more, unfortunate men who were working at the pass, burying them beneath the fallen mass. Although great exertions have been made to extricate the bodies of the poor men, it is expected that some time must elapse before they can be reached.

Import of foreign wheat, flour, cheese, &c., into Liverpool, for the fortnight ending 4th August, 1852:—130,600 bushels wheat; 933 bags do; 40,767 barrels flour; 3274 sacks do.; 100,714 bushs s Indian corn; 9500 sacks do., 10,832 bushels barley; 16,480 bushels oats; 30,731 bushels beans; 1680 bushels peas; 106 boxes cheese.

The *New York Sun* proposes "to settle the fisheries outrage by seizing at once upon Canada and the Britis p ssessions in North America."

At the Edinburgh Jury Court, second division, Mrs. Janet Donald, or Eadie, has recently obtained a verdict of £100 for herself, and of £200 for her children, as compensation for the death of her husband, who had been killed in the pit of the Barony-hill Coal Company, at Dykehead, owing to the unsafe condition of such pit, in which the deceased was engaged as a collier, or miner, or drawer.

Last week the deliveries of tea in London increased a little, being 684,281 lb.

A few evenings ago a family of ten brothers were invited to a tea-party in New Scone. Out of the ten seven were upwards of 70 years of age.

A gentleman had his pocket picked of a book, containing notes and documents to the value of several hundred pounds, while standing in the Bank of Liverpool, last Saturday morning.

From an advertisement in the *Edinburgh Gazette*, it appears that proceedings are about to be taken by the Earl of Fauuare to disestall his extensive and valuable estates.

The Right Hon. Charles Shaw Lefevre, M.P., Speaker of the late House of Commons, is at present on a visit to M. C Roberts, Esq., at his seat, Sallyment, county Kildare

The appointment of keeper of Carisbrooke Castle, lately vacant by the decease of Dassett, the celebrated inventor of the rockets and fireworks by the lives of persons ship-wrecked, has been presented by Lord Heytesbury to Mr. H. D. Cole, well known for many years as the hon. secretary to the Isle of Wight Agricultural Society, the Race Committee, and other public matters.

The herring fisheries of the United Kingdom promise during the present year to be abundant in their produce, and also produce promises to be excellent in its quality.

A letter from Dantzic of the 29th ult. says:—"The cholera has made its no appearance here, and, as usual, has come from Poland. Up to this time it has been very fatal. Of every five persons attacked four have died."

By the authority of the Marquis of Westminster, the Grosvenor Gallery, which contains a noble collection of works in the various schools of Italy, France, Flanders, and England, is again laid open to public inspection, under certain regulations. Visitors who have obtained orders by personal application are admitted on Thursdays, between the hours of half-past one and five.

On Sunday evening, between the hours of nine and ten, a fire broke out in the barn-yy premises of Mr. Collier, at Gravesend, in the vicinity of the Water-works, which destroyed the barn, shed, and other out-buildings, together with several stacks of hay.

Elizabeth Walker, a servant maid, aged twenty-four years, was suddenly killed last week by a sun-stroke while hanging out clothes in a garden in Sheffield. It may not be generally known that a piece of silk, which is a non-conductor, worn as the lining of a hat or bonnet, is a very safe protection against sun-stroke.

A return published shows that the total amount realised by the sale of property under the Encumbered Estate Commission in Dublin since its institution is £7,300,000; of this about a million's worth was disposed of by private contract

In the Zoological Gardens at Berlin, a large bear recently fell ill. Medical aid was called in, but the animal hourly waxed worse and worse, and was given over. A sudden, however, it roused itself, and with terrible efforts and groans ejected from its mouth a coarse napkin containing two or three pounds of cherries, which had fallen into its den.

The Astronomer Royal having undertaken to select a name for the planet discovered on the 24th of June by Mr. Hind, proposes to call it "Melpomene." This planet is one of the nearest to us of the group between Mars and Jupiter, the period of revolut on being 1269 days, which places it between Flora and Victoria

Died at Bushey, Hertfordshire, on the birthday, August 4, aged 97, John Scrimshaw, a soldier in the British army, and who was present at the battle of Bunker's hill, June 17th, 1775

On Monday morning, while a man was ploughing in a field by the Prince Albert public-house, East Surrey-grove, Peckham, he turned up a gold coin weighing half an ounce, and bearing the following inscription:—"Joannes V. D. G. PORT. ET ALG. REX A. 1747," and which, from its appearance, must have been in the ground a great length of time.

The equivocality of many of the names of places in Scotland has given occasion to a very amusing saying regarding a clergyman of the Free Kirk "He was born of *Bull*, brought up as the school of *Dunse*, and finally settled minister in the parish of *Brose*."

An extraordinary blast or explosion of powder, ignited by means of electricity, took place in Garnatte, Quarry, near Edinburgh, on Monday last Something more than half a ton of powder was used. There were fifteen simultaneous charges, bearing off, on a rough calculation, not less than 140,000 cubic feet of stone. This is the fourth explosion of the same kind that has taken place in this quarry.

Steam navigation has lately increased in an incredible manner at Constantinople. More than twenty steamers now p y daily in the Bosphorus and the Sea of Marmora. It is said that a Russian company is about to be formed, which will have twenty vessels, to run in opposition to those now established.

The Count de Béthune, whose fixed residence was at Brussels, but who had been for some time at Spa, was returning to the latter place on horseback on Saturday last from Verviers, in Belgium, when his horse took fright at the whistle of a railway train which was about to start, and ran against a railway carriage. The Count, in order that he might not be carried by the train, threw himself off, and, in falling, fractured his skull so dreadfully that he died soon afterwards.

A Paris letter in the *Independance* of Brussels, states that the President of the Republic, aware of the attentions of which Count D'Orsay stood in need during his illness, caused two-thirds of his year's salary to be paid to him in advance.

The Tribunal of Correctional Police condemned, on Saturday last, M. Jeanne, stat uaer and dealer in works of art, in the Passage Choiseul, Paris, to six days' imprisonment and 200f fine, for having exhibited in his shop Lenormant-tombeaux of a seditious character. Amongst them were portraits of the Count de Chambord, with the inscription, "Henri V., King of France." A number of the things complained of were seized, and were ordered to be confiscated

M. Schnetz, painter and member of the Institute, has been named director of the French School at Rome, in the room of M. Alaux, whose functions will expire on the 31st of December next.

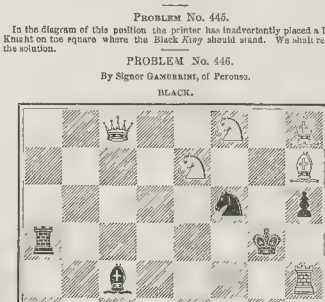
PROBLEM No. 445.

In the diagram of this position the printer has inadvertently placed a Black Knight on the square where the Black *King* should stand. We shall reserve the solution.

PROBLEM No. 446.

By Signor GAMBERINI, of Perouse.

BLACK.



WHITE.

White or Black, having the first move, is to mate his adversary in four moves.

CHESS BY CORRESPONDENCE, IN RUSSIA.

The two following games were played simultaneously by correspondence, between Mr SCHUMOFF (at St. Petersburgh) and Mr. KIESERITZKI (at Moscow), both begun September 5th, 1850.

(Scotch Gambit.)

WHITE (Mr. S.)	BLACK (Mr. K.)	WHITE (Mr. S.)	BLACK (Mr K.)
1. P to K 4th	P to K 4th	15. B takes B	K takes B
2. Kt to K B 3d	Kt to Q B 3d	16. Q to her Kt 3d (ch)	P to Q 4th (e)
3. P to Q 4 h	P takes P	17. P to Q B 3d	Q to Q B 5th
4. B to Q 4th	B to Q B 4th	18. P takes P (ch)	Q takes Q P
5. P to Q B 3d	P to Q 6th (a)	19. Q R to K sq (ch)	K to Q 2d
6. P to Q Kt 4th	B to Q Kt 3d	20. P to Q B 4th	Q to K Kt sq
7. P to Q Kt 5th (b)	Q to K 2d	21. R to K 7th (ch)	K to Q B sq
8. Castles	Kt to K 4th	22 Q takes Q P	R to Q R 4th
9. Kt takes Kt	Q takes Kt	23 K R to Q sq	P to K R 4th
10. Q to her Kt 3d	Kt to K B 3d (c)	24. Kt to K 5th	P to K R 3d
11. It takes K B P (ch)	K to his 2d	25. Kt to K 6th	P to Q R 3d
12. Kt to Q 4d	P to Q 3d	26. B to Q Kt 2d	Q to K Kt sq
13. Kt to K B 3d	P to K B 4th	27. It takes R	B to Q Kt 8th
14. Q to her Kt 2d	Q to her B 4th	28. B takes Kt, and Black surrendered	

Notes by Major Jaenisch.

(a) A feeble move; Mr Kieseritzki happening at this time not to know the correct answer, which, as also "Analyse Nouvelle" has shown, is 5 Kt to K B 3d

(b) Mr Schumoff would have derived no decisive advantages from his opponent's error at move 5, if he had not evaded himself of the temptation of carrying on the attack shown in the "Chess-Player's Handbook," pp. 158, 159 Mr Heydebrand and der Lasa is of opinion that Black can easily retrieve himself by playing, instead of—7, Q to K 2d, 7, Kt to Q 5 th, followed by 8. *White* B takes Q P; *Black* P to Q 4th. I will not presume to decide upon the point.

(c) This is too hazardous, but Mr Kieseritzki would not, *cette qui cotte*, have a crowded game.

(d) The game from this point becomes extremely animated and interesting

(e) If he had retired the King, White might have answered with Kt to Kt 5th, having an attack quite irresistible

SECOND GAME.

(Muzio Gambit.)

WHITE (Mr. K.)	BLACK (Mr. S.)	WHITE (Mr. K.)	BLACK (Mr. S.)
1. P to K 4th	P to K 4th	38. K P takes B	K to B 3d
2. P to K B 4th	P takes 4th	39. K to B 2d	R to K sq
3. Kt to K B 3d	P to K Kt 4th	40. K to B 3d	P to Q Kt 4th
4. B to Q B 4th	P to K Kt 5th	41. Kt to Q 4th	Kt to Q B 8th
5. Castles	P takes Kt P	42. P to Q B 4th	Kt takes Q Kt P
6. Q takes P	B to K R 3d	43. P takes P	P takes P
7. P to Q 4th	P to Q 3d (a)	44. K to B 4th	P to K R 3d
8. K B takes K B P	Q takes B	45. P to K K 4th	Kt to Q R 8th
(ch)	K takes B	46. P to K Kt 5th (ch)	P takes P (ch)
9. B takes P	B takes B	47. P takes P (ch)	K to Kt 2d
10. Q to K R 5th (ch)	K to Kt 2d	48. R to Q 3d	Kt to Q Kt 3d
11. R takes B	Kt to K R 3d	49. K to Kt 4th	R to K 4th
12. Kt to Q B 3d	R to K B sq	50. R to K B 3d	R takes Q P
13. Q to K 5th	Q takes R	51. P to K B 5th	R to Q 5th (ch)
14. Q to K Kt 5th	K to R sq	52. P takes Kt and	K to his 5th
(ch)	Kt to K B 2d	"Queens" (ch)	K to his 5th
15. R to K B sq	Kt to K B 2d	53. Q to K 7th (ch)	K to Q 5th
16. Q to K R 5th	B to K 3d	54. Q takes Q B P	P to Q 4th
17. P to Q 6th	Q to K R 3d		
18. Q takes Q	Kt takes Q		
19. R to K B 6th	B to K B 7th		
20. R takes Kt	K to Kt 2d		
21. R to K R 4th	Kt to Q 2d		
22 Kt to Q Kt 5th	P to Q R 3d		
23. R to K 4th (ch)	K to B 3d		
24 R to K 4th (ch)	K to his 2d		
25. Kt to Q 4th	B to K Kt 3d		
26. P to K 4th	Kt to Q B 4th		
27. Kt to K B 5th (ch)	B takes Kt		

The game at this point was interrupted by mutual consent, on account of a long journey which Mr. Schumoff has undertaken into the interior of Russia.

(a) In a letter to the editor, Major Jaenisch observes upon this move: "Mr Kieseritzki being known as a great connoisseur of the Muzio attack, Mr Schumoff was advised to forbid it by adopting the somewhat uncommon defence characterised by the moves (*Black*) 5 Kt to K B 3d, and 7. P to Q 3d, in order to play against (*White*) 8 Q R takes P. (*Black*) 8 Q to K B 3d. Mr Petroff, to whom I have since subjected the matter, is of opinion that the proper response for Mr Kieseritzki, instead of his hazardous sacrifice (*White*) 7 Kt to K B P (ch) (by which, however, he could at least have drawn the game, was (*White*) 8 Q to K R 3d.

(b) At this point Major Jaenisch remarks: "This move which will double the rook Black has gained cannot possibly be understood without explanation, and is a curious instance of the full rule of chance even in games of chess by correspondence, as in general in fancy operations. When Mr Schumoff received Mr Kieseritzki's letter containing the move, *White*, 14 R to Q R 5th, which was with a R 4, or 7 to 3, he supposed it was another [illegible] Admiral intended to advance his Q R Pawn to Q 7 th (ch), or, as I do not doubt, to threaten, with the view to profit by the immense advantage which would then [illegible] 14 P to Q Kt 6th, threatening his Pawn just now [illegible] and then probably forcing a game with a Kt more on the board, and this by correspondence!"

A BLESSING ON THE FLOWERS.

BY MRS. T. K. HERVEY.

Bishop Hall tells us, in the "Triumphs of Rome," that upon the 15th of August, it was customary to implore blessings upon herbs, plants, roots, and fruits.

It was an ancient Roman rite,
We keep it to this day,
For sacred still in Heaven's sight
The prayers that children pray;
And they are children yet in soul
Who praise the fruitful hours,
And while the gracious seasons roll,
Breathe blessings on the flowers.

There's not a plant upspringing glad,
To meet the sunbeam's kiss,
But hath its smile of welcome had
In some fair land like this;
Each tree that shades the healing well,
Where pilgrim feet may fall,
Each herb that stores the wild bee's cell;—
Kind blessings rest on all.

The good old Saxon mead was brewed,
From honey of the bells,
And still by field and lane and wood,
The horn of Nature swells;
Precious the thorny rose we press,
Where off our footstep passes,
The very bread we break and bless;
Comes of the waysede grasses.

In sickness let us bless the vine,
That robes the sun-browed hill,
In health the fevered cup design,
With a stern Roman will;
And when our last faint thoughts escape,
Our last slow steps depart,
Be all our memories of the grape,
A vintage of the heart

Where is the growth God hath not blest?
The same protecting law
Sends the rich cowls where pride may rest,
The poor man's pallet straw;
By rushy waste or weedy knoll
The moaning bittern breeds,
The lark that sings the ransomed soul
Nestles among the reeds.

The forest pines whose summits quiver
Beneath the lightning flashes,
The tender stems that drooping shiver
To meet the soft rain-splashes,
All feel alike the awakening call
That hits towards the sky,
Low breathing, as the dead winds fall,
Their Father's name on high.

Shall He not love the things He made?
Shall we not praise them too?
"Blest be the flowers," the Roman said,
"Fed by the Roman dew;"
And though on firmer faith we rest
And better lore is ours,
Who blesseth them, he too hath blest
The Giver of the Flowers!

COLONIAL AND INTERNATIONAL POSTAGE.—A meeting of the association formed during the Crystal Palace Exhibition in Hyde Park, for the purpose of promoting a cheap and uniform system of colonial and international postage, was held at the house of the Society of Arts on Tuesday, when the following resolutions were unanimously adopted:—"That it appears to the association that all the arguments used by Mr. Rowland Hill in favour of the justice of a uniform rate of postage apply certainly to colonial, and probably to foreign correspondence. That the cost of conveyance, as was proved by Mr. Rowland Hill, depends upon the number of letters, and not upon the distance, and that therefore the justice of a uniform rate is evident. That the association welcomes the recognition of the principle in the recent adoption of uniform rates for printed papers to some of our colonies. That the simplicity and convenience of pre-payment also appear to apply to colonial and foreign correspondence." The Right Hon. the Earl Granville has consented to become president of the association.

CHRISTMAS BOXES TO POSTMEN.—The following notice, addressed to all postmasters, sub-postmasters, clerks, letter-receivers, letter-carriers, post-messengers, and others, employed in the service of the Post-office, has been issued by the Postmaster-General:—"The attention of the Postmaster General having been drawn to a practice, prevailing amongst some officers of the department, of soliciting Christmas gifts from the public, his Lordship desires it to be known that he considers such a practice as objectionable in the highest degree, and has to be resolved to remove from the service any officer who, after this not ce, shall be proved to have solicited from the public any Christmas gift or other gratuity whatever. The postmaster will require every person attached to his office to read and sign this instruction."

DISCOVERY OF A GROTTO.—A very curious grotto, 800 feet long by 70 fast in width, and richly encrusted with stalagmites and stalactites of the most varied and fantastic forms, which it must have taken ages to generate, has just been discovered at Montecatini, in Tuscany, a place celebrated for its powerful mineral springs. The most singular circumstance connected with this grotto is that its temperature is permanently at 96 degrees Fahrenheit, which, together with the close air, renders it impossible to stay within unless in a state of nudity, and even then a copious perspiration is unavoidable. The water slowly filtering in from all sides, has formed a sort of lake within, to which a flat boat has now been conveyed for the convenience of visitors. This grotto has only been explored to the extent above mentioned; but it is considered certain that it has extensive ramifications, indications of which have already been found.

LIMERICK SCHOOL OF DESIGN.—Mr. David W. Reimbach, late second master of the School of Design at Belfast, has been appointed by the Board of Trade head master of the School of Design, about to be opened in Limerick.

PROVIDENT WORKING MEN.—A quiet, unassuming little society has been in existence for the last two years amongst the journeymen compositors of London, called a "Widow and Orphan Fund," to which the members contribute a small weekly sum; and we understand the committee has, up to the present time, had the gratification of dispensing no less than £380 to the families of deceased members. At the time of enrolment, Mr. J. Thad Pratt, the Registrar of Friendly Societies, is stated to have made the remark, that "he loped the example of the printers of London would not be lost upon other trades, who would do well to establish similar societies." At that time widow and orphan funds were being established on a few of the great railways of the metropolis, and are now, we believe, extended to the majority of them. We learn, that although the compositors' fund is a self-supporting, it has received some assistance in the shape of donations, and the committee of the fund will gratefully to acknowledge the receipt this week (per Mr. Joseph Weiler) of £5 from William Scott, Esq., of New-street-square, City. This, and other acts of kindness from benevolent gentlemen, will surely have their weight with those possessed of munificent means to lend a helping hand to an infant society, the object of which must be acknowledged to be highly praiseworthy, and deserving of support, especially when it is considered that the metropolitan printers are, literally speaking, public servants, devoting their short lives, by night almost as much as by day, to the dissemination of intelligence to the world.

FETE TO THE CHURCH OF ENGLAND SCRIPTURE READERS' ASSOCIATION.

THE members of this association, engaged in the metropolitan districts, on Wednesday enjoyed the hospitality of Lord Robert Grosvenor, at his magnificent residence, Moor Park, near Watford. This is the second time his Lordship has thus manifested his regard for this very useful body of lay evangelists; and the entertainment provided, and the Christian courtesy and unaffected condescension displayed by the noble host, Lady Robert Grosvenor, and every member of the family, will long be gratefully remembered by those who had the privilege of being present. Upwards of 100 scripture readers were conveyed to the Watford station by the eleven o'clock train, and from thence to Moor Park by waggons, at his Lordship's expense. On their arrival they met with the most cordial reception from the noble Lord and the several members of his family. The visitors having inspected the magnificent mansion, at two o'clock the party sat down to a sumptuous dinner, served in the Cyprian Hall (so called from the distinguished artists who decorated it). Lord Robert Grosvenor presided, and was supported by the principal members of his family, and the Rev. Mr. Hodgson, Vicar of Bookmansworth. Mr. Kingscotes, one of the founders of the society, occupied the vice chair.

The cloth having been removed, the following toasts were drunk and

FETE TO THE CHURCH OF ENGLAND SCRIPTURE READERS' ASSOCIATION, IN MOOR PARK.

duly acknowledged:—"The Queen;" "The Bishops of London and Winchester, the patrons of the association"

The noble chairman, in a very complimentary speech, then gave "Prosperity to the Association, joined with the health of Mr. Kingscotes, one of its most active founders." (Enthusiastic applause.)

Mr. Kingscotes, in responding, said, he regarded it as a great mark of their esteem to couple his health with the success of the association. The blessing of God had already rested on the work in which they were engaged, and there was reasonable ground for expecting an increased measure of success. If the parochial system were to be carried out, it was absolutely necessary that there should be some persons to help the committee in their onerous work. Clergymen were coming to them, day after day, praying for help. In one parish (St. Giles's) there were now ten missionaries employed. The late incumbent of St. Giles had opened an evening service wholly for the poor. About 800 had constantly attended, and there was reason to believe that, through this instrumentality, God's Word had been blessed, to the salvation of many souls.

The noble Chairman next proposed the "Health of the Rev. Mr. Hodson, Vicar of Rickmansworth."

Mr. Hodson briefly responded

Mr. Goodman then proposed the "Health of Lord Robert Grosvenor, Lady Robert Grosvenor, and the rest of the family."

This toast was warmly acknowledged, the company upstanding.

Mr. Bellington, the senior Scripture reader, then read an address to Lord Robert Grosvenor, signed by 104 Scripture readers, thanking his Lordship for his kindness and hospitality, and for his munificent gift of £500 towards the formation of an insurance and benefit fund.

The noble Lord responded in a feeling address, wherein his Lordship said:—"I remember that upon a former occasion, when I had the pleasure of seeing you under our roof, it was not long after we had taken possession of this inheritance, where I think you will all agree with me in saying that 'Our lines have fallen in pleasant places.' (Cheers) I then said that it gave us great pleasure to inaugurate our new inheritance in a way which might be said publicly to declare our allegiance to our great Master, under whose banners we were enlisted at our baptism and which enrolment was solemnly affirmed by our mature assent and consent, in confirmation. By a singular coincidence, this room, which required a complete renovation, in order to preserve it from decay, was finished only a few weeks ago, and this is the very first assembly that has taken place in it. I hail the auspicious augury, and I sincerely pray that no use hereafter made of it may ever detract from that sacred cause which our festivities upon the present occasion are intended to uphold and maintain." (Cheers). His Lordship concluded by bidding his visitors a hearty welcome.

The party then withdrew, some to promenade in the beautiful demesne, some to enjoy the healthy game of cricket.

At seven o'clock the company again assembled at the mansion, and having partaken of tea and coffee, they sang a hymn, and bade a hearty farewell to the noble host and his courteous and interesting family.

SHEERNESS DOCKYARD BRIGADE MANŒUVRES.

THE Royal Dockyard Brigade at Sheerness displayed, on Monday week, an interesting series of manœuvres, in order to test their general efficiency; commencing with a sham attack upon Queenborough, und mand of Lieut.-Colonel Read. The brigade left the yard in boa for the service of embarking and disembarking troops and or when the procession passed in excellent order, saluted by the the *Monarch*, 84, Captain C. Hope; the boat brigade in advanc Captain Flynn; the artillery, commanded by Major Laws, in f rear of the infantry, commanded by Major Freeman.

The men went through their movements with remarkable Having received the command of Colonel Read through the bu skirmishers landed, and extending, kept up a brisk fire, soon j the artillery; when, to the surprise of Colonel England—an able artillery officer—from the time of the bugle sounding to gun being landed and fired, was but the short space of "two" A temporary bridge being thrown across the fleet by the men, fantry crossed, and took position in the field under the fir artillery and boat brigade, the latter firing from the gun-boa water. Shortly afterwards they were joined by the artillery, through several evolutions admirably, when the right battery of and skirmishers stormed and took possession of the height stands Queenborough Castle, and fired towards the main body being steadily returned. The whole passed off remarkably w guns and men, again embarking, left the shore, with three ch Colonel Read and the officers; the band played "Rule Bri landed at the yard, formed companies, and marched out. T body, with regular drills, and a few more of them annually, wi less, be a valuable force to defend the entrance of the Thames.

THE SHEERNESS ROYAL DOCKYARD BRIGADE ATTACKING QUEENBOROUGH.

RESTORATION OF THE CHURCH OF ICKLESHAM, SUSSEX.

The ancient Parish Church of St. Nicholas, Icklesham, within a few miles of Hastings, which has been in course of restoration for the last, five years, was re-opened under the happiest auspices on Thursday the 30th ult. This church, in the patronage of the Bishop of Chichester, was found by its present incumbent, the Rev. H. R. W. Churton, late preacher to the Charter House, in a dilapidated condition. His indomitable perseverance and self-denying exertions, encouraged and assisted by his affectionate parishioners and private friends, have at length effected the restoration of one of the finest old edifices in this part of the country.

The work has been admirably executed by Mr. Teulon, the architect. The cost has been upwards of £2000; the appeals made to the liberality of the congregations on the 29th ult., towards supplying a deficiency of £800, were generously responded to, and the collections amounted to upwards of £110.

It may be expected that Icklesham Church will henceforth prove one of the many points of attraction to visitors in a neighbourhood already celebrated for its antiquities. Winchelsea, so well known to tourists, is situated in the midst of the parish of Icklesham, from which the site of modern Winchelsea was cut off by the order of Edward I., in the year 1280, in consequence of the destruction of old Winchelsea by an inundation of the sea. It gave an Earldom to the house of Finch, in the person of the Countess of Winchelsea, in the year 1628. Henry Finch, one of the ancestors of the present Earl, is buried in the south chancel of Icklesham Church, which is within a pleasant walk of the Winchelsea station, on the South-Eastern Railway.

The Illustration shows the restored nave of the Church, west and north; a remarkably fine specimen of Norman architecture.

NAVE OF ICKLESHAM CHURCH, RESTORED.

LARGE TORTOISE AT THE SURREY ZOOLOGICAL GARDENS.

IMMENSE TORTOISE.

This stupendous tortoise has just been added to the collection of animals in the Surrey Zoological Gardens. It has recently been imported from India. By the number of plates of the vertebral carapace, this specimen is supposed to be upwards of 200 years old. It is the *Pyxis arachnoides*, so called by Mr. Bell, who has very closely studied the habits and economy of tortoises, and has possessed, we believe, for many years, a very fine animal of this genus. There is a remarkable similitude between its hind legs and those of the elephant. In warm countries, which are more congenial to the habits of the tortoise than our variable climate, specimens are sometimes seen of a much larger size than even the vast one now under notice. In this genus (*pyxis*), the anterior part of the plastron or shell is moveable on a transverse hinge, and shuts up the head and fore limbs. Slow, quiet, and inoffensive, this reptile seldom wanders far from its haunts, and trusts only to its passive means of defence when molested. The specimen here figured is in excellent health, and will carry two grown persons on its back.

THE CITY STEAM-BOAT COMPANY'S FETE.

On Saturday last, the 7th inst., on the occasion of the annual festival of the crews and servants of the City Steam-boat Company, so well known

THE CITY STEAMBOAT COMPANY'S VESSELS.

on the river Thames between Chelsea and the City, the Company's thirteen vessels assembled at London Bridge, and proceeded from thence up the river in alphabetical order (A to N), by which letters the boats are distinguished, as well as by the names of the thirteen senior City Companies.

Their appearance on different parts of the route was very striking, particularly between Vauxhall-bridge and Chelsea, where the river being less frequented by barges and other craft, afforded a more open view of the entire line of steamers. After passing Battersea-bridge, the boats were put through sundry evolutions, with the view of combining the perfect control the captains have, even in the most difficult circumstances, over the movements of their several boats. The vessels were then moored off the Company's dock-yard, and the crews lauded to prepare for their festival in the dry-dock, which was tastefully decorated with flags, &c., producing a novel and lively effect. The crews and servants of the Iron S eam-boat Company, who work in conjunction with them in the service of the public, were also present as guests; altogether, above three hundred persons sat down to well-provided tables, and spent the evening in social enjoyment.

The whole was under the direction and management of Mr. Barney, the able superintendent of the City Steam-boat Company.

NAVAL AND MILITARY INTELLIGENCE.

The Lords of the Admiralty have issued directions that in future all log-books forwarded to Whitehall from ships that have returned to or arrived in port, after having made passages, shall be a faithful copy of the ship's log, and contain a tract chart, having marked thereon the winds experienced during the voyage; and further, that in steam vessels' log-books, at noon of each day, the amount of coal on board, the number of days it will last (judging from the average consumption), and the number of hours' steam during the last twenty-four hours, are to be inserted in a column to be taken from the space now used for denoting the true bearings and distance. In the log-books of vessels fitted with a screw propeller, if under steam, the word "steerage" is to be put at the termination of each watch. Printed forms of log-books may be used, provided they be in every respect a true copy of the ship's log.

ARRIVAL OF THE MISSING STEAMER 'HARPY."—The *Harpy* steam-vessel, Lieutenant-commander Thomas A. Williams, about whose safety serious fears had been entertained, arrived at Portsmouth on Saturday evening last. It appears that her voyage from the south-east coast of America, where she served as tender to the Cleopatra, flag-ship, Rear-Admiral Henderson, Commander-in-Chief on that station, was both long and dangerous She left Rio on the 18th April, and Bahia on the 19th May, on her return to England, for the purpose of having such discovered in her boilers repaired. In consequence of those defects she did not reach Fayal until the 13th of July For this long period of time the endeavours to get a sufficient force of steam caused a rapid consumption of coal, till at length the fuel was expended. Recourse was then had to the less valuable portions of the ship's stores, after which the cabin doors were taken down, and coal bags, mess tables, and stools, and at length what guish and ruin could save on board, had all to be converted into fuel. When she reached Fayal, she had only half a tank of water on board, and all provisions were extremely scarce, although her officers and crew had been upon two-thirds the usual allowance for some period, and one-half for a short time, with only a pint of water a day per man. Much suffering was caused by thirst, and this must have been much greater, perhaps fatl ly so, had not Lieutenant Williams taken the precaution of economising the supply of water by saving the condensed steam, which he had collected regularly every ten hours, and had put into the water tanks. Nothing but the greatest exertions on the part of the officers and crew saved the *Harpy* from destruction, and preserved their own lives. She has brought home some invalids from the station, four Kroomen (intended for St Vincent, but which could not be received), and two distressed British subjects.

BOTTOMLESS LIFE-BOAT.—The Portsmouth papers make mention of a model life boat by Mr. Holbrook, which is at present being exhibited in that place, and which they state is so constructed that every part of it can be made use of to save life in case of fire or of shipwreck. The boat is made of mahogany, 50 inches long, to represent one about 26 feet long; it is without a bottom, as a safeguard against capsizing; there is a rope netting to prevent any one from falling through, and also on the outside for others to cling to After a storm is over, a waterproof bottom can be drawn over, and also a covering of the same kind placed over the head and other parts of the boat, and thus render it warm and dry. The boat can be made in various parts, separately, or in a number of compartments, filled with barrels, and so placed as to give great strength to the sides. The stretchers, thwarts, masts, yards, flagstaff, &c., are all separate life-preservers, if thrown out of the boat dashed to pieces; in fact, no part can sink. There are tanks on board, intended for food, clothing, compass, rockets, and many other things necessary; and even the small bags cannot be sunk if placed in these receptacles; and coffee can be boiled in a few minutes at the head of the boat, by a very ingeniously constructed kettle, with only a few chips; whilst the mast at the helm can have a fire close to him. There are also two floats that will hold up a man for about 100 persons in case the ship is sinking or on fire.

NAVAL PROMOTIONS.—By the new plan of naval retirement promulgated in an Admiralty Order, dated June 25, 1852, it was decided to reduce the number of commanders on the active list to 480, to be effected by selecting 50 commanders to be captains, and placing these officers on reserved half-pay. Of the established number of 480, 40 will be added to the list annually, yearly, until the number reaches 80, when the vacancies only will be filled up. By the same order the number of lieutenants were to be reduced by the promotion of 50 of their rank to be commanders, and placed on half-pay, and they will receive pay list, by selection in the same proportion of numbers as above stated, annually, until the number on the active list will be reduced to a number not permanently exceeding 1200. The Board of Admiralty have determined, in proceeding their resignation, promoted one-half of the number of commanders and lieutenants allowed for the present year, and the present Board have this day promoted and placed the remaining number to complete the 10 of each rank on the reserved half-pay list.

RIFLE MUSKETS.—The Commander-in-Chief desires that the rifle muskets now in course of supply to the troops—which is a proper sized ball in the first instance be furnished at the rate of 100 stand for each regiment, and the armine of the recent augmentation of the infantry thereby be provided for—may be distributed in equal numbers among the companies of each regiment at depôt, and placed in the hands of the head and most experienced marksmen. An arrangement has been entered into with the Ordnance department, by which the troops armed with these muskets will be placed in respect of ammunition two subsequent to the same footing as rifle corps, and all saved 20 rounds annually, two rounds to be issued in the spring, and the remainder in the autumn. It being, however, very desirable that the practice with these improved arms should be carried beyond the ordinary limits proscribed, wherein they may in the first instance have been placed, the Ordnance department will be prepared to issue a further special and similar allowance to corps stationed in particular localities where there is ample range for practice, a requisition forwarded through this department; but such additional portion must, in all cases, be deducted from the established annual supply of ordinary practice ammunition.

RAISING THE MILITIA.—On Saturday last orders were issued by the Lord Lieutenant of the county of Middlesex, and by the Lords Lieutenant of other counties to their deputies to take immediate steps for raising the required number of men in their respective districts to serve in the militia to be embodied in accordance with the act passed in the last session of Parliament; and during the next week general Courts of Lieutenancy will be held in most of the counties throughout the kingdom to carry the preliminary matters. To believe the deputies should use such means to induce the required number of men to come forward as volunteers, so as to prevent the ballot, and preserve that voluntary system which unpleasant means from being adopted to raise the number of men required. The bounty for volunteers is £6, and £1 is to be paid on coming forward, and the other £5 by instalments. On Wednesday an invitation to a number of the enrolled Chelsea pensioners who had been selected by Colonel Tulloch, the military superintendent of the pensioners for their efficiency, took place before the colonel and members of his staff, at the officers' quarters in Burlington road, in order to ascertain their competency to drill recruits, as a preliminary movement to constituting the staff of the militia, to the appointments of which efficient and competent pensioners will have the preference. Any pensioner who the men so selected will be called out immediately for 21 days' drill, previous to being appointed to the militia staff. Their pay during the period of drill will be 2s. 6d. per day, exclusive of pension, which they will receive besides. A similar process is being pursued in all the districts throughout the kingdom, and on Tuesday Lieutenant-Colonel Wood, of the Grenadier Guards, inspected a number of pensioners on Hampstead-heath, when several were approved of for service in the Royal Middlesex Militia.

A SOLDIER KILLED BY A COMRADE.—On Saturday night last a quarrel occurred between two privates, namely, Denis Ryal and William Savage, of the 17th Regiment, stationed in the Linen hall Barrack, Dublin, when Ryal stabbed Savage in the breast with his bayonet, and death immediately ensued The dreadful act was perpetrated in one of the barrack-rooms The cause of quarrel has not been ascertained. Ryal is in custody in the barrack

TEMPERATURE OF THE BOTTOM OF THE SEA BELOW THE GULF STREAM.—Lieutenant John Rodgers, in command of the United States coast survey hydrographic party off the Florida Reefs, states that in running soundings off the vicinity of Soldier Key, south of Cape Florida, to the depth of 116 fathoms, specimens of the bottom brought up retained a temperature of 58 deg., the surface water at the same time and day 81 deg.

The *Fire Queen* steam-yacht, Lieutenant Mason, of the *Victory*, acting commander, proceeded to Ryde on Monday afternoon, and brought to off the pier, where she embarked her Imperial Highness the Grand Duchess Catherine of Russia, and her Royal Consort the Prince George of Mecklenburg-Strelitz, and took them to Portsmouth, with the Russian Imperial standard at her main, which is a flag-ship *Victory* saluted. The illustrious visitors landed at the Queen's Stairs in the dockyard, where Admiral Sir Thomas Briggs and staff was in waiting to receive them, and proffered his carriage to convey them to the railway terminus at Landport, en route to London, leaving by the 2.15 P.M. train. Their Highnesses will return to the Isle of Wight in about a week.

COUNTRY NEWS.

THE CROPS.—The accounts received from all parts of the country are, generally speaking, most satisfactory as regards the cereal crops. There is, however, no doubt but that the recent heavy rains are calculated to produce the most disastrous effects now that the harvesting operations are being carried on A great deal depends upon the weather for the next few weeks. We regret to find that in some few districts the farmers are complaining of the appearance of mildew in their wheat crops. In Kent it is stated there is an extensive blight in the wheat, which has only been detected since the commencement of harvest operations. Oats have been cut in many places, and the produce is anticipated to be excellent, both as to quality and quantity. The barley also looks well. The disease in the potato appears to be unfortunately of a more general and virulent character than ever it was before, as it has exhibited itself in almost every part of the United Kingdom, and is rapidly spreading its influences. The most gloomy reports have been received as to the state of that crop in Ireland. The hay harvest promises to be good and abundant. Although serious apprehensions had at one time been entertained as regards the bean crop, the accounts recent y received report more favourably; and there is now a likelihood of a fair produce, though perhaps under the average. The pea and turnip crops indicate an abundant supply.

ELECTION INTELLIGENCE.—A vacancy in the representation of the city of Durham has been occasioned by the somewhat sudden death of Mr. Grainger, which we noticed in our last edition last week. Sir George Grey, who had been applied to to present himself as a candidate to the constituency, has declined. It is rumoured that Mr. Henry Fenwick, who lately contested Sunderland, will be the Liberal candidate.

NORTHUMBERLAND AGRICULTURAL SOCIETY.—The exhibition of cattle and implements of husbandry of this society for the present year, was held on Tuesday, in a fine open enclosure in the vicinity of Bedford, belonging to the Rev. J. D Carr. There was present a large number of the nobility and gentry of the county, including Earl Grey, the Lord Lieutenant, Lord Lovaine, one of the members recently elected for the northern division, and the heir apparent of the duke of Northumberland, and Sir George Grey. Many of the yeomanry and tenant farmers were also in attendance, and a considerable body of the agricultural labourers from the immediate neighbourhood. The weather was exceedingly favourable for the occasion, and the day throughout the close the show was interrupted for about a couple of hours by a violent storm. The dinner in the evening was under the presidency of Earl Grey, supported on the right and left by Lord Lovaine, Sir Matthew Bell Ridley, Bart., Sir [illegible] Bart, Sir Walter Trevelyan, Captain Grey, [illegible] Master of Newcastle, &c. Several loyal and appropriate toasts having been given, the company separated at an early hour.

CRYSTAL PALACE IN BATH.—A project has been started for the erection of a Crystal Palace in Bath. The site proposed is the Sydney Gardens: the eastern ends of the open space has been selected. The principal view of preserving the noble central avenue. The building, like the original Crystal Palace, will consist of a nave and transept: the nave is to be 144 feet long and 48 feet wide, and the transept 26 feet long, 48 feet wide, and 70 feet high. The outside will be supported by ornamental iron buttresses, and several improvements are to be introduced in the construction. The cost of the building is estimated at £6000, and it is proposed to form a company, and to raise the amount in 1200 shares of £5 each. We understand that Messrs. Fox and Henderson have agreed to erect the building, and render it fit for use in twelve weeks from the day of its commencement; and we believe we may add that there is much probability of the design being accomplished.—*Bath Chronicle.*

A PARTY OF PLEASURE FOR AUSTRALIA.—Among the passengers who went out to Australia in the mail steamer *Formosa*, which left Southampton on Saturday, was a gentleman of that town who went out in her on pleasure, and intend returning to England immediately. One of the gentlemen took his wife with him; the other only made up his mind to go in her a day or two before she sailed, as soon as he did so he went and paid his ninety guineas for a first class berth

WHITSTABLE OYSTER SEASON.—On Monday the Whitstable oyster-dredging season commenced. The whitstable oyster grounds never bore a finer crop than they do this year, and the oysters are well flaked and in full flavour. An extensive spat of brood oysters have been discovered on the grounds, and the weather has been highly favourable for it.

STRIKE AMONG THE CALICO PRINTERS AT BRADFORD.—In consequence of the printers not being able to comply with the terms proposed by the masters at the commencement of this season, they have struck work. On Friday week they marched in procession to the factory and fetched away their tools.

THE FACTORY LAW.—On Sunday a meeting of delegates from the factory operatives was held in the large room of the Cotton Tree Inn (Mr. William Farley's), Leeds-road, Bradford, "as the circular convening the meeting stated, 'to a decision upon the following questions:—1st, Is it desirable to apply, in the next session of Parliament, for a legislative enactment to restrict the moving power to 10 hours? 2nd, Whether the best means for securing such improvements in the present act, without at present interfering with its principle, as will make it really effective for its intended purpose.' Mr. Fayl Hargreaves in the chair. The discussion was long and warm, but the delegates present stated their opinions as to the working of the law The following resolution was unanimously adopted:—"That our endeavours during the present year to vindicate the principle of the Ten Hours' Act, and to accomplish the above objects, to urge upon our respective constituencies to provide such funds as may be necessary, and thus make the present Factory Act effective for its intended purpose."

FOUR MEN STRUCK WITH LIGHTING.—Between two and three o'clock on the afternoon of Tuesday last John Blaby, of Friswell; John Brandrick, of South Lynn; and Thomas Lyon, of Fincham, all in the county of Norfolk Lyne; workmen in the employ of Sir H. Peyton, Bart., of Swift's House, Bicester, were, in the farm stable, in which they had taken shelter during a storm, struck by lightning. Lyon and Brandrick were more or less scorched and otherwise injured, they are likely to recover

DESTRUCTION OF A MILL AT KEIGHLEY.—On Monday evening a fire broke out at the corn-mill of Messrs. W. and J. Bairstow, known as Hainsbeck Mills, which ended, after a few hours, in the entire destruction of the building, in spite of every effort to stay the progress of the flames. The building was an extensive one, four stories high, and 111 feet long, and situated near the toll-bar on the Hal fax road. The loss will amount to nearly £10,000. The premises were only insured for £3780.

FATAL THUNDER STORM AT MANCHESTER.—A terrific storm of thunder and lightning, accompanied by a heavy fall of rain and hail, occurred between ten and eleven o'clock on Tuesday morning, in the neighbourhood of Manchester, which occasioned the death of four persons and the injury of three others. The scene of the calamity was at Ardwick-green, the building of which is not yet completed, called Albert-terrace, situated in Ridgway-street, near Bradford-road, Manchester. The lightning struck nearly all of the houses, shattering the chimneys in many instances, tearing the plaster of some of the rooms and the framework of the windows. James Dowd, a labourer, at work in one of the rooms entered by the electric fluid, was killed on the spot. John Taylor, a slater, thirty years of age, who was also at work in another of the houses, was likewise struck by the lightning and killed on the spot. Two men who were in the ground-floor of the eighth house—William Glover, a carter, and Thomas Speakley, aged eighteen—were also struck dead. Three other persons residing in this row of houses were prostrated by the lightning, and rendered insensible for a considerable time.

HEROIC CONDUCT OF A CONVICT.—On Monday afternoon, three engineers attached to the factory at Woolwich Dockyard, went on board the *Wolfesea* steam-vessel, lying alongside the wharf-wall, adjoining the store-house, to assist in getting up the boilers, and the gang of convicts at work at the time on board the vessel, he voluntarily offered to go down into the boiler and take up the three engineers, which he did, assisted by his brother convicts, who all lent a willing hand; and, after many efforts, having to come up for breath several times to get fresh air, he succeeded in bringing up the three bodies through the narrow opening of the man-hole a most difficult task under the circumstances of the case, one of the engineers being of that class that they did not appear the slightest resistance in his body for upwards of a quarter of an hour after he was taken out of the boiler. Fortunately, all the engineers have recovered, and were able to attend to their work the following morning, still complaining of pains in their chests. It appears that Thompson has served two years and four months of the period of seven years' transportation, to which he was sentenced by a court martial for running away from a pigeot of the Royal Artillery, in which corps he was serving at Bermuda, and when relaxen drawing his bayonet on his serjeant He is a fine, tall young man

THE LATE ACCIDENT ON THE LONDON AND NORTH-WESTERN RAILWAY.—The inquest held on the body of William Floyd, who was killed near Coventry a few days ago, while travelling as a passenger upon this railway, terminated on Monday, when the jury returned the following verdict: "We, the jury, are of opinion that the cause of the accident was the defective state of the straps of the axle-box, thereby causing the death of William Floyd, and the jury cannot separate will out expressing their decided opinion that the inspection of similar carriages ought to be made more minute, and more frequently, so as to insure the safety of the public.

THE STOCKPORT RIOTS.—A special petty session has been recently convened at the Town-hall, Stockport, by Joseph Heginbotham, Esq., of Edgley House, High Constable of the Stockport division of the hundred of Macclesfield; and Mr. James Collier Harter of Broughton, High Constable of the hundred of Salford, for the purpose of assessing the amount of compensation (under £30) to be paid to certain claimants for damage sustained to their property during the late riots in Stockport and Heaton Norris. The Court consisted of the Mayor of Stockport (Mr. John Boothroyd), Mr. Thomas Walmesley, the town clerk, and the clerk to the magistrates. The claimants were all put to their oath, and the damage claimed, with a few exceptions, were allowed in full. The amount awarded is about £300, in sums varying from £1 to £50. Five cases were adjourned.

MIDLAND INSTITUTION FOR THE BLIND.—The foundation stone of a [illegible] building about to be erected in Nottingham, and intended to be occupied as a training institution and as an asylum for the indigent blind of the counties of Nottingham, Lincoln, Derby, Leicester, and Rutland, was on Tuesday laid by the president, the Right Hon. Earl Manvers, in the presence of a considerable number of spectators

RECIPROCITY TREATY WITH FRANCE.—The Belfast Chamber of Commerce, an association composed of the first mercantile men in Ireland, have appointed a sub-committee of their body to prepare a memorial to the Government, on the subject of the duties on French wines, and requesting that the Chamber should be represented at such importance to the mercantile community of the north of Ireland, that a special meeting of the Chamber was ordered to be called for Saturday, the 24th inst.

SANITARY OPINIONS.—At the Nottingham assizes, Baron Alderson complained of the intolerable smell in the court. Mr. Wilmore, Q.C., said there was a universal stench throughout the town. He had found the same unpleasant smell, on every part of the town he had visited. (Laughter.) Baron Alderson: I will not let the Court rise till the smell is stopped. I would sooner sit on a dunghill. I will fine the county if it goes on. Serjeant Miller said the stench was considerably worse in the passages of the court. Mr. Macaulay, Q.C.: My Lord, it is partly accounted for: there has been a local board of health established here. (Loud laughter.)

FATAL BOAT ACCIDENT.—A pleasure boat, containing the Rev. Dr. Lawrence, rector of Limerick, his son and some aged respectively twelve and thirteen; his nephew (son of Colonel Power, at present in India), aged seventeen, and two seamen, while proceeding last week from Limerick to Youghal, was suddenly capsized; when the whole party, with the exception of the Archdeacon and one of the seamen, met with a watery grave. The rev. gentleman was discovered clinging to a rock, quite exhausted, and almost insensible. The boatman saved himself by means of a plank, which he succeeded in grasping.

DEATH BY DROWNING.—A few days ago, as Mr. James Bailey, son of Major Bailey, of Stapeley, near Nantwich, a fine young gentleman, aged nineteen years, was bathing at Wistaston, he was drowned. The deceased was swimming across the pool, when he suddenly sank and was drowned. He is supposed to have been attacked with cramp, as he was a good swimmer.

DESPERADO RENT BURGLARY.—Mr. Gerrard, a farmer, resides near Didsbury, about five miles from Manchester; and about nine o'clock on Monday evening he and his wife, two chi dren, and a man and maid servant, had just retired to bed, when they heard a number of men rush up the farmyard to the back door. On looking out at the back bed-room windows they saw four or five armed men, wearing masks, who presented pistols and demanded admission. Mr. and Mrs Gerrard went to the front window, and there they encountered two more armed men, who presented pistols. As they then removed all their prisoners into a cellar and locked them up. They pondered the house of £10, and a quantity of clothes, a watch, and Mr. Gerrard's gun, and then went and sealed it under the pool, where he suddenly sank and was drowned. He is supposed to have been attacked with cramp, as he was a good swimmer.

They pondered the house of £10, and a quantity of clothes, a watch, and Mr. Gerrard's gun, and then went and sealed it under the pool, where he suddenly sank and was drowned. He is supposed to have been attacked with cramp, as he was a good swimmer.

ESCAPE OF THE CONVICT SPARROW.—On Wednesday information was forwarded to the various metropolitan police-stations of the escape of the notorious convict William Sparrow, who was tried with two others. Hard and Mags, for the Frome murder, but was ultimately acquitted. Some time since he was arrested on the charge of having committed two daring burglaries, and was sentenced, during the present assizes, to 20 years tran portation, and conveyed to Wells, where he was keenly ironed, but, notwithstanding, on Tuesday evening last he adroitly managed to elude the vigilance of the gaolers, and escape. Sparrow is about 33 years of age, five feet high, sallow complexion, sharp grey eyes, and dark brown hair, cut short, and has a very sullen appearance. He was dressed in a short smock-frock, dark trousers, and white straw hat. Another convict named George Bell, under sentences of ten years transportation, also escaped from the same murder, but was ultimately acquitted. Some time since he was arrested on the charge of having committed two daring burglaries, and was sentenced, during the present assizes, to 20 years tran portation, and conveyed to Wells, where he was keenly ironed, but, notwithstanding, on Tuesday evening last he adroitly managed to elude the vigilance of the gaolers, and escape. Sparrow is about 33 years of age, five feet high, sallow complexion, sharp grey eyes, and dark brown hair, cut short, and has a very sullen appearance. He was dressed in a short smock-frock, dark trousers, and white straw hat. Another convict named George Bell, under sentences of ten years transportation, also escaped from the same dock, and

9½; Ditto, Oswestry, 15; South Devon, 19; South Eastern, 68½; Thames Haven Dock and Railway, 1½; York, Newcastle, and Berwick, 6½; Ditto, Extensions, 12½; Ditto, G. N. E. Purchase, 7½; York and North Midland, 46½.

LINES LEASED AT FIXED RENTALS.—East Lincolnshire (guaranteed 6 per cent), 148; Gloucester and Dean Forest, 32½; Wilts and Somerset, 104½.

PREFERENCE SHARES.—Chester and Holyhead, 5½ per cent, 19½; East Anglian, 3; Eastern Counties, 6 per cent, 14½; Great Northern, 5 per cent, 158½; Ditto, redeemable at 10 per cent premium, 14½; Great Western and Southern (Ireland), Eighths, 8½; Manchester, Sheffield, and Lincolnshire, New 2410, 14; Consolidated Bristol and Birmingham, 5 per cent, 148½, ex div; Ditto Preference, 4½ per cent, 8½; Norfolk Extension, 2½; North British, 100; Oxford, Worcester, and Wolverhampton, 6 per cent, 4½; York and North Midland, 10.

FOREIGN.—Dijon and Besançon, 2½; Grand Junction of France, 4½; Madras, 2½ pm; Namur and Liege, 6½; Northern of France, 24½; Ditto, 6% 3 per cent Bonds, 13½; Paris and Lyons, 19½; Paris and Strasbourg, 24½; Sambre and Meuse, 6½; Western of France, 9½.

Mines have been very inactive. On Thursday, Agua Fria shares were 1½; Australasian, 3; Australian Freehold, ½ to ¾; Bacon, 1; British and Australian Gold, ¼; Caroo's Creek, ¼ to 1; Colonial Gold, ½; English and Australian Copper Smelting Company, 4½; General, 9½; Liberty, 2; Nouveau Monde, 1½; Port Phillip, 1½; Tin Croix, 1⅜ to ½; and West Mariposa, ½.

FRIDAY AFTERNOON.—The Consols Market has been much firmer to-day, and prices have steadily advanced. The Three per Cents, Money and the Account, have marked 99 to 99⅛; the Three per Cents Reduced, 99⅛; and the New Three-and-a-Quarter per Cents, 102⅜. The Unfunded Debt is steady. Foreign Bonds dull; but the value of Railway Shares is well supported.

THE MARKETS.

CORN EXCHANGE (Friday).—The present week's arrivals of English wheat, coastwise, have been very moderate, viz. 2810 quarters, chiefly from Essex and Kent, and in fair average condition. From up-to-day by land carriage, the receipts were comparatively small, and the show of samples was limited. Holders generally were firm, but as we have a more favourable change in the weather, and a large import of American flour, upwards of 22 000 barrels, the demand was by no means so active as on Monday. However, a good clearance was effected, and, in some instances, really fine parcels were 1s per quarter higher than on that day. The transactions for forward delivery were limited, owing to the high rate of money by the growers. We had only a moderate show of foreign wheat. Good dry qualities sold readily on previous terms, while fine and secondary kinds was well supported. Floating cargoes of wheat and flour sold at very full prices. The barley trade, owing to the falling off in the arrivals, was tolerably steady, but we have no improvement to note in the quotations. Malt dull, at late rates. We had a better sale for good sound oats, at 6d per quarter more money. Other kinds as last advised. Beans, peas, Indian corn, and flour were tolerably firm.

ARRIVALS.—English wheat, 2810; barley, 222; malt, 300; oats, 6.0; flour, 830 sacks. Irish oats, 3690. Foreign: wheat, 9485; barley, 2118; oats, 11,060; flour, 1400 sacks 22 800 barrels.

ENGLISH.—Wheat, Essex and Kent, red, 38s to 44s; ditto, white, 40s to 50s. Rye, 30s new. Barley, 24s to 26s; malting ditto, 28s to 30s; Lincoln and Norfolk ditto, 28s to 30s; Chevalier ditto, 32s to 36s. Kingston and Ware, 34s to 35s; Chevalier, 36s to 38s; Scotch and Lincolnshire feed oats, 17s to 21s; potato ditto 18s to 24s; Youghal and Cork, black, 15s to 19s; Cork white, black beans, new, 30s to 31s; ditto, old, 31s to 32s; grey peas, 32s to 33s; maple, 31s to 33s; white, 32s to 34s, boilers, 33s to 35s per quarter. Town-made flour, 35s to 40s. Suffolk, 37s to 41s, Norfolk and Yorkshire, 37s to 42s per 280 lb. Foreign: American flour, 17s to 22s per barrel; French, 37s to 39s per sack.

The Seed Market.—The demand for most kinds of seeds is very inactive, at our quotations:—

Linseed, English, sowing, 50s to 56s; Baltic, crushing, 43s to 46s Mediterranean and Odessa, 44s to 47s; hempseed, 36s to 40s per quarter. Coriander, 10s to 13s per cwt. Brown mustard-seed, 7s to 9s, white ditto, 5s to 6s; and tares, 3s 6d to 4s per bushel. Rapeseed, new, £31 to £34 per last of ten quarters. Linseed cakes, English, £5 0s to £5 10s; ditto, foreign, £7 0s to £7 10s per ton. Rape cakes, £4 0s to £4 10s per ton. Canary, 35s to 40s per quarter. English clover seed, red, 40s to 52s; white ditto, 48s to 64s per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 6½d to 7d; of household ditto, 5d to 5½d per 4 lb loaf.

Imperial Weekly Average.—Wheat, 39s 7d; barley, 27s 8d; oats, 19s 0d; rye, 29s 7d; beans 32s 8d; peas, 33s 6d.

The Gazette Average.—Wheat, 42s 6d; barley, 27s 7d; oats, 19s 11d; rye, 30s 6d beans, 33s 10d; peas, 33s 8d.

Duties.—Wheat, 1s; barley, 1s; oats, 1s; rye, 1s; beans, 1s; peas, 1s.

Tea.—The public sales have passed off somewhat fully, yet prices have been mostly supported. Privately a fair business is doing, and common sound Congou is held at 9½d to 8½d per lb. The show of samples is large up to Saturday last. Duty was paid on 32 734,836 lb., against 14,362 729 ditto in 1851.

Coffee.—Owing to the withdrawal of the Treasury Order permitting the mixture of chicory with coffee, this market is firmer, and prices have an upward tendency. Good ordinary native Ceylon is selling at from 44s 6d to 45s per cwt.

Sugar.—Our market is steady, and late rates are firm. Fine yellow Barbadoes, 37s 6d to 38s 6d; middling to good, 33s to 37s; grocery, fine and good white Bengal, 39s 6d to 40s 6d; fine grainy yellow, 38s 6d to 39s per cwt. Refined goods move off slowly, at from 41s 6d to 42s for low to fine. The total clearances to the 31st inst. 4,653,890 cwt., against 4 205 706 ditto last year

Provisions.—Irish butter is in very moderate request, and somewhat lower to purchase. Fine weekly Dorset is quoted as 84s to 86s per cwt., and fresh, 80 to 82s per dozen lb Foreign rather drooping. In bacon very little is doing. Hambro' steadier, 62s to 66s; mocking 54s to 58s per cwt. Lard has advanced 1s to 2s. Hungary tradeless, 42s to 44s; Irish, 44s to 45s per cwt. Most other kinds of provisions are a slow sale.

Tallow.—In the auction sale business doing is by no means extensive; nevertheless, prices are well supported. P Y C on the spot is selling at 38s 6d; and for forward delivery, 38s 9d per cwt. Yellow, 37s per cwt, net cash; rough fat, 2s 4d per 8 lbs.

Oils.—Linseed oil is firm, at 30s per cwt on the spot. Sperm and Southern qualities are the turn higher. Otherwise, the demand is steady.

Spirits.—Brandy is in good request, and quite as dear as last week. In rum, very little is doing. Proof Leewards, is 2d to is 9½d; and proof East Indis, is 6d per gallon, proof.

Hops.—The demand is active, and prices continue to advance. Fates currents, 48s to 58s; Kents, 66s to 68s; and Valencia raisins, 33s to 34s per cwt.

Wool.—Since the close of the public sales, scarcely any business has been done in this market. Prices are, therefore, scarcely nominal.

Potatoes.—The supplies continue very large, and in excellent condition. The demand is steady at from 90s to 125s per ton

Cattle.—Prime Scots, at West Hartley, 13s 6d; Chesters' Main, 12s 6d; New Tanfield, 12s 3d; Redesmuth Main, 11s 8d; West Wylam, 12s 6d; Eden Main, 12s 3d; Lambton, 14s 9d; Silverwell, 14s 6d; Killing Nellies, 14s per ton

Hops (Friday).—Our markets is very scantily supplied with both yearling and old hops. The demand for all kinds is strictly confined to immediate wants, at last week's quotations. The plantation accounts are still in favour of a large growth; hence the duty is assumed to be from £190,000 to £200,000.

Mid and East Kent pockets, £6 0s to £10 10s; Weald of Kent ditto £5 0s to £7 7s; Sussex ditto, £5 5s to £6 5s; Yearlings, £3 10s to £5 0s; old olds, £1 0s to £2 2s per cwt.

Smithfield (Monday).—To-day's market was very sparingly supplied with beasts, the general quality of which was inferior The few prime breeds on offer sold readily, at fully Monday's advance in the quotations; otherwise, the beef trade was firm, and a good clearance was effected. The numbers of sheep were on the decrease, whilst the demand for that description of stock was somewhat active, and in some instances the currencies had an upward tendency However, the top figure for Downs did not exceed as per 8 lb. Calves were in short supply, and steady request, at very full prices; but the sale for lambs was far from brisk, a like rates. The pork trade ruled dull. Much cows sold slowly, at from £14 to £19 each, including their calves' calf.

Per 8 lb to sink the offals:—Coarse and inferior beasts, 2s 4d to 2s 8d; second quality ditto, 2s 6d to 2s 10d; prime large oxen, 2s 8d to 2s 8d, prime Scots, 2s 8d to 2s 10d, coarse and inferior sheep, 2s 10d to 3s 2d; second quality ditto, 3s 4d to 3s 8d; prime coarse-woolled ditto, 3s 6d to 3s 8d, prime South Downs, 3s 10d to 4s 0d, large coarse calves, 3s 2d to 3s 8d, prime small ditto, 3s 8d to 4s 0d; large hogs, 3s 0d to 3s 2d; neat small porkers, 3s 4d to 3s 6d; lambs, 4s 0d to 4s 8d; suckling calves, 19s to 22s, and quarter-old store pigs, 16s to 18s each. Total supplies, beasts 658; cows, 130, sheep and lambs, 7310; calves, 308; pigs, 320. Foreign: beasts 421; sheep and lambs, 1200, calves, 160. Scotch: beasts, 15.

Newgate and Leadenhall (Friday).—The general demand steady, at very full prices

Per sib by the carcass:—Inferior beef, 2s 2d to 3s 4d, middling ditto, 3s 6d to 3s 8d, prime large ditto, 3s 10d to 4s 0d; prime small ditto, 3s 8d to 4s 4d; large pork, 3s 6d to 4s 10d; inferior mutton, 3s 8d to 3s 8d; middling ditto, 4s 0d to 4s 4d, prime ditto, 4s 6d to 4s 8d, veal, 3s 8d to 4s 10d; small pork, 3s 6d to 4s 6d; lamb, 4s 6d to 5s 6d.

ST. MARK'S HOSPITAL.

THE first stone of this institution, one among the most needed and serviceable of the numerous charities which adorn the metropolis, was laid on Thursday last, by the Right Hon. the Lord Mayor, President of the Hospital *ex officio*. Prior to the ceremony, the committee and officers of the institution, with their ladies, were entertained at the Mansion House with an elegant *déjeûner*. The Lord Mayor arrived at the site of the building, situated in the City-road, soon after two o'clock, and was received with loud cheers. Mr. Harker having obtained silence, the proceedings were opened by an appropriate prayer, composed and delivered by the Rev George Taylor, honorary chaplain, after which his Lordship went through the usual form in a truly mason-like manner A brass plate was deposited beneath the stone, on which is engraved—

St. Mark's Hospital. The first stone of this Charity, founded October, 1835, as the Infirmary for Fistula and Diseases of the Rectum, by Frederick Salmon, Member of the Royal College of Surgeons, F S A., F.L.S., was laid by the Right Hon. William Hunter, Alderman, Lord Mayor of London, President, August 12, 1852 John Wallen, Architect.

ST. MARK'S HOSPITAL, CITY-ROAD: THE FIRST STONE LAID ON THURSDAY LAST.

His Lordship subsequently addressed the assembly in a simple and heart-stirring manner, setting forth the benefits the charity had already conferred, in having relieved 7500 poor since its foundation. The new hospital will be constructed to receive fifty in-door patients, distributed through light and airy wards, containing not more than eight beds in each—an original plan, likely to be productive of a great increase of comfort to the sufferers. Before the company separated, three cheers were given for her Majesty the Queen; three for Prince Albert, a governor of the hospital; three for the success of the undertaking; and a similar number for the Right Hon. the Lord Mayor, the committee and officers of the institution.

COMMENCEMENT OF THE ST. ANDREW'S AND QUEBEC RAILWAY.

THE first section of this important work was commenced with great ceremony on June 4, which will long be remembered by the inhabitants of St. Andrew's, and the county of Charlotte generally.

At nine o'clock the carriages, waggons, &c., with the directors, shareholders, and guests, drew up into line at the Court-House-square; and at half-past nine, the immense procession advanced, headed by the carriages of the Directors, in the leading one of which was displayed the Royal standard, and passed through Frederick, Water, Elizabeth, Queen, and Harriet-streets to the St. John-road; thence *viâ* Chamcook to the Ferry-road; and, after a pleasant drive through the woods, the procession arrived at Bartlett's farm, ten miles from St. Andrew's, the place selected for commencing the works. The ground was tastefully decorated with flags; and a large number of people from St. Stephen and the neighbouring state of Maine, assembled to witness the interesting ceremony. At twelve o'clock, Colonel Murray, the Administrator of the Government of the province, accompanied by Mrs. Murray, arrived upon the ground, and was received by the directors and officers of the company, under a salute of thirteen guns. His Honour and Mrs. Murray were then escorted to the spot selected for turning the first turf, when the Rev. Dr. Alley offered up an appropriate prayer for the success of the great undertaking.

The contractor, Mr. Brookfield, was then formally introduced to Col. and Mrs. Murray, and had the honour of presenting to Mrs. Murray the spade and barrow to inaugurate the work. Mrs. Murray then gracefully raised the first turf, deposited it in the barrow, and tipped it at the end of the plank prepared for that purpose, as emblematical of the commencement of the stupendous work. A salute of 19 guns was then fired in honour of the occasion. In the absence of the President, who was unavoidably prevented from attending, the Hon. Col. Hatch proceeded on behalf of the Company to cut and turn a turf; and was followed by Alexander Light, Esq., the engineer, and John Brookfield, Esq., the contractor, in the same operation. At the conclusion of this part of the ceremony Colonel Hatch addressed the meeting upon the advantages that must necessarily accrue from the connection of the great Atlantic by railroad with the great St. Lawrence and those inland seas stretching to the Far West. "It was a noble and magnificent scheme (said the hon. Colonel) to bring the products around the shores of this great sea to a point being the nearest on the waters of the inner Passamaquoddy, at St. Andrew's, to Quebec, and to exchange them with those brought from so populous and fertile a country as Canada." "The completion of the work," added Colonel Hatch, "would far outrun all present calculation in the good to proceed from it—in the immense trade—in linking the hearts of the inhabitants of the lower and upper provinces together—producing internal strength, union, and respect abroad; and, above all, to insure to them the continuance of the blessings of the British Constitution, which secured to all civil and religious liberty."

His Honor the Administrator of the Government then expressed the great pleasure which it afforded him to be present, and to have assisted at so interesting a ceremony.

Mr. Light and Mr. Brookfield next addressed the assemblage; Mr. Light observing that he had carefully examined and made surveys throughout the whole extent of the line, and had no hesitation in saying that there existed no difficulties of any importance. that the grades and curves were all particularly favourable, and that the general facilities for construction were all that could be desired.

"Success to the undertaking" was then drunk in champagne, amidst deafening cheers. "The health of her Majesty" was drunk; and "God save the Queen" was sung.

The company then retired to the Bower, where a cold collation was served.

EQUESTRIAN STATUETTE OF THE DUKE OF WELLINGTON, BY COUNT D'ORSAY.

THE beautiful Statuette, engraved upon page 120, is one of the latest works modelled by the late Count D'Orsay. The Duke is represented on his charger in an easy and natural *pose*, and holding his reconnoitring glass in his hand. The likeness is very good, and the expression of the figure of the iron Duke is admirably given. The horse is beautifully modelled, and the work fully attests the taste of Count D'Orsay, and his skill in the manipulative portion.

This Statuette, which is sixteen inches in height, is placed on a black marble pedestal, eighteen inches in height, by twenty in width at the base; resting on the outer edges of which are lions in bronze.

The noble Duke has expressed himself much pleased with this work, and upon learning that other copies would be produced by subscription, his Grace, at once consented to patronise the undertaking. The Statuette may be seen at Mr. Waleaby's picture-gallery, 5, Waterloo-place.

THE LATE COUNT D'ORSAY.

(With a Portrait from a Drawing on Stone, by R. J. Lane, A.R.A., published by Mitchell, Old Bond-street.)

WITH Alfred Comte D'Orsay there has died a remarkable man, and ended a strange career. He was never what is called a public character, and yet he possessed a European reputation. He never came openly into the lists as artist, author, or diplomatist, yet all who knew him were never tired of lauding his brilliant faculties for all these three departments of intellectual exertion. He lived a fated, semi-mysterious life. He was at war with society, yet society in its most brilliant items delighted in his converse. He outraged popular opinion; yet popular curiosity hunted him, and popular admiration paid him a sort of grotesque homage, sometimes sparkling of him with a sense adoration as a species of incarnate Apollo Belvidere, and then mocking him the hero of fantastic orgies, so wild and strange, that *gobemouchers* loved them from its heart. The story of D'Orsay's life is the tale of the mutual influence of two minds. Think it over, and it stands forth a strange romance of affection and infatuation—of the nicest susceptibility to one class of mental influences—of the sternest obduracy to another. A great career was broken—all social usages were set at nought—all ordinary paths of ambition were forsworn in obedience to the sway of one female mind. Beneath its domination a life of semi-exile—yet in its sphere full of delicious influence exerted upon the most susceptible of minds—a life of the studio, of the garden, and of the *salon* was led for years and years in the midst of every object of refinement and art; the inhabitants of the secluded sphere caresses of the world's judgment of its ways, but visited in their retirement by the world's most brilliant and dainty spirits. D'Orsay, whose life was not only a study but a romance, will probably yet point many a moral and adorn many a tale. Endowed with the mere gifts of person, the most brilliant powers of conversation, and an instinct for art, which led him to revel in its every branch; he was also a man of the kindliest mind and most amiable impulses, besides being blessed with an amount of fine sense and strong judgment rarely conjoined with the delicate appreciation of the arts. Yet with all his common-sense and power of judgment of the rule of conduct, and all his affectionate sympathies and longings, he could commit a life-long outrage upon affection, and support a life-long deviation from the rules of policy and propriety. Who shall reconcile these mysteries of character, or find the clue to this strange riddle of life? Had it been the conception of a novelist, it would have been pronounced brilliant and mean; captivating and repulsive; and its brilliancy and its meanness equally false. Critics would have proved its moral impossibility and its intellectual monstrosity; and so the romance of "The Comte d'Orsay" would take its place with the Vivian Greys and the Cecils of the age.

As yet the materials for a biographic account of the departed are exceedingly scanty. His life, when it is written, will be one of sensation; one of character, the subjective analysis of a peculiarly-constituted and peculiarly-placed mind. It is known that, in his early days, he kept a diary, and his

THE LATE COUNT D'ORSAY.

writes from Paris that, even amid its paroxysms, the sufferer could support conversation with admirable courage and finely-acted *bonhommie*. The writer adds, "If a tithe of the artists who beset his studio, to request favours, attend his funeral, we shall indeed require a monster train." Since, then, the last honours have been paid to the deceased. His beautiful and accomplished sister, and her husband, the Duke de Grammont, charged themselves with the final duties. To them Alfred D'Orsay was ever a loved relative, and it is said that in grief and bitterness of spirit he lately exclaimed that only their affection reconciled him to his "expatriation" from England. He had come to regard our country with another eye than that of the flippant young Frenchman prompt to fathom our *ennui* and its causes. He knew us better, and regretted us the more.

Alfred Count D'Orsay lies not far removed from the remains of the woman who ruled his destinies. In the churchyard of Chambourcy there rises a marble memorial. D'Orsay himself designed its proportions. On either side is a sarcophagus, surmounted by a tablet of white marble. The one is the grave of the Countess of Blessington—the other of the Count Alfred D'Orsay.

DEATH OF TONY JOHANNOT.

Death has been busy in the realms of art of late. The members of that band of choice spirits who adorned the splendid artistic epoch of Louis Philippe, are fast disappearing. Pradier has sunk into his grave. Death has carried off another of the most eminent French sculptors, Feuchères, who died in Paris, only two days after Pradier; and on Saturday last, whilst the remains of Count D'Orsay were being laid in their earthly resting-place, the funeral obsequies of Tony Johannot were performed in the cemetery of Montmartre by M. Coquerel, junior, the Protestant clergyman, in the presence of MM. Henry Monnier, E. Isabey, Diaz, Picot, Roqueplan, Perignon, Déraisne, L'Haridon, Derval, and other artists, friends of the deceased.

Tony Johannot was born at Offenbach in 1803, and devoted the earlier years of his life to the study of botany and music. He first became known by a picture, representing a woman giving drink to a soldier, which was exhibited in the Louvre in 1831, and at once established his reputation as an artist.

It was not by his painting, however, that he acquired his highest fame. His engravings on steel have placed him in the first rank of European artists: his illustrations of the works of Byron, Scott, Molière, Cervantes, &c., are *chefs-d'œuvre* universally known.

This eminent artist died in straitened circumstances: his end was sudden and affecting. On the 4th inst., after spending a cheerful afternoon at home with a party of friends, he went to the "cercle of Choiseul." On returning to his house he was seized with apoplexy, and, after lingering for a few hours, he breathed his last.

All the resources of medical art proved ineffectual, and his friends received at the same moment the intelligence of his illness and its fatal termination. His last thoughts, even in the agonies of death, were directed to his favourite art. "My picture will never be finished," said he, alluding to his "Ruth and Boaz," which he had on the day before his death so tenderly sketched. There can be nothing, in fact, more masterly than the treatment of the patriarch; nothing so touching, so chaste, so tasteful, as the attitude of the gentle daughter of Israel, who reverently bows before the aged man—

> Clasp'd by the golden light of morn,
> Like the sweetheart of the sun,
> Who many a glowing kiss had won.

STATUETTE OF HIS GRACE THE DUKE OF WELLINGTON, BY COUNT D'ORSAY.

THE LATE TONY JOHANNOT.

Near to this lovely sketch, on an easel, may still be seen some fresh and recent outlines which the great artist had intended as a fellow to another of his celebrated pictures, the "Episode de Pillage sous François I.," which was so warmly admired last year on its re-exhibition at the Louvre. The fortunate possessor of this picture is the Count de la Ribeaudière.

It was by religiously devoting himself to his favourite art (as his almost equally celebrated brother had done before him) that Tony Johannot hastened the fatal crisis which so suddenly paralysed his hand. A few days before his death he said to some of his intimate friends, alluding to the next exhibition, that he should not, on that occasion, allow himself to be forgotten, "as he had done for the last few years."

The death of this eminent man is a great loss to the literature of France and Europe. Poets and historians always found in him an able interpreter of their most eloquent conceptions, a rival in grace and imagination, if he did not surpass them all in depth and harmony.

Not only was Tony Johannot a great artist—he was something better—he was a good man, and may be held up as a model to the rising genius of France and other countries, to show the possibility of uniting the purely artistic life with the high and in every way respectable qualities which adorn a private existence, and which ought to be still more eminently the characteristic of the greatest artists than of others less exalted. Who, in fact, will not preserve a deep remembrance of the urbanity, trustworthiness, and modesty, of Tony Johannot?

On the very eve of this lamented event, when painting the chaste episode from the Book of Truth, his thoughts, no doubt, rose up towards Him who is an imperishable light for those whose genius is the manifestation of Himself on this earth.

Tony Johannot was, at the time of his death, in his 49th year.

COMMENCEMENT OF THE ST. ANDREW'S AND QUEBEC RAILWAY.

THE ILLUSTRATED LONDON NEWS

No. 574.—VOL. XXI.] SATURDAY, AUGUST 21, 1852. [TWO NUMBERS, 1s.

EMIGRATION AND THE GOLD FEVER.

THE most popular word of the present day is "Nuggets." The mystic syllables are founding an empire. Emigration has become the topic which swallows up all others, and throws into the shade even such once-engrossing subjects of discussion as Protection, Lord Derby's consistency, and the great Budget of Mr. Disraeli, still looming hazily—and lazily—in the distance.

In whatever light we may regard it, the present Emigration, or 'Exodus," of the two great British races, the Saxon and the Celtic, is remarkable. There is a simultaneous exodus of the Germans and Norwegians, especially towards the United States of America; but the British Emigration is the largest and the most important. It has recently divided itself into two principal streams—one, chiefly Celtic, over the Atlantic to the land of comfortable farms and easy elbow-room; and the other, chiefly Anglo-Saxon, across the Pacific to Australia. The Celtic Emigration, though not uninfluenced by the gold fever, and by visions of the diggings and "placers" of California, is, for the most part, industrial and agricultural, and looks more to the possession and cultivation of fertile land than to sudden enrichment by the discovery of gold. The other is far more influenced by the hope of sudden wealth in the mines, than by considerations of slower, and perhaps surer and better, wealth derived from commerce and agriculture. Yet, for a long period prior to the discovery of gold in California and Australia, the emigration from the British Isles had been annually increasing. The gold fever has merely added strength to a tidal efflux, that was strong enough before.

French, Italians, Spaniards, Portuguese, and the Central and Eastern Europeans, have remained almost inert. They seem to have lost the power of colonising, and the inclination for emigrating; and, with few exceptions, not to be compared with the out-going multitudes of Great Britain, they remain fixed to the ancient soil. Not so the Europeans of the north-west. Amongst these, want of room at home has forced the enterprizing abroad, and would have done so had California and Australia been as bare of gold as the sandy plains of Holland or the fens of Lincolnshire. But while the Celtic emigration has increased, not simply because gold was to be had for the washing or the digging, but in consequence of the natural operation of long antecedent causes, the Saxon emigration, stimulated by the gold-fever, has increased in a still larger ratio. A new class of people, better educated, and perhaps more desperate, and needing only the more powerful inducement that gold alone can supply, has for the first time found its native land too small and too poor to contain it. The middle stratum of society has been stirred. Sudden and boundless wealth is the dream that is dreamt. One paroxysm of cupidity has followed another. After the Railway Mania has come the Auro-Mania, and with the Auro-Mania have appeared all the ordinary and extraordinary symptoms and effects of popular credulity, rapacity, and excitement. The "diggings" is the word in everybody's mouth, while in too many instances the emigrant's scanty purse has been made the subject of a too successful rapacity and swindling by those who think that Popular Credulity is as good a California as any other. Those whose sole wealth lies in their stout right arms find rivals in men of softer and more polished manners, and with little capacity for physical hard work. The mere labourer of country or of town has no longer the market to himself; but law, physic, and divinity, the army and the navy, the shop and the desk, the betting-office, the gaming-house, and the casino, and the ancient and numerous confraternity of the "knights of industry," all contribute their levies to swell the popular tide that has set in towards Australia.

Those whose business it is to record the progress of events have long observed the rapidity of the process by which Ireland has been depopulating herself, to make the United States rich and

HER MAJESTY'S DEPARTURE FROM ANTWERP.—(SEE PAGE 130.)

powerful. That process has required no extraneous aid, and no forcing of any kind. Since the Australian fever broke out, England and Scotland have been shipping off the able-bodied and active-minded, who could find no profitable employment at home, with a rapidity almost as great, and have been founding by this means a Southern Empire, destined in due time to rival the great Empire of the West. The process, left to its natural development, was not rapid and satisfactory enough in any of our colonies. Canada, and those fine adjacent territories of Nova Scotia and New Brunswick, languish for want of British blood, and are in imminent danger of being subjected to the ignominious fate of being "catawampously" annexed by the American Union. Even Australia herself is not profiting as she ought, by the favour which she enjoys, and is exposed to the danger of losing as much, or more, in sheep and cattle, and other consumable and exchangeable commodities as she is likely to gain in gold. But in England there is scarcely any public evil for which a remedy or a relief is not attempted; and we notice with pleasure the concurrence of three several schemes for benefitting at the same time the colony, the British Empire, and that large class of deserving people, who, if left to the ordinary chances of life, would never emigrate at all, but remain behind, a source of weakness and expense to the public, and of discomfort and misery to themselves.

The first to which we would direct attention is the society for promoting female emigration, and which especially devotes its attention to the suffering class of needlewomen. Several interesting accounts have from time to time appeared in the public journals, of the departure of ship-loads of these fair victims, escaping from destitution and all its horrible concomitants in London, to plenty—and, let us hope—to happiness and honour, in a new land. In this class may be included the emigrational proceedings of the society or company formed under the auspices and management of Mrs. Chisholm; to which every friend of our colonies and of the working classes must, as we do, wish all possible success and prosperity.

The second movement is, as yet, but in its infancy; but is quite as important, and likely to be as useful to the colony, to the mother country, and to the emigrants themselves, as the first-named. There are, unfortunately, in almost every parish in Great Britain (though the number has sensibly diminished since bread became cheap), many poor men and their families who are either wholly or partially burdensome to the public, and who would gladly, if they had the means, emigrate to a country where their labour is valuable, and where their presence would be a blessing and not a curse to the community. It has been proved by the example set in the parish of St. Martin's-in-the-Fields, that these persons might be enabled to reach Australia at an expense to the public of less than a year's maintenance in the workhouse; and that, on the mere score of economy, any parish so disposing of them would make a good bargain for itself, and perform at the same time a benevolent and useful act. It seems that the praiseworthy example is about to be followed—and Australia, that refuses to receive our convicts and the dregs of our prisons and hulks, will be but too thankful to receive, and to help to pay the passage of, our honest and willing poverty.

The third movement is more important than either, because it includes in its operations a far larger area. The Western Highlands and Islands of Scotland suffer from the identical evils that have befallen the Irish. These evils are an erroneous system of land tenure, a too exclusive reliance on a precarious and low diet, and an almost insolvent landed proprietary. The poor people are in consequence reduced to a state which is deplorable to contemplate, and for which emigration appears to offer the only available remedy. They are a peaceful, a loyal, a religious, and an industrious race. Wherever they go they make friends and prosper, and their children and grandchildren become in due time the magnates of the land in which they are enabled to establish themselves. In the western isles there are hundreds of such estimable people surviving at this moment, and who would be invaluable to Australia, if they could be got there. "The people of those isles," says a letter with which we have been favoured by Sir Charles Trevelyan, the chairman of the London Committee for promoting their emigration, "are pressing upon us in greater numbers than ever to be sent to Australia, especially since the re-appearance of the Celtic scourge, the potato blight, which seems to be the appointed instrument of Providence to drive this race to other and more favoured lands. We have also had ships placed at our disposal to a great extent by the Government and the Emigration Commissioners. All we want is money to advance to the poor people for the payment of their deposits (which include bedding and cooking utensils) and outfits. The average cost is only £3 a head, of which £1, according to a rule of the society, which is always strictly enforced, is paid by the landlord. This peculiar feature of this emigration is, that the people go in entire families. Each ship is a colony in itself. From the grandfather and grandmother, to the newly-born infant, they all go."

Another letter, from Sir John MacNeil, relates a curious fact. The spirit of emigration has found its way, it appears, to the remote island of St. Kilda, and stirred up a desire to go to the Antipodes amongst a people who rarely ever visit places even so near as the main land of Scotland. "How they have caught the infection it is hard to say, but the fever is running high, and I should not much wonder," adds the writer, "if the whole 21 families, or 110 souls of which the population has consisted for the last dozen years, should propose to migrate, like a flight of their own puffins."

We shall no doubt have future occasion to record the efforts made on behalf of the unhappy Scottish Celts of the islands, but in the meantime, in connexion with the engrossing subject of Emigration, we recommend the society which has been formed for their transmission to the new land, where they are so much needed, to the attention of all who are interested either in the fate and prospects of this unhappy people, or in the permanent prosperity of Australia.

THE PRODUCTIVENESS OF THE AUSTRALIAN GOLD FIELDS.—From all quarters proofs of the extraordinary productiveness of the Australian "diggin's" multiply. An extensive firm in Melbourne thus writes:—"We believe that between 40,000 and 50,000 ounces weekly are sent into Port Philip from the Mount Alexander diggings, and that in our own colony the receipts average 10,000 ounces weekly." All people, it is added, are getting rich, and showing it by their independence. At the rate of production thus mentioned, the annual yield would be between £10,000,000 and £11,000,000. It appears, moreover, that the comparatively limited production of the Sydney or New South Wales mines is owing to the superior attractions which have drawn away the population to Mount Alexander, and not to any falling off in the amount originally obtained. Indeed, it is alleged that fresh deposits are being found every day, and the Rev. W. B. Clarke is said to have reported to the Government the existence of a tract of country along the Bendoc and Deloraine rivers supposed to be 400 miles in extent, and which gives signs of general richness. It was not thought, however, until large additions should be made to the population by immigration, that any new fields would be turned to much account. The last quotation of gold at Sydney was 64s. per oz. Owing to the demand for the Port Philip market, the stocks of produce of all kinds had been greatly reduced, and prices were rapidly rising. Flour, tea, coffee, rice, spirits, and beer were in great request. The complaints of the scarcity of labour were increasing every day, and the desertion of ships both at Sydney and Port Philip was severely felt. The consequent expenses to the owners will be very great, and the evil had been increased at Sydney by a decision of the Water Police Court in favour of a crew who, upon technical grounds, asserted their articles to be invalid. The decision was ultimately reversed by the Supreme Court, but not until the crews of many other vessels, acting under its influence, had absconded. The inefficiency and indifference of the police as regards making any subsequent arrests is particularly censured.

Since November there have been coined at the Mint 3,500,000 sovereigns and half-sovereigns.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The grand *fête* in honour of the re-organization of the National Guard at Paris, on Sunday last (which is noticed at length in another page), when taken in conjunction with other proceedings, both recently and at the present moment, throughout France, would appear to be but one of the steps deemed requisite to Imperialise the public sentiment of this country, by vividly recalling the most interesting reminiscences, and accustoming the people to the most characteristic emblems of the reign of the Emperor Napoleon, so that the feeling of the speedy advent of the Empire, with a Bonaparte at its head, may gradually grow upon the public mind, and become a thing of course.

In the provinces this policy is seconded by the assiduity and skill with which the local authorities and Government officers influence the Councils of Arrondissement, and other constituted bodies to pass resolutions and agree to addresses to the Senate, in which Louis Napoleon is hailed as the saviour of France; and measures are recommended for the consolidation of his power on an irremovable basis—that is, in fact, for the re-establishment of the Empire. The following are some of the latest published of these official documents:—

Moselle (Thionville).—Considering that, if the courageous and necessary act of the 2d of December has saved France from the immediate dangers which menaced her, the provisional position of the Government of the Prince President is still a cause of uneasiness for the future, and maintains the culpable hopes of men who brought society to the brink of ruin—considering that it is the duty of every good citizen to seek the means of averting fresh catastrophes, and putting a period to a state of things which maintains uneasiness in the country, paralyses industry, commerce, agriculture, and public credit, the Council expresses a wish that a *Senatus consulte*, in conformity with the Constitution of the 14th of January, 1852, should propose to the suffrage of the nation the re-establishment of the hereditary empire in the person of Louis Napoleon Bonaparte, President of the French Republic.

Marne (Chalons).—The Council, on meeting for the first time since the 2d of December, spontaneously gives its complete and sincere adhesion to the energetic act of the President of the Republic, which saved France from the immense misfortunes that menaced her, and expresses its profound gratitude towards the Chief of the State for the patriotic devotedness of which he has given such signal and numerous proofs.

Meuse (Bar le Duc).—The Council of Arrondissement considers itself to be once more the organ of the population it represents, by praying the Prefect to convey to the Prince President the homage of their profound gratitude and entire confidence. His Government has put an end to struggles full of peril, and unhalpful parties, consolidated power by giving it unity, reassured and strengthened threatened civilisation. May Prince Louis Napoleon receive the thanks of the Council, with its most ardent and sincere wishes for the stability of his power.

Cher (Bourges).—The happy change which has occurred in the general situation of the country since the 2d of December, the return of the public mind to ideas of order and government, and the religious principles which are the best guarantees of the future, are due to the wise and patriotic administration of his Highness Prince Louis Napoleon. Penetrated with a profound feeling of gratitude, the Council of Arrondissement of Bourges expresses a wish that Providence may preserve, as long as possible, the precious days of the Prince President, in order to enable him to consolidate his work.

Haute Garonne (Toulouse and Muret).—The Council expresses the wish that the Senate, influenced by the circumstances and the great interests of the country, will seek the means best calculated to consolidate in the hands of the Prince President the power he holds from the national will.

Indre (Chateauroux).—The undersigned, members of the Council of Arrondissement of Chateauroux, at the close of the first part of their session, are unwilling to separate without expressing the sentiments of profound gratitude with which they are penetrated for the eminent services rendered by the Prince President to the country, by re-establishing order and tranquillity.

Indre et Loire (Tours), before separating, the Council hastens loudly to manifest its adhesion to the energetic and salutary act of the 2d December, by which the Prince President has saved France, and its civilisation, from the frightful scarcity which would have caused her to disappear from the rank of nations.

Maine et Loire (Angers) The members of the Council of Arrondissement of Angers, penetrated with gratitude for the immense services rendered to France by Prince Louis Napoleon, convinced that his preserving and patriotic solutions will secure, with stable institutions, the salvation and prosperity of the country, respectfully express to the Chief of the State their profound sentiments of gratitude, as well as their hopes and the tribute of their entire devotedness.

The severity of the restrictions and warnings with which the journals both of Paris and the departments are harassed is astonishing. The *Gazette de France* of Monday evening contained, at the head of its first column, a first *avertissement*, or warning, from the Minister of Police, for an article which it gave on the 14th inst., and "which," the said warning says, "contained, in the midst of pretended ministerial justifications, assertions completely erroneous, and of a nature to disseminate doubts as to the real intentions of the Government." The *Ordre*, of Dijon, has received a preliminary warning from the Prefect of the Côte d'Or, for publishing an article copied from the *Union*, of Paris, the object of which, the warning declares, was to depreciate the Constitution of January, 1852. The caprice which reigns over these official warnings is shown by the fact that the article in the *Union* had passed unnoticed in Paris, and escaped without any blame; but when another journal copied it, that journal was at once warned, the zeal of the departmental prefect being less easily contented than the vigilance of the official persons at headquarters. Another instance of this vexatious interference is that in which the conduct of the Prefect of the Puy-de-Dôme, who lately gave a preliminary warning to the *Ami de la Patrie*, on account of its having engaged in a literary quarrel with the *Journal de Clermont*, and who has this week sent notice to the latter journal that it would receive a similar warning if it replied to the article of its contemporary.

General d'Ornano has been named Grand Chancellor of the Legion of Honour. He was born at Ajaccio in 1785, and descends from a Corsican family, which has already given two Marshals to France, under Henri IV. and Louis XIII. He entered the army at the age of sixteen, and made his first campaign at Marengo. He was afterwards aide-de-camp to General Leclerc in the expedition to St. Domingo. After the battle of Iéna he was named colonel of the 24th regiment of dragoons, at the head of which he made the campaigns of Switzerland and Poland in 1806 and 1807. After the peace of Tilsit he served under Marshal Ney in Spain and Portugal, and was made General of Brigade after the battle of Fuentes d'Onoro. He followed the Emperor into Russia in 1812, and was promoted to the rank of general of the division on the eve of the battle of La Moskowa, where he was at the head of the cavalry. In 1814 he commanded the army which covered Paris. General d'Ornano reckons 48 years of service and 20 campaigns. He was named Grand Officer of the Legion of Honour in 1834, and Grand Cross in 1830.

Amongst the recent recipients of the decoration of the Legion of Honour, on the occasion of the *fête* of the 15th, was M. Dupont, of the *Corps Législatif*, who has been for many years at the head of a large printing establishment in Paris, and since the revolution of February he has carried on his business to some extent upon the principle of association, admitting his workmen to a share in the profits. On the news of his appointment to the Legion of Honour, the workmen, whether by previous concert or not we are unable to say, set out for St. Cloud to thank the President for the honour conferred upon their master. They were received almost immediately by the Prince, who was walking in the park at the time of their arrival. The foreman made a speech, in which he alluded to the regard paid by M. F. Dupont to the "rights of salary" in his arrangements with his men. The President replied, that in decorating M. Dupont he had wished not only to reward an eminent printer of thirty-five years standing, but also a master who missed no opportunity of doing good to his workmen.

The rumour that General Petit had died from a stroke of apoplexy is unfounded.

The Minister of Justice, M. Abbatucci, assumed this week *par interim* the portfolio of the Minister of Finance, M. Bineau, during the latter's absence from town

The accounts of inundations from the late heavy rains in the south are numerous and distressing. The Rhone is constantly rising. All the low country is inundated. Several families living on the quay of Bourg-le-Valence have been obliged to quit their dwellings on account of the waters penetrating into them. At Avignon the waters rose to 4 metres 30 centim. (14 feet) above low water mark. The latest accounts of the 12th, however, announce that the waters were beginning to subside. The Isère and Drome have also risen considerably. The latter, being well enclosed with dykes, has caused no damage; but the Lèze has inundated large tracts of country. The torrents of rain that have fallen in the vicinity of Strasburg have also swelled the Rhine, so that all the lower portions of the *banlieue* of that city are under water.

The *Pays*, Government journal, recommends that the ports be at once opened for the admission of foreign corn, as the harvest will be found to be below an ordinary average The corn markets have risen from 1f. to 1½f. for the hectolitre. In Normandy the rise is in some places twice as much.

A rather alarming fire broke out in the private study of the President, at the Palace of the Elysée, on Friday se'nnight, whilst the Prince was at St. Cloud. The discovery was made about midnight, by one of the sentinels on duty at the Palace; and, as all the doors were locked, a hole was pierced through the wainscot to obtain an entrance into the study. The air having been thus admitted, the flames burst with such violence through the opening that the officer of the guard was compelled to abandon his attempt, and to rouse the firemen, who used every exertion to prevent the fire from spreading, which they accomplished after an hour of untiring exertion. Every article, however, in Louis Napoleon's study—furniture, papers, &c., was reduced to ashes. The loss would have been more considerable but that a few days previously the President had removed several valuable articles, fearing they might be injured by the damp, and amongst them several manuscripts of the Emperor Napoleon.

UNITED STATES.

The advices from New York this week represent the excitement which had been at first created by the apparent possibility of a collision with Great Britain, arising out of the misunderstanding on the fisheries question, as greatly allayed; and the return of the New York journals to a more rational view of the question as being pretty general. It was even stated in letters of the 4th inst. from Washington, that the question had been temporarily settled, and that Mr. Crampton, the representative of Great Britain, had sent a despatch to the British Government, urging it to suspend orders and to withdraw the naval force. Some further seizures of American fishing-vessels, within British waters, had been announced at New York at the period of the latest dates from that city, viz. the 7th instant; but they had occurred previous to matters presenting the aspect of a pacific solution of the difficulty which they now wear. A great number of people assembled on the 31st ult. to see the steam frigate *Mississippi*, get under way for the fishing grounds. Contrary to general expectation, she left the port without making any demonstration. The frigates *Columbia* and *Savannah* were being fitted out for the same destination.

The American schooner *Coral*, condemned for a breach of the fishery treaty, has been sold at St. John's, New Brunswick.

The following despatch from Commodore Perry to the United States' Secretary of the Navy had been received at Washington:—

EASTPORT, MAINE, Aug. 5.

I have been collecting information. Everything indicates a favourable issue. I shall leave for St. John's, New Brunswick, to-morrow, tog permitting.

The St. John's (New Brunswick) papers of the 2d instant state that Vice-Admiral Seymour had purchased a brig and a schooner, which had been manned and armed to protect the colonial fishermen from the encroachments of the French. The papers re-assert that the British Government had no intention of enforcing the headland to head and part of the fisheries treaty, nor of demanding reciprocal free trade as the price of arranging the question.

At Washington, in the the Senate, a message was received on the 2nd instant from the President, transmitting a report of the acting Secretary of State, and stating that Commodore Perry, in the steam-ship *Mississippi*, had been dispatched to the fisheries to protect the Americans. Amongst the correspondence laid before the Senate was a letter dated July 8, 1852, from Mr. Crampton, to Mr. Webster, in which, in friendly terms, he gives notice of the intention of the British Government to resist the encroachment of the United States fishermen. A calm discussion then ensued, and the subject was adjourned.

Mr. Crampton's letter is as follows:—

"WASHINGTON, July 8.

Sir,—I have been directed by her Majesty's Government to bring to the knowledge of the Government of the United States a measure which has been adopted by her Majesty's Government for preventing a repetition of the complaints which have so frequently been made of the encroachment of vessels belonging to citizens of the United States and of France upon the fishing grounds reserved by the convention of 1818. Upon representations which have been addressed to her Government by the Governments of the North American provinces in regard to these encroachments, whereby the colonial fisheries are most seriously prejudiced, directions have been given by the Lords of her Majesty's Admiralty for stationing off New Brunswick, Prince Edward's Island, and in the Gulf of St. Lawrence such a force of small sailing vessels and steamers as shall be deemed sufficient to prevent the infraction of the treaty. It is the command of the Queen that the officers employed should be specially enjoined to avoid all interference with vessels of all friendly Powers except where they are violating the treaty, and to act upon all occasions in a manner not calculated to give harsh or unnecessary proceedings where circumstances compel their arrest or seizure.

I avail myself of this opportunity to renew to you the assurance of my high consideration. JNO. F. CRAMPTON.

The *New York Herald* gives a list of the steamboat accidents from January 8 to July 28, from which it appears that 20 accidents occurred during that period, by which 438 people were killed and 100 injured. The destruction by fire of the steamer *Henry Clay*, on the river, near New York, while racing against another steamer, and the loss of upwards of 70 lives by the catastrophe (which we noticed briefly last week), still continued to excite consternation and indignation. The following is a short analysis of the persons killed:—

Bodies found and recognised	..	..	61
Not identified, at Yonkers ..	..	..	8
Not identified, at Bellevue ..	..	..	3
Total number of bodies found	..	..	72
Missing, known to have perished	..	..	3
Total ..	..	..	75

Mr. Thomas Collyer, part owner of the vessel, had been arrested and held to bail, and warrants had been issued for the apprehension of the captain, officers, and engineers.

A terrific conflagration occurred at Savannah on the 3d, by which upwards of 75,000 dollars' worth of property was consumed.

Lake Erie has been visited by a heavy squall, inflicting considerable injury on the shipping. No lives were lost.

The British barque *Charlotte*, from New Orleans to Liverpool, was burned on the 31st ult. at the South West Pass. Her cargo, consisting of 1900 bales of cotton, was totally consumed; officers and crew fortunately saved.

Cholera was raging severely at Rochester; upwards of 100 cases, many of them fatal, having occurred within three days.

In the case of Thomas Kaine, the fugitive from justice in Ireland, where he had been charged with an attempt to commit murder, Judge Bell has ordered the writ of *habeas corpus* to be discharged. A second writ of *habeas corpus* has been granted by Judge Nelson, bringing the prisoner before him on the 11th inst. Accompanying the writ was a lengthy opinion on the case as it stands, wherein the Judge doubts the legal authority of the United States Commissioner to act in the matter. The object of the writ is to remove the whole of the proceedings before the Supreme Court.

From Central America and the shores of the Pacific we also have advices by the present arrival.

In the city of Mexico much apprehension was created by the daring depredations of the Indians, the Yucatecas tribe having attacked a town not more than 100 miles from the capital. It is said that several battles had been fought between the Mexicans and Indians, in which the former were defeated with considerable loss.

The President of Costa Rica had issued a manifesto declaring the assent of his Government to the basis of the settlement of the difficulty with Nicaragua, as agreed upon between Great Britain and the United States.

From the west coast of South America we learn that Peru has warned New Granada not to interfere in the affairs of Ecuador. It is very likely that the Flores movement will lead to a general war among the South American republics.

WEST INDIES.

The West Indian mail received by the usual monthly steam communication, brings from Jamaica the same unvarying tale of distress, disease, and generally-increasing depression in what had hitherto been the sources of prosperity, which all the advices from that island have for a considerable time past conveyed to us. The latest date from Kingston is July 27. At that time the smallpox and measles continued to rage with undiminished violence in the city of Kingston, there being no less than 5000 cases of smallpox alone. The weather had been intensely hot, and the island had suffered much from an unusually long drought.

It is stated that a valuable copper mine had been discovered in the parish of Metcalfe, and was being worked. Samples to the extent of a ton and a half of ore have been brought to England, in charge of the proprietor, and a party of miners are to be sent out without delay.

The fever of emigration to Australia had somewhat subsided in Kingston, although several parties had arranged to leave as soon as the vessels chartered in America to convey them should arrive.

From Trinidad we learn that a fearful accident had occurred to the steamer *Victoria*, running between Port of Spain and San Fernando, the boilers of which exploded on the 16th ult., killing several persons, and seriously wounding many others.

INDIA.

By the Overland Calcutta Mail of July 3, we have recent accounts from the seat of the Burmese war, which notice the occurrence of two smart rencontres with the enemy since our last advices. The first of these, viz. the repulse of the Burmese from Martaban, which they had attacked a second time since it fell into our hands on the 5th of April took place on the 26th of May. The attacking party of the Burmese was about 1000 strong, under the command of the ex-Governor of Martaban, with a reserve of equal force. About six o'clock in the morning they assailed our outlying pickets and drove them in. A party of the 49th being sent out to reconnoitre, was met by a heavy fire, and returned with several men wounded. The Burmese force then advanced to within 200 yards of the camp, and kept up a smart fire. The artillery opened on them with grape, and, after a few rounds, they dispersed and took up a position on the Pagoda-hill, above the town, where they set up a flag, as if with the intention of making a stand, or of driving our troops out of camp. A well-directed fire of round-shot being opened on them, they took down their flag and retired. Commodore Lynch, with three of the cutters of the *Hermes*, proceeded up the Salween to intercept them, while Captain Tapley, in his armed cutter, with a boat of the *Medusa* and the marines of the *Feroze* and *Medusa*, proceeded south of Martaban, with the intention of going round to the westward to gain such intelligence as he could of them.

The second "affair" with the enemy took place on the 4th of June, at the city of Pegu, to which a small expedition had been dispatched to aid the Peguese against the Burmese, from whose rule the former had revolted at the commencement of the present campaign. The Peguese having some months back defeated the Burmese garrison of Pegu, and driven all Burmese detachments from their neighbourhood, the ex-Governor of Rangoon marched upon that city with a strong force, retook it, and inflicted the most atrocious cruelties on its inhabitants; and it was to aid them to expel a second time their Burmese tyrants that the expedition was sent by Gen. Godwin. It numbered about 250 troops. It was intended to send double that number; but sufficient carriage (boats) could not be procured in time. The force was "ably assisted by some 3000 Talians" (the cultivating caste), who joined the expedition close to Pegu; our force consisting of 100 men of her Majesty's 80th Regiment, under command of the Captain Ormsby; 100 men of the 67th Native Infantry, under the command of Captain Hicks; and 30 Sappers and Miners, Madras Army, under Lieutenant Mackintosh, with Lieutenant Mayne, field engineer.

They embarked on June 3, on board the Hon. Company's steam-vessel *Phlegethon*, and were accompanied by that vessel and her Majesty's ship *Fox*, under the command of Capt. Tarleton. When our troops arrived (on the 4th) in the neighbourhood of the Burmese position, the sun was still high, and they halted, intending to defer the attack until the evening. The Burmese, however, marched out with two gold umbrellas and a strong body of cavalry to attack us. They were allowed to approach quite close, and then dispersed with a volley: the Pagoda was stormed, and the enemy was pursued into and through their works, but their loss could not have been great, as they retreated with precipitate. Our loss was one seaman killed, three seamen, two sepoys, and one camp follower wounded.

The expeditionary force, after destroying the fortifications, returned to Rangoon on the 5th.

It was considered doubtful whether the Peguese and Talians would be able to prevent the Burmese from reoccupying Pegu, most of their leaders having been massacred after its recapture, and many thousands of the survivors having taken refuge in Rangoon.

Everything was quiet round Bassein. The enemy had left the neighbourhood, and the inhabitants were coming in numbers to seek protection under our rule. The troops were all very healthy.

With respect to the prospects of the war and its consequences, we find it stated in the Indian papers that the Burmese policy seems to be to avoid meeting us on the ground we have chosen for ourselves, and to carry the war into our own districts by invading the Assam frontier and the territories of the Rajah of Cherpoor. To such a measure is not ill-judged. To defend so extensive and intricate a frontier at all would require more troops than we could well spare, and the malaria of the frontier jungles was found last war to be of the most deadly description. The best way of defending such a frontier would be that successfully adopted in the last war under similar circumstances—to make a rapid advance on Ava from Rangoon. The Burmese troops on the northern frontier would, in that case, be immediately recalled to the defence of their country.

The annexation of a certain portion of Burmese territory is generally regarded as the natural and unavoidable result of the war, as it is the most desirable in a political and commercial point of view; as it will become necessary to protect the inhabitants who have espoused our cause from the vengeance of the Burmese, and to incapacitate the King of Ava from putting us to the expense of another war.

From India Proper and the north-west frontier, there is no news of interest.

The foundation-stone of new sanitary barracks for European troops at Ootacamund, was laid with great ceremony on Waterloo-day, by Sir R. Armstrong and the Lord Bishop of Madras. In these are to be located a couple of hundred men at a time. The monsoon season had set in, accompanied by a heavy fall of rain daily.

The present arrival brings no intelligence of the missing steamer with the Bombay mail of the 25th June; but it was the impression of nautical men at Alexandria that the steamer had been compelled to put back.

From China there is nothing calling for special notice. The rebellion was still talked of, but the reports were very contradictory, and no reliance could be placed on them. It seemed to be formidable, and to occasion much apprehension.

AUSTRALIA.

Advices to the second week in May have been received from Victoria and South Australia. The city and district of Adelaide indeed, the entire province of South Australia, which, a few months previously, were cheerless and comparatively deserted—had once more a busy and happy population, the result of the opening of the overland route to the diggings at Mount Alexander, in Victoria, and the expected issuing of gold bars from the Adelaide mint. The arrivals of gold by the escort had been made with great regularity, the aggregate in two months having exceeded £350 000, and there being a fair promise of about a ton of gold reaching monthly. Emigration to Melbourne was still proceeding with much activity, but most of the men's families were left behind, and remittances sent to them by the Government escort. The late Ballion had effectually relieved the province from impending ruin. This healthy reaction will continue so long as the Adelaide mint offers £3 11s. per ounce for gold, assay value, or £3 8s. cash, while the ruling rate at Melbourne, by latest advices, was only £2 19s. per ounce.

From Victoria (Port Philip), we learn by the Melbourne papers that the Lieutenant-Governor was making arrangements to stem the torrent of crime pouring upon the province; he had authorised the erection of six out-stations at Mount Alexander, each to accommodate an assistant commissioner, with a staff of officers, three horse and sixteen foot police, two police magistrates, stations and barracks for pensioners. The salaries of assistant-commissioners had been increased from £300 to £400 per annum, and their establishments in proportion. The iron auxiliary screw steamer *Comet*, from San Francisco, was running regularly between Melbourne and Sydney. Her Majesty's brig *Fantome* was duly expected to arrive, and would give protection to the shipping, and prevent a resurrectess of so daring a robbery as that effected on board the *Sydney*, which we noticed last week. The Melbourne newspapers contain innumerable instances of violence, murders, affrays, night and day robberies, proving too clearly the frightful consequences of having a penal settlement in the vicinity, from which the most desperate characters can pour in, without let or hindrance, in hundreds, with the convicts' passport—a ticket of leave.

Some rain having fallen, the gold-diggers had recommenced their labours with great energy. A large nugget—the largest yet—had been found opposite Golden Gulley, and was said to be worth £2000. Many fatal accidents had occurred, owing to men falling into deserted holes, or the earth falling in upon them when undermining, and the want of due care.

COUNTRY NEWS.

THE TEN HOURS FACTORY ACT.—In some of the manufacturing districts much agitation exists at the present time on the subject of the observance of the Factory Act, which was passed a few seasons ago, relative to the limitation of the hours of labour in factories. On Sunday last a crowded meeting of delegates from factory operatives was held at the Queen's Hotel, Todmorden, for the purpose of taking measures to secure the strict observance of the Factory Act in this respect, which they complain is violated by the masters. The following resolutions were agreed to:—"That the limit of ten hours per day, and 9½ hours per week for women and young persons in factories is their right, which they have never in any way consented to abandon, and this meeting pledges itself to do all in its power to obtain a restoration of that limit." "That the provisions of the Factory Acts are openly violated by the employers in many districts, and to the manifest injury of the honest employers, as well as to that of the workpeople; and it is the opinion of this meeting that no law short of a restriction on the moving power, and under severe penalties, can ever effectually protect the rights and interests of those who are entitled to the benefit of the Factory Acts." "That an application be made to Parliament in the next session, for an amendment of the Factory Act, to include the restoration of the 10 hours limit, and a restriction on the moving power, and that all factory operatives who may be detained upon the premises after such stoppage occurs should be considered as at work." "That a subscription be forthwith raised to defray the necessary expenses of such application to Parliament." The proceedings terminated by the appointment of a general committee and a managing committee to carry out the resolutions.

BUCKS AND BEDS ARCHITECTURAL AND ARCHÆOLOGICAL SOCIETY.—A meeting of this society was held at the White Hart Hotel, Aylesbury, on Tuesday afternoon, for the purpose of inspecting the county church of Marsworth. The church at the present moment presents a pitiable spectacle, the roof being off, part of the walls only standing, and the ancient monuments, slabs, and tombstones, having been carried off. A more pleasing subject, however, which the gentlemen visited, was the fine old church of St. Mary, Ay-esbury, now, after much contention with a dissenting population, in a complete state of restoration, the only thing wanting to complete the whole being the pews. At two o'clock a considerable number of ladies and gentlemen assembled at the White Hart. Mr. T. T. Bernard was unanimously voted into the chair. Mr. Slater, of London, read a long paper on the "Ground Plans of Cathedrals," remarking that they were generally all cruciform in shape. He then described St. Paul's, London, York Minster; and those of Canterbury, Lincoln, Carlisle, Bristol, Oxford, Peterborough, and Ely, commenting on their distinguishing peculiarities; also on those of Wales, which are much smaller than ours. Mr. Hurst followed, with a paper on "Municipal Corporations." The Rev. W. H. Kelke read a paper on "Sculptured Monuments of Books," and exhibited many beautiful drawings illustrative of the subject. The Rev J. Taddy followed, with an essay on "The Moral and Intellectual Character of Mediæval Architecture;" and he dwelt on architecture as the means of expanding and raising the mind. The Rev. W. J. Burgess read a paper on "The Fortifications of the Northern Division of the County of Bucks." The Rev. A. Baker, of St. John's, Marylebone, delivered an interesting discourse on seats and other furniture in churches. He denounced the pew system, and took it for granted that it was for ever annihilated, and that open seats, without doors, would in future take their places, and gave an instance where the Duke of Wellington had lately refused a subscription to a church at Walmer if they persevered in these odious pews: the matter was afterwards compromised by his Grace being satisfied with the seats being left without doors. In the evening a large party sat down to dinner at the White Hart.

MIDLAND RAILWAY.—The half-yearly meeting of the shareholders in this railway was held on Wednesday at the central station at Derby: Mr. John Ellis in the chair. The report stated that the accounts for the half-year ending the 30th of June last, show an increase from traffic receipts of £37,441, as compared with the receipts of the corresponding period of 1851. The proportion which the working expenses have borne to the receipts from all sources during the half-year has been £41 3s. 7d. per cent, exclusive of rates, taxes, Government duty, and the provision for renewal of permanent way, and increase of rolling stock. The balance available for dividend is £166,842 2s. 5d., and the directors recommend that a dividend (subject to income tax) be declared payable on the 1st of September next of £1 10s. upon each £50 Midland Consolidated Stock; 15s. 3d. upon each £100 Birmingham and Derby Consolidated Stock; £3 upon £100 Consolidated Preferential Stock; and £1 10s. upon each Erewash Valley share; and 2s 3d. per share upon each £16 13s. 4d. share, being 4½ per cent. per annum upon £5 per share paid, leaving a balance of £2154 2s. 10d. to be carried to the next account. A resolution for the adoption of the report was then put and carried unanimously, after which the chairman moved the usual formal resolutions, declaring dividend *pro rata*, as recommended in the report.—Carried. By a subsequent resolution the directors were empowered to dispose of the £50 and £40 shares, upon which the calls have not been paid; these are 9s of the former, and 40 of the latter.

THE WEST GLOUCESTERSHIRE ELECTION RIOTS.—On Monday and Tuesday, at the Cross Hands special petty sessions, Mr. Sergeant Wrangham, Mr. H. Bowly, Q.C., and Mr. Walmsley, three magistrates for the county, were engaged in an inquiry into the conduct of twenty-three individuals concerned in the recent disgraceful riots at Bridge Yate, during the late election. The informations were sworn on Saturday last, and information having been sent to Bristol, a body of sixty-two policemen was dispatched in the dead of the night, who apprehended the accused in bed at their own residences and conveyed them to Cross Hands, where a long examination took place, which resulted in the committal of twenty-one of the prisoners for rioting. Two of the prisoners were also committed for high-way robbery and assault upon Mr. Dickenson, one of the county magistrates. By the sentence the rioters will be deprived of respectable character. A large body of persons, to the number of 1000, assembled, attacked the police, nearly demolished the polling-booths and committee-rooms, and committed much damage upon property. Two of the police were nearly killed, and the rest driven into a field, where the Rev. W. Mirehouse, who had been sent for, read the Riot Act three times amidst showers of stones. The prisoners were conveyed to the Yate-station by policemen armed with cutlasses, and from there they were dispatched by the mail train to Gloucester, and lodged in gaol. The affair has caused considerable excitement in the neighbourhood.

CURIOUS EFFECT OF LIGHTNING.—A thunderstorm occurred at the village of Tarves, Aberdeenshire, on Sunday last, when the lightning entered the roof of the village school, and broke a fine barometer, which had been presented to the school by the Earl of Aberdeen. The effects of the electric fluid in its passage through the barometer are somewhat curious. The corner of the brass plate which forms the face of the instrument, where the fluid seems to have entered, is fused, and the whole plate is twisted from its fastenings; the tube, save about inches of the upper end is broken into small fragments, many of which, and some parts of the larger piece, bear marks of fusion on their surface Part of the mercury seems to have been ambibued, for there is a film of the metal on that part of the tube where the vacuum is, very near its top.

FAREWELL EMIGRATION MEETING AT SOUTHAMPTON.—On Wednesday a farewell group meeting of the passengers to Australia by the *Balaniguich*—a ship sent out from Southampton freighted on the colonisation plan—attended Mrs. Chisholm, took dinner on board the ship in the Southampton Docks. As this is the first full ship for Australia that has left Southampton, the passengers having paid the whole of their passage-money, the occasion excited considerable interest in the town. During the whole of the forenoon the ship was visited by a succession of parties composed of the most respectable inhabitants, who examined her fittings and capabilities, and the accommodation provided for the passengers, both of which interest; and by two o'clock, the hour named for the meeting, so large a crowd had collected that it was found impossible to make room for all on deck. It was accordingly arranged that as many of the passengers and their friends as could be accommodated on board should meet on the after deck, and that the great body of the visitors should take up their position on shore, immediately under the bulwarks of the vessel, where they would be sufficiently near to hear all the proceedings. The *Balaniguich* is an excellent ship of 800 tons burden, and, including the crew takes to Australia about 370 souls. Of these 196 are adults, the remainder, who consist of the ship's complement, consisting of children. Hitherto the greater portion of the emigrants on Mrs. Chisholm's plan have gone out upon the principles of paying their passage money by instalments, but, as already stated, the whole of the passage-money has been paid in the present instance, and it is understood that, as a whole, the emigrants comprise a very superior class. According to the practice invariably followed by Mrs. Chisholm, that benevolent lady has paid great personal attention to the comfort and convenience of the passengers, and nothing has been left undone that could promote their welfare during the voyage, and advance their interests on arriving at Port Philip. By an excellent arrangement, the single men have been placed in the fore-part of the ship, the married passengers in the middle, and the single women in the after-hold. These three divisions, which extend along the whole length of the vessel, are separated from each other, and large and airy cabins, ranged on either side, are fitted up for the reception of the passengers. At two o'clock the Mayor of Southampton, accompanied by Mrs. Chisholm, and a numerous body of ladies and gentlemen, took up their position on the poop of the ship, the passengers being partly on deck and partly on shore, where some thousands of the townspeople were assembled. Mrs. Chisholm then delivered an encouraging address to emigrants, and pointed out the great benefit that would arise from emigrants fulfil ng their engagements to pay the passage money of their friends. The system of remitting money was now made so simple, that there were no persons going out in this or any other ship who might not in ten months send back as much money as would pay for the passage of their nearest rela ives. What they wanted was communication between the homely of the old country and the new. She had received many letters during the voyage, Mrs. Chisholm intimated that she would be better able to give them practical advice on that and other subjects in a less public way than the present, and appointed a meeting in the evening for that purpose. The Mayor and other gentlemen having addressed the assemblage, three cheers were given for Mrs. Chisholm and the emigrants, and the proceedings of the meeting terminated. Lunch was afterwards served upon the main deck, when the healths of the Queen and Prince Albert, Mrs. Chisholm, and other toasts were proposed by the Mayor, who presided, and were duly honoured.

THE BRITISH ARCHÆOLOGICAL ASSOCIATION commenced their ninth annual congress at Newark, on Tuesday; his Grace the Duke of Newcastle, president. The members and visitors having dined at the Canton Arms, adjourned to the Town-hall, where an address of congratulation was presented to the Duke of Newcastle, who addressed the assembly upon a few points of archæology. Mr. Gutch, F.S.A., then read a paper upon Robin Hood and his ballads. On Wednesday commenced the excursions, the report of which, with Illustrations, we reserve for our Journal of next week.

LIVERPOOL CITY ELECTION.—There is a vigorous contest between the Liberals and Tories for the seat in the city of Durham: Mr. Fenwick, of Southill, represents the Liberals; Lord Adolphus Vane, the Tories. Both parties are preparing an active canvass. Mr. Fenwick has held a large meeting in the Town-hall, and his address was well received by the freemen and electors. The Liberals are sanguine of success.

BRIGHTON RACES.—The amount of stakes given by the committee was £1360; the money taken at the grand stand for the three days was £1168; after the payment of all expenses the committee will have, as the gratifying reward of their exertions, a surplus of £100 in hand. About £20 was cleared by the race concerts, which will go to the race fund.

THE MOORS.—According to the Scotch papers, the season on the moors promises to be fully an average one. The young birds are strong and plentiful, and the weather has been propitious.

THE HONEY BEE.—On Monday night last, a gentleman in the neighbourhood of Thirsk having driven a hive of bees, took the produce of the hive, consisting of about 17lb. of honey, into a cottage adjoining the bee-stand, to remain during the night. On the morning following, the good man of the house, after taking possession of the honey, went to his daily avocation, leaving his wife and family to enjoy their repose a little longer. When his wife arose, on opening the door she observed a few wandering bees, carousing with no little delight around the glowing field. Not one of them, however, to her bewilderment, she found herself beset, and the room almost filled with the enemy, who had come in vast numbers to take forcible possession of their lost property; and when the owner of Thirsk having returned with the vessel from whom he found, to his astonishment, that they had left him only about 4 lb. of the honey.

HEN-STEALING.—A gentleman residing in Norfolk recently found that some chickens of the Spanish breed, which he was rearing in hutches in his garden, were disappearing night after night through the agency of some nocturnal depredator. As the garden was only a short distance from the river it was concluded that these depredators were committed by rats. About eleven o'clock one night, as the owner was passing through his garden, he heard a great commotion in the chicken hutches, and on proceeding to the spot discovered that there was some animal chasing the chickens rapidly round the hutch with a view to their destruction. Having secured the assailant by closing the door of the hutch, on lights being procured the depredator was found to be a large hedgehog, which was instantly killed in the hutch.

THE REMUNERATION OF A VOCALIST.—During the trial of John Fawell, for highway robbery, in York, a curious piece of information came into possession of the court. The prosecutor, Thomas Weldon, who was described as a vocalist, said he was in the habit of singing on Sunday morning, for which he received 5s. a vocalist, singing at free-and-easies at the rate of a penny per pint on all the ale that was drunk by the customers.

THE GRAVE ACCIDENT.—On Sunday afternoon last, three of the visitors to the Plymouth and Devonport Cemetery, having incautiously stepped upon a stone serving as the temporary covering of a vacant grave, were precipitated into the vault, and a ladder had to be procured ere they were rescued from their unpleasant position. Two of the parties were of the weaker sex, and though considerably frightened at their rapid descent into the depths below, they fortunately fell uppermost, and sustained no injury. Their cries of fright, however, aroused the bottom, and, under the heavy pressure of the ladies above him, narrowly escaped suffocation. He appeared to have been much shaken by his fall, and has scarcely yet recovered his wonted health.

SHOCKING ACCIDENT IN SOUTHAMPTON DOCKS.—A fearful accident happened in these docks on Wednesday. A party of 27 men, working on board the West India mail steamer *Orinoco*, pushed off from the vessel on the half-bottomed stage used by caulkers for outside work in connexion with these vessels. The stage turned over, and the whole party were immersed before assistance could be rendered. Three men were drowned, and others are said to be missing. The men were going to their dinner at the time.

ACCIDENT ON A RAILWAY CROSSING.—On Wednesday forenoon Mr. Gell, of the Western Circuit, was riding from Richmond to London on horseback, accompanied by Miss Ashburton, the ladies' riding mistress, and on arriving at the Mortlake station, where the railway crosses the road, the lady's horse, being frightened by the whistle of a departing engine, became restive, and plunged violently, and threw her on the line. All efforts to quiet him were for some time unavailing, and considerable anxiety was manifested by the numerous passengers collected at the station, as the next train was fully due. At last the animal reared up, and, bounding round, rapidly lost his balance and fell back with great force; the impression on the minds of the bystanders was, that Miss Ashburton was crushed beneath him; but to the surprise of all present she dexterously slipped aside, and rolled over, out of the reach of his heels. She was immediately carried into the waiting-room, where every attention was paid her by Mrs. White, of the station; and though she spat some blood she soon recovered, and was found that beyond a few bruises she had escaped unhurt, and was able to proceed to town by the next train which arrived a few minutes after the accident, the horse in the meantime, regained his feet and galloped away, having smashed the saddle and bridle to pieces, and bleeding profusely from the nose. He was soon captured and brought to London in a horse-box. It dependently of the frightful nature of the accident itself, the danger of the train arriving upon an equestrian makes it apparent that these open crossings are extremely objectionable.

FATAL ACCIDENT TO MR. FRANK HARTLAND, THE PANTOMIMIST.—On Monday afternoon, between four and five o'clock, as the gentleman was passing through Mount-street, Westminster-road, a plank from the scaffolding before one of the houses which were undergoing repair suddenly fell, and in its descent struck Mr. Hartland with great violence on the side of the head, completely crushing in the skull. The unfortunate gentleman was taken, in a state of insensibility, to the surgery of Mr. Brooks, a few doors off, but that gentleman at once pronounced his case hopeless, and ordered him to be taken to St. Thomas's Hospital, on the way to which he died. Mr. Hartland has left a large family, hitherto entirely dependent upon him, to deplore their untimely loss.

GOLD DISCOVERY IN SOUTH AMERICA.—The *Colonist* (Demerara paper) of June 30 contains the following on the subject of the alleged gold discoveries in British Guiana. About two years since gold was stated to exist in Upata, a Venezuelan province bordering on the British colony, and this fact, coupled with the emigration of many persons from Trinidad to seek gold in that quarter, gave some appearance of probability to those statements:—

"And so it would seem that this colony is to be added to the list of gold countries, and the memory of the gallant but ill-fated Raleigh vindicated from the aspersions that have attached to his name We, yesterday, inspected some gold-dust in the possession of Mr. Abrahams, which he had purchased from a captain from the Orinoco. The gold he finds to be of the finest quality, superior to the produce of the California or Australian fields, and of the same purity as that which is procured from the sands of the rivers on the Gold Coast of Africa. The present specimen was purchased by the person who sold it to Mr. Abrahams from the Indians who inhabit the disputed territory between the limits of this colony and the Republic of Venezuela, on a tributary of the Cayuni, about three days' journey from the penal settlement. This discovery will, of course, bring the former question of right, and probably summon another from the English Government in a contest with our neighbours. The gold-dust is procured from the sands of the rivers which flow into the Essequibo from the mountain ranges forming our frontier, and can only be found during the time that the water of those great natural drains are at their lowest. From the statement of the person from whom Mr. Abrahams derives his information, it appears that the season of three months are the only period of the year available for the search, as the inundations return at the expiration of that time, and continue during the rest of the year."

THE EXPEDITION OF FLORES AGAINST THE SOUTH AMERICAN REPUBLIC OF EQUADOR.—The following communication from Guayaquil, dated June 30, throws some light on the proceedings of General Flores against the Government of Equador, which are regarded in this country as little better than piratical, in their character:—"Flores's expedition, consisting of the steamer *Cotah*, a ship, two brigs, and two schooners, after remaining at the island of Punar since the 9th of April, came up the river on the 20 inst., which naturally caused every one to think that he would immediately attack the town; but although he landed his men, evidently to intimidate, yet he made no other hostile movement, and he re-embarked them. He is now at an estate on the coast called La Josephina, and it appears from the evidence of some prisoners taken from some of his foraging parties, that he is fortifying the house. It appears also certain that he depends on obtaining beef by sending parties to drive in cattle, in which attempt he has been constantly a sufferer, as troops are lying in ambush, and scarcely a day passes without accounts being received of some killed and wounded, so that his supplies are very uncertain, and our troops cannot be suffering the severe privations. The prevailing feeling of the people of all classes here is decidedly against him among the higher classes, arising from his attempt in '46; and among the lower, from the conduct of his troops on all occasions, and of so bad a character that they will be great sufferers from pulage and ill-treatment. The position of the contending parties is this: By the river the Government is not yet strong enough to attack, and Flores, as he has two steamships of not powerful calibre, and the forces here are superior in number, also, it is thought, also in discipline. Arrangements, mostly under the advice of General Illingworth, are rapidly advancing in preparing naval strength. Iron boats and cannon, also an American brig and another, are being armed, there is a small steamer likewise to aid them. Thus, ere long, if Flores does not attack, an attempt will be made to dislodge him from his present position. It is evident, if Flores were to succeed, that New Granada, Venezuela would send their troops against him. We have in port a French frigate and corvette, as also an American corvette. The French commodore promised Admiral Moresby that in the absence of our vessels of war, he would most willingly tender his protection to all the British subjects here. Thus, in case of need, personal safety is insured."

SKETCHES FROM THE TURON GOLD FIELDS, NEW SOUTH WALES.

1. DRY DIGGING ON THE TURON.

CRADLER.

We have been favoured by a Correspondent on the Turon with the accompanying *working Sketches* of the several operations of gold-seeking in that "field" of New South Wales. The Turon, it will be recollected, is a river rising in the county of Roxburgh, near Cullen Cullen, which divides that county from Wellington, and also flows into the Macquarrie. Upon this modern Pactolus has been planted Ophir, named from the "golden land" of Scripture.

The first and second Sketches illustrate the difference between "dry diggings" and "wet diggings;" thus described in Mr. Beate Jukes's recent lecture:—"The wet diggings are those carried on in the bed of a river; the dry diggings, in the general spread of drift lying over the country. We can now understand why it is that gold-washing, or the extraction of golden fragments from the drift of a country is much more profitable than gold-mining. In gold-mining vast quantities of hard rock have to be quarried and removed, to be crushed by powerful machinery, and to be washed over and over again, or to be treated by other expensive processes; while in gold-washing, or separating gold from drift, all the mining and the crushing, and a good part of the washing of materials have been already done for the miner by nature."

It is worthy of note that we owe the discovery of gold in Australia to the high state of geological science. The circumstances are thus related by Mr. Jukes* :—

> We come now to the auriferous character of Australia. Sir R. Murchison, in his address to the Geographical Society in 1844, alluded to the possibly auriferous character of the Great Eastern Chain of Australia, being led thereto by his knowledge of the auriferous chain of the Ural, and by his examination of the Count Strzelecki's specimens, maps, and sections. Some of Sir R. Murchison's observations having found their way to the Australian papers, a Mr. Smith, at that time engaged in some iron works at Berrima, was induced by them in the year 1849 to search for gold, and he found it. He sent the gold to the Colonial Government, and offered to disclose its locality on payment of £500. The governor, however, not putting full faith in the statement, and being, moreover, unwilling to encourage a gold fever without sufficient reason, declined to grant the sum, but offered, if Mr. Smith would mention the locality, and the discovery was found to be valuable, to reward him accordingly. Very unwisely, as it turns out, Mr. Smith did not accept this offer; and it remained for Mr. Hargraves, who came with the *prestige* of his Californian experience, to re-make the discovery, and to get the reward from Government on their own conditions.
>
> This first discovery was made in the banks of the Summer Hill Creek and Turon River, among the dark glens and gullies in which it collects its head waters, in the flanks of the Blue Mountains, the gold got "coarser," occurred in larger lumps or nuggetts, but these being more sparingly scattered.

2. RIVER-BED CLAIM ON THE TURON.

We now proceed to the details of the Illustrations:—

1. *Dry Digging on the Turon.*—This claim has proved one of the richest finds on the river; it was originally in the possession of two boys, named Ranger, who worked about one-fourth and procured several hundred pounds worth of gold. The remainder of the ground was purchased by Mr. T. W. Campbell, for £700, and it has since yielded in a day about 90 ounces of gold—about 40£ worth being taken after the purchase. The largest piece of gold yet found on the Turon, we learn from a letter received last week, is "The Mitchell Nugget." This magnificent piece of gold, weighing 58 oz. 8 dwts., was met with, it is supposed (for something of a mystery hangs over its site), opposite Mundy Point, on the Turon River, New South Wales. It is perfectly solid, and is ¼ inch thick generally, increasing in some places to ½ inch. It was not got out of the bed of the river, but out of a former channel of the waters, now upheaved about 100 feet above the present water level. This is the largest piece yet found on the Turon. Only the Ophir Diggings have yielded such masses.

2. *River-bed Claim on the Turon.*—Here are shown the men at the pump, which is lowered to the depth of twelve or fourteen feet from the surface. It is supported by two saplings, placed on either side, and extending across the pit or shaft, which is generally from 12 to 14 feet in width. The workmen at the pump are supported on a sheet of bark, which is placed across the saplings, as is also the figure handing over for the purpose of raising the bucket containing the earth or washing-stuff. The bark shoot, which is attached to the pump, conveys the water in the direction of the cradler in the foreground, where it is received in a basin or hole made for the purpose: this plan is generally adopted, unless the channel of the river is near at hand, as it saves the labour of carrying the earth, in some places, upwards of 150 yards.

3. *The Cradler.*—This sturdy figure is shown in the attitude of rocking and baling; and it requires both muscular power and practice to make a good cradler. Many there are who, in the summer months, rock nine or ten hours a day; the work is constant, and bears very heavily on the left arm and right wrist. The hopper, which receives the earth and stones, when filled, often weighs from 50 lb. to 60 lb., and before the earth is washed off, drags very heavily; and the baler or dipper holds from two to three quarts of water. There is, however, much difference in cradles,

4. CHILDREN CRADLING.

the Lewis Ponds River, small streams which run from the northern flank of the Conobalas down to the Macquarrie. The gold was found in the sand and gravel accumulated, especially on the inside of the bends of the brook, and at the junction of the two water-courses, where the stream of each would be often checked by the other. It was coarse gold, showing its parent site to be at no great distance, and probably in the quartz veins traversing the metamorphic rocks of the Conobalas. Mr. Stutchbury, the Government geologist, reported on the truth of the discovery, and shortly afterwards found gold in several other localities, especially on the banks of the Turon, some distance north-east of the Conobalas. This was a much wider and more open valley than the Summer Hill Creek, and the gold accordingly was much finer, occurring in small scales and flakes. It was, however, more regularly and equably distributed through the soil, so that a man might reckon with the greatest certainty on the quantity his daily labour would return him. At the head of the

and in the manner of pitching them: the rockers should be well shod with iron, and the sleepers should also have an iron tram; when the cradle, if properly poised, will run smoothly and evenly. Many of the cradlers lose a third or more of the gold for want of a proper use of the rocker. "Rivers," says Mr. Jukes, "are *great natural cradles* sweeping off all the lighter and finer particles at once, the heavier ones either sticking against natural impediments, or being left wherever the current slackens its force or velocity. A cradle is a wooden trough, with several "cleets," or ribs fastened across its bottom. Into the head of it is placed a quantity of auriferous sand or gravel, water is poured over it, and motion communicated by rocking and tilting the cradle. The running water carries off all the lighter matter, and leaves the heavy stones and lumps of gold either in the head of the cradle, or accumulated at its bottom against the "cleets," fastened across to arrest them. Turning the bed of a river, then, wherever such a manœuvre is practicable, is like a miner examining the bottom of his cradle; and if it happens to be done at the right spot, where there are several natural "cleets," or bars, or where there are holes in the rock for the gold to drop into, it is likely to be rewarded very richly by the accumulated results of centuries of natural gold washings.

4. *Children Cradling.*—Many of the children at the mines earn a considerable sum by cradling. Our Artist assures us that some children thus earn from £2 to £4 per week. Many work the earth that has been previously run through the cradles from some of the richer claims; and as many of the cradlers, from bad management, lose a great quantity of gold, the lads make a good living. Three shillings worth of gold are sometimes obtained from a single pan of refuse on the Turon.

5. *Washing the Gold.*—The mode of clearing the sand or gravel from the gold is here shown. Suppose the day's cradling over: the miner takes to the water's edge the tin dish, or "prospecting pan," wherein the gold is mostly placed when scraped from the cradle slide; he then dips the dish into the water, and quickly draws it upwards, by which motion the portions of earth and gravel gradually slide out of the pan. When any of the lighter particles of gold show on the surface, the tin is shaken by a sharp motion of the arms, in a horizontal direction, backwards and forwards, when the gold almost immediately sinks to the bottom of the dish. The washing requires some care and practice. Beginners use two dishes; one to hold the water, so that any gold escaping from the first is not lost.

6. *Removing Goods.*—This is the usual method adopted by the gold seekers of the Turon in shifting their goods from one locality to another. The handbarrow is soon found; two saplings are cut, on them a few wooden stretchers are tied crosswise, and a piece of bark placed upon them, the goods being lashed over all.

7. "*Dodging the Commissioner.*"—The seeker having discovered gold next obtains a license, which is granted on application to the Commissioner. Sometimes, however, disputes arise; and here we have a Commissioner settling a dispute with two of the diggers: he is attended by one of the mounted police force, who carries the license-book. In this picture, also, are seen some cradlers and diggers at work; and a few "absconders," who are endeavouring to evade the Commissioner, being either unable or unwilling to pay the license-money. In the extreme distance on the heights are some of the mounted police cutting off the retreat of the "absconders" up the gully.

8. THE POST-OFFICE, SOFALA, TURON RIVER.

8. *The Post-office at Sofala, on the Turon.*—This rude "public office" is built with timber uprights and window-bars, and is roofed with sheets of bark.

9. *The Disappointed Gold-seeker.*—The golden dream is often broken with sad realities here as elsewhere. "There are many persons at the gold fields," writes our Artist, "who have worked hard, and struggled for months, with little or no success; while others are, in a like ratio, fortunate." One of the former class is portrayed here: he has been digging at the root of a tree, and his dejected and vexed expression tells with what ill fortune.

10. *Gold-seekers' Graves on the Turon.*—In our series, "last of all comes death." In this lone locality is the last earthly resting-place of three gold-seekers. The centre mound, immediately beneath the tree, is the grave of a gentleman long known and respected in the colony, and whose premature loss was deeply regretted.

9. THE DISAPPOINTED GOLD-SEEKER.

PETER BROWN'S REASONS FOR NOT GOING TO THE DIGGINGS.

No more of Australia! my arms are too old;
And my back is too stiff to go digging for gold.
Yet, old as I am, and though wealth I may crave,
My heart is too young to enlist for a slave;
Let youth in its heat be adventurous still,
And scramble for "nuggets" as fast as it will,
I'll cling to my friendships, my home, and my health,
And live upon little, and think it is wealth.

I've always had bread in the land of my birth,
And a shilling to spend for my need or my mirth;
And gold, though 'tis good, as I'll never deny,
Is rather too dear if with life we must buy.
So give me a crust in my own native land,
And I'll breathe its dear air while I'm able to stand,
And wish all the diggers, whoever they be,
To be joyous as I, with a spirit as free.

And yet, fortune speed them! the young and the bold!
There's virtue in daring, there's glory in gold;
The greater their portion who wander away,
The better for those who've determined to stay;
While rocking their cradles, far off and forlorn,
They'll cradle an Empire—a giant new-born.
Success to their labours, wherever they roam,
And long may the "nuggets" come glittering home! .B.

JOHN RICHARD HARDY, CHIEF COMMISSIONER OF THE GOLD DISTRICT, BATHURST.

This gentleman (of whom a Portrait appeared in the ILLUSTRATED LONDON NEWS for July 3d, but unaccompanied by any biographical particulars), is the third son of the late Rev. R. Hardy, of Walburton, Sussex. He was born in 1807, and took his degree of B.A., at Peter House, Cambridge, in 1839; but being of an adventurous disposition, and disliking the quietude of English life, he emigrated to New South Wales in 1833, where he edited for two years the *Australian* newspaper with marked success. He, however, relinquished the editorship of the above journal on receiving the appointment of police magistrate of Yass, where he possessed property. This post he filled ably for several years, and by his exertions the evils of bush-ranging were greatly abated.

In 1850 Mr. Hardy received the appointment of police magistrate at Paramatta; and in the following year was selected by the Government, on account of his active habits and general knowledge of the character of the settlers, to fill the important post of Chief Commissioner of the gold district, having been invested with absolute authority in all civil matters thereto appertaining. Many highly interesting particulars of him are given by Lieutenant-Colonel Mundy, in his "Rambles in the Australian Colonies," lately published.

The licensing system has been carried out by him with a success which is only the more wonderful, considering the difficulties he had to encounter in so novel an undertaking, and considering also the class of people with whom he was sent to deal. And it must be confessed, that, under his judicious management, Ophir form a pleasing contrast to the turbulent adventurers of Melbourne, who have so recently shown their disrespect for the law and the administration of justice, by their open defiance of the civil authorities.

In 1835 Mr. Hardy married Miss Stephen, daughter of the late, and sister of the present, Chief Justice of New South Wales, Sir Alfred Stephen.

10. GOLD-SEEKERS' GRAVES ON THE TURON.

CALENDAR FOR THE WEEK.

Sunday August 22.—Eleventh Sunday after Trinity.
Monday, 23.—American War commenced, 1775.
Tuesday, 24.—St. Bartholomew.
Wednesday, 25.—Sir W. Herschel died, 1822.
Thursday, 26.—Prince Albert born, 1819.
Friday, 27.—Admiral Blake born, 1599; died, 1657.
Saturday, 28.—St. Augustine.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, AUGUST 21, 1852.

The public has been informed, on authority that claims to be official, or semi-official, that the unfortunate dispute with the United States of America on the subject of the fisheries in the Bay of Fundy is likely to end amicably. Indeed, if we may believe one of the Ministerial journals, the affair is virtually terminated, to the satisfaction of both parties. The terms of adjustment are stated to be those of absolute reciprocity: the Americans are to be at liberty to fish in all British waters, the British to fish in all American waters; subject on both sides to the general law which prohibits the vessels of foreigners to fish within less than three miles to be measured from the nearest land, without distinction of bay or open sea. The same authority states as a fact, what we earnestly hope will prove to be one, that "the American Government acknowledges that no offence has yet been offered to it, though it *slightly* complains that a notice had not been given by the British Government of its purpose of protecting the three miles border of the sea with more vigilance than before. Such a notice, however, upon a further consideration, it has been admitted, would have been equivocal, if not positively insulting, as implying a suspicion that the Government of the United States had connived at a contraband fishery."

We are not aware what reliance is to be placed upon these statements, but as they are promulgated by journals known to have been favoured at previous times with communications from official sources, we cannot imagine them to be altogether groundless. A rumour was circulated at the beginning of the week that Mr. Thomas Baring, of the great firm of Baring, Brothers, had left town on an extraordinary mission to the United States, but the rumour, carrying its own contradiction along with it, met with little credence. It has since been officially denied.

Notwithstanding the ministerial announcement, if such it be that the good understanding between the two Governments, which was momentarily interrupted, has been resumed, it is impossible to avoid coming to the conclusion that there was undue precipitancy on the part of Lord Derby and Sir John Pakington, as well as some disingenuousness on the part of Mr. Webster, the leading statesman on the other side of the Atlantic; and that even yet, a state of feeling may exist in the Bay of Fundy which may bring the navies of the two nations into collision. We trust, however, that such a consummation may be averted; though, if it be, the statesmen of both countries will merit no thanks for it.
